ENVD 4365 (1-6). Special Topics: Technology and Practice. Provides an advanced seminar on new technologies and issues of professional practice in the environmental design professions. May be repeated for credit by petition. Restricted to juniors and seniors. Open to nonmajors on a space available basis.

Miscellaneous

ENVD 3909 (1-3). Independent Study. By special arrangement with instructor. Prereq., junior standing and 3.000 GPA.

ENVD 4909 (1-3). Independent Study. By special arrangement with instructor. Prereq., junior standing and 3.000 GPA.

ENVD 4919 (1-3). Teaching Assistant. By special arrangement with instructor. Prereq., junior standing and 3.000 GPA. Available for pass/fail credit only.

ENVD 4929 (1-3). Research Assistant. By special arrangement with instructor. Prereq., junior standing and 3.000 GPA.

ENVD 4939 (1-3). Internship. By special arrangement with instructor and outside sponsor. Prereq., junior standing and 3.00 GPA. Available for pass/fail credit only.

Anthropology

ANTH 1030-3. Principles of Anthropology 1. Evolution of humanity and culture from beginnings through early metal ages. Covers human evolution, race, prehistory, and rise of early civilizations. This course is taught through Continuing Education. Meets MAPS requirements for social science: general.

ANTH 1040-3. Principles of Anthropology 2. Surveys the world's major culture areas. Covers components of culture, such as subsistence, social organization, religion, and language. This course is taught through Continuing Education. Meets MAPS requirement for social science: general.

ANTH 1100-3. Exploring a Non-Western Culture: The Tamils. Surveys the social and economic patterns, ideas and values, and aesthetic achievements of the Tamils, a Hindu people who live in South India and Sri Lanka. Approved for arts and sciences core curriculum: human diversity.

ANTH 1105-3. Exploring a Non-Western Culture: Tibet. Introduction to Tibetan culture, history, religion, and society from an anthropological perspective, including traditional as well as contemporary dimensions. Topics will include Tibetan Buddhism, politics, nomadism, gender, refugee issues, and the global Tibetan diaspora, all framed within the larger methods and concepts of cultural anthropology. Approved for arts and sciences core curriculum: human diversity.

ANTH 1110-3. Exploring a Non-Western Culture: Japan. Examines modern Japan in terms of cultural styles, social patterns, work practices, aesthetic traditions, ecological conditions, and historical events that shape it as both a non-Western culture and a modern industrial state. Approved for arts and sciences core curriculum: human diversity.

ANTH 1115-3. The Caribbean in Post-Colonial Perspective. Introduces the student to the varied peoples and cultures in the Caribbean region, emphasizing the historical, colonial, and contemporary political-economic contexts of their social structure and cultural patterns. Approved for arts and sciences core curriculum: human diversity.

ANTH 1120-3. Exploring a Non-Western Culture: Hopi and Navajo. Explores two American Indian cultures, Hopi and Navajo, and cultural interrelationships from the prehistoric through the contemporary period, using an integrated, holistic, and humanistic viewpoint. Same as ETHN 1123. Approved for arts and sciences core curriculum: human diversity.

ANTH 1135-3. Exploring a Non-Western Culture: TBA. Examines the geography, kinship, politics and religious values of a particular non-Western people in historical and contemporary context through an anthropological perspective. Approved for arts and sciences core curriculum: human diversity.

ANTH 1140-3. Exploring a Non-Western Culture: The Maya. Explores the culture of the Maya of Central America, emphasizing their material adaptations, social organizations, ideals and values, and artistic achievements in the past and the present. Approved for arts and sciences core curriculum: human diversity.

ANTH 1145-3. Exploring a Non-Western Culture: The Aztecs. Explores the culture of the Aztec people of Central Mexico: their subsistence, society, religion, and achievements, as well as the impact of the Aztec empire in Mesoamerica. Also reviews the clash of a non-western society with the western world with the arrival of the Spanish conquistadors. Approved for arts and sciences core curriculum: human diversity.

ANTH 1150-3. Exploring a Non-Western Culture: Regional Cultures of Africa. Explores a small number of cultures in a specific sub-region of Africa from an integrated holistic viewpoint, emphasizing material adaptations, social patterns, ideas and values, and aesthetic achievements. Approved for arts and sciences core curriculum: human diversity.

ANTH 1160-3. The Ancient Egyptian Civilization. Emphasizes the origin of the Egyptian culture, its importance, and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative

study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Approved for arts and sciences core curriculum: human diversity.

ANTH 1170-3. Exploring Culture and Gender through Film. Uses films and written texts to explore the concepts of culture and gender, as well as ethnicity and race. By looking at gender, ethnicity, and race cross-culturally, students will know how these concepts are constructed in their own society, as well as in others. Approved for arts and sciences core curriculum: human diversity.

ANTH 1180-3. Maritime People: Fishers and Seafarers. Explores important milestones in the development of human societies and cultures that live from the sea. Emphasizes the evolution of maritime adaptations associated with fishing and seafaring from more than 10,000 years ago through the present. Approved for arts and sciences core curriculum: historical context.

ANTH 1190-3. Origins of Ancient Civilizations. Examines origins of the world's first civilizations in Mesopotamia, Egypt, the Indus Valley, Mesoamerica, and the Andes. Covers archaeology of ancient cities, trade, economy, politics, warfare, religion, and ideology. Seeks insights into general processes of cultural evolution. Approved for arts and sciences core curriculum: historical context.

ANTH 1200-3. Culture and Power. Compares contemporary sociopolitical systems across cultures, from non-Western tribal groups to modern states. Introduces students to anthropological approaches for understanding and analyzing political forces, processes, and institutions that affect cultures such as colonialism, warfare, violence, ethnicity, migration, and globalization. Approved for arts and sciences core curriculum: contemporary societies.

ANTH 2009-3. Modern Issues, Ancient Times. Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved, and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life. Same as CLAS 2009. Approved for arts and sciences core curriculum: historical context.

ANTH 2010-3. Introduction to Physical Anthropology 1. Detailed consideration of human biology, the place of humans in the animal kingdom, primate ecology, and fossil evidence for human evolution. Credit not granted for this course and ANTH 2050. Required for ANTH majors. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

ANTH 2020-3. Introduction to Physical Anthropology 2. Continuation of ANTH 2010. Emphasizes genetics, human variation, and microevolution. Prereq., ANTH 2010. Credit not granted for this course and ANTH 2060. Approved for arts and sciences core curriculum: natural science.

ANTH 2030-1. Laboratory in Physical Anthropology 1. Lab in human osteology and musculoskeletal system emphasizing comparative primate morphology, adaptation, and the fossil record documenting the natural history of primates. Coreq., ANTH 2010. Meets MAPS requirement for natural science: lab, when taken with ANTH 2010. Approved for arts and sciences core curriculum: natural science.

ANTH 2040-1. Laboratory in Physical Anthropology 2. Experiments and hands-on exercises designed to enhance understanding of the principles and concepts presented in ANTH 2020. One two-hour class per week. Coreq., ANTH 2020. Approved for arts and sciences core curriculum: natural science.

ANTH 2070-3. Bones, Bodies, and Disease. Studies the human skeleton and introduces techniques used to evaluate demographic variables. Applies techniques through evaluation of photographic images of an excellently preserved mummified skeletal population from ancient Nubia to reconstruct prehistoric patterns of adaptation and biocultural evolution. Offered through Continuing Education only. Recommended prereq., ANTH 2010.

ANTH 2100-3. Frontiers of Cultural Anthropology. Covers current theories in cultural anthropology and discusses the nature of field work. Explores major schools of thought and ethnographic fieldwork in a range of cultures studied by anthropologists. Required for ANTH majors.

ANTH 2200-3. Introduction to Archaeology. Discusses history, basic concepts, techniques, and theoretical construction of archaeological field and laboratory investigations, as well as a general outline of world prehistory. Required for ANTH majors.

ANTH 2210-1. Laboratory Course in Archaeological Methods. Studies analytical methods in archaeological research including those employed both in the field and in the laboratory. Deals with practical exercises illustrating many of the theoretical principles covered in ANTH 2200. Coreq., ANTH 2200.

ANTH 3000-3. Primate Behavior. Surveys naturalistic primate behavior. Emphasizes social behavior, behavioral ecology, and evolution as they lead to an understanding of human behavior. Prereqs., ANTH 2010 or EBIO 1220, and junior standing. Approved for arts and sciences core curriculum: natural science.

ANTH 3010-3. The Human Animal. Identifies genetic, anatomical, physiological, social, and behavioral characteristics humans share with other mammals and primates. Explores how these characteristics are influenced by modern culture. Prereq., ANTH 2010 or equivalent. Approved for arts and sciences core curriculum: natural science.

ANTH 3100-3. Africa: Peoples and Societies in Change. Examines culture and politics in Africa through works by anthropologists and historians, as well as novels, films, and journalistic accounts. Special attention is devoted to the ways in which various African cultures have creatively and resiliently responded to the slave trade, European colonialism, and post-colonialism.

ANTH 3110-3. Ethnography of Mexico and Central America. A broad overview, focusing on Mexico and Guatemala. Major topics include ethnohistory, indigenous and mestizo peoples, and contemporary problems and issues.

ANTH 3130-3. North American Indians: Traditional Cultures. Comprehensive survey of native cultures of America north of Mexico, including a review of their natural environments, prehistory, languages, and major institutions for various culture areas. Restricted to sophomores/juniors/seniors. Same as ETHN 3133.

ANTH 3160-3. Peoples of the South Pacific. Surveys traditional island cultures and contemporary changes in the Pacific, focusing on how the Pacific Islands were first settled, some of the great anthropologists who studied the islanders, and how current environmental changes, such as global warming, threaten the future existence of the islands. Restricted to juniors/seniors.

ANTH 3170-3. America: An Anthropological Perspective. Historical and contemporary aspects of American life are considered from an anthropological perspective. Approved for arts and sciences core curriculum: United States context.

ANTH 3180-3. Gender, Culture, and Sexuality. Focuses on gender, that is, the making of men and women, and how gender is culturally constructed in different societies. Gender describes many areas of behavior, feelings, thoughts, and fantasies that cannot be understood as primarily biologically produced. Sexuality and sexual systems are sometimes viewed as products of particular gendering practices, but recent theories suggest that sexual systems themselves constitute gender. Prereq., ANTH 2100. Similar to WMST 2080.

ANTH 3218-3. Peoples and Cultures of West Africa. Deals with the history and anthropology of selected west African societies in the period before the imposition of European colonial rule. Same as HIST 3218.

ANTH 3300-3. Elements of Religion. Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions. Restricted to sophomores/juniors/seniors. Same as ETHN 3301.

ANTH 4000-3. Quantitative Methods in Anthropology. Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures. Prereqs., ANTH 2010 and 2020. Same as ANTH 5000.

ANTH 4020-3. Explorations in Anthropology. Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings. May be repeated up to 9 total credit hours. Restricted to Junior or Senior Anthropology Majors only. Same as ANTH 5020.

ANTH 4045-3. Introduction to Museum Anthropology. This course traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism. Same as ANTH 5045 and MUSM 5045.

ANTH 4050-3. Anthropology of Jews and Judaism. Explores topics in Jewish anthropology. Course will use the lens of anthropological inquiry to explore, discover and analyze different concepts within Jewish culture. Topics explored will include customs, religious practices, languages, ethnic and regional subdivisions, occupations, social composition, and folklore. Courses will explore fundamental questions about the definition of Jewish identity, practices and communities. May be repeated up to 9 total credit hours. Same as JWST 4050.

ANTH 4060-3. Nutrition and Anthropology. Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition. Prereqs., ANTH 2010 and 2020, or EBIO 1210 and 1220, or EBIO 1030 and 1040. Same as ANTH 5060.

ANTH 4070-3. Methods in Biological Anthropology. Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor. May be repeated up to 6 total credit hours. Prereqs., ANTH 2010 and 2020. Recommended prereqs., ANTH 2030, 2040, and 4000. Restricted to juniors/seniors. Same as ANTH 5070.

ANTH 4110-3. Human Evolutionary Biology. Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes, and molecular studies that have bearing on the study of human evolution. Prereqs., ANTH 2010 or 2020, or EBIO 1210 or 1220. Same as ANTH 5110.

ANTH 4120-3. Advanced Physical Anthropology. Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. May be repeated up to 6 total credit hours. Prereq., ANTH 2010 or 2020, or EBIO 1210 or 1220. Same as ANTH 5120.

ANTH 4129-3. Aegean Art and Archaeology. A detailed study of the cultures of prehistoric Greece, the Cycladic Islands, and Crete, their art and archaeology, and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states. Same as ARTH/CLAS 4129, ANTH 5129.

ANTH 4130-3. Advanced Osteology. Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations. Prereqs., ANTH 2010, 2020, and 4000. Restricted to juniors and seniors. Same as ANTH 5130.

ANTH 4150-3. Human Ecology: Biological Aspects. Discusses role of human populations in local ecosystems, factors affecting population growth, and human adaptability to environmental stress. Detailed consideration of case studies of small-scale societies in different ecosystems. Prereqs., ANTH 2010 and 2020, or EBIO 1210 and 1220. Same as ANTH 5150.

ANTH 4170-3. Primate Evolutionary Biology. Focuses on the fossil record of non-hominoid primates. Special emphasis placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini, and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations. Prereqs., ANTH 2010 or EBIO 1210. Same as ANTH 5170.

ANTH 4180-3. Anthropological Perspectives: Contemporary Issues. Students read, discuss, and write critical evaluations of contemporary publications in anthropology. Identifies basic themes that inform major anthropological perspectives. Students then bring these perspectives to bear on issues currently facing the human species. May be repeated up to 6 total credit hours. Restricted to junior or senior Anthropology majors only.

ANTH 4210-3. Southwestern Archaeology. Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity. Prereq., ANTH 2200. Same as ANTH 5210.

ANTH 4220-3. From Olmec to Aztec: The Archaeology of Mexico. Examines the archaeology of Mexico from the initial peopling of the Americas to the Span-

ish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states, and empires; religion and politics; trade and interaction; ecology and economy; and social organization. Prereq., ANTH 2200. Restricted to juniors or seniors. Same as ANTH 5220.

ANTH 4224-3. Archaeology of the Maya and Their Neighbors. Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America. Prereq., ANTH 2200. Same as ANTH 5224.

ANTH 4240-3. Geoarchaeology. Applies geological principles and instruments to help solve archaeological problems. The focus is on site formation processes, soils, stratigraphy, environments, dating, remote sensing, and geophysical exploration. Environmental and ethical considerations are included. Prereq., ANTH 2200. Same as ANTH 5240.

ANTH 4270-3. Plains Archaeology. Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century. Prereq., ANTH 2200. Same as ANTH 5270.

ANTH 4330-3. Human Ecology: Archaeological Aspects. Surveys archaeological approaches to ecology, economy, and landscape: glaciation, geomorphology, and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural, and complex societies; and ideologically structured landscapes. Prereq., ANTH 2200. Restricted to sophomores, juniors and seniors. Same as ANTH 5330.

ANTH 4340-3. Archaeological Method and Theory. Surveys archaeological theories and methods within the context of the history of archaeology. Includes archaeological approaches to data recovery, analysis, and interpretation as well as an overview of cultural resources management and ethical issues in contemporary archaeology. Prereq., ANTH 2200. Restricted to juniors and seniors.

ANTH 4350 (2-6). Archaeological Field and Laboratory Research. Students participate in archaeological field research conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken. May be repeated up to 6 total credit hours. Prereq., ANTH 2200. Restricted to juniors/seniors. Same as ANTH 5350.

ANTH 4380-3. Lithic Analysis and Replication. Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment, and functional analysis. Percussion and pressure-flaking experiments are performed. Prereq., ANTH 2200. Same as ANTH 5380.

ANTH 4390-3. Research Methods in Archaeology I. Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines. Prereq., ANTH 2200 and instructor consent. Same as ANTH 5390.

ANTH 4420-3. Archaeology of Ancient Egypt. Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Restricted to juniors and seniors. Same as ANTH 5420.

ANTH 4430-3. Biblical Archaeology. Old Testament history in the light of archaeological investigation; the Old Testament within the framework of the literature of the ancient near East. Same as ANTH 5430.

ANTH 4440-3. Egyptian Hieroglyphics 1. Studies the ancient Egyptian language to shed light on the history and cultures of ancient Egypt. Involves reading and translating hieroglyphics into the English language. Same as ANTH 5440.

ANTH 4460-3. Archaeology and Contemporary Society. Explores the intellectual climate in which archaeology is practiced and how it influences archaeological research and reconstruction, laws, regulations, and ethical issues. Explores public use of and engagement with archaeology. Prereq., ANTH 2200 or equivalent. Recommended prereq., one other archaeology course. Same as ANTH 5460.

ANTH 4500-3. Cross-Cultural Aspects of Socioeconomic Development. Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development, and land reform. Same as ANTH 5500.

ANTH 4505-3. Globalization and Transnational Culture. Covers the historical foundations for contemporary global change, addressing colonialism, global outsourcing, and cultural imperialism, with a particular emphasis on gender, class, and consumerism. Prereq., ANTH 2100.

ANTH 4510-3. Applied Cultural Anthropology. Analysis of problems of cultural change due to contacts between people of different cultures. Restricted to senior ANTH or ETHN majors. Same as ETHN 4521 and ANTH 5510.

ANTH 4520-3. Symbolic Anthropology. Explores anthropological approaches to the study of symbolic systems, including cosmology, myth, religion, ritual, and art, as well as everyday patterns of metaphor and the presentation of self. Theoretical issues include semiotics, psychoanalysis, structuralism, liminality, and critical theory. Prereq., ANTH 2100 or instructor consent. Same as ANTH 5520.

ANTH 4530-3. Theoretical Foundations of Sociocultural Anthropology. Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism, and contemporary anthropological approaches. Includes primary readings and seminar-style discussion. Prereq., ANTH 2100 or instructor consent. Same as ANTH 5530.

ANTH 4540-3. Hunters and Gatherers. Explores hunter-gatherer ways of life and the ways in which anthropologists have thought about those ways of life, using lectures, discussion, the professional literature, and film. Topics covered include the history of hunter-gatherer research, relations between this research and archaeological studies of the human past, critiques of classic hunter-gatherer studies, and the current status of hunting and gathering peoples. Prereqs., ANTH 2010, 2020, 2100 and 2200.

ANTH 4560-3. North American Indian Acculturation. Comprehensive survey of changes in the native cultures of America north of Mexico caused by occupation of the continent by Old World populations, including a review of processes of contact, environmental changes, changes in major institutions, the nature of federal/state administration, the reservation system, and contemporary developments. Restricted to senior ANTH or ETHN majors. Same as ETHN 4563 and ANTH 5560. Approved for arts and sciences core curriculum: human diversity.

ANTH 4570-3. Anthropology of Fishing. Examines fishing methods, peoples, societies, and cultures, emphasizing anthropology's role in shaping fisheries management and development policy. Same as ANTH 5570.

ANTH 4580-3. The Holocaust: An Anthropological Perspective. Focuses on the Holocaust during the Third Reich, which involved the murder of millions of people, including six million Jews. Reviews the Holocaust's history, dynamics, and consequences as well as other genocides of the 20th century, using an anthropological approach. Restricted to juniors/seniors. Same as JWST 4580.

ANTH 4600-3. Human Ecology: Cultural Aspects. Examines the relationship between environment and human behavior, emphasizing social organization. Special attention given to examining the extent to which the environment influences subsistence strategies, settlement patterns, social relationships among different groups, and family structure.

ANTH 4610-3. Medical Anthropology. Cultural factors determine states of health and illness in both Western and non-Western societies. The transition from traditional to modern status creates new problems including population growth, aging, changing patterns of morbidity, mortality and health care, and new socioeconomic consequences. Same as ANTH 5610.

ANTH 4620-3. Nationalism and Cultural Citizenship. Explores the nature of ethnic conflict, nationalism, and cultural citizenship in different contexts, including the United States. Is the nation-state dead? What effect do extranational and transnational organizations/institutions (e.g., European Union) have on the development of nationalism? Through the exploration of contemporary theory and case studies, this class will address these important contemporary concerns. Prereq., ANTH 2100.

ANTH 4630-3. Nomadic Peoples of East Africa. Examines the issues of current concern in the study of East African pastoral peoples. The first half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies. Restricted to junior and senior ANTH majors. Same as ANTH 5630.

ANTH 4690 (3-6). Anthropology of Tibet. Explores the culture of Tibet in both historical and thematic manners, considering the long-term development of

Tibetan cultural practices and institutions as well as many of the abrupt changes introduced to Tibet in the 20th century. Topics covered include region, politics, gender, warfare, poetry and literature, and life under Chinese rule and as refugees around the world. Prereq., ANTH 2100.

ANTH 4710-3. Departmental Honors in Anthropology 1. Course work built around theme of research design as a means of integrating previous training in the field of anthropology as well as providing an opportunity to perform creative scientific investigations. The course prepares students to write an honors thesis in ANTH 4720. Required of students doing Anthropology departmental honors. Restricted to sophomores, juniors, and seniors.

ANTH 4720-3. Departmental Honors in Anthropology 2. Continuation of ANTH 4710. Prereq., ANTH 4710.

ANTH 4730-3. Latin American Politics and Culture through Film and Text. Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text, and documentary and non-documentary cinema, this course will explore class relations, ideology, and resistance from the conquest to the present. Prereq., ANTH 2100. Same as ANTH 5730.

ANTH 4740-3. Peoples and Cultures of Brazil. Thematically surveys theoretical and ethnographic issues that have been important in understanding Brazil. Read and write critically about textual and visual representations of Brazil presented in the course. Prereq., ANTH 2100; three or more cultural anthropology courses recommended.

ANTH 4750-3. Culture and Society in South Asia. Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal, and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict, and social change. Prereq., ANTH 2100 or instructor consent. Same as ANTH 5750.

ANTH 4760-3. Ethnography of Southeast Asia and Indonesia. Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore, and Indonesia, with some coverage of mainland Southeast Asia. Prereq., ANTH 2100. Restricted to juniors or seniors. Same as ANTH 5760.

ANTH 4800-3. Language and Culture. Same as LING 4800.

ANTH 4840 (1-6). Independent Study. For upper-division undergraduate students. May be repeated up to 6 total credit hours.

ANTH 4910 (1-3). Teaching Anthropology. Practicum by special arrangement only. Students learn to teach anthropology by serving as recitation leaders or tutors in introductory courses or as small group leaders in advanced courses. May be repeated up to 6 total credit hours. Prereq., instructor consent.

ANTH 4930 (1-6). Anthropology Internship. Provides academically supervised opportunities for junior and senior anthropology majors and graduate students to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning. May be repeated up to 9 total credit hours. Prereqs., ANTH 2010, 2100, and 2200, junior standing, anthropology major with a minimum 3.25 GPA, and departmental consent. Same as ANTH 5930.

ANTH 5000-3. Quantitative Methods in Anthropology. Same as ANTH 4000.

ANTH 5020-3. Explorations in Anthropology. Same as ANTH 4020.

ANTH 5045-3. Introduction to Museum Anthropology. Traces the development of anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of anthropology, material culture, and colonialism. Same as ANTH 4045 and MUSM 5045.

ANTH 5060-3. Nutrition and Anthropology. Same as ANTH 4060.

ANTH 5070-3. Methods in Biological Anthropology. May be repeated up to 6 total credit hours. Same as ANTH 4070.

ANTH 5110-3. Human Evolutionary Biology. Same as ANTH 4110.

ANTH 5120-3. Advanced Physical Anthropology. Same as ANTH 4120.

ANTH 5129-3. Aegean Art and Archaeology. Same as ANTH 4129.

ANTH 5130-3. Advanced Osteology. Same as ANTH 4130.

ANTH 5150-3. Human Ecology: Biological Aspects. Same as ANTH 4150.

ANTH 5170-3. Primate Evolutionary Biology. Same as ANTH 4170.

ANTH 5210-3. Southwestern Archaeology. Same as ANTH 4210.

ANTH 5220-3. From Olmec to Aztec: The Archaeology of Mexico. Same as ANTH 4220.

ANTH 5224-3. Archaeology of the Maya and Their Neighbors. Same as ANTH 4224.

ANTH 5240-3. Geoarchaeology. Same as ANTH 4240.

ANTH 5270-3. Plains Archaeology. Same as ANTH 4270.

ANTH 5330-3. Human Ecology: Archaeological Aspects. Same as ANTH 4330.

ANTH 5345-3. Archaeological Theory. Provides an advanced historical introduction to archaeological theory and methods. Designed to help students understand why certain issues have been and are important to the development of archaeology, especially American archaeology. Explores issues within the context of the history of anthropology and American society as a whole.

ANTH 5350 (2-6). Archaeological Field and Laboratory Research. Same as ANTH 4350.

ANTH 5380-3. Lithic Analysis and Replication. Same as ANTH 4380.

ANTH 5390-3. Research Methods in Archaeology 1. Same as ANTH 4390.

ANTH 5400-3. Research Methods in Archaeology 2. Focuses on the design of research including constructing empirical arguments and testing them, data gathering, site formation processes, field strategies (archival resources, mapping, field survey, surface collecting/recording, excavation and preliminary analysis) and artifact analysis as it relates to research design.

ANTH 5420-3. Archaeology of Ancient Egypt. Same as ANTH 4420.

ANTH 5430-3. Biblical Archaeology. Same as ANTH 4430.

ANTH 5440-3. Egyptian Hieroglyphics 1. Same as ANTH 4440.

ANTH 5460-3. Archaeology and Contemporary Society. Same as ANTH 4460.

ANTH 5500-3. Cross-Cultural Aspects of Socioeconomic Development. Same as ANTH 4500.

ANTH 5510-3. Applied Cultural Anthropology. Same as ANTH 4510.

ANTH 5520-3. Symbolic Anthropology. Same as ANTH 4520.

ANTH 5530-3. Theoretical Foundations of Sociocultural Anthropology. Same as ANTH 4530.

ANTH 5560-3. North American Indian Acculturation. Same as ANTH 4560.

ANTH 5570-3. Anthropology of Fishing. Same as ANTH 4570.

ANTH 5600-3. Human Ecology: Cultural Aspects. Reviews and critically examines the major theoretical perspectives for understanding the relationship between human social behavior and the environment developed in the social sciences, especially anthropology, over the last 100 years.

ANTH 5610-3. Medical Anthropology. Same as ANTH 4610.

ANTH 5630-3. Nomadic Peoples of East Africa. Same as ANTH 4630.

ANTH 5730-3. Latin American Politics and Culture through Film and Text. Same as ANTH 4730.

ANTH 5750-3. Culture and Society in South Asia. Same as ANTH 4750.

ANTH 5760-3. Ethnography of Southeast Asia and Indonesia. Same as ANTH 4760.

ANTH 5770-3. Core Course: Archaeology. Provides a graduate-level overview of analytic issues relevant to all phases of archaeological research and of the diversity of theoretical perspectives within the field as a whole. Course is required for all first-year graduate students in anthropology. Prereq., graduate status in anthropology.

ANTH 5780-3. Core Course: Cultural Anthropology. Provides an intense, graduate-level introduction to the discipline of cultural anthropology, with an emphasis upon critically assessing those methods, theories, and works that have shaped the field from the 19th century to the present time. Required of all first-year graduate students in anthropology. Restricted to anthropology graduate students or instructor consent.

ANTH 5785-3. Advanced Seminar in Cultural Anthropology. Details the history of theory and practice in contemporary cultural anthropology, considering the development of major theoretical schools of thought and the integration of general social theory within anthropology. Required of masters students in cultural anthropology. Restricted to ANTH graduate students or instructor consent.

ANTH 5790-3. Core Course: Biological Anthropology. Discusses how biological anthropologists use evidence and concepts from evolutionary theory, human biology, and ecology to understand the evolution, diversification, and adaptation of human populations. Required of all first-year graduate students in anthropology. Prereq., graduate status in anthropology.

ANTH 5840 (1-6). Guided Study. Directed individual research based on a specific area of specialization. May be repeated up to 6 total credit hours.

ANTH 5930 (1-6). Anthropology Internship. Same as ANTH 4930.

ANTH 6150-3. Critical and Theoretical Issues in Museums. Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence, and relations between curatorial practice, collecting, and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present. Prereq., MUSM 5011 or instructor consent. Same as MUSM 6150, HIST 6150, and ARTH 6150.

ANTH 6320-3. Linguistic Anthropology. Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse. Same as LING 6320.

ANTH 6940-1. Master's Candidate for Degree.

ANTH 6950 (1-6). Master's Thesis.

ANTH 7000-3. Seminar: Current Research Topics in Cultural Anthropology. Discusses current research and theoretical issues in the field of cultural anthropology. May be repeated up to 6 total credit hours. Restricted to graduate students.

ANTH 7010-3. Seminar: Contemporary Theory in Cultural Anthropology. Addresses current theoretical perspectives in cultural anthropology and controversies surrounding them. Discusses science, history, interpretation, and post-modernism. Includes the relationship between theory and method as well as the production of ethnography. May be repeated up to 9 total credit hours.

ANTH 7020-3. Seminar: Physical Anthropology. In-depth discussion of selected topics in physical anthropology with emphasis on recent research. May be repeated up to 6 total credit hours.

ANTH 7030-3. Seminar: Archaeology. Intensive examination of selected theoretical or methodological topics in archaeology. Topics vary with current research emphasis. May be repeated up to 6 total credit hours.

ANTH 7140-3. Seminar: Archaeology of Selected Areas. Considers archaeology of a specified area, either geographical or topical. Areas selected in accordance with current research interests. May be repeated up to 9 total credit hours.

ANTH 7300-3. Seminar: Research Methods in Cultural Anthropology. May be repeated up to 6 total credit hours.

ANTH 7620-3. Seminar: Ethnography and Cultural Theory. Explores how ethnographic writing has evolved over the past century to incorporate different forms of cross-cultural representation and to accommodate new theoretical paradigms. Includes ethnographic authority and reflexivity, as well as embedded theories and blurred genres of cultural research.

ANTH 7840 (1-6). Independent Research. Research aimed at developing a solution to an originally conceived research problem. May be repeated up to 6 total credit hours.

ANTH 8990 (1-10). Doctoral Dissertation. All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the graduate school section.

Applied Math

APPM 1340-3. Calculus 1 with Algebra, Part A. Studies selected topics in analytical geometry and calculus: rates of change of functions, limits, derivatives and

their applications. APPM 1340-1345 together are equivalent to APPM 1350. The sequence APPM 1340-1345 is specifically designed for students whose manipulative skills in the techniques of high school algebra and precalculus may be inadequate for APPM 1350. Prereqs., 2 years high school algebra, 1 year geometry, 1 semester trigonometry. Credit not granted for this course and MATH 1150.

APPM 1345-3. Calculus 1 with Algebra, Part B. Continuation of APPM 1340. Studies selected topics in calculus: derivatives and their applications, integration, differentiation and integration of transcendental functions. Algebraic and trigonometric topics are studied throughout, as needed. Prereq., APPM 1340. Credit not granted for this course and APPM 1350 or MATH 1300.

APPM 1350-4. Calculus 1 for Engineers. Topics in analytical geometry and calculus including limits, rates of change of functions, derivatives and integrals of algebraic and transcendental functions, applications of differentiations and integration. Prereqs., 2 years high school algebra, 1 year geometry, and 1/2 year trigonometry; or approval by faculty advisor. Credit not granted for this course and MATH 1080, 1081, 1090, 1100, 1300, 1310, APPM 1345, or ECON 1088. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

APPM 1360-4. Calculus 2 for Engineers. Continuation of APPM 1350. Focuses on applications of the definite integral, methods of integration, improper integrals, Taylor's theorem, and infinite series. Prereqs., APPM 1350 or MATH 1300 (min. grade C-). Credit not granted for this course and MATH 2300.

APPM 1710-3. Tools and Methods for Engineering Computing. Designed for students with little or no programming background. Students learn procedural and object-oriented programming through development of games, simulations, and animations using Flash/ActionScript, VB/Excel, JAVA, MATLAB, and real-world applications. Activities are oriented toward smaller projects that address topics in beginning science, engineering, and mathematics courses. Students gain practical, applicable skills. Same as ATLS 1710.

APPM 1720-3. Programming and Simulation Development. Students learn to plan, develop, and test applications (games, simulations, and animations) that embody mathematical formulations of problems in areas such as transportation, nutrition, and alternative energy. Prereq., APPM 1710 or knowledge of an object-oriented programming language. Same as ATLS 1720.

APPM 2350-4. Calculus 3 for Engineers. Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes. Prereq., APPM 1360 or MATH 2300 (min. grade C-). Credit not granted for this course and MATH 2400.

APPM 2360-4. Introduction to Differential Equations with Linear Algebra. Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations. Prereq., APPM 1360 or MATH 2300 (min. grade C-). Credit not granted for this course and both MATH 3130 and 4430.

APPM 2450-1. Calculus 3 Computer Lab. Selected topics in analytic geometry and calculus with a focus on symbolic computation using Mathematica or MATLAB. Coreq., APPM 2350.

APPM 2460-1. Differential Equations Computer Lab. Selected topics in differential equations and linear algebra with a focus on symbolic computation using Mathematica or MATLAB. Coreq., APPM 2360.

APPM 2750-4. JAVA: Training and Mathematical Algorithms. Preparatory course for JAVA programming. Provides necessary background for JAVA language: basic object-oriented concepts, analysis, and design. Learn to create JAVA applets and applications, create graphic context, and identify the key features of JAVA foundation classes as well as other JAVA-related technology. Material is taught in the context of mathematical algorithms from calculus. Prereqs., APPM 1350 and programming experience. Recommended prereq., APPM 1360.

APPM 3010-3. An Introduction to Nonlinear Systems: Chaos. Both majors and minors in the physical sciences are introduced to classes of tools useful in the analysis of nonlinear systems. Prereqs., APPM 1360 and 2360.

APPM 3050-3. Scientific Computing in MATLAB. Topics covered include: approximations in computing, computer arithmetic, interpolation, matrix computations, nonlinear equations, optimization, and initial-value problems with emphasis on the computational cost, efficiency, and accuracy of algorithms. The problem sets are application-oriented with examples taken from orbital mechanics, physics, genetics, and fluid dynamics. Prereqs., APPM 1360 and 2360.

APPM 3170-3. Discrete Applied Mathematics. Emphasizes selected applications of graph theory to computer science, engineering, operations research, social sciences, and biology. Topics include the basic properties of graphs and digraphs, and their matrix representations. Relates graph properties to applications such as scheduling, architecture of parallel processors, gray codes, traveling salesman problems, and assignment problems. Prereq. or coreq., APPM 3310.

APPM 3310-3. Matrix Methods and Applications. Introduces linear algebra and matrices, with an emphasis on applications, including methods to solve systems of linear algebraic and linear ordinary differential equations. Discusses vector space concepts, decomposition theorems, and eigenvalue problems. Credit not granted for this course and MATH 3130. Prereq., APPM 2350.

APPM 3570-3. Applied Probability. Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, moment generating functions, law of large numbers, central limit theorem, Poisson process, and multivariate Gaussian distribution. Prereq., APPM 2350 or MATH 2400. Credit not granted for this course and ECEN 3810 or MATH 4510.

APPM 4120-3. Introduction to Operations Research. Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits. Prereqs., APPM 3310 or MATH 3130. Same as APPM 5120 and MATH 4120.

APPM 4350-3. Methods in Applied Mathematics: Fourier Series and Boundary Value Problems. Reviews ordinary differential equations, including solutions by Fourier series. Physical derivation of the classical linear partial differential equations (heat, wave, and Laplace equations). Solution of these equations via separation of variables, with Fourier series, Fourier integrals, and more general eigenfunction expansions. Prereqs., APPM 2350 and 2360 (min. grade C-). Coreq., APPM 3310. Same as APPM 5350.

APPM 4360-3. Methods in Applied Mathematics: Complex Variables and Applications. Introduces methods of complex variables, contour integration, and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms, and Riemann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics. Prereqs., APPM 2350 and 2360, or 3310 (min. grade C-) or instructor consent. Same as APPM 5360.

APPM 4380-3. Modeling in Applied Mathematics. An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition. Prereqs., APPM 2350 and 2360. Recommended prereqs., APPM 3310, 4350 and 4650. Same as APPM 5380.

APPM 4390-3. Modeling in Mathematical Biology. Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology, and bioengineering. Coreq., APPM 4350 or instructor consent. Same as APPM 5390.

APPM 4440-3. Undergraduate Applied Analysis 1. Provides a rigorous treatment of topics covered in Calculus 1 and 2. Topics include convergent sequences; continuous functions; differentiable functions; Darboux sums, Riemann sums, and integration; Taylor and power series and sequences of functions. Prereq., APPM 2350 and 2360 or equivalent. Coreq., APPM 3310.

APPM 4450-3. Undergraduate Applied Analysis 2. Continuation of APPM 4440. Study of multidimensional analysis including n-dimensional Euclidean space, continuity and uniform continuity of functions of several variables, differentiation, linear and nonlinear approximation, inverse function and implicit function theorems, and a short introduction to metric spaces. Prereqs., APPM 2350, 2360, and 4440.

APPM 4520-3. Introduction to Mathematical Statistics. Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness; tests of simple and composite hypotheses, linear models, and multiple regression analysis. Analyzes variance distribution-free methods. Prereq., MATH 4510 or APPM 3570. Same as APPM 5520 and MATH 4520.

APPM 4540-3. Introduction to Time Series. Single and multivariable regression, forecasting using regression models, time series models, and modeling with MA, AR, ARMA, and ARIMA models, forecasting with time series models, and spec-

tral analysis. Prereqs., APPM 3570 or MATH 4510, and APPM 4520 or MATH 4520. Same as APPM 5540 and MATH 4540.

APPM 4560-3. Markov Processes, Queues, and Monte Carlo Simulations. Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time. Queuing theory, terminology, and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study. Prereq., APPM 3570 or equivalent. Same as APPM 5560.

APPM 4570-3. Statistical Methods. Covers discrete and continuous probability laws, random variables; expectations; laws of large numbers and central limit theorem; estimation, testing hypothesis, analysis of variance, regression analysis, and nonparametric methods. Emphasizes applications with an introduction to packaged computer programs. Prereq., APPM 1360 or equivalent Calculus 2 course. Same as APPM 5570.

APPM 4580-3. Statistical Applications: Software and Methods. Combines statistical methods with practical applications and computer software. Develops commonly used statistical models such as analysis of variance as well as linear and logistic regression. The statistical models are implemented and interpreted in the context of actual data sets using available statistical software. Continuation of APPM 4570. Prereq., APPM 4570 or any course in statistics. Same as APPM 5580.

APPM 4650-3. Intermediate Numerical Analysis 1. Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Prereqs., APPM 3310 or MATH 3130, and knowledge of a programming language. Same as MATH 4650.

APPM 4660-3. Intermediate Numerical Analysis 2. Continuation of APPM 4650. Examines numerical solution of initial-value problems and two-point boundary-value problems for ordinary differential equations. Also looks at numerical methods for solving partial differential equations. Prereq., APPM 4650 and knowledge of a programming language. Same as MATH 4660.

APPM 4720 (1-3). Open Topics in Applied Mathematics. Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. May be repeated up to 6 total credit hours. Prereqs., variable, depending on the topic. See instructor. Same as APPM 5720.

APPM 4840 (1-3). Reading and Research in Applied Mathematics. Introduces undergraduate students to the research foci of the Department of Applied Mathematics. May be repeated up to 9 total credit hours. Prereq., APPM 3310 or MATH 3130. Recommended prereq., a course in ordinary or partial differential equations.

APPM 4950 (1-3). Seminar in Applied Mathematics. Introduces undergraduate students to the research foci of the program in applied mathematics. It is also designed to be a capstone experience for the program's majors. May be repeated up to 6 total credit hours. Prereq., APPM 3310 or MATH 3130. Recommended prereq., course in ordinary or partial differential equations. Similar to APPM 4955.

APPM 5040 (1-2). Calculus Applications for High School Teachers. A fast-paced, intensive calculus course designed for high school mathematics teachers. Provides a deeper understanding of fundamental calculus concepts and an introduction to technological tools, including computer software used in the analysis of real-world problems. Offered through Continuing Education only. Prereqs., APPM 1350 and 1360. Recommended prereqs., APPM 2350 and 2360.

APPM 5050 (1-2). Discrete Math for K–12 Teachers. An intensive study of selected topics in discrete math, including Boolean algebra, inductive proofs, discrete probability, election theory and fair division, graph theory, and recursion. Focus on applications and technological tools to increase understanding. Offered through Continuing Education only. Prereq., one undergraduate probability course. Recommended prereq., APPM 3310 or MATH 3130.

APPM 5070 (1-2). Applied Statistics for High School Teachers. A fast-paced, intensive course in statistics designed for high school mathematics teachers. Covers selected topics from probability and statistics, including random variables, central limit theorem, sampling design, regression, and interference. Uses technological tools, including Minitab and SPSS, to analyze real-world statistical problems. Offered through Continuing Education only. Prereq., undergraduate course in probability and statistics.

APPM 5120-3. Introduction to Operations Research. Same as APPM 4120 and MATH 5120.

APPM 5350-3. Methods in Applied Mathematics: Fourier Series and Boundary Value Problems. Restricted to graduate students. Same as APPM 4350.

APPM 5360-3. Methods in Applied Mathematics: Complex Variables and Applications. Prereq., graduate status in engineering or arts and sciences, or instructor consent. Same as APPM 4360.

APPM 5380-3. Modeling in Applied Mathematics. Same as APPM 4380.

APPM 5390-3. Modeling in Mathematical Biology. Same as APPM 4390.

APPM 5430-3. Methods in Applied Mathematics: Applications of Complex Variables. Reviews basic ideas of complex analysis, including solutions of ODEs and PDEs of physical interest via complex analysis; conformal mapping, including Schwarz-Christoffel transformations and generalizations; computational methods; Riemann-Hilbert problems; and topics in asymptotic methods. Prereq., APPM 4360 or 5360, or instructor consent.

APPM 5440-3. Applied Analysis 1. Discusses the elements of basic real and complex analysis, Banach spaces, L_p spaces, and many relevant inequalities. Includes applications of existence and uniqueness of solutions to various types of ordinary differential equations, partial differential equations, and integral equations. Prereqs., APPM 4440 and 4450 or equivalent or instructor consent.

APPM 5450-3. Applied Analysis 2. Continuation of APPM 5440. Prereq., APPM 5440 or instructor consent.

APPM 5460-3. Methods in Applied Mathematics: Dynamical Systems and Differential Equations. Introduces the theory and applications of dynamical systems through solutions to differential equations. Covers existence and uniqueness theory, local stability properties, qualitative analysis, global phase portraits, perturbation theory, and bifurcation theory. Special topics may include Melnikov methods, averaging methods, bifurcations to chaos, and Hamiltonian systems. Prereqs., undergraduate courses equivalent to APPM 2360, 3310, and MATH 4310.

APPM 5470-3. Methods of Applied Mathematics: Partial Differential and Integral Equations. Studies properties and solutions of partial differential equations. Covers methods of characteristics, well-posedness, wave, heat and Laplace equations, Green's functions, and related integral equations. Prereqs., APPM 4350 and 4360, or MATH 4430, or equivalent.

APPM 5480-3. Methods of Applied Mathematics: Approximation Methods. Covers asymptotic evaluation of integrals (stationary phase and steepest descent), perturbation methods (regular and singular methods, and inner and outer expansions), multiple scale methods, and applications to differential and integral equations. Prereq., APPM 5470 or instructor consent.

APPM 5520-3. Introduction to Mathematical Statistics. Prereq., one semester calculus-based probability course, such as MATH 4510 or APPM 3570. Same as APPM 4520 and MATH 5520.

APPM 5540-3. Introduction to Time Series. Same as APPM 4540 and MATH 5540.

APPM 5560-3. Markov Processes, Queues, and Monte Carlo Simulations. Prereq., APPM 3570 or equivalent. Same as APPM 4560.

APPM 5570-3. Statistical Methods. Same as APPM 4570.

APPM 5580-3. Statistical Applications: Software and Methods. Continuation of APPM 5570. Prereq., one semester of statistics. Same as APPM 4580.

APPM 5600-3. Numerical Analysis 1. Solution of nonlinear algebraic equations, interpolation, integration, approximation, and numerical linear algebra. Prereq., APPM 3310 or MATH 3130, and experience with a scientific programming language.

APPM 5610-3. Numerical Analysis 2. Numerical linear algebra, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Prereq., APPM 5600 or MATH 5600.

APPM 5720 (1-3). Open Topics in Applied Mathematics. Same as APPM 4720.

APPM 6470-3. Advanced Partial Differential Equations. Continuation of APPM 5470. Advanced study of the properties and solutions of elliptic, parabolic, and hyperbolic partial differential equations. Topics include the study of Sobolev spaces and variational methods as they relate to PDEs, and other topics as time permits. Prereq., APPM 5470.

APPM 6520-3. Mathematical Statistics. Emphasizes mathematical theory of statistics. Topics include distribution theory, estimation and testing of hypotheses, multivariate analysis, and nonparametric inference, all with emphasis on theory. Prereq., APPM 5520 or MATH 5520.

APPM 6550-3. Introduction to Stochastic Processes. Systematic study of Markov chains and some of the simpler Markov processes including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences. Prereqs., MATH 4001, MATH 4510 or APPM 3570, or APPM 4560, or instructor consent. Same as MATH 6550.

APPM 6610-3. Introduction to Numerical Partial Differential Equations. Covers finite difference, finite element, finite volume, pseudo-spectral, and spectral methods for elliptic, parabolic, and hyperbolic partial differential equations. Prereq., APPM 5600. Recommended prereq., APPM 5610 or graduate numerical linear algebra.

APPM 6640-3. Multigrid Methods. Develops a fundamental understanding of the principles and techniques of the multigrid methodology, which is a widely used numerical approach for solving many problems in such diverse areas as aerodynamics, astrophysics, chemistry, electromagnetics, hydrology, medical imaging, meteorology/oceanography, quantum mechanics, and statistical physics.

APPM 6900 (1-6). Independent Study. Introduces graduate students to research foci of the Department of Applied Mathematics. Prereq., instructor consent.

APPM 6940-1. Master's Degree Candidate.

APPM 6950 (1-6). Master's Thesis. May be repeated up to 6 total credit hours.

APPM 7100-3. Mathematical Methods in Dynamical Systems. Covers dynamical systems defined by mappings and differential equations. Hamiltonian mechanics, action-angle variables, results from KAM and bifurcation theory, phase plane analysis, Melnikov theory, strange attractors, chaos, etc. Prereq., APPM 5460.

APPM 7300-3. Nonlinear Waves and Integrable Equations. Includes basic results associated with linear dispersive wave systems, first-order nonlinear wave equations, nonlinear dispersive wave equations, solitons, and the methods of the inverse scattering transform. Prereqs., APPM 5470–5480, PHYS 5210, or instructor consent.

APPM 7400 (1-3). Topics in Applied Mathematics. Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the core courses in applied mathematics. May be repeated up to 6 total credit hours. Prereq., instructor consent.

APPM 7900 (1-3). Independent Study. Introduces graduate students to research foci of the Department of Applied Mathematics. Prereq., instructor consent.

APPM 8000-1. Colloquium in Applied Mathematics. Introduces graduate students to the major research foci of the Department of Applied Mathematics. Prereq., instructor consent.

APPM 8100-1. Seminar in Dynamical Systems. Introduces advanced topics and research in dynamical systems. Prereq., instructor consent.

APPM 8300 (1-3). PDE and Analysis Seminar. Introduces the core methods in the analysis of nonlinear partial differential and integral equations or systems to graduate students. Provides a vehicle for the development, presentation and corporative research of new topics in PDE and analysis. Prereq., APPM 5440.

APPM 8600-1. Seminar in Computational Mathematics. Introduces advanced topics and research in computational mathematics. Prereq., instructor consent.

APPM 8990 (1-10). Doctoral Dissertation. All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. No more than 10 credit hours may be taken in any one semester.

See Asian Languages and Civilizations.

Art and Art History

Foundations

ARTS 1010-3. Introduction to Studio Art. Presents creative activity conceptually, and art history thematically, with an interdisciplinary, experimental, and multicul-

tural focus. Fine arts majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development.

ARTS 1020-3. Introduction to Studio Art 2. Presents creative activity conceptually and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Art and art history majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development. Prereq., ARTS 1010.

ARTS 1030-3. Principles of Color. Introduces the relative effects of color as used by the artist. Emphasizes the practice of color relations including basic characteristics, mixtures, illusions, optical mixture, color intervals, and color quantity. May not be repeated.

Integrated Arts

ARTS 4130-3. Integrated Media. Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture, and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio, and video art. Same as ARTS 5130.

ARTS 4540-3. Generative Art. Attends to the interdisciplinary pursuits of scientists, humanists, and anyone interested in creating works of visual art according to step by step procedures as in musical compositions, mathematical formulae, linguistic rules, computer programs, etc. Includes collaborative and individual projects. May be repeated up to 6 total credit hours. Same as ARTS 5540.

ARTS 5130-3. Integrated Media. Same as ARTS 4130.

ARTS 5140-3. Integrated Arts Studio. Explores the creative process through a series of conceptually-based studio exercises. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Includes individual and collaborative studio projects, as well as reading and writing about the course themes. May be repeated up to 9 total credit hours.

ARTS 5150-3. Integrated Arts Seminar. Investigates the conjunction of interdisciplinary concepts in the creation of art. Looks beyond traditional media to new sources for art-making. A curious intellect, combined with exceptional research skills, will be the basis for original writing and rigorous discussion.

ARTS 5540-3. Generative Art. Same as ARTS 4540.

Ceramics

ARTS 1875-3. Ceramics for Nonmajors. Encompasses broad and fundamental uses of clay. Basic instruction and demonstration of throwing, hand building, and primitive clay forming methods. Investigates utility, function, and ceramics in the broader context of contemporary art. Slide presentations explore historical and contemporary attitudes involving ceramics.

ARTS 2085-3. Ceramics 2: Handbuilding. Introduces techniques of hand-built clay forms as they relate to function and nonfunction. Various clay techniques, glazing, and firing procedures are explored. Emphasizes ceramics in the broader context of contemporary art. May not be repeated. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400.

ARTS 2095-3. Ceramics 2: Wheelthrowing. Introduces techniques of wheel-thrown forms as they relate to function and nonfunction. Explores various glazing and firing methods. May not be repeated. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400.

ARTS 3085-3. Ceramics 3. Deals with further exploration of techniques approached in ARTH 2085 and 2095. Students are encouraged to develop personal concentration in relation to medium. May be repeated up to 6 total credit hours. Prereqs., ARTS 2085, 2095.

ARTS 3845 (1-3). Undergraduate Independent Study: Ceramics. Reserved for special projects in ceramics not offered in the curriculum. May be repeated up to 6 total credit hours. Prereq., ARTS 3085 and instructor consent. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

ARTS 4085-3. Ceramics 4. Includes lectures, research, and experimentation in clay (wheel and hand construction techniques). May be repeated up to 12 total credit hours. Prereq., ARTS 3085.

ARTS 4095-3. Special Topics in Ceramics. Designed for students majoring in ceramics. May be repeated up to 9 total credit hours. Taught with ARTS 5095. Prereq., ARTS 3085. Restricted to majors.

ARTS 5075-3. Graduate Ceramics. May be repeated up to 18 total credit hours.

ARTS 5095-3. Graduate Special Topics in Ceramics. Taught with ARTS 4095.

Media Arts

ARTS 2126-3. Digital Art 1. An introductory course in the use of the personal computer to create and process images in the visual arts. Prereq., ARTS 1010, 1020 and ARTH 1300 or 1400.

ARTS 3196-3. Photo-Imaging. Introduces techniques, software, and related concepts of digital photography as art. Emphasizes digital photography as a means to formal and expressive ends. Prereq., ARTS 1171.

ARTS 3236-3. Electronic Arts Survey. Explores the development of video as an art form through tape screenings, readings, lectures, and discussions. Prerequisite for further studies in video production.

ARTS 3906 (1-3). Undergraduate Independent Study: Video. Reserved for special projects in video not offered in the curriculum. May be repeated up to 6 total credit hours. Prereq., ARTS 4246 and instructor consent. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

ARTS 4126-3. Digital Art 2. Offers studio experience using personal computer in the generation and processing of imagery in the visual arts. Prereq., ARTS 2126. Same as ARTS 5126.

ARTS 4176-3. New Directions in Digital Art. Investigates the use of digital art in various contexts including digital narrative, web publishing, Internet art, multimedia performance, animation, conceptual art, information art, sound art, language art, and network installations. Prereqs., ARTS 2126 and 4316/5316 or instructor consent. Same as ARTS 5176.

ARTS 4196-3. Advanced Photo-Imaging. Offers an in-depth exploration of digital imaging in the context of the history, aesthetics, and tradition of photography as contemporary art. Emphasis is on digital manipulation, output, and individual growth and development. Prereq., ARTS 2191 or advanced standing in photography or media arts. Same as ARTS 5196.

ARTS 4226-3. Advanced Computer Imaging. Explores advanced techniques and concepts of digital image-making. Emphasizes the creative application of computer imaging in the production of visual art through individual projects. Prereq., ARTS 4126. Restricted to junior or senior ARTS or ARTH majors. Same as ARTS 5226.

ARTS 4236-3. Electronic Arts Survey 2. Continuation of electronic arts survey. Explores the development of video as an art form. Prerequisite for further studies in video production. Same as ARTS 5236.

ARTS 4246-3. Beginning Video Production. Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400 or instructor consent. Same as ARTS 5246 and FILM 4240.

ARTS 4316-3. History and Theory of Digital Art. Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality, and the networked interface. Includes collaborative and individual projects. Prereq., ARTS 2126 or instructor consent. Same as ARTS 5316.

ARTS 4346-3. Intermediate Video Production. Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions, and readings. Further theoretical understanding of video as an art form. Prereq., ARTS 4246 or instructor consent. Same as ARTS 5346 and FILM 4340.

ARTS 4446-3. Advanced Video Production. Continuation of intermediate video production. Explores advanced technical skills to control the quality of the video

image in production, postproduction, and distribution. Emphasizes self-motivated independent projects, conceptual realization of advanced student work and basic working knowledge of distribution and life as a media artist. Promotes further theoretical understanding of video as an art form. May be repeated up to 9 total credit hours. Prereq., ARTS 4346 or instructor consent. Same as ARTS 5446 and FILM 4440.

ARTS 5126-3. Graduate Digital Art 2. Same as ARTS 4126.

ARTS 5176-3. Graduate New Directions in Digital Art. Same as ARTS 4176.

ARTS 5196-3. Graduate Advanced Photo-Imaging. Same as ARTS 4196.

ARTS 5226-3. Graduate Advanced Computer Imaging. May be repeated up to 6 total credit hours. Prereq., ARTS 5126. Same as ARTS 4226.

ARTS 5236-3. Graduate Electronic Arts Survey 2. Same as ARTS 4236.

ARTS 5246-3. Graduate Beginning Video Production. Same as ARTS 4246.

ARTS 5316-3. Graduate History and Theory of Digital Arts. Same as ARTS 4316.

ARTS 5346-3. Graduate Intermediate Video Production. Prereq., ARTS 4246/5246. Same as ARTS 4346.

ARTS 5446-3. Graduate Advanced Video Production. Same as ARTS 4446.

ARTS 5846 (1-3). Graduate Independent Study: Video. May be repeated up to 6 total credit hours.

Painting/Drawing

ARTS 1002-3. Beginning Drawing 1. In this studio course the formal visual elements are presented through a study of spatial relationships. The course is built around a series of related problems, each of which is designed to develop fluency in drawing, offer experience in handling media, foster self-confidence, and promote an understanding of the visual elements and their role in the development of pictorial space. Prereqs., ARTS 1010, 1020, and 1030.

ARTS 1012-3. Drawing for Nonmajors. Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated.

ARTS 1202-3. Beginning Painting 1. The aim of this course is to develop the basic skills, techniques and processes of painting with an understanding of basic color principles. This integration of paint application and color principle will develop awareness that painting and color are used, not only as mediums for representation, but also as mediums for expressive purposes. Demonstrations, lectures, group and individual critiques will be given throughout the course. Prereqs., ARTS 1010, 1020, and 1030.

ARTS 1212-3. Painting for Nonmajors. Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated.

ARTS 2002-3. Figure Drawing. Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated. Prereqs., ARTS 1010, 1020, and either ARTH 1300 or 1400.

ARTS 2202-3. Figure Painting. Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated. Prereqs., ARTS 1010, 1020, and either ARTH 1300 or 1400.

ARTS 3002-3. Drawing Alternative Process/Materials. Continuation of Drawing 2. Offers creative possibilities in drawing and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information. May be repeated once. Prereq., ARTS 2002.

ARTS 3202-3. Painting Alternative Process/Materials. Continuation of Painting 2. Offers creative possibilities in painting and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information. May be repeated up to 6 total credit hours. Prereq., ARTS 2202.

ARTS 3702-3. Special Focus in Painting and Drawing. Offers varied focus and special topics in painting, drawing, and related media to explore specialized directions and creative possibilities. Emphasizes experimentation. Content varies by semester; contact individual instructor for more information. May be repeated

up to 6 total credit hours. Prereq., ARTS 2002 or 2202. Recommended prereq., ARTS 3002 or 3202.

ARTS 3842 (1-3). Undergraduate Independent Study: Painting. Reserved for special projects in painting not offered in the curriculum. May be repeated up to 6 total credit hours. Prereqs., ARTS 3202 and instructor consent. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

ARTS 3852 (1-3). Undergraduate Independent Study: Drawing. Reserved for special projects in drawing not offered in the curriculum. May be repeated up to 6 total credit hours. Prereqs., ARTS 3002 and instructor consent. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

ARTS 4002-3. Advanced Drawing/Portfolio. Continuation of Drawing 3. Advanced studio class in drawing for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information. May be repeated up to 12 total credit hours. Prereq., ARTS 3002.

ARTS 4202-3. Advanced Painting/Portfolio. Continuation of Painting 3. Advanced studio class in painting for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information. May be repeated up to 12 total credit hours. Prereq., ARTS 3202.

ARTS 5202-3. Graduate Painting. May be repeated up to 18 total credit hours.

ARTS 5852 (1-3). Graduate Independent Study: Painting. May be repeated up to 6 total credit hours.

Photography

ARTS 1171-3. Photography for Nonmajors. Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable camera. Credit not granted for this course and ARTS 2171.

ARTS 2171-3. Photography 1. Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable camera. Prereqs., ARTS 1010, 1020, and either ARTH 1300 or 1400. Credit not granted for this course and ARTS 1171.

ARTS 2191-3. Photography 2. Explores more sophisticated technical and conceptual skills to the creative process. Prereq., ARTS 2171.

ARTS 3191-3. Photography 3. Continues the exploration of the possibility of individual photographic expression. Students are encouraged to discover and develop a personal position in relation to the medium. May be repeated up to 6 total credit hours. Prereq., Arts 2191.

ARTS 3841 (1-3). Undergraduate Independent Study: Photography. Reserved only for special projects in photography, not offered in the curriculum. May be repeated up to 6 total credit hours. Prereq., ARTS 3191 or 4161. Requires a detailed proposal, instructor's signature, and departmental approval.

ARTS 4161-3. Photography 4. Explores advanced techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. May be repeated up to 12 total credit hours. Prereq., ARTS 3191.

ARTS 4171-3. New Directions in Photography. Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photo sculpture, various color processes, photo language, photo installations, electronic media, performance, filmmaking, electrostatic art (copy machine), photo books, photo collage, and audio/visual art. Course content changes each semester. May be repeated up to 9 total credit hours. Prereq., ARTS 3191 or equivalent. Same as ARTS 5171.

ARTS 5161-3. Graduate Photography. May be repeated up to 18 total credit hours.

ARTS 5171-3. New Directions in Photography. May be repeated up 9 total credit hours. Same as ARTS 4171.

ARTS 5191-3. Digital Photography in Mongolia. Same as ARTS 4191.

ARTS 5901 (1-3). Graduate Independent Study: Photography. May be repeated up to 6 total credit hours.

Printmaking

ARTS 1003-3. Printmaking for Nonmajors. Emphasizes processes involved with both nonmultiple and multiple methods, including but not limited to metal plate etching (intaglio), lithography, collagraph, woodcut, linoleum cut, Xerox transfer,

and monotype. Places equal emphases on developing drawing skills and understanding design principles.

ARTS 3403-3. Intaglio and Relief 1. Introduces the study and experimentation of intaglio and relief processes in black and white, color, and possible photo imagery. May be repeated up to 6 total credit hours. Not available for freshmen. Taught with ARTS 4403/5403.

ARTS 3413-3. Lithography 1. Introduces the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. May be repeated up to 6 total credit hours. Not available for freshmen. Taught with ARTS 4413/5413.

ARTS 3423-3. Screen Printing 1. Introduces the study of silkscreen techniques, emphasizing creativity, individual development, and experimentation in contemporary silkscreen processes. May be repeated up to 6 total credit hours. Not available to freshmen.

ARTS 3843 (1-3). Undergraduate Independent Study: Printmaking. Reserved for special projects in printmaking not offered in the curriculum. May be repeated up to 6 total credit hours. Prereq., level 1 in a related area. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

ARTS 4403-3. Intaglio and Relief 2. Continues the study and experimentation of intaglio and relief processes in black and white, color, digital imagery, and nontoxic processes as much as possible. May be repeated up to 12 total credit hours. Prereq., ARTS 3403. Taught with ARTS 3403/5403.

ARTS 4413-3. Lithography 2. Continues the study of stone and metal plate lithography, emphasizing individual creative development in black and white, and further development in color printing processes. In addition, digital imaging and nontoxic processes are emphasized as much as possible. May be repeated up to 12 total credit hours. Prereq., ARTS 3413. Taught with ARTS 3413/5413.

ARTS 4423-3. Screen Printing 2. Introduces advanced screen printing technology, emphasizing individual creativity and the ability to resolve problems of two-dimensional form. May be repeated up to 12 total credit hours. Prereq., ARTS 3423.

ARTS 4433-3. Alternative Printmaking (Non-Toxic). Introduces computer-generated imaging and developing ideas as related to traditional forms of printmaking. Emphasizes original development of ideas and skills involved in learning advanced printing processes in lithography and intaglio media. May be repeated up to 12 total credit hours. Same as ARTS 5433.

ARTS 4443-3. Papermaking. Introduces papermaking as the study of plant fibers and cellulose structure relating to the making of paper pulp as an art medium. Emphasizes creative use of the paper pulp as related to two- and three-dimensional form. May be repeated up to 6 total credit hours. Same as ARTS 5443.

ARTS 4453-3. Monotype Printing. Introduces monotype printing, with the uniqueness and diversity of its methods of producing art. The process uses some of the best qualities of painting, print making, and drawing. Emphasizes creative individual development, along with processes inherent to this media. May be repeated up to 6 credit hours. Same as ARTS 5453.

ARTS 5403-3. Graduate Intaglio and Relief. May be repeated up to 18 total credit hours. Taught with ARTS 3403/4403.

ARTS 5413-3. Graduate Lithography. May be repeated up to 18 total credit hours. Taught with ARTS 3413/4413.

ARTS 5423-3. Graduate Screen Printing. May be repeated up to 18 total credit hours.

ARTS 5433-3. Graduate Alternative Printmaking (Non-Toxic). May be repeated up to 12 total credit hours. Same as ARTS 4433.

ARTS 5443-3. Graduate Papermaking. May be repeated up to 6 total credit hours. Same as ARTS 4443.

ARTS 5453-3. Graduate Monotype Printing. Same as ARTS 4453.

ARTS 5843 (1-3). Graduate Independent Study: Printmaking. May be repeated up to 6 total credit hours.

Sculpture

ARTS 1514-3. Sculpture for Nonmajors. Offers an orientation involving three-dimensional form and application. Studies expressive problems based on non-objective form relationships in various sculptural materials. May not be repeated.

ARTS 2504-3. Sculpture 2: Materials and Techniques. Explores a variety of materials, methods, and techniques and their application with reference to contemporary sculpture, i.e., moldmaking, welding, casting, vacuumforming, photo techniques, and woodworking. Prereqs., ARTS 1010 and 1020.

ARTS 2524-3. Sculpture 2: Visual Thinking in Three-Dimensional Form. Explores ideas concerning the structure and nature of visual thinking and their relationship to the creative thought process. Also investigates form in terms of the organizing principles of three-dimensional design and its application to contemporary sculpture. Includes lecture and studio projects. Prereqs., ARTS 1010 and 1020. May be repeated up to 6 total credit hours.

ARTS 3504-3. Sculpture 3: Experiments 1. Explores materials, methods, and techniques through a series of assignments emphasizing individual ideas and their relationship to contemporary aesthetics. Prereqs., ARTS 2504 and 2524.

ARTS 3514-3. Sculpture 3: Experiments 2. Explores individual concepts and ideas and their relationship to contemporary issues and aesthetics. A series of assignments are worked out with the instructor based on individual interest. Prereq., ARTS 3504.

ARTS 3844 (1-3). Undergraduate Independent Study—Sculpture. Reserved for special projects in sculpture not offered in the curriculum. May be repeated up to 6 total credit hours. Prereq., ARTS 3504 and instructor consent. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

ARTS 4104-3. Performance/Installation. Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration, and may also take on the visual linguistic form of a solo performance or of a multimedia presentation. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. May be repeated up to 6 total credit hours with instructor consent. Same as ARTS 5104.

ARTS 4504-3. Sculpture 4. Individual studies in selected media. May be repeated up to 6 total credit hours. Prereqs., ARTS 3504 and 3514.

ARTS 5104-3. Graduate Performance/Installation. May be repeated up to 6 total credit hours with instructor consent. Same as ARTS 4104.

ARTS 5504-3. Graduate Sculpture. May be repeated up to 18 credit hours.

ARTS 5844 (1-3). Graduate Independent Study—Sculpture. May be repeated up to 6 total credit hours.

Seminars/Special Topics

ARTS 3017 (1-3). Special Topics in Studio Arts. Introduces timely subjects in studio arts courses that cannot be offered on a regular basis. Information concerning the topics in any given semester is available prior to pre-registration from the department of Art and Art History. May be repeated up to 7 total credit hours. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. Restricted to juniors and seniors.

ARTS 3097 (1-3). Special Topics: Non-Studio. Introduces timely subjects in fine arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the Department of Art and Art History. May be repeated up to 7 total credit hours. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. Restricted to juniors and seniors.

ARTS 3847 (1-3). Independent Study. Reserved for special projects not offered in the curriculum. May be repeated up to 6 total credit hours. Prereq., detailed proposal, instructor sponsorship, and departmental approval.

ARTS 3937 (1-6). Internship. Gives upper-division students the opportunity to work in public or private organizations on assignments relating to their career goals, and allows them to explore the relationship between theory and practice in their major. May be repeated up to 6 total credit hours.

ARTS 4017 (1-3). Special Topics in Studio Arts. Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office. May be repeated up to 18 total credit hours. Prereq., ARTS 1010, 1020 and ARTH 1300 or 1400. Restricted to juniors and seniors. Same as ARTS 5017.

ARTS 4087-3. Selected Topics in Contemporary Art. Selectively studies significant areas of visual art of the last decade including major critical opinions. May be repeated up to 6 total credit hours. Prereq., 20 hours of ARTS or ARTH courses. Same as ARTS 5087.

ARTS 4097 (1-3). Special Topics: Non-Studio. Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department. May be repeated up to 6 total credit hours. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. Same as ARTS 5097.

ARTS 4107 (1-3). Special Topics. May be repeated up to 3 total credit hours.

ARTS 4117-3. BFA Seminar. For students intending to pursue graduate work and/or a professional career in art. Emphasizes the development of a critical overview of their work and interests and how they relate to the problems of professional activity. Prereq., BFA candidate and senior standing.

ARTS 4127-3. Art from Nature. Provides an opportunity for advanced students to create nature based art. Studio work and/or appropriate on-site works will be generated through readings and individual and group experiences of nature. Prereq., one 4000 level studio course. Same as ARTS 5127.

ARTS 4137-3. Curatorial Seminar. Introduces curatorial practices, such as exhibition development, programming, and preparation of educational materials. Emphasizes the application of art history skills in the museum field, research, writing, and analytical and interpretive skills. Students participate in organizing exhibitions at the CU Art Museum. May be repeated up to 12 total credit hours. Same as ARTS 5137.

ARTS 4717 (1-3). Studio Critique. Consists of consultations with faculty on individual studio problems and projects. May be repeated up to 6 total credit hours. Prereqs., junior standing and instructor consent.

ARTS 4957-3. Studio Honors Thesis. May be elected during the final semester. Consists of a substantial, original, creative project and/or written thesis providing an art world context. Requires faculty sponsorship. Does not guarantee a student will receive honors. Same as FINE 4008.

ARTS 5017 (1-3). Special Topics in Studio Arts. May be repeated up to 6 total credit hours. Same as ARTS 4017.

ARTS 5087-3. Selected Topics in Contemporary Art. Same as ARTS 4087.

ARTS 5097 (1-3). Special Topics—Non-Studio. May be repeated up to 6 total credit hours. Same as ARTS 4097.

ARTS 5107 (1-3). Special Topics. May be repeated up to 7 total credit hours.

ARTS 5117-3. Graduate Art Seminar.

ARTS 5127-3. Art from Nature. Same as ARTS 4127.

ARTS 5137-3. Graduate Curatorial Seminar. Same as ARTS 4137.

ARTS 5717 (1-3). Graduate Studio Critique. May be repeated up to 6 total credit hours with any single faculty member. Prereq., graduate standing and/or instructor consent.

ARTS 5857 (1-3). Graduate Independent Study. May be repeated up to 6 total credit hours.

ARTS 5917-3. MFA Practicum. Guides and supervises graduate student teachers. Students receive practical experience to organize and implement the teaching of fine arts at an introductory level. Includes a discussion of various teaching methodologies with an emphasis on cultural diversity.

ARTS 6957 (1-6). Master of Fine Arts Creative Thesis.

Visiting Artist Program

ARTS 4118-3. Visiting Artist Program. Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts. May be repeated up to 6 total credit hours. Prereq., portfolio review for undergraduates and senior standing. Same as ARTS 5118.

ARTS 5118-3. Graduate Visiting Artist Program. Same as ARTS 4118.

Graduate Film Courses

ARTF 5000-3. Advanced Digital Postproduction. Class explores the advanced practices and aesthetics of computer-based moving-image art editing. Topics include how to edit and manage a postproduction cycle, how to use digital editing systems

and capabilities such as compositing, digital audio, and optical effects treatments. Prereqs., FILM 1502, 2000 or 2300, 2500, and 3400 or 3600, or instructor consent. Cannot be taken simultaneously with FILM 3400 or 3600. Same as FILM 4000.

ARTF 5003-3. Film and Fiction. Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories, and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting. Same as FILM 4003 and COML 5003.

ARTF 5004-3. Topics in Film Theory. Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write position papers.

ARTF 5010 (1-3). Topics in Film Studies: Production. Prepares students for advanced Film Studies production courses. Subject matter varies each semester. May be repeated up to 9 total credit hours, provided the topics are different. Same as FILM 4010.

ARTF 5013-3. Film, Photography and Modernism. Provides interdisciplinary study of film, photography, and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity, and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz, and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Buñuel, and Bertolucci. Prereq., FILM 1502. Recommended prereq., FILM 3051. Same as FILM 4013.

ARTF 5021-3. Directing/Acting for the Camera. Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research, and papers required. Recommended prereq., FILM 1502. Same as FILM 4021.

ARTF 5023-3. Topics in International Cinema. Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns, and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy, and social and cultural analysis. May be repeated up to 6 total credit hours provided topics are different. Prereq., FILM 1502. Recommended prereqs., FILM 3051 and 3061. Same as FILM 4023.

ARTF 5024-3. Advanced Research Seminar. Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade. May be repeated up to 6 total credit hours. Prereq., FILM 1502. Recommended prereqs., FILM 3051, 3061. Same as FILM 4024.

ARTF 5030-3. Visiting Filmmakers Seminar. Examines creative issues in contemporary cinema art. Graduate and advanced undergraduate students explore filmmaking ideas with guest artists within a seminar setting. Filmmakers, videographers and programmers of national and international reputation, with an emphasis on "experimental" practice, interact with graduate and advanced undergraduate students, and discuss their work at seminar meetings, public lectures or events. May be repeated up to 6 total credit hours. Recommended prereqs., FILM 1502 and 4453 or instructor consent. Same as FILM 4030.

ARTF 5043 (1-3). Topics in Film Studies: Critical Studies. Prepares students for advanced Film Studies critical studies courses. Subject matter varies each semester. May be repeated up to 9 total credit hours, provided the topics are different. Same as FILM 4043.

ARTF 5105-3. Advanced Screenwriting. Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Prereq., approved writing sample. Recommended prereqs., FILM 3051 and 3061. Same as FILM 4105.

ARTF 5200-3. Flow Visualization. Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and *schlieren*. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduate students, undergraduate students, engineering majors, and photography/video majors. See flowvis.colorado.edu. Prereq., MCEN 3021

or equivalent, or significant imaging experience (photography/video). Same as FILM 4200 and MCEN 4151/5151.

ARTF 5453-3. Elective Affinities: Avant-Garde Film and the Arts. Traces the history and aesthetics of avant-garde/ experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music, and film; landscape in painting, photography, and film; post-modernism and the cinema; queer theory, gender/identity politics, and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt, and Gunvor Nelson. Prereq., FILM 1502. Same as FILM 4453.

ARTF 5500-3. Cinema Production 2. Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production exploring either documentary, experimental, or narrative genres. May be repeated up to 9 total credit hours. Prereq., FILM 3400. Same as FILM 4500.

ARTF 5600-3. Creative Digital Cinematography. Explores creative approaches to single camera digital cinematography through short projects, discussions, and screenings. Relates creative photography and poetic approaches to the digital camera cinema. May be repeated up to 9 total credit hours. Prereqs., FILM 2000, 3600, or ARTS 4246 or 5346 or instructor consent. Restricted to FILM majors. Same as FILM 4600.

ARTF 5604-3. Colloquium in Film Aesthetics. Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film. May be repeated up to 6 total credit hours. Same as FILM 4604.

ARTF 5610-3. Image-makers Graduate Seminar. Explores advanced graduate studio work in a seminar setting. The course will focus on the development of ideas and activities which advance creative image making. May be repeated up to 12 total credit hours.

ARTF 5717 (1-3). Graduate Studio Critique. May be repeated up to 6 total credit hours with any single faculty member. Prereq., graduate standing and/or instructor consent.

ARTF 5846 (1-3). Graduate Independent Study: Video. Participate in graduate independent study. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

ARTF 5857 (1-3). Graduate Independent Study. Participate in graduate independent study. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

ARTF 6959 (1-6). Master's Thesis Film. Preparation, research, writing of critical studies Master's thesis in fulfillment of concurrent BAMA in Film. Prereq., ARTF 5004. May be repeated up to 6 total credit hours.

Art History

ARTH 1300-3. History of World Art 1. Surveys major art styles from the Paleolithic period through the Renaissance, including European, Asian, and the Pre-Columbian/Islamic world. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations. Approved for arts and sciences core curriculum: literature and the arts.

ARTH 1400-3. History of World Art 2. Surveys major art styles from about 1600 to the present, including Europe, Asia, the Islamic world, the Americas, and tribal arts. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations. Credit not granted for this course and FINE 1409. Approved for arts and sciences core curriculum: literature and the arts.

ARTH 1509-4. Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World. Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece, and Rome, examining various ancient approaches to power, religion, death, and the human body. Analyzes art, architecture, and everyday trash to learn about ancient humanity. Same as CLAS 1509. Approved for arts and science core curriculum: historical context or literature and the arts.

ARTH 2019-3. Pompeii and the Cities of Vesuvius. Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and deco-

ration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations. Same as CLAS 2019. Approved for arts and sciences core curriculum: historical context.

ARTH 2409-3. Asian Art. Designed for those having no previous experience in the study of Asian art. Traces development of sculpture, painting, architecture, and the other visual arts of South Asia, the Far East, and Southeast Asia, with a synopsis of developments from 1453 through the 18th century. Approved for arts and science core curriculum: literature and the arts.

ARTH 3009-3. Critical Thinking in Art History. Through structured discussions, selected readings, and written assignments provides an understanding of how art history has evolved as an academic discipline and how art historians evaluate complex issues of style, form, content, and theory in the visual arts. Prereqs., ARTH 1300, 1400.

ARTH 3029-3. Medieval and Early Modern Visual Culture, 400–1750 A.D. Introduces students to the literature, history, culture and art of Europe and the Mediterranean basin from late antiquity through the early modern period. Interdisciplinary approach to visual culture focuses on uses of sacred religious practices and lay devotion. Prereqs., ARTH 1300 and 1400.

ARTH 3039-3. Greek Art and Archaeology. Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture, and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture. Credit not granted for this course and FINE/CLAS 1009. Same as CLAS 3039. Approved for arts and sciences core curriculum: literature and the arts.

ARTH 3049-3. Introduction to Roman Art and Architecture. Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306–307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces. Same as CLAS 3049. Credit not granted for this course and CLAS 1019. Approved for arts and sciences core curriculum: literature and the arts.

ARTH 3079-3. Medieval Art Survey. Surveys the history of Western art from Constantine to around the year 1300, including Carolingian, Ottonian, Anglo-Saxon, Romanesque, and Gothic. Considers “barbarian,” Byzantine, and Islamic influences. Prereqs., ARTH 1300, 1400.

ARTH 3109-3. Art in Contemporary Society. Examines writings by philosophers and art critics as they address the question: What is art for? Readings focus on the 19th and 20th centuries, including current theories and some non-Western theories. Students are encouraged to develop their own responses to the question. Prereqs., ARTH 1300 and 1400.

ARTH 3209-3. Art, Culture, and Gender Diversity, 1400–1600: Renaissance Art Out of the Canon. Studies the rising status of painting, sculpture, and architecture in Europe and how Europeans perceived non-Western art during the early modern period. Introduces history of race/ethnicity, gender, and class concerns embodied in the European category visual arts. Emphasizes new methods for interpreting history without imposing Eurocentric viewpoints. Prereqs., ARTH 1300 and 1400. Approved for arts and sciences core curriculum: human diversity.

ARTH 3309-3. European Art, 1300–1800. Covers high visual culture in Europe from 1300 to 1800. Discussions of this concept with its implications for aesthetics, semiotics, and ideology form the core of the course. Prereqs., ARTH 1300 and 1400.

ARTH 3419-3. Modern Art Survey. Surveys the loss of beauty in art and discusses whether or not that loss is regrettable. Questions the function and historical meaning of modern and postmodern art: is it all hype and strategic positioning by artists for fame and fortune? Is it serious? Are the fine arts still fine? Prereq., ARTH 1300, 1400.

ARTH 3509-3. American Art. Surveys American art and material culture from the precolonial era to the present day. Considers cultural and artistic interaction, ethnic expressions, patronage, European and non-Western influences, and the struggle to develop a uniquely American artistic identity. Prereqs., ARTH 1300 and 1400. Approved for arts and sciences core curriculum: United States context.

ARTH 3519-3. Modern Architecture, 1780–1960. Introduces the major movements and developments in European and American architecture from Neoclassicism to Postmodernism. Considers the impact of exhibitions, expositions, and vernacular architecture. Prereqs., ARTH 1300, 1400.

ARTH 3619-3. The Arts of China. Surveys Chinese painting, sculpture, architecture, and other arts from neolithic to modern times. Prereqs., ARTH 1300, or 1400, or 2409, or HIST 1608.

ARTH 3539-3. American Art: 1945–1970. Examines the triumph of American painting, sculpture, architecture, and other arts after World War II and through the 1960s. Considers mainstream art (abstract expressionism, pop, minimalism) and alternative art (earthworks, feminist and minority expression, visionary architecture, funk sculpture) in New York and California. Prereq., one 3000-level art history course.

ARTH 3629-3. The Arts of Japan. Offers an appreciation and chronological development of the arts of Japan. Emphasizes the arts of Shintoism and Buddhism as well as the particular Japanese aesthetic from prehistoric times to the present. Prereq., one 3000-level art history course.

ARTH 3719-3. History of Media Arts. Surveys the development of technological media both as sources of information and as art. Photography and related media, film, video, holography, and electronic imaging systems are surveyed as art and as technologies, emphasizing major artists, movements, exhibitions, and other productions in the 19th and 20th centuries. Prereqs., ARTH 1300 and 1400.

ARTH 3929 (1-3). Special Topics in Art History. May be repeated up to 18 total credit hours when topic varies. Prereqs., ARTH 1300 and 1400.

ARTH 4019-3. Art of Ancient Egypt. Surveys the development of Egyptian architecture, sculpture, painting, and the minor arts from their beginnings to the establishment of Christianity. Prereq., one 3000-level art history course.

ARTH 4039-3. Byzantine Art. Examines art of the East Christian Empire from the accession of Constantine to the conquest of Constantinople with a synopsis of developments from 1453 through the 18th century. Prereq., one 3000-level art history course.

ARTH 4069-3. Medieval Manuscripts. Surveys decorated books from late antiquity to the advent of the printing press. Examines the various roles manuscripts played within different medieval communities. Prereq., ARTH 1300 and 1400.

ARTH 4089-3. Romanesque and Gothic Art. Examines major artistic trends in Europe between the years 1000 and 1300, a period that witnessed, among others, the development of gothic cathedrals and the rise of the professional artist. Particular attention will be given to exchange with other cultures. Prereqs., ARTH 1300 and 1400.

ARTH 4109-3. Ancient Italian Painting. Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania, and later Roman wall paintings, including the painted images in ancient catacombs. Previous course work on ancient Italy or the history of pre-modern art is highly recommended. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 4109.

ARTH 4119-3. Roman Sculpture. Examines ancient Roman sculpture with emphasis on the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world. Recommended prereqs., ARTH 1300, CLAS 1019. Same as CLAS 4119.

ARTH 4129-3. Aegean Art and Archaeology. A detailed study of the cultures of prehistoric Greece, the Cycladic Islands, and Crete, their art and archaeology, and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states. Same as ANTH 4129, CLAS 5129.

ARTH 4139-3. Greek Vase Painting. A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary, and written presentation. Same as CLAS 5139.

ARTH 4149-3. Greek Cities and Sanctuaries. Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings, and using texts as well as material culture. Emphasis is on developing analytical skills. Same as CLAS 4149.

ARTH 4169-3. Topics in Ancient and Classical Art and Archaeology. In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary; they

may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology. May be repeated up to 9 total credit hours providing the topics are different. Same as CLAS 4169.

ARTH 4189-3. Medieval Art. Focuses on one area of medieval art. Topics vary, but may include Carolingian, Ottonian, Romanesque, or Gothic art. Emphasizes critical thinking, methods of scholarly research, and development of writing skills. Prereqs., ARTH 1300 and 1400.

ARTH 4199-3. Roman Architecture. Examines the designs, functions, and construction methods of ancient Roman towns, temples, baths, houses, and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation. Same as CLAS 4199.

ARTH 4209-3. Classical Archaeological Field Methods. Offers experiential learning in theories and methods of field excavation at the Villa of Maxentius in Rome. Applies methods for stratigraphic excavation, electronic surveying with GIS, ceramic analysis, numismatic analysis, architectural construction materials and methods, artifact conservation and data processing and documentation. Offered abroad only. May be repeated up to 6 total credit hours. Coreq., ARTH 4219 for first 3 credit hours. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 4209 and 5209.

ARTH 4219-3. Maxentius and the City of Rome. Combines seminar discussion and site visits in Rome and Tivoli to understand the excavations at the Villa of Maxentius and its artifacts in the broader contexts of Roman architectural development, late Roman art, and late imperial Roman history. Offered abroad only. Must be taken concurrently with CLAS/ARTH 4209 or CLAS 5209. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 4219.

ARTH 4269-3. Art and Archaeology of the Ancient Near East. Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first world empire, Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, and roles of artists. Recommended prereq., CLAS 1509. Same as CLAS 4269. Approved for arts and science core curriculum: human diversity.

ARTH 4279-3. Michelangelo (1475–1564). Focuses on Michelangelo's long career, marked by outstanding achievements in sculpture, painting, architecture, and poetry. Emphasizes his projects and achievements in light of 16th century artistic theory, including relationships to his contemporaries in the arts and literature. Prereq., one 3000-level art history course.

ARTH 4309-3. Neoclassicism and Romanticism: 1760–1840. Surveys painting and sculpture in England and France from the last quarter of the 18th century through the first half of the 19th century. Prereq., one 3000-level art history course.

ARTH 4319-3. European Art from 1830 to 1886. Surveys the major movements in painting in France and England from the Revolution of 1830 to the impressionist crisis of 1886. Emphasizes and discusses painting and major expressions in sculpture and architecture.

ARTH 4329-3. Modern Art 1. Provides an in-depth study of the fin de siècle, stressing postimpressionism, art nouveau, and symbolism. Concludes with fauvism in France and the expressionist movement in Germany. Prereq., one 3000-level art history course. Approved for arts and sciences core curriculum: literature and the arts.

ARTH 4339-3. Modern Art 2. Begins with early Picasso and cubism, including analytic and synthetic cubism and emphasizing the various isms of the 20th century. Also studies Italian futurism, de Stijl and the Bauhaus, dada, and surrealism. Prereq., one 3000-level art history course.

ARTH 4359-3. Modern Sculpture, 1870–1970. Examines outstanding sculptors in Europe and America from Rodin to the present. Emphasizes American sculpture since World War II. Prereq., one 3000-level art history art history course.

ARTH 4409-3. Arts of Africa and Oceania. Covers native arts of non-Western peoples of Africa and Oceania, including sculpture, architecture, and minor arts for both archaeological and ethnological cultures. Emphasizes the function of art in society as well as aesthetic analysis. Prereq., one 3000-level art history course.

ARTH 4429-3. Latin American Art since 1492. Surveys arts of the colonies of Spain and Portugal in the Western Hemisphere from 1492 to the present. Prereq., one 3000-level art history course.

ARTH 4439-3. Native North American Art. Surveys art of North American Indian cultures, including the northwest coast, southwest, southeast, northeast, and plains, covering architecture, sculpture, and minor arts for both archaeological and ethnological cultures. Prereq., one 3000-level art history course.

ARTH 4449-3. Arts of India and Southeast Asia. Surveys the architecture, sculpture, and painting of India and those areas of Southeast Asia influenced by India from the period of Mohenjo Daro and Harappa to recent times. Includes the Himalayan region and Tantric art in general. Prereq., one 3000-level art history course.

ARTH 4469-3. Chinese Painting. Surveys the history of Chinese painting, with special emphasis on major masters and monuments, the history of styles, and Chinese theories on the art of painting. Focuses on Chinese painters, their lives, and art as representatives of China's artistic heritage. Prereq., one 3000-level art history course.

ARTH 4489-3. History of Japanese Prints and Their Impact on Modern Art. Surveys printmaking in Japan from its introduction to the present. Examines pre-Modern and Modern Japanese art and culture reflected in prints. Explores *ukiyo*, "the floating world" and its impact on modern artists in Europe and America. Prereq., one 3000-level art history course. Recommended prereq., ARTH 3629. Same as ARTH 5489.

ARTH 4549-3. Contemporary Public Art. Focuses on the changing relationship of architecture, art and ornament, the role of the public, and the function and patronage of contemporary public art. Considers environmental art, community murals, activist art, temporary installations, issues of censorship, and monuments and memorials. Prereq., one 3000-level art history course.

ARTH 4559-3. Twentieth-Century Architecture. Examines the major movements and development in European and American architecture, 1900 to 1960s. Considers the major styles, as well as cultural interactions, race/ethnicity, gender and class concerns as they relate to both the practice and profession of architecture. Prereqs., ARTH 1300, 1400.

ARTH 4569-3. United States Architecture. Examines architecture as it developed in the area now defined as the continental United States from early cultures to the present. Considers the major styles and issues of cultural interaction, race/ethnicity, gender and class concerns as they relate to the practice, theory, and profession of architecture. Prereq., ARTH 1300 and 1400.

ARTH 4629-3. Degas Seminar. Introduces current Degas studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles. Fulfills requirement for ARTH 4919 Capstone Seminar.

ARTH 4639-3. Manet Seminar. Introduces current Manet studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles. Fulfills requirement for ARTH 4919 Capstone Seminar.

ARTH 4649-3. Impressionism and Post-Impressionism. Fosters creative study of the background and foundation in modern art. Considers 19th-century European painting and, to a lesser degree, sculpture, in relation to social, cultural, and political history from 1863 to 1900. Focuses on France, but gives attention to other countries as well.

ARTH 4669-3. Romanticism and Realism. Fosters creative study of the background and foundation of modern art. Considers 19th-century European (and, to a lesser degree, American) painting and sculpture in relation to social, cultural, and political history from 1789 (the French Revolution) to 1863 (the Salon des refuses). Focuses on France, but gives attention to other countries as well.

ARTH 4739-3. The Intellectual Roots of Italian Renaissance Art. Studies critical issues raised in the literature on art, focusing on Renaissance interpretations of key historical themes such as imitation and decorum. Carefully examines the language used in primary sources (available in English). Prereq., one 3000-level art history course.

ARTH 4749-3. Italian Renaissance Art: Studies in the Exchange between Theory and Practice. Addresses how artists developed new compositional procedures, graphic techniques, and audiences, and how these procedures were theorized in an age when artists' intellectual and social status rose dramatically. Explores reception of new graphic technology. Studies specific commissions and primary texts in depth. Prereq., one 3000-level art history course.

ARTH 4759-3. 17th Century Art and the Concept of the Baroque. Surveys 17th century European painting, sculpture, and architecture, along with a critical study of artistic theory, artistic institutions (such as the Academiadi San Luca and the Academie Royal), and the concept of the term baroque. Prereq., one 3000-level art history course. Approved for arts and sciences core curriculum: literature and the arts.

ARTH 4769-3. Gender Studies in Early Modern Visual Culture. Examines 15th and 16th century European ideas about women from a variety of feminist perspectives. Focuses on recent contributions to history of women as they intersect with the visual arts. Prereq., one 3000-level art history course. Same as WMST 4769. Approved for arts and sciences core curriculum: human diversity.

ARTH 4779-3. Multicultural Perspectives on New Mexican Santos. Reflects upon the question: In what sense were the regional variants of European devotional images the effects of meaningful cultural interaction? Evidence considered includes oral traditions, pueblo pottery, and painting, emphasizing interpretations that respect rights of communities to maintain privacy. Prereqs., ARTH 1300, 1400, and one 3000-level art history course.

ARTH 4819-3. Contemporary Chicano Art. Examines Chicano art world, focusing on contemporary scene. Lecture/discussion/dialogue explored through readings and visual presentations including: video, guest lecturers, and visits to local spaces. Prereq., any 3000-level art history course or instructor consent.

ARTH 4909 (1-3). Independent Study: Art History. May be repeated up to 7 total credit hours.

ARTH 4919-3. Undergraduate Seminar: Selected Topics in Art History. Seminar course dealing with selected areas or problems within the history of art. Consult current online Schedule Planner for seminar topic. May be repeated up to 7 total credit hours. Prereq., instructor consent. Restricted to art history majors only.

ARTH 4929 (1-3). Special Topics in Art History. May be repeated up to 18 total credit hours when topic varies.

ARTH 4939 (3-6). Art Museum Internship. Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums. May be repeated up to 6 total credit hours. Prereqs., ARTH 1300 and 1400. Same as ARTH 5939.

ARTH 4959-3. Art History Honors Thesis. May be elected during the final semester. Consists of a substantial, original written thesis. Requires faculty sponsorship. Does not guarantee a student will receive honors.

ARTH 5109-3. Ancient Italian Painting. Same as CLAS 5109.

ARTH 5119-3. Roman Sculpture. Same as CLAS 5119.

ARTH 5129-3. Aegean Art and Archaeology.

ARTH 5139-3. Greek Vase Painting. Same as CLAS 5139.

ARTH 5149-3. Greek Cities and Sanctuaries. Same as CLAS 5149.

ARTH 5159-3. Hellenistic Art and Archaeology. Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.). Same as CLAS 5159.

ARTH 5169-3. Topics in Ancient and Classical Art and Archaeology. Same as CLAS 5169.

ARTH 5179-3. Periclean Athens. Explores in detail the buildings, sculptures, pots, and foreign imports of Athens under the leadership of Perikles, considering material culture of individuals as much as civic programs. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Same as CLAS 5179.

ARTH 5189-3. Augustan Rome. Explores the sculptures, paintings, and buildings constructed in Rome during the reign of the first emperor Augustus (27 B.C.E.–14 C.E.). Examines the monuments of Augustan Rome as both dependent on republican precedents and yet innovative with respect to designs and meanings. Same as CLAS 5189.

ARTH 5199-3. Roman Architecture. Same as CLAS 5199.

ARTH 5269-3. Art and Archaeology of the Ancient Near East. Same as CLAS 5269. Same as CLAS 5269.

ARTH 5909 (1-3). Graduate Independent Study: Art History. May be repeated up to 9 total credit hours.

ARTH 5929 (1-3). Special Topics in Art History. May be repeated up to 18 total credit hours.

ARTH 5939 (3-6). Art Museum Internship. May be repeated up to 6 total credit hours. Same as ARTH 4939.

ARTH 6150-3. Critical and Theoretical Issues in Museums. Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence, and relations between curatorial practice, collecting, and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present. Prereq., MUSM 5011 or instructor consent. Same as MUSM 6150, HIST 6150, and ANTH 6150.

ARTH 6929-3. Seminar: Theories of Art History. Provides a systematic critical overview of the development of art history as a discipline beginning with 18th century theories of aesthetics and ending with current interdisciplinary models of critical interpretation. Weekly readings, discussions, reports, and written papers constitute the format of this seminar in methodology. Topics vary from semester to semester. May be repeated up to 6 total credit hours within a term. Required for MA (art history) students.

ARTH 6939-3. Graduate Seminar: Open Topics in Art History. Subjects and topics vary. May be repeated up to 9 total credit hours. Prereq., graduate standing.

ARTH 6949-1. Master's Candidate for Degree.

ARTH 6959 (1-6). Master's Thesis (Art History).

ARTH 6969 (1-6). Master's Project (Art History).

Arts and Sciences

Writing

ARSC 1000 (3-4). Expository Writing. Develops college-level reading, writing, and thinking. Students are asked to read critically, then construct written responses that are revised and crafted into more formal essays and position papers. Offered through the Student Academic Services Center. Prereq., program coordinator consent required.

ARSC 1080-4. College Writing and Research. Introduces academic and professional genres through the research and inquiry process. Students practice close reading, oral presentation, drafting, synthesis, analysis and research skills in discussion, writing workshops, and one-on-one conferences. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

ARSC 1081-1. SASC Coseminar: College Writing and Research. One-credit seminar provides extended instruction in written composition for students enrolled in ARSC 1080. Graded assignments enrich students' understanding of genre, organization, research skills, and grammar. Coreq., ARSC 1080.

ARSC 1150-3. Writing in Arts and Sciences. Emphasizes the development of effective writing skills with instruction provided in expository and analytical writing. Reviews basic elements of grammar, syntax, and composition as needed. Meets MAPS requirement for English. May be repeated up to 6 total credit hours. Approved for arts and sciences core curriculum: written communication.

ARSC 3100-3. Multicultural Perspective and Academic Discourse. Teaches students how to write academic papers related to race, class, gender, sexuality, and other areas of cultural identity. Students acquire expertise on issues through readings, guided discussion, and research and practice oral presentation skills, drafting, and workshopping of papers. Prereq., lower level writing course(s) or waiver. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: written communication.

Miramontes Arts and Sciences Program (MASP)

ARSC 1400-1. MASP Coseminar: Chemistry 1 and 2. Supplements and strengthens student experiences in chemistry. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science. May be repeated up to 2 total credit hours.

ARSC 1420-1. MASP Coseminar: Introduction to EEB. Designed to supplement and strengthen student experiences in EBIO 1210 and 1220. Allows particularly gifted students an opportunity to extend their understanding of the subject and possible careers in science. May be repeated up to 2 total credit hours.

ARSC 1432-1. MASP Coseminar: Economics. Designed to supplement and strengthen student experiences in microeconomics. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in social science. May be repeated up to 2 total credit hours.

ARSC 1440-1. MASP Coseminar: Mathematics. Offers an unusual and essential opportunity for students to receive small-group enrichment and reinforcement. Supplements and strengthens student experiences in mathematics, allowing particularly gifted students an opportunity to extend their understanding of the subject in a supportive environment, and to explore possible careers in science. May be repeated up to 2 total credit hours.

ARSC 1460-1. MASP Coseminar: Introduction to MCD Biology. Supplements and strengthens student experiences in MCDB 1150 and 2150. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science. May be repeated up to 2 total credit hours.

ARSC 1480-1. MASP Seminar: Exploration of Public Discourse through the Social Sciences. Fosters an appreciation of the humanities and social sciences. Readings, discussions, cooperative learning exercises, and outside activities illustrate the interconnections between different bodies of knowledge. Emphasizes relationships between the humanities/social sciences and the real world. May be repeated up to 2 total credit hours.

ARSC 1490-1. MASP Seminar: Activating the Humanities and Social Sciences. Building on ARSC 1480, enhances students' knowledge and appreciation of the humanities and social sciences. Readings, discussions, cooperative learning exercises, workshopping papers and presentation, guest speakers, and outside activities are designed to enhance both students' appreciation of the subject matter and their performance in their regular courses. Emphasis is on actively using knowledge of humanities and social sciences in a variety of ways. Prereq., ARSC 1480. May be repeated up to 2 total credit hours.

ARSC 1492 (1-3). MASP Research Seminar. Building on ARSP 1490, this course seeks to enhance students' knowledge and appreciation of the humanities and social sciences. Readings, discussions, cooperative learning exercises, workshopping papers and presentations, guest speakers, and outside activities are designed to enhance both students' appreciation of the subject matter and their performance in their regular courses. Emphasis is placed on actively using knowledge of humanities and social science in a variety of ways. May be repeated up to 6 total credit hours.

ARSC 2400-1. MASP Coseminar: Organic Chemistry. Supplements and strengthens student experiences in organic chemistry. Allows gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science. May be repeated up to 2 total credit hours.

ARSC 2470-1. MASP Coseminar: Physics 1 and 2. Supplements and strengthens student experiences in physics. Allows particularly gifted students an opportunity to extend their understanding of the subjects and to explore possible careers in science. May be repeated up to 2 total credit hours.

Special Curricula

ARSC 1200 (1-3). Topics in Arts and Sciences.

ARSC 1600-1. The University of Colorado Experience. Provides an effective transition to the university by giving students a solid base for developing scholarship, citizenship, decision making, and involvement in their university community. Topics include academic and campus resources, safety, health, and diversity.

ARSC 1710-1. Calculus Bridge Course. Provides motivated pre-calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in pre-calculus courses due to time constraints. Mastery of material is emphasized. Prereq., proficiency in high school mathematics. Coreq., MATH 1001/1021.

ARSC 1720-1. SASC Coseminar: Calculus Work Group. This 1-credit seminar provides motivated calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in calculus courses due to time constraints. Mastery of

material is emphasized. Prereq., proficiency in pre-calculus mathematics. Recommended prereq., A/B average in pre-calculus sequence. Coreq., MATH 1300.

ARSC 1800-3. Methods of Inquiry. Introduces students to methodologies used in different academic disciplines, e.g., how a paleographer dates a manuscript. Course is team-taught. Students must also enroll in two of four co-requisite course sections, all in different areas of the core curriculum. The co-requisite course sections are listed on MyCUinfo.

ARSC 2000-3. Ways of Knowing: Constructions of Knowledge in the Academy and Beyond. Explores different ways of knowing from interdisciplinary, cross-cultural perspectives. Course begins with personal interrogations of students' primary learning modes. It goes on to examine cultural assumptions about schooling, learning and knowledge, juxtaposing western and eastern philosophies of knowing and looking at how gender, race, class, and other categories of identity shape and interpret concepts of knowledge. Same as NRLN 2000. Approved for arts and sciences core curriculum: ideals and values.

ARSC 2110-4. Physical Science of the Earth System. Covers basic concepts of physics and chemistry, taught in the context of Earth and space science. Small class size and emphasis on student investigations, labs and field work, and active learning make this course particularly appropriate for future K-6 teachers. Prereq., two high school science courses (college prep level). Same as GEOL 2110. Approved for arts and sciences core curriculum: natural science.

ARSC 2274-3. Peer Counseling. Introduction to basic peer education and counseling theory and techniques. Students learn experientially by practicing a variety of skills in an informal atmosphere. The material learned is valuable to students professionally (as employee or supervisor in any field or as helping professional) regardless of career path. Students increase self-awareness and apply it to their own lives. Restricted to sophomores/juniors/seniors. Offered fall semesters only.

ARSC 3001-3. Reconciliation and Diversity in the 21st Century: The South Africa Model. Examines the concept of reconciliation from a multidimensional and multidisciplinary approach as it specifically contributes to subjects of difference, inequality, and historical legacies of intractable relations. Using an experiential approach, the study of reconciliation is situated in an international environment in which reconciliation is being practiced and later in the United States context. Recommended prereq., any course with substantive race, class, gender, difference, and inequality emphasis. Offered through Study Abroad Program. Approved for arts and sciences core curriculum: human diversity.

ARSC 3600-4. Diversity Issues: Higher Education. Uses Internet dialogue, computing, and media technology to improve communication and develop research and inquiry skills and critical thinking. Race, class, gender, and sexual orientation issues are addressed to foster understanding of university codes of inquiry and modes of interaction in scholarly communities. Prereq., admission to McNair Program, junior standing, minimum GPA of 2.50, and strong interest in graduate school).

ARSC 3650-3. Diversity Issues in Graduate Education. Guides students through research on diversity and retention issues in graduate education. Participants use Tinto's work on academic and social integration as a conceptual framework. Further, students investigate how specific institutions support diversity goals in their graduate programs. Prereq., admission to McNair Program (minimum 2.50 GPA, three recommendation letters, personal statement, strong interest in graduate school).

ARSC 3700 (1-5). McNair Seminar: Research Design. Multidisciplinary course guiding critical thinking as students design a formal investigation. Includes presenting and writing a prospectus. Students revise the prospectus, creating a proposal for funding the research as well as HRC proposals. May be repeated up to 6 total credit hours. Prereq., admission to McNair Program (junior standing, minimum GPA of 2.50, and a strong interest in graduate school).

ARSC 3935 (1-6). Internship. May be repeated up to 6 total credit hours.

ARSC 4000-3. Multimedia Applications in Foreign/Second Language Education. Focuses on knowledge and skills in accessing, evaluating, and integrating technology-assisted, mediated material in the teaching and learning of foreign languages. Also focuses on hands-on design and production of instructional software for foreign languages. Recommended prereq., a language-teaching methodology course. Same as ARSC 5000.

ARSC 4040 (1-3). Arts and Sciences Special Topics. Same as ARSC 5040.

ARSC 4700 (1-5). The McNair Seminar: Research Practices and Procedures.

Within the range of scholarly modes, student researchers examine discipline-specific rationales for evidence and analysis. Lecturers distinguish popular concepts of investigation from scholarly research. Students learn to take great care describing and discussing methods, findings, interpretations, assertions, and conclusions. May be repeated up to 10 total credit hours. Prereq., admission to McNair Program (junior standing, meeting TRIO guidelines, strong interest in graduate school).

ARSC 4909 (2-6). Senior Thesis for Individually Structured Major. May be repeated up to 6 total credit hours.

ARSC 4910-1. McNair Practicum: Principles and Practices of University Teaching.

Teaches the core principles of pedagogy at the university level and provides students guidance and feedback on constructing a teaching session in collaboration with a faculty mentor. Using the instructional practices of their discipline, students discuss issues university faculty encounter in their quest toward teaching excellence. The expertise of the Graduate Teacher Program, the Preparing Future Faculty Network, and the Faculty Teaching Excellence Program will be drawn upon for supplemental resources, seminars, and workshops. May be repeated up to 3 total credit hours. Prereq., ARSC 4700. Restricted to McNair Program Students.

Graduate-Level Courses

ARSC 5000-3. Multimedia Applications in Foreign/Second Language Education. Same as ARSC 4000.

ARSC 5040 (1-3). Arts and Sciences Special Topics. Same as ARSC 4040.

ARSC 5050-3. Graduate Seminar on Applied Behavior Science 1. The first part of a two-semester sequence designed to introduce graduate students in the social sciences to interdisciplinary theory, concepts, and methods as applied to important social problems. Prereq., completion of first year of graduate work in a social science department.

ARSC 5060-3. Graduate Seminar on Applied Behavior Science 2. The second part of a two-semester sequence designed to introduce graduate students in the social sciences to interdisciplinary theory, concepts, and methods as applied to important social problems. Prereq., ARSC 5050.

Asian Languages and Civilizations

EALC 4911-3. Practicum in Asian Languages 1. Introduces elementary or intermediate Chinese or Japanese language and culture and East Asian language pedagogy. Designed for students in TESEAL track (Teaching English to Speakers of East Asian Languages) through EALC or linguistics; open to others by permission. Courses must be taken in sequence. Prereq., department approval. Same as EALC 5911.

EALC 4912-3. Practicum in Asian Languages 2. Introduces elementary or intermediate Chinese or Japanese language and culture and East Asian language pedagogy. Designed for students in TESEAL track (Teaching English to Speakers of East Asian Languages) through EALC or linguistics; open to others by permission. Courses must be taken in sequence. Prereq., department approval. Same as EALC 5912.

EALC 4913-3. Practicum in Asian Languages 3. Introduces elementary or intermediate Chinese or Japanese language and culture and East Asian language pedagogy. Designed for students in TESEAL track (Teaching English to Speakers of East Asian Languages) through EALC or linguistics; open to others by permission. Courses must be taken in sequence. Prereq., department approval. Same as EALC 5913.

EALC 4914-3. Practicum in Asian Languages 4. Introduces elementary or intermediate Chinese or Japanese language and culture and East Asian language pedagogy. Designed for students in TESEAL track (Teaching English to Speakers of East Asian Languages) through EALC or linguistics; open to others by permission. Courses must be taken in sequence. Prereq., department approval. Same as EALC 5914.

EALC 4930 (1-6). Internship. Selected students are matched with supervised internships in business, public and private service organizations, and educational institutions. Internships focus on opportunities to apply language and cultural

skills. Students meet regularly with instructor and supervisor, keep a journal, and submit a final paper. May be repeated up to 6 total credit hours. Prereq., JPNS 2120 or CHIN 2120. Recommended prereq., JPNS 3120 or CHIN 3120.

EALC 5911-3. Practicum in Asian Languages 1. Prereq., department approval. Same as EALC 4911.

EALC 5912-3. Practicum in Asian Languages 2. Prereq., department approval. Same as EALC 4912.

EALC 5913-3. Practicum in Asian Languages 3. Prereq., department approval. Same as EALC 4913.

EALC 5914-3. Practicum in Asian Languages 4. Prereq., department approval. Same as EALC 4914.

EALC 5950-1. Perspectives on East Asian Languages. Reads and discusses issues in contrastive linguistics, cultural differences, linguistic analysis, and methodological issues related to the teaching of English to speakers of East Asian languages. May be repeated up to 6 total credit hours.

Arabic

ARAB 1010-5. Beginning Arabic 1. Introduces students to speaking, listening, reading, and writing skills in the standard means of communication in the Arab world. This course is proficiency-based. All activities within the course are aimed at placing the student in the context of the native-speaking environment from the very beginning.

ARAB 1011-3. Introduction to Arab Civilizations. Provides an interdisciplinary overview of the cultures of the Arabic-speaking peoples of Southwest Asia and North Africa through historical readings, literature, and film. Texts include medieval literary and philosophical texts, modern novels, documentaries, and feature films. Taught in English.

ARAB 1020-5. Beginning Arabic 2. Continuation of ARAB 1010. Prereq., ARAB 1010 (min. grade C) or placement.

ARAB 2110-3. Intermediate Arabic 1. Proficiency-based course emphasizes speaking, listening, reading, and writing. Covers a variety of topics. Students give classroom presentations and write short essays in Arabic. Speaking ability is assessed through an oral proficiency interview. Prereq., ARAB 1020 (min. grade C), or placement. Meets MAPS requirement for foreign language.

ARAB 2120-3. Second Year Arabic 2. Continuation of ARAB 2110. Prereq., ARAB 2110 (min. grade C) or placement.

ARAB 3010-3. Advanced Arabic I. Designed to train students further in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters. Prereq., ARAB 2120 (min. grade C).

ARAB 3020-3. Advanced Arabic II: Issues in Arabic Language and Culture for Business. Aimed at students who have already completed five semesters of Arabic. Assumes that students already have complete control of basic intermediate grammar, structure and syntax, and descriptive/narrative concrete vocabulary. Draws on several sources from the Arabic/Islamic business society and from Arabic culture and letters as well as Arab press. Taught in Arabic, but many of the assignments and readings will be in both English and Arabic. Prereq., ARAB 3010 (min. grade C).

ARAB 3230-3. Islamic Culture and the Iberian Peninsula. Examines Islamic, especially Arab, culture and history as it relates to the Iberian Peninsula from 92 A.H./711 C.E. to the present. Taught in English. Approved for arts and sciences core curriculum: historical context.

ARAB 3330-3. The Arabic Novel. Focusing on the origins and development of the novel genre in the Arabic tradition, this course examines both the aesthetic qualities of the genre as an artistic form and the ways that it has depicted and intervened in the modern social, political, and cultural upheavals that have shaped the Arab world in the 20th century. Authors include Najib Mahfuz, Abd al Rahman Munif, Hanan al-Shaykh, and Ghassan Kanafani. Taught in English.

ARAB 3340-3. Representing Islam. Explores the cultural politics of representations of the Arab and Islamic worlds both with an emphasis on literary representations of the Islamic world in travel narratives and novels from both the West and the Arab world. Examines historical, anthropological, and visual texts to

consider how Islam has been narrated in colonial European imaginings about the Islamic world as well as contemporary representations.

ARAB 4250-3. Arabic Media. Designed to provide students with advanced Arabic language skills for use in the media. By negotiating authentic materials in Arabic, students will gain a perspective on global issues in the Arab and Islamic world and will attain a better awareness of Arab and Islamic culture. Prereq., three years of Arabic or equivalent, or instructor consent.

ARAB 4840 (1-3). Independent Study. Departmental approval required. May be repeated up to 7 total credit hours.

Chinese

CHIN 1010-5. Beginning Chinese 1. Introduces modern Chinese (Mandarin), emphasizing speaking as well as reading and writing. Students learn both traditional full-form characters and the simplified versions used in mainland China. Credit not granted for this course and CHIN 1150.

CHIN 1020-5. Beginning Chinese 2. Continuation of CHIN 1010. Prereq., CHIN 1010 (min. grade C) or instructor consent. Credit not granted for this course and CHIN 1150.

CHIN 1150-5. Intensive First-Year Chinese. Intensive beginning course covers the same materials as CHIN 1010 and CHIN 1020. Prereqs., instructor consent and placement test. Restricted to students with Chinese language background. Not open to students with credit in CHIN 1010 or CHIN 1020.

CHIN 2110-5. Intermediate Chinese 1. Emphasizes reading, speaking, and writing modern Chinese, including continued study of both full-form and simplified characters. Introduces dictionaries and principles of character formation. Prereq., CHIN 1020 (min. grade C) or instructor consent. Credit not granted for this course and CHIN 2150. Meets MAPS requirement: foreign language.

CHIN 2120-5. Intermediate Chinese 2. Continuation of CHIN 2110. Prereq., CHIN 2110 (min. grade C) or instructor consent. Credit not granted for this course and 2150.

CHIN 3110-5. Advanced Chinese 1. Surveys a variety of authentic-language materials, including films, plays, newspaper articles, essays, and short stories. Extensive use of videotapes made from actual television programs, news broadcasts, commercials, and documentaries. Emphasizes proficiency-oriented approach to reading, writing, and oral communication. Prereq., CHIN 2120 (min. grade C) or instructor consent.

CHIN 3120-5. Advanced Chinese 2. Continuation of CHIN 3110. Prereq., CHIN 3110 (min. grade C) or instructor consent.

CHIN 4110-3. Advanced Readings in Modern Chinese 1. Surveys a wide variety of 20th- and 21st-century written materials, including texts from literature, the social sciences, religion, and cultural history. Focuses on content and style with extensive discussion and frequent written assignments in Chinese. Conducted in Chinese. Prereq., CHIN 3120 (min. grade C) or instructor consent.

CHIN 4120-3. Advanced Readings in Modern Chinese 2. Continuation of CHIN 4110. Prereq., CHIN 4110 (min. grade C) or instructor consent.

CHIN 4210-4. Introduction to Classical Chinese. Introduces the classical language based on texts from the pre-Han and Han periods. Stresses precise knowledge of grammatical principles and exactitude in translation—the basis for all further work in classical Chinese. Prereq., CHIN 2120 or instructor consent.

CHIN 4220-4. Readings in Classical Chinese. Close reading of selected texts of ancient and medieval literature. Readings in both prose and poetry. Emphasizes a disciplined, philological approach to the texts, with proper attention to diction, tone, and nuance. Prereq., CHIN 4210, or instructor consent.

CHIN 4300-3. Open Topics: Readings in Chinese Literature. Studies selected texts on a particular topic taught by regular or visiting faculty. Topics change each term. May be repeated up to 6 total credit hours. Prereq., junior standing or instructor consent.

CHIN 4750-3. Daoism. A detailed examination of the history and current state of Daoism, China's indigenous organized religion, focusing on its origins and development, ethical teachings, ritual activities, and world view. Topics include the relationship of Daoism to popular religion, the practice of alchemy and self-cultivation, beliefs concerning death and the afterlife, and the structure of the

Daoist pantheon. Prereq., RLST 3800 or instructor consent. Restricted to CHIN majors. Same as CHIN 5750 and RLST 4750.

CHIN 4900 (1-3). Independent Study. May be repeated up to 6 total credit hours.

CHIN 5010-3. Sinological Methods. Provides training in research methods for graduate work in Sinology. Regular exercises require students to use standard bibliographic sources and tools, such as *leishu*, *congshu*, specialized dictionaries, dynastic histories, geographical treatises, gazetteers, and private historiography. Prereq., CHIN 4220 or instructor consent.

CHIN 5020-3. Methods of Teaching Chinese. An overview of pedagogical theory and methods for the teaching of Chinese as a second language, including issues of presentation, interaction, and evaluation. Prereq., graduate standing or instructor consent.

CHIN 5030-3. Readings in Pre-Modern Chinese Literary Theory. Introduces the field of pre-modern Chinese literary theory and its relevance in Chinese intellectual history. Based on the close reading of primary sources, i.e. typically on selected core texts of Chinese literary thought, as well as on the reading of secondary literature. Texts and topics vary from year to year. Prereq., graduate standing or instructor consent. May be repeated up to 6 total credit hours.

CHIN 5040-3. History of the Chinese Language. An overview of the development of the Chinese language over the last 3,000 years, focusing on the diachronic changes in phonology and syntax, the evolution of the major dialect families, the standardization of the writing system, the creation of a common literary language, and the development of a standard written vernacular. Prereq., CHIN 4210 or instructor consent.

CHIN 5060-3. Topics in Chinese Linguistics. Examines topics in Chinese dialectology, discourse analysis, historical linguistics, phonetics, and syntax (both synchronically and diachronically). Topics vary from year to year. May be repeated three times for credit. Prereq., CHIN 4120 or equivalent.

CHIN 5110-3. History of Sinology. Surveys the history of Sinology from its formation as a self-conscious scholarly discipline to today. Focuses on significant works and contributions of the field's greatest practitioners. Prereq., graduate standing or instructor consent.

CHIN 5120-3. History of Literature through the Ninth Century. Surveys, with readings in primary and secondary sources, major landmarks in various areas of ancient and medieval literature. Focuses on the classic and most influential works of the Zhou through Tang dynasties. Gives attention to matters of historical fact and actuality as well as to textual and interpretive history. Prereq., graduate standing or instructor consent.

CHIN 5210-3. Ancient Prose. Studies selected pre-imperial and Han prose texts important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on works such as the *Lun yu*, *Mengzi*, *Zhuangzi*, *Huainanzi*, *Shiji*, *Hanshu*, and *Lunheng*. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

CHIN 5220-3. Ancient Poetry. Studies selected pre-imperial and Han poetic works important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on the *Shijing* and the *Chu ci*, as well as the *fu* and *shi* of Han writers. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

CHIN 5230-3. History of Early Chinese Thought. Introduces early Chinese philosophy, mostly "Masters' Literature" of the fifth to first century BCE, which is foundational for all later Chinese philosophy and political thought. Close reading of primary sources will be combined with an introduction to secondary scholarship in English and modern Chinese, both articles on individual texts/philosophers and comprehensive histories of early Chinese philosophy. Prereq., graduate standing or instructor consent.

CHIN 5280-3. Topics in Ancient Literature. Examines a specific problem or issue in ancient Chinese literature, e.g., early views of language's relationship to reality, or the commentary tradition and the emergence of allegorical and metaphorical approaches to interpreting texts. Topics vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

CHIN 5410-3. Medieval Prose. Explores selected Six Dynasties and Tang prose works, emphasizing major writers and texts. Covers works written in both parallel prose and the *guwen* ("old-style") form. Individual writers include such figures as Wang Xizhi, Tao Qian, Li Hua, HanYu, Liu Zongyuan, and Liu Yuxi. In

addition, selected works from the anecdotal records are read. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

CHIN 5420-3. Medieval Poetry. Studies selected works of Six Dynasties and Tang poetry. Studies major figures, prosodic and stylistic variations, and the culturally revealing relationship of poetry to the natural and supernatural world of medieval China. Focuses on poets such as Xie Lingyun, Tao Qian, Wang Wei, Li Bo, Du Fu, as well as important medieval anthologies of verse. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

CHIN 5430-3. Medieval Thought and Religion. Studies selected works of Six Dynasties and Tang intellectual and religious inspiration, important in the development of the medieval Chinese world view and for their role in medieval Chinese literature. Focuses on fundamental texts of both literary and religious value from the Daoist and Buddhist canons, such as the *Huangting jing*, *Zhen gao*, *Miaofa lianhua jing*, and *Tan jing*. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

CHIN 5480-3. Topics in Medieval Literature. Examines a specific problem or issue in medieval literature, e.g., the role of encyclopedias and anthologies in literary training, or the place and forms of literary composition at the imperial court. Topics vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

CHIN 5610-3. Early Modern Prose. Studies Song, Ming, and Qing prose texts selected for their inherent literary merit and for their significance in the Chinese literary tradition. Typically focuses on works by major authors such as Ouyang Xiu, Su Shi, and Yuan Hongdao. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

CHIN 5620-3. Early Modern Poetry. Studies Song, Yuan, Ming and Qing poetry. Stresses major figures, stylistic variations, various poetry schools, new directions in shi verse, and the rise and development of ci. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

CHIN 5630-3. Early Modern Fiction. Explores selected vernacular and classical fiction of the Ming and Qing periods. Normally focuses on long novels such as *Xiyou ji*, *Sanguo yanyi*, *Shuihu zhuan*, *Jin Ping Mei*, as well as short stories by Feng Menglong and Ling Mengchu. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

CHIN 5680-3. Topics in Early Modern Literature. Examines a specific problem or issue in early modern literature (e.g., the relationships among religion, folklore, and early fiction; the issue of genre and traditional fiction); the role of elite versus popular cultures in the composition of fiction; or the relationship of the state and censorship and the southern philosophical schools to the publication of fiction. Topics vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

CHIN 5750-3. Daoism. Restricted to graduate students. Same as CHIN 4750 and RLST 5750.

CHIN 5810-3. Modern Literature. Examines selected texts in various genres of Chinese literature from the May Fourth period (beginning 1917) to the establishment of the People's Republic of China (1949). Focuses on major and influential works produced in this fertile period of experimentation with Western, modernist types of literature. Texts and selections vary from year to year. May be repeated up to 6 total credit hours. Prereq., CHIN 4120 or instructor consent.

CHIN 5820-3. Contemporary Literature. Examines selected texts in various genres of Chinese literature from 1949 (the establishment of the People's Republic of China) to the present. Focuses on major works from the very different literary worlds of Taiwan and mainland China. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4120 or instructor consent.

CHIN 5880-3. Topics in 20th Century Literature. Examines a specific problem or issue in 20th century literature, e.g., feminist fiction in China, modernism in fiction and poetry, or the role of literary criticism in modern literature. Topics vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4120 or instructor consent.

CHIN 5900 (1-3). Independent Study. May be repeated up to 9 total credit hours.

CHIN 6900 (1-6). Independent Study. May be repeated up to 9 total credit hours.

CHIN 6940-1. Master's Degree Candidate.

CHIN 6950 (1-6). Master's Thesis.

Chinese Courses in English

CHIN 1012 (3-4). Introduction to Chinese Civilization. An interdisciplinary introduction from ancient to modern times. Arts, literature, politics, social relations, religion, and material culture are studied in terms of significant themes and ideas pertaining to the civilization of China. Approved for arts and sciences core curriculum: human diversity.

CHIN 1051-3. Masterpieces of Chinese Literature in Translation. Surveys Chinese thought and culture through careful reading and discussion of selected masterworks of Chinese literature in translation. Texts include significant works of poetry and fiction, and philosophical and historical writings from various eras. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

CHIN 1061-3. Boudoirs, Books, Battlefields: Voices and Images of Chinese Women. Explores narrative and visual representations of women throughout Chinese history. Emphasizes how modern values of freedom and equality have transformed women's lives and shaped their aspirations in the 20th century. Course materials include memoirs, novels, ethnographies, documentaries, and feature films. No knowledge of Chinese is necessary. Approved for arts and sciences core curriculum: human diversity.

CHIN 2441-3. Film and the Dynamics of Chinese Culture. Through studying a group of Chinese films in light of modern Chinese history and literature, students examine a series of cultural dilemmas and issues in 20th century China and develop skills in analyzing literary and filmic texts. Approved for arts and sciences core curriculum: literature and the arts.

CHIN 3311-3. The Dao and the World in Medieval China. An interdisciplinary examination of Chinese culture from the third to the tenth centuries A.D., encompassing the intellectual and religious ferment of the Period of Division and the literary and artistic achievements of the glorious Tang dynasty. Studies personal aspects of the world inhabited and created by medieval Chinese civilization, particularly relations with Daoism, Buddhism, natural history, court politics, and celestial and imaginative realms. Taught in English. Recommended prereq., EALC 1011 or CHIN 1051.

CHIN 3321-3. Culture and Literature of Ancient China. Focuses on the religious, cultural, philosophical, and literary aspects of ancient Chinese civilization (1500 B.C.—A.D. 200). Special attention is paid to foundational works that influenced later developments in Chinese culture. All readings are in English. Recommended prereq., EALC 1011 or CHIN 1051. Same as HUMN 3321.

CHIN 3331-3. Culture and Literature of Late Imperial China. The late imperial period was marked by growth of great metropolitan areas, expanded urban entertainments, and an extensive popular culture. This course focuses on the literature and artifacts of this urban culture as well as the hegemonic culture of the state and of traditional social codes and their literary manifestations. Also considers growing contacts with the West and the transition to the modern period. All readings are in English. Recommended prereq., EALC 1011 or CHIN 1051.

CHIN 3341-3. Literature and Popular Culture in Modern China. Surveys 20th century Chinese (including Taiwanese) literature and popular culture against the historical background of rebellion, revolution, and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films, and scholarly articles. Recommended prereq., EALC 1011 or CHIN 1051. Same as HUMN 3341. Approved for arts and sciences core curriculum: literature and the arts.

CHIN 3342-3. Literary Culture in Contemporary China. Surveys the late 20th century Chinese and Taiwanese literature and popular culture against the historical background Market Reform in China and the lifting of Martial Law in Taiwan. Emphasizes close and critical reading skills and an understanding of how aesthetic texts critically engage within historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films, and scholarly articles.

CHIN 3351-3. Reality and Dream in Traditional Chinese Literature. Explores the role of dreams in pre-modern Chinese literature from the beginnings in the

second millennium B.C.E. to the 19th century. The source texts will range from religious, philosophical, medical and historical writings to poetry to various genres of fictional prose and drama, all of them presented in English translations. Prereq., junior standing or instructor consent. Approved for arts and sciences core curriculum: literature and the arts.

CHIN 3361-3. Women and the Supernatural in Chinese Literature. Explores the relationship between the worlds of women and the supernatural in Chinese literature, from ancient to modern times. Focuses on selected significant works of classical and vernacular fiction, religious texts, and poetry (read in translation). Studies the variety of ways in which the folklore of the feminine is shaped and recast in different verbal creations and in different periods. Taught in English. Prereq., junior standing or instructor consent.

CHIN 3371-3. Topics in Chinese Film. Offers in-depth, critical analysis of key issues in Chinese culture as represented in Chinese film. Focuses on various topics, such as specific directors, regions, representation of gender in Chinese film, historical periods, etc. Varies from year to year. Requires no knowledge of Chinese. May be repeated up to 6 total credit hours on different topics. Prereq., junior standing or instructor consent. Recommended prereq., CHIN 1051, 2441.

CHIN 3441-3. Chinese Language and Society. Deals with major linguistic characteristics of Chinese as a medium of communication. Discusses complex linguistic processing of social status and empathy relationships, for example, with reference to the structure of Chinese society and political system. Requires no knowledge of Chinese. Prereq., junior standing or instructor consent.

CHIN 3451-3. Language and Gender in China. Explores the relationship between the Chinese language and gender differences in China. Familiarizes students with the theoretical framework and scholarship surrounding gender and the Chinese language. Provides students with tools for examining gender differences in various Chinese dialects. Taught in English. Prereq., CHIN 1020 or instructor consent.

Farsi

FRSI 1010-5. Beginning Farsi I. Provides a grounding in basic Persian Farsi grammar. The morphological and phonological nuances of the language will be introduced, along with Persian culture. Basic conversation is re-enforced on a daily basis with strong emphasis and reiteration upon the homework and covered grammar.

FRSI 1011-3. Introduction to Persian Civilization. An introduction to the history, literature and art of Iranian (Persian) civilization with a focus on the social and cultural aspects of contemporary Iran. Taught in English.

FRSI 1020-5. Beginning Farsi II. Continuation of FRSI 1010. Completes the presentation of basic structures of Farsi. Continued acquisition of vocabulary and practice of speaking, listening, reading, and writing. Class conducted largely in Farsi. The second half of the course will introduce authentic texts of Persian prose literature. Some poetry may be included. Prereq., FRSI 1010 (min. grade C) or instructor consent required.

FRSI 2010-4. Intermediate Farsi I. Provides an intensive introduction to cultural and literary texts of Iran, along with an introduction of the grammatical and rhetorical complexities of Persian prose and poetry. Students continue to develop speaking, listening, and writing skills through activities based on the readings. Prereq., FRSI 1020 (min. grade C) or instructor consent required. Meets MAPS requirement: foreign language. Approved for arts and sciences core curriculum: foreign language.

FRSI 2020-4. Intermediate Farsi II. Continuation of FRSI 2010. Incorporates more readings in Persian literature, both poetry and prose, and cultural readings. Students continue developing speaking, listening and writing skills based on the readings. Prereq., FRSI 2010 (min. grade C) or instructor consent required.

FRSI 3010-3. Advanced Farsi I. This course will serve as an intensive introduction to both Persian philology and the contemporary novel. Textual analysis of texts ranging from complex to very complex will enable the students to gain a strong grounding in Persian literary texts. Students continue developing speaking, listening, and writing skills through activities based on the readings. Prereq., FRSI 2020 (min. grade C).

FRSI 3020-3. Advanced Farsi II. This course is the continuation of Farsi 3010. The focus will be on textual analysis and discussion of authentic texts in a wide variety of genres and a wide range of topics. Students continue developing speaking

and listening skills through activities based on the readings and develop the ability to write short papers (3-5 pages) in Farsi. Prereq., FRSI 3010 (min. grade C).

Hindi

HIND 1010-5. Beginning Hindi 1. Provides a thorough introduction to the modern Hindi language, emphasizing speaking, listening, reading, and writing skills. This course is proficiency-based. Activities aim to place the student in the context of the native-speaking environment from the very beginning. Students will be provided with opportunities to participate in local South Asian cultural events. Credit not granted for this course and ASIA 1420. Formerly HNDI 1010.

HIND 1011-3. Introduction to Indian Civilization. Survey of traditional and modern world views and experiences of people on the Indian subcontinent through literature and film, beginning with the Ramayana and including medieval tales, modern novels, and feature films. Formerly HNDI 1011.

HIND 1020-5. Beginning Hindi 2. Continuation of HNDI 1010. Provides a thorough introduction to the modern HNDI language, emphasizing speaking, listening, reading and writing skills. Proficiency-based course aims to place the student in the context of the native-speaking environment from the beginning of the course. Provides opportunities to participate in local South Asian cultural activities and events. Prereq., HNDI 1010 (min. grade C). Formerly HNDI 1020.

HIND 2010-5. Intermediate Hindi 1. An intermediate course in the Hindi language. Emphasizes students' speaking, listening, reading and writing skills and culturally appropriate language use. Covers a variety of topics, placing the student in the native-speaking environment and offering opportunities to participate in local South Asian cultural events. Credit not granted for this course and ASIA 2420. Formerly HNDI 2010. Prereq., HIND 1020 (min. grade C). Meets MAPS requirement for foreign language.

HIND 2020-5. Intermediate Hindi 2. Continuation of HNDI 2010. Enhances students' speaking, listening, reading and writing skills and culturally appropriate language use. Covers a variety of topics, placing the student in the native-speaking environment and offering opportunities to participate in local South Asian cultural events. Prereq., HNDI 2010 (min. grade C) or equivalent. Formerly HNDI 2020.

HIND 2441-3. Screening India: A History of Bollywood Cinema. Provides a critical overview of one of the world's largest and most beloved film industries, the popular Hindi cinema produced in Bombay (Mumbai) and consumed around the world under the label "Bollywood." Focus on the post-Independence era to the present, with introduction to key films, directors, stars, genres, formal techniques, and themes, as well as critical analyses of these and other topics. Formerly HNDI 2441.

HIND 3010-5. Advanced Hindi 1. Emphasizes speaking, listening and conversational fluency in Hindi, with a focus on culturally appropriate expression and practical knowledge. An effort will be made to allow the student an opportunity to participate in local South Asian cultural events. Prereq., HNDI 2020 (min. grade C). Formerly HNDI 3010.

HIND 3020-5. Advanced Hindi 2. Continuation of HIND 3010. Emphasizes speaking, listening, and conversational fluency in Hindi, with a focus on culturally appropriate expression and practical knowledge. An effort will be made to allow the student an opportunity to participate in local South Asian cultural events. Prereq., HNDI 3010 (min. grade C). Formerly HNDI 3020.

HIND 3651-3. Living Indian Epics: The Ramayana and the Mahabharata in the Modern Political Imagination. Explores the *Ramayana* and *Mahabharata*, two fundamental mythological pillars of Indian society, through literature, comic books, film, television, and political rhetoric as a means of examining major issues of religion, gender, popular culture, and social politics in contemporary India.

HIND 3661-3. South Asian Diasporas: Imagining Home Abroad. Examines fundamental questions of home, nation, identity, ethnicity, and foreignness in the context of the enormous South Asian diaspora. By means of literature, ethnography, and film, the various connotations of diaspora will be explored along with the cultural productions of members of the South Asian diaspora (both Indian and Pakistani).

HIND 3811-3. The Power of the Word: Subversive and Censored 20th Century Indo-Pakistani Literature. Provides an overview of a selection of writings by important 20th century Indo-Pakistani authors, which will permit students to get acquainted with Indian literature. Provides insight into the experience of social and political events in the 20th century and the reaction of the government to the

critical analysis and portrayal of these events. Taught in English. Formerly HNDI 3811. Approved for arts and sciences core curriculum: human diversity.

HIND 3821-3. The Mahabharata as Literature, Performance, Ideology. Offers an in-depth introduction to the *Mahabharata*, reputedly the world's longest epic and one of the foundational works of Indian civilization. Synopsis of the full text and selected excerpts will be read, including a translation of the spiritual classic, *Bhagavad Gita*. Recent scholarship on the poem's historical, ritual, and mythic contexts as well as on its performance traditions will also be examined. Formerly HNDI 3821.

HIND 3831-3. The Many Faces of Krishna in South Asia Literature and Culture. Using both textual and visual sources, the multiple facets of Krishna in Indian religious experience will be explored through poetry and prose, painting and sculpture, music, dance, and drama. Formerly HNDI 3831.

Indonesian

INDO 1010-5. Beginning Indonesian 1. Provides a thorough introduction to the modern Indonesian language, emphasizing speaking, listening, reading and writing skills. This course is proficiency-based. Activities aim to place the student in the context of the native-speaking environment from the very beginning. Students will be provided opportunities to participate in local Southeast Asian cultural events. Students with previous experience with Indonesian or Malay should contact the instructor for placement.

INDO 1011-3. Introduction to Indonesian Civilization. Provides an overview of the past and present of Indonesia, the people, and their cultures. Discussions with guest speakers, and on films, music, and images, will allow them to get acquainted with important issues and values in today's Indonesia. A closer look to the five major islands in the archipelago will introduce them to the diversity of this nation's 234,693,997 people. Taught in English.

INDO 1020-5. Beginning Indonesian 2. Continuation of INDO 1010. Provides a thorough introduction to the modern Indonesian language, emphasizing the context of the native-speaking environment from the very beginning. Students will be provided with opportunities to participate in local Southeast Asian events. Students with previous experience with Indonesian or Malay should contact the instructor for placement. Prereq., INDO 1010 (min. grade C).

INDO 2010-4. Intermediate Indonesian 1. Aims to increase the students' proficiency in listening, speaking, reading, and writing in modern Indonesian. Students will use only Indonesian in class. Evaluation based on classroom performance, homework, tests, and final project. Students will be provided with opportunities to participate in local Southeast Asian cultural events. Students with previous experience with Indonesian or Malay should contact the instructor for placement. Prereqs., INDO 1010 and 1020 (min. grade C). Meets MAPS requirement for foreign language.

INDO 2020-4. Intermediate Indonesian 2. Continuation of INDO 2010. Aims to increase the students' proficiency in listening, speaking, reading, and writing in modern Indonesian. Students will use only Indonesian in class. Evaluation based on classroom performance, homework, tests, and final project. Students will be provided with opportunities to participate in local Southeast Asian cultural events. Students with previous experience with Indonesian or Malay should contact the instructor for placement. Prereq., INDO 2010 (min. grade of C).

INDO 3010-3. Advanced Indonesian 1. Develops students' proficiency in language skills in modern Indonesian. Emphasis is on students' command in leading discussion and writing in formal Indonesian. Students read classic and contemporary authentic materials. Evaluation based on classroom performance, essays, and final project. Students will be provided with opportunities to participate in local Southeast Asian cultural events. Fluent Indonesian or Malay speakers who wish to learn more about Indonesian cultures should contact the instructor for placement. Prereq., INDO 2020 (min. grade C).

INDO 3020-3. Advanced Indonesian 2. Continuation of INDO 3010. Develops students' proficiency in language skills in modern Indonesian. Emphasis is on students' ability to lead discussion and write in formal Indonesian. Students read classic and contemporary authentic materials. Evaluation based on classroom performance, essays, and final project. Students will be provided with opportunities to participate in local Southeast Asian cultural events. Fluent Indonesian or Malay speakers who wish to learn more about Indonesian cultures should contact the instructor for placement. Prereq., INDO 3010 (min. grade C).

Japanese

JPNS 1010-5. Beginning Japanese 1. Provides a thorough introduction to modern Japanese, emphasizing speaking, listening, reading, and writing in a cultural context.

JPNS 1020-5. Beginning Japanese 2. Continuation of JPNS 1010. Prereq., JPNS 1010 (min. grade C).

JPNS 2110-5. Intermediate Japanese 1. Continued study of oral and written modern Japanese in a cultural context. Prereq., JPNS 1020 or equivalent (min. grade C). Meets MAPS requirement for foreign language.

JPNS 2120-5. Intermediate Japanese 2. Continuation of JPNS 2110. Prereq., JPNS 2110 (min. grade C).

JPNS 3110-5. Advanced Japanese 1. Enhances student competence and performance in Japanese language in a holistic and integrative manner. Prereq., JPNS 2120 (min. grade C).

JPNS 3120-5. Advanced Japanese 2. Continuation of JPNS 3110. Enhances student competence and performance in Japanese language in a holistic and integrative manner. Prereq., JPNS 3110 (min. grade C).

JPNS 3331-3. Business Japanese. Designed to teach Japanese with emphasis on using Japanese for professional purposes. The course aims to foster the skills and the knowledge of effective cross-cultural and interpersonal communication in Japanese and to develop intercultural competence in business contexts. Prereq., JPNS 2120 (min. grade C). Recommended prereq., JPNS 3110 (min. grade C).

JPNS 4030-3. Japanese Syntax. Deals with syntactic phenomena from five areas of Japanese grammar that cause the most difficulty for learners. Their characteristics are explored in forms and discursal functions that go beyond the explanations in basic, prescriptive grammars of Japanese. Prereq., JPNS 3120 or 4120, or instructor consent.

JPNS 4070-3. Second Language Acquisition of Japanese. Studies language acquisition theories and research on Japanese as a second language (JSL). Covers the issues in JSL from linguistic, cognitive, and sociolinguistic perspectives: orthography, grammar, phonology, and vocabulary in the contexts of teaching and learning JSL. Prereq., instructor consent. Same as JPNS 5070.

JPNS 4080-3. Kanji in Japanese Orthography. Covers the issues in kanji research from historical, sociolinguistic, linguistic, cognitive perspective and vocabulary acquisition theories in the context of teaching and learning the Japanese language. Same as JPNS 5080.

JPNS 4110-3. Advanced Readings in Modern Japanese 1. Surveys a variety of material written in modern Japanese, including texts from literature, the social sciences, religion, and cultural history. Emphasizes content and style. Texts and selections vary from year to year. Prereq. JPNS 3120 (min. grade C).

JPNS 4120-3. Advanced Readings in Modern Japanese 2. Continuation of JPNS 4110. Texts and selections vary from year to year. Prereq., JPNS 4110 (min. grade C).

JPNS 4210-3. Contemporary Japanese 1: Current Issues. Offers intensive review of Japanese language skills beyond the first eight semesters, and cultivates further proficiency. Readings will be selected from a wide range of contemporary writings that reflect and represent issues in Japanese as well as global communities. The course emphasizes all skills: reading, listening, writing, speaking, and translation. Instructional technology is extensively integrated into the curriculum. Prereq., JPNS 4120 or instructor consent.

JPNS 4220-3. Contemporary Japanese 2: Current Issues. Continues developing Japanese language skills beyond the first eight semesters. Cultivates further proficiency at an advanced and superior level. Readings are selected from a wide range of contemporary writings that reflect and represent issues in Japanese as well as global communities. Emphasizes all skills: reading, listening, writing, speaking, and translation. Instructional technology is extensively integrated into the curriculum. Prereq., JPNS 4210 or instructor consent.

JPNS 4300-3. Open Topics: Readings in Japanese. Examines selected texts on a particular topic taught by regular or visiting faculty. Topics change each term. May be repeated up to 6 total credit hours. Prereq., instructor consent.

JPNS 4310-3. Classical Japanese 1. Introduces reference tools for reading classical Japanese, and grammar, vocabulary, and use of scripts in premodern Japanese, focusing on the 10th century Taketori Monogatari and the 13th century *Hojoki*. Prereq., JPNS 3110. Recommended prereqs., JPNS 3120, 3811, 3821.

JPNS 4320-3. Classical Japanese 2. Continuation of JPNS 4310. Surveys changes in Japanese literary language from the Nara (eighth century) to Meiji (late 19th century) periods. Attention given to changes in grammar, vocabulary, and use of scripts in premodern Japanese. Introduces representative works of classical Japanese literature of all periods. Prereq., JPNS 4310.

JPNS 4900 (1-3). Independent Study. May be repeated up to 6 total credit hours.

JPNS 4950-3. Honors Thesis.

JPNS 5010-3. Bibliography and Research Methods. Introduces research materials on Japan in Japanese and Western languages, including bibliographic tools, style sheets, and library resources. Overview of secondary sources and publication outlets/methods of disseminating research. Prereq., graduate standing or instructor consent.

JPNS 5020-3. Methods of Teaching Japanese. Surveys pedagogical theory and methods for the teaching of Japanese as a second language, including issues of presentation, interaction, and evaluation. Prereq., graduate standing or instructor consent.

JPNS 5050-3. Japanese Sociolinguistics. Surveys past achievements and current research concerns of Japanese sociolinguists in areas such as speech varieties, language behavior and attitude, and linguistic contact and change, as well as their guiding theories and central fieldwork methods. Prereq., graduate standing or instructor consent.

JPNS 5060-3. Advanced Japanese Syntax. Examines controversial syntactic topics that have inspired a variety of explanations. Alternative linguistic explanations are sought within the framework of an analytical investigation from the viewpoint of language dynamics. May be repeated up to 6 total credit hours. Prereqs., JPNS 4030 or instructor consent.

JPNS 5070-3. Second Language Acquisition of Japanese. Prereq., graduate standing or instructor consent. Same as JPNS 4070.

JPNS 5080-3. Kanji in Japanese Orthography. Prereq., graduate standing or instructor consent. Same as JPNS 4080.

JPNS 5150-3. Japanese Literary Translation. Explores theories and practice of translation of literary texts as applied to Japanese-English translation; strategies for handling a variety of texts; and professional standards and ethics. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

JPNS 5170-3. Japanese for Sinologists. An accelerated course in modern scholarly Japanese for students with a basic foundation in Japanese and an advanced knowledge of Chinese. Focus is on materials in Japanese that relate to Chinese civilization and includes an introduction to kanbun. Prereq., one year of modern Japanese, graduate-level command of Chinese, or instructor consent.

JPNS 5210-3. Classical Prose Literature. Examines selected prose works and authors from the Classical, or Heian, period (784–1185). Texts may include selections from diaries, tale literature, and *zuihitsu* such as *Izumi Shikibu Nikki*, *Genji Monogatari*, and *Makura no Soshi*. Texts and selections vary from year to year. May be repeated up to 6 total credit hours. Prereq., two semesters of classical Japanese language.

JPNS 5220-3. Waka, Renga, and Haiku. Studies the three most important poetic forms in Japanese literary history. Emphasizes the reading and analysis of selected texts and authors that best represent these genres. Readings include selections from the first eight imperial poetry anthologies (*hachidaishu*), famous *renga* sequences (*Minase Sangin Hyakuin*, for example), and the *haiku* of Basho. Texts and selections vary from year to year. May be repeated up to 6 total credit hours. Prereq., two semesters of classical Japanese language.

JPNS 5280 (1-3). Topics in Classical Japanese Literature. Studies a specific problem or issue in classical (eighth through twelfth century) Japanese literature, e.g., the development of specifically Japanese theories of literature or the concept of genre in the Japanese tradition. Topics vary from year to year. May be repeated up to 6 total credit hours.

JPNS 5310-3. Advanced Classical Japanese I. Focuses on stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras. Prereq., JPNS 4310 or instructor consent.

JPNS 5320-3. Advanced Classical Japanese II. Advanced analysis of stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and

early modern eras, including kanbun and hentaigana; translation and explication of texts. Prereq., JPNS 5310 (formerly 5160) or instructor consent.

JPNS 5410-3. Medieval Prose Literature. Focuses on selected prose works and authors from the medieval, or Kamakura and Muromachi periods (1185–1600). Texts may include selections from a variety of war tales, histories, courtly fiction, diaries, memoirs, short prose narratives (*otogi-zoshi*), Noh plays, and Buddhist literature such as *Heike Monogatari*, *Towazugatari*, *Izayoi Nikki*, *Tsurezuregusa*, and *Shasekishu*. Texts and selections vary from year to year. May be repeated up to 6 total credit hours. Prereq., two semesters of classical Japanese language.

JPNS 5420-3. Japanese Buddhism and Literature. Studies selected works from the Japanese literary tradition in which Buddhism plays a significant thematic role. Focuses on texts such as the *Nihon Ryoiki*, Buddhist poetry (*Shakkyo-Ka*) from the imperial poetry anthologies, *Heike Monogatari*, *Hojoki*, the poetry of Saigyō and Bashō, and selected Noh plays. Texts and selections vary from year to year. May be repeated up to 6 total credit hours. Prereq., two semesters of classical Japanese language.

JPNS 5480 (1-3). Topics in Medieval Literature. Focuses on a specific problem or issue in medieval literature, e.g., the spread of literary composition beyond the court. Topics vary from year to year. May be repeated up to 6 total credit hours.

JPNS 5610-3. Japanese Dramatic Literature. Examines major writers and texts of the noh, kyogen, kabuki, and bunraku theaters, including the plays and critical writings of such authors as Kannami Kiyotsugu, Zeami Motokiyo, Konparu Zenchiku, and Chikamatsu Monzaemon. Texts and secondary readings vary from year to year. May be repeated up to 6 total credit hours. Prereq., two semesters of classical Japanese language.

JPNS 5810-3. Modern Japanese Literature. Studies selected texts in Japanese literature from the Meiji Restoration (1868) to the end of the Pacific War. Surveys various literary genres, emphasizing the development of the modern novel as an aspect of Japan's response to Western cultural forms. The unique cultural politics of each of the periods (Meiji, Taisho, and Showa) are illuminated through the filter of both canonical and more marginalized texts. Specific selections vary from year to year. May be repeated up to 6 total credit hours.

JPNS 5820-3. Contemporary Japanese Literature. Covers developments in Japanese prose fiction, from the end of the Pacific War in 1945 to the present. Late modern texts of writers such as Mishima Yukio, Kawabata Yasunari, Enchi Fumiko, and Tanizaki Jun'ichiro (generally taken to represent modern Japanese literature) are reread in the light of works by more recent writers (and critics) such as OeKenzaburo, Yoshimoto Takaaki, Murakami Haruki, and Yamada Eimi. May be repeated up to 6 total credit hours.

JPNS 5830-3. Readings in Modern and Contemporary Japanese Thought and Culture. Examines central issues in Japanese culture and society since the Meiji Restoration (1868) through selected readings of the works of major writers in the fields of literature, anthropology, feminism, political science, and religion, among others. Provides a broad context for cultural studies in modern and contemporary Japan by positioning the most important commentators within their historical and social situations. May be taken for credit twice.

JPNS 5880 (1-3). Topics in Modern Literature and Culture. Close study of a specific problem or issue in modern or contemporary literature or culture: e.g., transwar literary nationalism. May be repeated up to 6 total credit hours, provided the topics vary.

JPNS 5900 (1-3). Independent Study. May be repeated up to 6 total credit hours.

JPNS 6900 (1-6). Japanese Independent Study. May be repeated up to 6 total credit hours.

JPNS 6940-1. Japanese Master's Degree Candidate.

JPNS 6950 (1-6). Japanese Master's Thesis.

Japanese Courses in English

JPNS 1012 (3-4). Introduction to Japanese Civilization. An interdisciplinary introduction from ancient to modern times. Arts, literature, politics, social relations, religion, and material culture are studied in terms of significant themes and ideas pertaining to the civilization of Japan. Approved for arts and sciences core curriculum: human diversity.

JPNS 1051-3. Masterpieces of Japanese Literature in Translation. Surveys Japanese thought and culture through careful reading and discussion of selected masterworks of Japanese literature in translation. Texts include significant works of poetry, fiction, drama, diaries, and essays, from ancient times to the present. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

JPNS 2441-3. Film and Japanese Culture. Examines 20th century Japanese culture through its literature and film. Studies literary works and films by Ozu, Kurosawa, Mizoguchi, and contemporary animators, among others. Considers cultural issues raised in film in light of modern Japanese history and literature. Requires no knowledge of Japanese.

JPNS 3441-3. Language and Japanese Society. Deals with major linguistic characteristics of Japanese as a medium of communication. Discusses complex linguistic processing of social status and empathy relationships, for example, with reference to the structure of Japanese society from ancient to contemporary times. Requires no knowledge of Japanese. Recommended prereq., JPNS 2120.

JPNS 3811-3. Classical Japanese Literature in Translation. Surveys the major works and authors of classical Japanese literature, both poetry and prose, from the earliest historical records and literary anthologies through the Heian period (784–1185). Taught in English. Recommended prereq., JPNS 1051. Same as HUMN 3811.

JPNS 3821-3. Medieval Japanese Literature in Translation. Surveys the major works and authors of medieval Japanese (poetry, prose, and drama) from the Kamakura and Muromachi periods (1185–1600). Taught in English. Recommended prereq., JPNS 1051.

JPNS 3831-3. Early Modern Japanese Literature in Translation. Surveys the major works, authors, and genres of literature from the Tokugawa through Meiji periods in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English. Recommended prereq., JPNS 1051.

JPNS 3841-3. Modern Japanese Literature in Translation. Surveys the major works, authors, and genres of literature from the late Meiji period and 20th century in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English. Recommended prereq., JPNS 1051. Same as HUMN 3841.

Korean

KREN 1010-5. First-Year (Beginning) Korean 1. Trains students in elementary conversational and writing skills and provides grounding in the basic idiomatic and syntactical features of Korean, through lectures, drills, and language laboratory sessions based on set dialogues and readings.

KREN 1011-3. Introduction to Korean Civilization. Introduces the history of Korean culture within the context of political, social, and economic history. Covers the old Choson dynasty to present day Korea. Approved for arts and sciences core curriculum: human diversity.

KREN 1020-5. First-Year (Beginning) Korean 2. Continuation of KREN 1010. Prereq., KREN 1010 (min. grade C) or instructor consent.

KREN 2110-5. Second-Year (Intermediate) Korean 1. Extends the conversational and written skills acquired at the elementary level. Although emphasis remains on spoken Korean, readings are increased, elementary writing skills are introduced gradually, and some Sino Korean characters are taught. Prereq., KREN 1020 (min. grade C) or instructor consent. Meets MAPS requirement for foreign language.

KREN 2120-5. Second-Year (Intermediate) Korean 2. Continuation of KREN 2110. Prereq., KREN 2110 (min. grade C) or instructor consent.

KREN 2441-3. Film and Korean Culture. Introduces Korean/South Korean cinema from colonial period to the contemporary including old Korean black and white films, the earliest talkie films and contemporary art films. Considers cinema as a window to see the tumultuous and diverse culture of modern Korea. Taught in English. No prior knowledge or Korea, Korean film or film art is required.

KREN 3110-5. Advanced Korean 1. Promotes an advanced level of speaking, reading, and writing. Focuses on contemporary business Korean language as reflected in various Korean media such as newspapers, magazines, and televi-

sion. The goal is to acquire Korean language skills at a level that allows students to conduct business activities. Prereq., KREN 2120 (min. grade C) or instructor consent.

KREN 3120-5. Advanced Korean 2. This second semester of Korean offers advanced level (2) speaking and writing. Focuses on understanding contemporary Korean languages as reflected in various communication media, such as print, TV, and films to help students understand Korean in a variety of contexts. Students should be quite fluent in commanding Korean after this course.

KREN 3441-3. Religion and Culture in Korea. Examines major religious traditions of Korea, such as mythology, indigenous practices, doctrinal and meditation Buddhism, and Early and Neo-Confucianism and Christianity, and new religions in modern times.

KREN 3841-3. Modern Korean Literature in English Translation. Surveys masterpieces of modern Korean literature written by significant Korean/Korean American authors in English. Provides various literary and theoretical frameworks to understand Korean literature within the context of Asian global culture. Covers from colonial period to the present. No prior knowledge of Korea or Korean literature is required.

KREN 4900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

Tibetan

TBTN 1010-4. Beginning Colloquial Tibetan I. Provides a thorough introduction to colloquial forms of Tibetan. This course focuses on conversation practice, the acquisition of basic vocabulary and grammar in colloquial usage, learning the alphabet, and training in the skills of pronunciation, spelling and handwriting.

TBTN 1020-4. Beginning Colloquial Tibetan II. Provides a thorough introduction to colloquial forms of Tibetan. This course continues the development of vocabulary and grammar begun in Tibetan I and expands the range of conversation topics. While students focus on oral and aural skills, they begin to learn to read and write modern Tibetan to produce an overall knowledge of the language. Prereq., TBTN 1010 (min. grade C) or instructor consent.

TBTN 2010-4. Intermediate Colloquial Tibetan I. Aims at increasing students' proficiency in colloquial forms of Tibetan. This course expands knowledge of the vocabulary and grammar of spoken Tibetan and engages in more advanced conversation topics while also continuing to develop reading knowledge of modern Tibetan. Prereq., TBTN 1010 and 1020 (min. grade C) or instructor consent.

TBTN 2020-4. Intermediate Colloquial Tibetan II. Aims at increasing students' proficiency in colloquial forms of Tibetan. This course expands knowledge of the vocabulary and grammar of colloquial Tibetan and also continues to develop knowledge of reading and writing modern Tibetan. Prereq., TBTN 2010 (min. grade C) or instructor consent.

TBTN 3210-4. Beginning Literary Tibetan 1. Provides a thorough introduction to literary and colloquial forms of Tibetan. This course focuses on the grammatical foundation of the language, the acquisition of basic vocabulary, and training in the skills of pronunciation, conversation, handwriting and spelling.

TBTN 3220-4. Beginning Literary Tibetan 2. Continuation of TBTN 3210. Provides a thorough introduction to literary and colloquial forms of Tibetan. This course continues the grammar and vocabulary work begun in Tibetan 1 by studying actual Tibetan text and moving to more advanced conversation topics. Students develop oral, aural, and written skills to produce an overall knowledge of the language. Prereq., TBTN 3210 (min. grade C-).

TBTN 4210-4. Intermediate Literary Tibetan 1. Aims at increasing students' proficiency in literary and colloquial forms of Tibetan. This course expands knowledge of the grammar and vocabulary of literary Tibetan through translating texts in a variety of genres and also continues to develop knowledge of spoken modern Tibetan. Prereqs., TBTN 3210 and 3220 (min. grade C-).

TBTN 4220-4. Intermediate Literary Tibetan 2. Continuation of TBTN 4210. Aims at increasing students' proficiency in literary and colloquial forms of Tibetan. This course expands knowledge of the grammar and vocabulary of literary Tibetan through translating texts in a variety of genres and also continues to develop knowledge of spoken modern Tibetan. Prereq., TBTN 4210 (min. grade C-).

Asian Studies

ASIA 1000-3. Introduction to South and Southeast Asian Civilizations. Interdisciplinary survey course, emphasizing cultural developments in the Indian subcontinent that influenced Indonesia and mainland Southeast Asia. Foundation course required for the Asian studies major. Approved for arts and sciences core curriculum: human diversity or historical context.

ASIA 4300-3. Open Topics in Asian Literature and Culture. Examines selected texts on a particular topic. Taught by regular or visiting faculty. Topics change each term. May be repeated up to 6 total credit hours. Prereq., instructor consent.

ASIA 4830-3. Senior Thesis or Project in Asian Studies. Studies an approved Asian topic, following guidelines established by the program director. Undertaken either as an independent study with an Asian studies faculty member or as part of a seminar course approved by the Asian studies faculty representative in the student's disciplinary option. Restricted to Asian Studies majors.

ASIA 4840 (1-3). Independent Study. Provides an independent study opportunity, by special arrangement with Asian Studies faculty, for students with particular Asian Studies interests. May be repeated up to 6 total credit hours. Restricted to Asian Studies majors.

ASIA 4930 (1-2). Engage Asia: Internship in Asian Studies. Matches students with supervised internships in which they share academic learning of topics in Asian culture, history, or language with, for example, teachers and students in the Boulder Valley School District. Students work with Center for Asian Studies research and teaching faculty to, for example, research and prepare lessons they will present in BVSD K–12 classes on world cultures, world geography, world history, and Asian languages. May be repeated up to 6 total credit hours. Recommended prereq., Asian language and culture courses.

Astrophysical and Planetary Sciences

ASTR 1000-3. The Solar System. Examines principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Earth, Sun, moon, planets, and the origin of life. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory and Fiske Planetarium. Formerly ASTR 1110. Similar to ASTR 1010, without lab and recitation. Also similar to ASTR 1030. Students may receive credit for only one of ASTR 1000, 1010, 1030, or 1110. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

ASTR 1010-4. Introductory Astronomy 1. Introduces principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Earth, Sun, moon, planets, and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory and Fiske Planetarium. Similar to ASTR 1000, but with additional recitation and lab experience. Also similar to ASTR 1030. Students may receive credit for only one of ASTR 1000, 1010, 1030, or 1110. Meets MAPS requirement for natural science: lab or nonlab. Approved for arts and sciences core curriculum: natural science.

ASTR 1020-4. Introductory Astronomy 2. Introduces principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. Offers nighttime observation sessions at Sommers-Bausch Observatory and Fiske Planetarium. Similar to ASTR 1200, but with sequence link to ASTR 1010. Also similar to ASTR 1040. Students may receive credit for only one of ASTR 1020, 1040, 1120, or 1200. Prereq., ASTR 1000, 1010, or 1110. Approved for arts and sciences core curriculum: natural science.

ASTR 1030-4. Accelerated Introductory Astronomy 1. Covers principles of modern astronomy summarizing our present knowledge about the Earth, Sun, moon, planets, and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory and Fiske Planetarium. Required in ASTR major/minor. Prereq. or coreq., Calculus I (MATH 1300 or APPM 1350). Students may receive credit for only one of ASTR 1000, 1010, 1030, or 1110. Similar to ASTR 1000 and 1010, but taught at a higher intellectual level, including a significant amount of quantitative analysis. Approved for arts and sciences core curriculum: natural science.

ASTR 1040-4. Accelerated Introductory Astronomy 2. Covers principles of modern astronomy summarizing our present knowledge about the Sun, stars,

birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. Offers opportunities to attend nighttime observing sessions at Sommers-Bausch Observatory. Some sessions are at the Fiske Planetarium. Required in ASTR major/minor. Prereq., ASTR 1030. Prereq. or coreq., Calculus I (MATH 1300 or APPM 1350). Students may receive credit for only one of ASTR 1020, 1040, 1120, or 1200. Similar to ASTR 1010 and 1020 but taught at a higher intellectual level including a significant amount of quantitative analysis. Approved for arts and sciences core curriculum: natural science.

ASTR 1200-3. Stars and Galaxies. Examines principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Sun, stars, neutron stars, black holes, interstellar gas, galaxies, quasars, and the structure and origins of the universe. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory and Fiske Planetarium. Formerly ASTR 1120. Similar to ASTR 1020, without sequence link to ASTR 1010. Also similar to ASTR 1040. Students may receive credit for only one of ASTR 1020, 1040, 1120, or 1200. Approved for arts and sciences core curriculum: natural science.

ASTR 2000-3. Ancient Astronomies of the World. Documents the numerous ways in which observational astronomy and cosmology have been features of ancient cultures. Includes naked eye astronomy, archaeoastronomy, ethnoastronomy, concepts of time, calendrics, cosmogony, and cosmology. Approved for arts and sciences core curriculum: natural science or human diversity.

ASTR 2010-3. Modern Cosmology: Origin and Structure of the Universe. Introduces modern cosmology to nonscience majors. Covers the Big Bang; the age, size, and structure of the universe; and the origin of the elements and of stars, galaxies, the solar system, and life. Approved for arts and sciences core curriculum: natural science.

ASTR 2020-3. Introduction to Space Astronomy. Discusses reasons for making astronomical observations from space, scientific goals, practical requirements for placing instruments in space, politics of starting new programs, and selected missions. Prereq., ASTR 1010, 1020, 1110, or 1120. Approved for arts and sciences core curriculum: natural science.

ASTR 2030-3. Black Holes. Black holes are one of the most bizarre phenomena of nature. Students are introduced to the predicted properties of black holes, astronomical evidence for their existence and formation, and modern ideas about space, time, and gravity. Approved for the arts and sciences core curriculum: natural science.

ASTR 2500-3. Gateway to Space. Introduces the basics of atmospheric and space sciences, space exploration, spacecraft design, rocketry, and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry. Recommended prereqs., APPM 1360 or MATH 2300 and PHYS 1120 or ASTR 1040. Restricted to ASTR or PHYS majors. Same as ASEN 2500. Similar to ASEN 4500.

ASTR 2600-3. Computational Techniques. Introduces practical research skills and provides orientation to computational tools commonly used in research by astrophysicists and planetary scientists, including UNIX and IDL. Restricted to ASTR majors.

ASTR 2840 (1-3). Independent Study. May be repeated up to 6 total credit hours. Prereq., instructor consent.

ASTR 3300-3. Extraterrestrial Life. Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Prereq., one-year sequence in a natural science. Same as GEOL 3300.

ASTR 3510-4. Observations and Instrumentation 1. Lab course in astronomical observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, basic optical design and instrumentation, and statistical analysis of data, with emphasis on imaging applications. A significant number of observation sessions are required. Prereq. or coreq., Calculus 2 (MATH 2300 or APPM 1360), one year of college physics, and one year of college astronomy. Restricted to ASTR majors. Elective for APS major and minor.

ASTR 3520-4. Observations and Instrumentation 2. Lab course in observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, optical design and instrumentation, and statistical analysis, with emphasis on spectroscopy. A significant number of observation sessions

are required. Prereq., ASTR 3510 or instructor consent. Restricted to ASTR majors. Elective for APS major and minor.

ASTR 3710-3. Formation and Dynamics of Planetary Systems. Covers the origin of planetary systems and their dynamical evolution. Topics include the physics and chemistry of planetary formation, orbital mechanics, and extrasolar planets. ASTR 3710, 3720, and 3750 may be taken in any order. Prereqs., PHYS 1110 and 1120, and calculus (MATH 1300 and 2300, or APPM 1350 and 1360). Elective for APS major and minor.

ASTR 3720-3. Planets and Their Atmospheres. Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor. Prereqs., PHYS 1110 and 1120, and either MATH 1300 and 2300, or APPM 1350 and 1360, or instructor consent. Same as ATOC 3720.

ASTR 3730-3. Astrophysics 1: Stellar and Interstellar. ASTR 3730 and 3830 provide a year-long introduction to physical processes, observations, and current research methods in stellar, interstellar, galactic, and extra-galactic astrophysics, with astronomical applications of gravity, radiation processes, spectroscopy, gas dynamics, and plasma physics. Prereqs. or coreqs., PHYS 2130 or 2170, and MATH 2400 or APPM 2350. Elective for APS major and minor.

ASTR 3740-3. Cosmology and Relativity. Special and general relativity as applied to astrophysics, cosmological models, observational cosmology, experimental relativity, and the early universe. Prereqs. or coreqs., PHYS 2130 or 2170, and MATH 2400 or APPM 2350. Elective for APS major and minor.

ASTR 3750-3. Planets, Moons, and Rings. Approaches the physics of planets, emphasizing their surfaces, satellites, and rings. Topics include formation and evolution of planetary surfaces, history of the terrestrial planets, and dynamics of planetary rings. Both ASTR 3720 and ASTR 3750 may be taken for credit in any order. Prereqs., PHYS 1110 and 1120, and calculus (MATH 1300 and 2300, or APPM 1350 and 1360). Elective for APS major and minor.

ASTR 3760-3. Solar and Space Physics. Explores the physical processes linking the Sun and planets, emphasizing solar radiative and particulate variability and the response of planetary atmospheres and magnetospheres. Topics include the solar dynamo, solar wind, coronal mass ejections, cosmic ray modulation, magnetospheres, aurora, the space environment, and climate variability. Prereqs./coreqs., PHYS 2130 or 2170 and MATH 2400 or APPM 2350. Recommended prereq., PHYS 3310. Elective for APS major and minor.

ASTR 3800-3. Introduction to Scientific Data Analysis and Computing. Covers analytical and numerical techniques used in scientific data analysis, including statistical analysis, error analysis, functional fitting, spectral analysis, image processing, and testing theoretical compliance. Examples are from space-based and ground-based astronomy. The computer laboratories are based on IDL which is introduced in the course. Prereqs. or coreqs., ASTR 1040 or equivalent, PHYS 1120 or equivalent, and MATH 2400 or APPM 2350. Restricted to ASTR and PHYS majors.

ASTR 3830-3. Astrophysics 2: Galactic and Extragalactic. ASTR 3730 and 3830 provide a year-long introduction to physical processes, observations, and current research methods in stellar, interstellar, galactic, and extragalactic astrophysics, with astronomical applications of gravity, radiation processes, spectroscopy, gas dynamics, and plasma physics. Prereqs. or coreqs., ASTR 3730, and PHYS 2130 or 2170, and MATH 2400 or APPM 2350. Elective for APS major and minor.

ASTR 4330-3. Cosmochemistry. Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Prereq., upper-division undergraduate or graduate standing in physical science. Recommended prereq., upper-division undergraduate CHEM, PHYS, or MATH. Same as ASTR 5330 and GEOL 4330.

ASTR 4800-3. Space Science: Practice and Policy. Exposes students to current controversies in science that illustrate the scientific method and the interplay of observation, theory, and science policy. Students research and debate both sides of the issues, which include strategies and spin-offs of space exploration, fund-

ing of science, big vs. small science, and scientific heresy and fraud. Prereqs., ASTR 1110 and 1120, or equivalent, or PHYS 1110 and 1120, or PHYS 2010 and 2020.

ASTR 4840 (1-3). Independent Study. May be repeated up to 6 total credit hours. Prereq., instructor consent.

ASTR 4841 (1-3). Independent Study. May be repeated up to 7 total credit hours.

ASTR 5110-4. Atomic and Molecular Processes. Explores the application of quantum physics and statistical mechanics to problems in astrophysics, space physics and planetary science, with an emphasis on radiative processes and spectroscopy of atoms and molecules. Prereq., graduate standing or instructor consent.

ASTR 5120-4. Radiative and Dynamical Processes. An introduction to radiative and dynamical processes aimed at graduate students in astrophysics, space physics and planetary science. Covers transport phenomena, the macroscopic treatment of radiation fields, magnetohydrodynamics and dynamical processes associated with planetary orbits and N-body systems. Prereq., graduate standing or instructor consent.

ASTR 5140-3. Astrophysical and Space Plasmas. Teaches magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies. Prereq., graduate standing in APS or physics. Same as PHYS 5141.

ASTR 5150-3. Introductory Plasma Physics. Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications, and experimental plasma physics (laboratory). Same as PHYS 5150.

ASTR 5300-3. Introduction to Magnetospheres. Introduces solar and stellar winds, and planetary and stellar magnetospheres. Acquaints students with the guiding center theory for particle motion, magnetospheric topology, convection, radiation belts, magnetic storms and substorms, and auroras.

ASTR 5330-3. Cosmochemistry. Same as ASTR 4330 and GEOL 5330.

ASTR 5400-3. Introduction to Fluid Dynamics. Covers equations of fluid motion relevant to planetary atmospheres and oceans, as well as stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers, and wave motions. Introduces instability theory, nonlinear equilibration, and computational methods in fluid dynamics. Same as ATOC 5400.

ASTR 5410-3. Fluid Instabilities, Waves, and Turbulence. Involves linear and nonlinear analyses of small-scale waves and instabilities in stratified fluids, with effects of rotation. Studies internal gravity and acoustic waves with terrestrial, planetary, and astrophysical applications. Also studies thermal and double-diffusive convection, homogeneous and stratified shear flow instabilities. Examines these topics from the onset of small amplitude disturbances to their nonlinear development and equilibration. Prereq., ASTR 5400 or ATOC 5060. Same as ATOC 5410.

ASTR 5540-3. Mathematical Methods. Presents an applied mathematics course designed to provide the necessary analytical and numerical background for courses in astrophysics, plasma physics, fluid dynamics, electromagnetism, and radiation transfer. Topics include integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations. Draws illustrative examples from the areas of physics listed above. Same as ATOC 5540.

ASTR 5550-3. Observations, Data Analysis and Statistics. Introduces multi-wavelength observational techniques, their limitations and effects of various noise sources. Describes basic data handling, error analysis, and statistical tests relevant to modeling. Topics include probability distributions, model-fitting algorithms, confidence intervals, correlations, sampling and convolution. Students derive physical measurements and uncertainties with hands-on analysis of real datasets. Prereq., senior level undergraduate physics or instructor consent.

ASTR 5560-3. Radiative Processes in Planetary Atmospheres. Applies radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radia-

tion flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect; and inversion methods and climate models. Prereq. or coreq., ASTR 5110. Recommended prereq., ATOC 5235. Same as ATOC 5560.

ASTR 5700-3. Stellar Structure and Evolution. Examines basic stellar astronomy: stellar classifications, kinematics, populations and distributions, and H-R diagrams. Covers principles of stellar structure, including energy generation and energy transport by radiation and convection. Includes stellar evolution theory, including compact objects. Prereq., undergraduate physics.

ASTR 5710-3. High-Energy Astrophysics. Studies astrophysics of UV, x-ray, gamma-ray, and cosmic-ray sources, including fundamentals of radiative and particle processes, neutron stars, black holes, pulsars, quasars, supernovas and their remnants; stellar flares; accretion disks; binary x-ray sources; and other cosmic x-ray sources. Prereq., senior-level undergraduate physics.

ASTR 5720-3. Galaxies. Highlights the classification, structure, content, dynamics, and other observational properties of galaxies, active galaxies, and clusters of galaxies. Discusses Hubble's Law, the cosmic distance scale, and the intergalactic medium. Prereq., senior-level undergraduate physics.

ASTR 5730-3. Stellar Atmospheres and Radiative Transfer. Explores stellar atmospheres: basic stellar atmospheres, spectral line formation, interpretation of stellar spectra, and model atmospheres. Examines solar physics: the Sun as a star, solar cycle, chromospheric and coronal structure, energy balance, magnetic field, and solar wind. Prereqs., ASTR 5110 and undergraduate physics.

ASTR 5740-3. Interstellar Astrophysics. Highlights structure, dynamics, and ecology of the interstellar medium, stressing the physical mechanisms that govern the thermal, ionization, and dynamic state of the gas and dust; observations at all wavelengths; star formation; and relation to external galaxies. Prereq., ASTR 5110 or instructor consent.

ASTR 5760-3. Astrophysical Instrumentation. Covers the fundamentals underlying the design, construction, and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include Fourier transforms and their applications, optical design concepts, incoherent and coherent signal detection, electronics and applications, and signal acquisition and processing. Prereq., undergraduate physics.

ASTR 5770-3. Cosmology. Studies the smooth universe, including Friedmann-Robertson-Walker metric, Friedmann equations, cosmological parameters, inflation, primordial nucleosynthesis, recombination, and cosmic microwave background. Also studies the lumpy universe, including linear growth of fluctuations, power spectra of CMB and galaxies, dark matter, and large scale flows. Covers galaxy formation and intergalactic medium. Prereq., undergraduate physics, graduate standing, or instructor consent.

ASTR 5800-3. Planetary Surfaces and Interiors. Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors, and the integrated geologic histories of the terrestrial planets and satellites. Prereq., graduate standing in physical sciences or instructor consent. Same as GEOL 5800.

ASTR 5810-3. Planetary Atmospheres. Covers the structure, composition, and dynamics of planetary atmospheres. Includes the origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres—past and future. Prereq., graduate standing in physical sciences or instructor consent. Same as ATOC 5810 and GEOL 5810.

ASTR 5820-3. Origin and Evolution of Planetary Systems. Considers the origin and evolution of planetary systems, including proto-planetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings, and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies. Prereq., graduate standing in physical sciences or instructor consent. Same as GEOL/ATOC 5820.

ASTR 5830-3. Topics in Planetary Science. Examines current topics in planetary science, based on recent discoveries, spacecraft observations, and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets, or extrasolar planets. May be taken twice for credit. Prereq., graduate standing in physical sciences or instructor consent. Same as ATOC 5830 and GEOL 5830.

ASTR 5835-1. Seminar in Planetary Science. May be repeated up to 4 total credit hours to meet candidacy requirements. Prereq., graduate standing or instructor consent; undergraduate physics. Same as ATOC/GEOL 5835.

ASTR 5920 (1-6). Reading and Research in Astrophysical and Planetary Sciences. May be repeated up to 6 total credit hours. Prereq., instructor consent.

ASTR 6000-1. Seminar in Astrophysics. Studies current research and research literature on an astrophysical topic. Students and faculty give presentations. Subjects vary each semester. May be repeated for a total of 4 credit hours to meet candidacy requirements. Prereq., graduate standing or instructor consent.

ASTR 6610-3. Earth and Planetary Physics 1. Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition, and state of the interior of the Earth. Same as GEOL 6610 and PHYS 6610.

ASTR 6620-3. Earth and Planetary Physics 2. Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth. Same as GEOL 6620 and PHYS 6620.

ASTR 6630-3. Earth and Planetary Physics 3. Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere. Same as GEOL 6630 and PHYS 6630.

ASTR 6650 (1-3). Seminar in Geophysics. Advanced seminar studies in geophysical subjects for graduate students. Same as GEOL 6650 and PHYS 6650.

ASTR 6940-1. Master's Degree Candidate.

ASTR 6950 (1-6). Master's Thesis.

ASTR 7500 (1-3). Special Topics in Astrophysical and Planetary Sciences. Acquaints students with current research in astrophysical and planetary sciences. (Topics vary each semester.) May be repeated up to 9 total credit hours.

ASTR 7920 (1-6). Reading and Research in Astrophysical and Planetary Sciences. May be repeated up to 6 total credit hours. Prereq., instructor consent.

ASTR 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Atmospheric and Oceanic Sciences

ATOC 1050-3. Weather and the Atmosphere. Introduces principles of modern meteorology for nonscience majors, with emphasis on scientific and human issues associated with severe weather events. Includes description, methods of prediction, and impacts of blizzards, hurricanes, thunderstorms, tornadoes, lightning, floods, and firestorms. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

ATOC 1060-3. Our Changing Environment: El Niño, Ozone, and Climate. Discusses the Earth's climate for nonscience majors, focusing on the role of the atmosphere, oceans, and land surface. Describes the water cycle, atmospheric circulations, and ocean currents, and how they influence global climate, El Niño, and the ozone hole. Discusses human impacts from climate change. Prereq., ATOC 1050. Approved for arts and sciences core curriculum: natural science.

ATOC 1070-1. Weather and the Atmosphere Laboratory. Optional laboratory for ATOC 1050. Laboratory experiments illustrate fundamentals of meteorology. Covers collection, analysis, and discussion of data related to local weather. Uses computers for retrieval and interpretation of weather data from Colorado and across the U.S. Prereq. or coreq., ATOC 1050 or instructor consent. Approved for arts and sciences core curriculum: natural science.

ATOC 3070-3. Introduction to Oceanography. Investigates the broad-scale features and dynamics of the Earth's oceans. The course is roughly divided amongst the four major, interrelated disciplines of oceanography: marine geology, marine chemistry, physical oceanography (i.e. circulation), and marine biology. Specific topics include sea floor spreading, marine sediments, salinity, biogeochemi-

cal cycles, currents, waves, tides, primary production, marine ecology, marine resources, global warming, and much more. Prereq., any two-course sequence of natural science courses. Same as GEOL 3070. Approved for arts and sciences core curriculum: natural science.

ATOC 3180-3. Aviation Meteorology. Familiarizes students with a wide range of atmospheric behavior pertinent to air travel: rudiments of aerodynamics; aircraft stability and control; atmospheric circulation, vertical motion, turbulence, and wind shear; fronts, clouds, and storms. Prereq., ATOC 1050 or equivalent. Approved for arts and sciences core curriculum: natural science.

ATOC 3300-3. Analysis of Climate and Weather Observations. Discusses instruments, techniques, and statistical methods used in atmospheric observations. Covers issues of data accuracy and analysis of weather maps. Provides application to temperature and precipitation records, weather forecasting, and climate change trends. Uses computers to access data sets and process data. Prereqs., ATOC 1050 and 1060, or ATOC 3600/GEOL 3601/ENVS 3600, or GEOL 1001 and one semester of calculus. Same as GEOL 3301. Approved for arts and sciences core curriculum: natural science.

ATOC 3500-3. Air Chemistry and Pollution. Examines the composition of the atmosphere, and sources of gaseous and particulate pollutants: their chemistry, transport, and removal from the atmosphere. Applies general principles to acid rain, smog, and stratospheric ozone depletion. Prereqs., two semesters of chemistry. Same as CHEM 3151. CHEM 3151 was formerly CHEM 3500. Approved for arts and sciences core curriculum: natural science.

ATOC 3600-3. Principles of Climate. Describes the basic components of the climate system: the atmosphere, ocean, cryosphere, and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability, and global change. Includes forecasting climate and its application and human dimensions. Prereqs., ATOC 1050 and 1060, or ATOC 3300/GEOL 3301, or GEOL 1001 and 1 semester of calculus. Same as GEOL 3601/ENVS 3600. Approved for arts and sciences core curriculum: natural science.

ATOC 3720-3. Planets and Their Atmospheres. Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor. Prereq., PHYS 1110–1120, and either MATH 1300–2300, or APPM 1350–1360, or instructor consent. Same as ASTR 3720.

ATOC 4215-3. Descriptive Physical Oceanography. Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems. Restricted to seniors. Same as ATOC 5215 and ASEN 4215.

ATOC 4500 (1-3). Special Topics in Atmospheric and Oceanic Sciences. Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. May be repeated up to 9 total credit hours.

ATOC 4720-3. Introduction to Atmospheric Physics and Dynamics. Introduces the fundamental physical principles that govern the atmosphere, and provides an elementary description and interpretation of a wide range of atmospheric phenomena. Topics include atmospheric structure and composition, electromagnetic radiation, clouds, precipitation, energy balance, atmospheric motion, and climate. Prereqs., one year of calculus and one year of physics with calculus.

ATOC 4750-3. Desert Meteorology and Climate. Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate, and the impact of desert climate on humans. Prereq., ATOC 1050 or equivalent. Same as ATOC 5750. Approved for arts and sciences core curriculum: natural sciences.

ATOC 4800-3. Policy Implications of Climate Controversies. Examines controversial issues related to the environment, including climate change. Covers scientific theories and the intersection between science and governmental policy. Includes discussion, debate, and critical reading of textual materials. Prereqs., ATOC 1060 or 3600. Credit not granted for this course and ATOC 5000.

ATOC 4900 (1-3). Independent Study. May be repeated up to 6 total credit hours. Prereq., instructor consent.

ATOC 4950 (1-3). Honors Thesis. Students work independently on a research topic under the guidance of a faculty member. A written thesis and an oral presentation of the work are required. Registration by arrangement and with consent of faculty mentor. Prereq., junior or senior standing, and minimum 3.00 GPA.

ATOC 5000-3. Critical Issues in Climate and the Environment. Discusses current issues such as ozone depletion, global warming, and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments, and critically evaluate these issues. Same as ENVS 5830. Credit not granted for this course and ATOC 4800.

ATOC 5050-3. Introduction to Atmospheric Dynamics. Covers atmospheric motion and its underlying mathematical and physical principles. Explores the dynamics of the atmosphere and the mathematical laws governing atmospheric motion. Topics include atmospheric composition and thermodynamics, conservation laws, geostrophic balance, vorticity dynamics, boundary layers, and baroclinic instability. ATOC graduate core course.

ATOC 5051-3. Introduction to Physical and Chemical Oceanography. Provides fundamental knowledge of the basic dynamics and chemical composition of the ocean. Prereq., calculus. ATOC graduate core course.

ATOC 5060-3. Dynamics of the Atmosphere. Examines large-scale motions in a stratified rotating atmosphere, and quasi-geostrophic flow, barotropic and baroclinic instabilities, cyclogenesis, global circulations, and boundary layer processes. Ageostrophic motions, including Kelvin waves, internal gravity waves, and the theory of frontogenesis are also considered. Prereq., ATOC 5050 or equivalent. ATOC graduate core course.

ATOC 5061-3. Dynamics of Oceans. Explores theories of the large-scale ocean, including quasigeostrophic, planetary geostrophic, and shallow water equations. Topics may vary to focus on ocean climate (e.g. thermocline, westward intensification), ocean waves (e.g. gravity, Rossby, and Kelvin), or ocean models (toy, analytic, and numerical). Maybe repeated up to 9 total credit hours. Prereqs., ATOC 5400 and ATOC 5051 or 5060 or equivalent.

ATOC 5151-3. Atmospheric Chemistry. Reviews basic kinetics and photochemistry of atmospheric species and stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidation capacity of the atmosphere, and global climate change. Prereq., graduate standing or instructor consent. ATOC graduate core course. Same as CHEM 5151.

ATOC 5215-3. Descriptive Physical Oceanography. Same as ATOC 4215 and ASEN 5215.

ATOC 5220-3. Nonlinear Dynamics. Explores conservative systems: canonical perturbation theory, adiabatic invariants, surface of section, overlap criterion, orbit stability, quasilinear diffusion, renormalization analysis of transition to chaos, and bifurcation theory: center manifolds, normal forms, singularity theory. Dissipative systems: strange attractors, renormalization analysis of period doubling, intermittency. Prereq., PHYS 5210 or instructor consent. Same as PHYS 5220.

ATOC 5235-3. Introduction to Atmospheric Radiative Transfer and Remote Sensing. Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. ATOC graduate core course. Same as ASEN 5235.

ATOC 5400-3. Introduction to Fluid Dynamics. Covers equations of fluid motion relevant to planetary atmospheres and oceans, and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers, and wave motions. Introduces instability theory, nonlinear equilibration, and computational methods in fluid dynamics. Prereq., partial differential equations or equivalent. Same as ASTR 5400.

ATOC 5410-3. Fluid Instabilities, Waves, and Turbulence. Nonlinear waves and instabilities; wave-mean and wave-wave interactions, resonant triads; secondary instability and transition to turbulence; diagnosis, modeling, and parameter-

ization of turbulent flows in geophysics and astrophysics. Prereq., ASTR 5120, ATOC 5060, or 5400. Same as ASTR 5410.

ATOC 5540-3. Mathematical Methods. Applied mathematics course; provides necessary analytical background for courses in plasma physics, fluid dynamics, electromagnetism, and radiative transfer. Covers integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations. Same as ASTR 5540.

ATOC 5560-3. Radiative Processes in Planetary Atmospheres. Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Recommended prereq., ATOC 5235. Same as ASTR 5560.

ATOC 5600-3. Physics and Chemistry of Clouds and Aerosols. Clouds and aerosols are ubiquitous in planetary atmospheres, where they impact climate, atmospheric chemistry, remote sensing, and weather. Applies basic microphysical, radiative, and chemical processes affecting particles to issues in current literature. ATOC graduate core course.

ATOC 5750-3. Desert Meteorology and Climate. Same as ATOC 4750.

ATOC 5760-3. Astrophysical Instrumentation. Covers the fundamentals underlying the design, construction, and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include: Fourier transforms and their applications; optical design concepts; incoherent and coherent signal detection; electronics and applications; signal acquisition and processing. Prereq., graduate standing.

ATOC 5810-3. Planetary Atmospheres. Covers the structure, composition, and dynamics of planetary atmospheres. Also includes origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres past and future. Prereq., graduate standing in a physical science, or instructor consent. Same as ASTR/GEOL 5810.

ATOC 5820-3. Origin and Evolution of Planetary Systems. Reviews protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets and asteroids, planetary rings, and extrasolar planets. Applies celestial mechanics to the orbital evolution of solar system bodies. Prereq., graduate standing in a physical science, or instructor consent. Same as ASTR 5820 and GEOL 5820.

ATOC 5830-3. Topics in Planetary Science. Covers current topics in planetary science based on recent discoveries, spacecraft observations, or other developments. Focuses on a specific topic such as Mars, Venus, Galilean satellites, exobiology, comets, or extrasolar planets. May be repeated up to 6 total credit hours, provided the topics vary. Prereq., graduate standing in physical sciences, or instructor consent. Same as ASTR 5830 and GEOL 5830.

ATOC 5835-1. Seminar in Planetary Science. Studies current research on a topic in planetary science. Subjects may vary each semester. May be repeated up to 4 total credit hours to meet candidacy requirements. Prereq., graduate standing or instructor consent. Same as ASTR 5835 and GEOL 5835.

ATOC 5900 (1-6). Independent Study. May be repeated up to 6 total credit hours. Students may register for more than one section of this course in the same semester. Prereq., instructor consent.

ATOC 6020-1. Seminar in Atmospheric and Oceanic Sciences. Studies an area of current research in the atmospheric and oceanic sciences. Students read selected papers from the literature. Students and faculty give presentations and participate in discussions. May be repeated for a total of 6 credit hours within the degree. May be repeated for a total of 3 credit hours within a semester. Prereq., graduate standing and instructor consent.

ATOC 6100-3. Predicting Weather and Climate. Discusses background theory and procedures used in weather and climate prediction on a variety of space and time scales. Includes the forecasting of weather on time scales of days; error growth in numerical models; prediction of El Niño and monsoon variability; and prediction of the impact of anthropogenic influences on climate. Consists of lectures and a weekly laboratory. Prereq., ATOC 5060, 5061, or instructor consent.

ATOC 6950 (1-6). Master's Thesis.

ATOC 7500 (1-3). Special Topics in Atmospheric and Oceanic Sciences. Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. May be repeated up to 9 total credit hours. Students may register for more than one section of this course in the same semester.

ATOC 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Baker Residential Academic Program

BAKR 1500-3. Colorado: History, Ecology, and Environment. Studies the Colorado environment from multiple aspects of history and ecology. Presents historical events in their environmental context and examines lingering environmental consequences. Presents major habitats within Colorado and relates their historical and present uses. Lecture and field trips. Approved for arts and sciences core curriculum: United States context.

BAKR 1600-3. Creating a Sustainable Future. Explores opportunities for moving toward a sustainable 21st century U.S. society. Evaluates socio-economic institutions, values and forces in late 20th century U.S. society that are unsustainable, given 21st century environmental, economic and social challenges. Contemplates societal progress from reflective perspectives and leading visionaries, including CU-generated documents. Explores actions you can adopt now that empower you to live a more sustainable lifestyle. Approved for arts and sciences core curriculum: contemporary societies.

BAKR 1800-3. Exploring Opportunities in the Natural and Environmental Sciences. Engaging students to explore and discover exciting internships, careers, and research opportunities in fields associated with natural science and environmental studies. The class will include seminars, lectures, student presentations, and the exploration of places like the Denver Zoo, natural science museums (Denver and CU campus), Mountain Research Station, Campus Greenhouse, Butterfly Pavillion and Rocky Mountain National Park.

Biological Sciences

See Ecological and Evolutionary Biology; Molecular, Cellular, and Developmental Biology; and Integrative Physiology.

Central and East European Studies

CEES 2002-3. Introduction to Central and East European Studies. Examines major themes in the history of Russia and East-Central Europe since the early modern era, introduces the literature and arts of the region, and presents current political, social, and economic issues. Same as HIST 2002. Approved for arts and sciences core curriculum: historical context.

Chemistry

CHEM 1011-3. Environmental Chemistry 1. Lect. Introduces basic principles of chemistry with applications to current environmental issues including toxic chemicals, air and water pollution, energy sources and their environmental impact, and climate change resulting from the greenhouse effect. No credit given to chemistry or biochemistry majors for CHEM 1011 if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher. Meets MAPS requirements for natural sciences: chemistry or physics. Approved for arts and sciences core curriculum: natural science.

CHEM 1021-4. Introductory Chemistry. Lect., rec., and lab. For students with no high school chemistry or a very weak chemistry background. Remedies a deficiency in natural science MAPS requirements and prepares students for CHEM 1113/1114. No credit given to chemistry or biochemistry majors for CHEM 1021 if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher. Prereq., one year high school algebra or concurrent enrollment in MATH 1011. Approved for arts and sciences core curriculum: natural science.

CHEM 1031-4. Environmental Chemistry 2. Lect., rec., and lab. Applications of chemical principles to current environmental issues including acid rain, stratospheric ozone depletion, the Antarctic ozone hole, solar energy conversion and fuel cells, and the environmental consequences of nuclear war. Laboratory experience is included. No credit given to chemistry or biochemistry majors for 1031 if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher. Prereq., CHEM 1011 with a grade of C- or higher. Approved for arts and sciences core curriculum: natural science.

CHEM 1113-4. General Chemistry 1. Lect., rec. Intended for first-semester students whose academic plans require advanced work in chemistry. Subjects: components of matter, stoichiometry, classes of reactions, gases, thermochemistry, atomic structure, electron configuration, chemical bonding, molecular shapes, covalent bonding, organic compounds, intermolecular forces, equilibrium. Prereqs., one year high school chemistry or CHEM 1021 (min. grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Coreq., CHEM 1114. Not open to engineering students with exception of EPEN majors. Credit not granted for this course and CHEM 1111, 1251, 1351, or CHEM 1221/CHEM 1211. Approved for arts and sciences core curriculum: natural science.

CHEM 1114-1. Laboratory in General Chemistry 1. Lab. Intended for first-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1113. Prereqs., one year high school chemistry or CHEM 1021 (min. grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Coreq., CHEM 1113. Not open to engineering students with exception of EPEN majors. Credit not granted for this course and CHEM 1111, 1251, 1351, or CHEM 1221. Approved for arts and sciences core curriculum: natural science.

CHEM 1133-4. General Chemistry 2. Lect., rec. Intended for second-semester students whose academic plans require advanced work in chemistry. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Prereq., CHEM 1113/1114 or equivalent (min. grade C-). Coreq., CHEM 1134. Credit not granted for this course and CHEM 1131, 1271 or 1371. Approved for arts and sciences core curriculum: natural science.

CHEM 1134-1. Laboratory in General Chemistry 2. Lab. Intended for second-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1133. Prereq., CHEM 1113/1114 or equivalent (min. grade C-). Coreq., CHEM 1133. Credit not granted for this course and CHEM 1131, 1271, or 1371. Approved for arts and sciences core curriculum: natural science.

CHEM 1221-2. Engineering General Chemistry Lab. Coreq., CHEN 1211. One hour recitation in which concepts and problems are re-emphasized, homework is collected, and quizzes are given. Three hour lab in which students perform experiments designed to illustrate chemical concepts discussed in CHEN 1211. Also introduction to basic techniques in chemical measurements and synthesis. Prereq., one year high school chemistry or CHEM 1001 or 1021 (min. grade C-); high school algebra. Coreq., CHEN 1211. Credit not granted for this course and CHEM 1111, 1113/1114, 1251 or 1351. Restricted to engineering students only.

CHEM 1251-5. General Chemistry 1 for Chemistry and Biochemistry Majors. Lect., rec., lab. Intended for first-semester CHEM/BCHM majors. Subjects: components of matter, stoichiometry, classes of reactions, gases, thermochemistry, atomic structure, electron configuration, chemical bonding, molecular shapes, covalent bonding, organic compounds, intermolecular forces, equilibrium. Prereqs., one year high school chemistry or CHEM 1021 (minimum grade C-); high school math through pre-calculus. Not recommended for students with grade below B- in CHEM 1021. Restricted to CHEM/BCHM majors. Credit not granted for this course and CHEM 1111, 1113/1114, 1351, or CHEN 1211/CHEM 1221. Approved for arts and sciences core curriculum: natural science.

CHEM 1271-5. General Chemistry 2 for Chemistry and Biochemistry Majors. Lect., rec., lab. Intended for second-semester CHEM/BCHM majors. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Prereq., CHEM 1251 or equivalent (minimum grade C-). Restricted to CHEM/BCHM majors.

Credit not granted for this course and CHEM 1131, 1133/1134 or 1371. Approved for arts and sciences core curriculum: natural science.

CHEM 1351-5. Honors General Chemistry 1. Lect., rec., and lab. Principles of chemistry and their applications are covered in a comprehensive manner (honors level) in this low-enrollment freshman course. Lectures include topics not covered in CHEM 1113/1114-1133/1134. The laboratory experience is more extensive; therefore, the CHEM 1351-371 sequence is highly recommended for well-prepared students who intend to major in chemistry, chemical engineering, physics, molecular biology, or related areas. Prereqs., one year high school chemistry; four years of high school math and/or a high score on the SAT or ACT math exam and one year of high school physics. Credit not granted for this course and CHEM 1111, 1113/1114, 1221, 1251, and CHEN 1211. Approved for arts and sciences core curriculum: natural science.

CHEM 1371-5. Honors General Chemistry 2. Lect., rec., and lab. Continuation of CHEM 1351. Prereq., CHEM 1351 (min. grade C-). Credit not granted for this course and CHEM 1131, 1133/1134 or 1271. Approved for arts and sciences core curriculum: natural science.

CHEM 3151-3. Air Chemistry and Pollution. Examines the composition of the atmosphere, and sources of gaseous and particulate pollutants: their chemistry, transport, and removal from the atmosphere. Applies general principles to acid rain, smog, and stratospheric ozone depletion. Prereqs., two semesters of chemistry. Same as ATOC 3500. CHEM 3151 was formerly CHEM 3500. Approved for arts and sciences core curriculum: natural science.

CHEM 3311-4. Organic Chemistry 1. Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkanes, alkenes, alkynes, alkyl halides, and aromatic molecules; nomenclature of organic compounds; stereochemistry; reaction mechanisms and dynamics. Students may receive credit for only one of CHEM 3311 and 3351. Prereq., CHEM 1133/1134 (formerly 1131), 1271, or 1371 (min. grade C-); for engineering students only: CHEN 1211/CHEM 1221 (min. grade C-) or equivalent; coreq., CHEM 3321 or 3361.

CHEM 3321-1. Laboratory in Organic Chemistry 1. Lab. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, and aromatic compounds. Stereochemical modeling and the identification of organic unknowns by spectroscopic and chemical methods are also introduced. Prereqs., CHEM 1133/1134 (formerly 1131), 1271, 1371, or CHEN 1211/CHEM 1221 (min. grade C-) or equivalent. Coreq., CHEM 3311 or 3351. For biochemistry and nonchemistry majors. Credit not granted for this course and CHEM 3361.

CHEM 3331-4. Organic Chemistry 2. Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkyl halides, alcohols, ethers, carboxylic acids, aldehydes, ketones, and amines; introduction to the chemistry of heterocycles, carbohydrates, and amino acids; nomenclature of organic compounds; synthesis; and reaction techniques. Prereq., CHEM 3311 or 3351 and CHEM 3321 or 3361 (all min. grade C-). Coreq., CHEM 3341 or 3381. Credit not granted for this course and CHEM 3371.

CHEM 3341-1. Laboratory in Organic Chemistry 2. Lab. For biochemistry and nonchemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing reactions involving alcohols, ketones, carboxylic acids, and their derivatives. Multistep syntheses are also introduced. Prereq., CHEM 3321 or 3361 (min. grade C-). Coreq., CHEM 3331 or 3371.

CHEM 3351-4. Organic Chemistry 1 for Chemistry and Biochemistry Majors. Lect. and rec. Topics include structure and reactions of alkanes, alkenes, alkynes, alcohols, ethers, aldehydes, ketones, and alkyl halides; nomenclature of organic compounds; stereochemistry; reaction mechanisms. Students may receive credit for only one of CHEM 3311 and 3351. Prereq., CHEM 1133/1134 (formerly 1131), 1271, or 1371 (min. grade C-); coreq., CHEM 3361 or 3321.

CHEM 3361-2. Laboratory in Organic Chemistry 1 for Chemistry Majors. Lab. Required course for chemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, alcohols, ketones, and alkyl halides. Explores stereochemical modeling and the identification of organic unknowns. Prereq., CHEM 1133/1134 (formerly 1131), 1271, or 1371 (min. grade C-); coreq., CHEM 3351 or 3311. Credit not granted for this course and CHEM 3321.

CHEM 3371-4. Organic Chemistry 2 for Chemistry and Biochemistry Majors. Lect. and rec. Topics include structure and reactions of carboxylic acids and

derivatives, aromatic compounds, and amines; introduction to the chemistry of heterocycles, carbohydrates, and amino acids; nomenclature of organic compounds; reaction mechanisms. Prereqs., CHEM 3351 or 3311 and CHEM 3361 or 3321 (min. grade C-). Prereq. or coreq., CHEM 3381 or 3341. Credit not granted for this course and CHEM 3331.

CHEM 3381-2. Laboratory in Organic Chemistry 2 for Chemistry Majors. Lab.

Required course for chemistry majors. Instruction in experimental techniques of modern chemistry, emphasizing reactions involving alcohols, ketones, carboxylic acids, aromatic compounds, and their derivatives. Multistep syntheses are also introduced. Prereqs., CHEM 3321 or 3361 and CHEM 3341 (min. grade C-). Prereq. or coreq., CHEM 3331 or 3371.

CHEM 4011-3. Modern Inorganic Chemistry. Lect. Required course for chemistry majors. Introduces modern inorganic chemistry for undergraduates. Includes atomic structure, chemical periodicity, structure and bonding in molecules and crystals, reaction mechanisms, chemistry of selected main group and transition elements, and emphasis on catalyst, materials, bioinorganic, and organometallic systems. Prereq. or coreq., CHEM 4431, 4521, or 4531 (min. grade C-).

CHEM 4021-3. Inorganic Laboratory. One lect. and two 3-hour labs per week. Instruction in experimental techniques of modern inorganic chemistry. Includes syntheses and spectroscopic characterizations of transition metal and main group compounds, experience in manipulation of air sensitive compounds, and techniques involving unusual conditions of pressure or temperature. Prereq., CHEM 4011 (min. grade C-).

CHEM 4171-3. Instrumental Analysis. Lect. Theory and practice of instrumental methods of chemical analysis including atomic and molecular spectroscopy, gas and liquid chromatography, mass spectrometry, and electrochemistry. Prereqs., CHEM 3331 or 3371 (min. grade C-).

CHEM 4181-3. Instrumental Analysis Laboratory with Environmental Emphasis. One lect. and six hours of lab per week. Instruction and experience in using instrumental methods of analysis to address problems in chemistry, biochemistry, industrial chemistry, and environmental chemistry. Prereq., CHEM 4171 (min. grade C-).

CHEM 4251-3. Materials Chemistry and Properties. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods. Prereqs., CHEM 3331 or 3371 and CHEM 4431, 4521, or 4531 (min. grade C-) or instructor consent. Same as CHEM 5251.

CHEM 4261-3. Organic Materials: Structures and Functions. Lect. Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. This course will emphasize the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship. Prereqs., CHEM 3331 or 3371 and CHEM 4431, 4521, or 4531 (min. grade C-) or instructor consent. Same as CHEM 5261.

CHEM 4271-3. Chemistry of Solar Energy. Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies. Prereq., CHEM 3331 or 3371 and CHEM 4431, 4521, or 4531 (min. grade C-) or instructor consent. Same as CHEM 5271.

CHEM 4411-3. Physical Chemistry with Biochemistry Applications 1. Lect. Introduces thermodynamics and kinetics, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, transport properties, multiple site binding phenomena, and the rates of chemical and biochemical reactions. Alternative to CHEM 4511. Designed for biochemistry and biology majors. Prereqs., CHEM 3311 or 3351, PHYS 1110 or 2010, MATH 2400 or APPM 2350 (min. grade C-) or instructor consent. Prereq. or coreq., PHYS 1120 or 2020. Credit not granted for this course and CHEM 4511. Same as CHEM 5411.

CHEM 4431-3. Physical Chemistry with Biochemistry Applications 2. Lect. Principles of physical chemistry (second semester) for students in the biologi-

cal sciences. Topics include quantum mechanics, chemical bonds, principles of spectroscopy, statistical mechanics, and transport processes with application to biological systems. Mathematical background (integral and differential calculus including partial differentiation) required. Prereq., grade of C- or higher in CHEM 4411 or 4511, and MATH 2400 or APPM 2350, and PHYS 1120 or 2020, or instructor consent. Credit not granted for this course and CHEM 4531. Same as CHEM 5431.

CHEM 4511-3. Physical Chemistry 1. Lect. Chemical thermodynamics and kinetics. Includes study of laws of thermodynamics, thermochemistry, entropy, free energy, chemical potential, chemical equilibria, and the rates and mechanisms of chemical reactions. Prereqs., CHEM 3311 or 3351, MATH 2400 or APPM 2350, and PHYS 1110 or 2020 (all min. grade C-) or instructor consent. Prereq. or coreq., PHYS 1120. Credit not granted for this course and CHEM 4411/5411.

CHEM 4521-3. Physical Chemistry for Engineers. Lect. Covers kinetic theory of gases; chemical equilibrium; electrochemistry; chemical kinetics; quantum mechanics and atomic structure; chemical bonding; spectroscopy; statistical mechanics; the solid state; the liquid state; and surface chemistry. Prereq., CHEM 1211 and CHEM 1221, CHEM 1113/1114 (formerly 1111) and 1133/1134 (formerly 1131), 1351 and 1371, MATH 2400 or APPM 2350, and PHYS 1110 (min. grade C- required in all) or instructor consent. Prereq. or coreq., PHYS 1120. Restricted to engineering students only.

CHEM 4531-3. Physical Chemistry 2. Lect. Introduces the quantum theory of atoms, molecules and chemical bonding, and statistical thermodynamics. Includes principles of quantum mechanics and their application to atomic structure, molecular spectroscopy, symmetry properties, and the determination of molecular structure. Also includes principles of statistical mechanics and their applications to properties of gases, liquids, and solids. Prereqs., CHEM 4511 or 4411, and PHYS 1120 or 2020, and MATH 2400 or APPM 2350 (min. grade C- required in all). Credit not granted for this course and CHEM 4431 or 5431.

CHEM 4581-1. Physical Chemistry Lab 1. One 3-hour lab per week. Instruction in experimental techniques of modern physical chemistry. Experiments illustrate the fundamental principles of thermodynamics and chemical kinetics. Illustrates the material discussed in CHEM 4511. Prereq. or coreq., CHEM 4411 or 4511 (min. grade C-) or instructor consent. Restricted to CHEM and BCHM majors. Credit not granted for this course and CHEM 4561.

CHEM 4591-2. Physical Chemistry Lab 2. One lect. and one 3-hour laboratory every two weeks. A continuation of CHEM 4581, but may be taken concurrently with CHEM 4531 or CHEM 4431. Experiments illustrate the principles of quantum chemistry and spectroscopy discussed in CHEM 4531. Prereq., CHEM 4411 or 4511 and 4581 (min. grade C- in all) or instructor consent. Prereq. or coreq., CHEM 4431 or 4531. Restricted to CHEM and BCHM majors. Credit not granted for this course and CHEM 4561.

CHEM 4611-3. Survey of Biochemistry. Lect. One-semester survey of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome, and cellular signaling. For biology and engineering majors and others wanting a survey of biochemistry. Prereq., one semester of organic chemistry (CHEM 3311, 3351, or equivalent; min. grade C-).

CHEM 4621-3. Genome Databases: Mining and Management. Lect. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure. Prereqs., MCDB 3500, CSCI 3104, or CHEM 4711; coreq., CSCI 2270. Same as CHEM 5621. Credit not granted for this course and CSCI 4317 or MCDB 4621.

CHEM 4711-3. General Biochemistry 1. Lect. Topics include structure, conformation, and properties of proteins, nucleic acids, carbohydrates, and membranes; enzyme mechanisms, kinetics, and regulation; intermediary metabolism; energetics and metabolic control; electron transport and oxidative phosphorylation. Prereq., CHEM 3331 or 3371 (min. grade C-). Same as CHEM 5711.

CHEM 4731-3. General Biochemistry 2. Lect. Continuation of CHEM 4711. Metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; biosynthesis and function of macromolecules including DNA, RNA, and proteins; biochemistry of subcellular systems; and special topics. Prereq., CHEM 4711 (min. grade C-). Same as CHEM 5731.

CHEM 4751-3. Current Topics in Biochemical Research. Lect. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking, and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function, and cellular signaling and regulation. Prereqs., CHEM 4711 and 4731 (min. grade C-) or instructor consent. Same as CHEM 5751.

CHEM 4761-4. Biochemistry Laboratory. Two 5-hour periods per week. The first hour of each period is lecture, the remainder is laboratory. Introduction to modern biochemical techniques. Topics include enzymology, spectrophotometry, electrophoresis affinity chromatography, radioisotopes, recombinant DNA, and molecular cloning. Prereq., CHEM 4711 (min. grade of C-). Recommended prereq., CHEM 4731 or MCDB 3500. Restricted to CHEM or BIOCHEM majors.

CHEM 4791-3. Bioorganic Chemistry in Biotechnology. Lect. Explores examples of antibodies, peptides, proteins, RNA, DNA, carbohydrates and lipids. The course uses the primary literature and requires student participation. Prereq., CHEM 4731 or 5731 and CHEM 3331 or 3371 (min. grade C-). Recommended prereq., undergraduate molecular biology. Same as CHEM 5791.

CHEM 4901 (1-6). Independent Study in Chemistry and Biochemistry. For undergraduate study. May be repeated up to 8 total credit hours. Prereq., instructor consent.

CHEM 5011-3. Advanced Inorganic Chemistry 1. Lect. Inorganic chemistry based on principles of bonding, structure, reaction mechanisms, and modern synthetic methods. Chemistry and general properties of representative and transition elements and their compounds. Prereqs., CHEM 4011 and 4531, or graduate standing.

CHEM 5061-3. Advanced Inorganic Chemistry 2. Lectures in physical inorganic chemistry with an emphasis on topics for understanding modern solar energy conversion to electricity and fuels. Includes a description of bonding and properties of coordination compounds in terms of the ligand field and molecular orbital theories. The primary research literature will be used to motivate exploration of relevant themes including spectroscopy, electron transfer, energy transfer, bioenergetic conversion, and small-molecule activation. Prereqs., CHEM 4011 and graduate standing.

CHEM 5151-3. Atmospheric Chemistry. Lect. Basic kinetics and photochemistry of atmospheric species. Stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidative capacity of the atmosphere, and global climate change. Prereq., graduate standing or instructor consent. Same as ATOC 5151.

CHEM 5161-3. Analytical Spectroscopy. Lect. Special topics in spectrochemical analysis, including atomic and molecular spectroscopy, laser analytical methods, electron spectroscopy, surface analytical methods, and their applications to environmental, atmospheric, and bioanalytical problems. Prereq., undergraduate physical chemistry or instructor consent.

CHEM 5171-3. Electroanalytical Chemistry. Lect. Establishes a background for understanding electrochemical systems through a review of the relevant thermodynamic, kinetic, and electronic principles. Compares classical and modern electrochemical methods of analysis. Several special topics are discussed in depth. Prereq., undergraduate physical chemistry or instructor consent.

CHEM 5181-3. Mass Spectrometry and Chromatography. Mass spectrometry, including instrumentation, ionization techniques, and interpretation of mass spectra. Analytical separation processes, with special reference to the theory and practice of liquid and gas chromatography. Combined techniques (e.g., GC-MS), and applications. Prereq., undergraduate physical chemistry or instructor consent.

CHEM 5201-3. Atmospheric Aerosol Discussions. Discusses recent literature concerning atmospheric aerosols and their role in atmospheric problems, including global ozone depletion, air quality, regional haze, acid rain, and global climate change. May be repeated up to 12 total credit hours. Recommended prereq., CHEM/ATOC 5151. Restricted to graduate students.

CHEM 5251-3. Materials Chemistry and Properties. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods. Prereqs., undergraduate organic and physical chemistry, graduate standing or instructor consent. Same as CHEM 4251.

CHEM 5261-3. Organic Materials: Structures and Functions. Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. This course will emphasize the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship. Prereqs., undergraduate organic and physical chemistry, graduate standing, or instructor consent. Same as CHEM 4261.

CHEM 5271-3. Chemistry of Solar Energy. Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies. Prereq., undergraduate organic and physical chemistry, graduate standing, or instructor consent. Same as CHEM 4271.

CHEM 5311-3. Advanced Synthetic Organic Chemistry. Lect. Surveys synthetic transformations emphasizing important functional group transformations and carbon-carbon, bond-forming reactions. Required of all organic chemistry graduate students. Prereq., one year of organic chemistry.

CHEM 5321-3. Advanced Physical Organic Chemistry. Lect. Modern concepts of physical organic chemistry and their use in interpreting data in terms of mechanisms of organic reactions and reactivities of organic compounds. Required of all organic chemistry graduate students. Prereqs., one year of organic chemistry and one year of physical chemistry.

CHEM 5331 (2-3). Advanced Spectroscopic Techniques in Organic Chemistry. Lect. Advanced spectroscopic techniques for structure and determination in organic chemistry. Emphasizes proton and carbon-13 NMR spectroscopy. Prereqs., one year of organic chemistry and one year of physical chemistry.

CHEM 5341-3. Chemical Biology and Drug Design. Develop knowledge base and skills in the interdisciplinary field of chemical biology, including aspects of chemistry and biology, and integrating both with respect to hierarchical levels of structure (atomic, molecular, cellular). Students will receive training that helps to develop their careers in biotech, pharmaceutical, and other research-oriented industries as well as in academia. Prereqs., introductory organic chemistry and general biochemistry.

CHEM 5411-3. Physical Chemistry with Biochemistry Applications 1. Lect. Introduces thermodynamics and kinetics, emphasizing macromolecules and biochemical applications. Intended for biology graduate students. Not open to students in chemistry or other physical sciences. Prereqs., three semesters of calculus, one year of physics, and instructor consent or graduate standing. Same as CHEM 4411. Credit not granted for this course and CHEM 4411 or CHEM 4511.

CHEM 5431-3. Physical Chemistry with Biochemistry Applications 2. Lect. Principles of physical chemistry (second semester) for graduate students in biology. Not open to students of chemistry or the physical sciences. Prereqs., graduate standing and CHEM 5411, or instructor consent. Credit not granted for this course and CHEM 4531. Same as CHEM 4531.

CHEM 5501-3. Advanced Topics in Physical Chemistry. Covers various topics in physical chemistry focusing on their mathematical and physical background. Topics include the application of classical mechanics and electrodynamics in chemistry, the classical mechanics background for the description of atoms and molecules, the use of vector spaces in wave mechanics and quantum mechanics and the classical description of spectroscopy in terms of interaction of light and matter. Prereqs., undergraduate physical chemistry, graduate standing or instructor consent.

CHEM 5531-3. Statistical Mechanics. Lect. Fundamental concepts of quantum and classical statistical mechanics. Applications to properties of gases, liquids, solids, spin, and polymer systems. Reaction, fluctuation, nucleation, and relaxation phenomena. Prereq., undergraduate physical chemistry.

CHEM 5541-3. Chemical Dynamics. Lect. Discussion of mechanism and rate of chemical reactions from a fundamental point of view. Discusses nature of collision and develops concepts of cross section and rate constant. Theories of elementary bimolecular and decay processes are critically examined. Prereq., undergraduate physical chemistry.

CHEM 5561-3. Methods of Molecular Biophysics. Discusses techniques used to determine structure, function, and dynamics of macromolecules, including

optical spectroscopy, magnetic resonance, diffraction, and electron microscopy. Approved for credit toward molecular biophysics certificate. Prereq., one year physical chemistry or quantum mechanics with graduate standing or instructor consent.

CHEM 5571-3. Surface Science. Lect. Principles of surface science with emphasis on fundamental surface phenomena, surface techniques, and surface chemistry. Basic description of surfaces, adsorbate-surface interactions, surface kinetics, and methods of surface analysis. Surface science of interactions, surface kinetics, and methods of surface analysis. Surface science of heterogeneous catalysis, semiconductor processing, and environmental interfaces. Prereqs., undergraduate physical chemistry and graduate standing or instructor consent.

CHEM 5581-3. Introductory Quantum Chemistry. Lect. Basic principles and techniques of quantum mechanics with applications to questions of chemical interest. Quantum dynamics of atoms, molecules, and spin; electronic structure of atoms and molecules. Prereqs., two semesters of physical chemistry and graduate standing, or instructor consent.

CHEM 5591-3. Advanced Molecular Spectroscopy. Lect. Rotational, vibrational, and electronic spectra of molecules, and their interpretation in terms of the quantum theory of molecular structure. Prereqs., two semesters of physical chemistry and graduate standing, or instructor consent.

CHEM 5621-3. Genome Databases: Mining and Management. Same as CHEM 4621. Credit not granted for this course and CSCI 5317 or MCDB 5621.

CHEM 5661-3. Advances in Molecular Biophysics. Discuss recent literature concerning biophysical studies of macromolecular structure and mechanism, including DNA, RNA, proteins, and their interactions. Approved for credit toward Molecular Biophysics Certificate. Prereqs., one year of physical chemistry or quantum mechanics, one year of biology, graduate standing, or instructor consent.

CHEM 5711-3. General Biochemistry 1. Lect. Same lectures as CHEM 4711. Course work includes library studies and preparation of special reports. Not open to undergraduates. Prereq., one year of organic chemistry and graduate standing.

CHEM 5731-3. General Biochemistry 2. Lect. Same lectures as CHEM 4731. Course work includes library studies and report preparations. Not open to undergraduates. Prereqs., CHEM 5711 and graduate standing, or instructor consent.

CHEM 5751-3. Current Topics in Biochemical Research. Prereq., instructor consent required. Same as CHEM 4751.

CHEM 5771-5. Advanced General Biochemistry 1. Lect. In-depth analysis of DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, protein structure, protein dynamics, and physical chemistry of macromolecules. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Prereq., CHEM 4731 or equivalent, and graduate standing, or instructor consent.

CHEM 5776-1. Scientific Ethics and Responsible Conduct in Research. Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct, and development of professional values and ethical standards. Prereqs., CHEM 5771 or MCDB 5210 taken concurrently, and instructor consent. Same as MCDB 5776.

CHEM 5781-5. Advanced General Biochemistry 2. Lect. Detailed consideration of contemporary topics in biochemistry, including protein structure (primary, secondary, tertiary, and quaternary), methods of structure determination and prediction, protein folding (kinetics, thermodynamics, denaturation, and renaturation), and protein dynamics (internal motions and methods of analysis). Prereq., CHEM 5771 or instructor consent.

CHEM 5791-3. Bioorganic Chemistry in Biotechnology. Same as CHEM 4791.

CHEM 5801-3. Advanced Signal Transduction and Cell Cycle Regulation. Lect. Advanced discussion of current research and literature in signal transduction, including ligands, receptors, and intracellular signaling pathways, as well as control on transcription, chromatin structure, DNA replication, mitosis, and cell cycle progression. Recommended prereqs., CHEM 5771 and 5781, MCDB 5210 or MCDB 5220, and graduate standing.

CHEM 5811-3. Advanced Methods in Protein Sequencing and Analysis. Lect. Advanced discussion of current methods in protein sequencing, sequence analysis, and posttranslational modifications, emphasizing techniques of mass spectrom-

etry, use of protein databases, sequence alignment and motifs, structure prediction, and modeling of signaling pathways. Prereq., instructor consent. Recommended prereqs., CHEM 5771, CHEM 5781, MCDB 5210, and graduate standing.

CHEM 5821-1. Special Topics in Signaling and Cell Regulation. Lect. Reviews and evaluates literature on subjects of current interest in signal transduction transcription, cell cycle progression, and cell regulation. Primarily for graduate level presentation of special topics by students, faculty, and research staff. May be repeated up to 5 total credit hours. Prereqs., graduate standing and instructor consent.

CHEM 6001-1. Seminar: Inorganic Chemistry. Student, faculty, and guest presentations and discussions of current research in inorganic chemistry and related topics (transition element and main group element compound properties, inorganic compound in biological, industrial, and materials applications). Required of all inorganic chemistry graduate students. Credit deferred until presentation of satisfactory seminar. Prereq., graduate standing or instructor consent.

CHEM 6021 (1-3). Special Topics in Inorganic Chemistry. Lect. Subjects of current interest in inorganic chemistry. Primarily used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule. May be repeated up to 7 total credit hours. Prereq., graduate standing or instructor consent.

CHEM 6031-3. Special Topics in Nanoscience. Introduces the synthesis, physical properties, and applications of nanometer-scale materials and devices. Includes synthesis of metal and semiconductor nanoparticles and nanowires, optical and electronic properties of nanoscale systems, and applications in biotechnology and energy. Prereqs., CHEM 1111, 1131, and 4431 or 4521 or 4511.

CHEM 6101-1. Seminar: Analytical Chemistry. Student, faculty, and guest presentations and discussions of current research in analytical chemistry. Required of all analytical chemistry graduate students. Credit deferred until presentation of satisfactory seminar. Prereq., graduate standing or instructor consent.

CHEM 6111 (1-3). Special Topics in Analytical Chemistry. Lect. Subjects of current interest in analytical chemistry. Used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule. May be repeated up to 7 total credit hours. Prereq., graduate standing or instructor consent.

CHEM 6301 (1-3). Seminar in Organic Chemistry. Discussions principally concerned with recent literature in organic chemistry. Required of all organic chemistry graduate students. Prereq., graduate standing or instructor consent.

CHEM 6311 (1-3). Special Topics in Synthetic Organic Chemistry. Lect. Selected topics in synthetic organic chemistry, encompassing both methods and/or total synthesis of complex molecules. Prereqs., CHEM 5311 and graduate standing, or instructor consent.

CHEM 6321 (1-3). Special Topics in Physical Organic Chemistry. Lect. Selected topics in physical organic chemistry, which may include photochemistry, carbene chemistry, free radical chemistry, molecular orbital methods, organic materials, or gas phase ion chemistry. Prereq., CHEM 5321 and graduate standing or instructor consent.

CHEM 6401 (1-3). Seminar: Physical Chemistry. Student, faculty, and guest presentations of current research in physical chemistry. Discussion of research topics related to the subject of weekly physical chemistry/chemical physics seminar and appropriate journal articles. Prereq., graduate standing or instructor consent.

CHEM 6411 (1-3). Advanced Topics in Physical Chemistry. Lect. May be repeated up to 7 total credit hours. Prereq., graduate standing or instructor consent.

CHEM 6601-1. Biochemistry Seminar. Required of all biochemistry graduate students. Credit is deferred until presentation of satisfactory seminar. Prereq., graduate standing or instructor consent.

CHEM 6621-1. Special Topics in RNA. Reviews and evaluates recent scientific literature in the field of RNA chemistry and biology, including topics in structure, catalysis, bioinformatic approaches, and control of gene expression. Primarily for graduate level presentation of special topics by students and research staff. May be repeated up to 5 total credit hours. Prereq., graduate standing or instructor consent. Same as MCDB 6621.

CHEM 6711 (3-6). Advanced Topics in Biochemistry. Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipopro-

teins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; and protein chemistry. Presentations include faculty lectures and student reports. May be repeated up to 12 total credit hours. Prereqs., one year of biochemistry courses, graduate standing, and instructor consent.

CHEM 6731 (3-6). Advanced Topics in Biochemistry. Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; and protein chemistry. Presentations include faculty lectures and student reports. May be repeated up to 12 total credit hours. Prereqs., one year of biochemistry courses, graduate standing, and instructor consent.

CHEM 6801-0. Departmental Research Seminar. Lectures by visiting scientists and occasionally by staff members and graduate students on topics of current research. Meets once a week. Required for all graduate students in chemistry. Prereq., graduate standing or instructor consent.

CHEM 6901 (1-6). Special Topics in Chemistry. Prereq., graduate standing or instructor consent.

CHEM 6941-1. Master's Candidate.

CHEM 6951 (1-6). Master's Thesis.

CHEM 7021-2. Seminar: Structural Inorganic Chemistry. Current research in the area of structural inorganic chemistry. Concerns topics related to electronic and molecular structure of transition metal complexes. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7101-2. Seminar: Chromatography and Trace Analysis. Student and faculty discussions and reports on research advances in chromatography, trace analysis, and environmental chemistry. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7111-2. Seminar: Electrochemistry. Student and faculty discussions and reports on research advances in electrochemistry. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7131-1. Seminar in Atmospheric Aerosol Chemistry. Discusses advances in atmospheric aerosol chemistry, with emphasis on new methods for analysis and their application to laboratory and field studies. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent. Recommended prereqs., CHEM 5151, 5181.

CHEM 7141-1. Seminar: Spectroscopy at Dielectric Interfaces. Focuses on current research results and relevant literature in the areas of Raman spectroscopy, interfacial reactions/interactions, fluorescence spectroscopy, and photoacoustic spectroscopy. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7161-1. Seminar: Heterogeneous Atmospheric Chemistry. Topics in atmospheric chemistry emphasizing the structure and reactivity of atmospheric particulates. Presentations on current research and critical evaluations of recent literature. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7211-1. Seminar: Topics in Synthetic Methodology and Natural Product Synthesis. Discussion of contemporary synthetic organic chemistry with a focus on new methodology and total synthesis of natural products.

CHEM 7221-1. Seminar: Photochemistry and Free Radical Chemistry. Current research in areas of organic free radical chemistry, photochemistry, and related topics are presented and discussed. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7231-1. Seminar: Reactive Intermediates. Application of contemporary ideas of chemical physics to organic molecules. Special attention to structures and bonding in organic ions and radicals. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7241-1. Seminar: Synthetic Organic Chemistry. Series of seminars on directed total synthesis. Emphasizes modern synthetic methodology and applications to total synthesis of natural products. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7251-1. Selected Topics in Chemical Genetics. Discusses the brief history of the emerging field of chemical genetics, and focuses on the recent development of concepts, techniques, applications, and its impact on both science and

human health. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

CHEM 7271-1. Seminar: Picosecond Dynamics of Reactions. Includes development and application of picosecond laser spectroscopy to organic and organometallic reactions. Emphasizes relationship between current theoretical developments and experiments. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7281-1. Seminar: Molecular Self-Assembly. Discusses current topics and recent advances in molecular self-assembly, with emphasis on new liquid crystal designs and applications. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent.

CHEM 7291-1. Seminar: Physical Organic Chemistry. Modern experimental techniques and theoretical models in physical organic chemistry are discussed in relation to the development of new materials, such as molecular size tinkertoys to the development of novel photochemical systems and their spectroscopies. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7301-1. Seminar: Synthetic and Mechanistic Chemistry. Discusses particularly the synthesis of complex organic molecules and the mechanism of reagents used in organic synthesis. Includes a study of transition metal mediated organic reactions. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7311-1. Selected Topics in Organic Materials. Current research in the area of organic/materials chemistry. Concerns topics related to organic materials synthesis, carbon nanotube functionalization, artificial photosynthesis, gas storage and catalysis. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

CHEM 7401-1. Seminar in Photochemical Reaction Control. Discusses progress towards control of molecular reactivity using light, including synthetic methods for creating control subjects. Emphasizes new methods to achieve coherent control. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent.

CHEM 7421-2. Seminar: Negative Ion Chemistry. Chemistry of negative ions; experimental methods and designs; laser spectroscopy of ions; theoretical methods; reactive dynamics of ions in the gas phase. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7431-1. Seminar: Topics in Theoretical Chemical Physics. Seminars presented on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7441-2. Research Seminar: Theoretical Chemistry. Studies theoretical description of molecular dynamics as related to rate processes. Focuses on chemical reactions in liquids, absorption-desorption on surfaces, nucleation reactions, and energy flow in molecules. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7461-1. Seminar: Gas Phase Ion Chemistry. Studies gas phase ion chemistry relevant to thermochemical measurements and atmospheric, interstellar, and biomedical applications.

CHEM 7471-1. Seminar in Ultrafast Spectroscopy of Proteins. Discusses advances and developments in biomolecular dynamics, and considers the connection of protein dynamics with function. Emphasizes experimental studies via ultrafast laser spectroscopy. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent.

CHEM 7481-2. Seminar: Molecular Spectroscopy and Photochemistry. Discussion and presentation of current research in spectroscopy and photochemistry of organic as well as organometallic systems. Reviews state of the art techniques available for the theoretical and experimental characterization of excited states. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7491-1. Seminar: Molecular Vibrational Dynamics. Topics pertaining to vibrational dynamics of small molecules are discussed, with particular emphasis upon IR laser spectroscopy, van der Waals' clusters, vibrationally induced dipole moments, and predissociation. Discussion of current research and recently published literature. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7501-1. Seminar: Theoretical Molecular Dynamics. Variety of topics in theoretical chemical physics, emphasizing dynamics of molecules in dissipative environments or in radiation fields. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7511-1. Seminar: Reaction Dynamics in Condensed Phases. Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7521-1. Seminar: Atmospheric Kinetics and Photochemistry. Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. May be repeated up to 6 total credit hours. Prereqs., instructor consent.

CHEM 7531-1. Seminar: Surface Chemistry. Topics in surface science with focus on materials processing and environmental interfaces. Emphasizes kinetic phenomena important in semiconductor fabrication and heterogeneous chemistry on environmental surfaces such as ice and silica. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7551-1. Selected Topics in Ion Spectroscopy. Treats current topics in the spectroscopy of ions. Seminar lectures are given by graduate students on their research and on literature topics, and the results of both in-house and external research groups are studied. Additionally, ideas for interesting directions of research and new experiments are proposed and discussed. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent.

CHEM 7601-2. Seminar: Nucleic Acid Chemistry. Topics in various aspects of current research; emphasizes student readings and presentations. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7611-1. Seminar: Structures and Dynamics of Biopolymers in Solution. Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids; and computations in molecular dynamics simulation, modeling, and geometry. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7621-1. Seminar: Biochemistry and Molecular Biology of Signal Transduction. Discusses and reviews the current literature and experimental results in signal transduction, cell cycle and tumor suppressor gene regulation. Emphasizes the understandings of molecular and biochemical mechanisms of the origin of human tumor cells. Prereq., graduate standing or instructor consent.

CHEM 7651-2. Seminar: Environmental Biochemistry. Topics in various aspects of current biochemical and environmental research. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7661-1. Structure/Function of Human Mediator Transcription Complexes. Study of the mechanisms of eukaryotic gene expression with an emphasis on the structure and function of human mediator transcription complexes. Restricted to graduate students or instructor consent.

CHEM 7671-1. Seminar: Topics in Designing Probes for Signaling Reactions. Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Restricted to graduate students or instructor consent required.

CHEM 7691-1. Seminar: Protein Dynamics and the Mechanism of Sensory Proteins. Discusses recent results and current literature in the areas of the mechanism of sensory proteins, internal motions of proteins, and protein folding. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7701-1. Seminar: Enzyme Mechanisms and Kinetics. Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotope trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7711-1. RNA Mediated Inorganic and Organic Reactions. Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Restricted to graduate students or instructor consent required.

CHEM 7741-1. Seminar: Signal Transduction and Protein Phosphorylation. Devoted to experimental methods for understanding mechanisms of signal trans-

duction in mammalian cells through pathways involving regulation of protein phosphorylation. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7751-1. Seminar: Protein Structure and Folding. Studies structure and folding of proteins and protein complexes using biophysical methods, including nuclear magnetic resonance (NMR), circular dichroism, and fluorescence spectroscopies. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7761-1. Seminar: Eukaryotic Transcriptional Regulation. Studies the regulation of transcription by RNA Polymerase II from human promoters. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CHEM 7781-1. Seminar: Topics in Structural Biology. Discussion of advances and developments in structural biology with emphasis on new methods for protein expression, purification and crystallization; and structure solution implementation. Prereq., graduate standing or instructor consent.

CHEM 7791-1. Seminar: Topics in Ribonucleoprotein Assemblies. Studies aspects of the biochemical and structural analysis of ribonucleic acid (RNA) and its interactions with proteins and assemblies into functional ribonucleoprotein (RNP) enzymes. Techniques focus on x-ray crystallography, spectroscopic methods, and biochemical probing. Prereq., graduate standing or instructor consent.

CHEM 8991 (1-10). Doctoral Dissertation. All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Classics

Literature, Culture, and Thought

CLAS 1010-3. The Study of Words. Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically. No Greek or Latin required. Same as LING 1010.

CLAS 1030-3. Introduction to Western Philosophy: Ancient. Develops three related themes: the emergence in antiquity of a peculiarly scientific mode of thinking; the place of religious belief within this developing scientific world view and the force of ethical speculation within the culture and political climates of ancient Greece and Rome. No Greek or Latin required. Same as PHIL 1010. Approved for arts and sciences core curriculum: historical context.

CLAS 1100-3. Greek Mythology. Covers the Greek myths as documents of early human religious experience and imagination, the source of Greek culture, and part of the fabric of Western cultural tradition. Of particular interest to students of literature and the arts, psychology, anthropology, and history. No Greek or Latin required. Approved for arts and sciences core curriculum: literature and the arts.

CLAS 1110-3. Masterpieces of Greek Literature in Translation. Surveys Greek authors whose works have most influenced Western thought: Homer, Aeschylus, Sophocles, Euripides, Aristophanes, and Plato. No Greek or Latin required. Approved for arts and sciences core curriculum: literature and the arts.

CLAS 1120-3. Masterpieces of Roman Literature in Translation. Surveys ideas and culture of the Romans through a study of representative literature: comedy, tragedy, history, philosophy, oratory, the novel, lyric, epic, and didactic poetry. No Greek or Latin required. Approved for arts and sciences core curriculum: literature and the arts.

CLAS 1140-3. Bread and Circuses: Society and Culture in the Roman World. Surveys the outstanding achievements of Roman culture and society as reflected in literature; philosophy and art; private and official religion; and legal and political thought. No Greek or Latin required. Approved for arts and sciences core curriculum: historical context.

CLAS 2020-3. Science in the Ancient World. Covers the development of scientific modes of thought, theory, and research from mythological origins (e.g., Hesiod's poetry) through pre-Socratic philosophers. Culminates in theories and research of Plato and Aristotle, including the Roman Empire. Students read original sources in translation. No Greek or Latin required. Approved for arts and sciences core curriculum: natural science.

CLAS 2100-3. Women in Ancient Greece. Examines evidence of art, archaeology, and literature of Greek antiquity from a contemporary feminist point of view. Focuses on women's roles in art, literature, and daily life. No Greek or Latin required. Same as WMST 2100. Approved for arts and sciences core curriculum: human diversity.

CLAS 2110-3. Women in Ancient Rome. Uses art, archaeology, and literature to study, from a contemporary feminist point of view, the status of women in works of Roman art and literature, the development of attitudes expressed toward them, and their daily life. No Greek or Latin required. Same as WMST 2110. Approved for arts and sciences core curriculum: human diversity.

CLAS 2610-3. Paganism to Christianity. Offers a cultural history of Greek and Roman religion. Students read ancient texts in translation and use evidence from archaeology to reconstruct the shift from paganism to Christianity in antiquity. No Greek or Latin required. Same as PHIL 2610. Approved for arts and sciences core curriculum: ideals and values.

CLAS 3820-3. Greek and Roman Antiquity in Music from 1600 to Present. Explores the influence of Greek and Roman mythology and history on various genres of music since 1600. Explains the context and meaning of ancient themes and their use by composers from the Renaissance to the present. No Greek or Latin required. Recommended prereq., CLAS 1100. Same as HUMN 3820.

CLAS 4040-3. Seminar in Classical Antiquity. Examines an advanced topic in classical language, literature, history, philosophy, art, or culture. Combines the techniques of philology with a critical approach to the literary and material legacy of the past. Prereq., second-year proficiency in Greek or Latin. May be repeated up to 6 total credit hours.

CLAS 4110-3. Greek and Roman Epic. Students read in English translation the major epics of Graco-Roman antiquity such as the *Iliad*, *Odyssey*, *Argonautica*, *Aeneid*, and *Metamorphoses*. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required. Same as CLAS 5110 and HUMN 4110. Approved for arts and science core curriculum: literature and the arts.

CLAS 4120-3. Greek and Roman Tragedy. Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides, and Seneca in English translation. No Greek or Latin required. Same as CLAS 5120 and HUMN 4120. Approved for arts and sciences core curriculum: literature and the arts.

CLAS 4130-3. Greek and Roman Comedy. Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required. Same as CLAS 5130 and HUMN 4130. Approved for arts and sciences core curriculum: literature and the arts.

CLAS 4140-3. The Greek and Roman Novel. Studies five surviving complete Greek novels from classical antiquity, three Latin novels, and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Readings in English translation. No required prerequisite, but a previous course in classical literature or myth is recommended. Same as CLAS 5140 and HUMN 4131.

CLAS 4840 (1-4). Independent Study. No Greek or Latin required. May be repeated up to 7 total credit hours.

CLAS 5110-3. Greek and Roman Epic. Same as CLAS 4110.

CLAS 5120-3. Greek and Roman Tragedy. Same as CLAS 4120.

CLAS 5130-3. Greek and Roman Comedy. Same as CLAS 4130.

CLAS 5140-3. The Greek and Roman Novel. Same as CLAS 4140.

CLAS 5840 (1-3). Graduate Independent Study. No Greek or Latin required. May be repeated up to 7 total credit hours.

CLAS 6940-1. Master's Degree Candidate. No Greek or Latin required.

CLAS 7840 (1-3). Graduate Independent Study. No Greek or Latin required. May be repeated up to 7 total credit hours.

Ancient History

CLAS 1051-3. The World of the Ancient Greeks. Presents a survey of the emergence, the major accomplishments, the failures, and the decline of the ancient Greeks, from the Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (2000–30 B.C.). No Greek or Latin required. Same as HIST 1051. Approved for arts and sciences core curriculum: historical context.

CLAS 1061-3. The Rise and Fall of Ancient Rome. Presents a survey of the rise of ancient Rome in the eighth century B.C. to its fall in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. No Greek or Latin required. Same as HIST 1061. Approved for arts and sciences core curriculum: historical context.

CLAS 2041-3. War and Society in Ancient Greece. Studies Greek warfare in its cultural, social, and economic contexts, in the light of anthropological comparisons and modern theories. No Greek or Latin required. Same as HIST 2041.

CLAS 4021-3. Athens and Greek Democracy. Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources. Same as CLAS 5021 and HIST 4021.

CLAS 4031-3. Alexander the Great and the Rise of Macedonia. Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great. Prereq., one of the following: CLAS 1509, 3039, 3113, 4051, 4139, 4149, CLAS/HIST 1051, 2041, 4021, or 4041. Same as CLAS 5031 and HIST 4031.

CLAS 4041-3. Classical Greek Political Thought. Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required. Prereq., CLAS/HIST 1051, CLAS/HIST 1061, HIST 1010, PSCI 2004, or PHIL 3000. Same as CLAS 5041, HIST 4041, and PHIL 4210.

CLAS 4061-3. Twilight of Antiquity. Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic, and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required. Same as CLAS 5061 and HIST 4061.

CLAS 4071-3. Seminar in Ancient Social History. Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required. May be repeated up to 9 total credit hours. Same as CLAS 5071 and HIST 4071.

CLAS 4081-3. The Roman Republic. Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required. Same as CLAS 4081 and HIST 4081.

CLAS 4091-3. The Roman Empire. Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters, and personalities of the empire. No Greek or Latin required. Same as CLAS 5091 and HIST 4091.

CLAS 4761-3. Roman Law. Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required. Same as CLAS 5761 and HIST 4761.

CLAS 5021-3. Athens and Greek Democracy. Same as CLAS 4021.

CLAS 5031-3. Alexander the Great and the Rise of Macedonia. Same as CLAS 4031.

CLAS 5041-3. Classical Greek Political Thought. Same as CLAS 4041.

CLAS 5061-3. Twilight of Antiquity. Same as CLAS 4061 and HIST 5061.

CLAS 5071-3. Seminar in Ancient Social History. Same as CLAS 4071.

CLAS 5081-3. The Roman Republic. Same as CLAS 4081.

CLAS 5091-3. The Roman Empire. Same as CLAS 4091.

CLAS 5761-3. Roman Law. Same as CLAS 4761.

CLAS 7011-3. Seminar in Ancient History. Examines topics in ancient Greek and Roman history at an advanced seminar level. May be repeated up to 6 total credit hours. Same as HIST 7011.

Classical Philology

CLAS 4852 (1-3). Honors Thesis.

CLAS 6952 (1-6). Master's Thesis.

CLAS 7012-3. Graduate Seminar. Topic specified on MyCUinfo. May be repeated up to 9 total credit hours for different topics. Prereq., graduate standing.

CLAS 8992 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Greek

CLAS 1013-4. Beginning Classical Greek 1. For students with no previous knowledge of Greek. Introduces basic grammar and vocabulary.

CLAS 1023-4. Beginning Classical Greek 2. Completes the presentation of grammar and introduces reading of literature. Prereq., CLAS 1013 or equivalent.

CLAS 3013-1. Readings in the Greek New Testament and Septuagint. Readings in ancient (*koine*) Greek from the New Testament and the Septuagint. Students aim to achieve fluency in reading and to enrich their knowledge of key terms and ideas borrowed from the Greek past in the early Christian tradition. May be repeated up to 4 total credit hours. Prereq., CLAS 1013 and 1023.

CLAS 3113-3. Intermediate Classical Greek 1. Reading of selected prose texts of authors in ancient Greek such as Plato, Xenophon, Lysias, and selections from the Greek New Testament. Incorporates review of grammar. May be repeated up to 6 total credit hours. Prereqs., CLAS 1013 and 1023 or equivalent. Meets MAPS requirement for foreign language.

CLAS 3123-3. Intermediate Classical Greek 2. Reading of selections from Homer or a Greek tragedy in ancient Greek, with attention to literary form and context as well as advanced grammar and syntax. May be repeated up to 6 total credit hours. Prereqs., CLAS 1013, 1023 and 3113, or equivalent.

CLAS 4003-3. Topics in Greek Literature. Continuous readings from Greek prose or poetry in authors such as Plato, Xenophon, Lysias, Homer, or the tragedians. Reading rate will be about six to eight pages per week, and a presentation and/or term paper will be assigned. Recommended prereqs., CLAS 1013/1023 and CLAS 3113/3123.

CLAS 4013-3. Topics in Greek Prose. Author or topic in ancient Greek specified on MyCUinfo (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators). May be repeated up to 9 total credit hours for different topics. Same as CLAS 5013.

CLAS 4023-3. Topics in Greek Poetry. Author or topic in ancient Greek specified on MyCUinfo (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy). May be repeated up to 9 total credit hours for different topics. Same as CLAS 5023.

CLAS 4093-3. Survey of Greek Literature. Greek literary history in ancient Greek from Homer to the Hellenistic age. Prereqs., CLAS 3113 and 3123 or equivalent. Same as CLAS 5093.

CLAS 4843 (1-3). Independent Study. May be repeated up to 7 total credit hours.

CLAS 5013-3. Topics in Greek Prose. Same as CLAS 4013.

CLAS 5023-3. Topics in Greek Poetry. Same as CLAS 4023.

CLAS 5093-3. Survey of Greek Literature. Same as CLAS 4093.

CLAS 6003-3. Graduate Reading. Author or topic specified on MyCUinfo. May be repeated up to 9 total credit hours for different topics.

CLAS 6843 (1-3). Graduate Independent Study. May be repeated up to 7 total credit hours.

CLAS 7013-3. Graduate Seminar in Greek Literature. May be repeated up to 7 total credit hours.

Latin

CLAS 1014-4. Beginning Latin 1. Introduces basic grammar and vocabulary. For students with no previous knowledge of Latin.

CLAS 1024-4. Beginning Latin 2. Completes the presentation of grammar, incorporates review of fundamentals, and introduces reading of literature. For students with previous experience of Latin. Prereq., CLAS 1014 or equivalent.

CLAS 2114-4. Intermediate Latin 1. Readings from Caesar and/or Cicero, with review of grammar. Prereq., CLAS 1024, or equivalent. Meets MAPS requirement for foreign language.

CLAS 2124-4. Intermediate Latin 2. Selections from Virgil's *Aeneid* with attention to literary form and context as well as advanced grammar and syntax. Prereq., CLAS 2114 or equivalent.

CLAS 3014-3. Introduction to Latin Prose. Author or topic in Latin specified on MyCUinfo (e.g., Cicero, Livy, Pliny). May be repeated up to 9 total credit hours for different topics.

CLAS 3024-3. Introduction to Latin Poetry. Author or topic in Latin specified on MyCUinfo (e.g., Virgil, Ovid, Catullus, Horace.) May be repeated up to 9 total credit hours for different topics.

CLAS 4014-3. Topics in Latin Prose. Author or topic in Latin specified on MyCUinfo (e.g., Roman historians, Roman epistolography, Cicero, Roman novel). May be repeated up to 9 total credit hours for different topics. Prereq., CLAS 3014 and 3024, or equivalent. Same as CLAS 5014.

CLAS 4024-3. Latin Prose Composition. Reviews grammar and syntax. Introduces Latin prose style and composition. Prereqs., CLAS 3014 and 3024, or equivalent. Same as CLAS 5024.

CLAS 4044-3. Topics in Latin Poetry. Author or topic specified in Latin specified on MyCUinfo (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire). May be repeated up to 9 total credit hours for different topics. Prereqs., CLAS 3014 and 3024, or equivalent. Same as CLAS 5044.

CLAS 4094-3. Survey of Latin Literature. Covers Latin literary history in Latin from the beginning to the early Empire. Students read select texts of major authors in poetry and prose. Prereqs., CLAS 3014 and 3024, or equivalent. Same as CLAS 5094.

CLAS 4824-3. Latin Teaching Methods: Open Topics. Covers specialized topics in Latin pedagogy specified on MyCUinfo. Same as CLAS 5824.

CLAS 4844 (1-3). Independent Study. May be repeated up to 7 total credit hours.

CLAS 5014-3. Topics in Latin Prose. Same as CLAS 4014.

CLAS 5024-3. Latin Prose Composition. Same as CLAS 4024.

CLAS 5044-3. Topics in Latin Poetry. Same as CLAS 4044.

CLAS 5094-3. Survey of Latin Literature. Same as CLAS 4094.

CLAS 5404-3. Special Project: Teaching. Trains students to prepare classroom-ready materials, which are then tested in the students' own classroom. Required of master's candidates (teaching of Latin option). Prereq., fulfillment of the remaining requirements for MA (teaching of Latin) or 27 hours of graduate work in classics.

CLAS 5804-3. Accelerated Latin 1. Beginning course for graduate students. Grammar survey, intensive reading. No previous knowledge of Latin required.

CLAS 5814-3. Accelerated Latin 2. Continuation of CLAS 5804. Reading of advanced texts: Caesar, Cicero, Ovid. Prereq., CLAS 5804. For graduate students.

CLAS 5824-3. Latin Teaching Methods: Open Topics. Same as CLAS 4824.

CLAS 6004-3. Graduate Reading. Author or topic specified on MyCUinfo. May be repeated up to 9 total credit hours for different topics.

CLAS 6844 (1-3). Graduate Independent Study. May be repeated up to 7 total credit hours.

CLAS 7014-3. Graduate Seminar in Latin Literature. May be repeated up to 7 total credit hours.

Honors

CLAS 1115-3. Masterpieces of Greek Literature in Translation. Students read about mythological heroes and historical individuals from Achilles to Socrates in Greek literature. Class discusses why the Greeks told stories the way they did and what those stories might have meant to them and might mean to us. Approved for arts and sciences core curriculum: literature and the arts.

Art and Archaeology

CLAS 1509-4. Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World. Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture, and everyday trash to learn about ancient humanity. Same as ARTH 1509. Approved for arts and sciences core curriculum: historical context or literature and the arts.

CLAS 2009-3. Modern Issues, Ancient Times. Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved, and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life. Same as ANTH 2009. Approved for arts and sciences core curriculum: historical context.

CLAS 2019-3. Pompeii and the Cities of Vesuvius. Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations. Same as ARTH 2019. Approved for arts and sciences core curriculum: historical context.

CLAS 3039-3. Greek Art and Archaeology. Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture, and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture. Credit not granted for this course and CLAS/FINE 1009. Same as ARTH 3039. Approved for arts and sciences core curriculum: literature and the arts.

CLAS 3049-3. Introduction to Roman Art and Architecture. Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306–307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces. Same as ARTH 3049. Credit not granted for this course and CLAS 1019 or FINE 1019. Approved for arts and sciences core curriculum: literature and the arts.

CLAS 4109-3. Ancient Italian Painting. Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the fourth century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania, and later Roman wall paintings, including the painted images in ancient catacombs. Previous course work on ancient Italy or the history of pre-modern art is highly recommended. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 5109 and ARTH 4109.

CLAS 4119-3. Roman Sculpture. Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Same as CLAS 5119 and ARTH 4119.

CLAS 4129-3. Aegean Art and Archaeology. A detailed study of the cultures of prehistoric Greece, the Cycladic Islands, and Crete, their art and archaeology, and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states. Same as ANTH/ARTH 4129, CLAS 5129.

CLAS 4139-3. Greek Vase Painting. A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary, and written presentation. Same as CLAS 5139 and ARTH 4139.

CLAS 4149-3. Greek Cities and Sanctuaries. Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings, and using texts as well as material culture. Emphasis is on developing analytical skills. Same as CLAS 5149 and ARTH 4149.

CLAS 4169-3. Topics in Ancient and Classical Art and Archaeology. In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary; they may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology. May be repeated up to 9 total credit hours providing the topics are different. Same as CLAS 5169 and ARTH 4169.

CLAS 4199-3. Roman Architecture. Examines the designs, functions, and construction methods of ancient Roman towns, temples, baths, houses, and civic structures, as well as utilitarian structures, including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation. Same as CLAS 5199 and ARTH 4199.

CLAS 4209-3. Classical Archaeological Field Methods. Offers experiential learning in theories and methods of field excavation at the Villa of Maxentius in Rome. Applies methods for stratigraphic excavation, electronic surveying with GIS,

ceramic analysis, numismatic analysis, architectural construction materials and methods, artifact conservation and data processing and documentation. Offered abroad only. May be repeated up to 6 total credit hours. Coreq., CLAS 4219 for first 3 credit hours. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 5209 and ARTH 4209.

CLAS 4219-3. Maxentius and the City of Rome. Combines seminar discussion and site visits in Rome and Tivoli to understand the excavations at the Villa of Maxentius and its artifacts in the broader contexts of Roman architectural development, late Roman art, and late imperial Roman history. Offered abroad only. Must be taken concurrently with CLAS/ARTH 4209 or CLAS 5209. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 5219 and ARTH 4219.

CLAS 4269-3. Art and Archaeology of the Ancient Near East. Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, and roles of artists. Recommended prereq., CLAS/ARTH 1509. Same as CLAS 5269 and ARTH 4269. Approved for arts and sciences core curriculum: human diversity.

CLAS 4849 (1-3). Independent Study. May be repeated up to 7 total credit hours.

CLAS 5109-3. Ancient Italian Painting. Same as CLAS 4109 and ARTH 5109.

CLAS 5119-3. Roman Sculpture. Same as CLAS 4119 and ARTH 5119.

CLAS 5129-3. Aegean Art and Archaeology. Same as CLAS 4129.

CLAS 5139-3. Greek Vase Painting. Same as CLAS 4139.

CLAS 5149-3. Greek Cities and Sanctuaries. Same as CLAS 4149 and ARTH 5149.

CLAS 5159-3. Hellenistic Art and Archaeology. Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.). Same as ARTH 5159.

CLAS 5169-3. Topics in Ancient and Classical Art and Archaeology. Same as CLAS 4169 and ARTH 4169.

CLAS 5179-3. Periklean Athens. Explores in detail the buildings, sculptures, pots, and foreign imports of Athens under the leadership of Perikles, considering material culture of individuals as much as civic programs. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Same as ARTH 5179.

CLAS 5189-3. Augustan Rome. Explores the sculptures, paintings, and buildings constructed in Rome during the reign of the first emperor Augustus (27 B.C.E.–14 C.E.). Examines the monuments of Augustan Rome as both dependent on republican precedents and yet innovative with respect to designs and meanings. Same as ARTH 5189.

CLAS 5199-3. Roman Architecture. Same as CLAS 4199 and ARTH 4199.

CLAS 5209-3. Classical Archaeological Field Methods. Same as CLAS 4209.

CLAS 5219-3. Maxentius and the City of Rome. Same as CLAS 4219.

CLAS 5269-3. Art and Archaeology of the Ancient Near East. Same as CLAS 4269/ARTH 5269.

CLAS 6109-3. Topics in Critical Theory and Ancient Art and Archaeology. Topics will vary and may focus on a particular approach to ancient material culture or on a particular time period or artifact category. Emphasis is placed on reading and using theory in considering the ancient world. May be repeated once for credit, provided the topics are different.

CLAS 6119 (1-3). Graduate Independent Study in Classical Art and Archaeology. May be repeated up to 7 total credit hours. Prereq., graduate standing.

CLAS 7109-3. Graduate Seminar in Ancient and Classical Art and Archaeology. Topics vary. Emphasis is on gaining expertise in using archaeological reports in tandem with (or contradiction to) textual sources, on reading and using critical theory, on improving analytical skills and discussion, and on honing discussion leadership abilities. May be repeated up to 6 total credit hours providing the topics are different.

Communication

COMM 1210-3. Perspectives on Human Communication. Surveys communication in a variety of contexts and applications. Topics include basic concepts and general models of communication, ethics, language and nonverbal communication, personal relationships, group decision making, organizational communication, and impact of technological developments on communication. Required for COMM majors. Meets MAPS requirement for social science: general. Approved for arts and sciences core curriculum: contemporary societies.

COMM 1300-3. Public Speaking. Covers theory and skills of speaking in various public settings. Examines fundamental principles from rhetorical and communication theory and applies them to oral presentations. Required for COMM majors.

COMM 1600-3. Group Interaction. Covers basic theories, concepts, and characteristics that underlie face-to-face interactions in interpersonal, small group, and organizational settings. Activities stress the development of both task and relational skills in these settings. Required for COMM majors.

COMM 2000-3. Topics in Communication. Investigates select topics in communication. Does not count toward the 2000-level courses required for the major, unless explicitly stated in the course schedule. May be repeated up to 6 total credit hours on different topics. Recommended prereqs., COMM 1210 and 1600.

COMM 2360-3. Campaigns and Revolutions. Introduces concepts in rhetoric and argumentation that are used to explain significant social and political changes in our society. The goal is to show how social actors use rhetoric to promote some social goals and hinder others. Recommended prereqs., COMM 1210 and 1600. Restricted to sophomores/juniors/seniors.

COMM 2400-3. Discourse, Culture and Identities. Examines how aspects of talk (e.g., turn-taking, speech acts, narratives, dialect, and stance indicators) link with identities (e.g., ethnic and racial, age, gender, work-related, and personal). Considers how communication is central to constructing who people are and examines social controversies related to talk and identities. Approved for arts and sciences core curriculum: human diversity.

COMM 2500-3. Interpersonal Communication. Focuses on basic processes in face-to-face interaction, including verbal and nonverbal messages, coordination in conversation, messages about self and others, and communication in personal relationships. Emphasizes theory and concepts rather than skills. Recommended prereqs., COMM 1210 and 1600. Restricted to sophomores, juniors, and seniors.

COMM 2600-3. Organizational Communication. Provides a communicatively based definition of formal organization and deals with individual-organizational relationships. Addresses topics such as organizational theory, organizational culture, power, technology, decision making, teamwork, leadership, diversity, gender, socialization, and ethics. Recommended prereqs., COMM 1210 and 1600. Restricted to sophomores, juniors, and seniors.

COMM 3000-3. Issues in Communication. Explores select issues in communication. May be repeated up to 6 total credit hours on different issues. Prereqs., COMM 1210 and 1600 or instructor consent. Restricted to juniors or seniors only.

COMM 3210-3. Human Communication Theory. Acquaints students with general, thematic, and contextual theories of human communication. Gives attention to criteria for evaluating theories. Prereqs., COMM 1210 and 1600. Restricted to junior or senior Communication majors.

COMM 3300-3. Rhetorical Foundations of Communication. Provides the rhetorical foundations of communication through study of the humanistic traditions of rhetorical theory, with applications to social interaction and message analysis. Prereqs., COMM 1210, 1300 and 1600. Restricted to junior or senior Communication majors.

COMM 3310-3. Principles and Practices of Argumentation. Focuses on principles of argument, the process of critical decision making, and uses and limitations of logic and evidence. Contemporary issues (personal, social, political, or philosophical) are analyzed and debated. Prereq., COMM 1210 and 1600. Restricted to juniors or seniors.

COMM 3320-3. Persuasion in Society. Explores how persuasion influences decision making. Focuses on different definitions and models of persuasion, ethical perspectives on persuasion, qualitative and quantitative research on persuasion, and the tools of motivation, as well as how to create effective and ethical persuasive messages. Prereqs., COMM 1210 and 1600. Restricted to junior or senior Communication majors.

COMM 3340-3. Political Communication. Provides an overview of the role of communication in contemporary political life. Topics include political communication theories, political campaign communication, media and political communication, and the role of political communication in promoting democracy and public policy. Prereqs., COMM 1210 and 1600.

COMM 3410-3. Intercultural Communication. Explores complex relationships between culture and communication processes from various conceptual perspectives, such as social, psychological, interpretive, and critical. Considers the important role of context (e.g., social, historical, and cultural) in intercultural interactions. Recommended prereqs., COMM 1210 and 1600. Restricted to juniors or seniors only. Approved for arts and sciences core curriculum: human diversity.

COMM 3510-3. Family Communication. Explores communication in families from various theoretical perspectives, such as social constructionism, systems theory, and dialectical theory. Communication patterns and processes created and sustained by family members are examined, including rules, roles, stories, rituals, myths, metaphors, themes, and cycles. Prereqs., COMM 1210 and 1600. Restricted to junior or senior Communication majors.

COMM 3610-3. Communication, Technology, and Society. Presents theory, research, and exploration into computer-based technologies; studies implications for communication, interaction, and social relationships. Recommended prereqs., COMM 1210 and 1600.

COMM 3740-3. Qualitative Communication Research Methods. Provides an understanding of philosophies, theories, and methods associated with the study of communication in natural settings. Focuses on strategies of collecting, analyzing, and reporting qualitative data, including participant observation, in-depth interviewing, textual analysis, and ethnographic narrative. Prereqs., COMM 1210 and 1600. Restricted to junior or senior Communication majors.

COMM 3750-3. Quantitative Research Methods. Introduces empirically oriented research methods in communication, critical review of the logic of social-scientific principles in communication, and analysis of quantitative data. Prereqs., COMM 1210 and 1600. Restricted to junior or senior Communication majors.

COMM 3760-3. Rhetorical Criticism. Applies key concepts from rhetorical theory to the analysis of specific speeches, written texts, and social situations within the humanistic tradition. Students read a variety of types of criticism and are encouraged to develop their own strategies for critical analysis. Prereqs., COMM 1210 and 1600. Restricted to junior or senior Communication majors.

COMM 4000-3. Advanced Topics in Communication. Analyzes special interest areas of communication theory, research, and practice. Course format involves lecture, discussion, investigative analysis, and practical application. May be repeated twice for credit on different topics. Prereqs., COMM 3210 and 3300 or consent required. Restricted to juniors or seniors only.

COMM 4100-3. Seminar in Honors Thesis Writing and Research. Provides the opportunity for students writing an honors thesis to develop their understanding of the research process and to improve their research and writing skills. Restricted to COMM majors in the honors program.

COMM 4220-3. Senior Seminar: Functions of Communication. Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices. May be taken twice for credit on different topics. Prereqs., COMM 3210 and 3300. Restricted to junior/senior COMM majors.

COMM 4300-3. Senior Seminar: Rhetoric. Reviews current theory and research on topics such as rhetoric and publics, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns. May be taken twice for credit on different topics. Prereqs., COMM 3210 and 3300. Restricted to junior or senior Communication majors. Same as COMM 5300.

COMM 4400-3. Senior Seminar: Communication Codes. Topical seminar on dialogic and nonverbal communication codes. Reviews current theory and research on topics such as relationship between verbal and nonverbal codes, discourse processes, and cultural differences in communication processes. May be repeated up to 6 total credit hours on different topics. Prereqs., COMM 3210 and 3300. Restricted to junior/senior COMM majors.

COMM 4510-3. Senior Seminar: Interpersonal Communication. Reviews current theory and research on topics such as strategic interaction, relationship forma-

tion and maintenance, and identity and self-presentation. May be taken twice for credit on different topics. Prereqs., COMM 3210 and 3300. Restricted to junior or senior Communication majors.

COMM 4600-3. Senior Seminar: Organizational Communication. Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations. May be repeated up to 6 total credit hours on different topics. Prereqs., COMM 3210 and 3300. Restricted to junior or senior Communication majors. Same as COMM 5600.

COMM 4610-3. Communication Studies of Science and Technology. Reviews current theory and research associated with science, technology, and medicine. Topics include new communication technologies in organizations and society, discourses of scientific theory and science policy, and interaction in clinical setting. May be taken twice for credit on different topics. Prereqs., COMM 3210 and 3300 or instructor consent.

COMM 4840 (1-6). Undergraduate Independent Study. Note that the 14-hour limit in the major applies to any combination of independent study and internship credit. This course does not count toward the 33 credit hours required for the major. Recommended prereq., COMM 3250 or 3360. Restricted to junior or senior Communication majors.

COMM 4930 (1-6). Internship. Studies are pursued in communication-related work experience projects that generally require 40 hours on the job per credit hour and evidence (e.g., journal, paper, and employer evaluation) of significant learning. Prereqs., COMM major status, 72 hours of overall course work, 18 hours of communication course work completed, 2.50 overall GPA, and a faculty sponsor. Restricted to junior or senior Communication majors. The 14-hour limit in the major applies to any combination of independent study and internship credit. This course does not count toward the 33 hours required for the major. Course is offered only for pass/fail credit.

COMM 4950 (1-6). Senior Thesis: Honors. For exceptional communication majors who wish to graduate with department honors and receive credit for writing an honors thesis. Prereqs., COMM 4100, overall GPA of 3.35 or higher, and COMM GPA of 3.50 or higher.

COMM 5210-3. Readings in Communication Theory. Critical overview of leading theoretical traditions in communication studies. Gives attention to metatheoretical issues, including epistemological foundations, the structure of communication theory as a field, and reflexivity between communication theory and cultural practice. Required for doctoral students in COMM; optional for master's students. Restricted to graduate students or instructor consent.

COMM 5220-3. Seminar: Functions of Communication. Prereq., graduate standing or instructor consent. Same as COMM 4220.

COMM 5230-3. Applied Communication. Examines application of communication concepts, theories, methods, facilitations, and other practices to address real-world issues and problems. Discusses conceptual issues framing applied communication, examines purposes and methods informing such scholarship, and provides opportunity to evaluate and propose research. Prereq., graduate standing or instructor consent.

COMM 5300-3. Seminar: Rhetoric. Prereq., graduate standing or instructor consent. Same as COMM 4300.

COMM 5310-3. Contemporary Rhetorical Criticism. Advanced critical analysis of rhetorical texts in terms of how they shape issues and appeal for judgment, create identities for speakers and their audiences, and construct perceptions of time, space, and the human condition. Prereq., graduate standing or instructor consent.

COMM 5320-3. Readings in Rhetoric. Survey of classical and contemporary readings in rhetoric. Required for doctoral students in COMM; optional for master's students. Restricted to graduate students or instructor consent.

COMM 5420-3. Readings in Group Interaction. Reading course examining communicative problems, practices, and outcomes in groups. Definitions of group and interaction, meta-theoretical and theoretical orientations, methodological practices for studying group interactions, including boundary development and management, interpersonal symbolic practices, deliberation, dialogue, and decision making are examined. Prereq., graduate standing or instructor consent.

COMM 5520-3. Readings in Interpersonal Communication. Survey course of advanced readings in interpersonal communication. Focuses on historical and contemporary works, with emphasis on theory and research. Prereq., graduate standing or instructor consent.

COMM 5600-3. Seminar: Organizational Communication. Prereq., graduate standing or instructor consent. Same as COMM 4600.

COMM 5610-3. Organizational Culture and Symbolism. Focuses on relationship between ideological elements (e.g., norms, values, and beliefs) and symbolic practices (e.g., metaphor, ritual, and storytelling) of organizational culture. Analyzes topics from viewpoints of academic theory and managerial practice. Reviews interpretive methods of researching workplace culture and symbolism. Prereq., graduate standing or instructor consent.

COMM 5620-3. Readings in Organizational Communication. Survey of traditional and contemporary readings in organizational communication. Treats theory, research, and application from a variety of perspectives. Prereq., graduate standing or instructor consent.

COMM 5720-3. Readings in Communication and Technology. Survey of multidisciplinary research that examines various relationships between communication and technology. Students are encouraged to develop critical skills in perceiving assumptions and perspectives that motivate major theories in this area, and to examine how these have changed overtime. Prereq., graduate standing or instructor consent.

COMM 6010-3. Communication Research and Theory. Provides an integrative overview of approaches and areas of study in communication. Required for MA and PhD communication students. Prereq., graduate standing in COMM.

COMM 6020-3. Quantitative Research Methods. Introduces students to the practice of quantitative research in communication: conceptualization and critique of research projects, coding, experimental and survey approaches, reliability and validity, and statistical reasoning and methods of analysis. Required for doctoral students in COMM; optional for masters students. Prereq., graduate standing or instructor consent.

COMM 6030-3. Qualitative Research Methods. Introduction to the epistemology, methodology, and representational practices associated with qualitative studies in communication. Fieldwork methods emphasized include participant observation, interviewing, and document/artifact analysis. Required for doctoral students in communication; optional for masters students. Restricted to graduate students or instructor consent required.

COMM 6200-3. Seminar: Selected Topics. Facilitates understanding of current and past theory and research on a selected topic in communication and the ability to develop new theory and research on that topic. May be repeated up to 9 total credit hours on different topics. Prereq., graduate standing or instructor consent.

COMM 6310-3. Rhetorical Criticism. Reviews current critical methods and issues related to rhetorical criticism, such as contemporary theory of rhetorical criticism, continental discourse theory, and critical theory. May be repeated up to 6 total credit hours on different topics. Prereq., graduate standing or instructor consent. Recommended prereqs., COMM 5310 and 5320.

COMM 6320-3. Rhetorical Theory. Reviews current theory and research on topics such as contemporary rhetorical theory, rhetoric and public life, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns. May be repeated up to 6 total credit hours on different topics. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5320.

COMM 6330-3. Seminar in Rhetoric of Science and Technology. Surveys foundational texts and contemporary research in the rhetoric of science and technology. Focuses on the role of persuasion in the production of scientific knowledge and technological artifacts, professional discursive practices, and public understandings of science and technology. Emphasizes critical analysis of major theoretical and methodological traditions. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5320.

COMM 6340-3. Rhetoric and Civic Community. Considers performances of public life as rhetorical inducements of civitas. Topics include negotiation of self-regulation among interdependent partners, rhetorical exclusions and/or counterpublics, and dialectical tensions of public/private as these contribute to and have civic consequences for publicness, community, and social will. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5320.

COMM 6350-3. Seminar in Argumentation. Surveys foundational texts and contemporary research in argumentation. Analysis of distinctions between philosophical and rhetorical approaches to argument. Critical analysis of major theoretical and methodological traditions and topics with an emphasis on social dimensions of argument. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5320.

COMM 6360-3. Social and Cultural Theory. Traces select traditions in social and/or cultural theory, emphasizing how these traditions affect and are affected by the field of rhetoric studies. Examines the origins and resolutions of major debates in social and/or cultural theory from a rhetorical perspective. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5320.

COMM 6410-3. Discourse Analysis. Acquaints students with the main types of discourse analysis: conversation analysis, critical discourse analysis, and rhetorically-informed discourse approaches. Teaches how to conduct discourse analysis, including transcribing, selecting excerpts, documenting inferences, and linking to scholarly controversies. Prereq., graduate standing or instructor consent.

COMM 6420-3. Interaction Analysis. Educates students in one of a selected set of methodological specializations used in the study of human interaction. May be repeated up to 6 total credit hours on different topics. Prereq., graduate standing or instructor consent.

COMM 6430-3. Communication in Family Groups. Examines theories of family communication, focusing on how group processes influence family life. Prereq., graduate standing or instructor consent.

COMM 6435-3. Interpersonal Processes in Communication. Focuses on key processes in interpersonal communication relevant to understanding interaction at the dyadic, group, and organizational levels. Examines theory and research on selected interpersonal processes such as facework/identity, support/emotional communication, relational communication, and conflict in interaction. Prereq., graduate standing or instructor consent.

COMM 6440-3. Grounded Practical Theory. Examines theory, method, and application of grounded practical theory, an approach to building normative theory through description, critique, and theoretical reconstruction of situated communication practices. Semester project involves analysis of a sample of discourse from a public or field observation setting. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5210.

COMM 6450-3. Group Interaction Facilitation and Pedagogy. Examines theory, research, and practice associated with facilitating group interaction processes (e.g., group creation, conflict communication management, conversation and discussion, task accomplishment, and team communication), including facilitation associated with teaching an introductory group interaction course. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5420.

COMM 6470-3. Meetings, Their Practices and Problems. Explores the history, routine communicative practices, common interactional troubles, cross-cultural differences, and expectations about "ideal" communicative conduct for workplace and public meetings. Seminar project involves field study of a meeting group. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 6030.

COMM 6730-3. Collaboration and Decision Making in Organizations. Explores theory and research on communication processes associated with collaboration and decision making in contemporary organizations, particularly as they are influenced by participation programs, technology, and team structures. Prereq., graduate standing or instructor consent. Recommended prereqs., COMM 5620 and 6010.

COMM 6740-3. Power and Control in Organizational Communication. Reviews theory and research in organizational communication concerned with power and control. Focuses on symbolic practices of influence in the context of organizational structure and culture. Reviews interpretive and critical theories emphasizing relationships between power, discourse, identity, and institutions. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5620.

COMM 6750-3. Communication and Organizational Change. Addresses the role of communication in cultural change efforts in organizations. Topics include the nature and function of organizational cultures, the role of leadership, ethical issues, and member involvement in change processes. Specific organizational cases are highlighted throughout. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5620.

COMM 6840 (1-3). Master's Independent Study. May be repeated up to 6 total credit hours.

COMM 6940-1. Master's Degree Candidate.

COMM 6950 (1-6). Master's Thesis.

COMM 8840 (1-6). Doctoral Independent Study. May be repeated up to 18 total credit hours.

COMM 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Comparative Literature

COML 5003-3. Film and Fiction. Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories, and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting. Same as FILM 4003 and ARTF 5003.

COML 5000-3. Proseminar. Introduces basic issues in comparative literature and basic problems in literary history. Provides an overview of history and rationale of the discipline, traditional areas of research, and recent developments. Prereq., graduate standing or instructor consent.

COML 5051-3. Critical Theory of the Frankfurt School. Serves as an introduction to the Frankfurt School and critical theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English. Same as GRMN 4051, 5051.

COML 5350-3. Studies in Prose Narrative. Examines both short and long narrative prose fiction from a variety of periods and from diverse national literatures. Focuses on issues of defining genre and on the origins and significance of narrative prose within its cultural context. May be repeated once for credit. Prereq., graduate standing or instructor consent.

COML 5352-3. Russian Novel: Theory and Practice. Examines the Russian novel and its evolution as well as Western and Russian theories of the novel as they engage and reflect upon the claims of modernity. May be repeated up to 6 total credit hours. Restricted to graduate students or instructor consent required. Same as GSSL 5352.

COML 5360-3. Studies in Drama. Covers selected drama topics using a comparative approach. May be repeated once for credit. Prereq., graduate standing or instructor consent.

COML 5370-3. Studies in Poetry. Explores topics and problems in rhetoric and poetic practice from antiquity to the present day. May be repeated once for credit. Prereq., graduate standing or instructor consent.

COML 5410-3. Translation. Review of theories and practices of literary translation in their linguistic, historical, cultural, and other contexts. Translation of literary and other works from chosen foreign languages, commentaries, and analyses. Prereq., graduate standing or instructor consent.

COML 5504-3. Goethe's *Faust*. Systematic study of the Faust motif in Western literature, with major emphasis on *Faust I and II* by Goethe and Thomas Mann's *Doctor Faustus*. Restricted to graduate students or instructor consent required. Same as HUMN 4504 and GRMN 5504.

COML 5540-3. Studies in the Baroque. Explores the literary, intellectual, and aesthetic culture of the European baroque of the late 16th and 17th centuries through different topics pertinent to this period. Presents an interdisciplinary analysis of baroque literature, philosophy, science, and art. Illuminates the complex historical transition from the Renaissance to the modernity of the Enlightenment. Prereq., graduate standing or instructor consent.

COML 5610-3. Introduction to Literary Theory. Covers major trends in 20th-century critical thinking. May be repeated once for credit. Prereq., graduate standing or instructor consent.

COML 5620-3. History of Literary Criticism. Prereq., graduate standing or instructor consent.

COML 5660-3. Themes, Motifs, and Characters. May be repeated once for credit. Prereq., graduate standing or instructor consent.

COML 5830-3. Topics in Literature and History. May be repeated up to 6 total credit hours. Restricted to graduate students or instructor consent required. Same as GSSL 5830.

COML 5840 (1-3). Independent Study. May be repeated up to 7 total credit hours. Restricted to graduate students or instructor consent required.

COML 6040-3. Seminar: A Selected Topic. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

COML 6940-1. Master's Candidate for Degree.

COML 6950 (1-6). Master's Thesis.

COML 6970-3. Colloquium in Comparative Literature. May be repeated up to 6 total credit hours.

COML 7840 (1-3). Independent Study. May be repeated up to 7 total credit hours.

COML 8990 (1-10). Doctoral Dissertation.

Communication Residential Academic Program

COMR 1800-3. Visual Literacy: Images and Ideologies. Explores the relationship between visual images and cultural values, including how we process visual information, the evolution of conventions in various media, common visual portrayals, and ethical issues. Restricted to students in the COMM RAP program. Approved for arts and sciences core curriculum: literature and the arts.

Ecology and Evolutionary Biology

The Department of Ecology and Evolutionary Biology (formerly the Department of Environmental, Population, and Organismic Biology) offers two general biology sequences. EBIO 1210 and 1200 are lecture courses intended for EBIO and other science majors. A year of high school chemistry is presumed. Accompanying laboratories (EBIO 1230 and 1240) are also available. EBIO 1030 and 1040 are designed for nonscience majors; an accompanying lab (EBIO 1050) is available.

Students with scores of 4 or 5 on the AP biology test receive 8 hours of credit and are exempt from EBIO 1210–1240. Students who score in the 66th percentile or higher on the CLEP test in biology receive 6 hours of credit and are exempt from EBIO 1210 and 1220. MCDB 1150 and 1151 can substitute for EBIO 1210 and 1230. EBIO majors with transfer credit in biology from other institutions and/or advanced placement credits must consult the EBIO undergraduate advising and resource center for proper placement.

EPOB courses have been renumbered under EBIO and IPHY course numbers. Credit will not be granted for a course taken under its former number and its current number.

EBIO 1030-3. Biology: A Human Approach 1. Lect. Studies the principles of biology and their implications. Central theme is humans and the environment, emphasizing ecology, natural resource conservation, and the interrelatedness of a growing human population. Recommended for nonscience majors. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

EBIO 1040-3. Biology: A Human Approach 2. Lect. Continues EBIO 1030, focusing on the function of the human body, and maintenance of dynamic equilibrium in the internal environment in the face of a continually changing external environment. Discusses factors influencing these homeostatic conditions and how and why they change. Recommended for nonscience majors. Prereq., EBIO 1030. Approved for arts and sciences core curriculum: natural science.

EBIO 1050-1. Biology: A Human Approach Laboratory. One two-hour lab per week. Provides experiments and exercises relating to concepts presented in EBIO 1030 and 1040 Biology: A Human Approach 1 and 2. This course uses animals and/or animal tissues. Recommended for nonscience majors. When taken with EBIO 1030, meets MAPS requirement for natural science: lab. Approved for arts and sciences core curriculum: natural science.

EBIO 1210-3. General Biology 1. Lect. Provides a concentrated introduction to molecular, cellular, genetic, and evolutionary biology. Emphasizes fundamental principles, concepts, facts, and questions. Intended for science majors. Credit not granted for this course and EPOB 2060, 2660 or KAPH 2060. Meets MAPS requirement for natural science. Approved for arts and sciences core curriculum: natural science.

EBIO 1220-3. General Biology 2. Provides a concentrated introduction to organisms, homeostasis, development, behavior, and ecology. Emphasizes fundamental principles, concepts, facts, and questions. Intended for science majors. Prereq., EBIO 1210 or equivalent. Credit not granted for this course and EPOB 2050 or 2650. Approved for arts and sciences core curriculum: natural science.

EBIO 1230-1. General Biology Laboratory 1. One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 1. Intended for science majors. Prereq. or coreq., EBIO 1210. Credit not granted for this course and EPOB 2060, 2660 or KAPH 2060. Meets MAPS requirement for natural science. Approved for arts and sciences core curriculum: natural science.

EBIO 1240-1. General Biology Laboratory 2. One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 2. Intended for science majors. Prereq. or coreq., EBIO 1220 or equivalent. Credit not granted for this course and EPOB 2050 or 2650. Approved for arts and sciences core curriculum: natural science.

EBIO 1300 (1-3). Topics in Biological Sciences. Covers special topics in biology for freshmen or nonmajors. Introduces scientific methods and principles in biology, as well as issues of current interest in biology. Does not count toward the major in EBIO.

EBIO 1840 (1-6). Independent Study (Freshman). May be repeated up to 6 total credit hours.

EBIO 2010 (1-3). Environmental Issues and Biology. Lect. Describes how the natural environment is currently stressed by a variety of human actions. Examines the nature of these environmental problems and their impact on living organisms, both human and nonhuman species.

EBIO 2040-4. Principles of Ecology. Lect. and lab. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Laboratory emphasizes techniques of field biology. Uses animals and/or animal tissues. Prereqs., EBIO 1030, 1040, and 1050, or EBIO 1210, 1220, 1230, and 1240. Credit not granted for this course and EPOB 2050 or EPOB 2650 or EPOB 3020 or EBIO 2640.

EBIO 2070-4. Genetics: Molecules to Populations. Lect. and rec. Covers principles of genetics and developmental biology at levels of molecules, cellular organelles, individuals, and populations; asexual and sexual life cycles; and heredity. Recitations allow discussion of genetics problems and implications of genetic principles, and provide demonstrations and simulations of genetic processes. Intended for sophomore majors in EBIO. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Credit not granted for this course and EBIO 2670.

EBIO 2500-4. Introduction to Horticulture. Lect. and lab. Covers the principles and techniques of plant science applied to cultivated plants. Emphasizes basic plant biology, aspects of the culture environment as variable, and the tools and technology used in culture, regulation, propagation, and protection. Includes a brief survey of the industries related to cultivated plants. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060.

EBIO 2590-3. Plants and Society. Acquaints students with the plants that are both essential and desirable to human survival, well-being, and quality of life. Topics include plants and world cultures, food plants, commercial products (beverages, extracts, herbs, and spices, etc.), cosmetics, textiles, wood products, medicinal plants, psychoactive plants, poisonous plants, plants used in horticulture and landscape architecture, wood products, musical instruments, etc.

EBIO 2640-5. Honors Principles of Ecology. Lect., lab, and rec. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Lab emphasizes techniques of field biology. Uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240; or 1030, 1040, and 1050. Credit not granted for this course and EPOB 2050 or 2650 or 3020 or EBIO 2040.

EBIO 2670-5. Honors Genetics: Molecules to Populations. Lect., rec., and co-seminar. Covers principles of genetics and developmental biology at levels of molecules, cellular organelles, individuals, and populations; asexual and sexual life cycles; and heredity. Recitations allow discussion of genetics problems and implications of genetic principles, and provide demonstrations and simulations of genetic processes. Honors co-seminar covers specific topics in more depth. Prereqs., EBIO 1210, 120, 1230, and 1240, or EPOB 2050 and 2060. Credit not granted for this course and EBIO 2070.

EBIO 2840 (1-6). Independent Study (Sophomore). May be repeated up to 6 total credit hours.

EBIO 3010 (1-2). Teaching Biology. Provides an opportunity to assist in teaching of specific laboratory section in EBIO under direct faculty supervision. Students must make arrangements with the faculty member responsible for the course in which they plan to assist. May be repeated up to 4 total credit hours. Formerly EPOB 3010.

EBIO 3040-4. Conservation Biology. Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques. Prereq., EBIO 2040 or 2640. Same as ENVS 3040.

EBIO 3080-4. Evolutionary Biology. Lect. and lab. Emphasizes the fundamental evolutionary concepts that provide explanations for the diversification of life on Earth. Specific topics include the evidence for evolution, adaptation by natural selection, speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and processes. Recitations allow students to explore specific topics in more depth and smaller groups. Prereq., EBIO 1210 and 1220 or equivalent. Credit not granted for this course and EBIO 3680 or EPOB 2080 or 2680.

EBIO 3110-3. Population and Community Ecology. Presents principles of ecology that relate to the niche, population growth, metapopulations, population interactions (within and between trophic levels), community structure and development, landscape ecology and species diversity. Prereq., EBIO 2040 or 2640 or equivalent.

EBIO 3170 (3-4). Arctic and Alpine Ecology. Lect. and field trips. Focuses on the biology of arctic and alpine environments, limiting physical factors (such as geomorphology and climatic history), and human interaction with cold-stressed environments, especially the arctic. Prereqs., EBIO 1210 and 1220, or EPOB 2050 and 2060.

EBIO 3175-1. Arctic and Alpine Ecology Lab. Examines alpine ecosystems and treeline relative to global change. Weekend (one-day) field trips into the Rocky Mountains, visits to Denver Museum of Nature and Science, and to CU herbarium/plant lab for experiential learning connected to EBIO 3170. Coreq., EBIO 3170. Formerly EPOB 3175. Pass/fail only.

EBIO 3180-3. Global Ecology. Lect. Involves study of ecological principles and problems at the biosphere level. Presents a worldwide approach to populations, biotic resources, ecologic interactions, land use, deforestation, desertification, species extinctions, pollution, environmental quality, global change, and environmental ethics. Prereqs., EBIO 1210 and 1220 or equivalent. Approved for arts and sciences core curriculum: natural science.

EBIO 3190-3. Tropical Marine Ecology. Lect. Examines the biology and ecology of marine ecosystems, emphasizing those occurring in tropical regions such as coral reefs. Studies how these ecosystems are changing and the future impact of human stress on the marine environment. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Restricted to sophomores/juniors/seniors. Approved for arts and sciences core curriculum: natural science.

EBIO 3240-4. Animal Behavior. Lect. and lab. Topics include basic concepts and history, methods of study, ethical issues, neurobiology, behavior, the development of behavior, predator-prey relationships, communication, aggression and dominance, mating systems, cognitive ethology, and parental care. When possible, life-history strategies, the evolution of behavior, and behavioral ecology are stressed. Uses animals and animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Restricted to sophomores/juniors/seniors.

EBIO 3270-3. Ecosystem Ecology. Integrates information from physics (e.g., energetics), chemistry (the behavior of basic elements), and biology (evolutionary traits of species, multiple photosynthetic pathways, etc.) to understand the structure and functioning of ecosystems. Provides the background and neces-

sary information to understand controls on photosynthesis, decomposition, and nutrient cycling across diverse terrestrial and aquatic landscapes. Prereqs., EBIO 1210, 1220, 1230, 1240, and 2040, or EPOB 2050 and 2060, or EBIO 3020.

EBIO 3400-4. Microbiology. Lect. and lab. Surveys distinguishing characteristics of microorganisms based on structural-functional relationships, taxonomy, growth, and physical-chemical agents of control including antibiotics, metabolism, and genetics. Introduces applied microbiology emphasizing infectious diseases, basic concepts of immunology, and microbial ecology. Uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060.

EBIO 3470-3. History of Biology. Lect. Surveys major themes in the development of biological theory from ancient times to present, emphasizing complimentary roles of observation, experiment, and technical innovation, and influence of general cultural environment on scientific advance. Prereqs., EBIO 1210 and 1220.

EBIO 3630-4. Parasitology. Lect. and lab. Surveys animal parasites, including life histories; emphasizes parasites of humans. Uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240 or EPOB 2050 and 2060.

EBIO 3680-5. Honors Evolutionary Biology. Lect., rec., and co-seminar. Emphasizes the fundamental evolutionary concepts that provide explanation for the diversification of life on Earth. Specific topics include the evidence for evolution, adaptation by natural selection, speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and process. Recitations allow students to explore specific topics in more depth and smaller groups. Prereqs., EBIO 1210, 1220, 1230, 1240, 2070, or 2670. Credit not granted for this course and EBIO 3080 or EPOB 2080 or 2680.

EBIO 3770-4. Animal Diversity: Vertebrates. Lect. and lab. Provides a broad overview of the biology of vertebrates: evolution and systematics, morphology, physiology, behavior, ecology, and biogeography. Laboratories focus on the diversity of vertebrates, including adaptations and diagnostic features of major groups. Uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240, or equivalent.

EBIO 3840 (1-6). Independent Study (Junior). May be repeated up to 6 total credit hours.

EBIO 3850-4. Animal Diversity: Invertebrates. Lect. and lab. Offers a broad study of the biology of the most diverse group of organisms on Earth. Areas include ecology, physiology, evolution and morphology of aquatic and terrestrial forms. This course uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240, or equivalent, or EPOB 2050 and 2060.

EBIO 3870 (1-6). Independent Research (Junior). May be repeated up to 6 total credit hours.

EBIO 3930 (1-6). Internship. Provides an academically supervised opportunity for upper-division students to work in public or private organizations. Projects are usually related to students' career goals. Each project has both academic and work components. May be repeated up to 6 total credit hours. Pass/fail only.

EBIO 3940-3. Argument in Scientific Writing. Emphasizes argumentative strategies used in scientific writing. Reviews essential writing skills to prepare students for academic and professional communication. Restricted to juniors and seniors. No biology credit for majors in EBIO. Approved for arts and sciences core curriculum: written communication.

EBIO 3980-1. Seminar: Introduction to EBIO Honors. Presents an introduction to the departmental Honors program. Consists of a lecture component on Honors research, thesis, and defense, as well as a seminar component where students present the findings of their library research, conducted under guidance of a faculty mentor, and hear presentations by graduating Honors candidates on their thesis research. Prereq., 3.2 or better GPA, declared EBIO major, and approval by departmental Honors program.

EBIO 3990 (1-3). Introduction to EBIO Honors. Provides an introduction to the departmental Honors program. Consists of individual library research on a potential Honors thesis topic under the guidance of a faculty mentor. Prereqs., 3.2 or better GPA declared EBIO major, and approval by departmental Honors committee.

EBIO 4020-3. Stream Biology. Offers a geological, physical, chemical, and biological study of flowing water with special reference to streams and rivers as ecosystems. A laboratory course is offered (see EBIO 4150). Prereqs., EBIO 1210, 1220, 1230, 1240, and 2040, or EPOB 2050 and 2060. Same as EBIO 5020.

EBIO 4030-3. Limnology. Examines the ecology of inland waters, including a detailed consideration of physical, chemical, and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats, and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication, and management of freshwater ecosystems. Prereqs., EBIO 1210 and 1220. Same as EBIO 5030.

EBIO 4060-3. Landscape Ecology. Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change. Prereqs., EBIO 1210, 1220, 1230, 1240, and EBIO 2040 or 2640, or EPOB 2050 and 2060. Same as EBIO 5070.

EBIO 4090-2. Coral Reef Ecology. Includes one week of lectures in Boulder and one week of field studies on one of the most complex and beautiful ecosystems in the world, the Caribbean reefs at Cozumel, Mexico. Two week, fall-semester course beginning after Christmas. Prereqs., EBIO 2040 and Scuba certification. Restricted to sophomores/juniors/ seniors.

EBIO 4100-3. Advanced Ecology. Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues. May be repeated twice provided the topics vary. Prereqs., EBIO 1210, 1220, 1230, 1240, and EBIO 2040 or 2640, or EPOB 2050 and 2060. Same as EBIO 5100.

EBIO 4110-3. Advanced Ecology. See EBIO 4100 for description. May use animals and/or animal tissues. May be repeated up to 9 total credit hours. Prereqs., EBIO 1210, 1220, 1230, 1240, and EBIO 2040 or 2640, or EPOB 2050 and 2060. Same as EBIO 5110.

EBIO 4120 (2-4). Advanced Ecology. See EBIO 4100 for description. May use animals and/or animal tissues. Prereq., EBIO 1210, 1220, 1230, 1240, and EBIO 2040 or 2640, or EPOB 2050 and 2060. Same as EBIO 5120.

EBIO 4140-3. Plant Ecology. Examines the relationships between plants and their physical and biological environments, encompassing physiology, competition, plant-soil and plant-animal interactions, population dynamics, diversity, and influence on ecosystem function. Prereqs., EBIO 1210, 1220, 1230, and 1240.

EBIO 4150 (1-2). Techniques in Ecology. Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geoecology. May be repeated up to 7 total credit hours. Prereqs., EBIO 1210, 1220, 1230, 1240, and EBIO 2040 or 2640, or EPOB 2050 and 2060. Same as EBIO 5150.

EBIO 4160-3. Introduction to Biogeochemistry. Covers fundamentals of biogeochemical cycling, emphasizing water, carbon, and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere, and hydrosphere; and natural and human-managed environments. Prereqs., GEOL 3320 or EBIO 3270, and CHEM 1011 or higher. Same as ENVS 4160 and GEOL 4160.

EBIO 4175-3. The Scientific Basis for Ecosystem Management of Public Lands. An advanced field ecology course emphasizing measurements, statistical procedures, and biotic data information management relevant to land management issues. Develops concepts of adaptive ecosystem management using ongoing field studies on public land in the Colorado Front Range. Prereqs., EBIO 3270 and 3500.

EBIO 4180-3. Ecological Perspectives on Global Change. Discusses evolutionary and recent geological history of modern environmental problems, using natural changes in climate, biotic diversity, drought, desertification, flood, forest destruction, etc., to show the range and frequency of such events as a perspective on modern reports. Prereq., minimum 14 hours of EBIO course work, including EBIO 2040, EPOB 2050 or 3020.

EBIO 4290-3. Molecular Systematics and Evolution. Reviews principles and theoretical foundations of molecular evolution and molecular systematics. Emphasizes hypothesis testing and using various methods of analysis for interpreting molecular variation in nature. Prereq., EBIO 3080 or instructor consent. Same as EBIO 5290.

EBIO 4350 (1-4). Biological Field Studies. Stresses broad areas of biology and employs field approaches. Uses animals and/or animal tissues. May be repeated up to 4 total credit hours. Prereqs., EBIO 1210, 1220, 1230, and 1240, or 2050 and 2060. Same as EBIO 5350.

EBIO 4410-4. Biometry. Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Restricted to juniors/seniors. Same as EBIO 5410.

EBIO 4460 (1-5). Special Topics. Familiarizes students with specialized areas of biology. May be repeated up to 9 total credit hours. Prereqs., EBIO 1210, 1220, 1230, and 1240, or equivalent. Same as EBIO 5460.

EBIO 4500-4. Plant Biodiversity and Evolution. Lect. and lab. Surveys plant types emphasizing diagnostic features of plants in general and major taxa in particular. Focuses on identity, morphology, anatomy, reproduction, ecology, geography, evolution, fossil record, and economic use of taxa. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Formerly EBIO 3500.

EBIO 4510-4. Plant Anatomy and Development. Lect. and lab. Introduces structures of seed plants, especially angiosperms, and developmental history of these structures. Studies cell types, and their location and function in plant tissues and organs. The laboratory provides an opportunity to examine plant tissues and to prepare tissues for examination by the light microscope. Stresses role of plant structures in the living plant. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Formerly EBIO 3510.

EBIO 4520-4. Plant Systematics. Lect. and lab. Studies the principles and techniques of modern systematics of organisms, illustrated with examples from the plant kingdom, usually the angiosperms. Framework of course is evolutionary and ecological, as well as taxonomic. Prereq., EBIO 2070. Restricted to sophomores/juniors/seniors. Formerly EBIO 3520.

EBIO 4530-4. Functional Plant Biology. Lect. and lab. Explores mechanisms of plant functioning and how such functioning relates to the performance of the plant under different environmental conditions. Phenomena include water relations, growth and development, and metabolic processes including photosynthesis, respiration, and responses to stress. Prereqs., EBIO 1210, 1220, 1230, and 1240, or equivalent. Restricted to sophomores/juniors/seniors. Formerly EBIO 3530.

EBIO 4550-4. Plant Eco-Evo-Devo. Explores the fundamental principles of plant form from the perspectives of ecological function, evolutionary origin, and developmental dynamics. Students are presented with conceptual and analytical tools to interpret the vast diversity of growth form-function relationships that exist among plants. Laboratory sessions apply concepts presented in lecture and students will engage in original research using light and scanning electron microscopy. Prereqs., EBIO 1210, 1220, 1230 and 1240.

EBIO 4570-3. Advanced Plant Physiology. Evaluates critically various concepts underlying the functioning of plants, including current controversial topics. Emphasizes the responses of plants to various environmental factors. Prereq., EBIO 3530. Restricted to sophomores/juniors/ seniors. Same as EBIO 5570.

EBIO 4630 (2-6). Field Techniques in Environmental Science. Applies field and laboratory methods for assessing the abiotic and biotic environment. Emphasizes field techniques in climatology, surveying soils, hydrology, geomorphology, plant and animal ecology, and environmental law. Evaluation by written module reports and maps. This course may use animals and/or animal tissues. Prereqs., EBIO 2050 and instructor consent. Same as ENVS 4630.

EBIO 4640 (2-4). Plant Field Studies. Includes field-oriented courses offered at irregular intervals during the academic year or during summer sessions. May be repeated up to 7 total credit hours. Prereq., EBIO 2040 and 2640 or equivalent.

EBIO 4660-4. Insect Biology. Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Same as EBIO 5660.

EBIO 4740-3. Biology of Amphibians and Reptiles. Comparative morphology, taxonomy, ecology, behavior, and geographic distribution of amphibians and reptiles. This course uses animals and animal tissue. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Same as EBIO 5740 and PSYC 4740.

EBIO 4750-4. Ornithology. Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics, and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues. Prereq., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Same as EBIO 5750.

EBIO 4760-4. Mammalogy. Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology, and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues. Prereq., EBIO 1210, 1220 and 2040 or 2640. Same as EBIO 5760.

EBIO 4795-3. Field Methods in Zoology and Botany. Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates, and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods, and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts, and individual research projects. Same as EBIO 5795, MUSM 4795, and ENV5 4795.

EBIO 4800-3. Critical Thinking in Biology. Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings. Different course sections on different topics may be repeated up to 12 total credit hours. Prereq., minimum of 14 hours of EBIO course work. Restricted to sophomores/juniors/seniors. Same as EBIO 5800.

EBIO 4820-3. Scientific Honors Thesis Writing Seminar. Provides advanced instruction in writing the scientific honors thesis, emphasizing interpreting, analyzing, and arguing scientific data. Focuses on essential communication skills necessary for effective presentation of the thesis to a wide variety of audiences.

EBIO 4840 (1-6). Independent Study (Senior). May be repeated up to 6 total credit hours.

EBIO 4860 (1-2). Critical Thinking in Biology: Lab.

EBIO 4870 (1-6). Independent Research (Senior). May be repeated up to 6 total credit hours.

EBIO 4980-1. Seminar: EBIO Honors Thesis. To be taken during the final academic year prior to graduation. Consists of a lecture component on honors thesis writing and defense, as well as a seminar component where honors candidates present their thesis research in a practice defense talk. Prereq., 3.30 or better GPA, declared EBIO major, and approval by departmental honors committee.

EBIO 4990 (1-3). EBIO Honors Thesis. To be taken during the final academic year prior to graduation. Consists of the final phase of honors research and thesis preparation under the guidance of a faculty mentor. Prereq., 3.30 or better GPA, declared EBIO major, and approval by departmental honors committee.

EBIO 5000-1. EBIO Colloquia. All first year EBIO graduate students are required to attend the EBIO Colloquia Series. Speakers from around the world and within the department cover topics in all areas of biology. May be repeated up to 2 total credit hours.

EBIO 5020-3. Stream Biology. Same as EBIO 4020.

EBIO 5030-3. Limnology. Same as EBIO 4030.

EBIO 5060-3. Landscape Ecology. Same as EBIO 4060.

EBIO 5100-3. Advanced Ecology. Same as EBIO 4100.

EBIO 5110-3. Advanced Ecology. Same as EBIO 4110.

EBIO 5120 (2-4). Advanced Ecology. Same as EBIO 4120.

EBIO 5150 (1-2). Techniques in Ecology. Same as EBIO 4150.

EBIO 5240-3. Advanced Topics in Animal Behavior. Covers special areas of ethology such as sociobiology, animal communication, cognitive ethology, human ethology, moral and ethical issues. Prereq., EBIO 3240.

EBIO 5290-3. Molecular Systematics and Evolution. Same as EBIO 4290.

EBIO 5310-3. Ecology and Conservation. Reviews current research activities in the various fields of environmental biology, including population, community,

behavioral, ecosystem, and landscape ecology, plus conservation biology and global change. Prereq., graduate standing.

EBIO 5320-3. Current Topics in Evolutionary Biology. Examines six major themes on contemporary evolutionary research: population genetics, natural selection and adaptation, molecular evolution, evolution and development, phylogenetic systematics, and macroevolution. Emphasizes recent primary literature and sophisticated mastery. Prereq., graduate standing in EBIO.

EBIO 5350 (1-4). Biological Field Studies. Same as EBIO 4350.

EBIO 5410-4. Biometry. Same as EBIO 4410.

EBIO 5460 (1-5). Special Topics. Same as EBIO 4460.

EBIO 5570-3. Advanced Plant Physiology. Same as EBIO 4570.

EBIO 5660-4. Insect Biology. Same as EBIO 4660.

EBIO 5740-3. Biology of Amphibians and Reptiles. Same as EBIO 4740 and PSYC 5740.

EBIO 5750-4. Ornithology. Same as EBIO 4750.

EBIO 5760-4. Mammalogy. Same as EBIO 4760.

EBIO 5795-3. Field Methods in Zoology and Botany. Same as EBIO 4795 and MUSM 5795.

EBIO 5800-3. Critical Thinking in Biology. Same as EBIO 4800.

EBIO 5820 (2-3). Graduate Writing Seminar. Enhances writing proficiency, using graduate writing projects to implement the course concepts. Offers understanding of conventions and strategies used in scientific writing to prepare students for academic and professional communication. Prereqs., graduate standing and basic proficiency in English as a written language.

EBIO 5840 (1-6). Independent Study (Master's Level). Instructor consent required. May be repeated up to 6 total credit hours.

EBIO 6000-1. Seminar: Introduction to Biological Research. Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.

EBIO 6100 (1-3). Seminar in Environmental Biology. Instructor consent required. Restricted to graduate students. May be repeated up to 7 total credit hours. Same as EBIO 6120.

EBIO 6120 (1-3). Seminar in Environmental Biology. Same as EBIO 6100.

EBIO 6200 (1-3). Seminar in Population Biology. May be repeated up to 7 total credit hours. Same as EBIO 6210.

EBIO 6210 (1-3). Seminar in Population Biology. May be repeated up to 7 total credit hours. Same as EBIO 6200.

EBIO 6300 (1-3). Seminar in Organismic Biology. May be repeated up to 7 total credit hours.

EBIO 6330-2. Seminar in Organismic Biology. May be repeated up to 7 total credit hours.

EBIO 6440-2. Remote Sensing Field Methods. Explores theory and practical field measurements for validation of airborne and spaceborne spectral image acquisition. Emphasizes radiative scattering properties of soil, vegetation, cryosphere, and atmosphere. Characterization and calibration of instrumentation used to measure these properties. Prereq., GEOL/GEOG 4093/5093. Recommended prereq., GEOL 5240. Same as GEOG 6443.

EBIO 6840 (1-7). Independent Research (Master's Level). Instructor consent required. May be repeated up to 7 total credit hours.

EBIO 6940-1. Master's Degree Candidate: Plan II. Prereq., instructor consent.

EBIO 6950 (1-6). Master's Thesis. May be repeated up to 7 total credit hours. Prereq., instructor consent.

EBIO 7840 (1-6). Independent Study (Doctoral Level). May be repeated up to 6 total credit hours.

EBIO 8840 (1-6). Independent Research (Doctoral Level). May be repeated up to 6 total credit hours.

EBIO 8990 (1-10). Doctoral Dissertation. Prereq., instructor consent.

Economics

Theory and History of Economic Thought

ECON 1000-4. Introduction to Economics. Introduces an economic way of thinking, emphasizing its critical importance in cases where people want to make themselves as well off as possible, but can't have everything they want. Focuses on how economic thought affects all choices. Topics include scarcity, decision making, and markets. Students may not receive credit for ECON 1000 or 1001 if they have received credit for ECON 2010 or 2020. Similar to ECON 1001, 2010, and 2020. Meets MAPS requirement for social science: general. Approved for arts and sciences core curriculum: contemporary societies.

ECON 2010-4. Principles of Microeconomics. Examines basic concepts of microeconomics, or the behavior and the interactions of individuals, firms, and government. Topics include determining economic problems, how consumers and businesses make decisions, how markets work and how they fail, and how government actions affect markets. Credit not granted for this course and ECON 1000 and 1001. Meets MAPS requirements for social sciences: general. Approved for arts and sciences core curriculum: contemporary societies.

ECON 2020-4. Principles of Macroeconomics. Provides an overview of the economy, examining the flows of resources and outputs and the factors determining the levels of income and prices. Explores policy problems of inflation, unemployment, and economic growth. Prereq., ECON 2010. Credit not granted for this course and ECON 1000 and 1001. Meets MAPS requirement for social sciences: general. Approved for arts and sciences core curriculum: contemporary societies.

ECON 3070-3. Intermediate Microeconomic Theory. Explores theory and application of models of consumer choice, firm and market organization, and general equilibrium. Extensions include intertemporal decisions, decisions under uncertainty, externalities, and strategic interaction. Prereqs., ECON 1000 or 2010; and either ECON 1078 and 1088, or MATH 1300, or MATH 1310, or MATH 1081, or MATH 1080, 1090, and 1100, or APPM 1350, or equivalent.

ECON 3080-3. Intermediate Macroeconomic Theory. Introduces theories of aggregate economic activity including the determination of income, employment, and prices; economic growth; and fluctuations. Macroeconomic policies are explored in both closed and open economy models. ECON 3070 and 3080 may be taken in any order; there is no recommended sequence. Prereqs., ECON 1000 or 2020; and either ECON 1078 and 1088, or MATH 1300, or MATH 1310, or MATH 1081, or MATH 1080, 1090, and 1100, or APPM 1350, or equivalent.

ECON 4070-3. Topics in Microeconomics. Studies utility maximization under uncertainty, risk, game theory, moral hazard, and adverse selection. Applications include insurance markets and the theory of contracts. Prereqs., ECON 3070 and 4808 or equivalent, or instructor consent.

ECON 7010-3. Microeconomic Theory 1. Analyzes recent and contemporary literature on fundamentals of economic theory. Considers value theory with particular emphasis on methodology, theory of demand, theory of the firm, game theory, theory of distribution, general equilibrium theory, and welfare economics. Prereqs., ECON 3070, 3080; 6808 or MATH 1300.

ECON 7020-3. Macroeconomic Theory 1. Discusses behavior of consumption, investment, employment, production, and interest rates in the context of dynamic optimization models. Also considers government, economic growth, and business cycles. Prereqs., ECON 3070 and 3080.

ECON 7030-3. Microeconomic Theory 2. Continuation of ECON 7010. Prereq., ECON 7010.

ECON 7040-3. Macroeconomic Theory 2. Presents the theoretical and empirical application of dynamic macro programming models. Topics include consumption, investment, labor, money, and credit theories. Covers the theory of economic fluctuations and business cycles employing dynamic general equilibrium models. Prereq., ECON 7020.

ECON 7050-3. Advanced Economic Theory. Discusses advanced topics in game theory and general equilibrium. Prereqs., ECON 7010, 7030, 7818, 7828.

Money and Banking

ECON 4111-3. Money and Banking Systems. Discusses money, financial institutions and the monetary-financial system in a modern economy. Prereq., ECON 3080.

Public Economics

ECON 4211-3. Economics of the Public Sector. Focuses on taxation and public expenditures. Topics include economic rationale for government action, economic theory of government behavior, and effects of government policies on allocation of resources and distribution of income. Prereqs., ECON 3070 and 3818.

ECON 4221-3. Political and Public Choice Economics. Explores decision-making in non-traditional market settings, specifically political market settings, using economic models. We investigate policy outcomes as the product of interactions among individuals in political markets, and analyze how governmental decisions are the result of rational optimizing behavior, even if they do not lead to policies that maximize national welfare. Prereqs., ECON 3070 and 3818.

ECON 8211-3. Public Economics: Fundamental Principles. Presents the fundamental principles of public goods, externalities, public choice, excess burden, optimal taxation, and tax incidence. Prereq., ECON 6211 or 7010.

ECON 8221-3. Public Economics: Topics in Public Expenditures and Taxation. Explores advanced topics in public economics such as decentralization, state and local government, program analysis, taxation, international tax issues, political economy issues, and market failure. Prereqs., ECON 6211 or 7010, and 8211.

ECON 8231-3. Local Public Economics. Examines subnational governments and systems of governments, the effects of inter-governmental competition, appropriate tax and expenditure responsibilities, and variations in governing institutions. Covers congestible public goods, Tiebout mechanisms, and tax capitalization. Prereq., ECON 6211 or 7010.

Urban and Regional Economics

ECON 4242-3. Urban Economics: The Economics of Cities. Considers the economic forces that drive households and jobs to congregate in metropolitan areas. It then considers the forces within the city that determine how the established cities "look"—how rents vary with location, the distribution of jobs and households within a city, urban sprawl, and the sorting of households between neighborhoods. Finally it considers some government policies relating to land use and housing. Prereqs., ECON 3070 and 3818.

ECON 4292-3. Migration, Immigrant Adaptation, and Development. Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society. Prereq., ECON 3070. Same as GEOG 4292.

ECON 8252-3. Seminar: Urban and Regional Economics 1. Covers basic theories in spatial location of economic activity and land use and the survey techniques developed to analyze, measure, and predict regional and urban structure and growth, such as economic base studies, regional social accounts, and input-output analysis. Prereq., ECON 6070 or 7010.

ECON 8262-3. Topics in Urban and Regional Economics. Investigates various theoretical topics in urban and regional economics, focusing on policy issues. Involves student research and presentations. Prereq., ECON 6070 or 7010.

International Trade and Finance

ECON 3403-3. International Economics and Policy. Examines national and supranational policies that affect the international economy, with attention to trade barriers, economic nationalism and regionalism, international political economy, exchange market intervention, and international transmission of economic perturbations. Prereqs., ECON 1000, or ECON 2010 and 2020. Restricted to nonmajors. Approved for arts and sciences core curriculum: contemporary societies.

ECON 4413-3. International Trade. Focuses on theories of international trade and its impacts on economic welfare. Analyzes commercial policy, including tariffs, non-tariff barriers, retaliation, regional integration, and factor migration. Prereq., ECON 3070.

ECON 4423-3. International Finance. Covers balance of payments; foreign exchange market, income, trade, and capital flows; asset markets adjustment mechanisms; stabilization policies in an open economy; and problems of international monetary systems. Prereq., ECON 3080.

ECON 8333-3. Globalization and Democratization: An Introduction. Introduces research on globalization and democratization from an interdisciplinary perspective. Examines ongoing interdisciplinary research on the global political economy. Students learn about ongoing research, critique current efforts, and design their own research project. Prereq., graduate standing in PSCI, ECON, GEOG, or SOCY. Same as PSCI 7333, SOCY 6031, and GEOG 5332.

ECON 8413-3. Seminar: International Trade Theory. Covers theories of comparative advantage, including the classical, factor-proportions, fixed-factor, and noncompetitive markets models. Examines trade policy including trade barriers, market distortions, strategic policy, regional integration, political economy, and factor migration. Prereq., ECON 6413 or 7010.

ECON 8423-3. Seminar: International Finance. Highlights foreign exchange markets, past and current international monetary mechanisms, and processes of adjustment. Examines the role of international financial markets for the behavior of consumption, investment, saving, and production. Also considers international transmission of business cycles. Prereq., ECON 6423 or 7020.

ECON 8433-3. Seminar: Topics in Money and International Economics. Explores advanced work in various aspects of international economics, such as empirical trade analysis, public choice, and interactions between real and monetary phenomena in the world economy. Prereq., ECON 6413, 6423, 8413, or 8423.

Economic History

ECON 4504-3. The New Institutional Economics: Institutions, Contracts, and Economic Outcomes. Understand the conceptual tool kit of the New Institutional Economics. The concepts include transaction costs, property rights, credible commitment, and most importantly the roles of formal and informal institutions. We will examine the impact of institutions on contracting and organizations. The goal is to understand how the underlying institutions determine the degree to which societies improve their economic performance. Prereqs., ECON 3070, 3080, and 3818.

ECON 4514-3. Economic History of Europe. Covers evolution of modern economic growth and development in Europe, emphasizing institutional change. Prereqs., ECON 3070 or 3080. Approved for arts and sciences core curriculum: historical context.

ECON 4524-3. Economic History of the United States. Evolution of modern economic growth and development in the U.S. from colonial times to the present emphasizing institutional change. Prereq., ECON 3070. Approved for arts and sciences core curriculum: United States context.

ECON 8534-3. Economic History of North America. Examines North America's past from the perspective of economics. Topics include growth and welfare in the colonial period; staple products, agricultural development, and the emerging industrialism in the antebellum period; transformation of the North American economy to 1914; the interwar years and the Great Depression; and economic integration since 1945. Prereqs., ECON 6070 and 6080, or ECON 7010.

ECON 8764-3. History of Economic Development. Covers in historical perspective the causes of economic development including why some areas develop faster than others and why development occurs more rapidly in some eras than others. Prereqs., ECON 6070 and 6080, or ECON 7010. Same as HIST 7214.

Economic Development

ECON 3784-3. Economic Development and Policy. Introductory course in Economic Development, designed for nonmajors. Students are introduced to the major issues in development economics. Students will explore empirical, theoretical, and policy issues in economic development. Emphasis is placed on the controversial issues in this literature, requiring students to explore competing, and often conflicting, perspectives of these issues. Prereqs., ECON 1000 or ECON 2010 and 2020. Restricted to nonmajors.

ECON 4774-3. Economic Reform in Developing Countries. Explores competing paradigms of economic development, emphasizing the confrontation between the structuralist/dirigiste paradigm and the neoclassical public choice paradigm.

Analyzes economic reforms under way in developing countries, including stabilization policy and structural adjustment. Also explores political reforms, including the pluralist revolution and the design of a constitutional framework in developing societies. Prereqs., ECON 3070 or 3080.

ECON 4784-3. Economic Development. Explores empirical, theoretical, and policy issues in economic development. Examines topics with reference to the developing countries: income distribution and poverty, demographic change, labor force employment and migration, human capital, physical capital, natural resources and the environment, industrial structure, international trade, and finance. Prereqs., ECON 3070 or 3080.

ECON 4794-3. Economic Growth. Introduces theories explaining why differences in standards of living among countries are so large. Examines a variety of data on historical experiences of economic growth. Surveys recent research on why some countries are so rich and some are so poor, and why some countries grow so quickly and others grow so slowly. Prereqs., ECON 1088 or equivalent, and ECON 3070 or 3080.

ECON 6774-3. Economic Reform in Developing Countries. Covers stabilization policy and structural adjustment. Specific topics include orthodox stabilization policies (fiscal, monetary, and exchange rate policies); heterodox stabilization policies (price, wage, and interest controls); trade liberalization; financial liberalization; privatization and deregulation. Prereqs., ECON 6070 and 6080.

ECON 8774-3. Seminar in Transition Economies. Focuses on the problems encountered in countries evolving from planned to market economies. Emphasizes applications of new and traditional models of economic growth and analysis of problems unique to formerly planned economies. Prereq., ECON 6774 or 7010.

ECON 8784-3. Economic Development. Explores empirical, theoretical, and policy issues in economic development. Examines political economy, income distribution and poverty, demographic change, labor force employment and migration, human capital, physical capital, natural resources and the environment, industrial structure, international trade and finance, stabilization policy, and structural adjustment. Prereqs., ECON 6774 or 7010.

Natural Resources and Environmental Economics

ECON 3535-3. Natural Resource Economics. Integrates economic analysis with life science aspects of natural resource systems to develop social policies for use of natural resources. Studies economists' approaches to resources policy analysis and applies them to energy, forestry, fisheries, mineral, and water systems. Prereq., ECON 1000 or 2010. Restricted to nonmajors. Credit not granted for this course and ECON 4535. Approved for arts and sciences core curriculum: contemporary societies.

ECON 3545-3. Environmental Economics. Highlights causes of excessive environmental pollution and tools for controlling it through economic analysis, values of preservation, and distribution of costs and benefits from environmental protection programs. Prereq., ECON 1000 or 2010. Restricted to nonmajors. Credit not granted for this course and ECON 4545. Approved for arts and sciences core curriculum: contemporary societies.

ECON 4535-3. Natural Resource Economics. Analysis of problems associated with socially optimal use of renewable and nonrenewable natural resources over time. Problems of common property resources, irreversible forms of development, and preservation of natural areas. Prereq., ECON 3070. Credit not granted for this course and ECON 3535.

ECON 4545-3. Environmental Economics. Examines the effects of economic growth on the environment; application of economic theory of external diseconomies, cost-benefit analysis, program budgeting, and welfare economics to problems of the physical environment. Prereq., ECON 3070. Credit not granted for this course and ECON 3545.

ECON 4555-3. Transportation Economics. Provides an overview of the characteristics and structure of transportation markets including aggregate demand, vehicle and mode choice, surface freight and air travel. Explores market failures in the transportation sector including market power and externalities such as pollution, congestion and accidents as well as policies aimed at addressing these issues. Prereqs., ECON 3070 and 3818.

ECON 6555-3. Water Resources Development and Management: Technology, Economics, Institutions. Offers a multidisciplinary exploration of the engineering, economic, and institutional principles involved in water system development and management. Provides a background in basic hydrology, economics, water law, and institutions. Prereq., ECON 3070 or equivalent. Same as CVEN 5393.

ECON 8535-3. Environmental Economics I. Considers the allocation of society's scarce environmental resources and government attempts to achieve more efficient and equitable allocations. It is a course in applied welfare economics with an emphasis on market failure and valuation. Prereq., ECON 6535 and 6808; or ECON 7010.

ECON 8545-3. Environmental Economics II. Provides advanced study of recent advances in environmental economics and explores opportunities for new research. Topics vary with interests of instructor and students. Prereqs., ECON 6535 and 6808, or ECON 7010 and ECON 8535.

ECON 8555-3. Water Resources Development and Management. Offers a research seminar in joint hydrologic-economic modeling and systems analysis. Addresses problems of joint water quantity-water quality management and joint surface-ground water management. Prereq., ECON 6555.

Labor and Human Resources

ECON 4616-3. Labor Economics. Examines the influence of markets, unions, and government on labor allocation and remuneration. Analyzes human capital, discrimination, mobility and migration, productivity, unemployment, and inflation. Compares outcomes under competition with those in a world marked by shared market power and bargaining. Prereq., ECON 3070.

ECON 4626-3. The Economics of Inequality and Discrimination. Examines the unique insights available through economic analysis regarding the causes, mechanisms, and consequences of inequality and discrimination. Examines the extent of inequality, the varieties and extents of discrimination, and explores the economic models that suggest explanations. Prereq., ECON 3070. Approved for arts and sciences core curriculum: human diversity.

ECON 4646-3. Topics in Health Economics. Growth in health expenditures worldwide over the past three decades has led to an increase in research in health economics and its importance in public policy in developed and developing countries. The purpose of this course is to encourage students to read, think, and do research on issues in health economics. This course will cover issues that are pertinent to the U.S., other developed and developing countries. It will cover the basics of health economics such as health production functions and the role for government as well as touching on topical issues such as health care reform. Prereq., ECON 3070. Recommended prereq., ECON 3818.

ECON 8666 (1-3). Economic Demography. Investigates economic determinants and consequences of demographic behavior in developing and developed countries. Issues include fertility and female labor supply interactions, the demographic transition, the effect of population growth on income distribution, family investments in children, and intergenerational mobility. Prereqs., ECON 3070 and 3080.

ECON 8676-3. Seminar: Labor Economics 1. Focuses on the demand side of labor markets. Topics include standard static and dynamic models of labor demand, labor market discrimination, composition of compensation, labor hierarchies within enterprises, unionization, efficient contracts, and macroeconomics of labor markets. Prereq., ECON 6070 or 7010.

ECON 8686-3. Seminar: Labor Economics 2. Focuses on special topics in labor economics: dynamic theories of labor supply, employment, and unemployment; labor supply in a household framework; and labor market activity and income distribution. Explores both theoretical models and empirical tests in each area. Prereq., ECON 6070 or 7010.

Industrial Organization

ECON 4697-3. Industrial Organization and Regulation. Explores neoclassical theory of the firm, the determinants of industrial structure, and the purposes and institutions of public policy to control or maintain a competitive environment. Prereq., ECON 3070. Approved for arts and sciences core curriculum: United States context.

ECON 4797-3. Topics in Industrial Organization: Antitrust and Regulation. Explores two major branches of Industrial Organization—antitrust and regulation.

Focus is on developing qualitative and quantitative skills for the legal-economic analysis of issues and problems across a variety of industries. Case studies are used to illustrate concepts, including mergers, collusive agreements, monopolization, and networks. Individual and group projects help develop advocacy and public speaking skills. Prereq., ECON 3070.

ECON 8747-3. Industrial Organization Theory. Highlights economics of regulation of industry and markets, industry studies, and the application of lab methods to industrial organization. Prereq., ECON 7010.

ECON 8757-3. Industrial Organization and Public Policy. Addresses the theory of interaction of firms within markets and industries, emphasizing importance of the number, relative size of firms, market institution, firm strategies, and nature of consumer demand. Examines neoclassical and game theoretic models, empirical industry studies, and laboratory tests of theoretical models and policies. Prereq., ECON 7010.

Quantitative Economics

ECON 1078-3. Mathematical Tools for Economists 1. Teaches mathematical skills and logical thinking for use in economics. Topics include algebra, graphs, functions, and probability. The class includes many "real world" examples and some illustrative computer assignments. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

ECON 1088-3. Mathematical Tools for Economists 2. Continuation of ECON 1078. Teaches mathematical skills for use in economics. Topics include derivatives, optimization, and integration. These skills are used on "real world" problems, and illustrated with computer assignments. Prereq., ECON 1078 or instructor consent. Similar to MATH 1080, 1081, 1090, 1100, 1300, 1310, and APPM 1350.

ECON 3818-4. Introduction to Statistics with Computer Applications. Introduces statistical methods and their applications in quantitative economic analysis. Prereqs., ECON 1000, or 2010 and 2020; and either ECON 1078 and 1088, or MATH 1300, or MATH 1310, or MATH 1081, or MATH 1080, 1090, and 1100, or APPM 1350, or equivalent.

ECON 4808-3. Introduction to Mathematical Economics. Introduces the use of mathematics in economics. Topics include vectors and matrices, differential calculus, and optimization theory, with economic applications. Prereqs., ECON 3070 and ECON 3818.

ECON 4818-3. Introduction to Econometrics. Provides undergraduate economics majors with an introduction to econometric theory and practice. Develops the multiple regression model and problems encountered in its application in lecture and individual applied projects. Prereqs., ECON 3070 and 3818.

ECON 4838-3. Microcomputer Applications in Economics. Teaches basic concepts in JAVA programming applied to economic models. Development of Web pages and dynamic modeling will be introduced. Students will gain a foundation that can be applied to creating advanced applications relating to analysis of statistical data and custom projects. Prereqs., ECON 1088 or MATH 1300, ECON 3070 and ECON 3818.

ECON 4848-3. Applied Econometrics. Introduces students to the practice of applied regression analysis. Summarizes and reviews the regression technique, explores U.S. census data sources, introduces an advanced statistical software package and provides structured exercises in regression analysis of census data. Concludes with independent research projects analyzing social and economic issues using regression analysis and census data. Prereq., ECON 3818. Recommended prereq., ECON 3070.

ECON 4858-3. Financial Econometrics. Introduces statistical models, estimation and testing procedures used in analyzing financial data for advanced undergraduates. Topics include the modeling of returns, portfolio theory, the capital asset pricing model, options pricing and fixed income securities. Prereq., ECON 3818 or equivalent. Recommended prereq., ECON 4818.

ECON 4868-3. Simulation Modeling in Microeconomics. Computer simulation modeling translates theory into computer code to examine questions numerically; for example, the effects of taxes or emissions permits on welfare and income distribution. We use GAMS (general algebraic modeling system); a version may be downloaded for free. Students must have access to a computer (not needed in the classroom). Prereq., ECON 3070.

ECON 6828-3. Applied Time Series Analysis (Box-Jenkins) and Forecasting. Introduces first-year graduate students to time series approach of model building and forecasting. Basic topics are autoregressive integrated moving average models, nonstationarity and co-integration, vector autoregressions, and the evaluation of forecasts from such models. Emphasizes applied computer assignments. Prereqs., ECON 3818 and 4808, or equivalent.

ECON 7818-3. Mathematical Statistics for Economists. Provides the mathematical foundation for PhD level statistical inference in economic research. The primary topics of the course are probability theory and mathematical statistics including hypothesis testing and classical estimation with an emphasis on the method of maximum likelihood.

ECON 7828-3. Econometrics. Continuation of ECON 7818. Topics include regression analysis and extensions of the linear regression model to generalized least squares, time series data, and systems of equations. Prereq., ECON 7818.

ECON 8828-3. Seminar: Econometrics 1. First semester of two-semester sequence in econometrics for PhD students. Studies least squares and generalized least squares estimation of linear econometric models. Asymptotic (large sample) theory of inference. Some topics in the estimation of microdata. Prereq., ECON 7818.

ECON 8838-3. Seminar: Econometrics 2. Teaches the advanced level of econometrics theory. Topics include asymptotic theory, maximum likelihood estimation, limited dependent variables analysis and other frontier areas of econometrics such as the method of moment estimation, semiparametric and nonparametric estimation procedure. Prereq., ECON 7828.

ECON 8848-3. Applied Microeconometrics. Presents a "user's guide" to conducting empirical research in applied microeconomics. Begins with a primer on an industry-standard econometric software package including programming techniques and data management. Introduces advanced econometric techniques including panel data methods, IV, matching models, regression discontinuity, and limited dependent variables models. Concludes with a research project requiring a replication and/or extension of an existing published paper. Prereqs., ECON 7818 and 7828.

Independent Study and Other Courses

ECON 4309-3. Economics Honors Seminar 1. For information consult the department's director of honors. Open only to qualified seniors.

ECON 4339-3. Economics Honors Seminar 2. For information consult the department's director of honors. This course does not count toward major requirements. Prereq., ECON 4309. Open only to qualified seniors.

ECON 4909-3. Independent Study. May be repeated up to 6 total credit hours, but only 3 credit hours count for economics major. Prereqs., ECON 1000 or 2010 and 2020; completion of at least 12 hours of ECON classes and instructor and department consent required. Offered only to students with a GPA of 3.00 or better.

ECON 4939 (2-6). Internship/Seminar. Offers students the opportunity to integrate theoretical concepts of economics with practical experience in economics-related institutions. The theoretical portion arises from seminars and readings, the practical from activities in organizations related to the economics field. A maximum of 3 credit hours counts toward major requirements. Prereqs., ECON 3070 and 3080; junior or senior major standing; and instructor consent.

ECON 4999-3. Economics in Action: A Capstone Course. Students read current periodicals, picking out topics in which economics plays a role in understanding events. Background reading is assigned on topics chosen. May not be taken more than once for credit. Prereqs., ECON 3070 and 3080, and junior or senior standing.

ECON 6209-3. Research Methods in Economics. Trains graduate students in scientific methodology and research in economics. Culminates in a research project that normally leads directly to thesis work. Prereqs., ECON 6070, 6080, 6808, and 6818.

ECON 6949-1. Master's Candidate.

ECON 6959 (1-6). Master's Thesis.

ECON 8209-3. Economics Research Methods Workshop 1. Assists students starting their doctoral thesis by discussing methodology and evaluation of economic research. Presents and discusses student research proposals. Prereqs., two ECON courses at the 8000 level.

ECON 8219-3. Economics Research Methods Workshop 2. Continuation of ECON 8209. Assists students starting their doctoral thesis by discussing relevant economic research. Presents and discusses research papers. Prereq., ECON 8209.

ECON 8909 (1-3). Independent Study. May be repeated up to 7 total credit hours. Prereq., instructor and department consent.

ECON 8999 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

English

General Literature and Language

ENGL 1260-3. Introduction to Women's Literature. Introduces literature by women in England and America. Covers both poetry and fiction and varying historical periods. Acquaints students with the contribution of women writers to the English literary tradition and investigates the nature of this contribution. Same as WMST 1260. Approved for arts and sciences core curriculum: human diversity.

ENGL 1500-3. Masterpieces of British Literature. Introduces students to a range of major works of British literature, including at least one play by Shakespeare, a pre-20th century English novel, and works by Chaucer and/or Milton. Approved for arts and sciences core curriculum: literature and the arts.

ENGL 1600-3. Masterpieces of American Literature. Enhances student understanding of the American literary and artistic heritage through an intensive study of a few centrally significant texts, emphasizing works written before the 20th century. Approved for arts and sciences core curriculum: literature and the arts.

ENGL 1800-3. American Ethnic Literatures. Introduces significant fiction by ethnic Americans. Explores both the literary and the cultural elements that distinguish work by these writers. Emphasizes materials from Native American, African American, and Chicano traditions. Approved for arts and sciences core curriculum: human diversity.

ENGL 1840 (1-3). Independent Study: Lower Division. Creative writing. May be repeated up to 8 total credit hours.

ENGL 1850 (1-3). Independent Study: Lower Division. Literature/language. May be repeated up to 8 total credit hours.

ENGL 2000-3. Literary Analysis. Provides a basic skills course designed to equip students to handle the English major. Emphasizes critical writing and the acquisition of basic techniques and vocabulary of literary criticism through close attention to poetic and prose language. Required for students who declared the major summer 1999 and thereafter. Restricted to English majors only. Credit not granted for this course and ENGL 1010.

ENGL 2010-3. Introduction to Literary Theory. Introduces students to a wide range of critical theories that English majors need to know. Covers major movements in modern literary/critical theory, from Matthew Arnold through new criticism to contemporary postmodern frameworks. Required for all English majors. Restricted to English majors only.

ENGL 2020-5. Literary Analysis (with Lab). Provides basic skills for the English major, enhanced with a language arts lab. Emphasizes critical writing and the acquisition of the techniques and vocabulary of criticism through close attention to literary language. Required for students who declared the major summer 1999 and thereafter. Restricted to English majors. Credit not granted for this course and ENGL 2000.

ENGL 3000-3. Shakespeare for Nonmajors. Introduces students to Shakespeare's major works: the histories, comedies, and tragedies. May include the nondramatic poetry as well. Prereq., sophomore standing. Approved for arts and sciences core curriculum: literature and the arts.

ENGL 3060-3. Modern and Contemporary Literature. Close study of significant 20th century poetry, drama, and prose works. Readings range from 1920s to the present. Prereq., sophomore standing. Approved for arts and sciences core curriculum: literature and the arts.

ENGL 3930 (1-3). Internship. Provides academically supervised opportunity for upper-division students to work in public or private organizations on projects related to students' career goals and to relate classroom theory to practice. May

be repeated up to 6 total credit hours. Prereq., junior standing and instructor consent.

ENGL 3940 (1-3). Service Learning Practicum. Under faculty supervision, students participate in a service project correlated with the academic subject. May be repeated up to 6 total credit hours.

ENGL 4250-3. Modern and Contemporary Novel. Close study of masterpieces by such novelists as Proust, Joyce, Woolf, Lawrence, Mann, Kafka, and Faulkner. Prereq., junior standing.

ENGL 4460-3. Modern Poetry. Selects works of British and American poets from 1900 to the present. Prereq., junior standing.

ENGL 4820-3. Honors Seminar. Prepares prospective honors students to write honors theses. Focuses on sharpening the skills needed to write a successful thesis, including research techniques and the ability to evaluate and respond to secondary materials. May not be repeated. Prereq., instructor consent. Restricted to junior and senior English majors.

ENGL 4830-3. Honors Thesis.

ENGL 4840 (1-3). Independent Study: Upper Division. Creative writing. May be repeated up to 8 total credit hours.

ENGL 4850 (1-3). Independent Study: Upper Division. Literature/language. May be repeated up to 8 total credit hours.

Undergraduate Writing

ENGL 1001-3. Freshman Writing Seminar. Provides training and practice in writing. Focuses on the writing process, the fundamentals of composition, and the structure of argument. Provides numerous and varied assignments with opportunity for revision. Prereqs., College of Arts and Sciences freshman or sophomore standing. Not open to business or engineering majors. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: lower-division written communication.

ENGL 1191-3. Introduction to Creative Writing. Introduces techniques of fiction and poetry. Student work is scrutinized by the instructor and may be discussed in a workshop atmosphere with other students. May not be taken concurrently with ENGL 2021 or 2051. May not be repeated. Not open to graduate students.

ENGL 2021-3. Introductory Poetry Workshop. Introductory course in poetry writing. May be repeated up to 9 total credit hours. Prereq., ENGL 1191 (min. grade B-), or equivalent transfer course work.

ENGL 2051-3. Introductory Fiction Workshop. Introductory course in fiction writing. May be repeated up to 9 total credit hours. Prereq., ENGL 1191 (min. grade B-), or equivalent transfer course work.

ENGL 3021-3. Intermediate Poetry Workshop. Intermediate course in poetry writing. May be repeated up to 9 total credit hours. Prereq., CRW major or instructor consent based on submission of manuscript (five to seven poems).

ENGL 3051-3. Intermediate Fiction Workshop. Intermediate course in fiction writing. May be repeated up to 9 total credit hours. Prereq., CRW major or instructor consent based on submission of manuscript (one short story).

ENGL 3081-3. Intermediate Nonfiction Workshop. Discussion and practical criticism of student work and discussion of relevant works of literary nonfiction. May be repeated up to 9 total credit hours. Prereq., CRW major or instructor consent based on submission of manuscript.

ENGL 4021-3. Advanced Poetry Workshop. Advanced course in poetry writing. May be repeated up to 9 total credit hours. Prereq., CRW major or instructor consent based on submission of manuscript (five to seven poems).

ENGL 4051-3. Advanced Fiction Workshop. Advanced course in fiction writing. May be repeated up to 9 total credit hours. Prereq., CRW major or instructor consent based on submission of manuscript (one short story).

ENGL 4071-3. Scriptwriting Workshop. Designed to give students practical criticism of their script writing and technical format requirements. Either stage plays or screenplays are studied, as announced. May be repeated up to 9 total credit hours. Prereq., CRW major or instructor consent based on submission of manuscript. Same as FILM 4075.

ENGL 4081-3. Playwriting. May be repeated up to 9 total credit hours. Prereq., CRW major or instructor consent based on submission of manuscript.

Backgrounds to Literature in English

ENGL 2222-3. Foundations of British and American Literature. Studies major texts of medieval and Renaissance writers who fundamentally influenced the course of English writing. Ordinarily deals with Chaucer, Shakespeare, and Milton, though other classical, medieval, and Renaissance authors may be substituted.

ENGL 2502-3. British Literary History 1. Provides a chronological study of great figures and forces in English literature from Beowulf to 1660. Students may not receive credit for both ENGL 2502 and 3503.

ENGL 2512-3. British Literary History 2. Provides a chronological study of great figures and forces in English literature from 1660 to the present. Credit not granted for this course and ENGL 3512 and 3513.

ENGL 2602-3. Introduction to Western European Literature 1. Close study of literary classics of Western civilization: the *Odyssey* or *Iliad*, Greek drama, and several books of the Bible.

ENGL 2612-3. Introduction to Western European Literature 2. Close study of literary classics of Western civilization: major Roman and medieval texts.

ENGL 3302-3. Backgrounds of English and American Literature. Studies literary, philosophic, and religious traditions of the Greco-Roman and Judeo-Christian worlds, with close analysis of major texts in translation. Compares ancient and modern texts where feasible. Prereq., sophomore standing. Restricted to English and humanities majors.

ENGL 3312-3. The Bible as Literature. Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible. Restricted to sophomores/juniors/seniors. Same as JWST 3312.

British Literature to 1660

ENGL 3543-3. Chaucer: *Troilus* and the Early Poems. Close reading of Chaucer's work before *The Canterbury Tales*, with special emphasis on *Troilus and Criseyde* and its sources. Prereq., sophomore standing.

ENGL 3553-3. Chaucer: *The Canterbury Tales*. Short introduction to Middle English precedes study of the poetry. Prereq., sophomore standing. Restricted to English and humanities majors only.

ENGL 3563-3. Early Shakespeare. Shakespeare's works through 1600. Prereq., junior standing. Restricted to English, humanities, and theatre majors only.

ENGL 3573-3. Later Shakespeare. Shakespeare's works after 1600. Prereq., junior standing. Restricted to English, humanities, and theatre majors only.

ENGL 3583-3. Milton. Milton's poetry and selected prose. Prereq., sophomore standing. Restricted to English and humanities majors only.

ENGL 4113-3. History and Culture of Medieval England. Explores the major historical, literary, and cultural developments in England from the Anglo-Saxon period through the 15th century. Prereq., junior standing. Approved for arts and sciences core curriculum: historical context.

ENGL 4503-3. Continental Medieval Literature. Intensive study of the major literary works of the Middle Ages in Europe. Prereq., junior standing.

ENGL 4513-3. British Medieval Literature. Intensive study of the major literary works of the Middle Ages in Britain. Prereq., junior standing.

ENGL 4523-3. The Renaissance in England: 1500–1600. Selected prose and non-dramatic poetry from Skelton and More through Shakespeare and his contemporaries. Prereq., junior standing.

ENGL 4533-3. The Renaissance in England: 1600–1700. Selected prose and poetry by Donne, Jonson, Bacon, and their successors. Prereq., junior standing.

ENGL 4583-3. Elizabeth I and Her Times. Interdisciplinary course explores different aspects of the reign of Elizabeth I: social and political history; literature; theater; and music. Explores the role and impact of a female ruler on English culture. Restricted to juniors and seniors. Same as HIST 4134 and THTR 4091.

British Literature after 1660

ENGL 3164-3. History and Literature of Georgian England. Provides an interdisciplinary study of England in one of its most vibrant cultural and historical periods. Topics include politics, religion, family life, and the ways contemporary authors

understood their world. Prereq., sophomore standing. Approved for arts and sciences core curriculum: historical context.

ENGL 4204-3. Development of the English Novel 1. From the beginnings to 1830. Prereq., junior standing.

ENGL 4214-3. Development of the English Novel 2. Continuation of ENGL 4204. Prereq., junior standing.

ENGL 4224-3. Modern British and Irish Novel. Studies major figures and trends in the 20th century. Prereq., junior standing.

ENGL 4544-3. The Age of Satire: 1660–1740. Dryden, Defoe, Swift, Pope, Addison, Steele, and their contemporaries. Prereq., junior standing. Restricted to English and humanities majors only.

ENGL 4554-3. The Age of Sense and Sensibility: 1740–1800. Gray, Johnson, Goldsmith, Boswell, Cowper, Burns, Blake, and their contemporaries. Prereq., junior standing.

ENGL 4564-3. The Early Romantics. Major emphasis on Blake, Coleridge, and Wordsworth. Prereq., junior standing. Restricted to English and humanities majors only.

ENGL 4574-3. The Later Romantics. Major emphasis on Keats, Shelley, and Byron. Prereq., junior standing. Restricted to English and humanities majors only.

ENGL 4604-3. The Early Victorians. Main currents of Victorian thought in prose and poetry, 1830–1860. Prereq., junior standing. Restricted to English and humanities majors only.

ENGL 4614-3. The Later Victorians. Continuation of ENGL 4604, covering 1860–1900. Prereq., junior standing. Restricted to English and humanities majors only.

American Literature

ENGL 3655-3. American Literature to 1860. Chronological survey of the literature from Bradford to Whitman. Restricted to English, humanities, and film studies majors only. Prereq., sophomore standing. Credit not granted for this course and ENGL 3654.

ENGL 3665-3. American Literature after 1860. Chronological survey of the literature from Whitman to Faulkner. Continuation of ENGL 3655. Restricted to English, humanities, and film studies majors only. Prereq., sophomore standing. Credit not granted for this course and ENGL 3664.

ENGL 4235-3. American Novel 1. From the beginnings to 1900. Prereq., junior standing.

ENGL 4245-3. American Novel 2. From 1900 to the present. Prereq., junior standing.

ENGL 4655-3. Studies in American Literature to 1900. Extensive study of particular periods and movements in American literature. Prereq., junior standing. Restricted to English and humanities majors only.

ENGL 4665-3. Studies in American Literature after 1900. Extensive study of particular periods and movements in American literature. Prereq., junior standing. Restricted to English and humanities majors only.

Advanced Theory, Genre Studies and Popular Culture

ENGL 2036-3. Introduction to Digital Media in the Humanities. Serves as a humanities-based introduction to digital media structures such as digital archive and reading/writing software; studies theories and methodologies for undertaking digital media scholarship in the humanities; and explores digital textualities ranging from text messaging, blogging, and game to digital fiction and poetry. Formerly ENGL 2030.

ENGL 3116-3. Topics in Advanced Theory. Studies special topics in theory; specially designed for English majors. Topics vary each semester. May be repeated up to 6 total credit hours different topics. Prereq., sophomore standing.

ENGL 3226-3. Folklore 1. Emphasizes formal study of folk traditions (including tales, songs, games, customs, beliefs, and crafts) within a theoretical framework, using examples from several cultures. Prereq., sophomore standing.

ENGL 3246-3. Topics in Popular Culture. Studies special topics in popular culture; specially designed for English majors. Topics vary each semester. May be

repeated for a total of 6 credit hours for different topics. Prereq., sophomore standing.

ENGL 3796-3. Queer Theory. Surveys theoretical, critical, and historical writings in the context of lesbian, bisexual, and gay literature. Examines relationships among aesthetic, cultural, and political agendas, and literary and visual texts of the 20th century. Prereq., sophomore standing. Same as LGBT 3796.

ENGL 3856-3. Topics in Genre Studies. Studies special topics in genre studies; specially designed for English majors. Topics vary each semester. May be repeated for a total of 6 credit hours for different topics. Prereq., sophomore standing.

ENGL 4116-3. Advanced Topics in Media Studies. Studies specialized topics in the history, theory, and practice of media, such as the history of the book, the theory of digital media, and the theory and practice of multimedia forms. Specially designed for English majors. Topics vary year to year. May be repeated up to 6 total credit hours. Restricted to sophomores/juniors/seniors.

ENGL 4286-3. Folklore 2. Upper-division studies of folk groups, events, texts, and contexts as they reflect traditional knowing—folk perceptions and teachings about the structure and purpose of the universe. Restricted to juniors/seniors.

Multicultural and Gender Studies

ENGL 2707-3. Introduction to Lesbian, Bisexual, and Gay Literature. Offers students at sophomore and junior levels an introduction to some of the forms, concerns, and genres of contemporary lesbian, bisexual, and gay writing in English. Prereq., sophomore standing. Same as LGBT 2707.

ENGL 2717-3. Native American Literature. Surveys traditional and contemporary North American Native American literature, from traditional oral forms to contemporary genre literature of novels, short stories, and poetry. Same as ETHN 2713.

ENGL 2727-3. Survey of African American Literature 1. Chronological study of African American literature from the 17th century to the Harlem Renaissance. Same as ETHN 2722.

ENGL 2737-3. Survey of African American Literature 2. Chronological study of African American literature from the Depression writers to the present. Same as ETHN 2732.

ENGL 2747-3. Chicana/Chicano and Mexican Literature. Introduces Chicana and Chicano and Mexican literary studies, focusing on narrative works by Chicana and Chicano writers. Examines diverse range of Mexican writing in Greater Mexico as it addresses recurring issues and themes, including language, race and class, questions of identity, and gender relations. Same as ETHN 2746.

ENGL 2767-3. Survey of Post-Colonial Literature. Surveys the development of literatures in English in former British colonies. Topics include the spread and adaptation of English language literary forms in Asia, Africa, the Caribbean, and the far new world (Australia and New Zealand). Students learn the causes of the dispersion and the motivations for the clearly different uses of English literary forms in the ex-colonies. Same as ETHN 2761.

ENGL 3217-3. Topics in Gender Studies. Studies special topics in gender studies; specially designed for English majors. Topics vary each semester. May be repeated up to 6 total credit hours for different topics. Prereq., sophomore standing.

ENGL 3267-3. Women Writers. Introduces literature by British and American women. Prereq., sophomore standing. Same as WMST 3267.

ENGL 3377-3. Topics in Multicultural Literature. Studies special topics in multicultural literature; specially designed for English majors. Topics vary each semester. May be repeated up to 6 total credit hours for different topics. Prereq., sophomore standing.

ENGL 3677-3. Jewish-American Literature. Explores the Jewish-American experience from the 19th century to the present through writers such as Sholem Aleichem, Peretz, Babel, Singer, Malamud, Miller, Ginsberg, and Ozick. The Jewish experience ranges from the travails of immigration to the loss of identity through assimilation. Restricted to sophomores/juniors/seniors. Same as JWST 3677. Approved for arts and sciences core curriculum: human diversity.

ENGL 4277-3. Topics in Women's Literature. Focuses on areas of research interest in the study of women's literature, such as selected themes or critical issues. Students are expected to contribute original research to the topic under consideration. Prereq., junior standing. Same as WMST 4277.

ENGL 4287-3. Studies in Lesbian, Gay, Bisexual, and Transgender Literature. Examines selected British, American, and French literary representations of lesbian and gay identity from the early 16th century to the present. Discusses the changing status of homosexuality as a literary and cultural topos, including how same-sex desire is defined, and the rhetorical and ideological difficulties involved in its representation. Specific topics vary each semester. May be repeated up to 9 total credit hours. Restricted to juniors and seniors. Same as LGBT/WMST 4287.

ENGL 4697-3. Contemporary African American Literature 1. Advanced in-depth study of the works of prominent African American novelists and poets. Restricted to juniors/seniors. Same as ETHN 4692.

Critical Studies in English

ENGL 4038-3. Critical Thinking in English Studies. Concerned with developments in the study of literature that have significantly influenced our conception of the theoretical bases for study and expanded our understanding of appropriate subject matter. May not be repeated. Prereq., junior standing. Restricted to English and humanities majors only.

ENGL 4728-3. Seminar: Topics in English. Studies such topics as heroism in 18th-century literature, eros and violence, South African women writers, politics and religion in 16th century literature, and American humor. Topics vary with instructor. Prereq., junior standing.

Graduate Courses

ENGL 5019-3. Survey of Contemporary Literary and Cultural Theory. Introduces a variety of critical and theoretical practices informing contemporary literary and cultural studies. May be repeated up to 6 total credit hours.

ENGL 5029-3. British Literature and Culture before 1800. Introduces graduate level study of medieval and early modern writing through the long eighteenth century. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

ENGL 5059-3. British Literature and Culture after 1800. Introduces graduate level study of Romantic, Victorian, Modern, and Postmodern writing. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary. Same as ENGL 5079.

ENGL 5079-3. British Literature and Culture after 1800. Same as ENGL 5059.

ENGL 5109-3. Literature and Culture of the United States. Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.

ENGL 5139-3. Global Literature and Culture. Introduces graduate level study of recent writing in English from around the world. Emphasizes a wide range of genres, forms, new media, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

ENGL 5169-3. Multicultural/Postcolonial Studies. Introduces graduate level study of ethnic American and/or postcolonial writing in English, including relevant theoretical discourse. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

ENGL 5199-3. Studies in Special Topics. See ENGL 5109 for description.

ENGL 5229-3. Poetry Workshop. Designed to give students time and impetus to generate poetry and discussion of it in an atmosphere at once supportive and critically serious. Admission to graduate creative writing students or by instructor's approval of an application manuscript. May be repeated up to 9 total credit hours.

ENGL 5239-3. Fiction Workshop. Designed to give students time and impetus to generate fiction and discussion of it in an atmosphere at once supportive and critically serious. Admission to graduate creative writing students or by instructor's approval of an application manuscript. May be repeated up to 9 total credit hours.

ENGL 5259-3. Nonfiction Workshop. Designed to give students time and impetus to generate nonfiction and discussion of it in an atmosphere at once supportive and

critically serious. Admission to graduate creative writing students or by instructor's approval of an application manuscript. May be repeated up to 9 total credit hours.

ENGL 5269-3. Publishing Workshop. Provides practical experience in the editorial, design, and business procedures of desktop publishing.

ENGL 5279-3. Studies in Poetry. Addresses modern poetry, written since World War II. May be repeated up to 6 total credit hours.

ENGL 5289-3. Scriptwriting Workshop. Designed to give time and impetus to scriptwriting in terms of both imaginative and technical aspects. Either stage plays or screenplays are studied, as announced. Admission to graduate creative writing program students and by application manuscript. May be repeated up to 9 total credit hours.

ENGL 5299-3. Studies in Fiction. Addresses modern fiction written since World War II. May be repeated up to 6 total credit hours.

ENGL 5309-3. Playwriting.

ENGL 5319-3. Studies in Literary Movements. Studies styles, trends, innovations, and major writers in significant literary movements, particularly those after 1900, such as modernism and objectivism. May be repeated up to 9 total credit hours. Restricted to graduate CRWR, ENLT, and ENGL majors.

ENGL 5529-3. Studies in Special Topics. Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester. May be repeated up to 9 total credit hours. Same as ENGL 5549 and 5559.

ENGL 5549-3. Studies in Special Topics. Same as ENGL 5529 and 5559.

ENGL 5559-3. Studies in Special Topics. Same as ENGL 5529 and 5549.

ENGL 5849 (1-6). Independent Study (Graduate Level 1). Independent investigation of topics of specific interest to individual students. Students wishing to enroll in independent study must petition the Associate Chair for Graduate Studies prior to the beginning of the semester. May be repeated up to 6 total credit hours.

ENGL 6949-1. Master's Degree Candidate.

ENGL 6959 (1-9). Master's Thesis.

ENGL 7019-3. Advanced British Literature and Culture before 1800. Studies special topics in medieval and early modern writing through the long 18th century. Topics will vary. May be repeated up to 9 total credit hours. Recommended prereq., ENGL 5019.

ENGL 7059-3. Advanced British Literature and Culture after 1800. Studies special topics in romantic, Victorian, modern and postmodern writing. Topics will vary. May be repeated up to 9 total credit hours. Recommended prereq., ENGL 5059.

ENGL 7119-3. Advanced Literature and Culture of the United States. Studies special topics in writing of the United States. May be repeated up to 9 total credit hours. Recommended prereq., ENGL 5109.

ENGL 7149-3. Advanced Global Literature and Culture. Studies special topics in recent writing in English from around the world. May be repeated up to 9 total credit hours. Recommended prereq., ENGL 5149.

ENGL 7179-3. Advanced Multicultural/Postcolonial Studies. Studies special topics in ethnic American and/or postcolonial writing in English, including relevant theoretical discourses. Topics will vary. May be repeated up to 9 total credit hours. Recommended prereq., ENGL 5169.

ENGL 7489-3. Advanced Special Topics. Studies special topics in theory, culture, and literature of any period. Topics will vary. May be repeated up to 9 total credit hours. Prereq., ENGL 5019.

ENGL 7849 (1-3). Independent Study (Graduate Level 2). May be repeated up to 7 total credit hours.

ENGL 7859-1. Introduction to PhD Research and Professional Development. Skills course designed to equip midlevel or advanced graduate students with rudiments of practical research skills and techniques (bibliography, history of the book, codicology, manuscripts, databases, World Wide Web, and Internet) and orientation to possible future in the profession. Recommended prereq., critical analysis and literary theory.

ENGL 8999 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for

the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Environmental Studies

ENVS 1000-4. Introduction to Environmental Studies. Surveys environmental studies, examining ecological, socioeconomic, political, aesthetic, and technological factors that influence the quality of life on Earth. Required for ENVS majors. Approved for arts and sciences core curriculum: natural science.

ENVS 2100-3. Topics in Applied Environmental Studies. Covers a variety of topics not currently offered in the curriculum: offered depending on instructor availability and student demand. May be repeated up to 6 total credit hours, provided the topics vary. Prereq., ENVS 1000.

ENVS 2840 (1-6). Independent Study. Students work with an approved faculty sponsor to explore a topic in greater depth and to pursue an interest that is not offered in the formal curriculum. May be repeated up to 8 total credit hours. Prereq., ENVS 1000.

ENVS 3001-3. Sustainable Solutions Consulting. Introduces students to green design, industrial ecology, and life cycle analysis. Students use basic techniques of environmental auditing to analyze the CU-Boulder campus. Prereq., any two-semester science sequence. Restricted to junior and senior ENVS majors.

ENVS 3020-3. Advanced Writing in Environmental Studies. Offers training in critical thinking and analytical writing skills appropriate to upper-division classes. Writing assignments integrate the subject matter of different topical areas. Restricted to junior and senior ENVS majors. Approved for arts and sciences core curriculum: written communication.

ENVS 3040-4. Conservation Biology. Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques. Prereq., EBIO 2040 or 2640. Same as EBIO 3040.

ENVS 3070-3. Energy and the Environment. Examines contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Includes some basic physical concepts and principles that often constrain choices. No background in physics is required. Same as PHYS 3070. Approved for arts and sciences core curriculum: natural science.

ENVS 3140-3. Environmental Ethics. Examines major traditions in moral philosophy to see what light they shed on value issues in environmental policy and the value presuppositions of the economic, ecological, and juridical approaches to the environment. Prereq., sophomore standing or PHIL 1100, 1200, 2200, 3100, or 3200. Same as PHIL 3140. Approved for arts and sciences core curriculum: ideals and values.

ENVS 3434-3. Introduction to Applied Ecology. Emphasizes the integration of physical, chemical, and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project. Prereq., CHEM 1111 or CHEN 1211 and 1221. Same as CVEN 3434.

ENVS 3520-3. Environmental Issues in Geosciences. Addresses current environmental problems that need an understanding of geology. Topics include energy resources, climate modification, hydrology, waste disposal, and mining resources. Uses specific examples to illustrate restrictions imposed by nature and man on solutions to these problems. Prereq., a two-course sequence in any natural science. Same as GEOL 3520. Approved for arts and sciences core curriculum: natural science.

ENVS 3600-3. Principles of Climate. Describes the basic components of the climate system: the atmosphere, ocean, cryosphere, and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system, including the hydrological cycle and its role in climate, climate stability, and global change. Covers forecasting climate, its applications, and human dimensions. Prereqs., ATOC 1050 and 1060, or ATOC 3300/GEOG 3301, or GEOG 1001 and 1 semester of calculus. Same as GEOG 3601 and ATOC 3600. Approved for arts and sciences core curriculum: natural science.

ENVS 3621-3. Energy Policy and Society. Examines how society makes decisions about energy, and how these decisions affect the environment and the economy. Uses tools from policy analysis, economics, and other disciplines to build an in-depth understanding of energy's role in U.S. contemporary society. Recommended prereqs., ENVS/PHYS 3070.

ENVS 3800-3. The Art of Research: The Essential Elements of Research in Environmental Studies. Introduces students to the practice of doing research in environmental studies. Examines how to define a research problem, select methods, design research, construct arguments and evaluate others' research. Aims to familiarize students with the process of doing research and enable them to proceed with confidence in pursuing their own research topics. Recommended for juniors planning to write ENVS honors theses. Prereq., ENVS 1000. Recommended prereq., ENVS 3020. Restricted to juniors/seniors.

ENVS 3930 (1-3). Internship. Relates classroom theory to practice. Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to students' career goals. May be repeated up to 6 total credit hours.

ENVS 4027-3. Inequality, Democracy, and the Environment. Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between (a) inequality and democratic decision making and (b) undemocratic decision making; U.S. and corporate food and energy policy; and global environmental degradation. The course also focuses on the role that global inequality plays in fostering environmental degradation. Restricted to juniors/seniors. Same as SOCY 4027.

ENVS 4050 (2-4). Field Studies in Environmental Sciences. Includes field-oriented courses offered at irregular intervals during academic year or during summer sessions.

ENVS 4100 (1-3). Topics in Environmental Policy. Covers a variety of topics not currently offered in the curriculum; offered depending on instructor availability and student demand. May be repeated up to 9 total credit hours, provided the topics vary.

ENVS 4120 (1-3). Topics in Environmental Sciences. Covers a variety of topics not currently offered in the curriculum; offered depending on instructor availability and student demand. May be repeated up to 6 total credit hours, provided the topics vary. Restricted to junior and senior ENVS majors.

ENVS 4160-3. Introduction to Biogeochemistry. Covers fundamentals of biogeochemical cycling, emphasizing water, carbon, and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere, and hydrosphere, and natural and human-managed environments. Prereqs., GEOL 3320 or EBIO 3270, and CHEM 1011 or higher. Same as GEOL and EBIO 4160.

ENVS 4201-3. Biometeorology. Introduces this interdisciplinary science, studying the interactions between atmospheric processes and living organisms (plants, animals, and humans). Discusses how organisms adapt to a changing environment. Uses a practical, problem-solving approach to explore these interactions. Prereq., GEOG 1001. Same as GEOG 4201.

ENVS 4630 (2-6). Field Techniques in Environmental Science. Field and laboratory methods for assessing the abiotic and biotic environment. Emphasizes field techniques in climatology, surveying soils, hydrology, geomorphology, plant and animal ecology, and environmental law. Evaluation by written module reports and maps. This course may use animals and/or animal tissues. Prereqs., EBIO 2040 and instructor consent. Same as EBIO 4630.

ENVS 4795-3. Field Methods in Zoology and Botany. Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates, and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods, and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts, and individual research projects. Same as MUSM 4795 and EBIO 4795.

ENVS 4800-3. Critical Thinking in Environmental Studies. Examines a specific environmental topic in depth, synthesizing information from complex and controversial issues. Different course sections present different topics. May be repeated up to 6 total credit hours. Restricted to students with junior or senior status in environmental studies.

ENVS 4840 (1-6). Independent Study. May be repeated up to 8 total credit hours. Prereq., ENVS 1000.

ENVS 4990-3. Senior Thesis. Supervised project involving original research. Open only to environmental studies majors with at least a 3.30 GPA. Thesis proposal must be accepted by honors chairman. May be repeated up to 6 total credit hours.

ENVS 5000-3. Policy, Science, and the Environment. Introduction to methodologies of the policy sciences with emphasis on applications to environmental issues; role of science in decision making; professional roles and responsibilities as a policy analyst.

ENVS 5001-3. Environmental Philosophy. A survey of the major philosophical issues in environmental studies, comprising key issues in environmental ethics, in environmental political philosophy, and in the philosophy of biology and ecology.

ENVS 5002-3. Environmental Science. Surveys methodologies of environmental science. Emphasizes understanding the scientific basis of current environmental problems, and linking scientific understanding to policy making.

ENVS 5100 (1-3). Special Topics in Environmental Studies. A variety of topics not currently offered in curriculum; offered depending on instructor availability and student demand. May be repeated up to 9 total credit hours, provided the topics vary.

ENVS 5110 (1-3). Topics in Environmental Social Science and Humanities. Covers various topics in the social sciences and humanities in environmental studies.

ENVS 5120 (1-3). Topics in Quantitative Methods. Covers a wide range of quantitative methods used in policy research and their applications. Topics may include decision-making under uncertainty, fundamentals of microeconomics, mathematics of economic efficiency, cost-benefit analysis, system optimization, budgeting, fundamentals of probability, risk assessment, risk perception, risk communication, and decision analysis. Includes practical exercises, as well as readings and discussion, of various strengths and weaknesses of the different methods.

ENVS 5710-3. Introduction to the Policy Sciences. Provides an introduction to the policy sciences as a distinctive tradition within the policy field. Emphasizes the use of conceptual tools to improve analysis of complex problems. Teaches problem-solving framework that students apply to an issue of their choice. Restricted to graduate students or instructor consent required. Same as PSCI 7016.

ENVS 5720-3. The Problem Orientation. Teaches basic problem-solving framework for policy analysis. Emphasizes applications to develop policy recommendations for issues selected by students. Includes group projects. Restricted to graduate students or instructor consent required. Same as PSCI 7026.

ENVS 5730-3. Introduction to the Policy Sciences: The Decision Process. Provides policy sciences frameworks for analyzing policy processes and designing political strategies to influence those processes in the direction of the preferred alternative. Emphasizes applications to problems selected by students for term projects. Restricted to graduate students or instructor consent required. Same as PSCI 7036.

ENVS 5740-3. Context-Sensitive Research Methods. Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies, and textual analyses. Restricted to graduate students or instructor consent required. Same as PSCI 7116.

ENVS 5810-3. Water Resources and Environmental Sustainability. Assesses impacts of climate variability and regional growth on western U.S. water resources, and examines successes and failures of different management strategies, as well as ways that science is used and misused in support of water management.

ENVS 5820-3. Renewable Energy Policy. Examines the technology, policy and politics of renewables. Technology includes the resource, science, and engineering aspects of renewables. Policy includes various policy levers used to influence renewables. Politics refers to political settings of renewables: how decision-makers perceive them, who supports/opposes policies, and how policies progress through the political process. Prereq., an introductory energy science and technology course.

ENVS 5830-3. Critical Issues in Climate and the Environment. Discusses current issues such as ozone depletion, global warming, and air quality for graduate

students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments, and critically evaluate these issues. Same as ATOC 5000. Credit not granted for this course and ATOC 4800.

ENVS 5840-3. Global Biogeochemical Cycles. Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes, and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed, along with global-scale measurements of element fluxes from satellites, aircraft, and measurement networks. Prereq., general chemistry, some organic chemistry. Same as GEOL 5305.

ENVS 5909 (1-3). Independent Study. Only 3 hours of independent study can be used towards degree requirements. May be repeated up to 6 total credit hours for different topics. Prereq., department and instructor consent.

ENVS 5930-2. Internship. Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to the students' research and career goals, and to relate classroom theory to practice.

ENVS 6007-3. Foundations of Environmental Sociology. Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters. Same as SOCY 6007.

ENVS 6112-3. Foundations of American Natural Resources Law. Introduces students to the law of natural resources. Examines the legal, historical, political, and intellectual influences that shape resources development and conservation. Same as LAWS 6112.

ENVS 6940-1. Master's Degree Candidacy.

ENVS 6950 (1-6). Master's Thesis.

ENVS 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Ethnic Studies

Crosscultural/Comparative Studies

ETHN 2001-3. Foundations: Race and Ethnicity in the United States. Introduction to race, ethnicity and gender in the United States. Focuses on the five major racialized groups (African Americans, Asian Americans, Chicanas and Chicanos, European Americans and Indigenous peoples) in the U.S. The course design centers on historical and contemporary ideologies and systems that have constructed and continue to define, shape, and impact the significance of race and ethnicity in our economic, political and social lives. Formerly ETHN 2000.

ETHN 2761-3. Survey of Post-Colonial Literature. Surveys the development of literatures in English in former British colonies. Topics include the spread and adaptation of English language literary forms in Asia, Africa, the Caribbean, and the far new world (Australia and New Zealand). Students learn the causes of the dispersion and the motivations for the clearly different uses of English literary forms in the ex-colonies. Same as ENGL 2767. Formerly ETHN 2762.

ETHN 3031-3. Racist Ideologies. Explores the origins and evolution of racism as a political and religious force in American life, beginning with Puritan ideology in colonial New England, proceeding through the era of Manifest Destiny, and ending in the present day. Special attention is paid to the history of organizations such as the Ku Klux Klan, and emergence of Christian identity doctrine. Prereq., ETHN 2001 or equivalent. Formerly ETHN 3013.

ETHN 3101-3. Selected Topics in Ethnic Studies. Intensive examination of a particular topic, theme, issue, or problem in ethnic studies as chosen by the instructor. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001 or equivalent. Formerly ETHN 3100.

ETHN 3201 (3-4). Multicultural Leadership: Theories, Principles and Practices. Focuses on leadership theories and skills necessary for effectiveness in multicultural settings. Students gain understanding of traditional and culturally

diverse approaches to leadership and change through comparative analyses of western and non-western theories and practices. Community service required. Prereq., ETHN 2001 or equivalent. Formerly ETHN 3200. Same as INVS 3100 and LDSP 3100. Approved for arts and sciences core curriculum: human diversity.

ETHN 3301-3. Elements of Religion. Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions. Same as ANTH 3300. Formerly ETHN 3300.

ETHN 3501-3. Research Methods in Ethnic Studies. Preparation for empirical inquiry in Ethnic Studies. Emphasizes philosophy of social science and cultural studies. Students engage rigorous, theoretical concepts to understand quantitative and qualitative research methods. Prepares students for writing a lengthy research paper in ETHN 4511. Prereq., ETHN 2001. Restricted to sophomore/ junior/ senior ETHN majors. Formerly ETHN 3500.

ETHN 3671-3. People of Color and Social Movements. People of color the world over are struggling for sovereignty, independence, civil and human rights, food security, decent wages and working conditions, healthy housing, and freedom from environmental racism and other forms of imperialism. Course analyzes and brings alive these struggles. Prereq., ETHN 2001 or equivalent. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: human diversity. Formerly ETHN 3675.

ETHN 3841 (1-6). Undergraduate Independent Study. Consult the Department of Ethnic Studies for information. May be repeated up to 6 total credit hours. Prereq., ETHN 2001. Department and instructor consent required. Formerly ETHN 3840.

ETHN 4001-3. Screening Race, Class, and Gender in the U.S. and the Global Borderland. Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several filmic productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands. Prereq., ETHN 2001 or equivalent ETHN course. Same as ETHN 5001 and FILM 4001. Formerly ETHN 3001.

ETHN 4511-3. Research Practicum in Ethnic Studies. Students conduct research in the library or in the field and write a lengthy paper on a topic, issue, or theme pertinent to Ethnic Studies. The foundation for this course is ETHN 3501. Prereqs., ETHN 2001 and 3501. Restricted to junior/senior ETHN majors. Formerly ETHN 4510.

ETHN 4521-3. Applied Cultural Anthropology. Analyzes problems of cultural change due to contacts between people of different cultures. Restricted to senior ANTH or ETHN majors. Same as ANTH 4510. Formerly ETHN 4520.

ETHN 4841 (1-6). Independent Study. Work with an approved faculty sponsor to explore a topic in greater depth. May be repeated up to 6 total credit hours for different topics. Prereq., department and instructor consent.

ETHN 4951-3. Senior/Graduate Seminar in Ethnic Studies. Capstone experience in Ethnic Studies. Includes an independent research project and public presentation. Prereqs., ETHN 2001, 3501 and 4511 or equivalent. Restricted to juniors/seniors/grads. ETHN 4951 and 5951 are identical courses. Formerly ETHN 4950.

ETHN 4961-3. Honors Thesis I. Supervised project involving original research in the emerging field of ethnic studies. The thesis is submitted to the Honors Program of the College of Arts and Sciences and is orally defended. Prereqs., honors standing in the Department of Ethnic Studies, ETHN 2001 and ETHN 4511. Restricted to senior ETHN majors. Formerly ETHN 4960.

ETHN 4971-3. Honors Thesis II. Prereqs., ETHN 2001, 4511, and 4961. Restricted to senior ETHN majors. Formerly ETHN 4970.

ETHN 5001-3. Screening Race, Class, and Gender in the U.S. and the Global Borderland. Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several filmic productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands. Prereq., ETHN 2001 or equivalent ETHN course. Same as ETHN 4001, FILM 4001. Formerly ETHN 3001.

ETHN 5951-3. Senior/Graduate Seminar in Ethnic Studies. Capstone experience in Ethnic Studies. Includes an independent research project and public presentation. Prereqs., ETHN 2001, 3501 and 4511 or equivalent. Restricted to juniors/seniors/grads. Same as ETHN 4951. Formerly ETHN 4950.

ETHN 6011-3. Race and Sexuality Studies. Examines primary texts in queer studies and queer theory while challenging colonial heteronormative and homonormative studies that exclude queers of color and their life experiences. Readings include works by Gloria Anzaldúa, Jose Munoz, Audre Lorde, David Eng, Judith Butler, Judith Halberstam, and Michel Foucault. Topics such as queer borderlands, citizenship, racialized and transgender identities will be interrogated. Restricted to graduate students.

Africana Studies

ETHN 2002-3. Introduction to Africana Studies. Overview of Africana studies as a field of investigation, its origins, and history. Formerly BLST 2000. Approved for arts and sciences core curriculum: human diversity.

ETHN 2232-3. Contemporary African American Social Movements. Examines selected case studies of African American collective behavior in a historical context. Emphasizes an in-depth investigation of the continuing African American struggle for social/democratic rights. Formerly BLST 2200. Approved for arts and sciences core curriculum: human diversity or contemporary societies.

ETHN 2242-3. African American Social and Political Thought. Introductory course designed to acquaint students with historical and contemporary thinking, writings, and speeches of African Americans. Formerly BLST 2210. Approved for arts and sciences core curriculum: human diversity or contemporary societies.

ETHN 2432-3. African American History. Surveys African American history. Studies, interprets and analyzes major problems, issues, and trends affecting African Americans from about 1600 to the present. Same as HIST 2437. Formerly BLST 2437. Approved for arts and sciences core curriculum: human diversity or United States context.

ETHN 2502-2. African Dance. Explores the technique, style, and rhythms of various African, Caribbean, and dance forms of the Americas. Music, history, anthropology, and folklore help to enhance the dance and provide a cultural experience. May be repeated up to 6 total credit hours within a term. Same as DNCE 2501. Formerly BLST 2501.

ETHN 2722-3. Survey of African American Literature 1. Chronological study of African American literature from the 17th century to the Harlem Renaissance. Same as ENGL 2727. Formerly BLST 2722.

ETHN 2732-3. Survey of African American Literature 2. Chronological study of African American literature from the Depression writers to the present. Same as ENGL 2737. Formerly BLST 2732.

ETHN 3022-3. Selected Topics in African American Studies. Intensive examination of a particular topic, theme, issue, or problem concerning the African American presence, as chosen by the instructor. Sample offerings could include the African American pop cultures, the civil rights movement, or other African American issues. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001 or 2002. Formerly BLST 3020.

ETHN 3112-3. African American Education System. Examines the history of the education of African Americans from early American history until current times. Covers primary, secondary, and higher education. Topics include education of African Americans before 1800, education of African Americans during the period of American slavery, and factors affecting today's education gains. Also covers current research being conducted in higher education. Prereq., ETHN 2001 or 2002. Formerly BLST 3103.

ETHN 3502-3. Historical and Contemporary Issues of African American Women. Explores the social, economic, political, historical, and cultural role of African American women from an interdisciplinary perspective. Special emphasis is placed on African American women's rich oral and literary tradition. Prereq., ETHN 2001, 2002, or WMST 2000 or equivalent. Same as WMST 3505. Formerly BLST 3505.

ETHN 4232-3. The Life and Thought of Martin Luther King Jr. An intensive exploration and examination of the life and thought of the Rev. Dr. Martin Luther King Jr. Special emphasis on the stages of his life and their corresponding productions. Prereq., ETHN 2001 or 2002 or equivalent. Restricted to juniors/seniors. Formerly BLST 4235.

ETHN 4252-3. African American Urban History. Fosters a better understanding and appreciation of the role African Americans have played in the evolution and shaping of urban America. Employs techniques of urban studies to more effectively assess the many dimensions, subtleties, and insensitivities of life in the

city. Prereq., ETHN 2001 or 2002 or equivalent. Recommended prereq., a working knowledge of U.S. and Afro-American history. Restricted to juniors/seniors. Formerly BLST 4250.

ETHN 4652-3. Contemporary Issues in African American Studies. Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001 or 2002 or equivalent. Restricted to juniors/seniors. Same as ETHN 5652. Formerly BLST 4650.

ETHN 4672-3. Seminar on the Civil Rights and Black Power Movements. A review of the ideas, events, persons, organizations oriented to the quest for African American social justice in the decade of the sixties. Prereq., ETHN 2001 or 2002. Restricted to juniors/seniors or instructor consent. Formerly BLST 4670.

ETHN 4692-3. Contemporary African American Literature 1. Advanced in-depth study of works of prominent African American novelists and poets. Prereq., ETHN 2001 or 2002. Restricted to juniors/seniors. Same as ENGL 4697. Formerly BLST 4692.

ETHN 5652-3. Contemporary Issues in African American Studies. Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001 or 2002 or equivalent. Restricted to juniors/seniors. Same as ETHN 4652. Formerly BLST 4650.

American Indian Studies

ETHN 1123-3. Exploring a Non-Western Culture: Hopi and Navajo. Explores two American Indian cultures, Hopi and Navajo, and cultural interrelationships from the prehistoric through the contemporary period, using an integrated, holistic, and humanistic viewpoint. Same as ANTH 1120. Formerly AIST 1125. Approved for arts and sciences core curriculum: human diversity.

ETHN 2003-3. Introduction to American Indian Studies. Explores the attainments of various American Indian civilizations in the period immediately prior to first contact with Europeans. Examines agriculture, architecture, governance and social organization, medicine, mathematics, and population. Formerly AIST 2000. Approved for arts and sciences core curriculum: human diversity.

ETHN 2013-3. Critical Issues in Native North America. Explores a series of issues including regulations of population, land and resource holdings, water rights, education, religious freedom, military obligations, the sociopolitical role of men and women, self-governance, and legal standing as these pertain to American Indian life. Formerly AIST 2015. Approved for arts and sciences core curriculum: human diversity or United States context.

ETHN 2203-3. American Indians in Film. Examines images of American Indians in films produced by, and about, Native peoples. Follows the creation of "the Hollywood Indian" from still-photography to contemporary motion pictures. Films are analyzed within historical, social, and artistic contexts, and examined in terms of the impact their images have exerted upon American society at large and Native communities in particular. Formerly AIST 2201.

ETHN 2703-3. American Indian Religious Traditions. Introduces religions of the peoples indigenous to the Americas. Concerns include ritual, mythology, and symbolism occurring throughout these cultures in such areas as art, architecture, cosmology, shamanism, sustenance modes, trade, and history. Same as RLST 2700. Formerly AIST 2700. Approved for arts and sciences core curriculum: ideals and values or human diversity.

ETHN 2713-3. Native American Literature. Surveys traditional and contemporary North American Native American literature, from traditional oral forms to contemporary genre literature of novels, short stories, and poetry. Same as ENGL 2717. Formerly AIST 2712.

ETHN 3023-3. Selected Topics in American Indian Studies. Examines a particular topic, theme, issue, or problem in American Indian Studies. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001 or 2003 or equivalent. Formerly AIST 3020.

ETHN 3133-3. North American Indians: Traditional Cultures. Comprehensive survey of native cultures of America north of Mexico, including a review of their natural environments, prehistory, languages, and major institutions for the various culture areas. Prereq., ETHN 2001 or 2003. Same as ANTH 3130. Formerly AIST 3135.

ETHN 3213-3. American Indian Women. Explores the experiences, perspectives, and status of American Indian women in historical and contemporary contexts. Examines representations of indigenous women in mainstream culture. Emphasizes the agency of American Indian women-their persistence, creativity, and activism, especially in maintaining indigenous traditions. Prereq., WMST 2000, 2600 or ETHN 2001 or 2003. Restricted to sophomores/juniors/seniors. Same as WMST 3210. Approved for arts and sciences core curriculum: human diversity. Formerly AIST 3210.

ETHN 3403-3. Indian/Government Conflicts. Deals with historical events involving conflicts between the U.S. government and American Indians. Examples include the role of the FBI in the Pine Ridge Sioux Reservation (1972–76) or the 1864 massacre of the Cheyenne and Arapaho Indians in Colorado territory. Additional courses may relate to tribal governments. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001, 2003, 2013. Restricted to juniors/seniors. Formerly AIST 3400.

ETHN 4563-3. North American Indian Acculturation. Comprehensive survey of changes in the native cultures of America north of Mexico caused by occupation of the continent of Old World populations, including a review of processes of contact, environmental changes, changes in major institutions, the nature of federal/state administration, the reservation system, and contemporary developments. Prereq., ETHN 2001 or 2003. Restricted to junior/senior ANTH or ETHN majors. Same as ANTH 4560. Formerly AIST 4565. Approved for arts and sciences core curriculum: human diversity.

American Studies

ETHN 2004-3. Themes in American Culture 1. Enables students to explore various themes in pre-1865 American culture. Examines these themes, which vary each year, in their social context. Formerly AMST 2000. Approved for arts and sciences core curriculum: United States context.

ETHN 2014-3. Themes in American Culture 2. Enables students to explore various themes in post-1865 American culture. Examines these themes, which vary each year, in their social context. Formerly AMST 2010. Approved for arts and sciences core curriculum: United States context.

ETHN 2064-3. Topics in American Studies. Critically examines American identity and experiences, past and present, focusing on ethnicity, gender, popular culture, and political culture. Formerly AMST 2060.

ETHN 3954-3. Methods in American Ethnic Studies. Through structured discussions, selected readings, and written assignments, students develop an understanding of theoretical concepts that engage race, class gender and sexuality in American Ethnic Studies. The emphasis is on critical analysis and theoretical arguments that encourage students to become critical thinkers. Prereqs., ETHN 2001 or 2004 and ETHN 2014 or 2064. Restricted to juniors and seniors. Formerly AMST 3950.

ETHN 4324-3. Media Institutions and Economics. Introduces the institutions and practices of the media industries. Surveys the histories, structures, and activities of these organizations and the contemporary issues surrounding them. Prereq., ETHN 2001, 2004, or 2064. Restricted to juniors/seniors. Same as JOUR 4321. Formerly AMST 4321.

ETHN 4344-3. 20th Century American Intellectual History. Addresses the impacts of political, social, and economic developments on ideas about democracy, science, race, gender, faith, the supposed mission of America, and the role of intellectuals in society. Prereq., ETHN 2001, 2004, or 2064. Restricted to juniors/seniors. Same as HIST 4346. Formerly AMST 4346.

ETHN 4504-3. Ethnic-American Autobiography. Investigates the genre of autobiography in America from its inception to the present. American autobiography has been associated with the invention of national character and, thus, is a site of cultural contestation and identity formation. Its changing form crosses disciplinary lines and provides a site for discourses on ethnicity, class, gender, sexuality, age, family, religion and other American cultural conflicts. Prereq., ETHN 2001 or equivalent. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: United States context.

Asian American Studies

ETHN 1025-3. Introduction to Asian American Studies. Examines the various factors that define minority groups and their positions in American society using

Asian Americans as a case study. Emphasizes the perspectives and methodologies of the discipline of ethnic studies. Formerly AAST 1015. Approved for arts and sciences core curriculum: contemporary societies or human diversity.

ETHN 2215-3. The Japanese American Experience. Surveys the Japanese American experience, emphasizing post-WWII developments. Gives attention to intragroup diversity having to do with generation, ethnicity, ecology, and gender. Recommended prereq., ETHN 1025. Formerly AAST 2210. Approved for arts and sciences core curriculum: human diversity.

ETHN 3015-3. Asian Pacific American Communities. Covers the concepts, methods, and theories commonly used in community research, as well as substantive information on selected Asian/Pacific American communities. Emphasizes the ethical/political dimensions of community studies. Prereq., ETHN 2001 or 1025. Formerly AAST 3013. Approved for arts and sciences core curriculum: United States context or contemporary societies.

ETHN 3425-3. Selected Topics in Asian American Studies. Intensive examination of a topic or issue affecting Asian Americans, such as the Japanese American internment during World War II, or Asian American social movements or community organizations. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 1025 or 2001. Formerly AAST 3420.

ETHN 3575-3. Japanese American Internment: Critical Thinking in Sociocultural Diversity. Offers an historical overview of the Japanese American experience in the United States. Introduces and explores fundamental issues inherent in the study of human beings from the perspective of cultural social difference. Prereq., ETHN 1025 or 2001. Restricted to juniors/seniors. Formerly AAST 3670.

ETHN 3905-3. Asian American Women: Historical and Contemporary Issues. Drawing from work produced by and about Asian American women, examines historical and contemporary issues including representation of Asian American women, identity politics, feminism, coalition building, and activism for social change. Prereq., WMST 2000 or 2600 or ETHN 1025, 2001, or 2004. Restricted to sophomores/juniors/seniors. Same as WMST 3900. Formerly AAST 3900. Approved for arts and sciences core curriculum: United States context.

Chicana/o Studies

ETHN 1036-3. Chicana and Chicano Fine Arts and Humanities. Provides foundation for study of Chicano literature, music, the plastic arts, theatre, and film. Also introduces aesthetic and critical concepts and their applications in Chicana and Chicano studies. Formerly CHST 1031. Approved for arts and sciences core curriculum: human diversity.

ETHN 2536-3. Survey of Chicana/o History and Culture. Through historical and social scientific studies, novels, autobiographies, testimonies, films, music, and art, this course will provide students a survey of Chicana/o history and culture. Historical overviews of Chicana/o peoples from Mesoamerica; the Spanish Conquest; the historical presence of Chicana/o peoples in the Southwest; the rise of the Chicana/o student and community movements; immigration issues; and the gender, sexuality, and criminalization issues. Formerly CHST 2537. Approved for arts and sciences core curriculum: human diversity or United States context.

ETHN 2746-3. Chicana/Chicano and Mexican Literature. Introduces Chicana and Chicano and Mexican literary studies, focusing on narrative works by Chicana and Chicano writers. Examines diverse range of Mexican writing in Greater Mexico as it addresses recurring issues and themes, including language, race and class, questions of identity, and gender relations. Same as ENGL 2747.

ETHN 3026-3. Women of Color: Chicanas in U.S. Society. Critically explores the Chicana experience and identity. Examines issues arising from the intersection of class, race, and gender. Focuses on controversies surrounding culture and gender through an analysis of feminism and feminismo. Prereq., ETHN 2001 or 2536 or equivalent. Formerly CHST 3026.

ETHN 3106-3. Selected Topics in Chicana Chicano Studies. Intensive examination of a particular topic, theme, issue, or problem in Chicana and Chicano studies as chosen by the instructor. May be repeated up to 6 total credit hours within a term on different topics. Prereq., ETHN 1016 or 2001. Formerly CHST 3100.

ETHN 3136-3. Chicana Feminisms and Knowledges. Provides insight into the present socioeconomic condition of Chicanas and the concept of feminismo through interdisciplinary study of history, sociology, literary images, and film portrayals. Prereq., ETHN 1016, 2001 or 2536 or equivalent. Same as WMST 3135. Formerly CHST 3135. Approved for arts and sciences core curriculum: human diversity.

ETHN 3826-3. Contemporary Chicana, Chicano Writers. Covers the most important Chicana and Chicano writers of prose fiction of the past three decades. Considers progression of Chicana and Chicano fiction from naturalism, realism, and romanticism, to post-modernism. Prereq., ETHN 2001 or 2536 or equivalent. Formerly CHST 3824.

ETHN 4006-3. Chicana/Chicano Native American Cultures of the U.S. Theoretically engaged seminar considers intersections of Chicana/o and Native American studies to shape our scholarly understanding of the U.S. and Mexico borderlands. Ethnographies, historical studies, novels, film, and music will be used to understand the processes of Spanish and Euro-American colonization, neocolonialism, identity formation, gender, syncretism, and *mestizaje*. Prereq., ETHN 2001 or 2536 or equivalent. Formerly CHST 400.

ETHN 4126-3. The Emergence of Modern Mexico. Study of Mexican history continues with the establishment of independence in 1821. Examines the upheavals of the Mexican Revolution and culminates with recent events in Mexico. Prereq., ETHN 2001 or 2536 or equivalent. Same as HIST 4128. Formerly CHST 4128.

ETHN 4306-3. The Chicana and Chicano and U.S. Social Systems. Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity. Prereq., ETHN 2536 or equivalent. ETHN 4306 and 5306 are identical courses. Formerly CHST 4303.

ETHN 4686-3. Special Topics in Chicana and Chicano Studies. Examines a particular topic, theme, issue, or problem concerning Chicana and Chicano studies. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001 or 2536 or equivalent. Formerly CHST 4681.

ETHN 5306-3. The Chicana and Chicano and U.S. Social Systems. Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity. Prereq., ETHN 2536 or equivalent. ETHN 4306 and 5306 are identical courses. Formerly CHST 4303.

Graduate-Level Courses

ETHN 6007 (1-3). Advanced Directed Readings in Ethnic Studies. This is a graduate level directed readings course designed to expand student knowledge in a particular area of concentration with a broad interdisciplinary and comparative framework. These areas of concentration include work in Africana, American Indian, Asian American, Chicana and Chicano and Transnational/Hemispheric ethnic studies. Restricted to graduate students in good academic standing.

Farrand Residential Academic Program

FARR 1000-1. Farrand Service-Learning Practicum: Special Topics. Offers a varying service-learning practicum experience as corequisite to a service-learning lecture course. May be repeated up to 6 total credit hours, provided the practica are different. Graded pass/fail.

FARR 1001-1. Avant-Garde Film Appreciation. Provides students with an introduction to the aesthetic and critical concepts surrounding the viewing and appreciation of film art through lecture, discussion and film screenings. Explores primarily non-narrative expressions of film as art. Recommended prereq., FILM 1502.

FARR 1002-1. Spinning Progress. Examines the broad notion of progress by focusing on cloth. Mechanization of textile production over the past 250 years announces one "modern" understanding of progress based on speed on efficiency. But, even from the outset of the industrial revolution, competing conceptions of progress grounded on other values contested this "modern" conception. By what understanding are we to assess progress today?

FARR 1003-1. Banned Books and the First Amendment. Focuses on a heated topic of discussion since the Constitution was drafted: the censorship of books. This class will look at some classics in literature: *Catcher in the Rye*, *The Color Purple*, and *Huck Finn*, and will explore the questions of why they were controversial and whether censorship of books is ever justified. Graded pass/fail.

FARR 1004-1. Teen Trials and Tribulations in Literature. Discusses major themes and literary strategies in coming-of-age literature. Pass/fail only.

FARR 1005-1. Comics and the Interpretive Arts. Explores comic books as literature and visual art. This course will introduce methods of literary analysis and apply them to a specific medium of art: the comic book. Discussions will focus on content and form and will be guided by questions about the way in which art is defined and categorized. Graded pass/fail.

FARR 1513-1. The Individual and the Community. Examines the relationship between the individual and the community through films, both narrative and documentary. Focuses on the problems and possibilities of losing and/or promoting both community and individuality.

FARR 1520-1. Theatre Arts Workshop.

FARR 1561-1. Nonviolence for Everyday: Meditation and Other Helpful Habits. Focuses on the challenge of achieving nonviolence on a day-to-day basis by maintaining a peaceful, focused frame of mind. Explores ways to train the mind, including methods that may aid healing.

FARR 1562-3. Gandhi's *Satyagraha*: Love in Action for Humans and Other Creatures. Class texts and films explore social justice and structural violence in regard to humans, animals, and the environment in the light of a Gandhian approach to these issues. Outreach work in the community is included.

FARR 1595-1. Community Service: Personal Growth and Public Good. Provides an opportunity for students to engage in volunteer service. Provides support and guidance in reflecting on personal and sociological issues that derive from their experiences.

FARR 2000-3. Farrand Seminar in the Humanities and the Arts. Studies an aspect of the theme of the Center for Humanities Seminar Program each year, and will be taught by faculty participants in the Center's fellowship program. May be repeated up to 6 total credit hours.

FARR 2002-3. Literature of Lifewriting. Examines how diverse writers have created unique personal narratives that shape memory within historical and social contexts. Works will exemplify a wide range of literary structures, themes, and strategies that enhance an understanding of the genre and provide models for students' own lifewriting assignments. Approved for arts and sciences core curriculum: literature and the arts.

FARR 2100-3. Digital Design Interfaces, Interactivities, and Information Design. Learn the key components of digital design and how to create unique and informative digital designs. Has immediate application through work in small groups with nonprofit agencies with whom a web site, based on the agency's information and needs, will be designed.

FARR 2400-3. Understanding Privilege and Oppression in Contemporary Society. Through a focus on race, class, sexual orientation, and physical ability, this course explores privilege, oppression, and empowerment in the United States. Through community service, students learn how oppression and privilege interact, and apply classroom learning to community experiences. Same as LDSP 2400. Approved for the arts and sciences core curriculum: human diversity or contemporary societies.

FARR 2510-3. Exploring Good and Evil through Film. Eighteen films depict our capacities for good and evil. Topics addressed include the following: the Holocaust, Jung's concept of "The Shadow," the Seven Deadly Sins, altruistic and sociopathic personalities, capital punishment, the redemptive narrative, and the satanic in film. Same as FILM 2613. Approved for arts and sciences core curriculum: ideals and values.

FARR 2660-3. Ethics of Ambition. Through selected readings in classical literature on ethics and through more contemporary readings and films, examines critical ethical issues relating to the competition of ambitions and the alternative styles of choosing between courses of action in a dangerous world. Uses biographies of those whose lives illustrate both the complexities of the struggles and the profundity of possibilities. Considers the unconscious metaphors of national visions and ambitions, the competing ethics of ends and means, the conflicting ambitions in a pluralistic society, and the transcendent ambitions of visionaries. Same as HONR 2250. Approved for arts and sciences core curriculum: ideals and values.

FARR 2820-3. Future of the Spaceship Earth. Examines major ecological, political, economic, cultural, legal, and ethical issues that will shape the future. Students consider how their decisions influence the future, and reflect on fundamental

values and ideals underlying the search for solutions to these complex problems. Approved for the arts and sciences core curriculum: ideals and values.

Film Studies

Production

FILM 2000-3. Beginning Filmmaking. Instructs students in making Super-8 films. Covers use of cameras and editing equipment, basic editing and splicing techniques, and analysis of pertinent films. May emphasize making personal, experimental films or making narrative sound films, according to instructor. Students need to purchase materials and rent the necessary equipment. The Film Studies Program maintains an equipment pool with modest rental fees for students needing equipment. Prereq., FILM 1502 or instructor consent.

FILM 2010-3. Moving Image Computer Foundations. Provides students with artistic foundational hands-on experience in integrated use of media software in both the PC and Mac creative imaging making digital working environments. Includes fundamentals in general computer maintenance, creative and practical audio editing, image management and manipulation, and creative moving image practice. Prereq., film major or instructor consent.

FILM 2300-3. Beginning/Intermediate Filmmaking. Covers basic camera, editing, and splicing techniques for Super-8 film. Equipment is available at the film studies office for a modest rental fee. Prereq., FILM 1502 or instructor consent.

FILM 2500-3. Introduction to Cinematography. Film production class focusing on developing a basic understanding of the aesthetics and principles of Cinematography. Through projects, screenings, and critiques, students learn creative camera lighting processes. Prereqs., FILM 1502 and 2000 or 2300 with an averaged combined grade in these two courses of 3.00, with a minimum overall GPA of 2.0. Restricted to FILM majors.

FILM 2610-3. Animation Production. Includes analysis of independent and experimental animation and an introduction to various animation techniques (object, line, collage, sand or paint on glass, Xerox, cameraless, pixellation, etc.). Students produce exercise films and a final film exploring these techniques. Prereq., FILM 2000 or 2300. Recommended prereq., FILM 2500 or 2600.

FILM 2900-3. Lighting. Covers the basics of "Why you need lighting," color temp, as well as camera techniques, lighting theory, and lighting set-ups for still and motion picture film video. Emphasizes hands on as well as theory. Prereq., FILM 2000 or 2300. Recommended prereq., FILM 1502.

FILM 3010 (1-3). Film Production Topics. Offers students both theoretical and practical experience in various specialized areas of cinematic production. Topics vary but include production in the documentary, fictional narrative, animation, computer animation, and experimental genres. May be repeated up to 9 total credit hours. Prereq., FILM 2000 or 2300.

FILM 3030-3. Cinema Alternative Process. Explores alternative methods of film processing and filmic image manipulation. Through projects, film screenings, lectures and discussions students will learn fine arts approaches to creative control for the moving image. Prereq., FILM 1502, 2000, 2300 or 2500, or instructor consent. Restricted to BFA majors.

FILM 3081-3. American Film in the 1980s and '90s. Examines the relationship between American films of the 1980s and '90s and their cultural and historical context. Includes films by Lynch, Stone, Solondz, Scott, Scorsese, Lee, Duayne, Lemmons, Tarantino, Altman. Controlled enrollment. Prereqs., FILM 1502, 3051, 3061, or instructor consent.

FILM 3091-3. Post-War American Film/Culture/Politics. Examines the relationship between American films from the mid-1940s to the present day and their cultural and historical context. Includes films by Capra, Curtiz, Frankenheimer, Kazan, Kramer, Jewison, Wexler, Pakula, Cimino, Fincher, Lynch, Stone, and Lee. Priority is given to students who have taken both semesters of film history (FILM 3051 and 3061). Prereqs., FILM 1502. Recommended prereq., FILM 3051.

FILM 3191-3. The Golden Age: Film Directors, Actors, and Writers from the Golden Age of Television. Traces the roots of live television and anthologies of the fifties. Examines several of the most interesting and radical Hollywood directors, writers, and actors of the sixties and seventies who emerged from this "Golden Age" of television: Frankenheimer, Penn, Altman, Lumet, Cassavetes, Serling, and Chayevsky. Prereq., FILM 1502.

FILM 3211-3. History of Russian Cinema. Surveys Russian cinema in historical and cultural context from early 20th century to the present. Prereq., FILM 1502 or RUSS 2221. Same as RUSS 3211. Approved for arts and sciences core curriculum: literature and the arts.

FILM 3400-3. Cinema Production I. Exploration of creative cinema production through short production and post-production projects. A short final project will be required. Focuses on the tactics and strategies of independent cinema production, examining a variety of approaches to genre. Explores a range of film and digital technologies. Prereqs., FILM 1502, 2000 or 2300, and 2500. Coreqs., FILM 3515 and 3525. Restricted to BFA film studies majors or instructor consent.

FILM 3600-3. Digital Post-Production Process. Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing. Restricted to FMST majors or instructor consent required.

FILM 3620-3. Experimental Digital Animation. Instructs students in the making of digital animation. Covers the use of the exposure sheet, frame series manipulation, digital motion techniques, and an analysis of pertinent films. Emphasis is on digital tools to create individual, personal, or experimental animated works. Includes experimental techniques of transfer between digital media and film. Prereq., FILM 2610 or instructor consent. Recommended prereqs., FILM 3030 and 3400 or 3600.

FILM 3700-3. Digital Audio Design. Studies and applies Pro Tools as a post-production audio toolbox. Applied techniques include sound recording, sound editing, field recording, foley, vocal recording and editing, plug-in generated sound creation, MIDI, basic scoring principles, audio sweetening, and audio mixing. Students will be required to complete regular editing assignments in addition to a final soundscape project. Prereq., FILM 2000 or 2300, 2500, and 3400 or 3600. Restricted to BFA majors.

FILM 3900 (1-3). Independent Study (Production). May be repeated up to 6 total credit hours.

FILM 3920-3. Professional Seminar. Learning aspects of professional development in the field of cinema. Through workshops and assignments students will learn of the many opportunities found within all areas of production. Guests will help inform the students of professional options and expectations. Topics will include: crew work, fund raising, marketing festivals, low budget filmmaking, and alternative venues. Students may have an internship concurrently with this course. May be repeated up to 6 total credit hours. Prereq., FILM 2500, or instructor consent. Recommended restriction to BFA film majors.

FILM 3940 (1-6). Film Studies Internship. Provides students with professional internship experiences with film, video, new media production companies, governmental agencies, production units, audio recording studios, and new media industries. Students will be responsible for securing their own internship position. May be repeated up to 9 credit hours. Prereqs., must be a BA or BFA film studies major with a CU GPA of at least 2.00, upper-division standing, and a 3.00 GPA as a BA or BFA film studies major. Offered pass/fail only.

FILM 4000-3. Advanced Digital Postproduction. Through projects, discussions, and screenings, this class explores the advanced practices and aesthetics of computer-based moving-image art editing. Topics include how to edit and manage a postproduction cycle, how to use digital editing systems and capabilities such as compositing, digital audio, and optical effects treatments. Prereqs., FILM 1502, 2000 or 2300, 2500, and 3400 or 3600, or instructor consent. Restricted to BFA FMST majors. Cannot be taken simultaneously with FILM 3400 or 3600. Same as ARTF 5000.

FILM 4010 (1-3). Topics in Film Studies-Production. Prepares students for advanced film studies production courses. Subject matter varies each semester. May be repeated up to 9 total credit hours, provided the topics are different. Same as ARTF 5010.

FILM 4030-3. Visiting Filmmakers Seminar. Examines creative issues in contemporary cinema art. Graduate and advanced undergraduate students explore filmmaking ideas with guest artists within a seminar setting. Filmmakers, videographers and programmers of national and international reputation, with an emphasis on "experimental" practice, interact with graduate and advanced undergraduate students, and discuss their work at seminar meetings, public lectures or events. May be repeated up to 6 total credit hours. Recommended prereqs., FILM 1502 and 4453 or instructor consent. Restricted to FMST, BASA, and ARTC majors. Same as ARTF 5030.

FILM 4240-3. Beginning Video Production. Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture. Prereqs., FILM 2000 and 2500 or instructor consent. Same as ARTS 4246.

FILM 4340-3. Intermediate Video Production. Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions, and readings. Furthers theoretical understanding of video as an art form. Prereq., FILM 4240 or instructor consent. Same as ARTS 4346.

FILM 4440-3. Advanced Video Production. Continuation of intermediate video production. Explores advanced technical skills to control the quality of the video image in production, postproduction, and distribution. Emphasizes self-motivated independent projects, conceptual realization of advanced student work and basic working knowledge of distribution and life as a media artist. Promotes further theoretical understanding of video as an art form. May be repeated up to 9 total credit hours. Prereq., FILM 4340 or instructor consent. Same as ARTS 4446.

FILM 4500-3. Cinema Production 2. Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production leading to the completion of a BFA thesis project exploring either documentary, experimental, or narrative genres. May be repeated up to 6 total credit hours. Prereq., FILM 3400, 3515 and 3525. Restricted to BFA film studies major or instructor consent. Same as ARTF 5500.

FILM 4600-3. Creative Digital Cinematography. Explores creative approaches to single camera digital cinematography through short projects, discussions, and screenings. Relates creative photography and poetic approaches to the digital camera cinema. May be repeated up to 6 total credit hours. Prereqs., FILM 2000, 2500, and 3400 or 3600, or ARTS 4246 or 5346 or instructor consent. Restricted to FILM majors. Same as ARTF 5600.

History

FILM 2521-3. Classics of the Foreign Film: 1960s to Present. Surveys the classics of international cinema from the 1960s to the present. Recommended prereq., FILM 1502. Restricted to FILM/FMST majors. Nonmajors will need instructor's consent.

FILM 3051-4. Film History 1. Intensive introduction to film history from 1895 to 1935. Topics covered include the beginnings of motion picture photography, the growth of narrative complexity from Lumiere to Griffith, American silent comedy, Soviet theories of montage, German expressionist films, and the transition to sound. Prereq., FILM 1502.

FILM 3061-4. Film History 2. Starts with the late 1930s and early 1940s films of Renoir and Welles and follows the historical growth and evolution of film aesthetics to the present. Studies Italian neorealist, French new wave, and recent experimental films, as well as the films of major auteur figures such as Bergman, Kurosawa, Fellini, Hitchcock, Bunuel, Antonioni, and Coppola. Prereqs., FILM 1502 and 3051, or instructor consent.

FILM 3301-3. Contemporary Issues in Russian Film. Examines the relationship between politics, economics, aesthetics, and the way moral and social issues are treated in noteworthy Russian films from the last 20 years. Same as RUSS 3301.

FILM 3501-3. Film Production Management. Familiarizes students with principles of film management techniques as well as problem-solving methodologies developed specifically for the film industry. Emphasizes the technique of production boarding as the central tool in production management as well as budget and contracts information. Offered through Continuing Education. FILM 3501 or 3563 may be used for partial fulfillment of major requirements. Prereq., FILM 2000, COMM 1240, and JOUR 3674.

FILM 3660-3. The Postmodern. Analyzes the cultural and critical practices as well as the thought that defines the postmodern period at the end of twentieth century. Prereq., HUMN 2000 or junior/senior standing. Same as HUMN 3660. Approved for arts and sciences core curriculum: literature and the arts.

FILM 3901 (1-3). Independent Study (Critical Study). May be repeated up to 6 total credit hours.

FILM 4001-3. Screening Race, Class, and Gender in the U.S. and the Global Borderland. Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several filmic productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands. Prereq., ETHN 2001 or equivalent ETHN course. Same as ETHN 4001.

FILM 4021-3. Directing/Acting for the Camera. Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research, and papers required. Recommended prereq., FILM 1502. Same as ARTF 5021.

Genre and Movements

FILM 1502-4. Introduction to Film Studies. Introduces the critical study of film, exploring basic theoretical concerns while presenting a survey of important film genres, both narrative and nonnarrative. Lectures may be presented by various faculty members. A considerable amount of writing is required.

FILM 2312-3. Film Trilogies. Study of films designed as trilogies, drawing on a wide range of international cinema. Films include Satyajit Ray's *Apu Trilogy* (India), Krzysztof Kieslowski's *Three Colors Trilogy* (Poland), Francois Truffaut's *Antoine Doinel* cycle (France), and Abbas Kiarostami's *Iran Trilogy* (Iran). Restricted to FILM/FMST majors. Nonmajors will need instructor's consent.

FILM 2412-3. Melodrama and Culture. Explores the evolution of melodrama as a film genre from the 1910s to the Hollywood classical era and contemporary cinema, and the genre's adaptability to different historical cultural contexts outside of American cinema. Analyzes the political and cultural functions of melodrama in contexts ranging from classical Hollywood to Latin American cinema, from European films of the 1960s to revisionist films of the 1990s. Prereq., FILM 1502. Recommended prereq., FILM 3051. Restricted to FILM/FMST majors. Nonmajors will need instructor's consent.

FILM 3002-3. Major Film Movements. Historical-aesthetic survey dealing with various national cinemas, taught in conjunction with the appropriate language department. Typical offerings are the French film, the German film, the Russian film, and so on. Also offers a more detailed approach to a more restricted subject, i.e., film comedy, women filmmakers, German expressionist cinema, Italian neorealism. May be repeated up to 12 total credit hours within the same term with departmental consent. Restricted to FILM/FMST majors. Nonmajors will need instructor's consent.

FILM 3012-3. Documentary Film. Provides a historical and theoretical introduction to the documentary film. Examines the historical beginnings of documentary film as well as exploring contemporary documentary practice. Canonical moments of documentary history and lesser known examples of documentary film work will be explored. Prereq., FILM 1502. Recommended prereq., FILM 3051.

FILM 3022-3. Jung, Film, and Literature. The basic themes of C. G. Jung's archetypal psychology (shadow, anima/animus, character typology, and individuation) are studied and applied as tools of critical analysis to selected films and literary texts of the modern period. Prereq., instructor consent. Same as HUMN 3015.

FILM 3032-3. Stage Tragedy and Film. Presents an aerial survey of the history of Western drama as represented in film: Greek drama, the Elizabethans, Ibsen/Strindberg to O'Neill/Williams, Beckett, etc. Prereq., FILM 1502. Recommended prereq., FILM 3051.

FILM 3042-3. Horror Film. Serious investigation of the horror film genre as well as its origins in, and relation to, works of romanticist literature (e.g., Poe, Shelley). Issues include: the relation of fantasy and reality; gender in horror film; psychological issues raised by the films; historical issues generated by the genre. Prereq., FILM 1502. Recommended prereq., FILM 3051.

FILM 3402-3. European Film and Culture. Studies the relationships between European film, art, and culture. Offered each summer in a different European city (viz, Rome, Paris, London, Athens, Barcelona). There will be regular in-class lectures, film screenings, field trips, and on-site teaching. May be repeated up to 12 total credit hours. Recommended prereq., introductory film and art history courses. Approved for arts and sciences core curriculum: literature and the arts.

FILM 3422-3. Genre: The Hollywood Musical. Second only to jazz, some critics regard the Hollywood musical as the greatest American popular art form of the 20th century. This course proposes a historical, formal, and theoretical approach to the musical through its several iterations, from the classical, to the revisionist, to the unusual, placing the changes in the genre's form, structure, and ideology in the context of America's changing social, political, and religious values. Prereq., FILM 1502. Recommended prereq., FILM 3051.

Topics

FILM 2003-3. Film Topics. Varying topics on important individuals, historical developments, groupings of films, film directors, critical and theoretical issues in film. May be repeated up to 9 total credit hours, provided the topics are different.

FILM 2513-3. Major Asian Filmmakers. Surveys the major Asian directors from China, India, Japan, Taiwan, and Vietnam. Recommended prereq., FILM 1502. Restricted to FILM/FMST majors. Nonmajors will need instructor's consent.

FILM 2613-3. Exploring Good and Evil Through Film. Eighteen films depict our capacities for good and evil. Topics addressed include the following: the Holocaust, Jung's concept of "The Shadow," the Seven Deadly Sins, altruistic and sociopathic personalities, capital punishment, the redemptive narrative, and the satanic in film. Same as FARR 2510. Approved for arts and sciences core curriculum: ideals and values.

FILM 3003-3. Major Film Directors. Focuses on the work of a single director or a group of related directors. Course content varies each semester. Consult the online Schedule Planner for specific topic. May be repeated up to 12 total credit hours with departmental consent. Restricted to FILM/FMST majors. Nonmajors need instructor consent.

FILM 3013-3. Women and Film. Examines the representation of women both in mainstream movies and in women's counter-cinema that resists traditional form, content, and spectator-text relationships of Hollywood models. Emphasizes work by key women filmmakers such as Margarethe Von Trotta, Lizzy Borden, and Yvonne Rainer, as well as readings in feminist film theory. Approved for arts and sciences core curriculum: human diversity.

FILM 3033-3. Color and Cinema. Examines color and cinema from historical, technological, aesthetic and theoretical perspectives. Students will be required to complete both creative and scholarly assignments.

FILM 3043-3. Topics in Critical Film Studies. Prepares students for advanced Film Critical Studies work. Subject matter varies from semester to semester. May be repeated up to 9 total credit hours, provided topics are different. Prereq., FILM 1502 or instructor consent. Restricted to FILM or FMST majors.

FILM 3503-3. German Film Through World War II. History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English. Same as GRMN 3503.

FILM 3513-3. German Film and Society 1945–1989. Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical, and political contexts. Taught in English. Same as GRMN 3513.

FILM 3563-3. Producing the Film. Familiarizes students with principles of film management techniques as well as problem-solving methodologies developed specifically for the film industry. Emphasizes the technique of production boarding as the central tool in production management as well as budget and contracts information. Offered through Continuing Education. FILM 3501 or 3563 may be used for partial fulfillment of major requirements. Prereq., FILM 2000, COMM 1240, and JOUR 3674.

FILM 3603-3. Sound and Vision. Historical and aesthetic overview of sound in relation to film, ranging from Hitchcock's *Blackmail* to Mailick's *The Thin Red Line*. Pursues issues in sound design, mixing film scores, voiceovers, and film/sound theory in narrative, experimental, and documentary films. Among the filmmakers to be studied are Vertov, Welles, Altman, Brakhage, Lipsett, Eisenstein, Coppola, Scorsese, Stone, Leone, Godard, Nelson. Also explores a limited practicum using Pro Tools for sound design. Prereq., FILM 1502. Recommended prereq., FILM 3051.

FILM 4003-3. Film and Fiction. Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories, and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting. Same as ARTF/COML 5003.

FILM 4013-3. Film, Photography, and Modernism. Provides interdisciplinary study of film, photography, and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity, and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz, and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel, and Bertolucci. Prereq., FILM 1502. Recommended prereq., FILM 3051. Same as ARTF 5013.

FILM 4023-3. Topics in International Cinema. Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns, and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy, and social and cultural analysis. May be repeated up to 6 total credit hours provided topics are different. Prereq., FILM 1502. Recommended prereqs., FILM 3051 and 3061. Restricted to FILM, FMST, ARTC majors. Same as ARTF 5023.

FILM 4043 (1-3). Topics in Film Studies: Critical Studies. Prepares students for advanced Film Studies critical studies courses. Subject matter varies each semester. May be repeated up to 9 total credit hours, provided the topics are different. Same as ARTF 5043.

FILM 4135-3. Art and Psychoanalysis. Explores psychoanalytic theory as it relates to our understanding of literature, film, and other arts. After becoming familiar with some essential Freudian notions (repression, narcissism, ego/libido, dreamwork, etc.), students apply these ideas to works by several artists (e.g., Flaubert, James, Kafka, Hoffmann, and Hitchcock). Prereq., HUMN 2000 or junior/senior standing. Approved for arts and sciences core curriculum: literature and the arts.

FILM 4453-3. Elective Affinities: Avant-Garde Film and the Arts. Traces the history and aesthetics of avant-garde/experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music, and film; landscape in painting, photography, and film; post-modernism and the cinema; queer theory, gender/identity politics, and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt, and Gunvor Nelson. Prereq., FILM 1502. Same as ARTF 5453.

Workshops

FILM 2005-3. Movies and Screenplay Analysis. Analyzes the narrative structure of films and screenplays. Familiarizes students with the specific narrative characteristics of the classic motion picture, the three-act structure, and the multiple tasks involved in the process of adaptation. Dissects the form and structure of feature films through analyzing movies and screenplays. Prereq., FILM 1502.

FILM 2105-3. Introduction to the Screenplay. Explores, through close reading and original student work, the form and structure of the screenplay from the writer's perspective. Students will begin by analyzing structural and character elements of such screenplays as *Chinatown* and *Witness*, then analyze screenplays of their choosing. Students will learn the basics of screenplay form, then develop and write 10 minutes of an original screenplay. Prereq., FILM 1502.

FILM 3005-3. Issues in Film Comedy. Film comedies constitute one of cinema's most accomplished genres. This is a critical, historical, and theoretical investigation of silent, classical, and contemporary film comedy. Works by Chaplin, Keaton, Hawks, Cukor, Woody Allen, and others will be explored. Papers, exams required. Recommended prereq., FILM 1502.

FILM 3515-1. Camera Workshop. Seven intensive workshops focusing on the development of independent cinema production and post-production skills. The instructor must certify students in order to continue with their BFA studies. Prereqs., FILM 1502, 2000 or 2300, and 2500. Coreq., FILM 3400. Restricted to BFA film studies majors.

FILM 3525-1. Cinema Editing Workshop. Seven intensive workshops focusing on the development of independent cinema post-production skills. The instructor must certify students in order to continue with their BFA studies. Prereqs., FILM 1502, 2000 or 2300, and 2500. Coreq., FILM 3400. Restricted to BFA film studies majors.

FILM 4005-3. Screenwriting: Short Form. A writing intensive course that focuses on the art of the short form screenplay. Students will complete regular writing

exercises, presentations, and several short scripts. May be repeated up to 6 total credit hours. Prereq., FILM 3400 or 3600. BFA only.

FILM 4075-3. Scriptwriting Workshop. Designed to give students practical criticism of their script writing and technical format requirements. Either stage plays or screenplays are studied, as announced. May be repeated up to 9 total credit hours. Prereq., instructor consent based on submission of manuscript. Same as ENGL 4071.

FILM 4105-3. Advanced Screenwriting. Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Prereq., approved writing sample. Recommended prereqs., FILM 3051 and 3061. Same as ARTF 5105.

FILM 4505-3. Screenwriting: Long Form. Creative writing workshop in which students plan and write a feature-length screenplay with emphasis on format, dialogue, characterization, and story. Prereqs., FILM 1502 and 2000 or 2300. Recommended prereq., FILM 2600.

Intensive and Small Courses

FILM 3004-3. Films of Alfred Hitchcock. Intensive, critical investigation of the films of one of cinema's greatest directors, Alfred Hitchcock. Concepts to be examined include authorship, desire, gender, and film acting. Critical and theoretical writings about Hitchcock are explored. Paper and exams required. Restricted to FILM/FMST majors. Nonmajors will need instructor's consent.

FILM 3104-3. Film Criticism and Theory. Surveys the range and function of film criticism, introduces major positions and concepts of film theory, and focuses on students' abilities to write about film. Prereq., FILM 1502. Restricted to FILM, FMST, and HUMN majors. Same as HUMN 3104.

FILM 3504-3. Topics in German Film. Analyzes key issues in German culture as they are represented in film and other media, e.g., technology, architecture, women, and the Holocaust. Taught in English. May be repeated up to 6 total credit hours provided the topics are different. Same as GRMN 3504.

FILM 3514-3. German Film and Society After 1989. Introduces post-1989 German culture through film. The course emphasizes films in their socio-historical contexts and explores developments in German culture during and after the unification. Taught in English. Same as GRMN 3514.

FILM 4004-3. Topics in Film Theory. Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers, and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials. May be repeated up to 6 total credit hours. Prereq., FILM 3051 or instructor consent. Restricted to senior FILM, FMST, or HUMN majors. Same as HUMN 4004 and ARTF 5004.

FILM 4024-3. Advanced Research Seminar. Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade. May be repeated up to 6 total credit hours. Prereq., FILM 1502. Recommended prereqs., FILM 3051, 3061. Same as ARTF 5024.

FILM 4604-3. Colloquium in Film Aesthetics. Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film. May be repeated up to 6 total credit hours. Restricted to juniors/seniors. Same as ARTF 5604.

FILM 4959 (3-6). Honors Senior Thesis. For exceptional Film Studies majors who wish to write an honors thesis based on independent research or creative work under the direction of a faculty member.

Graduate Film Courses

FILM 4200-3. Flow Visualization. Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and *schlieren*. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of grad, undergraduate, engineering majors and photography/video majors. Please see flowvis.colorado.edu. Prereq., MCEN 3021 or equivalent, or

significant imaging experience (photography/video). Same as ARTF 5200. Same as MCEN 4151/5151.

French and Italian

French

FREN 1010-5. Beginning French 1. For students with no previous knowledge of French. Presents basic grammar and most commonly used French vocabulary. Introduces students to Francophone culture. Credit not granted for this course and FREN 1050.

FREN 1020-5. Beginning French 2. Continuation of FREN 1010. Completes the presentation of most basic structures and French vocabulary. Prereq., successful completion of one semester of college-level French or two years of high school French. Credit not granted for this course and FREN 1050.

FREN 1050-5. Beginning French Review. Covers the material of FREN 1010 and 1020 in one accelerated semester. Intended for students who know some French (i.e., four to five semesters in high school) but do not have skills adequate for 2000-level courses. Credit not granted for this course and FREN 1010 or FREN 1020.

FREN 1200-3. Medieval Epic and Romance. Covers the most important works of medieval literature, in English translation. Among the texts studied are the Nibelungenlied, the *Song of Roland*, and Arthurian romances, including the stories of Lancelot and Guinevere and *Tristan and Isolde*. Offers a general introduction for nonmajors to medieval literature and society. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

FREN 1400-3. Medieval/Renaissance Women Writers in Italy and France. Introduces major literature through close readings of women's writings in their historical context. Offers a general introduction to women's status and roles in Italy and France. Taught in English. Same as ITAL 1400. Approved for arts and sciences core curriculum: human diversity.

FREN 1500-3. Literature and Politics in the Age of Enlightenment. Introduces political dimensions of 18th century French literature. Surveys political and social preoccupations that manifest themselves across genres (novels, scientific treatises, dialogues, erotic literature, etc.). Examines contributions made by 18th century French writers to the sociological and political imagination of Western tradition. Taught in English.

FREN 1610-3. How to Be French 1: The Ancien Regime. Explores medieval and early modern French culture in the widest sense, encompassing masterpieces of French literature, architecture, and visual art as a key to the habits, customs, and practices of everyday life. Major themes are "living and dying," "heroes, villains, and kings," "courtliness, civility, and the art of love," and "crafty little guys." Approved for arts and sciences core curriculum: literature and the arts.

FREN 1620-3. How to Be French 2: Modernity. Introduces students to French culture in its widest sense and in particular to reflect on major social and cultural contradictions inherited from the French Revolution, which still define "Frenchness" today. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

FREN 1700-3. Francophone Literature in Translation. Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and Canada. Gives special attention to oral tradition, identity, question, and cultural conflict. Taught in English.

FREN 1750-3. French Colonialism: North Africa and the Middle East. Offers a general introduction to French and Francophone literature and visual arts (painting, photography, film) from the nineteenth century to the present depicting cultures and societies of the Middle East and North Africa. In English with English translations of French texts. Approved for arts and sciences core curriculum: human diversity.

FREN 1800-3. Contemporary French Literature in Translation. Reviews the major philosophical, political, and aesthetic issues in the 20th century French novel and drama. Beginning with existentialist literature, discussion focuses subsequently on the Theatre of the Absurd, the new novel, World War II and the Holocaust, and recent women writers. Taught in English.

FREN 1900-3. Modern Paris in Literature, Photographs, Paintings, and Movies. Introduces the rise of modern Paris from the French Revolution (1789) to today. Studies the physical and sociological changes of the city in terms of architecture

and industrialization through French literature, movies, paintings and photographs. Addresses problems due to the magnitude of the city, the growing fear of urban vices, and the dilemma of controlling massive urban populations. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

FREN 2110-3. Second-Year French Grammar Review and Reading 1. A film based curriculum will expand the knowledge of francophone culture and will continue the development of communication skills begun in the first year. This third semester course will review essential beginning grammar before introducing intermediate structures, vocabulary, and cultural/literary readings. Prereqs., FREN 1020 or 1050 (min. grade C-) or equivalent. Meets MAPS requirement for foreign language. Satisfies arts and sciences foreign language requirement.

FREN 2120-3. Second-Year French Grammar Review and Reading 2. Completes the film-based study of intermediate grammar begun in FREN 2110. Continued reading in French literature and culture, with considerable practice in writing and speaking French. Prereq., FREN 2110 (min. grade C-). Fulfills the Graduate School language requirement for the PhD.

FREN 2500-3. Conversation in French. Puts into practice all that has been learned in the first four semesters of college French. Builds conversational skills and confidence through acquisition of new vocabulary and a review of grammar essential to discussing different aspects of French culture. All work is in French. Prereq., FREN 2120 or equivalent.

FREN 3010-3. French Phonetics and Pronunciation. Improves students' ability to pronounce French correctly. Coursework involves the International Phonetic Alphabet, understanding the differences between pairs of sounds, and recognizing the relationship between spelling and pronunciation. Required of all FREN majors. Prereq., FREN 2120 or equivalent.

FREN 3020-3. French Phonetics Through Musical Performance. Advanced oral practice and interpretation of a French musical. This course of applied and corrective phonetics concentrates on developing good pronunciation and fluency through song. The course culminates with a public presentation of the musical studied in class. Prereq., FREN 3010 or equivalent and instructor consent. Restricted to sophomores/juniors/seniors.

FREN 3050-3. French Composition 1. French third-year level composition course. Students practice and write different forms of formal French writing. They also hone their grammar skills and analytical reading of short literature pieces. Must be taken before FREN 3060. Required for French majors. Prereq., FREN 2120 or equivalent.

FREN 3060-3. French Composition 2. The second semester of a French third-year level composition course. Students build on their previous knowledge of formal writing in French and more emphasis is given to argumentative and analytical style of writing in FREN 3060. Prereq., FREN 3050 or equivalent. Required for French majors.

FREN 3100-3. Introduction to Critical Reading and Writing in French Literature. Study of French literature through close readings of representative examples of major literary forms (poetry, fiction, drama, essay) and through the composition of critical writings in French. Required for French majors. Prereq., FREN 3060.

FREN 3110-3. Main Currents of French Literature 1. Surveys French literature from the Middle Ages through the 18th century. Students are expected to acquire a fairly detailed knowledge of principal writers and schools of the periods covered. Required for majors. Prereq., FREN 3100. May be taken with FREN 3120. Restricted to sophomores/juniors/seniors.

FREN 3120-3. Main Currents of French Literature 2. Surveys 19th and 20th century French literature. Close reading of selected texts of the principal writers and schools. Required for majors. Prereq., FREN 3100. May be taken before, after, or with FREN 3110. Restricted to sophomores/juniors/seniors.

FREN 3200-3. Introduction to Literary Theory and Advanced Critical Analysis. Introduces important aspects of both classical and modern literary theory as an aid to reading and understanding literary texts. Covers theoretical works by figures ranging from Plato and Aristotle to modern French critics such as Barthes, Foucault, and Derrida in conjunction with selected literary works. Offers students more sophisticated means of understanding issues like gender, ethnicity, the roles of both author and reader in constructing meaning, the nature and functions of signs, and the relationship between literature and the larger society. Conducted in English, though French majors are required to read the texts in the original language. Required for students taking honors in French or Italian.

Prereq., FREN 3100 or instructor consent. Approved for arts and sciences core curriculum: literature and the arts.

FREN 3500-3. French Current Events: Conversation and Composition. For students who have spent fewer than four months in a French-speaking environment. Focuses on presentations, debates, discussions, readings, and written work. Prereq., FREN 3060 or equivalent.

FREN 3600-3. Business French 1. Gives students the tools needed to function in a French-speaking work environment. A culminating project involves creating a business in a francophone country. Prereq., FREN 2120 or equivalent.

FREN 3700-3. French-American Cultural Differences. Through readings, films, discussion, and activities, students learn the defining values of their own country, those of France, and key differences between the two cultures. Taught in French. Prereq., FREN 3060 or equivalent.

FREN 3800-3. France and the Muslim World. Introduces students to the polemic colonial, social, and cultural interactions of France and Islam. Close attention will be paid to paradigms of identities of one of the major European nations and the Islamic world. Readings and discussion topics for this course cover the social, cultural, and literary depictions of Islamic and French interactions, negotiations, and contradictions. Taught in English. Restricted to juniors and seniors. Cannot be used for French major or minor credit. Approved for arts and sciences core curriculum: human diversity.

NOTE: Prereqs. for the following courses (except FREN 4200) are FREN 3100, 3110, and 3120 or instructor consent.

FREN 4030-3. Advanced Oral Practice and Interpreting. Concentrates on developing (or preserving) speaking fluency, correct pronunciation, and a good working vocabulary. May be repeated once for credit. Prereq., FREN 3060 and/or 3500, or instructor consent.

FREN 4050-3. Business French 2. Explores case studies of French companies with an emphasis on vocabulary, communication skills, and the way cultural differences affect the international business environment. Prereq., FREN 3600 or instructor consent.

FREN 4110-3. French Special Topics. Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4120.

FREN 4120-3. French Special Topics. Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4110.

FREN 4170-3. Francophone Literature. Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and French Canada. Gives special attention to oral tradition, identity question, and cultural conflict. Prereqs., FREN 3100, 3110, and 3120, or instructor consent. Restricted to sophomores/juniors/seniors.

FREN 4200-3. Studies in Contemporary French Culture. Through a wide variety of texts and audio-visual documents, students learn the structures of contemporary French society and study the cultural phenomena of that society. Prereqs., FREN 3050 and 3060.

FREN 4250-3. Medieval and Renaissance Readings. Explores the complex and evolving cultural and historical contexts of medieval and Renaissance French. Introduces the masterpieces of French medieval and Renaissance literature, including the *Chanson de Roland* and Arthurian romance. Also focuses on the work of Marie de France, Guillaume de Lorris, and Jean de Meun, Christine de Pisan, Machaut, Villon, Louise Labe, and the poets of the Pliade, Rabelais, and Montaigne. Prereqs., FREN 3100, 3110, and 3120 or instructor consent.

FREN 4300-3. Theatre and Modernity in 17th Century France. Readings of plays by Corneille, Moliere, and Racine introduce students to theatre's role as a mirror of the multifarious tensions shaping modern Western experience. Taught in English with English translations. Approved for arts and sciences core curriculum: literature and the arts.

FREN 4330-3. Moliere and 17th Century French Comedy. Close readings of farces and comedies of Moliere in context with selected comedies by Corneille, Rotrou, and Cyrano de Bergerac and selected satires by Boileau and La Fontaine. Themes include comedy as a form of social criticism and the sociocultural significance of such episodes of Moliere's career as the scandalous quarrels of *L'école des Femmes* and *Tartuffe*. Prereqs., FREN 3100, 3110, and 3120 or instructor consent.

FREN 4350-3. French Enlightenment. Studies fiction, essays, theatre, and philosophical tales. Emphasizes the Enlightenment in France through the texts of its major representatives: Montesquieu, Voltaire, Marivaux, Diderot, and Rousseau. Prereqs., FREN 3100, 3110, and 3120, or instructor consent.

FREN 4360-3. Survey of 18th Century French Literature. Close readings of texts by Voltaire, Rousseau, Diderot, Marivaux, and Beaumarchais. Focuses on the evolution of literary genres and the influence of philosophy, politics, and social change on belles lettres. Prereqs., FREN 3100, 3110, and 3120, or instructor consent.

FREN 4430-3. Survey of 19th Century French Literature. Examines fiction, poetry, and theatre in 19th century France. Focuses on developing and changing literary styles and subject matter throughout the century in historical, philosophical, and social context. Prereqs., FREN 3100, 3110, and 3120, or instructor consent. Restricted to sophomores/juniors/seniors.

FREN 4470-3. 20th Century French Theatre and Poetry. Close readings of plays from the turn of the century to the contemporary period introduce the principal themes and techniques of modernist and postmodernist French theatre. Students are encouraged to consider problems commonly evoked by these texts, and to compare the positions that each text takes on such problems as the status and uses of language, the function and limits of the theatre, and the dialectic of appearance and reality. Prereqs., FREN 3100, 3110, and 3120, or instructor consent.

FREN 4480-3. 20th Century French Novel. Close readings of novels from the 1930s to the contemporary period introduce the principal themes and techniques of the modernist and postmodernist French novel. Students are encouraged to analyze a variety of questions commonly evoked in these texts, such as the problem of representation, the uses and abuses of writing, the relation of fiction and history, and the status of the subject in the world. Prereqs., FREN 3100, 3110, and 3120 or instructor consent.

FREN 4600-3. Topics in French Film. Covers various topics in the French and some other Francophone cinemas (Belgian, Swiss, Quebecois) from 1895 to the present. Focuses on periods, schools, themes, and directors from Melies to Duras, and the critical approaches by which they are studied. Varies from year to year. May be repeated up to 6 total credit hours on different topics. Prereqs., junior standing and 6 hours in French literature, other literature, or film studies.

FREN 4750-3. Methods of Teaching French and Professional Orientation. Presents current methodology and techniques for teaching foreign language for proficiency. Areas of study include ACTFL guidelines, National Standards, assessment, classroom activities, curriculum, and syllabus design. Prereqs., FREN 3100, 3110 or 3120, an additional course above FREN 3060, and admission to the teacher certification program or instructor consent. Restricted to juniors/seniors.

FREN 4800-3. Postmodernist French Novel in Translation. Focuses upon recent innovations in the French novel, and upon the postmodernist literary aesthetic. Students will examine a variety of avant-garde novels, and analyze the kinds of literary experimentation that those novels propose. They will be asked to consider a series of questions concerning the changing nature of literary representation and the status of the novel as a cultural form. Taught in English. Restricted to juniors/seniors. Cannot be used for major or minor credit.

FREN 4840 (1-6). Independent Study: Language. Upon consultation only and at the undergraduate level. May be repeated up to 7 total credit hours.

FREN 4860-3. War, Trauma, and Memory: Amnesias, Revisions, and Representations of Traumatic History. Attempts to investigate how extreme historical events (war, genocides, terror attacks) function as "trauma" and how these extreme events are dealt with by personal and collective memory in historical narratives, literary and cinematic fiction, and memorials. Amnesia and other types of historical negations or revisions will be analyzed, along with representations of trauma and the difficulties raised by this memorializing. Taught in English. Restricted to juniors/seniors. Cannot be used for major or minor credit. Approved for arts and sciences core curriculum: ideals and values.

FREN 4960-6. High School French Teaching. Offered as part of the supervised student teaching in a secondary school required for state certification to teach French. These hours do not count toward student hours in the major nor in the maximum departmental hours allowed. Prereq., FREN 4750 or 5770 and admission to the secondary teaching education program. Coreq., EDUC 4712. Restricted to sophomores, juniors, and seniors. Pass/fail only.

FREN 4980-3. French Senior Honors Thesis. The senior honor thesis is a 40 to 45 page original research paper, written in French, and constitutes a require-

ment for graduating with departmental honors. Prereq., all third-year course requirements including FREN 3200. Recommended prereq., at least one course numbered FREN 4100 or above.

FREN 4990-3. Senior Seminar. Preparation of a 15-page research paper in French presented to two members of the department faculty and defended orally in class. Prereq., all third-year requirements and advisor consent. Recommended prereq., at least one course numbered FREN 4100 or above.

FREN 5110-3. French Special Topics. Different topics are offered and, in a number of cases, cross-listed with other departments. Prereq., graduate standing or instructor consent. May be repeated up to 6 total credit hours on different topics.

FREN 5120-3. French Special Topics. Different topics are offered and, in a number of cases, cross-listed with other departments. Prereq., graduate standing or instructor consent. May be repeated up to 6 total credit hours on different topics.

FREN 5170-3. Francophone African Literature. Prereq., graduate standing or instructor consent.

FREN 5250-3. Medieval and Renaissance Readings. Through close readings of masterpieces of French medieval and Renaissance literature in conjunction with contemporary criticism and theory, explores the contexts of medieval and Renaissance France. Readings in French. May be taught in English to accommodate students in other programs. May be repeated up to 12 total credit hours on different topics. Prereq., graduate standing or instructor consent.

FREN 5310-3. 17th Century French Tragedy and Poetry. Close readings of tragedies by (among others) Corneille and Racine, placed in the context of baroque and neoclassical political and artistic culture as illustrated by philosophy, painting, and science. Drawing on recent criticism and theory, explores heroic drama's role as a symptom and agent of early modern French social and intellectual history. Readings in French, but may be taught in English. Prereq., graduate standing or instructor consent.

FREN 5320-3. 17th Century French Prose. Close readings of major works by, e.g., Descartes, Pascal, La Fayette, La Rochefoucauld, and La Bruyere. Themes include 17th century theories of self, early modern epistemology, notions of honor and the critical analysis of human motives and behavior, the emerging novel, and the critique of heroic idealism and of the monarchic absolutism of the Sun King, Louis XIV. Readings in French, but may be taught in English. Prereq., graduate standing or instructor consent.

FREN 5330-3. Moliere and 17th Century French Comedy. Close readings of the comedies in context with the works of, e.g., Corneille, Rotrou, Cyrano, Boileau, and La Fontaine. Themes include Moliere and the institution of literary authorship, comedy's role as social critique, the deconstruction of the early modern subject, and the cultural politics of the scandals surrounding L'ecole des femmes and Tartuffe. Readings in French, but may be taught in English. Prereq., graduate standing or instructor consent.

FREN 5350-3. French Enlightenment. Focuses on the uses of literature to address the revolutionary philosophical, scientific, religious, and/or sociopolitical questions of the day. Explores Diderot and d'Alembert's *Encyclopedie*, Voltaire and Diderot's philosophical tales and dialogues, Rousseau's *Discours*, and other writings. Discusses the development of specific literary forms to promote the ideas and goals of the philosophers to reach a changing and diverse readership and to fight censorship. Prereq., graduate standing or instructor consent.

FREN 5360-3. 18th Century French Literature. Focuses on the study of a specific literary genre (e.g., theatre, the novel) or on the global production of a major author (e.g., Voltaire, Diderot, Rousseau). Discussion stresses both the uniqueness of the genre/writer and their significance as representatives of the century's changing society and culture. May be repeated up to 6 total credit hours during a student's graduate career. Prereq., graduate standing or instructor consent.

FREN 5420-3. 19th Century French Literature. A survey of principal works and movements, intended as an introductory course. Prereq., graduate standing or instructor consent.

FREN 5430-3. Topics in 19th Century French Prose, Poetry, and Theatre. Topics vary. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

FREN 5440-3. Literary Ludics. Taught in French and English. Focuses on literary structures proposed by author to reader as games. Considers critical texts, both

practical and theoretical, with a view toward defining the relation between criticism and its objects. Prereq., graduate standing or instructor consent.

FREN 5470-3. 20th Century French Theatre and Poetry. Prereq., graduate standing or instructor consent.

FREN 5770-2. College Foreign Language Teaching. Required for teaching assistants and graduate part-time instructors. Prereq., graduate standing or instructor consent.

FREN 6840 (1-3). Independent Study. May be repeated up to 3 total credit hours, except with permission of the director of graduate studies. Prereq., graduate standing or instructor consent.

FREN 8990 (1-10). Doctoral Dissertation. All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Italian

ITAL 1010-5. Beginning Italian 1. The four skills of listening, speaking, reading, and writing are progressively developed in a predominantly oral presentation. Grammatical concepts are explained and practiced through dialogues, written exercises, and conversations. The cultural focus is on the personal world and life of students.

ITAL 1020-5. Beginning Italian 2. Continuation of ITAL 1010, with more difficult grammatical concepts explored. The cultural focus shifts to social and civic areas. Prereq., ITAL 1010 (min. grade C-).

ITAL 1400-3. Medieval/Renaissance Women Writers in Italy and France. Introduces major literature through close readings of women's writings in their historical context. Offers a general introduction to women's status and roles in Italy and France. Taught in English. Same as FREN 1400. Approved for arts and sciences core curriculum: human diversity.

ITAL 1500-3. That's Amore: Introduction to Italian Culture. Introduces students to representations of Italian society that have persisted through the ages. The course readings allow students to better understand how certain stereotypes about Italian society (e.g., Latin lover, Mafia) were born and persist in the present. Restricted to freshmen and sophomores. Approved for arts and sciences core curriculum: contemporary societies. Taught in English.

ITAL 1600-3. Strategies of Fear: Introduction to Italian Fantastic Literature. Traces the development of the fantastic theme in Italian Literature from its origins (late nineteenth century) to contemporary times. Analyzes the modes of reception and appropriation of non-Italian gothic and fantastic narrative traditions through which Italian writers have subverted the national literary model proposed by realist narrative. Approved for arts and sciences core curriculum: literature and the arts. Taught in English.

ITAL 2110-3. Intermediate Italian Reading, Grammar, and Composition 1. Enhances the skills learned in the first-year course and develops greater fluency in understanding and speaking. More emphasis is placed on reading and writing through the use of activities featuring cultural themes that present a realistic portrait of contemporary Italy. Taught in Italian. Prereq., ITAL 1020 (min. grade C-). Meets MAPS requirement for foreign language.

ITAL 2120-3. Intermediate Italian Reading, Grammar, and Composition 2. Continuation of ITAL 2110. Some reading in Italian literature and culture with considerable practice in writing and speaking Italian. Fulfills the Graduate School language requirement for the PhD. Prereq., ITAL 2110 (min. grade C-) or equivalent.

ITAL 2130-3. Introduction to Literary Analysis. Increases student's ability to read and analyze literary texts by improving vocabulary and terminology. Students read short stories, essays, short plays, and poems to acquire critical skills and improve expression of opinions and arguments in Italian. Taught in Italian. Prereq or coreq., ITAL 2120 (min. grade C-) or instructor consent required.

ITAL 3010-3. Advanced Composition and Conversation 1. Builds vocabulary and fluency in spoken Italian, and competence and confidence in correct and more sophisticated written Italian. Exercises and themes are drawn primarily from current events and politics (e.g., print and broadcast news) and contemporary culture (e.g., magazines, films, and video). Prereq., ITAL 2120 (min. grade C-) or instructor consent.

ITAL 3020-3. Advanced Composition and Conversation 2. Improves vocabulary and fluency in spoken Italian, and competence and confidence in correct and more sophisticated written Italian. Exercises and themes are drawn primarily from Italian cultural history. Prereq., ITAL 3010 (min. grade C-) or instructor consent.

ITAL 3030-3. Storia dell'arte: Advanced Composition/Conversation 3. Improves vocabulary and fluency in spoken Italian, and competence and confidence in correct and more sophisticated written Italian through the study of the history of Italian art. Exercises and themes focus on Italian Classical, Medieval, Renaissance, and Modern Art. Prereq., ITAL 2130 or 3010 (min. grade C-). Instructor consent is required.

ITAL 3040-3. Italian Conversation through Cinema. Taught in Italian, the course covers various topics of Italian Cinema from WW II to the present. Focus is on periods, genres, themes, and auteur/directors. Emphasis on review of language structures previously learned and acquisition of new vocabulary to enable students to discuss different aspects of Italian culture, in Italian. Prereq., ITAL 2120 (min. grade C-) or equivalent. Instructor consent is required.

ITAL 3140-3. Readings in Italian Literature: 20th Century. Covers a selected reading of major texts, prose, and poetry of 20th century literature. Emphasizes critical reading and analysis of modern and contemporary Italian literature in its literary and historical context. Taught in Italian. Prereq., ITAL 2130 (min. grade of C-), or instructor consent.

ITAL 3150-3. Readings in Italian Literature: 19th Century. Introduces students to 19th century literary history through a selected reading of major texts, prose, and poetry. Emphasizes critical reading and analysis of Italian literature in its literary and historical context. Taught in Italian. Prereq., ITAL 2130 (min. grade C-), or instructor consent.

ITAL 3160-3. Readings in Italian Literature: Medieval and Renaissance. Covers a selected reading of major texts, prose, and poetry of Medieval and Renaissance literature. Emphasizes critical reading and analysis of texts in their literary and historical context. Taught in Italian. Prereq., ITAL 2130 (min. grade C-) or instructor consent required.

ITAL 4010-3. Problems in Translation, Advanced Grammar, and Stylistics 1. Emphasizes practice in translating varying types of prose from Italian into English and English into Italian. Prereq., ITAL 2130 or 3010 (min. grade C-).

ITAL 4030-3. Contemporary Italian Culture, Politics, and the Media. Serves as an introduction to the study of the effect that politics and the media have in shaping Italian culture. Makes use of the World Wide Web for instruction. Taught in Italian. Familiarity with Internet helpful. Prereq., ITAL 2130 or 3010 (min. grade C-) or instructor consent.

ITAL 4040-3. Business Italian Style. Provides an introduction to the Italian way of conducting business, with a close view on the company and its world through learning marketing and producing a real company project for the market. Analyzes topics of international marketing and trade using Italian and American economics websites. Focuses on building cross-cultural bridges between the U.S. and Italy to have smoother business relationships and enable students to participate more easily in joint international working teams. Prereq., ITAL 3010 (min. grade C-) or instructor consent required.

ITAL 4140-3. The Age of Dante: Readings from *The Divine Comedy*. Focuses on close reading of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in English. Prereq., junior standing or instructor consent. Same as HUMN 4140. Credit not granted for this course and ITAL 4145 or 4147. Approved for arts and sciences core curriculum: literature and the arts.

ITAL 4145-3. The Age of Dante in Italian. Focuses on close readings of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in Italian. Prereq., ITAL 2130. Credit not granted for this course and ITAL 4140, HUMN 4140, or ITAL 4147. Approved for arts and sciences core curriculum: literature and the arts.

ITAL 4147-3. Visualizing Dante's *Inferno*: A Global Seminar in Florence Italy. Focuses on close reading of Dante's *Inferno*. Examines the specific sites and art in Florence and nearby cities that Dante references in the *Inferno*, as well as visual representations of Hell created both before and after Dante's poem. Taught in English. Offered through the CU Study Abroad Program. Credit not granted for

this course and HUMN/ITAL 4140 or ITAL 4145. Approved for arts and sciences core curriculum: literature and the arts.

ITAL 4150-3. *The Decameron* and the Age of Realism. Analyzes the rise of realism in the 13th and 14th century Italian literature and parallel manifestations in the visual arts. Focuses on Boccaccio's *Decameron* and contemporary realistic prose and poetry with emphasis on gender issues and medieval cultural diversity. Taught in English. Prereq., junior standing or instructor consent. Same as HUMN 4150. Approved for arts and sciences core curriculum: literature and the arts or human diversity.

ITAL 4160 (3-5). Italian Literature Special Topics. Topics vary each semester. Consult the online Schedule Planner for specific topics. May be repeated up to 8 total credit hours for different topics.

ITAL 4170-3. Italian Literature Special Topics. Topics vary each semester. Consult the online Schedule Planner for specific topics. May be repeated up to 6 total credit hours on different topics.

ITAL 4200-3. Topics in Italian Culture and Civilization from the Origins through the Renaissance. Taught in English. Topics vary. May be repeated up to 6 total credit hours on different topics.

ITAL 4250-3. History of Italy. Survey of political, social, and intellectual history of Italy and its people. Taught in English. Same as HIST 4313.

ITAL 4280-3. Topics in Italian Cinema. Examines different aspects of Italian cinema from the origins of neorealism to the present. May focus on a particular director, the culture of a specific period, or certain themes (e.g., the representation of women, the relationship between cinema and literature, or socio-aesthetic movements like Futurism or Fascism). Taught in English. May be repeated up to 6 total credit hours on different topics.

ITAL 4290-3. Italian Culture Through Cinema. Examines the representations of Italian culture through its cinema. Focusing especially on post-World War II cinema, we will examine how Italian filmmakers have portrayed Italian history and specific aspects of its culture (i.e., Fascism, post-war reconstruction, the Mafia, patriarchy) in the past fifty years. Approved for arts and sciences core curriculum: contemporary societies. Taught in English.

ITAL 4300-3. Multiculturalism in Italy. Focuses on multiculturalism and difference in contemporary Italian society. The readings assigned for this course explore the experience and co-existence of ethnic and religious minorities in Italy. Students will study how specific minorities live in a major Western-European country and will investigate the connotations that the concept of multiculturalism takes in the Italian context. Approved for arts and sciences core curriculum: human diversity.

ITAL 4600-3. Once Upon a Time in Italy. Examines the evolution of the Italian fairy tale from the 1500s to the 2000s in literature, theater, and film. Considers the tales and their authors in their social-historical context. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: literature and the arts.

ITAL 4730-3. Italian Feminisms: Culture, Theory, and Narratives of Difference. Studies Italian women writers, artists, and filmmakers. Literary and visual texts are analyzed in dialogue with readings of leading Italian gender theorists. Italian history and culture is reread by following the development of a discourse about women. Taught in English; readings in Italian for Italian majors. Same as HUMN 4730. Approved for arts and sciences core curriculum: human diversity.

ITAL 4840 (1-3). Independent Study. May be repeated up to 7 total credit hours.

ITAL 4930 (1-3). Languages Internship for Professions. Offers opportunities to use Italian skills in service to various sectors of the community, including private industry, government, and education. Prereq., ITAL 2120 (min. grade C-) or instructor consent.

ITAL 4980-3. Italian Senior Honors Thesis. The senior honors thesis is a 40 to 45 page original research paper, written in Italian, and constitutes a requirement for graduating with departmental honors. Prereqs., all third-year course requirements including FREN 3200. Recommended prereq., at least one course numbered ITAL 4100 or above.

ITAL 4990-3. Senior Seminar. Preparation of a 15-page research paper in Italian presented to two members of the faculty and defended orally in class. Prereq., advisor consent. Recommended prereq., at least one course numbered ITAL 4100 or above.

Geography

Physical Geography

GEOG 1001-4. Environmental Systems 1: Climate and Vegetation. M/Lect. and lab. Introduces the atmospheric environment of the Earth: elements and controls of climate and their implications for hydrology, vegetation, and soils. Emphasizes distribution of physical features across the Earth's surface and interactions between humans and their environment, especially those leading to global change on the decade to century time scale. Meets MAPS requirement for natural science: nonlab or lab. Approved for arts and sciences core curriculum: natural science.

GEOG 1011-4. Environmental Systems 2: Landscapes and Water. M/Lect. and lab. Introduces landscapes and flowing water, emphasizing the formation and geographic distribution of mountains, volcanoes, valleys, and deserts, and their shaping by rivers and glaciers. Includes field trips. Meets MAPS requirement for natural science: nonlab or lab. Approved for arts and sciences core curriculum: natural science.

GEOG 3251-3. Mountain Geography. Surveys mountain environments and their human use with illustrations from temperate and tropical mountain areas.

GEOG 3301-3. Analysis of Climate and Weather Observations. Prereqs., ATOC 1050 and 1060, or GEOG 3601/ATOC 3600/ENVS 3600, or GEOG 1001 and 1-semester calculus. Same as ATOC 3300. Approved for arts and sciences core curriculum: natural science.

GEOG 3351-3. Biogeography. Surveys and analyzes plant and animal distributions on a world scale from ecological and historical perspectives. Emphasizes human impact on species. Prereq., GEOG 1001.

GEOG 3511-4. Introduction to Hydrology. Examines hydrologic processes in the surface environment, emphasizing the environment of the western United States. Emphasizes natural processes and their management to augment water resources. Prereq., GEOG 1001 and 1011. Restricted to junior and senior geography and environmental studies majors. Approved for arts and sciences core curriculum: natural science.

GEOG 3601-3. Principles of Climate. Describes the basic components of the climate system: the atmosphere, ocean, cryosphere, and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system, including the hydrological cycle and its role in climate, climate stability, and global change. Covers forecasting climate, its applications, and human dimensions. Prereqs., ATOC 1050 and 1060, or GEOG 3301/ATOC 3300, or GEOG 1001 and 1-semester calculus. Same as ATOC/ENVS 3600. Approved for arts and sciences core curriculum: natural science.

GEOG 4201-3. Biometeorology. Interdisciplinary science, studying the interactions between atmospheric processes and living organisms (plants, animals, and humans). Discusses how organisms adapt to a changing environment. Uses a practical, problem-solving approach to explore these interactions. Prereq., GEOG 1001. Same as ENVS 4201.

GEOG 4241-4. Principles of Geomorphology. Studies weathering, mass-wasting, fluvial, wind, and marine processes and the resulting landforms. Prereq., GEOG 1011 or any 1000-level sequence in geological sciences. Restricted to junior/senior GEOG/GEOL/ENVS majors. Same as GEOL 4241. Approved for arts and sciences core curriculum: natural science.

GEOG 4251-4. Fluvial Geomorphology. Emphasizes landscapes formed by running water. Includes basic fluid mechanics, sediment transport, hillslope and channel erosion, and sediment yield. Prereqs., GEOG 1011 and 3511. Recommended prereq., GEOG 3023. Same as GEOG 5251.

GEOG 4261-3. Glaciers and Permafrost. Surveys the major terrestrial components of the cryosphere, including permafrost, glaciers, and ice sheets. Emphasizes physical processes involving ice, including thermal behavior, ice deformation, and mass balance, but also considers biogeochemical processes and landforms associated with ice. The climate context, including human interactions and recent climate history, will be considered. The course will be taught in a combination lecture-seminar format. Prereq., GEOG 1011 or GEOL 1010. Recommended prereq., GEOG 4241.

GEOG 4271-3. The Arctic Climate System. Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the

intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic. Prereq., GEOG 1001. Same as GEOG 5271.

GEOG 4291 (3-4). Mountain Geomorphology. Provides a field course emphasizing the study of landforms produced by weathering and soils, mass movement, and erosional processes under all climatic and altitudinal conditions. Call for schedule of offerings. May be offered during the summer at the Mountain Research Station. Prereqs., a college course in physical geology or geography and instructor consent. Same as GEOG 5291.

GEOG 4311-3. Watershed Biogeochemistry. Emphasizes terrestrial-aquatic linkages in headwater catchments, focusing on hydrologic pathways, isotopic and geochemical tracers, nutrient cycling, water quality, experimental manipulations, and modeling. Prereq., GEOG 1011 and 3511. Recommended prereq., parametric statistics.

GEOG 4321 (3-4). Snow Hydrology. Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS, and quantitative methods. Prereqs., GEOG 1001 or 1011, and any statistics course. Same as GEOG 5321.

GEOG 4331 (3-4). Mountain Climatology. Surveys and analyzes climatic characteristics of mountain environments worldwide. Prereq., GEOG 1001 or ATOC 1050 or 1060. Same as GEOG 5331.

GEOG 4371-3. Forest Geography: Principles and Dynamics. Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems. Prereq., GEOG 1001. Same as GEOG 5371.

GEOG 4401-3. Soils Geography. Discusses chemical and physical properties of soils, soil development, distributions, and management relevant to understanding plant-soil relationships in natural and human-altered landscapes. Prereq., GEOG 1011. Recommended prereq., inorganic chemistry. Same as GEOG 5401.

GEOG 4411-3. Methods of Soil Analysis. Applies methods of soil sampling and laboratory analysis toward an understanding of the relationships between soils, the environment, and landscape impacts. Field trips explore field observation and sampling techniques. Laboratory analyses determine soil physical and chemical properties. Prereq., GEOG 1001 or 1011; prereq./coreq., GEOG 4401/5401. Same as GEOG 5411.

GEOG 4501-3. Water Resources and Water Management of Western United States. Interprets and analyzes hydroclimatic data, surface, and groundwater. Critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution, and regional development. Same as GEOG 5501.

GEOG 5161-3. Research Design in Geography. The human section reads and discusses contemporary research philosophies and methodologies in human geography. Practices the development of research proposals and presentation of research ideas and results. The physical section reads and discusses contemporary research philosophies and methodologies in physical geography (climatology, geomorphology, biogeography, and soils geography). Practices the development of research proposals and presentation of research ideas. Restricted to geography graduate students.

GEOG 5211-3. Seminar: Physical Climatology. Involves a research seminar concerned with problems of mass and energy exchange in the Earth-atmosphere system. Selects topics from such areas as air quality, bioclimatology, hydrology, climate change, and the climates of urban, agricultural, and natural environments. Restricted to graduate students.

GEOG 5221-3. Synoptic and Dynamic Climatology. Examines global climates from the standpoint of synoptic and dynamic climatology. Prereqs., GEOG 3201 or equivalent, 3000-level course in climate/atmospheric sciences, and instructor consent. Restricted to graduate students.

GEOG 5241 (1-3). Topics in Physical Geography. Presents recent research topics that vary from year to year. Consult the online Schedule Planner for specific topics. May be repeated up to 6 total credit hours. Restricted to graduate students.

GEOG 5251-4. Fluvial Geomorphology. Restricted to graduate students. Same as GEOG 4251.

GEOG 5271-3. The Arctic Climate System. Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic. Prereq., GEOG 1001. Same as GEOG 4271.

GEOG 5291 (3-4). Mountain Geomorphology. Same as GEOG 4291.

GEOG 5321 (3-4). Snow Hydrology. Restricted to graduate students. Same as GEOG 4321.

GEOG 5371-3. Forest Geography: Principles and Dynamics. Restricted to graduate students. Same as GEOG 4371.

GEOG 5391-3. Seminar: Biogeography. Considers in detail current research themes in biogeography. Includes intensive reading of current research literature and preparation of research papers. Restricted to graduate students. Topics vary; may be taken twice.

GEOG 5401-3. Soils Geography. Restricted to graduate students. Same as GEOG 4401.

GEOG 5411-3. Methods of Soil Analysis. Restricted to graduate students. Same as GEOG 4411.

GEOG 5501-3. Water Resources and Water Management of Western United States. Restricted to graduate students. Same as GEOG 4501.

GEOG 5961-3. Theories of Climate and Climate Variability. Critically reviews current theories of climatic variability based on analysis of the different physical processes affecting climate. Restricted to graduate students. Same as ATOC 5960.

GEOG 6181 (1-4). Special Topics. Highlights current problems in geography, particularly physical and environmental geography. Topics vary with instructor. Restricted to graduate students. May be repeated up to 6 total credit hours.

GEOG 6211 (1-3). Readings in Climatology. Discusses selected topics in current climatological literature. Specific themes vary. Restricted to graduate students. May be repeated up to 7 total credit hours.

GEOG 6241 (1-3). Seminar in Hydrology and Geomorphology. Emphasizes process-oriented research in hydrology and geomorphology. Sample topics include river mechanics, snow hydrology, and periglacial processes. Consult the online Schedule Planner for specific topics. May be repeated up to 6 total credit hours. Restricted to graduate students. Same as GEOL 6241.

Human and Cultural Geography

GEOG 1982-3. World Regional Geography. Involves an intellectual journey around the globe, stopping at major regions to study the people, their environments, and how they interact. Topics include the political/economic tensions in changing Europe, conflicts in Brazilian rain forests, transitions facing African peoples, and rapid changes in China. Meets MAPS requirement for social science: geography.

GEOG 1992-3. Human Geographies. Examines social, political, economic, and cultural processes creating the geographical worlds in which we live, and how these spatial relationships shape our everyday lives. Studies urban growth, geopolitics, agricultural development and change, economic growth and decline, population dynamics, and migration exploring both how these processes work at global scale as well as shape geographies of particular places. Meets MAPS requirement for social science: geography.

GEOG 2002-3. Geographies of Global Change. Familiarizes students with spatial and ecological perspectives on economic, political, social, cultural, and environmental changes. Examines roles of transnational corporations, global media, world cities, food security, labor, migration, human rights, ethnicity, nationalism, resources, environmental degradation, and sustainable development in global change. Meets MAPS requirement for social science: geography.

GEOG 2412-3. Environment and Culture. Examines nature-culture interactions and the effects of development and resource use on environmental quality, as well as practical efforts to manage and protect the environment. Meets MAPS requirement for social science: geography.

GEOG 3402-3. Natural Hazards. Explores the impacts of extreme geophysical events on human society. Emphasizes adaptations to extreme events and ways of reducing vulnerability and damage.

GEOG 3412-3. Conservation Practice and Resource Management. Studies inventory, policy, and management of natural resources. Emphasizes practical approaches to the conservation and management of soil, land, water, and air resources. Restricted to geography and environmental studies majors.

GEOG 3422-3. Conservation Thought. Lect. and rec. Provides an historical survey of human consumption of earthly materials; environmental and global considerations of population growth, cultural attitude, and technological development; and diverse goals and philosophy of conservation movements in time and place.

GEOG 3612-3. Geography of American Cities. Introduces geography of American cities. Includes demographic and ideological contexts of urban development, emergence of the city system, location theory and rent models, and urban-economic problems.

GEOG 3662-3. Economic Geography. Presents several theories of location of economic activity: general theory of land use, agricultural location theory, plant location theory, central place theory, location of systems of cities, and geographical organization of industries. Studies aggregate geographical structure of regions as the geography of three major markets: labor, product, and capital, including the banking system. Explores the economic growth of regions and policies designed to influence regional growth and welfare.

GEOG 3672-3. Gender and the Global Economy. Examines the role of gender in global economy. Explores the impacts of colonialism and modern global economy on gender relations, with particular emphasis on third world societies. Also focuses on related issues of population politics, environmental crisis, women's sexual exploitation, and women's social movements worldwide. Prereqs., GEOG 1982, 1992, 2002, 2412, WMST 2000 or 2050. Same as WMST 3672. Approved for arts and sciences core curriculum: human diversity.

GEOG 3682-3. Geography of International Development. Compares and contrasts global characteristics and processes of development, emphasizing the developing countries of the world. Integrates theories of development, specific development topics, and case studies to explore the problems of development. Recommended prereqs., GEOG 1982, 1992, 2002, or 2412.

GEOG 3742-3. Place, Power, and Contemporary Culture. Presents a radical reexamination of the geography of culture. Examines the relationship between places, power, and the dynamics of culture. Explores how the globalization of economics, politics, and culture shapes local cultural change. Looks at how place-based cultural politics both assist and resist processes of globalization. Recommended prereq., GEOG 1982, 1992, or 2002. Approved for arts and sciences core curriculum: contemporary societies.

GEOG 3812-3. Mexico, Central America, and the Caribbean. Introduces the geography of Latin America, focusing on the lands and peoples of Mexico, Central America, and the Caribbean. Examines regional and national culture, history, environment, and population, as well as ongoing environmental and socioeconomic changes. Recommended prereqs., GEOG 1982, 1992, 2002, or 2412.

GEOG 3822-3. Geography of China. Surveys the world's most populous country, examining physical and historical geography, urbanization and regional development, agriculture, population, energy, and the environment. Seeks to situate China's development in a broader Asian and global context. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412. Approved for arts and sciences core curriculum: human diversity.

GEOG 3862-3. Geography of Africa. Studies physical and cultural regions of Africa. Analyzes and compares natural and cultural regions and the development of present nation-states. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412.

GEOG 4292-3. Migration, Immigrant Adaptation, and Development. Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society. Recommended prereqs., GEOG 1982, 1992, 2002, or 2412. Same as GEOG 5292 and ECON 4292.

GEOG 4622-3. City Life. Analyzes social, behavioral, political, and demographic factors that influence development and maintenance of communities in contem-

porary urban environments, with primary emphasis on U.S. cities. Recommended prereqs., GEOG 1982, 1992, 2002, or 2412. Same as GEOG 5622.

GEOG 4632-3. Development Geography. Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies. Prereqs. for GEOG 4632 are GEOG 1982, 1992, 2002, or 2412. Recommended prereq., GEOG 3682. Same as GEOG 5632.

GEOG 4712-3. Political Geography. Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts. Recommended prereqs., GEOG 1982, 1992, 2002, 2412, IAFS 1000, PSCI 2012 or 2223. Restricted to GEOG, IAFS, ENVS, junior/senior majors. Same as GEOG 5712.

GEOG 4722-3. Field Methods in Human Geography. Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; and discussion of the politics, ethics and gender, race, class, and cross-cultural issues related to field work. Prereqs., 15 credit hours in human geography. Same as GEOG 5722.

GEOG 4732-3. Population Geography. Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution, and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412. Same as GEOG 5732.

GEOG 4742-3. Environments and Peoples. Studies the interaction of people and the environment, including human adaptation and modification of environments, cultural interpretation and construction of landscapes, and natural resources and land management. May be taken twice. Topics vary. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412. Restricted to juniors/seniors.

GEOG 4812-3. Environment and Development in South America. Presents theoretical approaches to the links between environment and development in Latin America and focuses on analytical discussion of contemporary (and controversial) issues in sustainable development in South America. Examines social, ecological, economic, and political forces influencing the use of natural resources. Recommended prereqs., GEOG 1982, 1992, 2002, 3812, 3422, ANTH 3110, or PSCI 3032.

GEOG 4822-3. Environment and Development in China. Examines key environmental problems in relation to China's rapid modernization and development. Recommended prereqs., GEOG 1982, 1992, 2002 or HIST 1608.

GEOG 4832-3. Geography of Tibet. Rigorously examines contemporary Tibetan society, culture, and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity, and environmentalism. Prereqs., GEOG 3822 or other classes on China. Same as GEOG 5832.

GEOG 4852-3. Health and Medical Geography. Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Recommended prereqs., GEOG 1001 or 1011, and GEOG 1992, 2002 or 2412. Restricted to juniors/seniors. Same as GEOG 5852.

GEOG 4892-3. Geography of Western Europe. Provides a regional survey of cultural, political, economic, social, and physical geography of Western Europe, emphasizing the distinctive character and problems of each major area and the relationship of the region to the world. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412.

GEOG 5152-3. History and Theory of Geography. History of ideas and institutions that have shaped contemporary geographic inquiry. Examines the evolving relations among human geography, physical geography, environment-society relations, and geographic information processing. Designed to situate graduate student research within major subfields and intellectual currents of geography. Restricted to graduate students.

GEOG 5292-3. Migration, Immigrant Adaptation, and Development. Restricted to graduate students. Same as GEOG 4292 and ECON 4292.

GEOG 5332-3. Globalization and Democratization: An Introduction. Introduces research on globalization and democratization from an interdisciplinary perspective. Examines ongoing interdisciplinary research on the global political economy. Students learn about ongoing research, critique current efforts, and design their own research project. Prereq., graduate standing in PSCI, ECON, GEOG, or SOCY. Same as PSCI 7333, SOCY 6031, and ECON 8333.

GEOG 5622-3. City Life. Restricted to graduate students. Same as GEOG 4622.

GEOG 5632-3. Development Geography. Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies. Prereqs. for GEOG 4632 are GEOG 1982, 1992, 2002 or 2412. Recommended prereq., GEOG 3682. Same as GEOG 4632.

GEOG 5642-3. Seminar: Urban Geography. Restricted to graduate students. Surveys current research topics in urban geography. Emphasizes definition of possible student thesis topics.

GEOG 5712-3. Political Geography. Restricted to graduate students. Same as GEOG 4712.

GEOG 5722-3. Field Methods in Human Geography. Restricted to graduate students. Same as GEOG 4722.

GEOG 5732-3. Population Geography. Restricted to graduate students. Same as GEOG 4732.

GEOG 5762-3. Sustainable Development: Theory and Classic Issues. Provides an assessment of sustainable development primarily as it relates to the Third World. Follows a sequence from development theory through facts, approaches, and goals. Investigates specific topical problems and closes with analyses of case studies. Restricted to graduate students.

GEOG 5772-3. Sustainable Development: Institutions and Policy. Investigates the links between social theory, development practice, and policy. Restricted to graduate students.

GEOG 5782-3. Sustainable Development: Critique. Investigates historical and contemporary theories and critiques of development and their implications for geographic theory and method. Focuses on the role of representation in evaluating case studies and examining the potential for a sustainable development. Prereq., graduate standing. Recommended prereq., GEOG 5762.

GEOG 5832-3. Geography of Tibet. Same as GEOG 4832.

GEOG 5852-3. Health and Medical Geography. Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Recommended prereqs., GEOG 1001 or 1011, and GEOG 1992, 2002 or 2412. Restricted to juniors/seniors. Same as GEOG 4852.

GEOG 6402-3. Seminar: Comparative Environmental Studies. Critically examines cross-cultural experience with adjustments to natural hazards and political management of resource exploitation. Restricted to graduate students. May be repeated up to 7 total credit hours.

GEOG 6712-3. Seminar: Political Geography. Considers in detail history and methodology of the field, including an analysis of selected systematic topics such as frontiers and boundaries, international rivers, conflicting claims to territory, and electoral geography. Restricted to graduate students. May be repeated up to 7 total credit hours.

GEOG 6732-3. Formal Population Geography: Analysis and Forecasting. An in-depth introduction to formal Demography. In addition to learning the basic demographic tools used nowadays in fertility, marriage, mortality, migration, and forecasting/projections, it also looks at some potential links between formal and statistical demographic work that would enable the student to apply some of the methods learnt in an econometric or multivariate setting. Prereqs., GEOG 4023/5023 or equivalent. Restricted to graduate students.

GEOG 6742-3. Seminar: Cultural Geography. Explores various geographic topics emphasizing the concept of culture. Emergence of several points of view in the development of cultural geography. Restricted to graduate students. May be repeated up to 7 total credit hours.

GEOG 6752-3. Space, Place, and Gender. Examines current research literature on gender, feminism, and geography. Begins with discussion of feminist geographic theory and then considers several empirical topics, including geographies of difference, spaces of publicity and privacy, scale, globalization, race, sexuality, labor, and migration. Restricted to graduate students.

Techniques (Skills)

GEOG 2043-3. Special Topics in Geography. Covers various topics not normally covered in the curriculum. May be repeated up to 6 total credit hours within a term.

GEOG 2053-4. Mapping a Changing World. Overviews the vital role cartography plays in modern society and contemporary science. Includes fundamentals of reading and creating maps for research and enjoyment. Lab provides hands-on experience with computer-based methods for creating useful maps.

GEOG 3023-4. Statistics for Earth Sciences. Introduces parametric and distribution-free statistics, emphasizing applications to earth science problems. Not open to students who have taken a college-level statistics course. Restricted to junior and senior geography, geology, and environmental studies majors. Same as GEOL 3023.

GEOG 3053-4. Cartography: Visualization and Information Design. Introduction to the fundamentals of cartography—the science and art of map design. Emphasis on map projections, symbolization, and the design of maps with computers. Students produce series of thematic maps with modern computer-assisted techniques. Basic familiarity with computers strongly recommended. Introductory course in statistics recommended (may be taken concurrently). Restricted to junior or senior GEOG/ENVS majors.

GEOG 4023-3. Introduction to Quantitative Methods in Human Geography. Introduces fundamental statistical and quantitative modeling techniques widely used in geography today. Emphasizes geographic examples and spatial problems, as are statistical routines now available on most computers. Prereq., GEOG 3023 or equivalent. Same as GEOG 5023.

GEOG 4033-2. Quantitative Methods in Geography Laboratory. Introduces the use of personal computers and statistical software in geographical analysis. Coreq., GEOG 4023. Same as GEOG 5033.

GEOG 4043-4. Cartography 2: Interactive and Multimedia Mapping. An advanced course in interactive, multimedia, animated, and Web-based cartography stressing the important role digital cartography plays in cyberspace. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects. Prereq., GEOG 3053. Same as GEOG 5043.

GEOG 4093-4. Remote Sensing of the Environment. Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum. Same as GEOG 5093 and GEOL 4093.

GEOG 4103-4. Introduction to Geographic Information Science. Examines construction and use of an information system and its data specifically designed for representing and manipulating geographical data. Emphasizes modern geographical information systems including computer hardware/software with a collection of methods/procedures for recording, transforming, storing/retrieving, analyzing, and mapping geographic data. Prereq., GEOG 2053 or GEOG 3053 and introductory course in statistics. Restricted to junior and senior geography and environmental studies majors. Same as GEOG 5103.

GEOG 4173-3. Research Seminar. Examines the nature of research and develops pregraduate skills for geographic research, emphasizing problem definition, methods, sources, data interpretation, and writing. Restricted to senior geography and environmental studies majors. Recommended for students pursuing honors.

GEOG 4203-4. Geographic Information Science: Modeling Applications. Extends basic GIS concepts and mechanics. Develop GIS models for human and environmental applications. Grid and vector data models, tessellated and hierarchical data structures, terrain representation, interpolation and kriging, spatial regres-

sion. Small group projects design, implement and run GIS models. Prereq., GEOG 4103/5103 or instructor consent. Recommended prereq., working knowledge of GIS software. Same as GEOG 5203.

GEOG 4303-4. GIS Programming for Spatial Analysis. Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data. Covers concepts, principles and techniques of programming and solving spatial problems in physical and human Geography. Prereq., GEOG 4103/5103. Recommended prereq., GEOG 4203/5203. Same as GEOG 5303.

GEOG 4383-3. Methods of Vegetation Analysis. Techniques of describing, sampling, classifying, and analyzing change in vegetation applied to a variety of local vegetation types. Involves field trips and laboratory work. Prereq. or coreq., GEOG 4371. Same as GEOG 5383.

GEOG 4983 (1-3). Field Problems. Selected geographic problems investigated through intensive, instructor-directed field work. The instructor and the problem(s) vary and are announced. May be repeated up to 12 total credit hours. Restricted to junior/senior geography majors. Same as GEOG 5983.

GEOG 5003-4. Elements of Geographic Information Systems. Discusses incorporating Gis methods into graduate thesis or dissertation research. Reviews basic mapping concepts (scale and projections), acquiring different types of spatial data (raster and vector), building an error-free database, making simple queries, overlays, charts, and maps. Intended for students who want to learn GIS but lack background skills in computing or cartography. Recommended prereq., some experience with Mac or Windows. Restricted to graduate students.

GEOG 5023-3. Introduction to Quantitative Methods in Geography. Restricted to graduate students. Same as GEOG 4023.

GEOG 5033-2. Quantitative Methods in Geography Laboratory. Restricted to graduate students. Same as GEOG 4033.

GEOG 5043-4. Cartography 2: Interactive and Multimedia Mapping. Restricted to graduate students. Same as GEOG 4043.

GEOG 5093-4. Remote Sensing of the Environment. Restricted to graduate students. Same as GEOG 4093 and GEOL 5093.

GEOG 5103-4. Geographic Information Systems. Prereqs., introductory course in statistics and instructor consent. Restricted to graduate students. Same as GEOG 4103.

GEOG 5113-3. Seminar: Geographic Information Systems. Focuses on the current research topics in geographical information systems and selected areas of application. Includes major journal articles related to each topic. Students complete and present a seminar paper. Prereq., GEOG 4103, 5103, or instructor consent. Restricted to graduate students.

GEOG 5183-3. Data Processing in the Earth Sciences. Restricted to geography graduate students. Same as GEOL 5183.

GEOG 5203-4. Geographic Information Science: Modeling Applications. Prereq., GEOG 4103/5103 or instructor consent. Restricted to graduate students. Recommended prereq., working knowledge of GIS software. Same as GEOG 4203.

GEOG 5303-4. GIS Programming for Spatial Analysis. Same as GEOG 4303.

GEOG 5383-3. Methods of Vegetation Analysis. Restricted to graduate students. Same as GEOG 4383.

GEOG 5983 (1-3). Field Problems. Restricted to graduate students. May be repeated up to 7 total credit hours. Same as GEOG 4983.

GEOG 6443-2. Remote Sensing Field Methods. Theory and practical field measurements for validation of airborne and spaceborne spectral image acquisition. Emphasizes radiative scattering properties of soil, vegetation, cryosphere, and atmosphere. Also focuses on characterization and calibration of instrumentation to measure these properties. Restricted to graduate students. Prereqs., GEOL/ GEOG 4093/5093. Recommended prereq., GEOL 5240. Same as EBIO 6440.

GEOG 3840 (1-6). Undergraduate Independent Study. Provides an independent study opportunity, by special arrangement with faculty, for students presenting strong geography preparation. May be repeated up to 8 total credit hours. Restricted to geography majors.

GEOG 3930-3. Internship. Provides an academically supervised opportunity for advanced geography or environmental conservation majors to work in public

and private organizations on projects related to the student's career goals and to relate classroom theory to practice. May be repeated up to 6 total credit hours. Restricted to geography and environmental studies majors.

GEOG 4100 (1-3). Special Topics in Geography. Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4110 and 4120. May be repeated up to 6 total credit hours. Prereq., instructor consent.

GEOG 4110 (1-4). Special Topics in Geography. Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4100 and 4120. May be repeated up to 6 total credit hours. Prereq., instructor consent.

GEOG 4120 (1-3). Special Topics in Geography. Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4100 and 4110. May be repeated up to 6 total credit hours. Prereq., instructor consent.

GEOG 4430-3. Seminar: Conservation Trends. Provides environmental studies or geography majors with an undergraduate format for interdisciplinary discussion and research into current and future directions of conservation. May be repeated up to 6 total credit hours. Restricted to junior and senior geography and environmental studies majors.

GEOG 4990-3. Senior Thesis. Offers thesis research under faculty supervision. May be repeated up to 6 total credit hours. Prereq., senior standing as geography or environmental studies major.

GEOG 5100 (1-4). Special Topics: Geography. Covers various topics outside of the normal curriculum; offered intermittently depending on student demand and availability of faculty. May be repeated up to 9 total credit hours.

GEOG 5840 (1-3). Graduate Independent Study. Offers independent research for master's students only. May be repeated up to 6 total credit hours. Restricted to graduate students.

GEOG 5930-3. Advanced Internship. Provides an academically supervised opportunity for graduate-level geography majors to work in public and private organizations on advanced projects related to geographic theory and their career goals. May be repeated up to 7 total credit hours. Restricted to graduate students.

GEOG 6160-3. Professional and Career Development Issues. Focuses on issues important in the first years of a faculty career including good practice in designing and using learning materials; understanding the job-search and hiring process; formulating a professional development plan; creating teaching portfolios; understanding the role of ethics and values in teaching and research; and managing time and stress. May be repeated up to 6 total credit hours. Restricted to graduate students.

GEOG 6180 (1-3). Seminar: Geographic Problems. Applies research methods to selected problems. Topics vary with instructor. Restricted to graduate students. May be repeated up to 7 total credit hours.

GEOG 6940-1. Master's Degree Candidate.

GEOG 6950 (1-6). Master's Thesis.

GEOG 7840 (1-3). Graduate Independent Study. Offers independent research for doctoral students only. Restricted to graduate students. May be repeated up to 6 total credit hours.

GEOG 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Geological Sciences

GEOL 1010-3. Introduction to Geology. Introductory geology for majors and nonmajors. Studies Earth, its materials, its characteristics, its dynamic processes, and how it relates to people. Separate lab (GEOL 1030) is optional. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

GEOL 1020-3. Introduction to Earth History. Examines how Earth's interior and surface, the atmosphere and climate, the oceans, and life interact and have

changed over the immensity of geologic time. For majors and nonmajors. Separate lab (GEOL 1030) is optional. Prereq., GEOL 1010. Credit not granted for this course and GEOL 1040. Approved for arts and sciences core curriculum: natural science.

GEOL 1030-1. Introduction to Geology Laboratory 1. Features field trips to local points of geologic interest. Studies rocks and topographic and geologic maps. Prior or current registration in 1000-level geology recommended. Meets MAPS requirements for natural science lab, if taken with GEOL 1010. Approved for arts and sciences core curriculum: natural science. Formerly GEOL 1080.

GEOL 1040-3. Geology of Colorado. Reviews the geologic evolution and history of Colorado. It first develops the basic concepts needed to interpret the geology, and then systematically shows how the state evolved through geologic time. The course is designed for those who enjoy understanding the beauty and splendor of the state. Prereq., GEOL 1010. Credit not granted for this course and GEOL 1020. Approved for arts and sciences core curriculum: natural science.

GEOL 1060-3. Global Change: An Earth Science Perspective. Focuses on evidence for planetary warming, climate change, glacier and ice-sheet melting, and sea level rise both now and in the recent past. Attempts to develop understanding of the interactions within the coupled Earth system that regulate such changes. Utilizes examples from the geological and instrumental records, and evaluates the global warming forecast. Prereq., GEOL 1010. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

GEOL 2001-4. Planet Earth. Explores the dynamics of planet Earth with particular emphasis on the factors that make the planet habitable. Includes examination of heat balance, hydrology, geomorphology, biogeochemistry and climate history through both lecture and lab-based activities. The course is required for the Environmental Geoscience track within the Geology major and will introduce students to the major concepts in contemporary Earth system science. Prereqs., GEOL 1010 or ENVS 1000 or instructor consent.

GEOL 2100-3. Environmental Geology. Introduces the influences of geologic processes on human lives and the changes human actions cause in geologic systems. Uses examples and case studies from Colorado and the West. Approved for the arts and sciences core curriculum: natural science.

GEOL 2110-4. Physical Science of the Earth System. Covers basic concepts of physics and chemistry, taught in the context of Earth and space science. Small class size and emphasis on student investigations, lab and field work, and active learning make this course particularly appropriate for future K-6 teachers. Prereq., two high school science courses (college prep level). Same as ARSC 2110. Approved for arts and sciences core curriculum: natural science.

GEOL 2700-2. Introduction to Field Geology. Introduces basic field techniques necessary to collect geologic data and samples, and necessary to map geologic units. Prereqs., GEOL 1010 and 1020; or GEOL 1060 and 1070; or GEOG 1001 and 1011.

GEOL 3010-3. Introduction to Mineralogy. Two lects. and one lab per week. Origin, occurrence, identification, classification, and uses of minerals. Applications of mineralogy to economic geology and petrology are emphasized. Prereq., CHEM 1111 and MATH 1300.

GEOL 3020-3. Petrology. Field relations, petrography, petrology, chemistry, and origins of igneous and metamorphic rocks are studied by means of lectures, reading, and lab and field experience. Labs include instruction in the fundamentals of optical petrography and the study of rocks in thin section. Prereq., GEOL 3010.

GEOL 3023-4. Statistics for Earth Sciences. Introduces parametric and distribution-free statistics, emphasizing applications to earth science problems. Same as GEOG 3023.

GEOL 3030-3. Introduction to Hydrogeology. Introduces groundwater flow concepts, hydrologic cycle, physical and chemical properties, flow net, hydraulic potential, geologic controls on heterogeneity and anisotropy, aquifers and aquitards in a geologic system, saturated and unsaturated flow, flow to a well, pumping tests, and role of groundwater in geologic processes. Prereqs., GEOL 1010 or 2001, and MATH 1300; or instructor consent.

GEOL 3040-3. Global Change: The Recent Geological Record. Geological records in lakes, oceans, deserts, and around glaciers indicate the significant changes in the global systems that have taken place over the last few hundred or thousand years. Explores the timing and nature of these changes. Prereqs., any two-course

sequence of natural science core courses. Credit not granted for this course and GEOL 4070. Approved for arts and sciences core curriculum: natural science.

GEOL 3050-2. GIS for Geologists. Introduction to Geographic Information Systems (GIS) techniques focused on geological applications. GIS analyzing, mapping, and GPS use are covered. Basic computer skills are a plus before entering the class.

GEOL 3070-3. Introduction to Oceanography. Investigates the broad-scale features and dynamics of Earth's oceans. The course is roughly divided amongst the four major, interrelated disciplines of oceanography: marine geology, marine chemistry, physical oceanography (i.e. circulation), and marine biology. Specific topics include seafloor spreading, marine sediments, salinity, biogeochemical cycles, currents, waves, tides, primary production, marine ecology, marine resources, global warming, and much more. Prereq., any two-course sequence of natural science courses. Same as ATOC 3070. Approved for arts and sciences core curriculum: natural science.

GEOL 3120-4. Structural Geology. Geometrical techniques for describing and illustrating geological structures. Major topics include graphic methods and geometry of fractures and folds. Prereqs., any 1000-level sequence in geological sciences.

GEOL 3130-3. Global Warming: Understanding the Forecast. Uses the example of man-made climate change to develop an analytical understanding of the Earth system (solid, fluid, and living) that can be used to interpret the complex and uncertain forecast. Emphasis is given to the concepts of forcing, feedback and response in order to examine natural vs. man-made environmental changes and climate change mitigation strategies.

GEOL 3230-3. Earth Materials. Provides introduction to the classification, composition and properties of Earth rocks and minerals, with emphasis on near surface Earth materials. Two lectures and one lab per week. Labs include instruction on optical mineralogy and on the study of rocks in thin section. Prereqs., CHEM 1111 and MATH 1300.

GEOL 3300-3. Extraterrestrial Life. Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Prereq., one-year sequence in a natural science. Same as ASTR 3300.

GEOL 3320-3. Introduction to Geochemistry. Introduces chemical principles as applied to geologic processes. Includes an introductory discussion of mineral and rock chemistry, aqueous geochemistry, and organic geochemistry. Prereqs., CHEM 1111 and MATH 1300.

GEOL 3410-3. Paleobiology. Surveys morphology, ecology, and evolution of ancient animal and plant life and their interactions on Earth. Fossils used to solve geological and biological problems. Prereqs., any 1000-level sequence in geological science or environmental, population, and organismic biology or instructor consent.

GEOL 3430-4. Sedimentology and Stratigraphy. Introduces the study of sedimentary rocks emphasizing their origin, characteristics, and interpretation; and the principles and techniques for establishing the temporal order and spatial distribution of sedimentary layers. Prereq., GEOL 1020 and 2700 or instructor consent.

GEOL 3500-3. Earth Resources and the Environment. Examines Earth's most important natural resources and their impact on society and the environment. Addresses the geology, occurrence, production, and use of petroleum, coal, mineral, and water resources. Future world energy supply and demand, conservation, and the transition from fossil fuels to non-polluting renewable resources are discussed. Prereq., GEOL 1010 or 1060. Approved for arts and sciences core curriculum: natural science.

GEOL 3520-3. Environmental Issues in Geosciences. Addresses current environmental problems in which an understanding of geology is needed. Topics include energy resources, climate modification, hydrology, waste disposal, and mining resources. Specific examples used to illustrate restrictions imposed by nature and man on solutions to these problems. Prereq., a two-course sequence in any natural science. Same as ENVS 3520. Approved for arts and sciences core curriculum: natural science.

GEOL 3540-3. Introduction to Petroleum Geology. Discusses the origin and distribution of conventional and unconventional petroleum resources, source rocks,

types of traps and seals, reservoir rock properties, exploration methods (seismic data analysis and interpretation, formation evaluation, subsurface mapping), reservoir characterization and modeling, reserves calculations. Prereqs., GEOL 1010 and MATH 1300 or APPM 1350, or instructor consent.

GEOL 3720-3. Evolution of Life: The Geological Record. Discusses the evolution of life on Earth, beginning with the earliest origins and surveying the major steps that led to the rise of higher plants and animals. Covers modern ideas on the causes of periodic mass extinctions in both the marine and terrestrial realms. Emphasizes geologic evidence for the pathways of evolution, using examples from the ordinary to the bizarre. Approved for arts and sciences core curriculum: natural science.

GEOL 3820-3. The Fluid Earth. Examines the myriad forms of fluid behavior found on Earth, from the atmosphere to the inner core. Explores how basic principles of fluid physics may be used to understand a broad range of earth processes, including mantle convection, atmosphere and ocean dynamics, stream flow, lava spreading, and glacier motion, among others. Covers fundamental fluid concepts such as viscosity, pressure, convection, friction, and free-surface flow. Prereqs., MATH 1300, or APPM 1340 and 1345, or APPM 1350, or equivalent. Recommended prereq., GEOL 1010 or equivalent.

GEOL 3930 (1-6). Internship. Offers an academically supervised opportunity for geological sciences majors to work with public or private organizations. Projects are usually associated with students' career goals; each project has an academic emphasis. Prereq., junior standing and completion, with a B or better, of at least two courses for geology majors.

GEOL 3950-3. Natural Catastrophes and Geologic Hazards. Surveys historic and prehistoric natural disasters, their cause, and potential for recurrence. Meteorite impact, earthquakes, volcanic eruptions, tsunamis, landslides, floods, magnetic reversals, and major extinction events. Course formerly numbered as GEOL 4950. Prereq., one year science. Approved for arts and sciences core curriculum: natural science.

GEOL 4060-4. Oceanography. Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal-, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data. Prereq., one semester chemistry, physics, or geology. Same as GEOL 5060.

GEOL 4070-3. Paleoclimatology. Covers the primary forcings and feedbacks that determine Earth's energy balance and the resultant climate system on decadal to millennial time scales. Covers ocean/atmosphere circulation, the role of ice sheets in the climate system, monsoons, Holocene climate change and 20th Century warming. Includes coverage of the proxies available to reconstruct climates of the past and the archives that contain these proxies. Recommended for natural science majors only and recommended prerequisite of ENVS or GEOL introduction sequence. Credit not granted for this course and GEOL 3040.

GEOL 4080-3. Societal Problems and Earth Sciences. Analyzes contemporary societal problems involving geoscience. One class period per week is generally devoted to lecture. During class discussions the professor acts as scientific advisor while students debate material they have researched. Prereqs., one year of calculus and one year of natural science (physics, chemistry, biology) or equivalent, or instructor consent.

GEOL 4093-4. Remote Sensing of the Environment. Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors, as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum. Same as GEOL 5093 and GEOG 4093.

GEOL 4130-3. Principles of Geophysics. Students are introduced to fundamental geophysics including seismology, geomagnetism, gravity, radiometric dating, and heat flow with applications to plate tectonics and exploration of the subsurface. Prereqs., MATH 1300 and PHYS 1110 and any 1000-level sequence in geological sciences; GEOL 3120 recommended.

GEOL 4160-3. Introduction to Biogeochemistry. Covers fundamentals of biogeochemical cycling, emphasizing water, carbon, and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere, and hydrosphere; and natural and human-managed environments. Prereqs., GEOL 3320 or EBIO 3270, and CHEM 1011 or higher. Same as ENVS 4160 and EBIO 4160.

GEOL 4241-4. Principles of Geomorphology. Studies weathering, mass-wasting, fluvial, wind, and marine processes and the resulting landforms. Prereq., GEOL 1011 or any 1000-level sequence in geological sciences. Same as GEOL 4241. Approved for arts and sciences core curriculum: natural science.

GEOL 4270-3. Marine Chemistry and Geochemistry. Examines the chemical, biological, geological, and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical separation in seawater; the marine carbon cycle and its long-term control on atmospheric CO₂; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; and the chemistry of marine sediments, including early diagenesis. Prereq., general chemistry or equivalent. Recommended prereq., intro geology and/or oceanography. Restricted to juniors/seniors.

GEOL 4330-3. Cosmochemistry. Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Prereq., upper-division undergraduate or graduate standing in physical science. Recommended prereq., upper-division undergraduate CHEM, PHYS, or MATH. Same as GEOL 5330 and ASTR 4330.

GEOL 4474-4. Vertebrate Paleontology. Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups. Prereqs., GEOL 1010, 1020, and 3410, or instructor consent. Restricted to juniors and seniors. Same as GEOL 5474.

GEOL 4500-3. Critical Thinking in the Earth Sciences. Deals with controversies within the broad realm of geological sciences, including planetary geology, evolution, paleobiology, global change, environmental issues, plate tectonics, resources, other societal problems, or geologic thought in general. Students are provided the opportunity to analyze and debate scientific issues in the earth sciences. May be repeated up to 6 total credit hours. Prereq., any 1000-level geological science sequence.

GEOL 4550-3. Petroleum Reservoir Characterization and Modeling. Introduces concepts and methods of petroleum reservoir analysis and 3-D reservoir modeling using subsurface data (cores, well logs, 3-D seismic) and outcrop analogs. Examines petroleum system, petrophysics (lithology, porosity, permeability, capillary pressure, flow units), and sequence-stratigraphic, facies, and structural controls on reservoir properties, heterogeneity, and recovery efficiency. Deterministic and stochastic reservoir modeling methods are addressed. Prereqs., GEOL 1010, 1020, and 3430 or instructor consent. Restricted to juniors/seniors. Same as GEOL 5550.

GEOL 4670-3. Isotope Geology. Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic, and sedimentary petrology, geobiochemistry, and petroleum genesis. Prereqs., CHEM 1131, MATH 1300, and GEOL 3020. Same as GEOL 5670.

GEOL 4700 (1-4). Special Geological Topics. Studies in selected geological subjects of special current interest (for undergraduates). May be repeated up to 9 total credit hours within a term. Prereq., instructor consent. Restricted to juniors and seniors.

GEOL 4711-2. Igneous and Metamorphic Field Geology. Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units. Prereqs., GEOL 2700 or 2001 and GEOL 3020.

GEOL 4712-2. Structural Field Geology. Methods of field study of structure of rocks, including observations, data collection, and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps, and compass and tape. Prereqs., GEOL 2700 and 3120.

GEOL 4714-2. Field Geophysics. Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic, and electrical measurements. Prereqs., GEOL 2700 or 2001, and MATH 1300 and PHYS 1110, or instructor consent.

GEOL 4715-2. Field Techniques in Hydrogeology. Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geol-

ogy, environmental studies, geography, and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring stream flows, interpreting aquifer parameters from geophysical measurements, and using field data for water budget analysis. Prereq., GEOL 2001 or 2700.

GEOL 4716-2. Environmental Field Geochemistry. Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters, and atmospheric particulates. Prereqs., GEOL 2700 or 2001, and CHEM 1011/1031, or CHEM 1051/1071, or CHEM 1111/1131, or CHEM 1151/1171.

GEOL 4717-2. Field Seminar in Geology and Tectonics. Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S. Prereqs., GEOL 2700 and one or more of GEOL 3120, 3320, or 3430.

GEOL 4721-2. Field Methods in Active Tectonics. Analysis of active geologic structures, including strike slip fault systems, secondary structures in stepovers and related eruptive centers. Includes the use of digital imagery, elevation models, offset geomorphic features and Quaternary deposits to determine local deformation rates and their relation to plate motions. Prereqs., GEOL 2700 and 3120. Recommended prereq., GEOL 4712.

GEOL 4750-2. Field Techniques in Hydrogeology. Designed for students in geology, environmental studies, geography, and civil engineering, this field course introduces students to various field techniques and data analysis methods in hydrogeologic studies. Exercises include mapping ground water levels, conducting slug and pump tests, measuring streamflows, interpreting aquifer parameters from geophysical measurements, and using field data for water budget analysis. Prereqs., GEOL 2700/3030, or GEOG 3511, or GEOL/GEOG 4241, or GEOL 3430.

GEOL 4840 (1-3). Independent Study in Geology. Time and credit to be arranged. Numbered GEOL 4840 through GEOL 4849. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated up to 7 total credit hours.

GEOL 4851 (1-3). Independent Study in Geoscience Education. May be repeated up to 3 credit hours.

GEOL 4960-1. Writing in Geosciences. Emphasizes strategies of literature research and scientific writing in the geosciences. Includes small writing assignments and a larger library research paper. Prereq., 15 hours of upper-division course work in geological sciences.

GEOL 4990 (1-3). Honors Thesis. Supervised project involving original research in any area of the geological sciences. The thesis is submitted to the Honors Program of the College of Arts and Sciences and is orally defended. The candidate must have a cumulative GPA of 3.30 or better and must be accepted by the departmental honors committee.

Graduate Courses

GEOL 5060-4. Oceanography. Same as GEOL 4060.

GEOL 5070-3. Advanced Sedimentology. Goal is to be able to more fully interpret the stratigraphic record. First half of the course studies fluid flow, sediment transport, and resultant bedforms. Second half focuses on carbonates, biological and chemical processes, and the resultant sedimentary products. Prereq., GEOL 3430.

GEOL 5080-3. Advanced Hydrogeology and Modeling Concepts. Introduces advanced groundwater flow and modeling concepts, equations for steady state and transient flow, saturated and unsaturated flow, finite difference method, application of modeling in geologic processes, radial flow and aquifer parameters, infiltration and groundwater recharge, model calibration, verification, and prediction. Prereqs., MATH 2300, Fortran, or instructor consent.

GEOL 5093-4. Remote Sensing of the Environment. Same as GEOL 4093 and GEOG 5093.

GEOL 5110-3. Geomechanics. Introduces fundamental physical processes important to the transport of heat and mass in the Earth and on Earth's surface. Provides practice with quantitative treatment of geological problems. Solutions for each problem are derived from first principles, including conservation and flux laws. Emphasizes heat conduction and viscous fluid flow. Prereq., calculus.

GEOL 5183-3. Data Processing in the Earth Sciences. Advanced statistical analysis, multivariate statistics, time series, classification models. Prereq., GEOL 3023 or instructor consent. Same as GEOG 5183.

GEOL 5240-4. Remote Sensing Image Analysis. Digital image processing emphasizing hands-on computer analysis of space-acquired images. Theory and practice of image enhancement and thematic information extraction. Knowledge of multivariate statistics recommended. Prereq., GEOG 4093 or 5093, GEOL 4093 or 5093.

GEOL 5270-3. Marine Chemistry and Geochemistry. Same as GEOL 4270.

GEOL 5280-3. Aqueous and Environmental Geochemistry. Explores the fundamentals of low-temperature geochemistry to investigate element speciation and chemical behavior in waters, soils and sediments. Topics include water-rock interaction and weathering, mineral dissolution and precipitation reactions, aqueous complexation, mineral surface chemistry, kinetics, element cycles, and redox biogeochemistry. Includes exposure to spectroscopic tools, computer simulations, and microbial geochemistry. Prereq., GEOL 3320 or 1 year of college chemistry or instructor consent.

GEOL 5305-3. Global Biogeochemical Cycles. Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes, and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed along with global scale measurements of element fluxes from satellites, aircraft, and measurement networks. Prereq., general chemistry, some organic chemistry. Same as ENVS 5840.

GEOL 5330-3. Cosmochemistry. Same as GEOL 4330 and ASTR 5330.

GEOL 5410-3. Ancient Sedimentary Environments. Analysis of sedimentary rock sequences, sedimentary environments, and stratigraphic synthesis. Prereq., GEOL 3430.

GEOL 5420-3. Quaternary Dating Methods. In-depth survey of standard and experimental dating methods that provide absolute ages for events of the last two million years of Earth history. Includes theory and application of radiocarbon, uranium series, amino acid, thermo-luminescence, fission track, potassium/argon, hydration, light stable isotopes, and other radioactive techniques.

GEOL 5430-3. Paleooceanography and Paleoclimatology. Examines scientific tools, data, and theories related to the dramatically varied past climate of Earth. Focus will be on marine records of climate change and ocean circulation, but ice core and continental archives will also be discussed. Course will cover the Cretaceous Period to the present, with particular emphasis on the past 150,000 years (the last ice age cycle). Prereq., intro geology or equivalent. Recommended prereq., intro oceanography or atmospheric science.

GEOL 5474-4. Vertebrate Paleontology. Same as GEOL 4474 and MUSM 5474.

GEOL 5550-3. Petroleum Reservoir Characterization and Modeling. Restricted to graduate students. Same as GEOL 4550.

GEOL 5650-3. Carbonate Sedimentary Environments. Examines recognition and interpretation of modern and ancient carbonate sedimentary environments through the analysis of fauna, texture, sedimentary structures, and primary geochemistry. Emphasizes eustatic sea level and climatic controls. Prereqs., GEOL 3410 and 3430.

GEOL 5670-3. Isotope Geology. Same as GEOL 4670.

GEOL 5690-3. Tectonic History of the Western United States. Provides students with the practical tools needed to make tectonic interpretations through study of the geologic history of the western United States and the geodynamic models used in interpreting that history. Paleomagnetism, geobarametry, geothermometry, geodynamic modeling, and elements of structural geology and stratigraphy are topics considered in this class. Prereqs., GEOL 3120 and PHYS 1110.

GEOL 5700 (1-4). Geological Topics Seminar. Seminar studies in geological subjects of special current interest are offered primarily for graduate students, as departmental staff and facilities permit.

GEOL 5711 (1-3). Igneous and Metamorphic Field Geology. Includes field geophysics, environmental, structural, and stratigraphic field geology, and/or field topics in petrology, hydrology, and geomorphology. May be repeated up to 6 total credit hours.

GEOL 5712 (1-3). Structural Field Geology. Includes field geophysics, environmental, structural, and stratigraphic field geology, and/or field topics in petrology, hydrology, and geomorphology. May be repeated up to 6 total credit hours.

GEOL 5714 (1-3). Field Geophysics. Includes field geophysics, environmental, structural, and stratigraphic field geology, and/or field topics in petrology, hydrology, and geomorphology. May be repeated up to 6 total credit hours.

GEOL 5715 (1-3). Field Techniques in Surficial Geology and Geochemistry. Includes field geophysics, environmental, structural, and stratigraphic field geology, and/or field topics in petrology, hydrology, and geomorphology. May be repeated up to 6 total credit hours.

GEOL 5716 (1-3). Environmental Field Geochemistry. Includes field geophysics, environmental, structural, and stratigraphic field geology, and/or field topics in petrology, hydrology, and geomorphology. May be repeated up to 6 total credit hours.

GEOL 5717 (1-3). Field Seminar in Geology and Tectonics. Includes field geophysics, environmental, structural, and stratigraphic field geology, and/or field topics in petrology, hydrology, and geomorphology. May be repeated up to 6 total credit hours.

GEOL 5800-3. Planetary Surfaces and Interiors. Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors, and the integrated geologic histories of the terrestrial planets and satellites. Prereq., graduate standing in physical sciences or instructor consent. Same as ASTR 5800.

GEOL 5810-3. Planetary Atmospheres. Covers the structure, composition, and dynamics of planetary atmospheres. Includes the origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres—past and future. Same as ATOC 5810 and ASTR 5810.

GEOL 5820-3. Origin and Evolution of Planetary Systems. Considers the origin and evolution of planetary systems, including protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings, and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies. Prereq., graduate standing in physical sciences or instructor consent. Same as ASTR 5820 and ATOC 5820.

GEOL 5830-3. Topics in Planetary Science. Current topics in planetary science, based on recent discoveries, spacecraft observations, or other developments. Focuses on a specific topic each time it is offered, such as Mars, Venus, Galilean satellites, exobiology, comets, or extrasolar planets. May be repeated up to 6 total credit hours, provided the topics vary. Prereq., graduate standing in physical sciences or instructor consent. Same as ATOC/ASTR 5830.

GEOL 5835-1. Seminar in Planetary Science. Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. May be repeated up to 4 total credit hours to meet candidacy requirements. Prereq., graduate standing or instructor consent. Same as ATOC 5835 and ASTR 5835.

GEOL 5840 (1-3). Graduate Independent Study. Numbered GEOL 5840 through GEOL 5851. May be repeated up to 7 total credit hours.

GEOL 5852 (1-3). Independent Study—GIS Applications in Quaternary Geosciences. Leads students through quantitative spatial analysis of environmental and paleoclimatic problems. Each student will develop a project from start to finish, with emphasis on raster GIS for building large empirical databases that bear on process and variability.

GEOL 6060-4. Petroleum Geology of Turbidite Systems. Covers the exploration and production aspects of petroleum submarine fans and turbidite systems. A one-week field trip to Arkansas is included. Students are responsible for part of the trip expenses. Prereq., GEOL 6330.

GEOL 6241 (1-3). Seminar in Hydrology and Geomorphology. Emphasizes process-oriented research in hydrology and geomorphology. Sample topics include river mechanics, snow hydrology, and periglacial processes. Same as GEOG 6241. May be repeated up to 6 total credit hours.

GEOL 6310-3. Sedimentary Petrology. Interpretation of depositional and diagenetic history of sedimentary rocks as determined from thin-section studies. Prereqs., GEOL 3010, 3020, and 3430.

GEOL 6330-4. Applied Sequence Stratigraphy and Basin Analysis. Develops skills in the stratigraphic interpretation of seismic reflection data, recognition of sequence stratigraphy in well logs and outcrop, and their applications to basin analysis in petroleum exploration. Prereqs., graduate standing, introductory undergraduate physics, and sedimentology/stratigraphy.

GEOL 6610-3. Earth and Planetary Physics 1. Offered alternate years. Mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Inversion of seismic data for the structure, composition, and state of the interior of Earth. Same as ASTR 6610 and PHYS 6610.

GEOL 6620-3. Earth and Planetary Physics 2. Offered alternate years. Space and surface geodetic techniques, as well as potential theory, are covered. Other topics are definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; tides and the rotation of the Earth. Same as ASTR 6620 and PHYS 6620.

GEOL 6630-3. Earth and Planetary Physics 3. Offered alternate years. The solar system: theories of its origin, meteorites. Distribution of radioactive materials; age dating. Heat flow through continents and the ocean floor; internal temperature distribution in Earth; mantle convection. Origin of the oceans and atmosphere. Same as ASTR 6630 and PHYS 6630.

GEOL 6650 (1-3). Seminar in Geophysics. Advanced seminar studies in geophysical subjects for graduate students. Same as ASTR 6650 and PHYS 6650. May be repeated up to 6 total credit hours.

GEOL 6670-2. Geophysical Inverse Theory. Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure, and earthquake locations. Prereqs., calculus and computer programming (any language). Same as PHYS 6670.

GEOL 6940-1. Master's Degree Candidate.

GEOL 6950 (1-6). Master's Thesis.

GEOL 6960-3. Plan II Master's Research.

GEOL 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Germanic and Slavic Languages and Literatures

German

GRMN 1010-4. Beginning German 1. For students with no previous training in German. Credit not granted for this course and GRMN 1030.

GRMN 1020-4. Beginning German 2. Prereq., GRMN 1010 (min. grade of C-). Credit not granted for this course and GRMN 1030.

GRMN 1030-5. Intensive Beginning German. Covers the same material as GRMN 1010 and GRMN 1020 in one course. Focuses on acquiring ability to understand and speak everyday German; on developing reading and writing skills; and on learning about the cultures of the German-speaking countries. Credit not granted for this course and GRMN 1010 and GRMN 1020.

GRMN 1500-3. German for Reading Knowledge. Designed especially for graduate students. Emphasizes analytical skills for acquiring reading proficiency in specialized and technical German in one's field of research. Recommended for pass/fail registration. Does not satisfy the arts and sciences foreign language requirement. Does not count towards the German major.

GRMN 2010-4. Intermediate German 1. Review and continuation of basic skills begun in the first year: reading, writing, speaking, and oral comprehension. Prereq., GRMN 1020 or 1030 (min. grade C-). Meets MAPS requirement for foreign language. Satisfies arts and sciences language requirement. Credit not granted for this course and GRMN 2030.

GRMN 2020-4. Intermediate German 2. Prereq., GRMN 2010 (min. grade C-). Credit not granted for this course and GRMN 2030.

GRMN 2030-5. Intensive Intermediate German. Covers the same material as GRMN 2010 and GRMN 2020 in one semester. Offers review and continuation of basic skills begun in the first year: reading, writing, speaking and oral compre-

hensive. Prereq., GRMN 1020 or GRMN 1030 (min. grade C-), or instructor consent. Credit not granted for this course and GRMN 2010 and GRMN 2020. Meets MAPS requirement for foreign language. Approved for arts and sciences core curriculum: foreign language.

GRMN 3010-3. Advanced German 1. Reviews special grammatical topics, reading, and conversation. Students have the option of taking the internationally recognized exam *Zertifikat Deutsch* in GRMN 3010. Prereq., four semesters of college German or equivalent. Open to freshmen with instructor consent.

GRMN 3020-3. Advanced German 2. Expands and refines skills acquired in GRMN 3010. Students acquire a varied, precise, and idiomatically advanced vocabulary; an understanding of different registers, from the casual to the very formal; and an ability to communicate effectively in spoken and written German in a variety of social situations, including professional life. Prereq., GRMN 3010 or instructor consent.

GRMN 3030-3. Business German. Introduces students to the language of German business and economic life. Provides insights into everyday business practices and institutions, including Germany's position in the European and world markets. Emphasizes acquiring basic business vocabulary and writing business letters and resumes in German. Prepares students for the exam *Deutsch fuer den Beruf*, a diploma recognized worldwide by business and industry. Prereq., GRMN 2020 or instructor consent.

GRMN 3110-3. German Literature from the Avant-Garde to the Postmodern. Examines selected literary texts. Emphasizes longer unedited texts as well as critical skills. May be taken either before or after GRMN 3120. Prereq., GRMN 2020 or equivalent, or instructor consent.

GRMN 3120-3. German Literature from the Enlightenment to Expressionism. Examines selected literary texts of various periods. Emphasizes longer texts and critical skills. May be taken either before or after GRMN 3110. Prereq., GRMN 2020 or equivalent, or instructor consent.

GRMN 3130-3. Issues in German Philosophy and Literature. Examines selected interdisciplinary texts from the German literary and philosophical tradition. Topics address issues central to philosophical inquiry, and may include knowledge and its limits, mind and body, determinism and free will, reason and religious belief, and ethical problems. Prereqs., GRMN 2020 and 2030, or equivalent.

GRMN 3140-3. Current Issues in German Literature. Examines issues pervading contemporary German literature, such as concerns of youth, gender, stereotyping as it affects women and men in their relations with one another, loneliness and sexual frustration, work experiences, and other issues. Prereq., ability to read unedited German and to speak German.

GRMN 3150-3. Issues in German Politics and Literature. Examines literary and theoretical texts in German about the relationship between literature and politics. Topics may include history and revolution, political theater, feminist aesthetics, or terrorism. Readings and discussion in German. Prereqs., GRMN 2020 and GRMN 2030, or equivalent.

GRMN 3520-3. Open Topics in the Cultural Context. Examines topics in the cultures of German-speaking central Europe. Contact the departmental office for specific course offerings. May be repeated up to 6 total credit hours when topic varies. Prereq., GRMN 3020 or equivalent, or instructor consent.

GRMN 3900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

GRMN 3930 (1-6). Internship. Provides an academically supervised opportunity for upper-division students to earn credit while working for public or private organizations. Students apply skills and knowledge earned in the major, and supplement their work experience through directed readings and assignments. May be repeated up to 6 total credit hours. Restricted to junior and senior GRMN majors and minors.

GRMN 4010-3. Advanced Grammar and Stylistics. Offers a complete final review of German grammar and syntax and its more complex aspects. Prepares students for the *Goethe-Zertifikat C1*. Prereq., GRMN 3020 or instructor consent.

GRMN 4330-3. The Age of Goethe. German literature from 1770 to 1830. Close examination of representative texts from the periods of *Sturm und Drang*, classicism, and romanticism. Emphasizes philosophical and social background. Prereq., GRMN 3020 or instructor consent.

GRMN 4340-3. Seminar in German Literature. Intensive study of a particular literary period, author, or genre. Secondary sources are used. Course content differs each time. May be repeated up to 6 total credit hours when topic varies. Prereq., GRMN 3020 or instructor consent.

GRMN 4450-3. Methods of Teaching German. Required of students who desire the recommendation of the department for secondary school teaching positions. For student teaching in German, see EDUC 4712 under the School of Education. Restricted to students who have been admitted to the teacher education program in the School of Education.

GRMN 4460-6. High School German Teaching. Part of the supervised student teaching in a secondary school required for state certification to teach German. Restricted to students who have been admitted to the teacher education program in the School of Education.

GRMN 4550-3. Senior Seminar: The Roles of Intellectuals and Academics in German Culture. Examines the articulation of the German bourgeoisie during critical periods in German history. Looks at specific groups and their participation in German public culture, e.g., writers, artists, journalists, academics, and political figures. Students work closely with a faculty advisor during the semester and are expected to produce a major research paper. Prereq., GRMN 3020 or instructor consent. Restricted to senior GRMN majors.

GRMN 4900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

German Courses Taught in English

GRMN 1601-3. Germany Today. Introduces the culture of contemporary German-speaking central Europe, examining historical processes, social and political patterns, and the intellectual and artistic responses to problems of the 20th and 21st centuries. Taught in English. Approved for arts and sciences core curriculum: contemporary societies.

GRMN 1602-3. Metropolis and Modernity. An interdisciplinary introduction to the modern industrial city in Europe and the USA, with particular attention to the representation of urbanism in the visual arts. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

GRMN 1701-3. Nature and Environment in German Literature and Thought. Critically examines titles in German literature and thought. Nature and environment are used to explore alienation, artistic inspiration, nihilism, exploitation, sexuality, rural versus urban, meaning of the earth, cultural renewal, identity and gender. This "Green" survey of German classics spans Romanticism's conception of nature as unconscious spirit to the politics and values of contemporary Germany's Green Party. Taught in English. Same as HUMN 1701. Approved for arts and sciences core curriculum: ideals and values.

GRMN 2301-3. Inside Nazi Germany: Politics, Culture, and Everyday Life in the Third Reich. Examines social culture and everyday life in Nazi Germany. Topics include the role of propaganda in the media and entertainment industries, anti-Semitism and suppression of ethnic, social and religious minorities, the role of education and youth organizations, as well as the role of women, the churches, and the effects of a controlled economy before and during World War II. Taught in English. Approved for arts and sciences core curriculum: historical context.

GRMN 2501-3. 20th-Century German Short Story. Short stories by Thomas Mann, Kafka, Boell, and Grass, such as *Death in Venice*, *Metamorphosis*, and *Cat and Mouse*. Emphasizes literary themes, their traditions, and their cultural significance. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

GRMN 2502-3. Representing the Holocaust. Examines how the memory of the Holocaust in Nazi Germany is increasingly determined by the means of its representation, e.g., film, autobiography, poetry, architecture. Taught in English. Same as JWST 2502. Approved for arts and sciences core curriculum: ideals and values.

GRMN 2503-3. Fairy Tales of Germany. Explores the origins, cultural significance, stylistic and thematic features of the German fairy tale, with emphasis on the Brothers Grimm; on artistic fairy tales by Goethe, Tieck, Brentano, and others; and, on modern retellings in literature and popular culture. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

GRMN 2601-3. Kafka and the Kafkaesque. Exposes the students to a wide selection of Kafka's literary output and aims to define the meaning of the Kafkaesque, by looking not only for traces of Kafka's influence in the verbal and visual arts,

but also for traces left in Kafka's own work by his precursors in the literary tradition. Taught in English. Same as HUMN 2601. Approved for arts and sciences core curriculum: literature and the arts.

GRMN 2603-3. Moral Dilemmas in Philosophy and Literature. Examines the moral dilemmas that arise when opportunities afforded by basic freedoms or advances in technology clash with the ethical imperatives that issue from the Enlightenment and the social contract. Guiding questions include: When does the quest for knowledge legitimate transgression of prevailing morality? By what standard do we adjudicate the ambitions of the individual when they compete with the interests of the state? Taught in English. Approved for art and sciences core curriculum: ideals and values.

GRMN 3201-3. German and Russian Culture in Comparative Perspective. Comparative overview of the evolution of German and Russian civilizations in the social, political, religious, and cultural spheres. Taught in English. Same as RUSS 3201.

GRMN 3501-3. German-Jewish Writers: From the Enlightenment to the Present. Provides insight into the German-Jewish identity through essays, autobiographies, fiction, and journalism from the Enlightenment to the post-Holocaust period. Examines the religious and social conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch. Taught in English. Same as JWST 3501. Approved for arts and sciences core curriculum: human diversity.

GRMN 3502-3. Literature in the Age of Goethe. Features the writings of Germany's major literary figures from 1749 to 1832. Special attention is paid to the formation of literary periods, genres, aesthetic, and socio-historical developments contributing to the birth of modernism in German intellectual history and literature. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

GRMN 3503-3. German Film Through World War II. History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English. Same as FILM 3503.

GRMN 3504-3. Topics in German Film. A comparative analysis of key issues in German culture as they are represented in film and other media, e.g., technology, architecture, women, and the Holocaust. May be repeated up to 6 total credit hours when topic varies. Taught in English. Same as FILM 3504.

GRMN 3505-3. The Enlightenment: Tolerance and Emancipation. Examines the Enlightenment belief in reason and the common humanity of all individuals and cultures. Emphasizes arguments for and against freedom of religion, abolition of slavery, and emancipation of women in 18th century European and American literature and thought. Taught in English. Same as HUMN 3505. Approved for arts and sciences core curriculum: ideals and values.

GRMN 3513-3. German Film and Society 1945–1989. Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical, and political contexts. Taught in English. Same as FILM 3513.

GRMN 3514-3. German Film and Society after 1989. Introduces post-1989 German culture through film. The course emphasizes films in their socio-historical contexts and explores developments in German culture during and after the unification. Taught in English. Same as FILM 3514.

GRMN 3601-3. German Women Writers. Explores writing by German/Austrian women from 1945 to the present, with special attention to the representation of the Holocaust, the continuation of avant-garde traditions, innovations in literary form, and feminism. Visual arts, film, and feminist theory will also be considered in their relation to literature. Taught in English. Same as WMST 3601. Approved for arts and sciences core curriculum: human diversity.

GRMN 3702-3. Dada and Surrealist Literature. Surveys the major theoretical concepts and literary genres of the Dada and Surrealist movements. Topics include Dada performance and cabaret, the manifesto, montage, the ready made, the Surrealist novel, colonialism and the avant-garde, and literary and philosophical precursors to the avant-garde. Taught in English. Same as HUMN 3702. Approved for arts and sciences core curriculum: literature and the arts.

GRMN 3802-3. Politics and Culture in Berlin 1900–1933. Examines early 20th century German culture, with emphasis on the Weimar Republic (1918-1933) in light of contemporaneous political discussions. The course presents modern art and literature (Expressionism, Dada, Brecht's epic theater) and architecture and design (Bauhaus, Werkbund) as well as political movements of women, sexual

minorities, and Berlin's Jewish communities. Taught in English. Same as HUMN 3802. Offered through CU Study Abroad Program. Approved for arts and sciences core curriculum: literature and the arts.

GRMN 4051-3. Critical Theory of the Frankfurt School. Serves as an introduction to the Frankfurt School and critical theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Same as GRMN 5051.

GRMN 4251-3. Marxism. Historical and systematic study of principal themes of Marxist thought, from its Hegelian origins to its contemporary varieties, emphasizing the works of Marx and Engels. Taught in English. Prereq., 12 hours of GRMN or PHIL course work or instructor consent. Same as PHIL 4250.

GRMN 4253-3. Philosophy of Language. Surveys seminal essays from Frege to the present on the philosophy of language. Taught in English.

GRMN 4301-3. Gender, Race, and Immigration in Germany and Europe. Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include: questioning "multiculturalism," self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism, and nationalism. Same as GRMN 5301 and WMST 4301. Approved for arts and sciences core curriculum: human diversity.

GRMN 4501-3. Seminar: Literature in Cultural Context. Provides a broader basis for the work of literature, viewing it from various cultural perspectives. Specific content of course is defined by the instructor. May be repeated up to 6 total credit hours when topic varies. Taught in English.

GRMN 4502-3. Nietzsche: Literature and Values. Emphasizes Nietzsche's major writings from 1872 to 1888 with particular attention to the critique of Western values. Includes a systematic exploration of doctrines, concepts, and ideas leading to the values of creativity. Taught in English. Same as HUMN 4502. Approved for arts and sciences core curriculum: ideals and values.

GRMN 4503-3. Issues in German Thought. Provides the opportunity to examine major issues in German philosophical, social, and religious thought from the end of German idealism to existentialism and critical theory. Emphasizes the relationship between ideas and social and political action. May be repeated up to 6 total credit hours when topic varies. Taught in English.

GRMN 4504-3. Goethe's *Faust*. Systematic study of the Faust motif in Western literature, with major emphasis on *Faust I* and *II* by Goethe and Thomas Mann's *Doctor Faustus*. Taught in English. Same as GRMN 5504, COML 5504 and HUMN 4504. Approved for arts and sciences core curriculum: literature and the arts.

German Graduate Courses

GRMN 5010-3. Bibliography and Methods of Research. Required of all German MA students. Training in the use of reference works for conducting research in the humanities and social sciences. Analysis of, and hands-on practice with, bibliographic tools specific to German, as well as reference tools inclusive of German-area materials but broader in their scope. Students learn proper procedure for manuscript preparation and submission. Prereq., graduate standing or instructor consent.

GRMN 5020-3. Applied Linguistics and Foreign Language Teaching Methodology. Required of all graduate teaching assistants, this course provides a knowledge of the aspects of German linguistics that are important for teaching German and a survey of foreign language teaching methods and second language acquisition research. Prereq., graduate standing or instructor consent.

GRMN 5030-3. Foundations of Critical Theory. Study of selected texts from the German philosophical tradition of the 19th century, including substantial readings from Kant and Hegel, with attention to theoretical philosophy (epistemology) and practical philosophy (ethical theory). Required course for the graduate certificate in critical theory. Recommended prereq., some background in philosophy.

GRMN 5051-3. Critical Theory of the Frankfurt School. Serves as an introduction to the Frankfurt School and critical theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools

they developed and consider their validity. Taught in English. Same as GRMN 4051 and COML 5051.

GRMN 5210-3. Seminar: The Age of Enlightenment. Examines the influence of the emerging middle class on the transformation of aesthetic and societal values. Major works of theory, philosophy, literature, and criticism by Lessing, Herder, Kant, J. E. Schlegel, and others. Examines major literary and cultural influences from France and Great Britain. Prereq., graduate standing or instructor consent.

GRMN 5220-3. Seminar: Topics in the Age of Goethe. Examines various aspects of German-speaking society from the 1770s to 1830s. Topics may include *Sturm und Drang* as social commentary; romantic theory in the wake of the French Revolution; romantic nationalism; the Faust theme; Weimar as a cultural center; and others. May be repeated up to 6 total credit hours when topic varies. Prereq., graduate standing or instructor consent.

GRMN 5230-3. Seminar: Concepts of the Self from Schlegel to Freud and Jung. Profound contributions to the discourses of modernity begin with romanticism and lead to the depth-psychology of Freud and Jung. Examines the major stages in this process: the symbolism of the self in romanticism (Schlegel, E.T.A. Hoffmann, Chamisso), the seminal role of Schopenhauer and Nietzsche, and finally the emergence of the self as the hidden god in the thought of Freud, Jung, Hesse, and others. Prereq., graduate standing or instructor consent.

GRMN 5301-3. Gender, Race, and Immigration in Germany and Europe. Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include: questioning "multiculturalism," self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism, and nationalism. Taught in English. Same as GRMN 4301 and WMST 4301. Approved for arts and sciences core curriculum: human diversity.

GRMN 5310-3. Seminar: Topics in the 19th Century. Examines the transformation of realism from Buechner to Gerhart Hauptmann. Topics may include literary responses to the Restoration; intellectuals and the Revolution of 1848; philosophy and literature; theatrical representations of woman, family, and gender; and others. May be repeated up to 6 total credit hours when topic varies. Prereq., graduate standing or instructor consent.

GRMN 5320-3. Seminar: The German Novel from 1901 to 1956. Beginning with T. Mann's *Buddenbrooks*, charts the rise of the German novel in the early 20th century and examines such topics as Wilhelminian society; intellectuals and World War I; dehumanization and alienation; national socialism and literary exile; and others. Authors include T. Mann, H. Hesse, R. Rilke, F. Kafka, A. Seghers, and A. Zweig. Prereq., graduate standing or instructor consent.

GRMN 5330-3. Seminar: German Intellectuals and Society Between the Wars. Examines the period of social crisis and the intellectual responses to the collapse of the prewar order. Gives attention to the antidemocratic thought of Spengler, Juenger, Stefan George and his circle, to the emergence of existentialism with Scheler and Heidegger, and to the search for a new political humanism as evidenced by the work of Thomas Mann. Prereq., graduate standing or instructor consent.

GRMN 5410-3. Seminar: Topics in Early 20th Century German Society. Focuses on major issues, events, movements, and figures prior to World War II. Topics may include the ontology of lyric poetry; Berlin in the 1920s; exiles, their communities, and their writings; women writers from Andreas-Salome to Anna Seghers; topics in German film; and others. May be repeated up to 6 total credit hours when topic varies. Prereq., graduate standing or instructor consent.

GRMN 5420-3. Seminar: Topics in Later 20th Century German Society. Analyzes major currents and events such as the Holocaust, coming to terms with the past (Vergangenheitsbewältigung), German Democratic Republic (GDR) literature, and responses to the reunification. Topics may include the Austrians from Anschluss to Haider; Paul Celan; East German writers between Wolf Biermann and Christa Wolf; topics in German film; and others. May be repeated up to 6 total credit hours when topic varies. Prereq., graduate standing or instructor consent.

GRMN 5504-3. Goethe's *Faust*. Systematic study of the Faust motif in Western literature, with major emphasis on *Faust I* and *II* by Goethe and Thomas Mann's *Doctor Faustus*. Taught in English. Same as GRMN 4504, HUMN 4504, and COML 5504. Approved for arts and sciences core curriculum: literature and the arts.

GRMN 5510-3. Seminar: Open Topics in German Civilization. Focuses on cultural issues that cross lines of literary periodization. Topics may include the theater as social criticism from Lessing to Handke; forms of German protest from Luther to Thomas Mann; nihilism from Bonaventura to Thomas Bernhard; topics in German film; and others. May be repeated up to 6 total credit hours when topic varies. Prereq., graduate standing or instructor consent.

GRMN 5520-3. Seminar: Current Issues in German Literature and Media. Examines issues pervading contemporary German literature and media, such as concerns of youth, xenophobia, stereotyping as it affects women and men in their relations, work experience, feminism, problems connected with the reunification, and other issues. Prereq., graduate standing or instructor consent.

GRMN 5900 (1-6). Independent Study. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

GRMN 6900 (1-6). Master's Thesis. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

GRMN 6940-1. Master's Degree Candidate.

Germanic and Slavic Courses

GSLL 1108-3. Introduction to Jewish History. Surveys Jewish history from the earliest times to the present. Includes biblical history; Judaism in late antiquity, medieval, and early modern times; and special emphasis on the 19th century to the present, including American Judaism, the Holocaust, anti-Semitism, Zionism, and Israel. Taught in English. Same as HIST 1108 and JWST 1108. Approved for arts and sciences core curriculum: historical context.

GSLL 3401-3. The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe. Surveys the major works of 20th century central and central east European film and literature. Examines cultural production in the non-imperial countries and non-national languages of the region including Yiddish, Belarusian, Czech, Hungarian, Polish, and Romanian, among others. Traces the rise of nationalism over the course of the century from the age of empires through the Cold War. Taught in English. Same as JWST 3401.

GSLL 5230-3. Russian Cultural Idioms. Focuses on the critical analysis of the Russian cultural discourse through Russian idioms. Taught in Russian. Same as RUSS 4230.

GSLL 5352-3. Russian Novel: Theory and Practice. Examines the Russian novel and its evolution as well as Western and Russian theories of the novel as they engage and reflect upon the claims of modernity. Taught in English. May be repeated up to 6 total credit hours. Same as COML 5352.

GSLL 5421-3. Gogol. Explores major fictional and dramatic texts of great Russian writer Nikolai Vasil'evich Gogol (1809–52)—“The strangest prose-poet Russia ever produced” (Nabokov). Works will be analyzed in the context of Western and Russian Romanticism. Relevant nonfiction texts will also be introduced when appropriate. Class will be run largely as group discussion, with necessary historical and critical background provided. Taught in English. Recommended prereq., RUSS 4811.

GSLL 5431-3. Dostoevsky. Focuses on close reading of major novels and other works by Dostoevsky, one of the most important psychological novelists in modern literature, a profound religious thinker, and the greatest crime novelist in the world. Taught in English. Same as RUSS 4431.

GSLL 5441-3. Tolstoy. Examines the developments of Tolstoy's thought and literary style through study of the novel *War and Peace* and short works from different periods of Tolstoy's writing. Taught in English. Same as RUSS 4441.

GSLL 5451-3. Chekhov. Analyzes the life and creative works of the author of some of the funniest and some of the gloomiest stories in Russian literature. Examines Chekhov's major plays that laid the foundation for modernist theatre. Taught in English. Same as RUSS 4451.

GSLL 5471-3. Women in 20th Century Russian Culture. Acquaints students with major issues concerning women in 20th century Russian culture. Examines sources from folk culture, popular culture, and high culture (poetry, prose, songs, tales, visual art, and cinema) that mythologize or question women's images and societal roles. All texts and films are offered in English translation. Taught in English. Same as RUSS 4471 and WMST 4471.

GSLL 5830-3. Topics in Literature and History. May be repeated up to 6 total credit hours. Taught in English. Same as COML 5830.

GSLL 5851-3. Critical Thinking: Russian Film and Society. Through structured discussions, selected readings, and written assignments, examines topics in Russian film from socio-historical and cultural studies perspectives. Identification and critical analysis of concepts and assumptions underlying differing cinematic approaches to controversial topics. Taught in English. Same as RUSS 4851.

GSLL 5861-3. Absurd and Supernatural in Russian Literature. Studies themes of grotesque, bizarre, surreal, absurd, supernatural, and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharmis, Bulgakov, Siniavskii, Petrushevskiaia, and Pelevin, within contexts of Russian folklore, Freud and Jung's interpretations of jokes and dreams, and Romanticism. Recommended prereq., one upper division humanities course. Taught in English. Same as RUSS 4861.

GSLL 5900 (1-6). Independent Study. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent required.

Hebrew

HEBR 1010-4. Beginning Hebrew 1. First semester Hebrew is a beginning level course designed for students who have little or no prior knowledge of Hebrew. Begins with learning the Hebrew alphabet and immediately starts developing rudimentary Hebrew conversational, reading and writing skills. By the end of the semester students are expected to have attained basic understanding and expressive abilities in Hebrew.

HEBR 1020-4. Beginning Hebrew 2. Second semester builds on Hebrew skills introduced in the first semester, with a focus on speaking, comprehension, reading and writing. Students learn new verbal tenses and paradigms. The course blends a communicative method with formal grammatical instruction. By the end of this semester students are expected to be able to converse in, comprehend, and produce written basic Hebrew. Prereq., HEBR 1010 (min. grade C-) or instructor consent.

HEBR 1030-3. Biblical Hebrew 1. This course is designed to enable students to read the Hebrew Bible in the original language. The focus will be the ability to read the various genres of the text, utilizing both the tools of modern language acquisition and the study of classical grammar methods. Same as JWST 1030.

HEBR 1040-3. Biblical Hebrew 2. Building on HEBR/JWST 1030, this course continues to build expertise in reading the Hebrew Bible. Modern language acquisition and classical grammar study methods equip students with the tools to translate and read the various genres of the Biblical material. Prereq., HEBR/JWST 1030 or instructor consent. Same as JWST 1040.

HEBR 2110 (3-4). Intermediate Hebrew 1. Third semester Hebrew builds on skills introduced in the first two semesters and focuses on speaking, comprehension, reading and writing. Students learn new verbal tenses and paradigms, modes of expression and syntactical forms. The course blends a communicative method with formal grammatical instruction. By the end of the semester students are expected to be able to converse in, comprehend, and produce written Hebrew at an intermediate level. Meets MAPS requirement for foreign language. Prereq., HEBR 1020 (min. grade C-) or instructor consent.

HEBR 2120-4. Intermediate Hebrew 2. Focuses on texts, while still developing speaking, comprehension and writing skills. Students build on grammatical understanding while learning some of the more sophisticated verbal paradigms and nominal patterns. The course blends a communicative method with some formal grammatical instruction. By the end of this semester students are expected to converse in, comprehend, and produce written Hebrew at an intermediate level. Prereq., HEBR 2110 (min. grade C-) or instructor consent.

HEBR 2350-3. Introduction to Jewish Culture. Explores the development and expressions of Jewish culture as it moves across the chronological and geographical map of the historic Jewish people, with an emphasis on the variety of Jewish ethnicities and their cultural productions, cultural syncretism, and changes. Sets the discussion in a historical context, and looks at cultural representations that include literary, religious, and visual texts. Taught in English. Same as JWST 2350. Approved for arts and sciences core curriculum: human diversity.

HEBR 2352-3. Introduction to Modern Jewish History. Explores the major historical events and socio-cultural themes in modern Jewish history including the French Revolution, the rise of modern anti-semitism, the international migration of Jews, the Holocaust, and the establishment of Israel. Taught in English. Recommended prereq., HEBR 2350.

HEBR 2551-3. Secular Jewish Literature, Jews Coming of Age. Studies the literary expression of Jewish writers throughout the world in English translation. Gives special attention to questions of secularity versus tradition, identity, cultural change, diaspora and exile. Taught in English. HEBR 2551 and JWST 2551 are identical courses. Approved for arts and sciences core curriculum: literature and the arts.

HEBR 3010-3. Third Year Hebrew, First Semester. Focuses on students' active Hebrew language skills acquired in the first four semesters of Hebrew at CU-Boulder in weekly conversation and composition sessions. Develops grammatical understanding with a further exploration of the root, verbal and noun systems. Students are introduced to texts in contemporary Hebrew fiction and poetry, as well as some biblical readings. Prereq., HEBR 2120 (min. grade C-) or instructor consent.

HEBR 3020-3. Third Year Hebrew, Second Semester. Focuses on students' Hebrew language skills acquired in the first five semesters of Hebrew at CU-Boulder in weekly conversation and composition sessions. Develops grammatical understanding with a further exploration of the root, verbal and noun systems. Students are introduced to texts in contemporary Hebrew fiction and poetry, as well as some biblical readings, academic texts and Israeli newspapers. Prereq., HEBR 3010 (minimum grade C-) or instructor consent.

HEBR 3202-3. Women, Gender, and Sexuality in Jewish Texts and Traditions. Reads some of the ways Jewish texts and traditions look at women, gender and sexuality from biblical times to the present. Starts with an analysis of the positioning of the body, matter, and gender in creation stories, moves on to the gendered aspects of tales of rescue and sacrifice, biblical tales of sexual subversion and power, taboo-breaking and ethnos building, to rabbinic attitudes towards women, sexuality and gender and contemporary renderings and rereadings of the earlier texts and traditions. Taught in English. Same as JWST 3202. Approved for arts and sciences core curriculum: human diversity.

HEBR 3840-3. Independent Study. Prereqs., HEBR 1010, 1020, 2110, and 2120.

HEBR 3850-3. Independent Study. Prereqs., HEBR 1010, 1020, 2110, 2120, and 3840.

HEBR 4101-3. Topics in Hebrew Studies. Explores topics in Hebrew and Jewish literature and cultures. These may include topics such as diasporic literatures, Jewish artists and thinkers, courses on specific authors, figures or communities. Topics change each semester. May be repeated up to 9 total credit hours. Taught in English. Same as JWST 4101.

HEBR 4301-3. Venice: the Cradle of European Jewish Culture. Explores the development of European Jewish culture from the late Middle Ages to the present by focusing on Jewish life in the city of Venice, Italy. Emphasis is on the development of Venetian print culture and emergence of Italy as a center of Jewish publishing in both the religious and secular world. The course examines a variety of cultural and historical material including early printings of the Talmud, the creation of Yiddish popular literature, Hebrew rabbinic literature, responses to political turmoil, and the aftermath of the Nazi genocide. Taught in English. Prereq., HEBR/JWST 2350. Same as JWST 4301. Approved for arts and sciences core curriculum: literature and the arts.

Norwegian

NORW 1010-4. Beginning Norwegian 1.

NORW 1020-4. Beginning Norwegian 2. Prereq., NORW 1010 with a grade of C- or better.

NORW 1900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

NORW 2110-4. Second-Year Norwegian Reading and Conversation 1. Prereq., NORW 1020 with a grade of C- or better. Fulfills the arts and sciences language requirement for the BA and BFA degrees. Meets MAPS requirement for foreign language.

NORW 2120-4. Second-Year Norwegian Reading and Conversation 2. Continuation of NORW 2110, with focus on Norwegian culture and society. Small group work and class discussions. Prereq., NORW 2110 with a grade of C- or better.

NORW 3900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

Russian

RUSS 1010-4. Beginning Russian 1. For students with no previous training in Russian. Credit not granted for this course and RUSS 1050.

RUSS 1020-4. Beginning Russian 2. Continuation of RUSS 1010. Prereq., RUSS 1010 (min. grade of C-). Credit not granted for this course and RUSS 1050.

RUSS 1050-5. Intensive Beginning Russian. Covers same material as RUSS 1010 and RUSS 1020 combined in one course. Focuses on acquiring basic grammar (all cases for nouns, adjectives and possessives, verb conjugations, in all three tenses), and ability to understand and speak basic everyday Russian. Develops basic reading and writing skills and provides exposure to the fundamentals of the Russian culture. Credit not granted for this course and RUSS 1010 or 1020.

RUSS 1900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

RUSS 2010-4. Second-Year Russian 1. Review and continuation of basic skills learned in the first year: reading, writing, speaking, and oral comprehension. Prereq., RUSS 1020 or 1050 (min. grade C-). Meets MAPS requirement for foreign language. Satisfies arts and sciences language requirement.

RUSS 2020-4. Second-Year Russian 2. Continuation of RUSS 2010. Prereq., RUSS 2010 (min. grade of C-).

RUSS 3000-3. Advanced Conversation. Enables students to speak and understand contemporary Russian. Discussion topics and source materials vary. May be repeated up to 6 total credit hours. Prereq., RUSS 2010.

RUSS 3010-3. Third-Year Russian 1. Review of Russian grammar coordinated with reading, speaking, writing, and understanding modern Russian. Uses some texts from modern Russian literature. Prereq., RUSS 2020. Credit not granted for this course and RUSS 3060.

RUSS 3020-3. Third-Year Russian 2. Continuation of RUSS 3010. Prereq., RUSS 3010.

RUSS 3050-3. Business Russian. Studies general commercial practices, vocabulary, and terminology applied in various business transactions. Emphasizes oral and written communication and correspondence. Prereq., RUSS 2020 or instructor consent.

RUSS 3060-3. Advanced Russian for Heritage Speakers (Part 1). Enhances heritage student competence and performance in Russian language. The course offers intensive review of Russian grammar and focuses on developing advanced reading, writing and translation skills. Readings are selected from a wide range of contemporary writings that reflect current issues in Russia. Credit not granted for this course and RUSS 3010.

RUSS 3900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

RUSS 3930 (1-6). Russian Internship. Provides an academically supervised opportunity for upper-division students to earn credit while working for public or private organizations. Students apply skills and knowledge earned in the major, and supplement their work experience through directed readings and assignments. May be repeated up to 6 total credit hours. Restricted to junior and senior RUSS majors.

RUSS 4010-3. Advanced Conversation and Composition 1. Prereq., RUSS 3020.

RUSS 4020-3. Advanced Conversation and Composition 2. Prereq., RUSS 4010.

RUSS 4060-3. Advanced Russian for Heritage Speakers (Part 2). Enhances heritage student competence and performance in Russian language. The course offers intensive review of Russian grammar and focuses on developing advanced reading, writing and translation skills. Readings are selected from a wide range of contemporary writings that reflect current issues in Russia. Recommended prereq., Russian languages skills equivalent to three years of college Russian.

RUSS 4230-3. Russian Cultural Idioms. Focuses on the critical analysis of the Russian cultural discourse through Russian idioms. Taught in Russian. Prereq., RUSS 2020 or instructor consent. Same as GSSL 5230.

RUSS 4900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

Russian Courses Taught in English

RUSS 2211-3. Introduction to Russian Culture. Provides a chronological overview of civilization in the area now known as Russia, from its beginnings to the end of the Romanov dynasty, paying particular attention to the geographic, social, artistic, economic, and political forces that have combined to give the Russian people

and their culture their unique characteristics. Taught in English. Approved for arts and sciences core curriculum: historical context.

RUSS 2221-3. Introduction to Modern Russian Culture. Introduces students to major trends in Russian culture from the 1890s to the present, through the study of literature, art, architecture, music, journalism and film in an historical context. Addresses such questions as: how have past events affected Russian society? How can we use knowledge about Russia's past to understand social and cultural forces today? Taught in English. Approved for arts and sciences core curriculum: historical context.

RUSS 2231-3. Fairy Tales of Russia. Provides a general introduction to fairy tales including various theoretical approaches to classifying and interpreting them; introduces students to a wide selection of Russian folk and fairy tales. Examines the cultural, social and political values they reflect, as well as the continuing influence of fairy tales and folk beliefs in Russian literature, music, folk art, and film, as well as in the political propaganda of the 20th century. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

RUSS 2471-3. Women in Russian Culture: From Folklore to the Nineteenth Century. Explores the changing role and cultural images of women as reflected in Russian folklore, medieval documents, and literature (fiction and non-fiction) of the 10th–19th centuries. Focuses on the construction of gender in traditional (patriarchal) Russian culture and on the strategies of women's resistance to the political, social and cultural implications of gender stereotypes. Although the course includes works of Russian women and men alike, it intends to revise the canon of Russian culture by reading them through the prism of gender issues of their times. Knowledge of Russian is not required. Taught in English. Approved for arts and sciences core curriculum: historical context.

RUSS 2501-3. Russia Today. Introduces students to post-communist Russia, its values and ideologies. It is equally wrong to interpret post-Soviet society through the prism of the Cold War as through the models of contemporary post-industrial capitalism. Neither totalitarian nor liberal, contemporary Russia raises numerous questions about such ideological and cultural constructions as neo-liberalism and capitalism, nationalism, globalization, the state power, and popular vs. high cultures. Taught in English. Approved for arts and sciences core curriculum: contemporary societies.

RUSS 3201-3. German and Russian Culture in Comparative Perspective. Comparative overview of the evolution of German and Russian civilizations in the social, political, religious and cultural spheres. Taught in English. Same as GRMN 3201.

RUSS 3211-3. History of Russian Cinema. Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English. Prereq., RUSS 2221 or FILM 1502. Same as FILM 3211. Approved for arts and sciences core curriculum: literature and the arts.

RUSS 3231-3. Laughter in Slavic Cultures. Examines forms, genres and social functions of laughter in Slavic cultures (Russian, Polish, Czech, Serbian, and others). Analysis of the carnivalesque, grotesque, and irony in the works of Gogol, Chapek, Hashek, Lem, Kundera, Gombrowicz, Kharmis, Zoshchenko, Ilf and Petrov, Kusturica, Kieslewsky, and other authors; also provides an introduction to literature and film of Eastern Europe. Taught in English.

RUSS 3301-3. Contemporary Issues in Russian Film. Examines the relationship between politics, economics, aesthetics, and the way moral and social issues are treated in noteworthy Russian films from the last 20 years. Taught in English. Same as FILM 3301.

RUSS 3601-3. Russian Culture Past and Present. Russian culture from the ninth century to the present. Focuses on interdisciplinary exploration of literature, folklore, art, architecture, and music through study in St. Petersburg. Offered abroad only. Similar to RUSS 1601. Approved for arts and sciences core curriculum: historical context.

RUSS 3701-3. Slavic Folk Culture: Ideals and Values in the Contemporary World. Explores contemporary Slavic and American folk practices and investigates the possible origins and consequences of such practices. Focuses upon the value systems these practices represent, and ways that core values help to define identities and cultures. Topics include folk religion, magic, healing, life cycle and calendar rituals and folk music. Taught in English. Approved for arts and sciences core curriculum: ideals and values.

RUSS 4210 (1-3). Topics in Russian Culture. Selected topics in Russian literature, film, art, and music. May be repeated up to 9 total credit hours when topic varies. Taught in English.

RUSS 4221-3. Cultural Mythologies of Russian Communism. Investigates how cultural and ideological myths as those of a great leader, utopian future, a new man, a hero, "enemies of the people", and some others were produced in Soviet Russia from the 1920s to the 1950s; what general mechanisms of the cultural production in the age of modernity do they reveal. Recommended prereqs., RUSS 4821, 2221, 2211. Approved for arts and sciences core curriculum: ideals and values.

RUSS 4301-3. American–Russian Cultural Relations. Surveys the development of American-Russian cultural relations from the second half of the 18th century to the present. Examines the character and significance of Russian-American relations in social, intellectual, artistic, and other spheres from a comparative perspective. Taught in English. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: historical context or U.S. context.

RUSS 4421-3. Gogol. Explores major fictional and dramatic texts of great Russian writer Nikolai Vasil'evich Gogol (1809–52)—"The strangest prose-poet Russia ever produced" (Nabokov). Works will be analyzed in the context of Western and Russian Romanticism. Relevant nonfiction texts will also be introduced when appropriate. Class will be run largely as group discussion, with necessary historical and critical background provided. Same as GSLL 5421.

RUSS 4431-3. Dostoevsky. Focuses on close reading of major novels and other works by Dostoevsky, one of the most important psychological novelists in modern literature, a profound religious thinker, and the greatest crime novelist in the world. Taught in English. Same as GSLL 5431.

RUSS 4441-3. Tolstoy. Examines the developments of Tolstoy's thought and literary style through study of the novel *War and Peace* and short works from different periods of Tolstoy's writing. Taught in English. Recommended prereq., some experience with college-level expository writing. Same as GSLL 5441.

RUSS 4451-3. Chekhov. Analyzes the life and creative works of the author of some of the funniest and some of the gloomiest stories in Russian literature. Examines Chekhov's major plays that laid the foundation for modernist theatre. Taught in English. Same as GSLL 5451.

RUSS 4471-3. Women in 20th Century Russian Culture. Acquaints students with major issues concerning women in 20th century Russian culture. Examines sources from folk culture, popular culture, and high culture (poetry, prose, songs, tales, visual art, and cinema) that mythologize or question women's images and societal roles. All texts and films are offered in English translation. Taught in English. Recommended prereq., course(s) in literature or film studies, and upper-division writing courses. Same as WMST 4471 and GSLL 5471. Approved for arts and sciences core curriculum: human diversity.

RUSS 4811-3. 19th Century Russian Literature. Surveys background of Russian literature from 1800 to 1900. Russian writers and literary problems in the 19th century emphasizing major authors: Pushkin, Lermontov, Gogol, Dostoevsky, Turgenyev, Tolstoy, and Chekhov. Taught in English. Same as HUMN 4811. Approved for arts and sciences core curriculum: literature and the arts.

RUSS 4821-3. 20th Century Russian Literature and Art. Interdisciplinary course emphasizing the influence of art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the gradual cultural relaxation that culminated in perestroika and Glasnost. Taught in English. Same as HUMN 4821. Approved for arts and sciences core curriculum: literature and the arts.

RUSS 4831-3. Contemporary Russian Literature. Acquaints students with the most representative works of Russian writers from the 1960s to the present in a broad historical and political perspective. Examines the relationships between ideological concepts and aesthetics, and the treatment of moral and social issues in recent literary works. All readings are provided in translation. Taught in English. Recommended prereq., lower level literature course. Approved for arts and sciences core curriculum: literature and the arts or contemporary societies.

RUSS 4851-3. Critical Thinking: Russian Film and Society. Through structured discussions, selected readings, and written assignments, examines topics in Russian film from socio-historical and cultural studies perspectives. Identification and critical analysis of concepts and assumptions underlying differing cinematic approaches to controversial topics. Taught in English. Prereqs., RUSS 2221 or RUSS/FILM 3301 and RUSS 3010 or equivalent. Same as GSLL 5851.

RUSS 4861-3. Absurd and Supernatural in Russian Literature. Studies themes of grotesque, bizarre, surreal, absurd, supernatural, and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharms, Bulgakov, Siniavskii, Petrushevskaia, and Pelevin, within contexts of Russian folklore, Freud and Jung's interpretations of jokes and dreams, and Romanticism. Taught in English. Recommended prereq., one upper division humanities course. Same as GSSL 5861.

Nordic Studies (Scandinavian)

Nordic Studies Courses Taught in English

SCAN 1202-3. Tolkien's Nordic Sources and the Lord of the Rings. Examines the Nordic aspect of J.R.R. Tolkien's work, especially *The Lord of the Rings*. The course concentrates on the Nordic saga tradition, mythology, folklore and fairy tales Tolkien used as his sources. Students will explore the transformations of these sources from prehistoric times to contemporary cinematic adaptations, while paying special attention to cultural appropriations, national revisions, and political alterations. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

SCAN 1900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

SCAN 2201-3. Introduction to Modern Nordic Culture and Society. Provides a comprehensive introduction to modern Nordic culture and society. Surveys the history of Nordic countries and examines their culture using art, architecture, literature, and film. Studies social issues, environmental concerns, and political patterns. In profiling aspects of culture and society unique to Nordic countries, students arrive at a conception of a collective Nordic identity. Taught in English. Approved for arts and sciences core curriculum: contemporary societies.

SCAN 2202-3. The Vikings. Examines the social, cultural, technological, and artistic backgrounds of the Viking experience, charting the history of the period both within the Nordic region and Europe as well as North America. Additionally, looks at some of the lasting influences of the Vikings on Western civilization. Taught in English. Approved for arts and sciences core curriculum: historical context.

SCAN 2900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

SCAN 3020-3. Advanced Readings in Scandinavian. Develops the type of advanced reading knowledge of the four closely related Scandinavian languages (Swedish, Danish, and the two Norwegian standards) that will prepare students for their senior thesis and for possible graduate work. Readings will help students see relationships and connections operating across national and linguistic borders within the Nordic region. Prereqs., NORW/SWED 2120 and NORW/SWED 3900 for 3 credits.

SCAN 3201-3. Contemporary Nordic Society and Culture. Explores contemporary Nordic culture and society with special focus on Iceland. Emphasis is on the relationship between historical, geographic, artistic, and political forces in Iceland and their effects on culture and society. Provides insight into the life and attitudes of contemporary Icelanders and stresses their place in the global culture of today. Taught in English. Recommended prereq., SCAN 2201. Approved for arts and sciences core curriculum: contemporary societies.

SCAN 3202-3. Old Norse Mythology. Surveys the mythology and heathen cult practices of the Old Norse world. Students learn to read mythological texts and study the major gods (Odin, Thor, Frey and Freyja, among others), along with other mythological beings. The course examines and evaluates evidence for beliefs and cult practices in texts, art, archeological finds, and other sources. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

SCAN 3203-3. 19th and 20th Century Nordic Literature. Examines the Nordic region's influence on social realism, expressionism, and postwar literature, including such themes as women in society, nature and industrialization, and identity and angst. May include works by Ibsen, Strindberg, Dinesen, and Nobel Prize winners Lagerlof, Hamsun, Undset, and Lagerkvist. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

SCAN 3204-3. Medieval Icelandic Sagas. Advanced introduction to medieval Icelandic saga with readings in the family, outlaw, skald, and legendary sagas as well as the main scholarly approaches to this unique literature. Topics include honor, blood feud, fate, sexuality/gender, oral composition, and legend. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

SCAN 3205-3. Scandinavian Folk Narrative. Introduces the rich tradition of Scandinavian oral narrative. Looks at relationships between the various genres of oral narrative and their historical, social, and cultural contexts. Genres studied may include ballad, fairy tale, rural tale, and urban legend. Explores various interpretive methodologies. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

SCAN 3206-3. Nordic Colonialisms. Examines Nordic colonial enterprise and the relationship between the Scandinavian center and colonial peripheries from the Arctic to the Caribbean, Africa, and India. Studies colonial and postcolonial cultures, and postcolonial criticism and theory. Taught in English. Approved for arts and sciences core curriculum: human diversity.

SCAN 3208-3. Women in Nordic Society: Modern States of Welfare. Examines the role and status of women and marginalized social classes in the Nordic countries, whose societies have been heralded as egalitarian models since the twentieth century. Texts include a variety of media, from literature to sociological works to artifacts of political and popular culture. Taught in English. Same as WMST 3208. Approved for arts and sciences core curriculum: human diversity.

SCAN 3209-3. Contemporary Nordic Literature and Film. Advanced introduction to contemporary Nordic literature and film. Readings/screenings of recent translated Nordic texts and films, presenting a broad spectrum of contemporary issues, along with current critique and theoretical approaches. Topics: history, culture, translation, gender/sexuality, national identity, minority issues, etc. Taught in English.

SCAN 3506-3. Scandinavian Drama. Examines the many contributions of Scandinavian dramatists to world theater from the 18th century to the present. With emphasis on Holberg, Bjornson, Ibsen, Strindberg, and Bjorneboe, surveys Enlightenment comedy, national romanticism, realism, naturalism, symbolism, expressionism, and Brechtian epic theater. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

SCAN 3900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

Swedish

SWED 1010-4. Beginning Swedish 1.

SWED 1020-4. Beginning Swedish 2. Prereq., SWED 1010 (min. grade of C-).

SWED 1900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

SWED 2110-4. Second-Year Swedish Reading and Conversation 1. Prereq., SWED 1020 (min. grade C-). Meets MAPS requirement for foreign language. Fulfills the arts and sciences language requirement for the BA and BFA degrees.

SWED 2120-4. Second-Year Swedish Reading and Conversation 2. Prereq., SWED 2110 with a grade of C- or better.

SWED 3900 (1-6). Independent Study. May be repeated up to 6 total credit hours.

Global Studies Residential Academic Program

GSAP 1000-3. World Politics and Society. Explores the history leading up to and away from- the attacks of 9/11 within an American framework. Topics to be covered include: America's relationship with key countries since 1945; the rise of Muslim extremism; modern terrorism and its meaning; the importance of oil; and the events of 9/11 and the Bush Administration's response to it, at home and abroad. Restricted to G-RAP students.

GSAP 2010-3. Introduction to National Security. Introduces national and international security studies to students. The course examines the influence of history, domestic politics, and international events and actors on the development of security policy. Restricted to G-RAP students.

GSAP 2020-3. Topics in National Security. Intensive look at specific security issues. This course focuses on the specifics of policy development related to functional issues (political, military, and non-traditional) as well as threats within specific regions. In addition to class, each student will focus on an issue of their choosing. Recommended prereq., GSAP 2010. Restricted to G-RAP students.

GSAP 2500-3. Global Society: The International Rights of the Child. Students will employ tools of social science research to engage in critical thinking about hu-

man rights as they apply to children in a global context. A variety of interrelated questions will be addressed such as: What are human rights? Do children have rights that are distinct from the rights of adults? What human rights challenges do children face around the world? A variety of global challenges to the rights of children will be considered, with special focus on issues of child trafficking and participation in armed conflict.

GSAP 3000-3. Historic and Contemporary Barcelona. Students will be invited to link their own knowledge of and experiences in Boulder, Colorado, and the United States to Barcelona, Catalonia, and Spain—all within the larger framework of globalization. Key themes include national and imperial history, peace and security, trade and economics, and the mosaic of cultures that comprise Barcelona, Catalonia, and Spain as seen through the arts, governance, and diplomacy.

History

Many 1000-level courses, most 3000-level seminars, and all 4000-level courses count toward the 36 credit hour major requirements. Only one 2000-level course may be applied to the major requirements. The remaining 1000-level courses and any further 2000-level courses count within the 45 credit hour maximum in history but do not fill requirements toward the 36 credit hour major.

Methodological, Comparative, and General

HIST 1010-3. Western Civilization 1: From Antiquity to the 16th Century. Surveys the development of Western civilization from its beginnings in the ancient near East through the Reformation of the 16th century. Also available through correspondence study. Credit not granted for this course and HIST 1030. Meets MAPS requirement for social science: general and world history. Approved for arts and sciences core curriculum: historical context.

HIST 1020-3. Western Civilization 2: 16th Century to the Present. Surveys political, economic, social, and intellectual developments in European history from the 16th century to the present. Similarities and contrasts between European states are underscored, as is Europe's changing role in world history. Also available through correspondence study. Credit not granted for this course and HIST 1040. Meets MAPS requirement for social science: general and world history. Approved for arts and sciences core curriculum: historical context.

HIST 1800-3. Introduction to Global History. Applies a broad perspective to the global past in order to illuminate how common historical patterns and processes as well as unique elements shaped the human experience. Using a thematic approach, this introductory course highlights cross-cultural interactions among societies, and, when relevant, how historical processes that began centuries ago still impact the contemporary world. Topic will vary by semester. Restricted to HIST BA and HIST Additional majors only.

HIST 2100-3. Revolution in History. Examines the causes, character, and significance of political revolution in world history. Concentrating on one of the major revolutions of modern history, it examines why revolutions occur, who participates in revolution, and to what effect. Specific course focus varies. Approved for arts and sciences core curriculum: historical context.

HIST 2220-3. History of War and Society. Focuses on war and society in a variety of global contexts. Explores the character, origins, and social, political, and intellectual impacts of war in contexts ranging from several centuries of international conflict to the experience of individual nations in specific wars. Topic varies in any given semester; contact Department of History for details. Approved for arts and sciences core curriculum: historical context.

HIST 3010-3. Communist Societies in Historical Perspective. Examines communist societies in Asia and Europe, 1917 to the present, using primary sources to compare how different social groups experienced such regimes, the social bases of revolutions that created and ended communism, and why some communist regimes have survived. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3110-3. Honors Seminar. Practical historiography for students who wish to write a senior honors thesis. Emphasizes choice of topic, critical methods, re-

search, organization, argumentation, and writing. May be repeated up to 6 total credit hours. Prereqs., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-), honors standing, and instructor consent.

HIST 3120-3. Honors Thesis. Prereq., HIST 3110 and instructor consent.

HIST 3800-3. Seminar in Global History. Organized around themes that change year to year, this seminar allows students to explore and research processes, phenomena, and events of global significance in historical context. Stress will be upon subjects that span multiple world areas. Possible topics include: the international arms trade; slavery; health and disease; youth culture; women's rights; genocide. See department for current theme. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors. Formerly HIST 3050.

HIST 3840 (1-3). Independent Study.

HIST 4020-3. Capstone: Comparative History. Explores historical themes from a comparative perspective. As a culmination of the major, it encourages students to think more analytically about historical change. Consult the online Schedule Planner for specific topics. Team-taught by several faculty. May be repeated up to 6 total credit hours within the degree. Restricted to senior HIST majors (excludes History minors).

HIST 4030-3. History of Slavery: Origins to Present. Examines slavery across the globe from its origins in ancient societies to the present. Includes the legal, social, economic, linguistic, and gender aspects of slavery, among other subjects. Restricted to sophomores/juniors/seniors.

HIST 4040-3. The History of Space Exploration and Defense. This course examines the development and impact of American, Soviet/Russian, and European civilian and military space activities from the dawn of the space age to the space challenges of the 21st century. Restricted to juniors/seniors.

HIST 4050-3. The World War II Era. The World War II era witnessed transformations in the social, political, and economic orders across the globe. Traces the domestic and international developments, including military issues, that shaped the period in Europe, Asia, and the United States and assesses the war's legacy. Restricted to juniors/seniors.

HIST 4110-3. Natives and Newcomers: Encounters in the Americas. Focuses on the first generations of interaction between natives and newcomers in the Americas, 1492–c.1650. Class will open with general section on colonialism and contact dynamics, then explore four contact areas (Caribbean, Valley of Mexico, St. Lawrence River Valley, Chesapeake) in depth. In-class discussion of primary sources a critical component of the course. Prereq., junior standing or successful completion of one lower-division history course.

HIST 4320-3. The History of the Mediterranean, 1000–1600. Familiarizes students with the Mediterranean ecumene covering concepts such as the Renaissance, the Crusades, traders and travelers, religions and cities. Explores both conflicts (military, confessional) and exchanges (commercial, artistic, scientific) thus helping students think cross culturally, comparatively, and thematically. Emphasizes the Mediterranean contribution to historical developments of western Europe, the Middle East, and North Africa. Prereq., HIST 1010, 1061, 1308, 4061, 4071, 4081, 4091, or 4711. Restricted to sophomores/juniors/seniors.

HIST 4640-3. Women, Gender and War. Study of how women experience war, and how the structure, practice and memory of war, and the rights and obligations of military service structure gender (masculinity and femininity) and are structured by the gender system. Prereq., HIST 1020 or 1025 or 1040 or 1045, or WMST 2000. Restricted to sophomores, juniors or seniors. Same as WMST 4640.

HIST 4820-3. Human Rights: Historical Perspectives. Examines the history of modern ideas of human rights. Focuses on themes such as the universalism/cultural relativism debate, colonialism, nationalism, refugees and stateless peoples, the United Nations and humanitarianism, ethnic genocide in Rwanda, and human rights abuses by the Taliban regime in Afghanistan. Prereq., 6 hours of HIST credit.

HIST 4930 (1-3). History Internship. Matches selected students with supervised internships in professional archives research libraries, historical associations, and special projects. Interns apply their academic area specialty to their work in the field. Internships have a work and academic (reading and writing) component. May be repeated up to 6 total credit hours. Recommended prereq., comple-

tion of lower-level HIST course work (HIST 1015/1025, etc.). Restricted to junior or senior HIST majors. May be taken pass/fail only.

HIST 5000-3. Historical Methods: Introduction to the Professional Study of History. Introduces purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism.

HIST 5840 (1-3). Independent Study.

HIST 6020-3. Modern Empires: Readings in Imperial History. Introduces major topics and themes in imperial history. Reviews central theories of modern colonial empire, ranging from economic and political motivations for expansion, to the cultural and social impact of empire, to post-colonialism.

HIST 6030-3. Readings: Frontiers and Borderlands in the Americas. Introduces classic and recent scholarship on frontiers and borderlands in the Americas. Chronological focus will vary by semester, from contact through twentieth century. A hemispheric approach encourages comparative insights about topics such as colonialism and ecological change, war and violence, indigenous resistance, acculturation, ethnogenesis, and evolving ideas about race, gender, and identity at the margins of empires and nation-states. Restricted to graduate students.

HIST 6150-3. Critical and Theoretical Issues in Museums. Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence, and relations between curatorial practice, collecting, and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present. Prereq., MUSM 5011 or instructor consent. Same as MUSM 6150, ARTH 6150, and ANTH 6150.

HIST 6330-3. History of Sex and Sexuality. Examines major historical trends in the study of meanings and practices of sex and sexuality. Focuses on emergence and negotiation of sexual matters in circumstances where sex and identity were not coterminal. Restricted to graduate students.

HIST 6500-3. Comparative Labor History. Examines major issues in labor history through comparative study of Europe, the United States, and Latin America. Issues to be studied include working-class formation, the development of worker identities, and workers and the state.

HIST 6940-1. Master's Degree Candidate.

HIST 6950 (1-6). Master's Thesis.

HIST 7840 (1-3). Independent Study.

HIST 8990 (1-10). Doctoral Dissertation. All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Europe: Ancient and Medieval

HIST 1051-3. The World of the Ancient Greeks. Surveys the emergence, major accomplishments, failures, and decline of the world of the ancient Greeks, from Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (2000–30 B.C.) Same as CLAS 1051. Approved for arts and sciences core curriculum: historical context.

HIST 1061-3. The Rise and Fall of Ancient Rome. Surveys the rise of ancient Rome in the eighth century B.C. to its "fall" in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. Same as CLAS 1061. Approved for arts and sciences core curriculum: historical context.

HIST 2041-3. War and Society in Ancient Greece. Studies Greek warfare in its cultural, social, and economic contexts, in the light of anthropological comparisons and modern theories. No Greek or Latin required. Same as CLAS 2041.

HIST 3011-3. Seminar in Ancient History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3511-3. Seminar in Medieval History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3841 (1-3). Independent Study.

HIST 4021-3. Athens and Greek Democracy. Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources. Restricted to sophomores/juniors/seniors. Same as CLAS 4021.

HIST 4031-3. Alexander the Great and the Rise of Macedonia. Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great. Prereq., one of the following: CLAS 1509, 3039, 3113, 4051, 4139, 4149, CLAS/HIST 1051, 2041, 4021, or 4041. Same as CLAS 4031.

HIST 4041-3. Classical Greek Political Thought. Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. Prereq., CLAS/HIST 1051, CLAS/HIST 1061, HIST 1010, PSCI 2004, or PHIL 3000. Restricted to sophomores/juniors/seniors. Same as CLAS 4041 and PHIL 4210.

HIST 4061-3. Twilight of Antiquity. Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the east as Byzantium. Emphasizes Christianity; barbarians; social, economic, and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required. Same as HIST 5061 and CLAS 4061.

HIST 4071-3. Seminar in Ancient Social History. Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence, and the selective use of comparisons with better known societies. No Greek or Latin required. May be repeated up to 9 total credit hours. Restricted to sophomores/juniors/seniors. Same as CLAS 4071.

HIST 4081-3. The Roman Republic. Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republic government. Readings are in the primary sources. No Greek or Latin required. Same as CLAS 4081.

HIST 4091-3. The Roman Empire. Studies Imperial Roman history beginning with the Roman Revolution and ending with examination of the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters, and personalities of the Empire. Restricted to sophomores/juniors/seniors. Same as CLAS 4091.

HIST 4121-3. Diving for the Ancient Past. Through discussions, readings, videos, and student research, this course explores all aspects of Mediterranean maritime archaeology and examines the role of the sea and seafaring in the ancient civilizations of Greece and Rome. Prereq., HIST 1051 or 1061. Restricted to sophomores/juniors/seniors.

HIST 4511-3. Europe in the Dark Ages (400–1000 A.D.). Examines the history of Europe from the fall of the Roman Empire to the turn of the first millennium. Treats social, political, and religious transformations in the barbarian kingdoms, and considers the persistence of Roman institutions and culture and the impact of Christianity in northern Europe. Prereq., HIST 1010, 1030, 2170 or 2543. Restricted to sophomores/juniors/seniors.

HIST 4521-3. Europe in the High Middle Ages (1000–1400 A.D.). Examines the history of Europe from the emergence of feudal institutions to the rise of nation states, with specific attention to social, intellectual and religious change, the role of law and ritual, the crusades and European expansion, and urban growth and identity in the West. Prereq., HIST 1010, 1030, 2170, or 2543. Restricted to sophomores/juniors/seniors.

HIST 4711-3. On the Fringes of Medieval Europe (950–1350). Studies the history of medieval Europe and its expansion from the period of the First Crusade through the Black Death. Topics include the role of the Mediterranean, the expansion of European modes of government and law, the commercial revolution, and the role of Christianization with a specific emphasis on the process of colonization, conquest, and crusade. Prereq., HIST 1010, 1030, 2170, or 2543. Restricted to sophomores/juniors/seniors.

HIST 4761-3. Roman Law. Same as HIST 5761 and CLAS 4761.

HIST 5061-3. Twilight of Antiquity. Same as HIST 4061 and CLAS 5061.

HIST 5761-3. Roman Law. Same as HIST 4761 and CLAS 5761.

HIST 5841 (1-3). Independent Study.

HIST 6511-3. Readings in Medieval History. Prereq., instructor consent.

HIST 7011-3. Seminar in Ancient History. Examines topics in ancient Greek and Roman history at an advanced seminar level. May be repeated up to 6 total credit hours. Same as CLAS 7011.

HIST 7551-3. Seminar: Medieval History.

HIST 7581-3. Latin Paleography. Discusses the development of formal scripts from the late Roman Empire to the 15th century. Provides practice in identification, transliteration, and translation of medieval manuscripts. Prereqs., graduate standing and reading knowledge of Latin.

HIST 7841 (1-3). Independent Study.

Europe: Modern

HIST 2002-3. Introduction to Central and East European Studies. Examines major themes in the history of Russia and East-Central Europe since the early modern era, introduces the literature and arts of the region, and presents current political, social, and economic issues. Same as CEES 2002. Approved for arts and sciences core requirement: historical context.

HIST 2112-3. Early Modern Societies (1450–1700). Examines major themes in European Early Modern history. Issues to be explored include the Renaissance and the Reformation, popular culture, social history, and states and warfare. Specific course focus may vary. Similar to HIST 2113. Approved for arts and sciences core curriculum: historical context.

HIST 3012-3. Seminar in Modern European History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3112-3. Seminar in Renaissance and Reformation. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3212-3. Seminar in Early Modern Europe. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3842 (1-3). Independent Study.

HIST 4122-3. Europe During the Renaissance. Explores the history and culture of Western Europe, 1300–1520. Comprehensive in scope, with analysis of political, economic, social, religious, intellectual, and artistic matters. Discusses significance of the Renaissance for origins of modern civilization. Prereq., HIST 1010. Restricted to sophomores/juniors/seniors.

HIST 4212-3. Early Modern Europe: Religion, Politics, and Society (1500–1789). Examines European history through three centuries of dynamic change. Addresses the rise of centralized nation-states, the Reformation and Counter-Reformation, religious wars, colonialism and racism, shifting class and gender relations, and the emergence of Enlightenment culture. Restricted to sophomores/juniors/seniors.

HIST 4222-3. War and the European State, 1618–1793. Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution). Restricted to sophomores/juniors/seniors. Same as HIST 5222.

HIST 4232-3. The Age of Reason, Montaigne to Voltaire. Studies major European intellectual trends from late 16th century through the Enlightenment. Prereq., HIST 1020. Restricted to sophomores/juniors/seniors.

HIST 4303-3. Venice and Florence in the Renaissance. Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy. Prereq., HIST 1010. Restricted to sophomores/juniors/seniors. Formerly HIST 4112.

HIST 4312-3. 19th Century Europe. Concerned with major social, political, and cultural developments in Europe from circa 1800 to the outbreak of World War I. Special emphasis is placed upon the Napoleonic experience, the rise of modern nationalism, romanticism, Darwinism and its social applications, the Industrial

Revolution, imperialism, the emergence of modern ideologies, and the background of World War I. Prereq., HIST 1020 or 1040. Restricted to sophomores/juniors/seniors.

HIST 4412-3. Europe, 1890–1945. Examines the origins, character, and significance of the First and Second World Wars for the major nations of Europe during the first half of the 20th century. Prereq., HIST 1020. Restricted to sophomores/juniors/seniors.

HIST 4422-3. World War I: The Brutalization of Europe. Examines the causes of World War I, the nature of the war itself, and its political, psychological, cultural, and social impacts. Considers the link between World War I and the rise of modern totalitarian movements and ideologies. Prereq., HIST 1020 or 1040. Restricted to sophomores/juniors/seniors.

HIST 4442-3. Europe since 1945. Explores Europe from the end of World War II through the present day. Topics include postwar reconstruction; the cold war; anticommunist opposition and new social movements; consumer culture and punk music; the fall of communism; the Yugoslav wars; and European unity. Prereq., HIST 1020 or 1040 or 4412, or PSCI 2012. Restricted to sophomores/juniors/seniors.

HIST 5012-3. Graduate Colloquium in European History. Acquaints students with key works in the literature of European history, and addresses matters of method and interpretation. May be repeated up to 6 total credit hours. Prereq., admission to the graduate program in history.

HIST 5222-3. War and the European State, 1618-1793. Same as HIST 4222.

HIST 5842 (1-3). Independent Study.

HIST 6012-3. Readings in Modern European History.

HIST 6122-3. Readings in 16th Century Europe.

HIST 6212-3. Readings in 17th Century Europe.

HIST 7052-3. Seminar: Modern European History.

HIST 7252-3. Seminar: Early Modern Europe, 16th to 18th Centuries.

HIST 7842 (1-3). Independent Study.

Europe: Specific Countries

HIST 1113-3. Introduction to British History to 1660. Deals with Roman, medieval, and early modern periods. Covers the demographic, economic, and social patterns, political and religious developments, and cultural changes that contributed to the formation of the English nation. Formerly HIST 2103. Approved for arts and sciences core curriculum: historical context.

HIST 1123-3. Introduction to British History Since 1660. Deals with the period from the 17th century to the present. Political, economic, social, and imperial developments that contributed to creation of the modern industrial and democratic state are the major issues covered. Formerly HIST 2123. Approved for arts and sciences core curriculum: historical context.

HIST 3113-3. Seminar in Medieval and Early Modern English History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3133-3. Seminar in Britain since 1688. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3713-3. Seminar in Russian History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.00 or higher. Restricted to HIST majors.

HIST 3843 (1-3). Independent Study.

HIST 4013-3. English Constitutional History to 1688. Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure, and the court and jury system from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American and English legal systems. Prereq., HIST 1010, 1030, 2103 or 2543.

HIST 4053-3. Britain and the Empire, 1688–1964. Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa, and the Americas. Restricted to sophomores, juniors or seniors. Same as HIST 5053.

HIST 4063-3. Women in Victorian England. Examines changing roles and status of women in a period of expansion. Studies the impact of industrialization on working women, sexuality, family planning, expansion of women in education, politics and the professions, the single women crisis, and women's rights. Restricted to sophomores/juniors/seniors. Same as WMST 4063.

HIST 4083-3. Revolution and Nationalism in Modern Ireland. Surveys Irish nationalist movements since the eighteenth century, treating constitutional nationalism, revolutionary republicanism, and Gaelic cultural movements while also examining the development of Unionism in Ulster as a response to political and cultural nationalism. Emphasizes the political, religious, and cultural roots of the current sectarian crisis in Northern Ireland, and analyzes that crisis up to the present day. Prereqs., HIST 1020, 1040, 2123, or 4053. Restricted to sophomores/juniors/seniors. Credit not granted for this course and HIST 2513.

HIST 4123-3. Medieval England. Treats the major developments in English history from the Anglo-Saxon period through the 15th century. Emphasizes late medieval English society during the 13th and 14th centuries. Restricted to juniors/seniors.

HIST 4133-3. Tudor England. Deals with the history of England from 1485 to 1603. Examines patterns of daily life, the impact of the Reformation and the Renaissance, and the development of Parliament and the monarchy under the Tudor rulers, especially Henry VIII and Elizabeth. Prereqs., HIST 1010, 1030, or 2103. Restricted to sophomores, juniors, and seniors.

HIST 4143-3. Stuart Britain. Covers the history of the British Isles from 1603 to 1714, the era of the English Civil War and the Glorious Revolution. Traces economic and social relationships, cultural change, and religious and political conflict under the Stuart monarchs. Prereq., HIST 1010, 1030, 2103, or 2123. Restricted to sophomores, juniors, and seniors.

HIST 4153-3. Emergence of Modern Britain, 1688–1852. Surveys British history from the Revolution of 1688 to the Great Exhibition in 1851. Topics include creation of the United Kingdom, traditional popular culture, birth of a consumer society, the British Enlightenment, the Evangelical Revival, loss of the American colonies, imperial expansion in Asia, war with Revolutionary and Napoleonic France, the Industrial Revolution, and the impact of utilitarianism and political radicalism. Prereq., HIST 1020, 1040, 2103, or 2123. Restricted to sophomores/juniors/seniors.

HIST 4223-3. Revolutionary France. Examines the two questions most fundamental to any scholarly understanding of the French Revolution: What were the political, social, and cultural causes of revolution in 1789? Why did the French Revolution become increasingly radical after 1789? Restricted to juniors and seniors.

HIST 4233-3. History of France since 1815. Examines the ongoing struggle between the revolutionary and counter-revolutionary traditions of France and how it shaped the political history and affected the social, cultural, and intellectual character of the nation from 1815 to the present. Restricted to juniors and seniors.

HIST 4303-3. Venice and Florence in the Renaissance. Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy. Prereq., HIST 1010. Restricted to sophomores/juniors/seniors. Formerly HIST 4112.

HIST 4313-3. History of Italy. Survey of political, social, and intellectual history of Italy and its people. Taught in English. Restricted to sophomores/juniors/seniors. Same as ITAL 4250.

HIST 4413-3. German History to 1849. Cultural, political, and social history of Germany up to and including the revolutions of 1848. Emphasizes the political history of Prussia and such cultural phenomena as German romanticism. Prereq., HIST 1020. Restricted to sophomores/juniors/seniors.

HIST 4423-3. German History Since 1849. Cultural, political, and social history of Germany since 1849. Emphasizes German unification, Bismarkian foreign policy, the rise of neoromanticism, Weimar politics, and the rise of national socialism. Prereq., HIST 1020. Restricted to sophomores/juniors/seniors.

HIST 4433-3. Nazi Germany. Focuses on the political, social, cultural, and psychological roots of national socialism, with the nature of the national socialist regime, and those politics and actions that came directly out of its challenge to values central to Western civilization. Studies how Nazism came out of this civilization. Restricted to seniors.

HIST 4613-3. History of Eastern Europe to 1914. Examines the conquering of the kingdoms of Eastern Europe by the Russian, Prussian, Habsburg, and Otto-

man Empires, and the formation of national consciousness among the subject peoples of the region before World War I. Prereq., HIST 1020 or 1040. Restricted to sophomores/juniors/seniors.

HIST 4623-3. History of Eastern Europe Since 1914. Examines the struggle of nations of eastern Europe to assert their independence, from break-up of the imperial system at the end of World War I, through the Soviet bloc that emerged after World War II, to the establishment of democratic governments after the 1989 revolutions. Prereq., HIST 1020 or 1040 or PSCI 2012. Restricted to sophomores, juniors or seniors.

HIST 4643-3. Poland since the 16th Century: Democracy and Nation. Traces themes of democracy and nationalism in Polish history from the "Noble Republic" of the early modern era, through the struggles with fascism and communism in the 20th century, to Poland's current position on the eastern edge of Western Europe. Restricted to sophomores/juniors/seniors.

HIST 4713-3. History of Russia through the 17th Century. Introduces the history and culture of Russia from the 9th to the 17th century. Emphasizes selected topics in social, economic, religious, and cultural history, including the formation of the Russian state conversion to Orthodox Christianity, the Mongol invasion, and the reign of Ivan the Terrible. Restricted to juniors and seniors.

HIST 4723-3. Imperial Russia. Surveys major cultural, social, and economic changes from the reign of Peter the Great through World War I. Restricted to juniors and seniors.

HIST 4733-3. The Russian Revolution and the Soviet Regime. Covers in detail the significant social, economic, and political events of Soviet Russia from the February Revolution of 1917 to the present. Prereq., junior or senior standing.

HIST 4803-3. Special Topics in European History. Covers specialized topics in early modern and modern European history, usually focusing on one country. May be repeated up to 6 total credit hours. Prereq., HIST 1010, 1020, 1030, or 1040.

HIST 5053-3. Britain and the Empire, 1688–1964. Same as HIST 4053.

HIST 5843 (1-3). Independent Study.

HIST 6113-3. Readings in English History to 1714.

HIST 6123-3. Readings in English History since 1688.

HIST 6413-3. Readings in Modern German History. Prereq., general background in European history.

HIST 7153-3. Seminar: English History, 800–1688. Prereq., background in English or European history.

HIST 7183-3. Interdisciplinary Seminar in British Studies. Introduces students to the methodologies and texts/sources of current work in English literature, history, theatre, art history, and social sciences. Students write a paper based upon the University of Colorado's distinctive research collections in British studies. Prereq., graduate standing. Same as ENGL 7889.

HIST 7843 (1-3). Independent Study.

Europe: Topical

HIST 3414-3. Seminar in European Intellectual History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3844 (1-3). Independent Study.

HIST 4064-3. Early Modern Spain. Surveys the history of the Iberian Peninsula from the late medieval period through early modern period. Explores the thought, art, politics, and socio-economic milieu of Spain during the Golden Age. Topics include attitudes toward minorities, the Inquisition, the establishment of a colonial empire, rituals, court culture and architecture, religious conflicts, and literary production. Prereq for HIST 4064., HIST 1010 or 1030. HIST 4064 is restricted to sophomores, juniors or seniors. Same as HIST 5064.

HIST 4134-3. Elizabeth I and Her Times. Interdisciplinary course explores different aspects of the reign of Elizabeth I: social and political history; literature; theater; and music. Explores the role and impact of a female ruler on English culture. Restricted to juniors/seniors. Same as ENGL 4583 and THTR 4091.

HIST 4314-3. History of Science from the Ancients to Sir Isaac Newton. History of science from pre-Socratics to Isaac Newton, underscoring major intellectual themes in scientific thought and the historical context in which they developed. Prereq., HIST 1010 or 1030. Restricted to sophomores/juniors/seniors.

HIST 4324-3. History of Modern Science. Historical and sociological study of scientific institutions and ideas as they interacted with Western culture and society from the 17th through the 20th centuries. Examines controversies in astronomy, geology, genetics, Darwinism, and nuclear science. Prereq., HIST 1020 or 1040. Restricted to sophomores/juniors/seniors.

HIST 4414-3. European Intellectual History, 1750–1870. Explores major developments in European thought from the Enlightenment to Nietzsche. Special attention given to the individuals whose ideas have had the greatest influence on modern intellectual history, e.g., Rousseau, Hegel, Herder, Marx, Kierkegaard, Baudelaire, Darwin, and others. Restricted to sophomores/juniors/seniors.

HIST 4424-3. European Intellectual History, 1870 to Present. Emphasizes Nietzsche and the youth revolt against middle class society, the literary and artistic avant garde (impressionism to existentialism), the psychoanalytic movement, the European right and left, and post-WWII European thought. Restricted to sophomores/juniors/seniors.

HIST 4444-3. Topics in Modern European Thought. Explores a selected theme in European thought since the Enlightenment. Topics vary each term. Restricted to sophomores/juniors/seniors.

HIST 4454-3. Jewish Intellectual History. Takes students on a journey from Medieval Spain to contemporary United States to explore how Jews, living in different societies, have attempted to reshape and interpret central Jewish values and beliefs in accordance with the prevailing ideas of their host societies. Focuses on the historical context of each Jewish society that produced the thinkers and ideas considered in this course. Prereq., HIST 1010 or 1020, or HIST/JWST 1108, or HEBR/JWST 2350. Same as JWST 4454.

HIST 4544-3. History of Yiddish Culture. Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. In this course, we will look at the literature, film, theater, music, art, sound, and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world. Recommended prereqs., HIST 1108 or HEBR 2350. Same as JWST 4544.

HIST 4614-3. Women and Society in Industrial Europe. Examines impact of industrialization and related social change on women in modern European history. Topics include work, family, sexuality, and women in movements for social and political change. Prereq., HIST 1020 or 1040. Restricted to sophomores/juniors/seniors. Same as WMST 4614.

HIST 5014-3. Law and Legal History in Early Modern Europe. Explores use of legal records as a source for writing not only political and economic history, but social and cultural history as well. Traces the historiographic and methodological trajectory of legal history in early modern European countries. Prereq., graduate standing.

HIST 5064-3. Early Modern Spain. Surveys the history of the Iberian Peninsula from the late medieval period through early modern period. Explores the thought, art, politics, and socio-economic milieu of Spain during the Golden Age. Topics include attitudes toward minorities, the Inquisition, the establishment of a colonial empire, rituals, court culture and architecture, religious conflicts, and literary production. Prereq for HIST 4064, HIST 1010 or 1030. HIST 4064 is restricted to sophomores, juniors or seniors. Same as HIST 5064.

HIST 6414-3. Readings in European Intellectual History. Prereq., graduate standing or instructor consent.

HIST 7214-3. Seminar: Economic Development. Prereq., graduate standing. Same as ECON 8764.

HIST 7424-3. Research Methods in Medieval/Early Modern European History. Introduces students to research skills needed to work with historical manuscripts. Students learn to read late medieval/early modern handwriting, explore CU's microfilmed collections of manuscripts, and write a research paper based on the manuscript materials. Prereq., graduate standing or instructor consent.

HIST 7464-3. Seminar: European Intellectual History.

HIST 7844 (1-3). Independent Study.

United States: Chronological Periods

HIST 1015-3. History of the United States to 1865. Surveys American history from first settlement until end of the Civil War. Also available through correspondence study. Meets MAPS requirement for social science: general and U.S. history. Approved for arts and sciences core curriculum: United States context.

HIST 1025-3. History of the United States since 1865. Surveys social, economic, political, and cultural development of the United States from the close of the American Civil War to the present. Also available through correspondence study. Meets MAPS requirement for social science: general and U.S. history. Approved for arts and sciences core curriculum: United States context.

HIST 2015-3. The History of Early America. Examines major themes in the development of colonial societies in North America from the 15th to the early 19th centuries. Explores intercultural relations, economic development, labor systems, religion and society, and family life. Specific course focus may vary. Approved for arts and sciences core curriculum: United States context.

HIST 3115-3. Seminar in Early American History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3415-3. Seminar in Recent American History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to junior/senior HIST majors.

HIST 3425-3. The Great Depression: 1929–1945. The new deal response to the great depression strongly influenced America's politics, its economy, and its culture. Examines the political, economic, and cultural issues that resulted from the great depression and the new deal, 1929–1945. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher.

HIST 3845 (1-3). Independent Study.

HIST 4125-3. British Colonial America, 1580–1756. Studies settlement and evolution of British Colonial America until the Seven Years' War. Prereqs., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors. Same as HIST 5125.

HIST 4205-3. The Colonial Wars and the Coming of American Independence, 1739–1776. Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754–1763), the disruption of Anglo-American relations, and the origins of the War of American Independence (1775–1783). Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors. Same as HIST 5205. Credit not granted for this course and HIST 2215.

HIST 4215-3. The Revolutionary War and the Making of the American Republic, 1775–1801. Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social, and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors. Same as HIST 5215. Credit not granted for this course and HIST 2215.

HIST 4225-3. The New Nation: America, 1800–1828. History of the United States from George Washington's inauguration to the election of Andrew Jackson. Deals with the political, social, economic, and cultural currents in the life of post-revolutionary America. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors.

HIST 4235-3. Jacksonian America. Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors.

HIST 4315-3. Civil War and Reconstruction. Describes the forces at work in the antebellum period that led to sectional warfare; social, economic, and political changes effected by the war; the American agony of reconstruction; and the long-range results of that difficult era. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors.

HIST 4415-3. United States History, 1900–1929. History of the United States during the progressive years, 1900 to 1929, emphasizing social, economic, cultural, and political evolution of the American people and the nation's role in world affairs. Prereq., HIST 1025 or 1045. Restricted to sophomores/juniors/seniors.

HIST 4425-3. United States History, 1933–1968. Examines American history, 1933–1968, with attention to domestic and foreign policy issues. Emphasizes the Great Depression, WW II, the Cold War, the Korean conflict, and the Truman administration's Fair Deal. Restricted to sophomores/juniors/seniors.

HIST 4445-3. United States since 1968. Traces political, diplomatic, economic, and social developments in the United States from 1968 to the present. Restricted to sophomores/juniors/seniors.

HIST 5205-3. The Colonial Wars and the Coming of American Independence, 1739–1776. Prereq., graduate standing. Same as HIST 4205.

HIST 5215-3. The Revolutionary War and the Making of the American Republic, 1775–1801. Prereq., graduate standing. Same as HIST 4215.

HIST 5845 (1-3). Independent Study.

HIST 6115-3. Readings in American Colonial History. Prereq., graduate standing.

HIST 7155-3. Seminar: Early American History.

HIST 7415-3. Graduate Seminar in Modern United States History. Introduces students to various research approaches and methods in modern U.S. historiography and requires them to produce a substantial and original research paper using both primary and secondary sources. Prereq., graduate standing.

HIST 7485-3. Seminar: United States History, 1948-Present.

HIST 7845 (1-3). Independent Study.

United States: Topical Courses 1

HIST 2126-3. Modern U.S. Politics and Diplomacy. Traces the development of contemporary U.S. politics and foreign relations. Analyzes subjects such as the Cold War, the relationship between foreign and domestic politics, the developing meaning of conservatism, liberalism, and radicalism. Explains the impact of race, gender, class, and immigration. Specific course focus may vary. Approved for arts and sciences core curriculum: United States context or contemporary societies.

HIST 2166-3. The Vietnam Wars. Traces the causes, course, and outcome of the wars in Vietnam from 1940 until 1975. Explains the successes of the revolutionaries and the failures of the French and Americans. Analyzes the development of Vietnamese nationalism, French colonialism, and U.S. intervention. Similar to HIST 4166. Approved for arts and sciences core curriculum: contemporary societies or United States context.

HIST 2516-3. America through Baseball. Baseball could not have existed without America. Course explains how the game fit into the larger context of social, cultural, economic, and political history from the nineteenth century to the present. Studies the events and people who made baseball the national pastime. Similar to HIST 4556. Restricted to non-History majors only. Approved for arts and sciences core curriculum: United States context.

HIST 2616-3. U.S. Women's History. Examines the history of women in United States culture and society over time. Particular emphasis on the roles of women in family, economy, society, and politics. Specific course focus may vary. Approved for arts and sciences core curriculum: human diversity.

HIST 2636-3. Women of Color and Activism. Studies the history of social activism in the United States by women of color, with an emphasis on modes of social activism, issues that have organized specific communities of color, issues that have crossed ethnic/racial boundaries, and the interaction of women from different ethnic/racial groups, including women of color and white women. Recommended prereq., WMST 2000 or 2600. Same as WMST 2400. Approved for arts and sciences core curriculum: United States context.

HIST 3016-3. Seminar in the History of Gender and Science. Focuses on the participation of women and the gendering of scientific disciplines in the modern era (especially in the U.S.). Includes the changing definition of science, changing requirements for participation in science, and interactions between ideas about gender and the scientific method. Prereqs., HIST 3020 or an acceptable alternative upper-division writing course (min. grade C-) and history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3116-3. Seminar in American Diplomatic History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3416-3. Seminar in American Society and Thought. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3516-3. American Culture and Reform, 1880–1920. Addresses the issues of reform, religion, and culture that emerged as a 19th century world view confronted a 20th century America. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3616-3. Seminar in U.S. Women's History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3656-3. History of Women in Progressive Social Movements. Explores women's involvement in the United States and international peace movements, including feminist and civil rights movements of the 19th and 20th centuries. Students learn research methods by using a variety of primary and secondary sources and writing an original research paper. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to junior/senior HIST majors. Same as WMST 3656.

HIST 3846 (1-3). Independent Study.

HIST 4016-3. African American History, 1619–1865. Explores the history of Africans in America from the first arrivals to emancipation, and their role in the social, cultural, economic, and political evolution of the United States. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors.

HIST 4116-3. U.S. Diplomatic History, 1865–1939. Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture, and economics. Restricted to sophomores/juniors/seniors.

HIST 4126-3. U.S. Diplomatic History since 1940. Traces the development of the United States as a superpower. Special attention is paid to the way in which foreign policy was created and the relationship between foreign and domestic affairs. Restricted to sophomores/juniors/seniors.

HIST 4146-3. Military History. Examines America's national defense and war efforts from the Spanish American War to the present, emphasizing causes and consequences of modern conflicts, and the impact of military activities on American society. Restricted to juniors/seniors.

HIST 4166-3. The War in Vietnam and Its Legacy. Traces diplomatic, military, cultural, social, and political history of the war in Vietnam from the beginning of U.S. involvement in 1950 to its aftermath in the 1980s. Credit not granted for this course and HIST 2166.

HIST 4316-3. The Origins of American Culture, 1600–1830. Traces the development of American culture from its colonial roots to the early decades of the 19th century. Focuses on regional differences in the colonial period, the creation of a new cultural synthesis during the Revolution, and the cultural implications of the Revolutionary legacy. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors.

HIST 4326-3. Health and Disease in the United States. Examines health care and disease patterns in the United States, from the colonial period through the 1980s. Topics include biomedicine and alternative therapies, changing ideas about health and disease, the patient perspective, and financing health care. Prereq., HIST 1025 or 1045. Restricted to sophomores/juniors/seniors.

HIST 4336-3. 19th Century American Intellectual History. Examines developing intellectual traditions in their social and political contexts. Addresses democracy, religion, transcendentalism, women, race, union or disunion, the Darwinian revolution, and literary realism and naturalism. Restricted to sophomores/juniors/seniors.

HIST 4346-3. 20th Century American Intellectual History. Addresses the impacts of political, social, and economic developments on ideas about democracy, science, race, gender, faith, the supposed mission of America, and the role of intellectuals in society. Restricted to sophomores/juniors/seniors. Same as ETHN 4344.

HIST 4516-3. U.S. Society in the 19th Century. Concerned with the American family and community in the changing social environments of the 19th century.

Examines families of different ethnic and class backgrounds, observing how they are changed by new economic conditions, reform, or new political institutions. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors.

HIST 4526-3. U.S. Society in the 20th Century. Primarily concerned with family roles and community values, and how they are altered by economic, demographic, and intellectual changes during the 20th century. Some of the more important themes are acculturation, the idea of success, reform, and the changing structure of opportunity. Prereq., HIST 1025 or 1045. Restricted to sophomores/juniors/seniors.

HIST 4546-3. Popular Culture in the Modern United States. Traces the history of cultural expression in the United States since the late nineteenth century. From art, fiction, and music to the movies, amusement parks, shopping, and sports, popular culture offers clues to decipher shifting patterns of consumption, globalization, race, gender, politics, technology, and media. Includes instruction and practice interpreting cultural materials in historical context. Prereq., HIST 1025. Restricted to sophomores, juniors, and seniors.

HIST 4556-3. America through Baseball. Baseball serves as a window to view the American experience. Covers U.S. history since 1830, addressing the major topics that reflect on American society, such as professionalization, labor management conflict, race, gender, culture, politics, economics, and diplomacy. Prereq., HIST 1025 or 1045. Recommended prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors. Credit not granted for this course and HIST 2516.

HIST 4566-3. 20th Century United States Labor History. Traces development of an industrial labor force in the United States and focuses on gender, ethnicity, and class. Three major themes covered are transformation of the organization of work, everyday lives of workers, and the role of government. Prereq., HIST 1025 or 1045.

HIST 4616-3. History of Women in the United States to 1890. Examines female experience in the United States from 17th century European colonization to 19th century settlement of the frontier. Emphasizes comparison between classes, regions, and racial/ethnic groups. Women's writings provide the basis for discussions of private and public roles, definitions of femininity, interpersonal relationships, and struggles for survival and self-expression. Prereq., HIST 1025. Restricted to sophomores/juniors/seniors. Same as WMST 4616.

HIST 4626-3. History of Women in the United States since 1890. Examines what it means to be female in 20th century United States, emphasizing comparison between classes and racial/ethnic groups. Women's writings serve as the basis for discussions of private and public roles, definitions of womanhood, interpersonal relationships, and struggles for autonomy and equality. Restricted to sophomores, juniors or seniors. Same as WMST 4626.

HIST 4636-3. Lesbian and Gay History: Culture, Politics, and Social Change in the United States. Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the United States through investigation of lesbian/gay identity formation, community development, politics, and queer cultural resistance. Prereq., HIST 1015 or 1025 or 1035 or 1045 or WMST 2000. Same as HIST 5636 and WMST 4636.

HIST 4726-3. U.S. Immigration History. Focuses on economic, social, and cultural history of immigration, return migration, and permanent settlement in the U.S. during the 19th and 20th centuries. Examines the ways in which race, class, ethnicity, gender, and sexuality shape social relations. Prereq., HIST 1015 or 1025 or 1035 or 1045. Restricted to junior/senior HIST or ETHN majors.

HIST 5106-3. Graduate Colloquium in United States History. Students gain an acquaintance with major works in the field and discuss current issues of interpretation and methodology. May be repeated up to 9 total credit hours. Prereq., graduate standing.

HIST 5636-3. Lesbian and Gay History: Culture, Politics, and Social Change in the United States. Restricted to graduate students. Same as HIST 4636 and WMST 4636.

HIST 5846 (1-3). Independent Study.

HIST 6116-3. Readings in American Diplomatic History. Prereq., undergraduate work in American history.

HIST 6146-3. Readings in U.S. Political History. Explores the history of politics in the U.S., with an emphasis on the period since 1865. Key themes include the relations between state and society, the origins and nature of social movements, and the role played by political culture. Prereq., graduate standing.

HIST 6326-3. Readings in United States Intellectual History. Examines the history of ideas and the social history of intellectuals in American society during the 19th and 20th centuries. Stresses social and political dimensions and the changing cultural and institutional contexts of intellectual discourse. Prereq., graduate standing or instructor consent.

HIST 6526-3. Readings in U.S. Social History, 1880–1940. Prereq., graduate standing or instructor consent.

HIST 6536-3. Readings in 20th Century U.S. Labor History. Prereq., graduate standing.

HIST 6546-3. Readings in Cultural History and Theory. Introduces standard works and recent developments in cultural history. Explores structuralism and post-structuralism, semiotics, social construction, relativism, hegemony, and the idea of postmodernity in the uses of culture as an historical category. Prereq., graduate standing or instructor consent.

HIST 6556-3. Readings in U.S. History, the Depression and World War II. May be repeated up to 6 total credit hours.

HIST 6616-3. Readings in the History of American Women.

HIST 6756-3. Race and Nationalism. Focuses on analytical, ideological, cultural, and political tensions between understandings of race and nationalism. Readings are interdisciplinary, but students identify and analyze tensions between race and nationalism at particular historical moments. Prereq., graduate standing or instructor consent.

HIST 7156-3. Seminar: American Diplomatic History. Prereq., graduate standing.

HIST 7326-3. Seminar: U.S. Intellectual History. Prereq., graduate standing.

HIST 7556-3. Seminar: American Society and Thought. Prereq., graduate standing.

HIST 7566-3. Research Seminar in Labor History. Explores various issues in U.S. labor history through readings and research projects. Most of the readings are taken from writings on U.S. labor history. Special attention is given to women, immigration, and regional patterns. Research skills emphasized. Prereq., HIST 6536 or instructor consent.

HIST 7656-3. Seminar: Women's History. Prereq., one 6000-level readings course in women's history.

HIST 7846 (1-3). Independent Study.

United States: Topical Courses 2

HIST 2437-3. African American History. Surveys African American history. Studies, interprets, and analyzes major problems, issues, and trends affecting African Americans from about 1600 to the present. Same as ETHN 2432. Approved for arts and sciences core curriculum: human diversity or United States context.

HIST 3317-3. Seminar in the American West. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3417-3. Seminar in African American History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3847 (1-3). Independent Study.

HIST 4217-3. The American West in the 19th Century. Explores cultural, social, and political interaction in the American West during the 19th century. Themes include environmental change; conflict and syncretism across race, class, and gender lines; and mythic images, and their relationship to the "real" West. Prereq., HIST 1015 or 1025 or 1035 or 1045.

HIST 4227-3. The American West in the 20th Century. Explores cultural, social, and political interaction in the American West during the 20th century. Themes include popular culture, state-federal relationships, environmental change, urbanization, immigration, and cultural formation. Prereq., HIST 1015 or 1025 or 1035 or 1045. Restricted to sophomores/juniors/seniors.

HIST 4417-3. Environmental History of North America. Examines how people of North America, from precolonial times to the present, organized their lives within the ecological systems of the area, how they conceived of their natural world, and

how they reshaped their environment according to their human needs. Prereqs., HIST 1015 or 1025 or 1035 or 1045. Restricted to sophomores, juniors or seniors.

HIST 4527-3. Mexican-American History since 1848. Examines Mexican-origins people in the United States from the 19th century through the present. Focuses on Mexican-American history as both an integral part of American history and as a unique subject of historical investigation. Using primary and secondary sources, students will examine how Mexicans and Mexican-Americans have negotiated, influenced, and responded to political, social, cultural, and economic circumstances in the U.S. Prereq., HIST 1025. Recommended prereq., HIST 1015. Restricted to sophomores/juniors/seniors.

HIST 4617-3. Native North American History I: Human Settlement to 1815. Explores the establishment and development of human societies in North America prior to 1492; the varied experiences of contact; the crises, opportunities, and transformations that attended colonialism; Indians and the inter-imperial contests of the eighteenth century; and the struggles of native peoples confronting the newly-independent United States. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors.

HIST 4627-3. Native North American History II: 1815 to Present. Explores the longevity and continuity of human history in North America by discussing pre-European social and cultural developments. By examining ways in which Indian societies west of the Mississippi River responded to Euro-Americans, the Indians' role in western North American history is demonstrated. Restricted to sophomores/juniors/seniors.

HIST 4717-3. Chinese American History. Examines Chinese American history from 1848 to the present day within the context of socioeconomic and political developments in China and the United States. Topics include the Chinese diaspora, immigration to the United States, participation in the economy, the exclusion movement, community development, women, and family. Prereqs., AAST 1015, or HIST/AAST 2717, or instructor consent. Restricted to sophomores/juniors/seniors.

HIST 4827-3. Modern U.S. Jewish History. Explores the experience of Jews in the United States from the 1880's when the great migration of Jews from Eastern Europe began, through the twentieth century. Students will explore the changing ways in which Jews adapted to life in the U.S., constructed American Jewish identities, and helped to participate in the construction of the United States as a nation. Recommended prereqs., HIST 1025 or HIST/JWST 1108 or HEBR/JWST 2350. Same as JWST 4827.

HIST 5847 (1-3). Independent Study.

HIST 6317-3. Readings in the American West. Prereq., graduate standing.

HIST 6417-3. Readings in Environmental History. Offers historical perspective on the complex and interdependent relationship between human social and cultural institutions and the natural world. Considers interdisciplinary methodologies incorporating history, biology, geography, law, and other disciplines. Same as EPOB 6410.

HIST 6427-3. Readings in African American History. Introduces classic and recent scholarship, and critical issues in African American history, from slavery to the present. Prereq., graduate standing.

HIST 7257-3. Seminar: History of the American Frontier. Prereq., graduate standing.

HIST 7847 (1-3). Independent Study.

World Areas: Specific Regions

HIST 1038-3. Introduction to Latin American History. Broad survey of the history of that part of the Western Hemisphere now known as Latin America. Chronologically covers prehistorical period to present. Provides an understanding of the relationship of Latin America to the Western world, and is concerned with Latin American social and political development. Approved for arts and sciences core curriculum: historical context.

HIST 1108-3. Introduction to Jewish History. Surveys Jewish history from the earliest times to the present. Includes biblical history; Judaism in late antiquity, medieval, and early modern times; and special emphasis on the 19th century to the present, including American Judaism, the Holocaust, anti-Semitism, Zionism, and Israel. Same as GSLL 1108 and JWST 1108. Approved for arts and sciences core curriculum: historical context.

HIST 1208-3. Sub-Saharan Africa to 1800. Introduces the peoples of Africa south of the Sahara and some major developments in the region up to A.D. 1800. Approved for arts and sciences core curriculum: historical context.

HIST 1308-3. Introduction to Middle Eastern History. Interdisciplinary course that focuses on medieval and modern history of the Middle East (A.D. 600 to the present). Introduces the Islamic civilization of the Middle East and the historical evolution of the region from the traditional into the modern eras. Covers social patterns, economic life, and intellectual trends, as well as political development. Approved for arts and sciences core curriculum: historical context.

HIST 1408-3. Introduction to South Asian History. Introduction to South Asian History is a survey of the history of the South Asian subcontinent from prehistoric times to the present. Lectures and readings deal with political, economic, social, and intellectual history. Approved for arts and sciences core curriculum: historical context.

HIST 1608-3. Introduction to Chinese History. Introduces students to Chinese civilization and to its historical evolution, from Neolithic period to present. Focuses on social patterns, economic structure, intellectual trends, and political developments. Approved for arts and sciences core curriculum: historical context.

HIST 1708-3. Introduction to Japanese History. A broad interdisciplinary survey of the history of Japan from earliest times to the 20th century. Explores the development of political institutions, social structures, cultural and religious life, economic development, and foreign relations in an historical perspective. Approved for arts and sciences core curriculum: historical context.

HIST 3018-3. Seminar in Latin American History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3218-3. Peoples and Cultures of West Africa. Deals with the history and anthropology of selected west African societies in the period before the imposition of European colonial rule. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors. Same as ANTH 3218.

HIST 3328-3. Seminar in Middle Eastern History. Examines selected issues in modern Middle Eastern history. Check with the department concerning the specific subject of the seminar. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to junior/senior HIST majors.

HIST 3628-3. Seminar in Recent Chinese History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3718-3. Seminar in Japanese History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to HIST majors.

HIST 3848 (1-3). Independent Study.

HIST 4118-3. History of Mexico to 1821. Studies Mexican history beginning with roots and evolution of pre-Columbian civilizations and concluding with the events of Mexican independence in 1821. Emphasizes society and culture of the Aztecs and Mayans, the Spanish conquest of Mexico, and the colonial regime of New Spain. Restricted to sophomores/juniors/seniors.

HIST 4128-3. The Emergence of Modern Mexico. Study of Mexican history continues with the establishment of independence in 1821. Examines the upheavals of the Mexican Revolution and culminates with recent events in Mexico. Restricted to sophomores/juniors/seniors. Same as ETHN 4126 and HIST 5128.

HIST 4138-3. Southwest Borderlands to 1900. Explores the history of the region that would become the American Southwest to 1900. Focusing on themes of novelty, conflict, and adaptation, class explores how changes in ecology, demography, economy, and technology transformed relations between native peoples, Spaniards, and Mexicans. Concludes with unit on causes, events, and consequences of the U.S.-Mexican War. Restricted to sophomores/juniors/seniors.

HIST 4218-3. States and Societies of West Africa to 1900. Examines the history of West Africa from the earliest times to the 19th century. Prereq., junior standing.

HIST 4238-3. History of Southern Africa. Examines the history of southern Africa from the earliest hunters, herders and farmers through to the present. One of the chief mediums of analysis is the novel. Short background readings and lectures cover southern Africa's history, and class discussions of novels are layered over these basics. Themes of study include: gender, migration, imperialism, religion, disease, resistance, race, ethnicity, and empire, among others. Prereq., HIST 1208.

HIST 4248-3. Africa in the 19th Century. Juxtaposes an increasing process of indigenous state-building with increasing European presence. Restricted to sophomores/juniors/seniors.

HIST 4258-3. Africa under European Colonial Rule. Focuses on the political, economic, and social dimensions of colonialism, as well as African nationalism and decolonization. Prereq., HIST 1208. Restricted to sophomores/juniors/seniors.

HIST 4318-3. The Medieval Middle East, A.D. 500–1600. Examines the history of the Middle East from 600 to the early modern period. Attention divided equally between political and economic history, and the arts and sciences characteristic of the civilization of Islam (theology, philosophy, mysticism, etc.). Restricted to sophomores/juniors/seniors.

HIST 4328-3. The Modern Middle East, 1600 to the Present. Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social, and cultural modernization in the main countries. Prereq., HIST 1308. Restricted to sophomores/juniors/seniors. Same as HIST 5328.

HIST 4338-3. History of Modern Israel. Learn the history of this crossroads of Europe and Asia from the late Ottoman Empire to the present. Main topics include nationalism and colonialism, development of Zionist ideology, development of Palestinian nationalism, establishment of the Jewish settlement (Yishuv) under British rule, the founding of the Jewish nation-state, relations with neighbors, and the aftermath of the 1956, 1967, 1973, and 1982 wars. Prereqs., HIST 1108 or 1308 or JWST 2350. Same as JWST 4338.

HIST 4348-3. Topics in Jewish History. Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester. Consult the online Schedule Planner for specific topics. May be repeated up to 6 total credit hours within the degree. Prereqs., HIST 1108 or 1308 or JWST 2350. Restricted to sophomores/juniors/seniors. Same as JWST 4348.

HIST 4368-3. History and Society of Modern Arabia, 1800–2001. Examines the history, politics, and society of the countries of the Arabian peninsula (modern day Saudi Arabia, Oman, Yemen, Bahrain, Uae, and Qatar) from 1800 to the present. Covers state formation, Islamic revivalist movements of Muhammad Abd al-Wahhab and Muhammad Ali al-Shawkani, Ottoman and British imperialism, the rise of the oil economy, and the recent development of liberal and Islamist opposition movements. Concludes by examining the rise of Ussamah b. Ladin and al-Qaeda in the contexts of Arabian history and the Indian ocean. Prereq., HIST 1308. Restricted to sophomores/juniors/seniors.

HIST 4528-3. Islam in South and Southeast Asia (1000 to the Present). Examines the history of Muslim societies in South and Southeast Asia from 1000 to the present. Focuses on themes such as the rise of Islamic empires in South Asia, Sufism, trade and the spread of Islam in Southeast Asia, the rise of Muslim nationalism and religious fundamentalism, and the impact of modernization and globalization on Muslims of the region. Recommended prereq., 6 hours of history credit.

HIST 4538-3. History of Modern India. Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic, and social development of modern India. Recommended prereq., at least 6 hours of history credit. Restricted to sophomores/juniors/seniors. Same as HIST 5538.

HIST 4548-3. Women in Modern India. Examines the history of women and gender in India from the late eighteenth century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work, and the environment, violence against women, and women and globalization. Prereq., any 1000 level HIST course. Recommended prereq., HIST 1408. Same as HIST 5548.

HIST 4558-3. Modern Indian Intellectual History. Focuses on the nature and evolution of thought in modern India in the light of the encounter between pre-modern Indian and modern Western intellectual traditions in colonial and

postcolonial India. Examines themes such as orientalism, nationalism, Hindu and Muslim nationalism, humanism, non-violence, and postcolonialism.

HIST 4618-3. Traditional China. Examines major traditions in philosophy, art, politics, society, and economy of China during the premodern period. Prereq., HIST 1608 or EALC 1011. Restricted to sophomores/juniors/seniors.

HIST 4628-3. Modern China. Examines China from 1750 to 1949. Focuses on such issues as the influence of imperialism, the emergence of nationalism, and the meaning of revolution. Restricted to sophomores/juniors/seniors. Same as HIST 5628.

HIST 4638-3. Contemporary China. Examines the history of the People's Republic of China from 1949 to the present. Focuses on such issues as the nature of Maoism, foreign policy, political campaigns such as the Cultural Revolution and the Democracy Movement, and recent economic developmental efforts. HIST 4638 is restricted to sophomores, juniors and seniors. Same as HIST 5638.

HIST 4648-3. History of Modern Chinese Intellectual Thought. Examines major intellectual movements in modern China from Ch'ing neo-Confucianism, empiricism, and nationalism to Chinese communism. Prereq., HIST 1608.

HIST 4658-3. China and Islam from the 7th Century to the 20th Century. Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time. Recommended prereq., HIST 1608.

HIST 4718-3. Ancient, Classical, and Medieval Japanese History. Begins with the prehistoric and protohistoric periods. Explores the development of Japan's classical age and traces the rise and attenuation of an elite warrior government. Restricted to juniors and seniors.

HIST 4728-3. Modern Japanese History. Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific. Restricted to juniors and seniors. Same as HIST 5728.

HIST 4738-3. History of Early Modern Japan (1590–1868). Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural, and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate). Restricted to juniors and seniors. Same as HIST 5738.

HIST 5128-3. The Emergence of Modern Mexico. Same as HIST 4128.

HIST 5248-3. History of Anglo-American Criminal Justice. Explores the social, cultural, and legal history of Anglo-American criminal justice from the 17th to the 20th centuries. Also examines tensions between various methods that historians employ to study crime and law.

HIST 5328-3. The Modern Middle East, 1600 to the Present. Prereq., graduate standing. Same as HIST 4328.

HIST 5538-3. History of Modern India. Same as HIST 4538.

HIST 5548-3. Women in Modern India. Same as HIST 4548.

HIST 5628-3. Modern China. Prereq., graduate standing. Same as HIST 4628.

HIST 5638-3. Contemporary China. Examines the history of the People's Republic of China from 1949 to the present. Focuses on such issues as the nature of Maoism, foreign policy, political campaigns such as the Cultural Revolution and the Democracy Movement, and recent economic developmental efforts. HIST 4638 is restricted to sophomores, juniors and seniors. Same as HIST 4638.

HIST 5728-3. Modern Japanese History. Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific. Restricted to juniors and seniors. Same as HIST 4728.

HIST 5738-3. History of Early Modern Japan (1590–1868). Same as HIST 4738.

HIST 5848 (1-3). Independent Study.

HIST 6028-3. Readings in Modern Latin American History. Examines major themes and topics in the social, political and economic history of Latin America. Possible topics include nationalism and state-building, neocolonialism, revolution and reaction, race, and gender. Recommended prereq., HIST 5128 or 5118.

HIST 6628-3. Reading in South Asian History. Introduces major topics and themes in South Asian history. Reviews central theories relating to topics such as religion, nationalism, law, gender, colonialism, and literature.

HIST 7848 (1-3). Independent Study.

World Areas: Comprehensive and General

HIST 2629-3. China in World History. Examines the multiple connections between Chinese history and other parts of the world over the course of China's long history. Approved for arts and sciences core curriculum: historical context.

HIST 3019-3. Seminar in Asian and African History. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min. grade C-) and a history GPA of 2.0 or higher. Restricted to junior/senior HIST majors.

HIST 3849 (1-3). Independent Study.

HIST 4109-3. World War II in Asia and the Pacific. For Asia, World War II began with the Mukden Incident (1931), resulting in the Japanese domination of Manchuria and leading to a full-scale war between China and Japan in 1937. Only after the Japanese attacked the U.S. Pacific fleet at Pearl Harbor four years later did the United States enter the war. Discusses the various socioeconomic and political factors leading to the war in Asia, examines the nature of the conflict on the Asian mainland and in the Pacific, and assesses legacy of the war on all those involved. Restricted to sophomores/juniors/seniors.

HIST 4119-3. Latin American Revolutions. Examines the origins, development and continuing influence of 20th-Century Latin American revolutionary movements, with a focus on placing these struggles in comparative historical context. Explores various approaches to revolution and the general role of left political formations in Latin America. Examples will be drawn from various Latin American countries, including Mexico, Guatemala, Cuba, Chile and Nicaragua. Prereq., HIST 1038. Restricted to sophomores, juniors or seniors. Same as HIST 5119.

HIST 4259-3. African Liberation Struggles: A Comparative History. Highlights the complexity of African decolonization by focusing on the various voices that contend for space as African begins its struggle for liberation. Examines the interrelationship between African colonizers and their colonial administrations, the liberation ideologies emanating from African Diaspora: Pan-Africanism, Garveyism, Negritude and Jamesian socialism, and African nationalist movements and leaders. Restricted to sophomores/juniors/seniors.

HIST 4329-3. Islam in the Modern World: Revivalism, Modernism, and Fundamentalism, 1800–2001. Examines the more important movements of reform in Muslim world (including Africa, the Middle East, and India) from the 18th century to the present, and their origins and intellectual import. Due to the trans-regional nature of this broad movement of reform, we will pay particular attention to how these movements related to local political, economic, and social contexts, and how they, in turn, moved across larger networks of oceanic commerce and trade. The course concludes with extended case studies of Islamic reformism in modern Egypt and India, and their ultimate influence on the politics of contemporary Islamist movements, especially the intellectual position of Ussama b. Ladin. Prereq., HIST 1308. Restricted to sophomores/juniors/seniors.

HIST 4339-3. Borderlands of the British Empire. Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance, and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts. Prereq., HIST 1020, 1308, 1408, or 2123. Restricted to sophomores/juniors/seniors. Same as HIST 5339.

HIST 4349-3. Decolonization of the British Empire. Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required. Prereq., one of the following: HIST 1308, 1408, 4053, 4238, 4258, 4328, 4329, 4538, or 4558. Restricted to sophomores/juniors/seniors. Same as HIST 5349.

HIST 4619-3. Women in Asian History. Considers major issues in the history of Asian women in the 18th, 19th, and 20th centuries. Focuses on gender roles in Asian family, state, and religious systems. Restricted to sophomores/juniors/seniors. Same as WMST 4619 and HIST 5619.

HIST 5119-3. Latin American Revolutions. Same as HIST 4119.

HIST 5129-3. Colloquium in Modern Asian History. Introduces major topics and themes in Asian history. Analyzes readings relating to topics such as imperialism, cultural agency, gender, race, nationalism, decolonization, and revolution.

HIST 5339-3. Borderlands of the British Empire. Prereq., graduate standing. Same as HIST 4339.

HIST 5349-3. Decolonization of the British Empire. Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required. Prereq., one of the following: HIST 1308, 1408, 4053, 4238, 4258, 4328, 4329, 4538, or 4558. Restricted to sophomores/juniors/seniors. Same as HIST 4349.

HIST 5619-3. Women in Asian History. Same as HIST 4619.

HIST 5849 (1-3). Independent Study.

HIST 6019-3. Readings in World History. Prereq., graduate standing.

HIST 6329-3. Readings in Comparative Ethnohistory. Prereq., graduate standing.

HIST 7119-3. Graduate Research Seminar in Asian History. Prepares students for research in historical documents in Asian languages in order to write a substantial original research paper based on primary and secondary source materials. Prereq., graduate standing and background in Asian history.

HIST 7849 (1-3). Independent Study.

Honors

HONR 1001-1. Honors Coseminar. Honors coseminars are designed to combine an honors seminar experience with the shared experience of an organized lecture course. Designed typically for 10–15 students, coseminars are taken for an additional 1 credit hour. Coseminars provide honors students with an opportunity to extend their common experience in the course lecture into an enriched interactive, critical thinking opportunity. May be repeated up to 4 total credit hours.

HONR 1810-3. Honors Diversity Seminar. Students will develop an appreciation for, and experience with, diverse perspectives. In particular this includes: racial/ethnic, gender, sexual orientation, and class perspectives, for constructing knowledge as they proceed through their undergraduate studies. Three themes provide the framework for the course: education for the next century, the 21st century citizen, and the modern individual in a diverse society. Topics explored include privilege, stigmatization, targeted and nontargeted grouping, and oppression. Engaging in independent research and experiential, empathetic experiences is required. Approved for arts and sciences core curriculum: human diversity.

HONR 2250-3. Ethics of Ambition. Through selected readings in classical literature on ethics and through more contemporary readings and films, examines critical ethical issues relating to the competition of ambitions and the alternative styles of choosing between courses of action in a dangerous world. Uses biographies of those whose lives illustrate both the complexities of the struggles and the profundity of possibilities. Considers the unconscious metaphors of national visions and ambitions, the competing ethics of ends and means, the conflicting ambitions in a pluralistic society, and the transcendent ambitions of visionaries. Same as FARR 2660. Approved for arts and sciences core curriculum: ideals and values.

HONR 2251-3. Introduction to the Bible. Studies the major works, figures, and genres of the Bible and attempts to understand what they meant to their own time and why they became so important to Western civilization and contemporary America. Approved for arts and sciences core curriculum: historical content.

HONR 2500-3. Open Topics. Variety of new courses at the 2000 level. See honors program announcements for specific contents. May be repeated up to 6 total credit hours. Prereq., GPA 3.30 or higher.

HONR 2610-1. Leadership Practicum: HRAP Flock Leaders. Required for students who are selected as flock leaders for the Honors Residential Academic Program.

Teaches skills and techniques to enable them to lead a small group in the unique environment of a residential honors program. May be repeated up to 2 total credit hours. Prereq., consent of Honors Residential Academic Program associate director.

HONR 2860-3. The Figure of Socrates. Investigates why Socrates intrigued great writers like Aristophanes, Plato, Xenophon, and Aristotle and why, through his life and execution by the Athenian democracy, he still influences Western ethics, politics, and education and is central to cultural literacy. Approved for arts and sciences core curriculum: literature and the arts.

HONR 3001-1. Honors Coseminar. Honors coseminars are designed to combine an honors seminar experience with the shared experience of a lecture course. Designed typically for 10–15 students, coseminars are taken either for an additional 1 credit hour or in place of a recitation. Coseminars are designed to provide honors students with an opportunity to extend their common experience in the course lecture into an enriched interactive, critical thinking opportunity.

HONR 3004-3. Women in Education. Honors women in education and their legacy. Introduces women educators, beginning in the late 19th century, whose significant theories of education and work in teaching have had an impact on all of our lives, in history, and in society. Explores the educational theories and methods of several representative women educators and analyzes them through an investigation of their professional and personal lives. Same as WMST 3004. Approved for arts and sciences core curriculum: human diversity.

HONR 3056-3. Experience of Learning. Major historical, psychological, philosophical and personal perspectives on education in general and university education in particular will be developed. Participants will be encouraged to consider how the issues discussed and the ideas developed in the seminar bear on the choices they face in planning their own educations.

HONR 3220-3. Advanced Honors Writing Workshop. Intensive practice of expository writing skills, particularly argumentation in longer forms. Course includes extensive practice in researching secondary sources, synthesizing large bodies of information, structuring cogent arguments for diverse sources, etc. Restricted for juniors/seniors or instructor consent required. Approved for arts and sciences core curriculum: written communication.

HONR 3270-3. Journey Motif in Women's Literature. Investigates the application of the theme of the journey to developmental narratives by analyzing modern British and American writings by women. Applies methods from psychology, feminist studies, gay studies, cultural studies to concepts of development, regression, progress, escape. Approved for arts and sciences core curriculum: human diversity.

HONR 3560-3. Science and Mysticism. Has modern science proven or validated the mystical religious experience? Or does a basic conflict remain between these diverse human endeavors? The similarities and differences between science and mysticism will be investigated through readings, discussions and practical, experiential exercises. Discussions and exercises will be designed to encourage both an intellectual and a non-intellectual understanding of the course material.

HONR 3810-3. Privilege and Modern Social Construction. This course examines social constructions that lead to productive interactions between and among American social communities. Using case studies and humanistic accounts, students analyze the lived experiences of a unique group or successful citizens who routinely evidence productive practices of multicultural engagement. Through interactions with policy makers and community practitioners, students design and enact activities that allow them to reconstruct their personal patterns of privilege practices of their peer groups in various settings. Prereq., HONR 1810 or demonstrated academic study of race, class, and gender.

HONR 4000-3. Open Topics. Variety of new courses at the 4000 level, see Honors Program announcements for specific contents. May be repeated up to 6 total credit hours. Restricted to juniors/seniors or instructor consent required.

HONR 4025-3. Heroines and Heroic Tradition. Given recent controversies about the roles of women in power, this course re-evaluates heroic traditions as the stories that ground our sense of public endeavor. What do we mean by heroic? What is a heroine? Are heroines different from heroes? Approved for arts and sciences core curriculum: human diversity.

HONR 4055-3. Discourse Analysis and Cultural Criticism. Discourse analysis critically investigates the founding assumptions by which systems of meaning

operate. Its practice is aimed at a rigorous, systematic analysis of both specific cultural issues and the dynamics by which structures of meaning may be maintained or transformed. Coreq., HONR 4056.

HONR 4056 (1-3). Service Practicum: Discourse Analysis and Cultural Criticism. Help communities in need, with credit hours varying according to time commitment. The practicum provides experiential and intellectual understanding of the discourses and dynamics that maintain major cultural hierarchies of values and of resource distribution. Coreq., HONR 4055.

HONR 4959 (3-6). Honors Thesis. May be repeated up to 6 total credit hours. Requires approval of Honors Program.

Humanities

HUMN 1010-6. Introduction to Humanities 1. Six meetings a week (three discussion classes on literature and its critical-historical analysis and three lecture-demonstrations on art and music). Provides an analytical and comparative study of works in literature, music, and visual arts from Aegean to Baroque eras. Emphasizes structure, content, and style in specific examples. Approved for arts and sciences core curriculum: historical context or literature and the arts.

HUMN 1020-6. Introduction to Humanities 2. Six meetings a week (three discussion classes on literature and its critical-historical analysis and three lecture-demonstrations on art and music). Examines from Baroque to contemporary styles in literature, music, and visual arts. Emphasizes the cultural context in which art was created. Approved for arts and sciences core curriculum: historical context or literature and the arts.

HUMN 1701-3. Nature and Environment in German Literature and Thought. Critically examines titles in German literature and thought. Nature and environment are used to explore alienation, artistic inspiration, nihilism, exploitation, sexuality, rural versus urban, meaning of the earth, cultural renewal, identity and gender. This "green" survey of German classics spans Romanticism's conception of nature as unconscious spirit to the politics and values of contemporary Germany's Green party. Same as GRMN 1701. Approved for arts and sciences core curriculum: ideals and values.

HUMN 2000-3. Methods and Approaches to the Humanities. Provides a transition from the introductory courses to the upper-division courses. Introduces the various technical methods and topics encountered in the department's comparative, interdisciplinary upper-division courses, including cultural studies, rhetoric, translation, hermeneutics, word/image studies, etc. Prereq., HUMN 1010 or 1020. Restricted to HUMN majors.

HUMN 2100-3. Arts, Culture, and Media. Promotes a better understanding of fundamental aesthetic and cultural issues by exploring competing definitions of art and culture. Sharpens critical and analytical abilities by asking students to read and compare different theories about arts, culture, media, and identity, and then to apply and assess those theories in relation to a selection of visual and verbal texts from a range of cultural and linguistic traditions. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 2145-3. African America in the Arts. Introduces interrelationships in the arts of African Americans and the African American contribution to American culture as a whole. Credit not granted for this course and HUMN 3145. Approved for arts and sciences core curriculum: human diversity or United States context.

HUMN 2601-3. Kafka and the Kafkaesque. Exposes the students to a wide selection of Kafka's literary output and aims to define the meaning of the Kafkaesque by looking not only for traces of Kafka's influence in the verbal and visual arts, but also for traces left in Kafka's own work by his precursors in the literary tradition. Same as GRMN 2601. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 3015-3. Jung, Film, and Literature. The basic themes of C. G. Jung's archetypal psychology (shadow, anima/animus, character typology, and individuation) are studied and applied as tools of critical analysis to selected films and literary texts of the modern period. Prereqs., humanities major, or Farrand student and instructor consent. Same as FILM 3022.

HUMN 3092-3. Studies in Humanities. Students should check with the department for specific semester topics. May be repeated up to 12 total credit hours, provided the topics vary. Prereq., HUMN 2000 or junior/senior standing.

HUMN 3093-3. Topics in Humanities. Students should check with the department for specific semester offerings. May be repeated up to 12 total credit hours, provided the topics vary. Prereq., HUMN 2000 or junior/senior standing.

HUMN 3104-3. Film Criticism and Theory. Surveys the range and function of film criticism, introduces major positions and concepts of film theory, and focuses on students' abilities to write about film. Prereq., FILM 1502. Same as FILM 3104.

HUMN 3210-3. Narrative. Explores the nature of sacred and secular narrative in literature, film, and the visual arts. Prereq., HUMN 2000 or junior/senior standing. Formerly HUMN 4013.

HUMN 3211-3. The Craft of Mystery. Explores examples of and theories about the formation and growth of the genre of detective fiction, especially in the late 19th and early 20th centuries. Explores the social conditions of the times in which the texts were written and the possible resulting influences on style. Compares the texts and theories to examples from other genres and time periods. Prereqs., HUMN 2000 or junior/senior standing.

HUMN 3220-3. Epic. Comparative and interdisciplinary study of the figure of the hero and the concept of fate in the epic tradition and the modern novel. Explores literary, religious, philosophical, and ethical issues. Prereq., HUMN 2000 or junior/senior standing. Formerly HUMN 4023.

HUMN 3230-3. Comedy. Offers an interdisciplinary approach to comedy, examining art, music, literature, and film from different periods. Comic theory interlaced with the study of particular works. Prereq., HUMN 2000 or junior/senior standing. Formerly HUMN 3033.

HUMN 3240-3. Tragedy. Studies some of the great tragic works of art, music, and literature from the Greeks to the 20th century. Tragic theory is invoked as an aid to interpretation. Prereq., HUMN 2000 or junior/senior standing. Formerly HUMN 3043.

HUMN 3250-3. Dramatic Arts. Interdisciplinary course that examines and compares various forms of the dramatization of narrative: written texts, audiotapes, videotapes, film, and live performance. Compares different versions of the same narrative or theme, especially if different media are used and different time periods are involved. Prereq., HUMN 2000 or junior/senior standing. Formerly HUMN 4133.

HUMN 3321-3. Culture and Literature of Ancient China. Focuses on the religious, cultural, philosophical, and literary aspects of ancient Chinese civilization (1500 B.C.–A.D. 200). Special attention is paid to foundational works that influenced later developments in Chinese culture. All readings are in English. Recommended prereq., EALC 1011 or CHIN 1051. Same as CHIN 3321.

HUMN 3341-3. Literature and Popular Culture in Modern China. Surveys 20th century Chinese (including Taiwanese) literature and popular culture against the historical background of rebellion, revolution, and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films, and scholarly articles. Approved for arts and sciences core curriculum: literature and the arts. Recommended prereq., EALC 1011 or CHIN 1051. Same as CHIN 3341.

HUMN 3505-3. The Enlightenment: Tolerance and Emancipation. Examines the Enlightenment belief in reason and the common humanity of all individuals and cultures. Emphasizes arguments for and against freedom of religion, abolition of slavery, and emancipation of women in 18th-century European and American literature and thought. Same as GRMN 3505. Approved for arts and sciences core curriculum: ideals and values.

HUMN 3550-3. Imag(in)ing Meaning. Explores the role of imagination in constructing narratives of meaning through close readings of various genres (fiction, poetry, manifesto, essay), various modes of artistic expression (art, film, photography, documentary), and essays of critical theory. Prereq., HUMN 2000 or junior/senior standing.

HUMN 3590-3. Modern Literature and the Bible: a Case Study in Intertextuality. Alternating between close readings of biblical texts and works by such authors as Beckett, O'Connor, Dostoevsky, Garcia Marquez, as well as film, this class explores the complex interaction between modern literature and the Bible in respect to ideals, ideas, symbols. Prereq., HUMN 2000 or junior/senior standing. Approved for arts and sciences core curriculum: ideals and values.

HUMN 3660-3. The Postmodern. Analyzes the cultural and critical practices as well as the thought that defines the postmodern period at the end of twentieth

century. Prereq., HUMN 2000 or junior/senior standing. Same as FILM 3660. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 3702-3. Dada and Surrealist Literature. Surveys the major theoretical concepts and literary genres of the Dada and Surrealist movements. Topics include Dada performance and cabaret, the manifesto, montage, the readymade, the Surrealist novel, colonialism and the avant-garde, and literary and philosophical precursors to the avant-garde. Same as GRMN 3702. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 3802-3. Politics and Culture in Berlin 1900–1933. Examines early 20th century German culture, with emphasis on the Weimar Republic (1918–1933) in light of contemporaneous political discussions. The course presents modern art and literature (Expressionism, Dada, Brecht's epic theater) and architecture and design (Bauhaus, Werkbund) as well as political movements of women, sexual minorities, and Berlin's Jewish communities. Taught in English. Same as GRMN 3802. Offered through CU Study Abroad Program. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 3811-3. Classical Japanese Literature in Translation. Surveys the major works and authors of classical Japanese literature, both poetry and prose, from the earliest historical records and literary anthologies through the Heian period (784–1185). Taught in English. Recommended prereq., JPNS 1051. Same as JPNS 3811.

HUMN 3820-3. Greek and Roman Antiquity in Music, 1600 to Present. Explores the influence of Greek and Roman mythology and history on various genres of music since 1600. Explains the context and meaning of ancient themes and their use by composers from the Renaissance to the present. Recommended prereq., CLAS 1100. Same as CLAS 3820.

HUMN 3841-3. Modern Japanese Literature in Translation. Surveys the major works, authors, and genres of literature from the late Meiji period and 20th century in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English. Recommended prereq., JPNS 1051. Same as JPNS 3841.

HUMN 3930 (1-6). Humanities Internship. Students gain academic credit and professional experience working in museums, galleries, arts administration, and publishing. They work 3–18 hours per week with their professional supervisor and meet regularly with a faculty advisor who determines the reading and writing requirements. Prereqs., junior standing and interview with faculty advisor.

HUMN 3935 (1-3). Humanities Internship: Literature and Social Violence. See HUMN 4835. Credit not granted for this course and HUMN 2935. Coreq., HUMN 4835.

HUMN 4000-3. The Question of Romanticism. Interdisciplinary study of literature, art, and music from 1780 to 1830 in France, England, and Germany. Prereq., HUMN 2000 or restricted to juniors/seniors. Credit not granted for this course and HUMN 4102.

HUMN 4004-3. Topics in Film Theory. Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers, and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials. May be repeated up to 6 total credit hours. Prereq., FILM 3051 or instructor consent. Restricted to senior FILM, FMST, or HUMN majors. Same as FILM 4004 and ARTF 5004.

HUMN 4010-3. Hitchcock and Freud. Applies Freudian psychoanalysis to the films of Alfred Hitchcock. Students will familiarize themselves with the Freudian methodology by reading a number of books and essays and then apply both Freud's general ideas as well as specific texts to particular aspects, both formal and contentual, of his films. Particular attention will be given to the important field of "feminism and psychoanalysis" as it relates to the study of the role of women in Hitchcock's films. Restricted to juniors and seniors.

HUMN 4020-3. Reading, Chance, and Guessing. Considers the method of the humanities relationship to those of the natural and social sciences, especially in view of their respective ability or claim to predict the future and to master chance. Prereq., HUMN 2000 or junior/senior standing.

HUMN 4030-3. The Art of Travel. Examines the art of travel: not where to go and what to do, but rather philosophical concepts about why people travel. Areas of discussion will include exploration, discovery, escape, pilgrimage, the grand tour,

expatriotism, exile, nomadism, armchair travel, and the sense of home. Materials will include books by travel writers, novels, films, essays, short stories, art, music, and historical documents. Prereq., HUMN 2000 or junior/senior standing.

HUMN 4060-3. Reading Theory. Explores, through guided discussions, the concept of theory itself and how a theory is constructed. Emphasizes the close reading of theory in order to learn to analyze critically, considering theory as something to be thought about rather than simply applied. Prereq., HUMN 2000 or junior/senior standing.

HUMN 4082-3. 19th Century Art and Literature. Interdisciplinary study of English fiction and poetry together with related movements in visual arts. Prereq., HUMN 2000 or junior/senior standing.

HUMN 4092-3. Advanced Studies in the Humanities. Students should check with the department for specific semester topics. May be repeated up to 9 total credit hours. Prereq., HUMN 2000 or junior/senior standing.

HUMN 4093-3. Advanced Topics in the Humanities. Students should check with the department for specific semester offerings. May be repeated up to 9 total credit hours. Prereq., HUMN 2000 or junior/senior standing.

HUMN 4110-3. Greek and Roman Epic. Students read in English translation the major epics of Greco-Roman antiquity such as the *Iliad*, *Odyssey*, *Argonautica*, *Aeneid*, and *Metamorphoses*. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required. Same as CLAS 4110. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 4120-3. Greek and Roman Tragedy. Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides, and Seneca in English translation. No Greek or Latin required. Same as CLAS 4120. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 4130-3. Greek and Roman Comedy. Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required. Same as CLAS 4130. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 4131-3. The Greek and Roman Novel. Studies five surviving complete Greek novels from classical antiquity, three Latin novels, and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Readings in English translation. No required prerequisite, but a previous course in classical literature or myth is recommended. Same as CLAS 4140/5140.

HUMN 4135-3. Art and Psychoanalysis. Explores psychoanalytic theory as it relates to our understanding of literature, film, and other arts. After becoming familiar with some essential Freudian notions (repression, narcissism, ego/libido, dream-work, etc.), students apply these ideas to works by several artists (e.g., Flaubert, James, Kafka, Hoffmann, and Hitchcock). Prereq., HUMN 2000 or junior/senior standing. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 4140-3. The Age of Dante: Readings from *The Divine Comedy*. Focuses on close reading of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in English. Prereq., junior standing or instructor consent. Same as ITAL 4140. Credit not granted for this course and ITAL 4145 or 4147. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 4150-3. *The Decameron* and the Age of Realism. Analyzes the rise of realism in 13th and 14th century Italian literature and parallel manifestations in the visual arts. Focuses on Boccaccio's *Decameron* and contemporary realistic prose and poetry with emphasis on gender issues and medieval cultural diversity. Taught in English. Prereq., junior standing or instructor consent. Same as ITAL 4150. Approved for arts and science core curriculum: literature and the arts or human diversity.

HUMN 4155-3. Philosophy, Art, and the Sublime. Explores philosophies of art, theories of the sublime, and the relation between art and morality through philosophy, literature, and the visual arts. Includes works by Plato, Longinus, Burke, Rousseau, Kant, Mary Shelley, Melville, Friedrich, Turner, and Pollock. Prereq., HUMN 2000 or junior/senior standing. Approved for arts and sciences core curriculum: ideals and values.

HUMN 4502-3. Nietzsche: Literature and Values. Emphasis is placed on Nietzsche's major writings spanning the years 1872–1888, with particular attention to the critique of Western values. A systematic exploration of doctrines, concepts, and ideas leading to the values of creativity. Restricted to sopho-

mores/juniors/seniors. Same as GRMN 4502. Approved for arts and sciences core curriculum: ideals and values.

HUMN 4504-3. Goethe's *Faust*. Systematic study of the Faust motif in Western literature, with major emphasis on *Faust I* and *II* by Goethe and Thomas Mann's *Doctor Faustus*. Same as GRMN 4504/5504 and COML 5504. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 4555-3. The Arts of Interpretation. Introduces various hermeneutical methodologies (literary/philosophical criticism, biblical exegesis, art history, etc.) with which to examine the question of interpretation. Methodologies are studied in close conjunction with particular works of art. Prereq., HUMN 2000 or junior/senior standing.

HUMN 4730-3. Italian Feminisms: Culture, Theory, and Narratives of Difference. Studies Italian women writers, artists, and film makers of this century. Literary and visual texts are analyzed in dialogue with readings of leading Italian gender theorists. Italian history and culture is reread by following the development of a discourse about women. Taught in English; readings in Italian for Italian majors. Same as ITAL 4730. Approved for arts and sciences core curriculum: human diversity.

HUMN 4811-3. 19th Century Russian Literature. Surveys background of Russian literature from 1800 to 1900. Russian writers and literary problems in the 19th century emphasizing major authors: Pushkin, Lermontov, Gogol, Dostoevsky, Turgenev, Tolstoy, and Chekhov. Same as RUSS 4811. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 4821-3. 20th Century Russian Literature and Art. Interdisciplinary course emphasizing the influence of art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the gradual cultural relaxation that culminated in Perestroika and Glasnost. Same as RUSS 4821. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 4835-3. Literature and Social Violence. Provides a theoretical understanding of heightened awareness arising from literary and sociological investigations of contemporary sources of social violence (gang culture, racism, domestic violence), combined with the concrete knowledge offered by an internship in a social service agency. Optional internship credit is available. Restricted to sophomores/juniors/seniors. Approved for arts and sciences core curriculum: contemporary societies.

HUMN 4840 (1-3). Independent Study. May be repeated up to 6 total credit hours.

HUMN 4990-3. Senior Humanities Seminar. In-depth interdisciplinary study of a selected topic in humanities. Prereqs., 6 hours of upper-division humanities, senior standing, and 3.00 GPA in humanities.

Integrative Physiology

IPHY 1950-3. Introduction to Scientific Writing in Integrative Physiology. Provides an overview of writing skills and strategies, emphasizing those most important to the sciences, especially physiology. Focuses on fundamental skills, objective analysis, and scientific persuasion, with attention to clear organization and style, academic and scientific mechanics, and distinctions between audiences. Restricted to freshmen/sophomore/junior IPHY majors. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

IPHY 2010 (1-3). Seminar in Integrative Physiology. Introduces a small group of lower-division students to current research topics in integrative physiology. Emphasizes relevant applications to real-world situations. May be repeated up to 6 total credit hours when topics vary.

IPHY 2420-3. Nutrition for Health and Performance. Focuses on the basic anatomy, physiology, and chemistry of nutrition. Topics include weight management, the role of diet and lifestyle in disease prevention, specific nutrient deficiencies and toxicities, nutrition standards and guidelines, sports nutrition recommendations, agricultural practices, and food policy issues. IPHY juniors or seniors are excluded from taking this course. Approved for arts and sciences core curriculum: natural science.

IPHY 2500-1. Perspectives in Health and Medicine. Designed to increase awareness of issues that surround international and U.S. health care. Provides broad overview of topics relevant to 21st century medical practice. Includes guest lectures by faculty and practitioners from Denver Metro region, followed by opportu-

nities to integrate new concepts using small group discussion and writing. Topics change each semester and may include: global development and health; socio-cultural issues in health care; health disparities; applied bioethics; health care system reform; narrative medicine. Restricted to sophomores/juniors/seniors.

IPHY 2800-4. Introduction to Statistics. Examines the application of statistics to research relevant to integrative physiology. Includes instruction and hands-on experience with related computer programs and interpretation of the results of their use. Recommended prereq., IPHY 2600. Restricted to IPHY majors.

IPHY 2910 (1-3). Practicum in Integrative Physiology. Offers practical experience in organized situations with direct supervision. Restricted to IPHY majors. May be repeated up to 3 total credit hours. Prereq., instructor consent.

IPHY 3010 (1-2). Teaching in Integrative Physiology. Provides an opportunity to assist in teaching specific laboratory sections in IPHY under direct faculty supervision. Students must make arrangements with the faculty member responsible for the course in which they plan to assist. May be repeated up to 6 total credit hours. Prereq., junior standing and instructor consent.

IPHY 3060-4. Cell Physiology. Introduces the biology of eukaryotic systems at molecular, cellular, and systems levels of integration, emphasizing the complementarities of structure and function and physiological mechanisms of regulation at the cellular and molecular level. Prereqs., MCDB 1150, 1151, 2150 and 2151, or EBIO 1210, 1220, 1230 and 1240, IPHY 3430 or 3470. Restricted to sophomores/juniors/seniors.

IPHY 3130-3. Environmental Animal Physiology. Broad consideration of biochemical, physiological, and behavioral adaptations of vertebrate animals to various environments and strategies for allocation of energetic expenditures in relation to environmental demands. Prereq., one year general biology.

IPHY 3410-3. Introduction to Human Anatomy. Introduces the basic of human anatomy. Prereqs., MCDB 1150, 1151, 2150 and 2151, or EBIO 1210, 1220, 1230 and 1240.

IPHY 3415-2. Human Anatomy Laboratory. Introduces structures of the human anatomical systems using human cadavers and animal tissue. This laboratory is meant to complement IPHY 3410, Introduction to Human Anatomy lecture. Prereqs., MCDB 1150, 1151, 2150 and 2151, or EBIO 1210, 1220, 1230 and 1240; IPHY 3410 (or as coreq.).

IPHY 3420-3. Nutrition, Health, and Performance. Highlights basic principles of nutrition and their relation to health. Approved for arts and sciences core curriculum: natural science.

IPHY 3430-3. Introduction to Human Physiology. Introduces the physiology of the nervous, muscular, cardiovascular, respiratory, urinary, immune, endocrine, digestive and reproductive systems. Intended for nonmajors. Prereqs., EBIO 1210 and 1220; CHEM 1133 and 1134. Recommended prereqs., IPHY 3410 and 3415.

IPHY 3435-2. Physiology Laboratory. Introduces laboratory experience in selected aspects of human and comparative physiology for students in pharmacy and allied health programs. Involves animals and animal tissues. Prereqs., MCDB 1150, 1151, 2150 and 2151, or EBIO 1210, 1220, 1230 and 1240; CHEM 1133 and 1134; and a statistics course. Prereq. or Coreq., IPHY 3430 or 3480.

IPHY 3450-3. Comparative Animal Physiology. Introduces principles of animal physiology and responses to environmental change. Involves animals and/or animal tissues. Prereqs., MCDB 1150, 1151, 2150 and 2151, or EBIO 1210, 1220, 1230 and 1240.

IPHY 3470-3. Human Physiology 1. Focuses on scientific thinking, cell physiology, neurophysiology, endocrinology, immunology, and musculoskeletal physiology. The first semester of a two-semester sequence for IPHY majors. Prereqs., MCDB 1150 and 2150, or EBIO 1210 and 1220; CHEM 1133 and 1134; and IPHY 3410 and 3415.

IPHY 3480-3. Human Physiology 2. Focuses on the physiology of the respiratory, cardiovascular, urinary, digestive, and reproductive systems. The second semester of a two-semester sequence for IPHY majors. Prereqs., MCDB 1150 and 2150, or EBIO 1210 and 1220; CHEM 1133 and 1134; IPHY 3410, 3415, and 3470. Coreq., IPHY 3435.

IPHY 3500-2. Applied Clinical Research. Introduces fundamental concepts of clinical research to those interested in pursuing a career in medicine or medical research. In addition to lectures introducing students to research design, errors

in research, and basic biostatistics, there will be significant emphasis on participation in on-going medical research at Denver Health Medical Center and The Children's Hospital. This unique experience will provide students with first-hand exposure to all aspects of clinical research. Prereqs., MCDB 1150 and 2150, or EBIO 1210 and 1220, and CHEM 3311. Recommended prereq., premedical focus and/or previous research experience.

IPHY 3660-3. Dynamics of Motor Learning. Focuses on information processing approaches and dynamical systems theory as explanations for human motor learning and the coordination of movement. Various topics are discussed from both perspectives including practice organization, attainment of elite performance, and the production of novel movements. Approved for arts and sciences core curriculum: natural sciences.

IPHY 3700-3. Scientific Writing in Integrative Physiology. Takes a process-based approach to writing. Assignments and classroom experiences emphasize critical thinking, using scientific evidence and reasoning to construct original arguments, and applying conventions and problem-solving skills to craft successful documents. Prereq., IPHY 2800. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: written communication.

IPHY 3800-3. Forensic Biology. Introduces basic concepts of modern forensic science with emphasis on biological aspects such as forensic entomology, forensic botany, hair analysis, forensic anthropology, and forensic DNA analysis. Prereqs., MCDB 1150, 1151, 2150 and 2151, or EBIO 1210, 1220, 1230 and 1240; CHEM 1133 and 1134.

IPHY 3810-1. Forensic Biology Laboratory. Introduces basic laboratory techniques and procedures of modern forensic science with emphasis on biological aspects such as forensic entomology, forensic botany, hair analysis, forensic anthropology, and forensic DNA analysis. Prereqs., MCDB 1150, 1151, 2150 and 2151, or EBIO 1210, 1220, 1230 and 1240; CHEM 1133 and 1134. Coreq., IPHY 3800.

IPHY 4010 (1-3). Seminar in Integrative Physiology. Introduces a small group of students to current research topics in integrative physiology, evaluation of current research, and discussion of critical issues. May be repeated up to 6 total credit hours when topics vary. Prereq., IPHY 2800.

IPHY 4200-3. Physiological Genetics and Genomics. Introduces genetic and genomic concepts as they apply to mammalian physiology. The course covers fundamental concepts and methods in molecular genetics and genomics and their applications towards understanding the role of genetics in the normal and pathological function of physiological systems. Same as IPHY 5200.

IPHY 4440-4. Endocrinology. Introduces mammalian endocrine system. Course provides a thorough analysis of chemical communication by hormones and related bioregulators with emphasis on the major endocrine systems such as the thyroid, gonad, pituitary and the brain. Prereqs., IPHY 3430, 3450 or 3470. Same as IPHY 5440.

IPHY 4470-3. Biology of Human Reproduction. Anatomy and physiology of human reproduction, including gender determination, embryology, puberty, menstrual cycle, pregnancy, lactation, menopause, sexual behavior, sexual abnormalities and contraception. Open to nonmajors. Prereqs., MCDB 1150, 1151, 2150 and 2151, or EBIO 1210, 1220, 1230 and 1240.

IPHY 4480-3. Comparative Reproduction. Focuses on comparative anatomy and physiology of reproductive system and the evolution of reproductive behavior in vertebrates and invertebrates. Topics include courtship, mating, fertilization, estrous and menstrual cycles, and environmental control of seasonal reproduction. Prereqs., MCDB 1150, 1151, 2150 and 2151, or EBIO 1210, 1220, 1230 and 1240. Recommended prereq., IPHY 3430 or 3480.

IPHY 4500-4. Histology: Cells and Tissues. Analysis of vertebrate histology and preparation of vertebrate tissues for light microscopic examination. Especially useful to students of vertebrate anatomy, development, and physiology. Involves animals and/or animal tissue. Prereq., EBIO 3700, or IPHY 3430, or IPHY 3450, or IPHY 3470. Same as IPHY 5500.

IPHY 4540-5. Biomechanics. Applies the principles of physics and physiology to the analysis of human movement. Quantitative analysis of the forces, torques, mechanical energy, power impulses and momentum associated with human movement. Mechanical properties of muscles, tendons, ligaments, and bones. Prereqs., IPHY 2800, 3410, 3430 or 3470 or PHYS 2010, MATH 1300 or 1310 or APPM 1350. Restricted to IPHY majors.

IPHY 4580-3. Sleep Physiology. Describes the physiology and neurobiology of sleep and impact of sleep, sleep deprivation, and sleep disorders on immune, endocrine, cardiovascular, respiratory, and neural systems, as well as examines changes in sleep across the life span. The integrative nature of sleep and circadian rhythms in normal physiological and cognitive function and their importance in health and disease processes will be emphasized. Prereqs. for IPHY 4850: IPHY 2800 and 3470, MCDB 1150, 1151, 2150 and 2151 or EBIO 1210, 1220, 1230 and 1240. IPHY 4850 and 5580 are identical courses.

IPHY 4600-4. Immunology. Studies the immune system, a multi-cellular system that functions to protect us from disease. Introduces concepts associated with the development and function of individual cells of the immune system (T-cells, B-cells, neutrophils, dendritic cells, macrophages), as well as their integrative roles in physiology and host defense. Prereq., IPHY 3430 or 3470. Recommended prereq., IPHY 3060. Same as IPHY 5600.

IPHY 4650-5. Exercise Physiology. Examines physiological and biochemical adjustments that occur in selected organ systems with acute and chronic exercise. Topics center on the physiological mechanisms pertaining to metabolic, cardiovascular, and hormonal alterations, the role of exercise and health and disease, soreness and fatigue, immune function, as well as varied environmental conditions area addressed. Prereqs., IPHY 2800, 3430 or 3470 and 3480. Prereq. or coreq., IPHY 3410. Restricted to junior/senior IPHY majors.

IPHY 4660-3. Critical Thinking in Integrative Physiology. Covers specific integrative physiology topics in areas such as animal physiology, endothelial function, neurobiology, exercise immunology, and exercise physiology. May be repeated up to 6 total credit hours. Restricted to junior/senior IPHY and EBIO majors. Prereq., 13 hours of IPHY course work.

IPHY 4680-3. Critical Thinking in Exercise Physiology. Covers specific exercise physiology topics such as cellular cause of fatigue and muscle soreness, heart disease, regulation of blood flow, diabetes, aging, training adaptations, exercise at high altitude, ergogenic aids, and excitation-contraction of muscle. Prereq., IPHY 4650. Restricted to juniors/seniors.

IPHY 4720-4. Neurophysiology. Describes how the nervous system controls the activity of muscles and how the sensory effects of muscle activity influence the function of the nervous system. Prereqs., IPHY 2800, 3430 or 3470. Prereq. or coreq., IPHY 3410. Restricted to junior/senior IPHY majors.

IPHY 4730-3. Motor Control. Examines the central and peripheral neural structures responsible for the control and coordination of human movement. Theories of motor control are also investigated from a behavioral and biomechanical view. Concepts in reflexive and voluntary movement control are emphasized. Prereq., junior standing. Same as IPHY 5730.

IPHY 4740-3. Theory of Motor Skill Learning. Offers a critical analysis of motor learning theories, including Adam's closed loop theory, Schmidt's schema theory, and the influence of contextual interference on learning and performance. Also covers feedback and practice organization. Projects and presentations required. Prereq., junior standing. Same as IPHY 5740.

IPHY 4860 (1-6). Independent Study: Undergraduate. Students may register for more than one section per term. May be repeated up to 8 total credit hours.

IPHY 4870 (1-3). Honors Thesis. Prereq., IPHY 2800 and 3700.

IPHY 4930 (1-6). Internship. Provides an opportunity for field/laboratory work in a variety of different settings. Prereq., junior or senior status and completion of at least two of the major core classes. Consult with faculty for approval. May be repeated up to 6 total credit hours.

IPHY 5100-2. Colloquium in Integrative Physiology. May be repeated up to 6 total credit hours.

IPHY 5102-2. Molecular Genetic Analysis of Physiology and Behavior. Utilizes molecular, classical, and quantitative genetics as a method for understanding the molecular basis of human and animal physiology and behavior. Required of first year students in Behavioral Genetics certificate program. Prereqs., EBIO 2070 or 2670, or MCDB 2150.

IPHY 5200-3. Physiological Genetics and Genomics. Same as IPHY 4200 and PSYC 5200.

IPHY 5232-2. Molecular Genetics and Physiology. Covers fundamental mechanisms of gene action, including genome structure and regulation of gene expression. Discusses molecular techniques used to examine human genetic diseases.

Emphasizes genetic diseases with behavioral, neurologic, and physiologic abnormalities. Prereq., IPHY/PSYC 5200 or instructor consent. Same as PSYC 5232.

IPHY 5262-3. Application of Bioinformatics and Genomics. Introduces graduate students to public online resources to be used for genetics research including: NCBI resources, human genome resources, gene expression tools, and proteomics applications. Recommended prereq., IPHY 5200.

IPHY 5300-3. Statistical Genetics for Complex Traits. Focuses on the methods of mapping complex disease genes in both population and family-based samples. Topics include both linkage and association analyses of qualitative and quantitative phenotypes.

IPHY 5440-4. Endocrinology. Same as IPHY 4440.

IPHY 5500-4. Histology: Cells and Tissues. Same as IPHY 4500.

IPHY 5550-3. Exercise Biochemistry. Examines the underlying biochemical mechanisms that are responsible for the physiological adaptations to short- and long-term dynamic exercise including carbohydrate, fat, and protein metabolism. The interaction of key biochemical alterations as it relates to disease (diabetes, obesity, and aging) and exercise will be addressed. Prereq., one year of chemistry. Prereq. or coreq., IPHY 4650 or instructor consent.

IPHY 5580-3. Sleep Physiology. Describes the physiology and neurobiology of sleep and impact of sleep, sleep deprivation, and sleep disorders on immune, endocrine, cardiovascular, respiratory, and neural systems, as well as examines changes in sleep across the life span. The integrative nature of sleep and circadian rhythms in normal physiological and cognitive function and their importance in health and disease processes will be emphasized. Prereqs. for IPHY 4850: IPHY 2800 and 3470, MCDB 1150, 1151, 2150 and 2151 or EBIO 1210, 1220, 1230 and 1240. IPHY 4850 and 5580 are identical courses.

IPHY 5600-4. Immunology. Restricted to graduate students. Same as IPHY 4600.

IPHY 5640-3. Clinical and Exercise Electrocardiography. Lectures and laboratory practice in recognition and evaluation of normal and pathological electrical activity of the heart as demonstrated by the electrocardiogram. For graduate students who monitor laboratory physiological testing and/or prescriptive exercise programs in laboratory settings. Prereqs., IPHY 3430 and 4650.

IPHY 5730-3. Motor Control. Same as IPHY 4730.

IPHY 5740-3. Theory of Motor Skill Learning. Same as IPHY 4740.

IPHY 5800-5. Advanced Statistics and Research Methods in Integrative Physiology. Focuses on how descriptive, correlational, and inferential statistics apply to physiological data. Provides instruction and experience in using related computer programs and examines the many considerations involved in physiological research methods. Prereq., IPHY 2800. Restricted to KINE and IPHY graduate students.

IPHY 5830-3. Writing for the Research Scientist. Promotes understanding of the rhetorical goals, structure, design, and language for effective scientific texts, emphasizing research reports and grant proposals. Supports students in executing advanced cognitive processes in planning, drafting, and revising. Involves instructor-guided procedural facilitation and peer-review workshops based on students' current writing projects in courses and laboratory research. Prereq., basic proficiency in English. Restricted to graduate students.

IPHY 5840 (1-6). Graduate Independent Study. Restricted to KAPH/IPHY graduate students. May be repeated up to 7 total credit hours.

IPHY 6010 (1-3). Seminar. Presents special topics in integrative physiology. May be repeated up to 6 total credit hours.

IPHY 6100 (1-3). Independent Study: Doctoral. Mentor-supervised academic experience designed to develop and enhance the professional/research skills of the doctoral candidates from the department.

IPHY 6650-3. Cellular Cardiovascular Physiology. Focuses on the cellular control of cardiac and smooth muscle contraction, at rest and in response to acute and chronic exercise. Addresses certain pathophysiological and physiological adaptive mechanisms. Prereq., IPHY 4650.

IPHY 6660-3. Locomotion Energetics and Biomechanics. Critiques and discusses both classic and cutting edge scientific research in the area of terrestrial locomotion. Recommended prereqs., IPHY 4540, 4650 and graduate standing in IPHY or EBIO.

IPHY 6670-2. Hypothesis Testing in Locomotion Biomechanics. Focuses on the scientific process including formulating and testing hypotheses in studies of locomotion. Students analyze primary articles to determine whether the studies tested hypotheses and to generate new hypotheses that logically follow from previous studies.

IPHY 6680-3. MATLAB for Physiological and Biomechanical Research. This introduction to MATLAB programming will teach the skills needed to write and modify programs for data acquisition and analysis, statistics, plotting, and simulation.

IPHY 6830-3. Professional Skills for the Research Scientist. Discusses grant and manuscript writing, scientific presentations, peer-review, setting up/directing a research laboratory, research ethics, mentoring, and other professional skills.

IPHY 6840 (1-3). Research Project. Involves a scholarly investigation of a selected topic using literature and/or experimental techniques. Advisor required. May be repeated up to 7 total credit hours.

IPHY 6940-1. Master's Degree Candidate.

IPHY 6950 (1-6). Master's Thesis. Restricted to IPHY graduate students.

IPHY 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Restricted to IPHY graduate students.

International Affairs

IAFS 1000-4. Global Issues and International Affairs. Introduces the student to the international affairs program. The course examines political and economic development in several countries in many different world regions. Examines historical trends and development as well as current political and economic issues. Approved for arts and sciences core curriculum: contemporary societies.

IAFS 3000-3. Special Topics in International Affairs. Junior or senior level umbrella seminar spanning a variety of topics relevant to the study of international affairs. Subjects addressed under this heading vary according to student interest and faculty availability. May be repeated up to 9 total credit hours. Restricted to junior and senior IAFS and PSCI majors.

IAFS 3300-4. Economy, Politics, and Society in the Middle East. Presents social, political, and economic aspects of the Middle East through a faculty-led study abroad in Kuwait, featuring interactions with officials, bankers, university faculty and local students. Offers a unique opportunity to discuss issues with Kuwaitis at Diwanayas, as well as to participate in seminars and workshops with local faculty and representatives of Kuwaiti businesses and government agencies. Prereq., ECON 1000 or 2020.

IAFS 3600-3. Global Secular Jewish Societies. Uses a transnational lens to explore contemporary debates about Jewish people, places, and practices of identity and community. Drawing on history, sociology, international studies, and anthropology, we'll think about the places that Jewish people have called "home," and what has made, or continues to make those places "Jewish." We'll also explore diverse practices that express the extraordinary varieties of Jewishness (such as building synagogues, food markets, and coffeehouses, creating film festivals, going on heritage travel, Israeli-Jewish backpacking, the creation of online websites and blogs, and creating new urban kibbutzim). Restricted to students with minimum 57 units completed. Same as JWST 3600. Approved for arts and sciences core curriculum: human diversity.

IAFS 3610-3. Topics in International Affairs and Jewish Studies. Explores topics in international affairs as it relates to Jewish culture and society. Subjects addressed under this heading vary according to student interest and faculty availability. May be repeated up to 9 total credit hours. Same as JWST 3610.

IAFS 4500-3. The Post-Cold War World. Capstone course for international affairs majors. Examines the ways in which the end of the Cold War, the collapse of failed states, and the rise of global terrorism changed the world. Studies how peoples, governments and nongovernmental organizations face new social, political, economic and security challenges in an era of globalization. Includes discussion, oral reports, critical book reviews, and research papers. Restricted to junior/senior IAFS majors.

IAFS 4800-3. Honors Seminar in International Affairs. Directed research course tailored to the particular research interests of the students enrolled. Devoted to

research methodology and the development of students' research. Prereq., 3.30 GPA and 3.40 IAFS GPA.

IAFS 4810-3. Honors in International Affairs. Continuation of IAFS 4800. Students complete original research begun in the fall and write and defend their honors thesis. They meet regularly with the instructor. Prereq., IAFS 4800.

IAFS 4900 (1-6). Independent Study in International Affairs. Provides an opportunity to earn academic credit for learning outside the formal class structure. Students interested in doing in-depth research propose a research project to a faculty sponsor and then work closely with that person to produce a piece of original research. Prereq., upper-division standing, GPA of 3.00 or better, grade of C or better in all lower-division courses, and at least 6 upper-division courses.

IAFS 4930 (3-6). Internship in International Affairs. Working individually under the guidance of a public or private organization, students are assigned to projects selected for their academic suitability. Written assignments occur throughout the semester. Prereq., departmental approval.

INVST Community Studies

INVS 1000-4. Responding to Social and Environmental Problems Through Service Learning. By integrating theory with required community service, students explore how problems are shaped by cultural values and how alternative value paradigms affect the definition of problems in areas such as education and the environment. Students examine different approaches to solving problems and begin to envision new possibilities. Approved for arts and sciences core curriculum: ideals and values.

INVS 1513-3. Civic Engagement: Using the Electoral Process as a Tool for Social Change. Designed to educate and inspire civic engagement primarily in the area of electoral politics. Examines various explanations of why people participate in the electoral process and whom they choose to support. Develops the practical skills necessary to participate successfully in the electoral arena. Through a service component, the course provides experience working on a campaign and mobilizing others to participate in the electoral process.

INVS 1523-3. Civic Engagement: Democracy as a Tool for Social Change. Educates and inspires students for civic engagement by exploring democratic values and the rights and responsibilities of citizenship. Develops theoretical knowledge and practical skills for participating in a diverse democratic society, especially at the state level, through analyzing legislative issues, making policy recommendations, and advocating for change. Approved for arts and sciences core curriculum: United States context.

INVS 2202-3. Renewing Democracy in Communities and Schools. Examines concepts of activism, citizenship, democracy, power, and diversity through classroom discussions and participation in a local high school's Public Achievement project. Through community-based partnerships, students will develop leadership skills; dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions. May be repeated up to 9 total credit hours.

INVS 2919-3. Renewing Democracy in Communities and Schools. Examines concepts of activism, citizenship, democracy, power, and diversity through classroom discussions and participation in a local high school's Public Achievement project. Through community-based partnerships, students will develop leadership skills; dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions. May be repeated up to 6 total credit hours.

INVS 3000 (3-4). Innovative Approaches to Contemporary Issues through Service Learning. Explores creative approaches for solving complex social and environmental issues, with a focus on peace and population. Students analyze the root causes of issues in theoretical and historical contexts, and develop their understanding of effective and innovative approaches to change. This course has a requirement of community service. Recommended prereq., upper-division status. Approved for arts and sciences core curriculum: contemporary societies.

INVS 3041-3. Self and Consciousness. Explores human development from a psychosocial perspective, focusing on the interplay between psychological patterns and social forms. Issues such as self-image and social consciousness are studied within the larger context of individual and collective forces leading to

transformation. Prereqs., SOCY 1001, and SOCY 3001 or 3011, or instructor consent. Same as SOCY 3041.

INVS 3100 (3-4). Multicultural Leadership: Theories, Principles and Practices. Focuses on leadership theories and skills necessary for effectiveness in multicultural settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change through comparative analyses of Western and non-Western theories and practices. Community service required. Same as ETHN 3201 and LDSP 3100. Approved for arts and sciences core curriculum: human diversity.

INVS 3302-3. Facilitating Peaceful Community Change. Students gain knowledge and skills that enable them to become effective facilitators of community goals. Focuses on understanding the processes of community building with a multicultural emphasis. Students are encouraged to apply concepts of life experiences and to examine themselves as potential change agents. Theory and summer experience are integrated. Prereq., admission to INVST. Coreq., INVS 3912. Same as WMST 3302.

INVS 3304-3. Human Rights: Promotion and Protection, an NGO Perspective. Explores the world of international human rights with a focus on the role of non-governmental organizations (NGOs) in the evolution of human rights ideologies, social structures, technologies and strategies. Students examine the inter-relatedness and inter-dependence of human rights, and the work of non-governmental organizations as related to other institutions of civil society, national governments, and international bodies. Recommended prereq., INVS 1000. Approved for arts and sciences core curriculum: contemporary societies.

INVS 3402-3. Implementing Social and Environmental Change. Examines grassroots democracy as a means for creating comprehensive, solution-based strategies to address social and environmental problems. Students develop an understanding of the use of democracy for positive social change, identify how changes are initiated within movements, and learn the theory and practice of effective and responsible change efforts.

INVS 3931 (1-6). The Community Leadership Internship, Part 1. Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. Prereq., admission into INVST CLP. May be repeated up to 6 total credit hours.

INVS 3932 (1-6). Community Leadership Internship, Part 2. Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. May be repeated up to 6 total credit hours.

INVS 4302-3. Critical Thinking in Development. Exposes students to current issues in the political economy of development. Subjects range from globalization, democratization, and economic development. Specifically, the course explores the international and domestic determinants of economic development with special reference to currency markets, foreign direct investment, trade, and democratization. Prereqs., PSCI 2012 or IAFS 1000, ECON 2010 and 2020, and one upper-division PSCI course. Same as PSCI 4732. Approved for arts and sciences core curriculum: contemporary societies.

INVS 4402-3. Nonviolent Social Movements. Explores theories of democracy and development in relation to movements for nonviolent social change. Focuses on means and ends, spirituality, leadership, decision-making, civil society, cooperative economics, ecology and decentralized powers. Restricted to senior SOCY/ PSCI majors. Same as SOCY 4111.

INVS 4931 (1-6). Community Leadership in Action, Part 1. Develops students' expertise as community leaders. Under the supervision of an instructor and a community advisor, students design a community-based project. Prereqs., admission to INVST CLP, INVS 3931 and 3932. May be repeated up to 6 total credit hours.

INVS 4932 (1-6). Community Leadership in Action, Part 2. Develops students' expertise as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community advisor, students learn organizational and leadership skills by designing, implementing and evaluating a community-based project. First-hand experience provides students with a deepened understanding of the complex issues facing humanity, and competence

with solution-based strategies. May be repeated up to 6 total credit hours. Same as LDSP 4932.

INVS 4999 (1-6). Teaching Social Justice. INVS students participate in a service-learning practicum under the supervision of an INVS instructor. They explore teaching strategies for implementing concrete educational goals. Focusing on the issues of social justice and social change, they learn how to encourage higher levels of creativity and analysis among students. May be repeated up to 6 total credit hours. Prereqs., INVS 3302, 3931/3932, 4931/4932 (min. grade B-).

Jewish Studies

JWST 1030-3. Biblical Hebrew 1. This course is designed to enable students to read the Hebrew Bible in the original language. The focus will be the ability to read the various genres of the text, utilizing both the tools of modern language acquisition and the study of classical grammar methods. Same as HEBR 1030.

JWST 1040-3. Biblical Hebrew 2. Building on HEBR/JWST 1030, this course continues to build expertise in reading the Hebrew Bible. Modern language acquisition and classical grammar study methods equip students with the tools to translate and read the various genres of the Biblical material. Prereq., HEBR/JWST 1030 or instructor consent. Same as HEBR 1040.

JWST 1108-3. Introduction to Jewish History. Surveys Jewish history from the earliest times to the present. Includes biblical history; Judaism in late antiquity, medieval, and early modern times; and special emphasis on the 19th century to the present, including American Judaism, the Holocaust, anti-Semitism, Zionism, and Israel. Same as HIST 1108 and GSLL 1108. Approved for arts and sciences core curriculum: historical context.

JWST 2350-3. Introduction to Jewish Culture. Explores the development and expressions of Jewish culture as it moves across the chronological and geographical map of the historic Jewish people, with an emphasis on the variety of Jewish ethnicities and their cultural productions, cultural syncretism, and changes. Sets the discussion in a historical context, and looks at cultural representations that include literary, religious, and visual texts. Taught in English. Same as HEBR 2350. Approved for arts and sciences core curriculum: human diversity.

JWST 2502-3. Representing the Holocaust. Examines how the memory of the Holocaust in Nazi Germany is increasingly determined by the means of its representation, e.g., film, autobiography, poetry, architecture. Same as GRMN 2502. Approved for arts and sciences core curriculum: ideals and values.

JWST 2551-3. Secular Jewish Literature, Modern to Contemporary Jews Coming of Age. Studies the literary expression of Jewish writers throughout the world in English translation. Gives special attention to questions of secularity versus tradition, identity, cultural change, diaspora and exile. Taught in English. HEBR 2551 and JWST 2551 are identical courses. Approved for arts and sciences core curriculum: literature and the arts.

JWST 2600-3. Judaism, Christianity, and Islam. Introduces literature, beliefs, practices, and institutions of Judaism, Christianity, and Islam, in historical perspective. Same as RLST 2600. Approved for arts and sciences core curriculum: ideals and values.

JWST 3100-3. Judaism. Explores Jewish religious experience and its expression in thought, ritual, ethics, and social institutions. Same as RLST 3100. Approved for arts and sciences core curriculum: historical context.

JWST 3202-3. Women, Gender, and Sexuality in Jewish Texts and Traditions. Reads some of the ways Jewish texts and traditions look at women, gender and sexuality from biblical times to the present. Starts with an analysis of the positioning of the body, matter and gender in creation stories, moves on to the gendered aspects of tales of rescue and sacrifice, biblical tales of sexual subversion and power, taboo-breaking and ethnos building, to rabbinic attitudes towards women, sexuality and gender and contemporary renderings and rereadings of the earlier texts and traditions. Same as HEBR 3202. Approved for arts and sciences core curriculum: human diversity.

JWST 3312-3. The Bible as Literature. Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible. Restricted to sophomores/ juniors/seniors. Same as ENGL 3312.

JWST 3401-3. The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe. Surveys the major works of 20th century central and central east

European film and literature. Examines cultural production in the non-imperial countries and non-national languages of the region including Yiddish, Belarusian, Czech, Hungarian, Polish and Romanian, among others. Traces the rise of nationalism over the course of the century from the age of empires through the Cold War. Same as GSLL 3401.

JWST 3501-3. German-Jewish Writers: From the Enlightenment to the Present. Provides insight into the German-Jewish identity through essays, autobiographies, fiction, and journalism from the Enlightenment to the post-Holocaust period. Examines the religious and social conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch. Same as GRMN 3501. Approved for arts and sciences core curriculum: human diversity.

JWST 3600-3. Global Secular Jewish Societies. Uses a transnational lens to explore contemporary debates about Jewish people, places, and practices of identity and community. Drawing on history, sociology, international studies, and anthropology, we'll think about the places that Jewish people have called "home," and what has made, or continues to make those places "Jewish." We'll also explore diverse practices that express the extraordinary varieties of Jewishness (such as building synagogues, food markets, and coffeehouses, creating film festivals, going on heritage travel, Israeli-Jewish backpacking, the creation of online websites and blogs, and creating new urban kibbutzim). Restricted to students with minimum 57 units completed. Same as IAFS 3600. Approved for arts and sciences core curriculum: human diversity.

JWST 3610-3. Topics in International Affairs and Jewish Studies. Explores topics in international affairs as it relates to Jewish culture and society. Subjects addressed under this heading vary according to student interest and faculty availability. May be repeated up to 9 total credit hours. Same as IAFS 3610.

JWST 3677-3. Jewish-American Literature. Explores the Jewish-American experience from the 19th century to the present through writers such as Sholom Aleichem, Peretz, Singer, Malamud, Miller, Ginsberg, and Ozick. The Jewish experience ranges from the travails of immigration to the loss of identity through assimilation. Restricted to sophomores/juniors/seniors. Same as WMST 3677. Approved for arts and sciences core curriculum: human diversity.

JWST 3930-3. Internship in Jewish Studies. Learn beyond the classroom by interning in a local non-profit organization that connects with the Program in Jewish Studies through its mission and/or program. Interns will be supervised by the faculty member of record as well as the employer housing the intern. Prereqs., HEBR/JWST 1108 or HIST/JWST 2350.

JWST 4050-3. Anthropology of Jews and Judaism. Explores topics in Jewish anthropology. Course will use the lens of anthropological inquiry to explore, discover and analyze different concepts within Jewish culture. Topics explored will include customs, religious practices, languages, ethnic and regional subdivisions, occupations, social composition, and folklore. Courses will explore fundamental questions about the definition of Jewish identity, practices and communities. May be repeated up to 9 total credit hours. Same as ANTH 4050.

JWST 4101-3. Topics in Hebrew Studies. Explores topics in Hebrew and Jewish literature and cultures. These may include topics such as diasporic literatures, Jewish artists and thinkers, courses on specific authors, figures or communities. Topics change each semester. May be repeated up to 9 total credit hours. Taught in English. Same as HEBR 4101.

JWST 4260-3. Topics in Judaism. Examines in depth central themes, schools of thought, and movements in Judaism across a range of historical periods. May be repeated up to 9 total credit hours as topics change. Recommended prereqs., 6 hours of RLST courses at any level including RLST/JWST 3100, RLST/JWST 2600, HIST/JWST 1108 or HEBR/JWST 2350 or instructor consent. Same as JWST 5260 and RLST 4260.

JWST 4301-3. Venice: the Cradle of European Jewish Culture. Explores the development of European Jewish culture from the late Middle Ages to the present by focusing on Jewish life in the city of Venice, Italy. Emphasis is on the development of Venetian print culture and emergence of Italy as a center of Jewish publishing in both the religious and secular world. The course examines a variety of cultural and historical material including early printings of the Talmud, the creation of Yiddish popular literature, Hebrew rabbinic literature, responses to political turmoil, and the aftermath of the Nazi genocide. Taught in English. Prereq., HEBR/JWST 2350. Same as HEBR 4301. Approved for arts and sciences core curriculum: literature and the arts.

JWST 4338-3. History of Modern Israel. Learn the history of this crossroads of Europe and Asia from the late Ottoman Empire to the present. Main topics include nationalism and colonialism, development of Zionist ideology, development of Palestinian nationalism, establishment of the Jewish settlement (Yishuv) under British rule, the founding of the Jewish nation-state, relations with neighbors, and the aftermath of the 1956, 1967, 1973, and 1982 wars. Prereqs., HIST 1108 or 1308 or JWST 2350. Same as HIST 4338.

JWST 4348-3. Topics in Jewish History. Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester. Consult the on-line Schedule Planner for specific topics. May be repeated up to 6 total credit hours within the degree. Prereqs., HIST 1108 or 1308 or JWST 2350. Restricted to sophomores/juniors/seniors. Same as HIST 4348.

JWST 4454-3. Jewish Intellectual History. Takes students on a journey from Medieval Spain to contemporary United States to explore how Jews, living in different societies, have attempted to reshape and interpret central Jewish values and beliefs in accordance with the prevailing ideas of their host societies. Focuses on the historical context of each Jewish society that produced the thinkers and ideas considered in this course. Prereq., HIST 1010 or 1020, or HIST/JWST 1108, or HEBR/JWST 2350. Same as HIST 4454.

JWST 4544-3. History of Yiddish Culture. Jews have produced culture in Yiddish, the vernacular language of eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. In this course, we will look at the literature, film, theater, music, art, sound, and laughter that defined the culture of eastern European Jewry and, in the 20th century, Jews around the world. Recommended prereqs., HIST 1108 or HEBR 2350. Same as HIST 4544.

JWST 4580-3. The Holocaust: An Anthropological Perspective. Focuses on the Holocaust during the Third Reich, which involved the murder of millions of people, including six million Jews. Reviews the Holocaust's history, dynamics, and consequences as well as other genocides of the 20th century, using an anthropological approach. Restricted to juniors/seniors. Same as ANTH 4580.

JWST 4827-3. Modern U.S. Jewish History. Explores the experience of Jews in the United States from the 1880s when the great migration of Jews from Eastern Europe began, through the twentieth century. Students will explore the changing ways in which Jews adapted to life in the U.S., constructed American Jewish identities, and helped to participate in the construction of the United States as a nation. Recommended prereqs., HIST 1025 or HIST/JWST 1108 or HEBR/JWST 2350. Same as HIST 4827.

Lesbian, Gay, Bisexual, and Transgender Studies

LGBT 2000-3. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies. Investigates the social and historical meanings of racial, gender, and sexual identities and their relationship to contemporary lesbian, bisexual, gay, and transgender communities. Same as WMST 2030. Approved for arts and sciences core curriculum: human diversity.

LGBT 2707-3. Introduction to Lesbian, Bisexual, and Gay Literature. Offers students at sophomore and junior levels an introduction to some of the forms, concerns, and genres of contemporary lesbian, bisexual, transgender, and gay writing in English. Prereq., sophomore standing. Same as ENGL 2707.

LGBT 3796-3. Queer Theory. Surveys theoretical, critical, and historical writings in the context of lesbian, bisexual, transgender, and gay literature. Examines relationships among aesthetic, cultural, and political agendas, and literary and visual texts of the 20th century. Prereq., sophomore standing. Same as ENGL 3796.

LGBT 4287-3. Studies in Lesbian, Gay, Bisexual, and Transgender Literature. Examines selected British, American, and French literary representations of lesbian and gay identity from the early 16th century to the present. Discusses the changing status of alternate sexuality as a literary and cultural topos, including how same-sex desire is defined, and the rhetorical and ideological difficulties involved in its representation. Specific topics vary each semester. May be repeated up to 9 total credit hours. Restricted to juniors and seniors. Same as ENGL/WMST 4287.

Libby Residential Academic Program

LIBB 1500-3. The Dialogue of Art and Religion. Focuses on interdisciplinary study of visual art from diverse cultural traditions. Addresses role and training of the artist; aesthetic issues related to the object; the audience or viewer for which the work is intended; and the context of the work, especially religious and social history. Cultural traditions include Russian Orthodox icons, Himalayan Buddhist *thangkas*, and Navaho sandpaintings. (In different semesters, the content may shift to include other traditions such as Islamic or Celtic manuscripts, or Haida totem poles.) Approved for arts and sciences core curriculum: ideals and values. Restricted to Libby RAP students.

LIBB 1600-3. Gender and Film. Explores a wide variety of cinematic forms and styles and discusses the treatment of femininity, masculinity, sexuality, and how gender is represented as an artifact of mass culture. Although the course title privileges issues of gender, the course also includes the study of issues of race and ethnicity in film and the inherent connections between the cinematic representations of race and gender. Approved for arts and sciences core curriculum: human diversity. Restricted to Libby RAP students.

LIBB 1700-3. The History of Communication from Caves to Cyberspace. Surveys the history, evolution, and nature of communication and communication technologies. Students learn about the ongoing media revolution and its broader context, considering the interdependence of communication, culture, and society. They critically examine utopian, deterministic, and pessimistic arguments about the influence of new technologies and arts. Course combines lecture, discussion, and group work in a seminar format. Approved for arts and sciences core curriculum: historical context. Restricted to Libby RAP students.

LIBB 2013-3. Film and the Quest for Truth. Concerns the subjectivity and relativity of truth. Focuses on how and why we pursue (or fail to pursue) the truths about ourselves and about the people and events around us, and how and why such truths are often elusive, fragmentary, and impermanent. Restricted to Libby RAP students. Formerly FILM 2013. Approved for arts and sciences core curriculum: ideals and values.

LIBB 2500 (1-3). Special Topics in Libby Residential Academic Program. Introduces timely studio subjects in the visual and performing arts that cannot be offered on a regular basis. Information concerning the studio topics offered in any given semester is available prior to registration from the Libby RAP. May be repeated up to 7 total credit hours. Restricted to Libby RAP students.

LIBB 2510 (1-3). Special Topics in Libby Residential Academic Program. Introduces timely subjects in the visual and performing arts that cannot be offered on a regular basis. Information concerning the seminar topics offered in any given semester is available prior to registration from the Libby RAP. May be repeated up to 7 total credit hours. Restricted to Libby RAP students.

LIBB 2800-3. Horror Films and American Culture. Examines American horror films in an historical context through which students learn to recognize how horror films represent our culture's "collective fears" and provides an analysis of the horror film genre. Considers the cultural contexts in which horror films are made through study of the creation and reception of these films during specific times in American history. Prereq., FILM 1502. Approved for arts and sciences core curriculum: United States context.

Libraries

LIBR 2000-3. Research Strategies on the Electronic Campus. Critical examination and practical exploration of computer technologies, digital communication, and electronic information systems and services for new students. Restricted to freshmen and sophomores only.

LIBR 3010-3. Methods of Electronic Library Research. Exploration of the structure, organization, retrieval, and evaluation of electronic information sources through the formulation of search strategies useful for undergraduate research.

LIBR 3900 (1-3). Independent Library Research. In-depth library research project for upper-division students. Prereq., instructor consent.

LIBR 4900 (1-3). Independent Library Research. In-depth library research project for upper-division students. Prereq., instructor consent.

Linguistics

LING 1000-3. Language in U.S. Society. Nontechnical exploration of the ways that language is used in America. Emphasizes language as a social institution and how values and goals of both public institutions and private groups shape and are shaped by language and its use. Meets MAPS requirement for social science: general. Approved for arts and sciences core curriculum: United States context or contemporary societies.

LING 1010-3. The Study of Words. Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically. Same as CLAS 1010.

LING 1500-3. Understanding Grammar. Presents fundamentals of grammar in the Western tradition. Emphasizes making concepts and uses of grammar (as exemplified in English and closely related foreign languages) understandable to the nonspecialist.

LING 1900-1. Service Learning Practicum: Adult Literacy. Practicum for selected students in LING 1000. Provides practical experience of the impact of illiteracy on individuals, families, and the community at large. Coregistration in service learning recitation is required. Coreq., LING 1000.

LING 2000-3. Introduction to Linguistics. Introduces the study of languages as structural systems. Principles of sound patterns, word formation, meaning, and sentence structure. Gives attention to language acquisition, psycholinguistics, language families, dialects, historical change in languages, and different language types. Meets MAPS requirement for social science: general.

LING 2400-3. Language and Gender. Familiarizes students with the effects of gender on language use; discusses popular beliefs and scholarly theories about language and communication. Provides students with tools for exploring the role of language and gender. Approved for arts and sciences core curriculum: human diversity.

LING 3005-3. Cognitive Science. Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind. Prereqs., two of the following: PSYC 2145, LING 2000, CSCI 1300, and PHIL 2440. Same as PSYC 3005, PHIL 3310, and CSCI 3702.

LING 3100-3. Language Sound Structures. Introduces the sounds of languages and their organization into phonological structures. Prereq., LING 2000 or equivalent.

LING 3220-3. American Indian Languages in their Social and Cultural Context. A sampling of the many languages and cultures found in America before Columbus. Emphasizes those living in what eventually became the United States, but also gives attention to the languages and higher civilizations of Latin America. Prereq., junior standing. Approved for arts and sciences core curriculum: human diversity.

LING 3430-3. Semantics. Theoretical and practical study of meaning in natural language. Considers both semantic theories and semantic phenomena from diverse languages. Does not treat techniques for improving the use of language. Prereq., LING 2000 or equivalent.

LING 3500-3. Language and the Public Interest. Studies language in public and private use, concentrating on semantic devices as found in language of political propaganda, advertising, business, and government, as well as everyday use of language between people.

LING 3545-3. World Language Policies. Examines the economic and sociopolitical impact of choosing English vs. other languages in the U.S. Introduces the study of language policies, rights, and planning in other countries, including the worldwide use of English in social, business, and legal contexts.

LING 3800 (1-4). Special Topics in Linguistics. Intensive study of a selected area or problem in linguistics. May be repeated up to 9 total credit hours.

LING 4100-3. Perspectives on Language. Provides extended critical examination of a few selected issues, chosen each term for their general interest and relevance, e.g., the relation between language and thought, or human language vs. animal languages, and computer languages. Prereqs., LING 2000 or equivalent, and junior or senior standing.

LING 4220-3. Language and Mind. Studies processes of perceiving speech, interpreting it as meaningful, and expressing intentions to communicate as utterances. Emphasizes roles of the brain and of perceptual and motor systems. Writing, gestural, and animal communicative systems also are treated. Prereqs., PSYC 1001 and LING 2000. Same as PSYC 4220.

LING 4420-3. Morphology and Syntax. Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages. Prereq., LING 2000 or equivalent. Same as LING 5420.

LING 4450-3. Introduction to Formal Syntax. Introduces formal generative grammar, including determining constituent structure, drawing trees, writing rules, understanding the properties of the lexicon and their interaction with syntax, X-bar theory and its modifications, and movement analysis. Prereq., LING 4420 on instructor consent.

LING 4560-3. Language Development. Emphasizes acquisition of language by young children; development in later years and into adulthood is also treated. Particular attention given to roles of environment and of neurophysiological endowment in learning to communicate with words, sentences, and narratives. Prereqs., LING 2000 and PSYC 1001. Same as SLHS 4560 and PSYC 4560.

LING 4610-3. English Structure for Teachers of English to Speakers of Other Languages. Description of morphological and syntactic categories and structures of English. Prereq., LING 2000. Same as LING 5610.

LING 4800-3. Language and Culture. Principles of language structure and how language and culture interrelate; how language and language use are affected by culture; and how culture may be affected by use of, or contact with, particular languages. Prereq., junior standing. Same as ANTH 4800.

LING 4830-3. Honors Thesis. Required for students who elect departmental honors. Students write an honors thesis based on independent research under the direction of a faculty member. May be repeated up to 7 total credit hours.

LING 4900 (1-3). Independent Study. May be repeated up to 7 total credit hours.

LING 5030-3. Linguistic Phonetics. Introduces practical and theoretical aspects of phonetics. Provides training in recognition and production of speech sounds, and instruction on fundamentals of articulatory, acoustic, and auditory phonetics.

LING 5200-3. Introduction to Computational Corpus Linguistics. Covers computer methods for doing linguistics with on-line corpora. Includes extensive introduction (with lab) to the Python programming language, UNIX corpus tools, concordance programs, syntactic treebanks, propbanks, and corpora for discourse and phonology research. Restricted to graduate standing or instructor consent.

LING 5300-3. Research in Psycholinguistics. After a general introduction to issues and research methods in psycholinguistics (language production and comprehension, language and cognition, language acquisition), several major current research topics, such as models of speech production, and theories of brain specialization for language, are explored. Prereq., at least one graduate-level course in linguistics, psychology, or computer science. Same as PSYC 5300.

LING 5410-3. Phonology. Studies sound systems of language. Introduces both principles of organization of sound systems and major kinds of phonological structures found worldwide. Provides extensive practice in applying phonological principles to data analysis. Prereq., LING 5030 or instructor consent.

LING 5420-3. Morphology and Syntax. Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages. Same as LING 4420.

LING 5430-3. Semantics and Pragmatics. Explores fundamental concepts of semantics and pragmatics, including theories of communication and meaning, representation, conversational implications, speech acts, and discourse structure. Prereq., LING 5420 or instructor consent.

LING 5570-3. Introduction to Diachronic Linguistics. Familiarizes students with terminology, methods, and theories dealing with phenomena of language change through time. Prereq., LING 5410 or instructor consent.

LING 5610-3. English Structure for Teachers of English to Speakers of Other Languages. Description of morphological and syntactic categories and structures of English. Prereq., graduate standing. Same as LING 4610.

LING 5620-3. Teaching ESL Pronunciation. Examines the phonetics and phonology of American English (including prosody) and explores techniques for teaching pronunciation skills to non-native speakers. Treats both general issues and specific problems for students from particular language backgrounds. Prereq., LING 3100 or LING 5030 and 5410.

LING 5630-3. Methods and Materials for Teaching English as an Additional Language. Provides an overview of methods and materials for teaching English as an additional language, along with opportunities for students to observe, discuss and analyze these in relation to language teaching principles, linguistic considerations, and global and local contexts. Aimed primarily at the teaching of English to nonnative speaking adults, the course also addresses second and foreign language teaching generally. Recommended prereqs., LING 5610 or 5620.

LING 5832-3. Natural Language Processing. Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs. Prereq., graduate standing or instructor consent. Same as CSCI 5832.

LING 5900 (1-3). Independent Study. May be repeated up to 7 total credit hours.

LING 5910 (1-3). TESOL Practicum. Provides observation and supervised teaching experiences in classroom and other contexts involving the teaching of English to speakers of other languages, especially adults and young adult learners in settings outside K-12. Meetings provide opportunities to debrief and to consult on teaching practice; help students connect theory, methods and practice; and support a professional teaching portfolio process. May be repeated up to 6 total credit hours. Prereq., LING 4610/5610 or instructor consent.

LING 6200-3. Issues and Methods in Cognitive Science. Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. Prereqs., graduate standing, or at least one course at the 3000-level or higher in computer science, linguistics, philosophy, or psychology. No background in computer science will be presumed. Same as CSCI 6402, EDUC 6504, PHIL 6310, and PSYC 6200.

LING 6300-3. Topics in Language Use. Discusses current issues and research in a selected area related to language use and function. Sample topics include conversational interaction, language policy, language content, and sociolinguistic variation.

LING 6310-3. Sociolinguistic Analysis. Serves as an advanced introduction to the empirical and theoretical foundations of contemporary sociolinguistic analysis, with special emphasis on linguistic variation, diversity and change.

LING 6320-3. Linguistic Anthropology. Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse. Same as ANTH 6320.

LING 6450-3. Syntactic Analysis. Introduces the major constructs used by formal theories of syntax to capture the relationship between meaning and syntactic form and uses data from diverse languages to explore the universality of these constructs. Restricted to graduate students.

LING 6510-3. Language Structures. Surveys the structure of one or more languages, emphasizing understanding how parts of the language interact. Designed to supplement courses in which parts of languages are used to illustrate theoretical claims. Prereqs., LING 5410 and 5420.

LING 6520-3. Topics in Comparative Linguistics. Students compare and contrast selected structures of languages treated from a typological, genetic, or a real perspective. No special prior knowledge of the subject language is required. Prereqs., LING 5410, 5420, and 5570, or equivalent.

LING 6560-3. Language Acquisition. Theories and research methods in first-language acquisition of phonology, morphology, syntax, semantics, and pragmatics. Prereqs., LING 5410, 5420, and 5430, or instructor consent.

LING 6940-1. Master's Degree Candidate.

LING 6950 (1-6). Master's Thesis.

LING 7000-3. Methods of Typological Research 1. Research practicum that provides experience in discovering generalizations about language from observations over a sample of individual languages. Students practice the steps in such research from formulation of research questions to preliminary sketch of results under close faculty supervision. Prereqs., LING 5410, 5420, and 5570; or equivalent.

LING 7030-3. Phonetic Theory and Analysis. Provides students with the practical skills and the conceptual framework to do independent research in phonetics (or in other areas relying on phonetic data). Introduces current and traditional issues in phonetic research (both experimental and theoretical) and gives training in analytical methods. Prereqs., LING 5030 and 5410 or equivalent.

LING 7100-3. Field Methods 1. Introduces the process of discovering structure of a language from data obtained directly from its speakers. Emphasizes effectiveness in the field context, rapid recognition of structural features, and preliminary formulation using computational tools. Prereqs., LING 5410 and 5420, or equivalent.

LING 7320-3. Narrative and Identity. Examines the ways in which identities are constructed, contested, and negotiated through narrative practice.

LING 7350-3. Language and Gender in Cultural Perspective. Examines organizations of language and gender in a variety of societies and cultures from the perspectives of sociolinguistics, linguistic anthropology, and socially-oriented discourse analysis.

LING 7360-3. Language and Sexuality. Explores the role of language in the social construction and articulation of sexuality.

LING 7410-3. Phonological Theory. Phonetic and morphophonological representations: distinctive features, segments, prosodic structures, morphological structures. Phonological processes and their interaction. Naturalness conditions. Prereq., LING 5410 or equivalent.

LING 7415-2. Cognitive Science Research Practicum. Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereq., CSCI 7762 or EDUC 6505 or LING 7762 or PHIL 7310 or PSYC 7762. Same as PSYC 7415, CSCI 7412, PHIL 7415, and EDUC 6506.

LING 7420-3. Syntactic Theory. Covers various topics in syntactic theory. May be repeated up to 9 total credit hours with instructor consent. Prereq., LING 5420 or equivalent.

LING 7425-2. Cognitive Science Research Practicum 2. Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506. Same as PSYC 7425, CSCI 7422, PHIL 7425, and EDUC 6516.

LING 7430-3. Semantic Theory. Current developments in the theory of linguistic semantics. Topics include truth-conditional theories, generative linguistic theories, semantic theories of communicative competence, and integration of these theories in development of a combined theory of semantics and pragmatics. Prereq., LING 5430 or instructor consent.

LING 7570-3. Advanced Diachronic Linguistics. Presents theories of language change. Discusses mechanisms of language change, its trajectories over linguistic categories and items, and its relation to theories of grammar and of language variation. Prereqs., LING 5410, 5420, and 5570, or equivalent.

LING 7762 (1-2). Readings and Research in Cognitive Science. Interdisciplinary reading of innovative theories and methodologies of cognitive science. Participants share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Prereq., graduate standing. Same as CSCI 7762, EDUC 6505, and PSYC 7765.

LING 7775 (1-2). Topics in Cognitive Science. Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the

ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as PSYC 7775, CSCI 7772, EDUC 7775, SLHS 7775, and PHIL 7810.

LING 7800 (1-3). Open Topics in Linguistics. Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. Contact the department office for information. Prereq., instructor consent.

LING 7900 (1-3). Independent Study. May be repeated up to 7 total credit hours.

LING 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

English as a Second Language

For additional information regarding English as a second language courses, see International English Center in the General Information section.

ESLG 1130-2. Accent Reduction for Foreign Students. Provides oral activities with authentic English materials to reduce accents and to increase intelligibility for U.S. academic situations. Evaluates individual problem areas and includes one-on-one meetings with the native-speaker instructor. Improves overall articulation and fluency. Does not fulfill humanities or major requirements.

ESLG 1210-2. Academic Writing for Foreign Students. Addresses the development of paragraphs and full-length essays. Focus areas include organization and style, grammar and vocabulary, and conventions of academic writing, including incorporating the ideas of others and citing sources appropriately. Extensive instructor feedback provided. Improves fluency and precision in academic writing. Does not fulfill humanities or major requirements.

ESLG 1222-2. Advanced Written Composition for Foreign Students. Continued practice in academic writing, including incorporating the ideas of others and citing sources appropriately. Extensive instructor feedback provided. Preparation, writing, and revising of a full-length academic term/research paper or work on chapters for a master's thesis or doctoral dissertation. Does not fulfill humanities or major requirements. Prereq., ESLG 1210 or instructor consent.

Mathematics

After completing one semester of calculus with a grade of C (2.00) or better, no math major may receive credit in any mathematics course numbered below 1300. No student may obtain more than 9 hours of credit in mathematics courses numbered below 1300. A grade of C- or above is required for all prerequisite courses.

MATH 1000-1. Equations and Inequalities. Includes linear, quadratic, more general polynomial, rational, and radical equalities; linear, polynomial, rational, and absolute value inequalities; and systems of linear and nonlinear equations. Also includes the Binomial Theorem. Students who elect to follow MATH 1000 with MATH 1010 and MATH 1020 receive the equivalent of a conventional 3-credit course in college algebra, such as MATH 1011. Prereq., one year of high school algebra. Similar to MATH 1011 and 1150.

MATH 1005-3. Introduction to College Mathematics. Introductory level mathematics course which presents a college level introduction to algebraic functions and their applications. Student with credit for MATH 1005 receives only one additional hour of credit for MATH 1001, 1011 or 1012 or two additional hours of credit for MATH 1150. Course is only offered through the Student Academic Service Center. Meets MAPS requirement for mathematics.

MATH 1010-1. Introduction to Functions/Graphing. Includes graphing lines and circles and transformations of known graphs. Covers functional notation, properties of functions, combining functions, and inverse functions and their graphs. Also covers the second one-third of a conventional 3-credit course in college algebra. Prereq., MATH 1000. Similar to MATH 1011 and 1150.

MATH 1011-3. Fundamentals and Techniques of College Algebra. Covers simplifying algebraic expressions, factoring linear and quadratic equations, inequalities, exponentials, logarithms, functions, and graphs, and systems of equations.

Credit not granted for this course and MATH 1010, 1020, and 1150. Prereq., one year high school algebra or placement exam score for MATH 1000. Meets MAPS requirement for mathematics. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1012-3. Quantitative Reasoning and Mathematical Skills. Promotes mathematical literacy among liberal arts students. Teaches basic mathematics, logic, and problem-solving skills in the context of higher level mathematics, science, technology, and/or society. This is not a traditional math class, but is designed to stimulate interest in and appreciation of mathematics and quantitative reasoning as valuable tools for comprehending the world in which we live. Credit not granted for this course and QRMS 1010. Meets MAPS requirement for mathematics. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1020-1. Polyn, Ratl, Expo, Log. Introduces graphing such functions, solving exponential and logarithmic equations, and exponential modeling. Covers the final one-third of a conventional 3-credit course in college algebra. Prereq., MATH 1010. Similar to MATH 1011 and 1150.

MATH 1021-2. Numerical and Analytical College Trigonometry. Covers trigonometric functions, identities, solutions of triangles, addition and multiple angle formulas, inverse and trigonometric functions, and laws of sines and cosines. Credit not granted for this course and MATH 1150, 1030 or 1040. Prereqs., MATH 1011 or 1020, or placement exam score for MATH 1030, or 1 1/2 years or high school algebra and 1 year of high school geometry.

MATH 1030-1. Numerical Trigonometry. Studies angles, trigonometric functions, numerical calculations, law of sines, law of cosines, and graphs of trigonometric functions. Students who elect to follow MATH 1030 with MATH 1040 receive the equivalent of a conventional 2 credit hour course in college trigonometry, such as MATH 1021 or 1150. Prereq., MATH 1020 or 1-1/2 years of high school algebra and one year of high school geometry.

MATH 1040-1. Analytical Trigonometry. Focuses on inverse trigonometric functions, trigonometric identities, and trigonometric equations. Covers the second half of a conventional 2 credit hour course in college trigonometry. Prereq., MATH 1030. Similar to MATH 1021 and 1150.

MATH 1050-1. Linear Equat/Matrices. Stresses lines and linear equations, matrix methods for solving systems of linear equations, matrix algebra, matrix inversion, and applications. Students who elect to follow MATH 1050 with MATH 1060 and MATH 1070 receive the equivalent of a 3 credit hour course in finite mathematics for business and social sciences such as MATH 1071. Prereq., MATH 1000 or one and a half years of high school algebra. Similar to MATH 1071.

MATH 1060-1. Linear Programming. Studies linear inequalities, geometric method of linear programming, simplex method of linear programming, and duality principle. MATH 1060 covers the middle one-third of a standard one-semester course in finite mathematics for business and social sciences. However, MATH 1060 by itself forms a self-contained short course in linear programming, suitable for students whose backgrounds and/or placement scores indicate that they are adequately prepared. Prereq., MATH 1050 or MATH 1010 or 1-1/2 years of high school algebra. Similar to MATH 1071.

MATH 1070-1. Combinatoric/Probability Theory. Covers sets and counting, permutations, combinations, random experiments, sample spaces, and calculation of probabilities. MATH 1070 provides the final one-third of a standard one-semester course in finite mathematics for business and social sciences. However, MATH 1070 by itself forms a self-contained short course in the theory of probability, which could serve as a foundation for students planning to take courses in statistics. Prereq., MATH 1000 or 1060 or 1 1/2 years of high school algebra. Similar to MATH 1071.

MATH 1071-3. Finite Mathematics for Social Science and Business. Discusses systems of linear equations and introduces matrices, linear programming, and probability. Prereq., MATH 1011 or 1000, placement exam score for MATH 1020, or one and a half years of high school algebra. Credit not granted for this course and MATH 1050, 1060 and 1070. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1080-1. Functn/Limit/Derivative. Highlights functions, graphs, limits and continuity, definition of derivative, derivative formulas, higher order derivatives, and applications. Students who elect to follow MATH 1080 with MATH 1090 and MATH 1100 receive the equivalent of a conventional 3 credit hour course in cal-

culus for business and social sciences such as MATH 1081. Prereq., MATH 1070 or MATH 1010 or two years of high school algebra. Similar to MATH 1081, MATH 1300, MATH 1310, APPM 1350, and ECON 1088.

MATH 1081-3. Calculus for Social Science and Business. Covers differential and integral calculus of algebraic, logarithmic, and exponential functions. Prereq., MATH 1011, 1071, 1010, or 1070 or placement exam score for MATH 1020 or two years high school algebra. Credit not granted for this course and MATH 1080, 1090, 1100, 1300, 1310, APPM 1350, and ECON 1088. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1090-1. Fundamentals of Differential Calculus. Focuses on absolute extrema, concavity, first and second derivative tests, asymptotes, logarithmic and exponential functions, and applications. Math 1090 forms the middle one-third of a standard one-semester course in calculus for business and social sciences. Prereq., Math 1080 or one semester of high school calculus. Similar to MATH 1081, 1300, and 1310, APPM 1350, and ECON 1088.

MATH 1100-1. Fundamentals of Integral Calculus. Focuses on the indefinite integral, methods of integration, differential equations, the definite integral, area under a graph, function of several variables, and applications. MATH 1100 forms the final one-third of a standard one-semester course in calculus for business and social sciences. Prereq., MATH 1090. Similar to MATH 1081, MATH 1300, MATH 1310, APPM 1350, and ECON 1088.

MATH 1110-3. The Spirit and Uses of Mathematics 1. For liberal arts students and prospective elementary teachers. Includes a study of problem-solving techniques in mathematics, the uses and role of mathematics in our society, and the structure of our familiar number systems. Additional topics are chosen from number theory, ancient numeration systems, computer science, modern geometry and algebra, and elementary logic. Prereq., one year of high school algebra and one year of plane geometry. The combination MATH 1110 and 1120 is approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1120-3. The Spirit and Uses of Mathematics 2. Continuation of MATH 1110. Prereq., one year of high school algebra and one year of plane geometry. The combination MATH 1110 and 1120 is approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1130-3. Mathematics from the Visual Arts. Introduces mathematical concepts through the study of visual arts. In practicum and lectures, students study the symmetry groups of patterns, *shibori*-like papercuttings, origami, and mandalas. Also studied are Euler's characteristics, perspective, golden ratio, computer art, and fractals. Credit not granted for this course and QRMS 1130. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1150-4. Precalculus Mathematics. Develops techniques and concepts prerequisite to calculus through the study of trigonometric, exponential, logarithmic, polynomial, and other functions. Prereq., one and a half years of high school algebra. Students having credit for college algebra and trigonometry may not receive additional credit for MATH 1150. Students with credit for college algebra receive only 2 additional hours of credit for MATH 1150. Similar to MATH 1000, 1010, 1020, 1011, 1021, 1030, and 1040. Meets MAPS requirement for mathematics. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1300-5. Analytic Geometry and Calculus 1. Topics include limits, derivatives of algebraic and trigonometric functions, applications of the derivative, integration and application of the definite integral. Prereqs., two years high school algebra, one year geometry, and 1/2 year trigonometry or MATH 1150. Credit not granted for this course and MATH 1081, 1310, APPM 1345, 1350, and ECON 1088. Similar to MATH 1080, 1090, and 1100. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1310-5. Calculus, Stochastics, and Modeling. Calculus, probability, statistics, and discrete and continuous modeling are central to understanding the behavior of complex systems, ranging from gene networks and cells to brains and ecosystems. This course is similar to MATH 1300, but a greater emphasis is placed on relevance and applications to complex systems. Especially recommended for biology majors. Prereq., 2 years high school algebra, 1 year geometry, and 1/2 year trigonometry, or MATH 1150. Credit not granted for this course and MATH 1080, 1081, 1090, 1100, 1300, APPM 1350, or ECON 1088. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1410-3. Mathematics for Secondary Educators. Assists students in meeting state mathematics certification requirements. Topics include problem solving, number systems, geometry and measurement, probability and statistics. Enrollment is restricted to students already admitted to or intending to apply for admission to the secondary teacher education program. Prereqs., one year high school algebra, one year geometry. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 2001-3. Introduction to Discrete Mathematics. Introduces the ideas of rigor and proof through an examination of basic set theory, quantification theory, elementary counting, discrete probability, and additional topics. Prereq., MATH 1300 or APPM 1350.

MATH 2300-5. Analytic Geometry and Calculus 2. Continuation of MATH 1300. Topics include transcendental functions, methods of integration, polar coordinates, conic sections, improper integrals, and infinite series. Prereq., Calculus 1. Credit not granted for this course and MATH 1320 or APPM 1360.

MATH 2380-3. Mathematics for the Environment. An interdisciplinary course where analysis of real phenomena such as acid rain, population growth, and road-killed rabbits in Nevada leads to consideration of various fundamental concepts in mathematics. One-third of the course consists of individual projects chosen by students. Prereq., proficiency in high school mathematics. Credit not granted for this course and QRMS 2380. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 2400-4. Analytic Geometry and Calculus 3. A continuation of Calculus 2. Topics include vectors, three-dimensional analytic geometry, partial differentiation and multiple integrals, and vector analysis. Prereq., Calculus 2. Credit not granted for this course and APPM 2350.

MATH 2510-3. Introduction to Statistics. Elementary statistical measures. Introduces statistical distributions, statistical inference, and hypothesis testing. Prereq., two years of high school algebra. Credit not granted for this course and MATH 4520/5520 or MATH 3510.

MATH 2520-3. Introduction to Biometry. Introduces the concepts of randomness, confidence and hypothesis tests, then applies these ideas to analysis of variance, linear regression and correlation, all in the context of biology. Credit not granted for this course and any of MATH 2510, 4520, or APPM 4570/5570. Prereq., MATH 1300 or 1310 or APPM 1350.

MATH 3001-3. Analysis 1. Provides a rigorous treatment of the basic results from elementary Calculus. Topics include the topology of the real line, sequences of numbers, continuous functions, differentiable functions, and the Riemann integral. Prereq., MATH 2001.

MATH 3110-3. Introduction to Theory of Numbers. Studies the set of integers, focusing on divisibility, congruences, arithmetic functions, sums of squares, quadratic residues and reciprocity, and elementary results on distributions of primes. Prereq., MATH 2001. Offered each spring.

MATH 3120-3. Functions and Modeling. Engages the students in lab-based activities designed to strengthen and expand knowledge of the topics in secondary mathematics, focusing especially on topics from Precalculus and Calculus. The labs will involve the use of multiple representations, transformations, data analysis techniques, and interconnections among geometry, probability and algebra. A recurrent theme will be building relationships between discrete and continuous reasoning. Prereqs., Calculus I, MATH 2001, or instructor consent.

MATH 3130-3. Introduction to Linear Algebra. Examines basic properties of systems of linear equations, vector spaces, linear independence, dimension, linear transformations, matrices, determinants, eigenvalues, and eigenvectors. Prereq., MATH 2300 or APPM 1360. Credit not granted for this course and APPM 3310.

MATH 3140-3. Abstract Algebra 1. Studies the elementary theory of groups, rings, fields, polynomials, group and ring homomorphisms, and isomorphisms. Prereq., MATH 2001 and 3130.

MATH 3170-3. Combinatorics 1. Covers basic methods and results in combinatorial theory. Includes numeration methods, elementary properties of functions and relations, and graph theory. Emphasizes applications. Prereq., MATH 2001.

MATH 3210-3. Euclidean and Non-Euclidean Geometry. Axiomatic systems. Foundations of Euclidean and Lobachevskian geometries. Prereq., MATH 2001 and 3130.

MATH 3510-3. Introduction to Probability and Statistics. Introduces the basic notions of Probability: random variables, expectation, conditioning, and the standard distributions (Binomial, Poisson, Exponential, Normal). This course also covers the Law of Large Numbers and Central Limit Theorem as they apply to statistical questions: sampling from a random distribution, estimation, and hypothesis testing. Prereqs., MATH 2001 and 2300 or APPM 1360. Credit not granted for this course and MATH 2510 or 4510.

MATH 3850-1. Seminar in Guided Mathematics Instruction. Provides Learning Assistants with an opportunity to analyze assessment data for formative purposes, and develop instructional plans as a result of these analyses. These formative assessment analyses will build on the literature in the learning sciences. Students will gain direct experiences interacting with the tools of the trade, especially with actual assessment data and models of instruction. May be repeated up to 3 total credit hours. Restricted to Learning Assistants in math. Coreq., EDUC 4800.

MATH 4000-3. Foundations of Mathematics. Focuses on a complete deductive framework for mathematics and applies it to various areas. Presents Goedel's famous incompleteness theorem about the inherent limitations of mathematical systems. Uses idealized computers to investigate the capabilities and limitations of human and machine computation. Prereq., MATH 2001 plus one of 3001, 3130, 3140, or 3210.

MATH 4001-3. Analysis II. Provides a rigorous treatment of infinite series, sequences of functions, and an additional topic chosen by the instructor (for example, multivariable analysis, the Lebesgue integral, or Fourier analysis). Prereqs., MATH 3001 and 3130.

MATH 4120-3. Introduction to Operations Research. Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation, and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits. Prereqs., MATH 3130 or APPM 3310. Same as MATH 5120 and APPM 4120.

MATH 4140-3. Abstract Algebra 2. Covers group actions, Sylow theory, Field theory, and some Galois theory. Prereq., MATH 3140.

MATH 4200-3. Introduction to Topology. Introduces the basic concepts of point set topology. Includes topological spaces, metric spaces, homeomorphisms, connectedness, and compactness. Prereqs., MATH 3001 or MATH 4310.

MATH 4210-3. Euclidean and Non-Euclidean Geometry II. Continues the study of Euclidean and non-Euclidean geometry from MATH 3210 and examines a more advanced topic from geometry chosen by the instructor (e.g., projective geometry or three-dimensional geometry). Prereq., MATH 3120.

MATH 4230-3. Geometry of Curves and Surfaces. Introduces the modern differential geometry of plane curves, space curves, and surfaces in space. Computers are used, but no prior knowledge of computer programming is required. Prereqs., Calculus 3 and MATH 3130.

MATH 4320-3. Multivariable Analysis. Instructs students in calculus of several variables. Topics include continuity, differentiation and integration, implicit function theorem, inverse function theorem, and if time permits, Fourier series. Prereq., MATH 3130 or APPM 2360.

MATH 4330-3. Fourier Analysis. The notion of Fourier analysis, via series and integrals, of periodic and nonperiodic phenomena is central to many areas of mathematics. Develops the Fourier theory in depth, and considers such special topics and applications as wavelets, Fast Fourier Transforms, seismology, digital signal processing, differential equations, and Fourier optics. Prereq., MATH 3001 or instructor consent. Same as MATH 5330.

MATH 4430-3. Ordinary Differential Equations. Involves an elementary systematic introduction to first-order scalar differential equations, nth order linear differential equations, and n-dimensional linear systems of first-order differential equations. Additional topics are chosen from equations with regular singular points, Laplace transforms, phase plane techniques, basic existence and uniqueness, and numerical solutions. Prereqs., Calculus 3, and MATH 3130 or APPM 2360 (min. grade C). Similar to APPM 2360.

MATH 4440-3. Mathematics of Coding and Cryptography. Gives an introduction, with proofs, to the algebra and number theory used in coding and cryptography. Basic problems of coding and cryptography are discussed; prepares students for the more advanced ECEN 5032 and 5682. Prereq., MATH 3130. Recommended prereqs., MATH 3110 and 3140. Same as MATH 5440.

MATH 4450-3. Introduction to Complex Variables. Theory of functions of one complex variable, including integrals, power series, residues, conformal mapping, and special functions. Prereqs., MATH 2400 and 3001.

MATH 4470-3. Partial Differential Equations 1. Studies initial, boundary, and eigenvalue problems for the wave, heat, and potential equations. Solution by separation of variables, Green's function, and variational methods. Prereq., MATH 4430 or equivalent. Same as MATH 5470.

MATH 4510-3. Introduction to Probability Theory. Studies axioms, combinatorial analysis, independence and conditional probability, discrete and absolutely continuous distributions, expectation and distribution of functions of random variables, laws of large numbers, central limit theorems, and simple Markov chains. Prereqs., MATH 2400, or APPM 2350, and MATH 3130. Credit not granted for this course and APPM 3570, ECEN 3810, or MATH 3510.

MATH 4520-3. Introduction to Mathematical Statistics. Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis. Analyzes variance distribution-free methods. Prereq., MATH 4510 or APPM 3570. Same as MATH 5520 and APPM 4520.

MATH 4540-3. Introduction to Time Series. Stresses basic properties, linear extrapolation, and filtering of stationary random functions. Topics also include spectral analysis and estimation of the power spectrum using computers. Prereqs., MATH 4510/APPM 3570 and MATH 4520/APPM 4520. Same as MATH 5540 and APPM 4540.

MATH 4650-3. Intermediate Numerical Analysis 1. Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Prereqs., APPM 3310 or MATH 3130, and knowledge of a programming language. Same as APPM 4650.

MATH 4660-3. Intermediate Numerical Analysis 2. Topics include solution of algebraic and transcendental equations, and linear and nonlinear systems of equations. Highlights interpolation, integration, solution of ordinary differential equations, least squares, sources of error and error analysis, computer implementation of numerical methods, matrix eigenvalue problems, and summation of infinite series. See also MATH 4650. Prereq., MATH 4650. Same as APPM 4660.

MATH 4730-3. Set Theory. Studies in detail the theory of cardinal and ordinal numbers, definition by recursion, the statement of the continuum hypothesis, simple cardinal arithmetic, and other topics chosen by the instructor. Prereq., MATH 2001 plus one upper division MATH class.

MATH 4820-3. History of Mathematical Ideas. Examines the evolution of a few mathematical concepts (e.g., number, geometric continuum, or proof), with an emphasis on the controversies surrounding these concepts. Begins with Ancient Greek mathematics and traces the development of mathematical concepts through the middle ages into the present. Prereq., two upper division courses in mathematics. Recommended prereq., completion of upper-division written communication requirement.

MATH 4890 (1-3). Honors Independent Study. Offered for students doing a thesis for departmental honors.

MATH 4900 (1-3). Independent Study.

MATH 5000-3. Foundations of Mathematics. Focuses on foundations used in other graduate courses and for specialization in foundations. Includes equivalence relations, orderings, ordinal and cardinal numbers and arithmetic, axiom of choice; first-order logic, models, truth, compactness and completeness theorems, nonstandard analysis, and infinitesimals; and formulation of Goedel's incompleteness theorem. Prereqs., MATH 3130, 3140, and 4310. Undergraduates must have approval of the instructor.

MATH 5030-3. Intermediate Mathematical Physics 1. Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory, and Fourier analysis. Prereqs., MATH 4310 and 4320. Undergraduates must have approval of the instructor. Same as PHYS 5030.

MATH 5040-3. Intermediate Mathematical Physics 2. Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the

special functions, boundary value problems, potential theory, and Fourier analysis. Prereq., MATH 5030. Undergraduates must have approval of the instructor. Same as PHYS 5040.

MATH 5120-3. Introduction to Operations Research. Prereq., MATH 3130 or APPM 3310. Undergraduates must have approval of the instructor. Same as MATH 4120, APPM 5120.

MATH 5150-3. Linear Algebra. Highlights vector spaces, linear transformations, eigenvalues and eigenvectors, and canonical forms. Prereq., MATH 3130. Undergraduates must have approval of the instructor.

MATH 5330-3. Fourier Analysis. Undergraduates must have approval of the instructor. Prereq., MATH 4001. Same as MATH 4330.

MATH 5430-3. Ordinary Differential Equations. Introduces theory and applications of ordinary differential equations, including existence and uniqueness theorems, qualitative behavior, series solutions, and numerical methods, for scalar equations and systems. Prereqs., MATH 3130 and 4310. Undergraduates must have approval of the instructor.

MATH 5440-3. Mathematics of Coding and Cryptography. Undergraduates must have approval of the instructor. Prereq., MATH 3130. Recommended prereqs., MATH 3110 and 3140. Same as MATH 4440.

MATH 5470-3. Partial Differential Equations 1. Prereq., MATH 4430 or APPM 2360. Undergraduates need instructor consent. Same as MATH 4470.

MATH 5520-3. Introduction to Mathematical Statistics. Prereq., MATH 4510 or APPM 3570. Undergraduates must have approval of the instructor. Same as MATH 4520 and APPM 5520.

MATH 5540-3. Introduction to Time Series. Prereqs., MATH 4510/APPM 3570 and MATH 4520/APPM 4520. Undergraduates must have approval of the instructor. Same as MATH 4540/APPM 5540.

MATH 5600-3. Numerical Analysis 1. Solution of nonlinear algebraic equations, interpolation, approximation theory, and numerical integration. Prereqs., APPM 3130 or MATH 3130, and experience with a scientific programming language. Undergraduates must have approval of the instructor.

MATH 5610-3. Numerical Analysis 2. Solution of linear systems, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Prereq., MATH 5600 or APPM 5600. Undergraduates must have approval of the instructor.

MATH 5905-1. Mathematics Teacher Training. Designed to train students to become effective teachers. Students teach a mathematics course, meeting weekly with faculty to discuss problems particular to the teaching of mathematics. Prereqs., graduate standing and experience as a teaching assistant.

MATH 6110-3. Introduction to Number Theory. Examines divisibility properties of integers, congruencies, diophantine equations, arithmetic functions, quadratic residues, distribution of primes, and algebraic number fields. Prereq., MATH 3140. Undergraduates must have approval of the instructor.

MATH 6130-3. Algebra 1. Studies group theory and ring theory. Prereq., MATH 3140. Undergraduates need instructor consent.

MATH 6140-3. Algebra 2. Studies modules, fields, and Galois theory. Prereq., MATH 6130. Undergraduates need instructor consent.

MATH 6150-3. Commutative Algebra. Introduces topics used in number theory and algebraic geometry, including radicals of ideals, exact sequences of modules, tensor products, Ext, Tor, localization, primary decomposition of ideals, and Noetherian rings. Prereq., MATH 6140. Undergraduates must have approval of the instructor.

MATH 6170-3. Algebraic Geometry. Introduces algebraic geometry, including affine and projective varieties, rational maps and morphisms, and differentials and divisors. Additional topics might include Bezout's Theorem, the Riemann-Roch Theorem, elliptic curves, and sheaves and schemes. Prereq., MATH 6140. Undergraduates must have approval of the instructor.

MATH 6180-3. Algebraic Number Theory. Introduces number fields and completions, norms, discriminants and differentials, finiteness of the ideal class group, Dirichlet's unit theorem, decomposition of prime ideals in extension fields, decomposition, and ramification groups. Prereqs., MATH 6110 and 6140. Undergraduates must have approval of the instructor.

MATH 6190-3. Analytic Number Theory. Acquaints students with the Riemann Zeta-function and its meromorphic continuation, characters and Dirichlet series, Dirichlet's theorem on primes in arithmetic progressions, zero-free regions of the zeta function, and the prime number theorem. Prereqs., MATH 6110 and 6350. Undergraduates must have approval of the instructor.

MATH 6210-3. Introduction to Topology 1. Introduces elements of general topology, algebraic topology, and differentiable manifolds. See also MATH 6220. Prereqs., MATH 3130, 3140 and 4320. Undergraduates must have approval of the instructor.

MATH 6220-3. Introduction to Topology 2. Introduces elements of general topology, algebraic topology, and differentiable manifolds. See also MATH 6210. Prereq., MATH 6210. Undergraduates must have approval of the instructor.

MATH 6230-3. Introduction to Differential Geometry 1. Instructs students on fundamental concepts such as manifolds, differential forms, de Rham cohomology, Riemannian metrics, connections and curvatures, fiber bundles, complex manifolds, characteristic classes, and applications to physics. Prereqs., MATH 3130 and 4320. Undergraduates must have instructor consent.

MATH 6240-3. Introduction to Differential Geometry 2. Continuation of MATH 6230. Undergraduates must have instructor consent.

MATH 6250-3. Theory of Rings. Studies semi-simple Artinian rings, the Jacobson radical, group rings, representations of finite groups, central simple algebras, division rings and the Brauer group. Prereq., MATH 6130, 6140. Undergraduates must have approval of the instructor.

MATH 6260-3. Geometry of Quantum Fields and Strings. Focuses on differential geometric techniques in quantum field and string theories. Topics include spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory, and nonperturbative aspects in field and string theories. Prereq., MATH 6230, PHYS 5250, or instructor consent. Recommended prereqs., MATH 6240 and PHYS 7280. Undergraduates must have approval of the instructor. Same as PHYS 6260.

MATH 6270-3. Theory of Groups. Studies nilpotent and solvable groups, simple linear groups, multiply transitive groups, extensions and cohomology, representations and character theory, and the transfer and its applications. Prereq., MATH 6130. Recommended prereq., MATH 6140. Undergraduates must have approval of the instructor.

MATH 6280-3. Advanced Algebraic Topology. Covers homotopy theory, spectral sequences, vector bundles, characteristic classes, K-theory and applications to geometry and physics. Prereq., MATH 6220 or instructor consent. Undergraduates must have approval of the instructor.

MATH 6310-3. Introduction to Real Analysis 1. Presents the basic notions of analysis, e.g., limits, \limsup and \liminf , continuity, and the topology of the real line; develops the number theory of Lebesgue measure and the Lebesgue integral on the line, emphasizing the various notions of convergence and the standard convergence theorems. Applications are made to the classical L^p spaces. Prereq., MATH 4001. Instructor consent required for undergraduates.

MATH 6320-3. Introduction to Real Analysis 2. Covers general metric spaces, the Baire Category Theorem, and general measure theory, including the Radon-Nikodym and Fubini theorems. Presents the general theory of differentiation on the real line and the Fundamental Theorem of Lebesgue Calculus. Prereq., MATH 6310. Instructor consent required for undergraduates.

MATH 6350-3. Functions of a Complex Variable 1. Focuses on complex numbers and the complex plane. Includes Cauchy-Riemann equations, complex integration, Cauchy integral theory, infinite series and products, and residue theory. Prereq., MATH 4001. Undergraduates need instructor consent.

MATH 6360-3. Functions of a Complex Variable 2. Focuses on conformal mapping, analytic continuation, singularities, and elementary special functions. Prereq., MATH 6350. Instructor consent required for undergraduates.

MATH 6440-3. Mathematical/Computational Fluid Dynamics. A mathematical treatment of the basic Navier-Stokes partial differential equations describing fluid dynamics, including the Euler and Stokes equations as approximations for high and low speed flows, respectively. Both analytical considerations and computational methods will be emphasized.

MATH 6534-3. Topics in Mathematical Probability. Offers selected topics in probability such as sums of independent random variables, notions of conver-

gence, characteristic functions, Central Limit Theorem, random walk, conditioning and martingales, Markov chains, and Brownian motion. Prereq., MATH 6310 or equivalent. Undergraduates must have approval of the instructor.

MATH 6550-3. Introduction to Stochastic Processes. Systematic study of Markov chains and some of the simpler Markov processes, including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences. Prereqs., MATH 4001, 4510 or APPM 3570 or 4560. Undergraduates must have approval of the instructor. Same as APPM 6550.

MATH 6730-3. Set Theory 1. Presents cardinal and ordinal arithmetic, and basic combinatorial concepts, including stationary sets, generalization of Ramsey's theorem, and ultrafilters, consisting of the axiom of choice and the generalized continuum hypothesis. Prereqs., MATH 4000 and 4730, or MATH 5000, or instructor consent. Undergraduates need instructor consent.

MATH 6740-3. Set Theory 2. Presents independence of the axiom of choice and the continuum hypothesis, Souslin's hypothesis, and other applications of the method of forcing. Introduces the theory of large cardinals. Prereq., MATH 6730. Undergraduates need instructor consent.

MATH 6900 (1-3). Independent Study. Undergraduates must have approval of the instructor. May be repeated up to 6 total credit hours.

MATH 6940-1. Master's Degree Candidate. This course is for students preparing for the no-thesis option for a master's degree. The content is set by the students' advisors.

MATH 6950 (1-6). Master's Thesis.

MATH 8104-3. Modular Forms. Introduces the upper-half plane and its geometry, modular forms, congruence subgroups, cusps, Fourier expansions, Theta series, Poincare series, Hecke operators, and relations to Dirichlet series. Prereq., MATH 6130. Undergraduates must have approval of the instructor.

MATH 8114-3. Topics in Number Theory. May include the theory of automorphic forms, elliptic curves, or any of a variety of advanced topics in analytic and algebraic number theory. Prereq., MATH 6110. Undergraduates must have approval of the instructor.

MATH 8174-3. Topics in Algebra I. Prereqs., MATH 6130 and 6140. Undergraduates must have approval of the instructor.

MATH 8250-3. Mathematical Theory of Relativity 1. Focuses on Maxwell equations, Lorentz force, Minkowski space-time, Lorentz, Poincare, and conformal groups, metric manifolds, covariant differentiation, Einstein space-time, cosmologies, and unified field theories. Prereq., instructor consent. Undergraduates must have approval of the instructor.

MATH 8304-3. Topics in Analysis 1. Presents advanced topics in analysis including Lie groups, Banach algebras, operator theory, ergodic theory, representation theory, etc. Prereqs., MATH 8330 and 8340, or instructor consent. Undergraduates must have approval of the instructor.

MATH 8330-3. Functional Analysis 1. Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations, and spectral theorem for bounded self-adjoint operators), and Banach algebras (the Gelfand theory). See also MATH 8340. Prereqs., MATH 6310 and 6320. Undergraduates must have approval of the instructor.

MATH 8340-3. Functional Analysis 2. Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations, and spectral theorem for bounded self-adjoint operators), and Banach algebras (the Gelfand theory). See also MATH 8330. Prereq., MATH 8330. Undergraduates must have approval of the instructor.

MATH 8370-3. Harmonic Analysis 1. Examines trigonometric series, periodic functions, diophantine approximation, and Fourier series. Also covers Bohr and Stepanoff almost periodic functions, positive definite functions, and the L_1 and L_2 theory of the Fourier integral. Applications to group theory and differential equations. See also MATH 8380. Prereq., MATH 5150 and 6320. Undergraduates must have approval of the instructor.

MATH 8420-3. Mathematical/Computational Fluid Dynamics. A mathematical treatment of the basic Navier-Stokes partial differential equations describing fluid dynamics, including the Euler and Stokes equations as approximations for

high and low speed flows, respectively. Both analytical considerations and computational methods will be emphasized.

MATH 8714-3. Topics in Logic 1 and 2.

MATH 8815 (1-3). Ulam Seminar. May be repeated up to 3 total credit hours.

MATH 8900 (1-3). Independent Study. Undergraduates must have approval of the instructor. May be repeated up to 6 total credit hours.

MATH 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section of this catalog.

Medieval and Early Modern Studies

MEMS 2020-3. Introduction to Medieval and Renaissance Studies. Introduces students to the literature, history, culture and art of Europe and the Mediterranean basin from late antiquity through the renaissance. The course is interdisciplinary and focuses on topics which reveal the dynamism and diversity of pre-modern culture. Formerly MEDV 2020.

MEMS 4020-3. Medieval and Early Modern Studies: Texts and Contexts. Focuses on communities in the Mediterranean basin and Europe (i.e., cloister, court, and city), discussing major literary texts and visual monuments associated with them and their historical context. Emphasizes tensions between tradition and innovation, Latin and vernacular, East and West, Christian and non-Christian (Jewish and Islam), sacred and secular, authority and freedom, and male and female. Prereqs., CLAS 1110 and 1120, or ENGL 2222 and 2502, or HIST 1010 and 1020, or HUMN 1010 or 1020, or instructor consent. Same as MEMS 5020. Formerly MEDV 4020.

MEMS 4030-3. Medieval and Early Modern Studies: Special Topics. Different topics offered by the faculty of the Medieval and Early Modern Studies Program in alternate semesters. Topics may include the literature of pilgrimage and travel, women and minorities, theatre, music, epic, medieval and early modern views of the classics, the Bible, and medieval and early modern theories of education. Prereqs., CLAS 1110 and 1120, or ENGL 2222 and 2502, or HIST 1010 and 1020, or HUMN 1010 or HUMN 1020, or instructor consent. Same as MEMS 5030. Formerly MEDV 4030.

MEMS 5020-3. Medieval and Early Modern Studies: Texts and Contexts. Prereq., graduate standing in comparative literature, theatre, classics, or instructor consent. Recommended prereq., ability to use literary texts in their original language. Same as MEMS 4020. Formerly MEDV 5020.

MEMS 5030-3. Medieval and Early Modern Studies: Special Topics. Prereq., graduate standing in comparative literature, theatre, classics, or instructor consent. Recommended prereq., ability to use literary texts in their original language. Same as MEMS 4030. Formerly MEDV 5030.

Molecular, Cellular, and Developmental Biology

MCDB 1030-3. Plagues, People, and Microorganisms. Discusses the biology, history, ecology, and social impact of human plagues, including Aids, smallpox, polio, bubonic plague, tuberculosis, leprosy, the impact of the Irish potato blight, and emerging human pathogens. The biology of pathogens and the human immune responses are treated in detail. Discusses the impact of molecular biology on curtailing the impact of diseases. For nonmajors. Approved for arts and sciences core curriculum: natural science.

MCDB 1041-3. Fundamentals of Human Genetics. Covers the basic principles of genetics, human pedigree analysis, and how genetic diseases affect DNA, RNA, and proteins. Considers implications of this research for medicine and society. For nonmajors. Recommended prereq., good background in high school chemistry and biology. Approved for arts and sciences core curriculum: natural science.

MCDB 1111-4. Biofundamentals: The Evolutionary, Molecular, and Cellular Basis of Life. A web-based, in-class discussion and online laboratory course covering the fundamental properties of biologic systems. Focused on common evolutionary, ecological, molecular and cellular mechanisms, the course pro-

vides a thorough introduction to the biological sciences. Credit not granted for this course and MCDB 1150 or 1151. Approved for arts and sciences core curriculum: natural science.

MCDB 1150-3. Introduction to Cellular and Molecular Biology. Covers biologically important macromolecules and biological processes, together with an introduction to cell structure, function, and physiology. Provides the foundation for advanced MCDB courses to majors, and a rigorous overview of modern biology to nonmajors. MCDB 1151 must be taken concurrently by MCDB and biochemistry majors and prehealth science students. Prereq., high school chemistry and algebra. Coreq., MCDB 1151 for majors. Credit not granted for this course and MCDB 1111. Meets MAPS requirement for natural sciences: lab. Approved for arts and science core curriculum: natural science.

MCDB 1151-1. Introduction to Cell and Molecular Biology Lab. Offers one two-hour lab per week designed to acquaint students with research techniques and concepts in molecular and cellular biology. Topics include cell structure, function, physiology, and recombinant DNA. MCDB 1150 must be taken concurrently. Credit not granted for this course and MCDB 1111. Meets MAPS requirement for natural sciences: lab. Approved for arts and sciences core curriculum: natural science.

MCDB 1152-1. Problem Solving Co-Seminar for Introduction to Molecular and Cellular Biology. Uses problem solving and other interactive group work to aid student learning in co-requisite course MCDB 1150. Students will work in small groups on learning and practicing how to solve difficult conceptual problems, as well as using hands-on activities and concept mapping to help learn content. Coreq., MCDB 1150.

MCDB 1161-2. From Dirt to DNA: Phage Genomics Laboratory I. Provides laboratory experience working on a bacteriophage genomics research project. Students will study novel bacteriophage they isolate from the environment. Topics covered include phage biology, bacteria and phage culturing and amplification, DNA isolation, restriction digest analysis, agarose gel electrophoresis, and electron microscopy. Coreq., MCDB 1150 or successful completion of 2 semesters of General Biology AP credit.

MCDB 2150-3. Principles of Genetics. Introduces the behavior of genes and chromosomes in eukaryotic and prokaryotic organisms. Covers three areas: transmission genetics, molecular genetics, and population genetics. Attention is given to genetic mapping, recombinant DNA procedures, and gene expression. MCDB 2151 must be taken by MCDB or biochemistry majors and prehealth science students concurrently or when next offered. Prereqs., MCDB 1150 or 1111 or EBIO 1210 or general biology. Approved for arts and sciences core curriculum: natural science.

MCDB 2151-1. Principles of Genetics Laboratory. One two-hour lab per week. Provides hands-on experience with principles introduced in MCDB 2150. Topics include mitosis, meiosis, classical genetics, complementation, mutagenesis, DNA replication, natural selection, and evolution. Prereqs., MCDB 1150 and 1151. Coreq., MCDB 2150. Approved for arts and sciences core curriculum: natural science.

MCDB 2152-1. Problem Solving Co-Seminars for Genetics. Uses problem solving and other interactive group work to aid student learning in co-requisite course MCDB 2150. Students will work in small groups on learning and practicing how to solve difficult conceptual problems, as well as using hands-on activities and concept mapping to help learn content. Coreq., MCDB 2150.

MCDB 2161-2. From DNA to Genes, Phage Genomics Laboratory II. Provides laboratory experience working on a bacteriophage isolated during the previous semester. Topics include bioinformatics, genome annotation, open reading frame and RNA identification, BLAST analysis, phylogenetics and submission to a genomic database. Prereqs., MCDB 1150 and 1161. Coreq., MCDB 2150.

MCDB 2840 (1-3). Lower-Division Independent Study. May be repeated for credit, but only 8 hours of MCDB 2840 plus MCDB 4840 can be counted toward graduation. Students with adequate prerequisites should take MCDB 4840. Prereqs., instructor consent and independent study contract. Coreq., MCDB 1150.

MCDB 3135-3. Molecular Cell Biology I. Examines the central dogma of biology by discussing the most important molecules in cells (DNA, RNA, and protein) and how their synthesis (DNA replication, transcription, RNA processing, and translation) is regulated. Incorporated into the discussion is how recombinant DNA techniques are used to discover and dissect cellular processes, how to design and interpret experiments, and understanding the limits of experiments to draw conclusions. These principles are the foundation for subsequent examination

of intracellular mechanisms in MCDB 3145. Prereqs., MCDB 2150 or EBIO 2070. Prereq., or coreq., CHEM 1133. Recommended coreq., MCDB 3140. Credit not granted for this course and MCDB 3120.

MCDB 3140-2. Cell Biology Laboratory. One four-hour lab per week. Provides experience with and exposure to modern cell biology laboratory techniques. Topics include microscopy, immunocytochemistry, Western blotting, Southern blotting, and flow cytometry. This course does not use vertebrate animals. Coreq., MCDB 3120, 3135, or 3145.

MCDB 3145-3. Molecular Cell Biology II. Examines intracellular mechanisms, including transport of ions and small molecules across membranes; protein targeting to organelles; membrane trafficking between organelles; signal transduction; the cytoskeleton; and the cell cycle. Analysis of these activities is from the experimental perspective established in MCDB 3135. Prereq., MCDB 3135. Recommended prereq or coreq., MCDB 3140 concurrent with either 3135 or 3145. Students may not receive credit for MCDB 3145 and 3500.

MCDB 3150-3. Biology of the Cancer Cell. Highlights dimensions of the cancer problem; cancer as a genetic/cellular disease; chemicals, viruses, and radiation as causes of cancer; cancer and diet; cancer epidemiology; cancer risk factors; proto-oncogenes, oncogenes, and cancer suppressor genes; and prevention of cancer. Prereq., MCDB 2150 or EBIO 2070, or instructor consent. Approved for arts and sciences core curriculum: natural science.

MCDB 3280-3. Molecular Cell Physiology. Analyzes cellular mechanisms from a cellular perspective. Examines molecules as machines that are the basis of molecular mechanisms. Uses animal systems' physiology as examples. Prereqs., MCDB 3120 and CHEM 1133.

MCDB 3330-3. Evolution and Creationism. Intensive lecture/discussion course on the interrelationships among science, religion, and social policy. Includes historical and scientific development of evolution theory, social Darwinism/sociobiology, and the public perception of science. Prereq., MCDB 1111 or 1150 or instructor consent. Approved for arts and sciences core curriculum: natural science.

MCDB 3350-3. Fertility, Sterility, and Early Mammalian Development. Describes the production of germ cells, ovulation, fertilization, reproductive cycles, controls of reproduction, early development of the embryo, methods of contraception, and causes and treatments of sterility. Recommended for students planning careers in the health sciences. Prereq., MCDB 1150, EBIO 1210, or instructor consent.

MCDB 3650-3. The Brain: From Molecules to Behavior. Examines the molecular basis of the brain's role in thought, action, and consciousness by exploring issues such as relationship of cognition and localized brain function, sensory systems and their role in cognition, learning and memory, and behavioral neurochemistry. Prereq., MCDB 1150 and 2150 or equivalent.

MCDB 4110 (1-3). Special Topics. Presentations of special topics in molecular, and/or cellular, and/or developmental biology, usually given by visiting faculty, alone or in conjunction with MCDB faculty. Prereq., instructor consent.

MCDB 4111-3. Experimental Design and Research in Cell and Molecular Biology. Learning molecular and cell biology experimental design and approaches through independent research projects. Students, working in pairs, will explore the research process and gain extensive first-hand experience in: hypothesis formation; experimental design; solution preparation and experimental methodology; proposal presentation and defense (oral and written); formal presentation of results and conclusions (oral and written in a publication-style format); the publication process; critical reading and evaluation of primary scientific literature. Prereq., MCDB 1150 or equivalent and instructor consent. Recommended coreq., MCDB 3135 or 3500.

MCDB 4130-3. Biological Electron Microscopy: Principles and Recent Advances. Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis, and electron diffraction. Specimen preparation treated only incidentally. Prereq., one of the following: MCDB 1150, EBIO 1220, MCDB 4500, PHYS 1120, or 2020, or instructor consent. Same as MCDB 5130 and PHYS 4130.

MCDB 4201-3. From Bench to Bedside: The Role of Science in Medicine. Demonstrates the breadth of research in the life sciences and how such research (not just in medical schools) can lead to medical applications. Lecturers from life sciences, the medical school and biotechnology, discuss drug development and

the transfer of research into the clinical arena. Students also prepare a paper and presentation on the development of a commercial drug. Prereqs., MCDB 1150, 1151, or 1111, and MCDB 2150, 2151, 3120, or 3145 and 3140.

MCDB 4202-3. The Python Project. Studies how python hearts grow after they consume a meal. Understanding the molecular processes of growth and regression in the python heart could lead to development of therapeutics for heart disease. Students work in groups in the laboratory and generate novel data by using modern molecular biology and bioinformatic techniques to clone and sequence candidate molecules of the python genome. May be repeated once. Prereqs., MCDB 1150 and 2150. Recommended prereqs., MCDB 3120 and 3500 or 3135 and 3145, CHEM 4711 and 4731.

MCDB 4234-3. Research Methods. Presents a rigorous and pedagogically coherent introduction into the experimental process used to collect data, formulate hypotheses, and answer scientific questions in general, and biological questions in particular. Includes a detailed consideration of the elements of experimental design, data collection and analysis, and the interpretation of results in the context of effective science teaching. Part of the CU Teach course sequence for teacher certification in science and mathematics. Prereqs., completion of freshman/sophomore major requirements, MCDB 1150 or 1111, MCDB 2150, 3120/3140, or 3135/3145, or instructor consent. Restricted to students enrolled in School of Education.

MCDB 4300-3. Immunology. Emphasizes cellular and molecular mechanisms by which organisms protect themselves from pathogens and the experimental basis for our understanding of these processes. Discusses development, function, and malfunction of t-cells, b-cells and other components of the immune system, focusing on the human immune system. Prereqs., MCDB 3120 and 3500 or 3135 and 3145.

MCDB 4310-3. Microbial Genetics and Physiology. Examines the physiology and genetics of bacteria, Archaea and viruses. Particular emphasis will be on metabolism and cell division, adaptations to extreme environments, mechanisms of interactions with and manipulation of the environment, and evolution in response to environmental pressures. Prereqs., MCDB 2150 and 3135 or 3500. Recommended prereqs. or coreqs., MCDB 3120 or 3145, EBIO 3400, CHEM 4711, or instructor consent. Same as MCDB 5310.

MCDB 4314-3. Algorithms for Molecular Biology. Surveys combinatorial algorithms used to understand DNA, RNA, and proteins. Introduces students to methods used to process genomic data. Topics covered include a review of algorithms and molecular biology, sequence analysis, RNA and protein structure analysis, and comparative genomics. Students will get hands-on experience processing recent genomic data. Prereqs., CSCI 2270 and CSCI 3104, or CHEM 4711, or MCDB 3135 or 3500 or IPHY 4200. Same as CSCI 4314 and MCDB 5314.

MCDB 4330-3. Bacterial Disease Mechanisms. Explores molecular and cellular interactions between bacteria and their eukaryotic hosts that precipitate disease. Activities include critical reading of review and research articles, preparation of homework assignments based on readings, and student presentations of assigned papers. Prereqs., MCDB 2150, 3120 and 3500 or 3135 and 3145. Same as MCDB 5330.

MCDB 4350-3. Microbial Diversity and the Biosphere. Provides a molecular phylogeny-based perspective on microbial diversity and the interactions between organisms that result in the biosphere. Provides overview of recent methods and findings in microbial ecology, as well as computer-based workshop in molecular phylogeny. Prereqs., CHEM 1133 or 1371, general biology, or instructor consent. Recommended prereqs., EBIO 3400 and/or CHEM 3311. Same as MCDB 5350.

MCDB 4361-3. Evolution and Development. Relates how recent discoveries in the molecular mechanisms of development are shaping our understanding of animal evolution. The course will review basic principles of molecular developmental biology and apply these concepts to critically discuss current research in the field of Evo-Devo (evolution and development). Prereqs., MCDB 3120 and 3500 or 3135 and 3145. Same as MCDB 5361.

MCDB 4410-3. Human Molecular Genetics. Studies the human organism as a genetic system, including effect of mutation on protein structure and function, biochemical basis of human genetic disease, polymorphic gene loci, gene mapping and identification, gene cloning and characterization, and impact of human genetics on medicine and society. Prereq., MCDB 3135 or 3500.

MCDB 4425-3. Cellular Stress Responses: Molecular Mechanisms, Physiology, and Human Diseases. In this critical thinking course, students will apply their knowledge of basic biology to exploring several of the most exciting topics in

biomedicine including protein folding and stress responses, nutrient sensing and balance, and signal transduction across membranes. Emphasis will be placed upon human physiology and associated human diseases including Alzheimer's disease, diabetes, and cardiovascular disease. Prereq., MCDB 3120 or 3135 or 3145 or 3500 or instructor consent.

MCDB 4426-3. Cell Signaling and Developmental Regulation. Introduces several cell signaling processes and their biological functions. Students read and analyze original research articles to learn the thinking processes of scientific research. Writing assignments and oral presentations are required. Prereqs., MCDB 3120 and 3500 or 3135 and 3145, and CHEM 4711, or instructor consent. Same as MCDB 5426.

MCDB 4444-3. Cellular Basis of Disease. Explores the cellular basis of disease. Discusses diseases arising from defects in intracellular targeting, cytoskeletal function, intracellular signaling, genomic instability, gene regulation, cell proliferation, and cell death. Involves student-organized presentations and classroom discussion. Prereq., MCDB 2150, 3120 and 3500 or 3135 and 3145.

MCDB 4471-3. Mechanisms of Gene Regulation in Eukaryotes. Focuses on manifestations of regulated gene expression. Studies gene regulation at multiple steps, including transcription, RNA processing, and translation. Is based on critical analysis of primary research papers. Written assignments or oral presentations are required. Prereq., MCDB 3135 or 3500 or instructor consent. Same as MCDB 5471. Credit not granted for this course and MCDB 4470/5470.

MCDB 4501-3. Structural Methods for Biological Macromolecules. This course teaches fundamental knowledge about protein structures, protein interactions and protein folding. It will discuss in detail the most common methods on how proteins and macromolecular complexes are studied, such as X-ray crystallography, NMR-spectroscopy, and electron microscopy. The course will offer about 50 percent direct teaching, 40 percent discussion of papers in a journal club style, and 10 percent hands-on practicals on software packages relevant to structural biology. Prereqs., MCDB 3120 and 3500 or 3135 and 3145.

MCDB 4520-3. Bioinformatics and Genomics. Computational and experimental methods in bioinformatics and genomics, and how these methods provide insights into protein structure and function, molecular evolution, biological diversity, cell biology, and human disease. Topics include database searching, multiple sequence alignment, molecular phylogeny, microarrays, proteomics, and pharmacogenomics. Prereqs., CHEM 4711, and CHEM 4731 or MCDB 3135 or 3500. Same as MCDB 5520.

MCDB 4550-3. Cellular and Molecular Motion, a Biophysical Approach. Focuses on the biophysics governing enzyme mechanisms, cellular mechanisms, cellular structure and motion. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside of a cell. Prereq., CHEM 1133 or 1371, PHYS 2010 and 2020, MCDB 3120 or 3145, or instructor consent. Recommended prereqs., MATH 1300 and/or CHEM 3311. Same as MCDB 5550.

MCDB 4600-3. Molecular Approaches to Human Diseases. Studies basic research using molecular biology and its contribution to treatment of human diseases. Includes an overview of physiology, clinical presentation, basic research, and detailed analyses of molecular approaches taken to understand and treat human diseases. Prereqs., MCDB 2150, 3120 and 3500 or 3135 and 3145. Recommended prereq., MCDB 4620.

MCDB 4615-3. Biology of Stem Cells. Stem cells have received considerable notice in both the scientific and social arena. The course will examine the stem cell concept by a critical examination of the primary scientific literature. Topics will include pluripotency and plasticity, environment, technology, self-renewal, transdifferentiation, molecular signature, epigenetic programming and stem cell versus cancer cell. Prereqs., MCDB 2150, 3120 and 3500 or 3135 and 3145, or instructor consent. Same as MCDB 5615.

MCDB 4621-3. Genome Databases: Mining and Management. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure. Prereqs., MCDB 3135 or 3500, CSCI 3104 or CHEM 4711; coreq., CSCI 2270. Same as MCDB 5621. Credit not granted for this course and CHEM 4621 or CSCI 4317.

MCDB 4650-3. Developmental Biology. Analyzes development, emphasizing cellular, molecular, and genetic mechanisms. Topics include descriptive embryology, developmental control of gene expression in eukaryotic cells, mechanisms of differentiation and morphogenesis, and developmental genetics. Prereq., MCDB 3120 and 3500 or 3135 and 3145, or instructor consent. The related lab course, MCDB 4660, can be taken concurrently. Credit not granted for this course and MCDB 4620, EPOB 3650, or EPOB 4600.

MCDB 4660-2. Developmental Biology Laboratory. Provides an opportunity for guided research on *Caenorhabditis elegans* and *Xenopus*. Experiments will focus on descriptive and experimental embryology, developmental genetics, and application of cell and molecular biology methods applied to developing organisms. This course uses living vertebrate animals and/or tissues. Prereq. or coreq., MCDB 4650. Credit not granted for this course and MCDB 4630 or EPOB 4600.

MCDB 4680-3. Mechanisms of Aging. Studies aging as a developmental process emphasizing genetic, cellular, and molecular mechanisms. Prereqs., MCDB 3120 and 3500 or 3135 and 3145. Same as MCDB 5680.

MCDB 4750-3. Animal Virology. Encompasses the structure and replication of both lytic and transforming animal viruses. Emphasizes diversity of naturally occurring genomic structures and the resulting strategies of infection as well as the impact of viral epidemics on society. Includes critical analysis of primary research papers. Prereq., MCDB 3135 or 3500 or instructor consent.

MCDB 4777-3. Molecular Neurobiology. Introduces the functional anatomy of the nervous system, and explores current knowledge regarding the molecular and genetic basis of the development and function of the nervous system. Studies recent insights into the molecular basis of neurodegenerative diseases, in the last portion of the course. Prereqs., MCDB 3120 and 3500, or 3135 and 3145.

MCDB 4790-3. Experimental Embryology. Embryology is studied by considering experiments relevant to specific topics of early animal development. Emphasizes reading, interpretation, and discussion of research articles. Prereqs., MCDB 3120 or 3145, and EPOB 3650 or MCDB 3135 or 3500.

MCDB 4810-3. Insane in the Membrane: The Biology and Biophysics of the Membrane. Studies the biology and physics of the biomembrane. Topics include structure and mechanism of membrane proteins; membrane biogenesis; membrane protein folding and stability; membrane homeostasis; mechanisms of membrane fusion and fission; lipid trafficking. Prereq., CHEM 4711 or instructor consent. Same as MCDB 5810.

MCDB 4811 (3-4). Teaching and Learning Biology. Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its valuation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions. Prereqs., MCDB 1111 or 1150, 2150 and 3120 or 3145. Same as MCDB 5811 and EDUC 4811.

MCDB 4840 (1-6). Upper-Division Independent Study. May be repeated for credit, but only 8 hours of MCDB 2840 plus MCDB 4840 can be counted toward graduation. Prereqs., MCDB 2150, instructor consent, and independent study contract.

MCDB 4970-3. Seminar on Physical Methods in Biology. Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, Eels, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, Pet, Cat), Fourier analysis, synchrotron radiation, Exafs, neutron scattering, and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest. Prereqs., MCDB 1050 or 3120, and/or PHYS 1120 and 1140, or 3010 and 3020, or instructor consent. Same as MCDB 5970 and PHYS 4970.

MCDB 4980-3. Honors Research. Provides faculty-supervised research for students who have been approved by the departmental honors committee. Normally taken during the semester before completion of the honors thesis. Prereqs., MCDB 4840 or comparable research experience, and a GPA of 3.20 or better.

MCDB 4990-3. Honors Thesis. Involves the preparation and defense of an honors thesis, based on faculty-supervised original research, including final phases of the research project. Prereqs., MCDB 4840, 4980, or comparable research experience, a GPA of 3.30 or better, and approval by the MCDB honors committee.

MCDB 5130-3. Biological Electron Microscopy: Principles and Recent Advances. Same as MCDB 4130 and PHYS 5130.

MCDB 5210-3. Cell Structure and Function (Lecture and Discussion). Instructor consent required.

MCDB 5220-3. Molecular Genetics (Methods and Logic). Instructor consent required.

MCDB 5230-3. Gene Expression (Lecture and Discussion). Instructor consent required.

MCDB 5250-3. Topics in Developmental Genetics (Methods and Logic). Instructor consent required.

MCDB 5310-3. Microbial Genetics and Physiology. Same as MCDB 4310.

MCDB 5314-3. Algorithms for Molecular Biology. Same as MCDB 4314 and CSCI 5314.

MCDB 5330-3. Bacterial Disease Mechanisms. Same as MCDB 4330.

MCDB 5350-3. Microbial Diversity and the Biosphere. Same as MCDB 4350.

MCDB 5361-3. Evolution and Development. Same as MCDB 4361.

MCDB 5426-3. Cell Signaling and Developmental Regulation. Same as MCDB 4426.

MCDB 5471-3. Mechanisms of Gene Regulation in Eukaryotes. Same as MCDB 4471.

MCDB 5520-3. Bioinformatics and Genomics. Same as MCDB 4520.

MCDB 5550-3. Cellular and Molecular Motion, A Biophysical Approach. Same as MCDB 4550.

MCDB 5615-3. Biology of Stem Cells. Same as MCDB 4615.

MCDB 5621-3. Genome Databases: Mining and Management. Same as MCDB 4621. Credit not granted for this course and CSCI 5317 or CHEM 5621.

MCDB 5650-1. Teaching and Learning in Undergraduate Science Courses. Discusses recent research on how students learn and applications to the teaching of undergraduate science courses. Conducted as an interactive workshop, in which active-engagement in learning approaches are modeled and experienced by participants. Open to undergraduate and graduate students. May be used to fulfill the pedagogical training requirement for undergraduate Learning Assistants in upper division science courses. Post-doctoral and faculty auditors are welcome to participate as regular auditors.

MCDB 5680-3. Mechanisms of Aging. Same as MCDB 4680.

MCDB 5776-1. Scientific Ethics. Prereq., CHEM 5771 or MCDB 5230 taken concurrently and instructor consent. Same as CHEM 5776.

MCDB 5777-3. Molecular Neurobiology. Same as MCDB 4777.

MCDB 5810-3. Insane in the Membrane: The Biology and Biophysics of the Membrane. Same as MCDB 4810.

MCDB 5811 (3-4). Teaching and Learning Biology. Same as MCDB 4811.

MCDB 5970-3. Seminar on Physical Methods in Biology. Same as MCDB 4970 and PHYS 5970.

MCDB 6000-3. Introduction to Laboratory Methods. Introduces methodology and techniques used in biological research. Designed as a tutorial between a few students and one faculty member. Students are expected to read original research papers, discuss findings, and to plan and execute experiments in selected areas. Open only to MCDB graduate students. May be repeated up to 9 total credit hours.

MCDB 6336-1. Transcription and RNA Processing. Study of recent publications in transcription and RNA processing fields. Students present and discuss recent publications. Goals are that the student will improve critical analysis of data and will learn techniques relevant to the field. Students will keep up-to-date with current literature, will lead discussions of topic of interest, and will learn good presentation skills. Prereq., MCDB 5210, 5230 or instructor consent.

MCDB 6337-1. Cell Cycle Research. Cell cycle regulation is a major biological issue relevant to a number of disease states, including cancer. Surveys the current literature in the cell cycle field. Students present current publications; class participation in discussion is expected. Prereqs., MCDB 5210 and 5230.

MCDB 6338-1. Current Topics in Developmental Genetics and Signal Transduction. Students present and discuss current research papers in the areas of developmental biology and cell signaling. Goals are to improve skills in critical evaluation and presentation of research results as well as to keep up with current literature. Students must present and lead discussions of at least one paper; all students are expected to read papers in advance. Prereq., instructor consent.

MCDB 6339-1. Microbiology Supergroup. Present and receive feedback on your in-progress microbiology research. Learn about and discuss research at CU that is microbiological but outside of your specialty. Participate in journal clubs on microbial physiology. May be repeated up to 3 total credit hours.

MCDB 6440 (1-3). Special Topics in MCD Biology. Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors. May be repeated up to 4 total credit hours.

MCDB 6621-1. Special Topics in RNA. Reviews and evaluates recent scientific literature in the field of RNA chemistry and biology, including topics in structure, catalysis, bioinformatic approaches, and control of gene expression. Primarily for graduate level presentation of special topics by students and research staff. May be repeated up to 5 total credit hours. Prereq., graduate standing or instructor consent. Same as CHEM 6621.

MCDB 6940-1. Master's Degree Candidate.

MCDB 6950 (1-6). Master's Thesis. Students seeking a master's degree should consult a departmental advisor. Plan I or Plan II is offered.

MCDB 7790 (1-3). Graduate Seminar.

MCDB 7840 (1-6). Graduate Independent Study. Instructor consent and independent study contract required. May be repeated up to 7 total credit hours.

MCDB 7910-1. Seminar Practicum. Designed for graduate students to give oral presentations on their thesis research, field questions, respond to critiques, and present background information. May be repeated up to 3 total credit hours.

MCDB 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Museum

Independent Study

MUSM 4900 (1-6). Independent Study. May be repeated up to 6 total credit hours. Same as MUSM 5900.

MUSM 5900 (1-6). Graduate Independent Study. Same as MUSM 4900.

Museum Studies

MUSM 4010-3. Museums and Society. Investigates the museum as an institution in society; history of museums and changing roles and methods in society; administrative structure; museum profession; methodology of museum collections, exhibitions, and education. Designed for students interested in museums or museum careers.

MUSM 4494-3. Field Research: Basic Methods and New Technologies. Students are exposed to a wide variety of field methods in disciplines specific to natural history museums, with field exercises in zoology, archaeology, paleontology, geology, botany, and entomology. Emphasizes the collection and analysis of spatial and geographic data. Prereq., instructor consent. Same as MUSM 5494.

MUSM 5011-4. Introduction to Museum Studies. Provides background in history and literature of museums, their objectives and methods, laboratory exercises in curatorship, exhibition theory, and administration. Prereq., instructor consent.

MUSM 5021 (2-3). Selected Museum Topics.

MUSM 5030-3. Museum Education. Surveys and discusses the educational role of museums and informal learning centers. Issues include current trends, learning theories and styles, learning from objects, education programs, diverse audiences, museum/school partnerships, and the role of education in exhibit development.

MUSM 5031-3. Museums and the Public: Exhibit Development. Covers elements of exhibition development and design, up to production and evaluation of exhibit prototypes. The team approach is emphasized. Prereqs., graduate standing and instructor consent.

MUSM 5041-3. Museum Administration. Covers theory of organizations and how it applies to museums, application of small business management and nonprofit organizations to museums, marketing and development, and grant writing and funding strategies. Prereq., graduate standing or instructor consent.

MUSM 5051-3. Museum Collections Management. Deals specifically with curation and data management. Topics include acquisition practices and problems; organization, management, use and preventive conservation of collections; and computer data management of collections. Prereq., instructor consent.

MUSM 5061-3. Introduction to Scientific Illustration. Intended for students with little to no art background. Focus is on the accurate rendering of scientific subjects for publication and for public display. Course begins with basic drawing skills and sharpening of visual perception. Students progress to be able to produce realistic renderings of subjects. Students are exposed to a variety of black and white and color techniques and the standards for presenting illustrations for a variety of audiences. Course concludes with computer illustration tools and techniques.

MUSM 5494-3. Field Research: Basic Methods and New Technologies. Same as MUSM 4494.

MUSM 6110 (1-3). Seminar in Museum Issues. Offers a weekly seminar for museum and field study students that addresses one new topic each semester relevant to museum operations such as archival administration, museums, multiculturalism, repatriation, and others. Prereqs., MUSM 5011, graduate standing, and instructor consent.

MUSM 6140 (1-3). Advanced Topics and Trends. Discusses current topics and/or trends in the museum profession. Topics change annually to reflect current topics and trends and the most current museum issues. Prereq., graduate standing and instructor consent. Recommended prereq., MUSM 5011 and 5051.

MUSM 6150-3. Critical and Theoretical Issues in Museums. Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence, and relations between curatorial practice, collecting, and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present. Prereq., MUSM 5011 or instructor consent. Same as ARTH 6150, HIST 6150, and ANTH 6150.

MUSM 6930 (2-4). Museum Internship. Provides experience in museums of different sizes, audiences, and subjects, including history, natural history, art, and children's museums. Each student is supervised individually by a faculty member as well as the appropriate person in the cooperating museum. Prereq., instructor consent.

MUSM 6940-1. Master's Degree Candidate.

MUSM 6950 (1-6). Master's Thesis in Museum and Field Studies. A thesis, which may be of a research, expository, critical or creative type, is required of every master's degree candidate under the thesis option. Prereqs., MUSM 5011 and 5051, and one of the following: MUSM 5030, 5031, or 5041.

MUSM 6960 (1-4). Master's Project or Paper in Museum and Field Studies. A project or paper in the student's discipline and related to some aspect of museum studies is required of every master's degree candidate under the non-thesis-option plan. Prereqs., MUSM 5011 and 5051. Students in collections/field track also need MUSM 5030, 5031, or 5041.

Anthropology

MUSM 4462 (2-6). Museum Field Methods in Anthropology. Archaeological field techniques including excavation, mapping, recording, photography, interpretation, and field laboratory. May be repeated up to 6 total credit hours. Same as MUSM 5462.

MUSM 4912-3. Museum Practicum in Anthropology. Students take part in curatorial procedures of the anthropology section of the museum: conservation, cataloguing, collection management, and administration. Prereq., MUSM 5011 or equivalent. Enrollment is limited; students should make arrangements during previous semester. Same as MUSM 5912.

MUSM 5045-3. Introduction to Museum Anthropology. This course traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism. Same as ANTH 4045 and MUSM 5045.

MUSM 5912-3. Museum Practicum in Anthropology. Same as MUSM 4912.

Botany

MUSM 4473-3. Museum Field Methods in Botany. Emphasizes field techniques for observation, analysis, and identification of vascular plants, collection, preservation, and date recording for museum specimens. Prereq., instructor consent.

MUSM 4913-3. Museum Practicum in Botany. Students take part in curatorial procedures of the botany section of the museum: specimen preparation, labeling, identification, cataloguing, conservation, and collection management. Prereq., MUSM 5011 or equivalent. Enrollment is limited; students should make arrangements during previous semester. Same as MUSM 5913.

MUSM 5913-3. Museum Practicum in Botany. Same as MUSM 4913.

Entomology

MUSM 4916 (1-3). Museum Practicum in Entomology. Students take part in curatorial procedures of the entomology section of the museum: field collection, specimen preparation, labeling, identification, rearing techniques, and exhibit preparation. Prereq., 5011, or equivalent. Enrollment is limited; students should make arrangements during previous semester. Same as MUSM 5916.

MUSM 5916 (1-3). Museum Practicum in Entomology. Same as MUSM 4916.

Geology

MUSM 4914-3. Museum Practicum in Geology. Students take part in curatorial procedures of the geology section of the museum: field collection, specimen preparation, cataloguing, collection management, and a survey of current laws as they apply to specimens. Prereq., MUSM 5011 or equivalent. Enrollment is limited; students should make arrangements during previous semester. Same as MUSM 5914.

MUSM 5474-4. Vertebrate Paleontology. Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups. Same as GEOL 5474.

MUSM 5914-3. Museum Practicum in Geology. Same as MUSM 4914.

Museology

MUSM 4917 (1-3). Museum Practicum in Techniques. Students participate in museum public education functions that may include researching, planning, developing, and producing exhibits, traveling trunks, booklets, and other materials. May involve writing labels, molding and casting, conservation, and restoration. May be repeated up to 6 total credit hours. Same as MUSM 5917.

MUSM 5917 (1-3). Museum Practicum in Techniques. Same as MUSM 4917.

Zoology

MUSM 4795-3. Field Methods in Zoology and Botany. Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates, and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods, and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts, and individual research projects. Same as MUSM 5795, ENVS 4795, and EBIO 4795.

MUSM 4915 (1-3). Museum Practicum in Zoology. Students take part in curatorial procedures of the zoology section of the museum: relaxing, fixing, positioning, preserving, cataloguing, storing, and shipping. Also introduces students to the animal kingdom. Prereq., instructor consent. Same as MUSM 5915.

MUSM 5795-3. Field Methods in Zoology and Botany. Same as MUSM 4795 and EBIO 5795.

MUSM 5915 (1-3). Museum Practicum in Zoology. Same as MUSM 4915.

Music

The following courses offered in the College of Music are accepted for arts and sciences core curriculum credit.

MUEL 1081-3. Basic Music Theory. Introduction to music notation, meter and rhythm, scales, intervals, triads, seventh chords, fundamentals of harmonic progression, voice leading, aural skills, and composition. For nonmusic majors who have little or no previous background in the subject. Formerly EMUS 1081. Offered fall and spring.

MUEL 1115-1. Piano Class 1. Introduces the keyboard and music reading for nonmusic majors with no prior keyboard experience. Studies very easy classical and pop repertoire. Prereq., no prior keyboard experience or instructor consent. Formerly EMUS 1115.

MUEL 1125-1. Piano Class 2. Continuation of MUEL 1115. Focuses on development of music reading. Studies technical patterns, easy classical and pop repertoire, and improvisation. Prereq., MUEL 1115. Formerly EMUS 1125.

MUEL 1145 (2-4). Guitar Class. A systematic study of the beginning literature and technique of the classical guitar with an emphasis on reading music. Designed for nonmusic majors with no prior musical experience. Formerly EMUS 1145.

MUEL 1155-2. Intermediate Guitar. Studies the intermediate literature and technique of the classical and popular guitar. Emphasis on reading standard notation and chord charts. Designed for non-music majors. May be repeated up to 6 total credit hours. Prereq., MUEL 1145 or instructor consent. Formerly EMUS 1155.

MUEL 1184-1. Voice Class. Involves basic vocal technique and easy solo repertoire taught through a group medium, for beginner and intermediate level students. May be repeated up to 6 total credit hours. Recommended prereq., ability to read music. Formerly EMUS 1184.

MUEL 1416-2. Introduction to Hand Percussion. Studies the literature and technique of hand percussion. Emphasizes African and Latin percussion techniques. Designed for non-music majors. May be repeated up to 6 total credit hours. Formerly EMUS 1416.

MUEL 1832-3. Appreciation of Music. Provides a basic knowledge of primarily Western music literature and development of discriminating listening habits. Restricted to nonmusic majors. Formerly EMUS 1832. Approved for arts and sciences core curriculum: literature and the arts. Offered fall and spring.

MUEL 2091-2. Introduction to Audio Recording. Introduces and explores basic concepts in audio recording from microphones to digital audio workstations. Also focuses on development of critical listening skills. Open to nonmajors.

MUEL 2184-1. Voice Class. Continuation of MUEL 1184, with more advanced repertoire and vocal techniques. May be repeated up to 6 total credit hours. Prereq., MUEL 1184. Formerly EMUS 2184.

MUEL 2752-3. Music in American Culture. Offers a stylistic and historical examination of trends that have influenced present-day music in the U.S. Formerly EMUS 2752. Approved for arts and sciences core curriculum: United States context. Offered fall and spring.

MUEL 2762-3. Music and Drama. Explores techniques used in combining music and dramatic arts through examples from musical and dramatic literature of the West from circa 1000 to present. Formerly EMUS 2762. Offered spring only.

MUEL 2772-3. World Musics. Highlights music outside Western art tradition, using current ethnomusicological materials. Spring semester focuses on musical cultures of the Americas, Africa, and Europe; fall semester focuses on musical cultures of Asia and Oceania. May be repeated up to 6 total credit hours. Formerly EMUS 2772. Approved for arts and sciences core curriculum: human diversity.

MUEL 2842-3. American Musical Theatre. Provides an overview of the role of musical theatre in U.S. culture, emphasizing the 20th century Broadway musical. Formerly EMUS 2842.

MUEL 2852-3. Music of the Rock Era. Examines popular music, concentrating on the U.S. after 1950. Considers precursor styles (e.g., blues folk) and contributions

to the new rock style; discusses the evolution of rock style from 1960 through the 1990s. Formerly EMUS 2852. Approved for the arts and sciences core curriculum: literature and the arts. Offered spring only.

MUEL 2862-3. American Film Musical, 1926-1954. Examines the development of filmed musicals from the beginning of sound movies through the Golden Age of Musicals. Emphasizes analysis and relationships of characters, songs, and incidental music. Formerly EMUS 2862. Approved for arts and sciences core curriculum: literature and the arts.

MUEL 2872-3. Music in the Rock Era: Special Topics in Heavy Metal. Explores, discuss, debate and develop deeper understanding of Heavy Metal. Included are study of musical style characteristics and lyrical content, innovative performers, unifying elements of Heavy Metal culture and the diversity within it, and its role in the larger Rock and societal contexts. Issues of gender, religion, and sexuality in the Heavy Metal construct are also discussed.

MUEL 3051-2. Basic Composition. Introduces the processes, materials, and forms of composition through the writing and performance of short musical works. Open to any student who already has rudimentary musical knowledge. Formerly EMUS 3051.

MUEL 3642-3. History of Jazz. Studies the distinctly American art form of jazz music from its origins to the present, including the various traditions, practices, historical events, and people most important to its evolution. For nonmusic majors. Formerly EMUS 3642. Offered fall and spring.

MUEL 3822-3. Words and Music. Explores the interaction between words and music in song. Students will consider how such features as rhyme, rhythm, tone, and the connotations of particular words contribute to meaning in poetry; how rhythm, tempo, dynamics, mood, and instrumentation contribute to meaning in music; and how words and music coalesce in song to make a new meaning. Restricted to nonmusic majors. Formerly EMUS 3822. Approved for arts and sciences core curriculum: literature and the arts.

MUEL 3832-3. Music in Literature. Addresses literature that seeks either to explore the meaning of music or to make music out of words. Students will consider how musical concepts and techniques can be incorporated into poetry and prose, and will analyze the roles that writers have attributed to music in society, politics, and the life of the individual. Restricted to nonmusic majors. Formerly EMUS 3832. Approved for arts and sciences core curriculum: literature and the arts.

MUEL 3872-3. Music in the Rock Era: Special Topics in Heavy Metal. Explore, discuss, debate and develop deeper understanding of Heavy metal. Included are study of musical style characteristics and lyrical content, innovative performers, unifying elements of Heavy Metal culture and the diversity within it, and its role in the larger Rock and societal contexts. Issues of gender, religion, and sexuality in the Heavy Metal construct area also discussed.

MUEL 4012 (3-6). African Music. Studies the musics, dances, and cultures of various peoples of Africa. Includes African diaspora music and Afro-pop. Formerly EMUS 4012.

Peace and Conflict Studies

PACS 2500-3. Introduction to Peace and Conflict Studies. Introduces the field of peace and conflict studies. Examines causes and dynamics of conflict and violence (interpersonal to global), peace institutions and research, peace movements, nonviolence, and careers in conflict resolution and peacemaking.

PACS 3800-3. Topics in Peace and Conflict Studies. Content varies depending on instructor. May provide an overview of the field, cover scientific, philosophical, or historical approaches, or analyze a specific substantive topic.

PACS 4500-3. Senior Seminar in Peace and Conflict Studies. Examines specific theoretical perspectives in peace and conflict studies and conducts in-depth research projects using a case-study approach. Emphasizes using critical thinking skills in writing and class discussion. Case study examples include: U.S. violence, peacemaking/keeping in ethnonationalist conflicts, environmental conflict resolution. Prereq., PACS 2500 or instructor consent. Restricted to junior or senior Peace and Conflict Studies students only.

Philosophy

All courses at the 3000 level require at least 6 hours of philosophy and sophomore standing, unless otherwise indicated. All courses at the 4000 level require at least 12 hours of philosophy and junior standing, unless otherwise indicated.

PHIL 1000-3. Introduction to Philosophy. Introduces fundamental topics of philosophy, e.g., knowledge, truth, universals, self, the mind-body problem, time, God, and value. Approved for arts and sciences core curriculum: ideals and values.

PHIL 1010-3. Introduction to Western Philosophy: Ancient. Develops three related themes: the emergence in antiquity of a peculiarly scientific mode of thinking; the place of religious belief within this developing scientific world view; and the force of ethical speculation within the culture and political climates of ancient Greece and Rome. PHIL 1010 and 1020 may be taken in either order. Same as CLAS 1030. Approved for arts and sciences core curriculum: historical context.

PHIL 1020-3. Introduction to Western Philosophy: Modern. Introduces several philosophical texts and doctrines of 17th and 18th century Europe. Gives special attention to the connection between philosophical ideas and the wider historical milieu—social, political, and literary. PHIL 1010 and 1020 may be taken in either order. Approved for arts and sciences core curriculum: historical context.

PHIL 1100-3. Ethics. Introductory study of major philosophies on the nature of the good for humanity, principles of evaluation, and moral choice as they apply to contemporary moral problems. Approved for arts and sciences core curriculum: ideals and values.

PHIL 1200-3. Philosophy and Society. Introduces philosophical thought through critical analysis of our own society, its institutions, and principles. Meets MAPS requirement for social science: general. Approved for arts and sciences core curriculum: United States context or ideals and values.

PHIL 1400-3. Philosophy and the Sciences. Considers philosophical topics and concepts related to the natural sciences, such as science and pseudo-science; scientific method; the nature of explanation, theory, confirmation, and falsification; the effect of science on basic concepts like mind, freedom, time, and causality; ethics of experimentation; and the relation of science to society. Approved for arts and sciences core curriculum: natural science.

PHIL 1440-3. Introductory Logic. Introductory study of definition, informal fallacies, and the principles and standards of correct reasoning. Provides practice in analyzing, evaluating, and constructing frequently encountered types of arguments. Does not fulfill major requirement in logic.

PHIL 1600-3. Philosophy and Religion. Philosophical introduction to some of the central concepts and beliefs of religious traditions, focusing particularly on the question of the existence of God and on the relation between religious beliefs and moral beliefs. Approved for arts and sciences core curriculum: ideals and values.

PHIL 1700-3. Philosophy and the Arts. Considers philosophic questions involved in the analysis and assessment of artistic experiences and of the objects with which the arts, including the literary arts, are concerned.

PHIL 1750-3. Philosophy through Literature. Introduces philosophy through literature. Selected novels, plays, and short stories that exemplify traditional problems in philosophy are read and discussed.

PHIL 1800-3. Open Topics/Philosophy. May be repeated up to 6 total credit hours.

PHIL 2140-3. Environmental Justice. Traditional and contemporary theories of justice are employed in order to critically analyze social and political issues that have important environmental dimensions. Assesses the relationship of justice and equity to the presuppositions of national and global environmental issues and policies.

PHIL 2200-3. Major Social Theories. Introductory study of major philosophies of the past in relation to political, economic, and social issues. Approved for arts and sciences core curriculum: ideals and values.

PHIL 2220-3. Philosophy and Law. Considers philosophical issues related to law in general and the U.S. system in particular. Topics to be covered may address such questions as the following: What is the nature of law? What kinds of acts should the law prohibit (e.g., abortion, drug use, pornography, cloning)? Is there a moral obligation to obey the law? Can civil disobedience be justified? Is there a justification for punishing people for breaking the law? Is capital punishment,

in particular, morally justified? Approved for arts and sciences core curriculum: United States context.

PHIL 2270-3. Philosophy and Race. Explores the historical relationship between western philosophy and race and investigates the ways in which philosophy can be used to address contemporary racial issues. Approved for arts and sciences core curriculum: human diversity.

PHIL 2290-3. Philosophy and Women. Explores different approaches to the study of women. Same as WMST 2290. Approved for arts and sciences core curriculum: cultural and gender diversity.

PHIL 2390-3. Philosophy and Psychology. Interdisciplinary course on issues where philosophy and psychology meet; for example, topics such as selfhood, motivation, psychotherapy, freedom, and human behavior are examined. Selected readings in philosophy and psychology are required.

PHIL 2440-3. Symbolic Logic. First course in mathematical logic. Topics include sentential logic, the logic of quantification, and some of the basic concepts and results of metalogic (interpretations, validity, and soundness).

PHIL 2610-3. From Paganism to Christianity. Offers a cultural history of Greek and Roman religion. Students read ancient text in translation and use evidence from archaeology to reconstruct the shift from paganism to Christianity in antiquity. Same as CLAS 2610. Approved for arts and sciences core curriculum: ideals and values.

PHIL 2750-3. Philosophy and Science Fiction. Explores philosophical issues in science fiction literature and film. Topics may include time travel, artificial intelligence, free will, personal identity, and how scientific advances will change human life and society. Students may read science fiction stories and philosophical articles, and watch several movies.

PHIL 2800-3. Open Topics/Philosophy. May be repeated up to 6 total credit hours.

PHIL 2840 (1-3). Independent Study. May be repeated up to 8 total credit hours. Prereq., sophomore standing.

PHIL 3000-3. History of Ancient Philosophy. A survey of selected figures in ancient Greek and Roman philosophy and in medieval philosophy. Philosophers studied may include the pre-Socratics, Plato, Aristotle, the Hellenistic philosophers, and such figures as Aquinas and Occam. Explores the larger cultural context that influenced these philosophers and were, in turn, influenced by them. Prereq., 6 hours of philosophy coursework. Restricted to sophomores/juniors/seniors. Approved for arts and sciences core curriculum: historical context.

PHIL 3010-3. History of Modern Philosophy. Introduces modern philosophy, focusing on the period from Descartes through Kant. In addition to careful analysis of philosophical arguments, attention is paid to the ways in which philosophers responded to and participated in major developments in the 17th and 18th century, such as the scientific revolution. Prereq., 6 hours of philosophy course work. Restricted to sophomores/juniors/seniors. Approved for arts and sciences core curriculum: historical context.

PHIL 3100-3. Ethical Theory. Studies major issues and theories in ethics. Prereq., 6 hours of philosophy course work. Prereq. or coreq., PHIL 3480. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: ideals and values.

PHIL 3110-3. Feminist Practical Ethics. Explores a variety of personal and public policy issues in the light of the basic feminist commitment to opposing women's subordination. Provides a sense of how a principled commitment to feminism may influence or be influenced by prevailing interpretation of contemporary ideals and values, and gives an opportunity for developing skills of critical analysis. Prereq., WMST 2000 or 2290. Restricted to juniors/seniors. Same as WMST 3100. Approved for arts and sciences core curriculum: ideals and values.

PHIL 3140-3. Environmental Ethics. Examines major traditions in moral philosophy to see what light they shed on value issues in environmental policy and the value presuppositions of the economic, ecological, and juridical approaches to the environment. Prereq., sophomore standing or PHIL 1100, 1200, 2200, 3100, or 3200. Same as ENVS 3140. Approved for arts and sciences core curriculum: ideals and values.

PHIL 3160-3. Bioethics. Analysis of ethical problems involved in such issues as abortion, euthanasia, organ transplants, eugenics, treatment of the patient as a person, and the institutional nature of the health care delivery system. Prereq., 6 hours of philosophy course work. Restricted to sophomores/juniors/seniors. Approved for arts and sciences core curriculum: ideals and values.

PHIL 3180-3. Critical Thinking: Contemporary Topics. Looks at a selected topic such as nuclear disarmament, racial and sexual discrimination, animal rights, or abortion and euthanasia by examining issues through the lens of critical philosophical analysis. Reviews the reasoning behind espoused positions and the logical connections and argument forms they contain. Prereq., 6 hours of philosophy course work. Restricted to sophomores/juniors/seniors.

PHIL 3190 (3-4). War and Morality. Focuses on moral issues raised by war as a human institution. What are the justifications, limits, and alternatives? Does the advent of nuclear weapons change the nature of war? Prereq., 6 hours of philosophy course work. Restricted to sophomores, juniors and seniors. Approved for arts and sciences core curriculum: ideals and values.

PHIL 3200-3. Social and Political Philosophy. Systematic discussion and analysis of such philosophic ideas as community, freedom, political power, and violence. Prereq., 6 hours of philosophy course work. Restricted to sophomores, juniors and seniors. Approved for arts and sciences core curriculum: ideals and values.

PHIL 3260-3. Philosophy and the International Order. Considers philosophical topics concerning the international economic, political, and legal systems. Topics that may be considered include the nature of international law, war and peace, humanitarian intervention, international justice, world hunger, and human rights. Prereq., 6 hours PHIL course work. Restricted to sophomores/juniors/seniors. Approved for arts and sciences core curriculum: ideals and values.

PHIL 3310-3. Cognitive Science. An interdisciplinary introduction to cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Prereq., two of the following four courses: PSYC 2145, LING 2000, CSCI 1300, PHIL 2440. Same as PSYC/LING 3005 and CSCI 3702.

PHIL 3410-3. History of Science: Ancients to Newton. Surveys the history of science up to Newton, including the emergence of scientific modes of thinking from religious and philosophical roots in the Near East and Greece to the development of these modes in the Middle Ages and Renaissance. Culminates with Isaac Newton and the 17th century scientific revolution. Prereq., 6 hours of philosophy course work. Restricted to sophomores/juniors/seniors. Approved for arts and sciences core curriculum: historical context or natural science.

PHIL 3430-3. History of Science: Newton to Einstein. The history of physical and biological science, from the epoch-making achievements of Charles Darwin in biology to the dawn of the 20th century revolutions in physics, chemistry, and genetics. Deals with the success of the mechanical philosophy of nature and its problems. Prereq., 6 hours of philosophy course work. Restricted to sophomores/juniors/seniors. Approved for arts and sciences core curriculum: historical context or natural science.

PHIL 3480-3. Critical Thinking/Writing in Philosophy. Focuses upon the fundamental skills, methods, concepts, and distinctions that are essential for the study of philosophy. The basic skills covered include the writing of philosophy papers, the reading of articles, and the extraction and evaluation of arguments. Prereq., 6 hours of philosophy course work. Prereq. or coreq., PHIL 2440. Restricted to sophomore/junior/senior PHIL majors. Approved for art and sciences core curriculum: written communication.

PHIL 3600-3. Philosophy of Religion. Philosophical discussion of fundamental issues in religion, such as existence of God, religious experience, faith and reason, evil, immortality, and religious language. Prereq., 6 hours of philosophy course work. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: ideals and values.

PHIL 3700-3. Aesthetic Theory. Introduces major theories of aesthetics and contemporary discussions of problems, e.g., the nature of art and the problem of evaluations in art. Prereq., 6 hours of philosophy course work. Restricted to sophomores, juniors and seniors.

PHIL 3800-3. Open Topics in Philosophy. Variety of new courses at the 3000 level. See current departmental announcements for specific content. Maybe repeated up to 6 total credit hours. Prereq., 6 hours of philosophy course work. Restricted to sophomores, juniors and seniors.

PHIL 3840 (1-3). Independent Study. May be repeated up to 8 total credit hours. Prereq., 6 hours of philosophy course work. Restricted to juniors/seniors.

PHIL 3930 (1-3). Internship in Social Policy. Under the guidance of an official in a governmental or non-governmental organization, students are assigned to projects selected for their academic suitability as well as for value to the sponsoring

organization. Prior approval of department required. Prereq., 9 hours in moral or political philosophy course work. Recommended prereqs., PHIL 1200, 2200, and 3200.

PHIL 4010-3. Single Philosopher. Intensively studies the work of one historical figure in philosophy, with the aim of reaching a broad understanding of the philosopher's whole body of thought. Philosophers covered include, from year to year, Plato, Aristotle, Augustine, Aquinas, Descartes, Spinoza, Locke, Leibniz, Hume, and Kant. Includes at least one course per year on an ancient author and one course per year on a modern author. May be repeated up to 12 total credit hours. Prereq., 12 hours philosophy course work. Same as PHIL 5010.

PHIL 4020-3. Topics in the History of Philosophy. Examines a specific philosophical problem over an extended historical period. May be repeated up to 9 total credit hours. Prereq., 12 hours of philosophy course work, including PHIL 3000 and 3010. Same as PHIL 5020.

PHIL 4030-3. Medieval Philosophy. Introduces philosophy from the late Roman era to the 14th century. Philosophers studied may include Augustine, Boethius, Aquinas, and Ockham. Topics range over religion, ethics, mind, and metaphysics. Prereq., 12 hours of philosophy course work.

PHIL 4040-3. Studies in 20th Century Philosophy. Studies two or three major philosophies prominent during the last century. Prereq., 12 hours of philosophy course work. Restricted to juniors/ seniors.

PHIL 4070-3. Existentialist Philosophy. Examines central figures and texts in the existential tradition, from Kierkegaard and Nietzsche to Heidegger and Sartre. Prereq., 12 hours of philosophy course work. Restricted to juniors/seniors.

PHIL 4080-3. Introduction to Phenomenology. Examines the work of Edmund Husserl and subsequent phenomenologists (e.g., Heidegger, Sartre, Merleau-Ponty). Prereq., 12 hours of philosophy course work. Restricted to juniors and seniors.

PHIL 4110-3. Contemporary Moral Theory. Provides an in-depth look at some recent work in moral theory. Topics covered, varying from year to year, include: consequentialism and its critics; virtue theory; moral psychology; impartiality and the personal point of view. Prereqs., 12 hours philosophy course work, including PHIL 3100; and junior standing. Same as PHIL 5110.

PHIL 4120-3. Philosophy and Animals. Examines the moral status of nonhuman animals, and its implications for the common use of animals as food and experimental subjects for humans. Prereq., 12 hours of PHIL coursework completed. Recommended prereq., PHIL 3100. Same as PHIL 5120.

PHIL 4200-3. Contemporary Political Philosophy. Provides a survey of recent approaches to political philosophy: liberalism (Rawls, Disorkin); libertarianism (Nozick); communitarianism (Sandel, Macintyre); and feminism (Jaggar). Topics and readings vary with the instructor. May be repeated up to 6 total credit hours. Prereqs., PHIL 2200, 3200, and 12 hours of philosophy course work. Restricted to juniors and seniors. Same as PHIL 5200.

PHIL 4210-3. Ancient Political Thought. Prereq., CLAS/HIST 1051, CLAS/HIST 1061, HIST 1010, PSCI 2004, or PHIL 3000. Restricted to juniors/ seniors. Same as CLAS 4041 and HIST 4041.

PHIL 4250-3. Marxism. Historical and systematic study of principal themes of Marxist thought, from its Hegelian origins to its contemporary varieties, emphasizing the works of Marx and Engels. Prereq., 12 hours of GRMN or PHIL course work or instructor consent. Restricted to juniors/ seniors. Same as GRMN 4251.

PHIL 4260-3. Philosophy of Law. Considers philosophical topics concerning law and the U.S. legal system. Topics that may be considered include the nature of law, relations between law and morality, justifications of punishment, the moral duty to obey the law, and law and liberty. Prereq., junior or senior standing and 12 hours in philosophy. Same as PHIL 5260.

PHIL 4300-3. Philosophy of Mind. Discusses problems in the philosophy of mind, including the mind-body problem, and such concepts as consciousness, mental representation, and intentionality. Prereqs., PHIL 2440, 3010, 3340, and 3480. Same as PHIL 5300.

PHIL 4340-3. Epistemology. Studies some of the main topics of theory of knowledge, such as evidence, justification, prediction, explanation, skepticism, and concept acquisition. Prereq., 12 credit hours of philosophy, including PHIL 2440 and 3010. Recommended prereq., PHIL 3480. PHIL 4340 is restricted to junior/senior PHIL majors and PHIL 5340 is restricted to graduate students. Same as PHIL 5340.

PHIL 4360-3. Metaphysics. Traditional and contemporary theories of the basic categories of reality and the human relationship to it, including universals, substance, identity, change, mind and body, free will, and modality. Prereqs., PHIL 2440, 3010, 3340, and 3480.

PHIL 4400-3. Philosophy of Science. Prereqs., 12 hours PHIL course work including PHIL 2440 or equivalent, and junior standing. Same as PHIL 5400.

PHIL 4440-3. Topics in Logic. Provides for offering courses in a variety of topics in logic, including, but not limited to, mathematical logic, philosophical issues in logic, probability theory, decision theory, and inductive logic. Prereq., 12 hours PHIL course work, including PHIL 2440 or equivalent. Restricted to juniors/seniors. May be repeated up to 6 total credit hours. Same as PHIL 5440.

PHIL 4450-3. History and Philosophy of Physics. Investigates the role of experiment in physics. Uses case studies in the history and philosophy of physics and in scientific methodology. Prereqs., PHYS 1020 or 1120 or 2020 or instructor consent, 12 hours PHIL course work, and junior standing. Same as PHIL 5450 and PHYS 4450.

PHIL 4460-3. Modal Logic. Introduces the most philosophically relevant kind of logic that builds on PHIL 2440. Modal logic is the logic of the concepts of necessity, possibility, and contingency. A variety of systems of sentential modal logic will be covered, along with the standard system of first-order modal logic. Recommended prereq., PHIL 2440. Same as PHIL 5460.

PHIL 4490-3. Philosophy of Language. Examines theories and problems regarding the nature of language and its relation to reality. Concepts discussed include sense, reference, conventions, intentions, and their relation to science and social life. Relevant literature includes readings in Frege, Russell, Quine, Putnam, Kripke, and Chomsky. Prereq., PHIL 2440, 12 credit hours of philosophy, and junior standing. Same as PHIL 5490.

PHIL 4600-1. Theology Forum Seminar. Discusses a variety of theological and philosophical topics. Some reading, much discussion, occasional guest speakers. May be repeated up to 3 total credit hours with permission of instructor. Prereq., 12 hours of PHIL course work. Restricted to juniors/seniors.

PHIL 4730-3. Philosophy and Literature. Examines various relations between philosophy and literature, ranging from the direct incorporation of philosophical doctrine into literature to literature as a distinctive way of practicing philosophy. Prereqs., 12 credit hours of philosophy and junior standing.

PHIL 4800-3. Open Topics in Philosophy. A variety of new courses at the 4000 level. See current departmental announcements for specific content. May be repeated up to 6 total credit hours. Prereqs., 12 credit hours of philosophy and junior standing.

PHIL 4830-3. Senior Seminar in Philosophy. Critical in-depth examination of a selected philosophical topic. May be repeated up to 6 total credit hours. Prereq., 15 hours of philosophy. Restricted to junior/senior PHIL majors or instructor consent.

PHIL 4840 (1-3). Independent Study. May be repeated up to 8 total credit hours. Prereq. 12 hours of philosophy course work. Restricted to seniors.

PHIL 4950-3. Honors Thesis. May be repeated up to 6 total credit hours. Prereq., 12 hours of philosophy course work.

PHIL 5010-3. Single Philosopher. May be repeated up to 12 total credit hours. Prereq., graduate standing or instructor consent. Same as PHIL 4010.

PHIL 5020-3. Topics in the History of Philosophy. May be repeated up to 9 total credit hours. Same as PHIL 4020.

PHIL 5030-1. Greek Philosophical Texts. Selected readings in classical philosophy, with a focus on achieving fluency in reading philosophical Greek.

PHIL 5040-1. Latin Philosophical Texts. Selected readings in classical and medieval authors, in the original language. The focus is on achieving fluency in reading philosophical Latin.

PHIL 5100-3. Ethics. Presents representative positions in normative ethics and metaethics. May be repeated up to 6 total credit hours.

PHIL 5110-3. Contemporary Moral Theory. Same as PHIL 4110.

PHIL 5120-3. Philosophy and Animals. Same as PHIL 4120.

PHIL 5200-3. Contemporary Political Philosophy. Same as PHIL 4200.

PHIL 5210-3. Philosophy and Social Policy. Studies philosophical approaches to social and political issues such as abortion, bioethics, environmental preservation, human rights, and reverse discrimination. Gives attention to strengths and weaknesses of philosophical treatments of these issues. May be repeated up to 6 total credit hours.

PHIL 5230-3. Bioethics and Public Policy. Examines public policy implications of contemporary biological, genetic, biomedical, and behavioral science in light of ethics and human values. Considers theoretical and practical grounds for moral assessment of scientific research and possible applications of technology. May be repeated up to 6 total credit hours.

PHIL 5240-3. Seminar in Environmental Philosophy. Philosophical examination of several different approaches to environmental problems: economic, juridical, political, and ecological. Discusses specific environmental problems, focusing on their moral dimensions, e.g., wilderness preservation, animal rights, and land use and urban planning. May be repeated up to 6 total credit hours.

PHIL 5260-3. Philosophy of Law. Same as PHIL 4260.

PHIL 5290 (1-3). Topics in Values and Social Policy. Deals with topics in the area of philosophy and public policy and is often interdisciplinary in focus. Topics vary from one semester to another. May be repeated up to 7 total credit hours.

PHIL 5300-3. Philosophy of Mind. Same as PHIL 4300.

PHIL 5340-3. Epistemology. Studies some of the main topics of theory of knowledge, such as evidence, justification, prediction, explanation, skepticism, and concept acquisition. Prereq., 12 credit hours of philosophy, including PHIL 2440 and 3010. Recommended prereq., PHIL 3480. PHIL 4340 is restricted to junior/senior PHIL majors and PHIL 5340 is restricted to graduate students. Same as PHIL 4340.

PHIL 5360-3. Metaphysics. Same as 4360.

PHIL 5400-3. Philosophy of Science. Same as PHIL 4400.

PHIL 5440-3. Topics in Logic. Same as PHIL 4440.

PHIL 5450-3. History and Philosophy of Physics. Same as PHIL 4450 and PHYS 5450.

PHIL 5460-3. Modal Logic. Same as PHIL 4460.

PHIL 5490-3. Philosophy of Language. Same as PHIL 4490.

PHIL 5500-3. Advanced Formal Semantics. Considers topics in the semantics of natural language not normally covered in first courses in philosophy of language. These include: natural deduction and sequent calculi for conditional logic; interpretation as logical inference; Lambek calculus and applicative categorial grammar; applications such as generalized coordination, plurals, higher-order intensional logic, generics, focus, and event-based semantics. Recommended prereq., PHIL 5490.

PHIL 5600-3. Philosophy of Religion. Studies topics falling under philosophy of religion, such as proofs for God's existence, religious language, mysticism, psychology of religion, modern theological movements, miracles, and study of individual theologians. May be repeated up to 6 total credit hours.

PHIL 5700-3. Aesthetics. Analyzes the principal topics of aesthetics, including such issues as formal structure of aesthetics, the nature of critical judgments, and the status of the work of art. May be repeated up to 6 total credit hours.

PHIL 5800-3. Open Topics in Philosophy. Variety of new courses at the 5000 level. See current departmental announcements for specific content. May be repeated up to 6 total credit hours.

PHIL 5810 (1-3). Special Topics in Philosophy. Instructor meets regularly with three or more students to discuss special topics in philosophy. May be repeated up to 6 total credit hours.

PHIL 5840 (1-3). Graduate Independent Study. May be repeated up to 6 total credit hours.

PHIL 6000 (3-4). Seminar in the History of Philosophy. Studies advanced topics in the history of philosophy. Content varies by semester, but may extend to any period in the history of philosophy, from the Presocratics into the modern era. May be repeated up to 12 total credit hours. Prereq., graduate standing or instructor consent.

PHIL 6040-3. Seminar: Phenomenology. May be repeated up to 6 total credit hours.

PHIL 6100-3. Seminar in Ethics. Intensive study of selected topics in ethical theory.

PHIL 6200-3. Seminar in Social and Political Philosophy. Provides an in-depth look at some particular topic in social and political philosophy, such as rights, political freedom, political obligation, or democracy.

PHIL 6300-3. Seminar in Philosophy of Mind. Studies selected topics in philosophy of mind.

PHIL 6310-3. Issues and Methods in Cognitive Science. Prereqs., graduate standing, or at least one course at the 3000 level or higher in computer science, linguistics, philosophy, or psychology. No background in computer science is presumed. Same as CSCI 6402, EDUC 6504, LING 6200, and PSYC 6200.

PHIL 6340-3. Seminar in Epistemology. Studies some of the main topics of epistemology, such as skepticism, foundations of knowledge, perception, introspection, belief, certainty, and analytic-synthetic distinctions.

PHIL 6380-3. Seminar in Metaphysics. Traditional and contemporary theories of the basic categories used to describe nature and the human relationship to it, including such concepts as substance, identity, space and time, causality, determination, and systematic ontology.

PHIL 6400-3. Seminar in Philosophy of Science. Topics connected with development of nature of science; structure of scientific theories; testing of hypotheses. Theory of decisions in science and ethics. Basic conceptions and models of abstraction in the history of science.

PHIL 6490-3. Seminar in Philosophy of Language. Studies some of the main topics in the philosophy of language, such as meaning and theories of meaning, translation, speech acts, rules of language, reference, relevance of psycholinguistics, language and thought, and language and ontology.

PHIL 6940-1. Master's Candidate for Degree. May be repeated up to 7 total credit hours.

PHIL 6950 (1-6). Master's Thesis. May be repeated up to 7 total credit hours.

PHIL 7415-2. Cognitive Science Research Practicum. Independent, interdisciplinary research project in cognitive science for graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students should obtain commitments from two mentors for their project. Prereqs., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereqs., CSCI 7762 or EDUC 6505 or LING 7762 or PSYC 7765. Same as LING 7415, PSYC 7415, CSCI 7412, and EDUC 6506.

PHIL 7425-2. Cognitive Science Research Practicum 2. Prereq., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereq., CSCI 7762 or EDUC 6505 or LING 7762 or PHIL 7310 or PSYC 7762. Same as CSCI 7422, EDUC 6516, LING 7425, PSYC 7425.

PHIL 7810 (1-2). Topics in Cognitive Science. Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as LING 7775, CSCI 7772, EDUC 7775, PSYC 7775 and SLHS 7775.

PHIL 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Physics

PHYS 1000-3. Preparatory Physics. Introduces basic physics, emphasizing an analytical approach to prepare for PHYS 1110/1120, the engineering majors sequence. This course does not satisfy any MAPS deficiency in either the sciences or math. Prereq., 1 year high school algebra or equivalent.

PHYS 1010-3. Physics of Everyday Life 1. Intended primarily for nonscientists, this course covers physics encountered in everyday life. Topics include balls, scales, balloons, stoves, insulation, light bulbs, clocks, nuclear weapons, basics of flashlights, and microwave ovens. Prereq., high school algebra or equivalent. Meets MAPS requirements for natural sciences: chemistry or physics. However,

this course should not be taken if the student has a MAPS deficiency in math. Approved for arts and sciences core curriculum: natural science or quantitative reasoning and mathematical skills.

PHYS 1020-4. Physics of Everyday Life 2. Intended primarily for nonscientists, this course is a continuation of PHYS 1010. Includes electrical power generation and distribution, electrical motors, radio, television, computers, copiers, lasers, fluorescent lights, cameras, and medical imaging. Prereqs., PHYS 1010 and high school algebra. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills or natural science.

PHYS 1110-4. General Physics 1. Three lect., one rec. per week, plus three evening exams in the semester. First semester of three-semester sequence for science and engineering students. Covers kinematics, dynamics, momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion, and introduction to thermodynamics. Coreq., APPM 1350 or MATH 1300. Credit not granted for this course and PHYS 1170. Approved for arts and sciences core curriculum: natural science.

PHYS 1120-4. General Physics 2. Three lect., one rec. per week, plus three evening exams in the semester. Second semester of three-semester introductory sequence for science and engineering students. Covers electricity and magnetism, wave motion, and optics. Normally is taken concurrently with PHYS 1140. Prereq., PHYS 1110. Coreq., MATH 2300 or APPM 1360. Credit not granted for this course and PHYS 1180. Approved for arts and sciences core curriculum: natural science.

PHYS 1140-1. Experimental Physics 1. Introduction to experimental physics through laboratory observations of a wide range of phenomena. Course covers experiments on physical measurements, linear and rotational mechanics, harmonic motion, wave motion, sound and heat, electricity and magnetism, optics, and electromagnetic waves with the mathematical analysis of physical errors associated with the experimental process. One lect., one 2-hour lab per week. Prereq., PHYS 1110; prereq. or coreq., PHYS 1120. Approved for arts and science core curriculum: natural science.

PHYS 1150-1. Experimental Physics 2. For students in Physics Plan 3 teaching track only. Students complete another full set of PHYS 1140 experiments (seven different labs from those previously completed). Registration by special arrangements with the Department of Physics. Prereqs., PHYS 1110 and 1120. Same as PHYS 1140.

PHYS 1220-3. Physics for Future Presidents. Intended primarily for nonscientists, this course covers topics relevant to leaders, policy makers, and citizens confronted with science and technology issues. Topics include energy consumption and its impact on the environment; atoms and heat; radioactivity and nuclear reactions; nuclear bombs; light and radio waves for technological applications; climate change; quantum physics. Recommended prereq., high school algebra. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

PHYS 1230-3. Light and Color for Nonscientists. Discusses light, color, vision, and perception. Covers reflection, refraction, lenses, and applications to photography and other methods of light sensing. Other topics include lasers and holography. Course is geared toward nonscience majors. Meets MAPS requirements for natural science: chemistry or physics. Should not be taken by students with a math MAPS deficiency. Approved for arts and science core curriculum: natural science.

PHYS 1240-3. Sound and Music. Explores the physical processes that underlie the diversity of sound and musical phenomena. Topics covered include the physical nature of sound, the perception of sound, the perception of pitch and harmony, musical instruments, synthesizers and samplers, and room acoustics. Nonmathematical; geared toward nonscience majors. Meets MAPS requirement for natural science: chemistry or physics. Should not be taken by students with a math MAPS deficiency. Approved for arts and sciences core curriculum: natural science.

PHYS 1300-3. Experiment in Physics. Examines the roles of experiment in physics, using historical examples. Experiments provide a basis for scientific knowledge, test theories, call for new theories, give hints toward the mathematical form of theories, and provide evidence for the existence of entities involved in theories. Approved for arts and sciences core curriculum: natural science.

PHYS 2010-5. General Physics 1. Three demonstration lect., one two-hour lab/rec. week, plus three evening exams in the semester. Covers mechanics, heat, and sound. Elementary but thorough presentation of fundamental facts and

principles of physics. Natural science majors with a knowledge of calculus and others taking calculus are urged to consider taking the calculus-based courses PHYS 1110, 1120, 1140, and 2130, rather than PHYS 2010 and PHYS 2020. This course is designed for premed students in the biological sciences. Prereq., ability to use high school algebra and trigonometry. Meets MAPS requirements for natural science. Approved for arts and sciences core curriculum: natural science.

PHYS 2020-5. General Physics 2. Three demonstration lect., one two-hour lab/rec. per week, plus three evening exams in the semester. Covers electricity and magnetism, light, and modern physics. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, 1120, 1140, and 2130, rather than PHYS 2010 and PHYS 2020. This course is designed for premed students and students in the biological sciences. Prereq., PHYS 2010. Approved for arts and sciences core curriculum: natural science.

PHYS 2130-3. General Physics 3. Third semester of introductory sequence for science and engineering students except physics majors and those studying computer applications in physics (for these, see PHYS 2170). Covers special relativity, quantum theory, atomic physics, solid state, and nuclear physics. Physics majors should take PHYS 2170 instead of PHYS 2130. Prereqs., PHYS 1120, 1140, or ECEN 2250, 3400. Coreq., MATH 2400. Normally taken with PHYS 2150.

PHYS 2150-1. Experimental Physics. One lect., one 2-hour lab per week. Includes many experiments of modern physics, including atomic physics, solid state physics, electron diffraction, radioactivity, and quantum effects. Normally taken concurrently with PHYS 2130 or PHYS 2170 but students may take PHYS 2150 after taking PHYS 2130 or 2170. Prereqs., PHYS 1120 and 1140.

PHYS 2160-1. Experimental Physics. For students in Physics Plan 3 teaching track only. Students do another full set of PHYS 2150 experiments (seven different labs from those previously completed). Registration by special arrangements with the Department of Physics. Prereqs., PHYS 1120 and 1140. Same as PHYS 2150.

PHYS 2170-3. Foundations of Modern Physics. For physics majors in plans 1 and 2 and those studying computer applications in physics. Completes the three-semester sequence of general physics. Emphasizes developing skills for physics majors. Includes relativity, quantum mechanics, atomic structure. Normally taken with the laboratory PHYS 2150. Prereq., PHYS 1120. Coreq., MATH 2400 or APPM 2350.

PHYS 2210-3. Classical Mechanics and Mathematical Methods 1. Theoretical Newtonian mechanics, including position and velocity dependent forces, oscillation, stability, non-inertial frames and gravitation from extended bodies. Ordinary differential equations, vector algebra, curvilinear coordinates, complex numbers, and Fourier series will be introduced in the context of the mechanics. Prereqs., PHYS 2130 or 2170, MATH 2400 or APPM 2350. Coreq., APPM 2360. Credit not granted for this course and PHYS 2140.

PHYS 2810 (1-3). Special Topics in Physics. Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. May be repeated up to 7 total credit hours.

PHYS 2840 (1-3). Independent Study. Selected topics for undergraduate independent study. Subject matter to be arranged. May be repeated up to 7 total credit hours.

PHYS 3000-3. Science and Public Policy. For nonscience majors. Reading, discussions, debates, and lectures are used to study how science affects society economically, intellectually, and in terms of health and national security. Another focus is how government fosters and funds scientific activities. Recommended prereq., completion of core science requirement.

PHYS 3050-3. Writing in Physics: Problem-Solving and Rhetoric. Teaches strategies used in scientific writing with an emphasis on argument, reviews and reinforces essential writing skills, provides experience in writing both academic and professional communications in a style appropriate to the literature of physics. Prereqs., PHYS 2130 or 2170 and lower-division core writing requirement. Approved for arts and sciences core curriculum: written communication.

PHYS 3070-3. Energy and the Environment. Contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Included are some basic physical concepts and principles that

often constrain choices. No background in physics is required. Approved for arts and sciences core curriculum: natural science. Same as ENV5 3070.

PHYS 3210-3. Classical Mechanics and Mathematical Methods 2. Lagrangian and Hamiltonian treatment of theoretical mechanics, including coupled oscillations, waves in continuous media, central force motion, rigid body motion and fluid dynamics. The calculus of variations, linear algebra, tensor algebra, vector calculus, and partial differential equations will be introduced in the context of the mechanics. Prereqs., PHYS 2210, APPM 2360, or equivalent.

PHYS 3220-3. Quantum Mechanics and Atomic Physics 1. Introduces quantum mechanics with wave, operator, and matrix computational techniques. Investigates solutions for harmonic oscillator, potential well, and systems with angular momentum. Develops a quantitative description of one-electron atoms in lowest order. Prereqs., PHYS 2130 or 2170, 2210, and 3210.

PHYS 3221-1. Tutorial Practicum for Quantum Mechanics 1. Uses interactive group work to aid student learning in co-requisite course PHYS 3220. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content. Coreq., PHYS 3220.

PHYS 3310-3. Principles of Electricity and Magnetism 1. Covers mathematical theory of electricity and magnetism, including electrostatics, magnetostatics, and polarized media, and provides an introduction to electromagnetic fields, waves, and special relativity. Prereqs., PHYS 2210 and 2130 or 2170.

PHYS 3311-1. Tutorial Practicum for Electricity and Magnetism 1. Uses interactive group work to aid student learning in co-requisite course PHYS 3310. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content. Coreq., PHYS 3310.

PHYS 3320-3. Principles of Electricity and Magnetism 2. Continuation of PHYS 3310. Electromagnetic induction; magnetic energy; microscopic theory of magnetic properties; AC circuits; Maxwell's Equations; planewaves; waveguides and transmission lines; radiation from electric and magnetic dipoles and from an accelerated charge. Prereq., PHYS 3310.

PHYS 3330-2. Electronics for the Physical Sciences. One lect. and one three-hour lab per week. Introduces laboratory electronics for physical science students. Includes basic electronic instruments, DC bridge circuits, operational amplifiers, bipolar transistors, field-effect transistors, photodiodes, noise in electronic circuits, digital logic, and microcontrollers. Students gain hands-on experience in designing, building, and debugging circuits. Concludes with a three-week project in which students design and build an experiment of their choice and present a seminar on the results. Prereq., PHYS 2150 and 2130 or 2170.

PHYS 3340-3. Introductory Research in Optical Physics. Two lect., one three-hour lab plus variable unsupervised labs each week. Students design and build their own experiments using a modular type of optical research kit. Experiments cover basic research methods in instrument design, laser physics, Fourier optics, holography, spectroscopy, and interferometry. Students learn how to plan major projects and evaluate critically the significance of results. Course concludes with a four-week major project. Prereq., PHYS 3330.

PHYS 4130-3. Biological Electron Microscopy: Principles and Recent Advances. Prereq., EBIO 1220, or MCDB 1150, or MCDB 4500/5500, or PHYS 1120, or 2020, or instructor consent. Same as PHYS 5130 and MCDB 4130.

PHYS 4150-3. Plasma Physics. Discusses the fundamentals of plasma physics, including particle motion in electromagnetic fields, wave propagation, collisions, diffusion, and resistivity. Presents examples from space plasmas, astrophysical plasmas, laboratory fusion plasmas, and plasmas in accelerators. Prereqs., PHYS 1110-1120, and MATH 2400 or APPM 2350. Coreq., PHYS 3310.

PHYS 4230-3. Thermodynamics and Statistical Mechanics. Statistical mechanics applied to macroscopic physical systems; statistical thermodynamics, classical thermodynamics systems; applications to simple systems. Examines relationship of statistical to thermodynamic points of view. Prereqs., PHYS 3220 and APPM 2360.

PHYS 4340-3. Introduction to Solid State Physics. Primarily for senior physics majors. Discusses crystal structure, lattice dynamics, band theory, semiconductors, and ferromagnetism. Prereq., PHYS 3220. Same as ECEN 4345.

PHYS 4410-3. Quantum Mechanics and Atomic Physics 2. Extends quantum mechanics to include perturbation theory and its applications to atomic fine structure, interactions with external forces, the periodic table, and dynamical processes including electromagnetic transition rates. Prereqs., PHYS 3220, 3320.

PHYS 4420-3. Nuclear and Particle Physics. Introduces structure of the atomic nucleus, spectroscopy of subnuclear particles, scattering, reactions, radioactive decay, fundamental interactions of quarks and leptons. Prereq., PHYS 4410.

PHYS 4430-3. Introduction to Research in Modern Physics. One lect., one lab per week to be taken with PHYS 4410. Experiments introduce students to realities of experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today. Prereqs., PHYS 3220 and 3320. Coreq., PHYS 4410. Same as PHYS 5430.

PHYS 4450-3. History and Philosophy of Physics. Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology. Prereq., PHYS 1020 or 1120 or 2020 or instructor consent. Same as PHYS 5450, PHIL 4450.

PHYS 4460-3. Teaching and Learning Physics. Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching and education research. Prereq., PHYS 3210 and 3310 or instructor consent. Same as PHYS 5560 and EDUC 4460.

PHYS 4510-3. Optics. Basic electromagnetic theory of light, using Maxwell's equations. Examples in geometrical optics; extensive applications in physical optics including diffraction and polarization. Spectra, including Zeeman effect and fluorescence. Recent advances in experimental techniques: microwaves, lasers, image converters. Prereq., PHYS 3320.

PHYS 4610-2. Physics Honors. Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4620 and PHYS 4630. Prereq., 3.00 GPA. Registration by special arrangement with the Department of Physics.

PHYS 4620-2. Physics Honors. Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4630. Prereq., 3.00 GPA. Registration by special arrangement with the Department of Physics.

PHYS 4630-2. Physics Honors. Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4620. Prereq., 3.00 GPA. Registration by special arrangement with the Department of Physics.

PHYS 4810 (1-3). Special Topics in Physics. Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also PHYS 4820 and PHYS 4830. May be repeated up to 7 total credit hours.

PHYS 4840 (1-3). Independent Study. Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4850. May be repeated up to 7 total credit hours.

PHYS 4850 (1-3). Independent Study. Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4840. May be repeated up to 7 total credit hours.

PHYS 4970-3. Seminar on Physical Methods in Biology. Prereq., PHYS 1120 or 2020, and MCDB 1060 or 1150, or EBIO 1220, or instructor consent. Same as PHYS 5970 and MCDB 4970.

PHYS 5030-3. Intermediate Mathematical Physics 1. This course and its continuation, PHYS 5040, form a survey of classical mathematical physics. Studies complex variable theory and finite vector spaces, and includes topics in ordinary and partial differential equations, boundary value problems, potential theory, and Fourier analysis. Prereqs., MATH 4310 and 4320. Same as MATH 5030.

PHYS 5040-3. Intermediate Mathematical Physics 2. Continuation of PHYS 5030. Includes group theory, special functions, integral transforms, integral equations, and calculus of variations. Prereq., PHYS 5030. Same as MATH 5040.

PHYS 5130-3. Biological Electron Microscopy: Principles and Recent Advances. Same as PHYS 4130 and MCDB 5130.

PHYS 5141-3. Astrophysical and Space Plasmas. Covers magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies. Prereq., graduate standing in astrophysical and planetary science or physics. Same as ASTR 5140.

PHYS 5150-3. Introductory Plasma Physics. Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, Wkb wave theory, controlled thermonuclear fusion concepts, astrophysical applications, and experimental plasma physics (laboratory). Prereq., PHYS 3310. Same as ASTR 5150.

PHYS 5160-3. Fundamentals of Optics and Lasers. Covers the basic physics of lasers. Topics include basics of optical resonators and Gaussian beam propagation, stimulated emission, laser threshold conditions, laser linewidth, q-switching and mode locking of lasers, tuning of CW lasers, and specifics of various common lasers.

PHYS 5210-3. Theoretical Mechanics. Variational principles, Lagrange's equations, Hamilton's equations, motion of rigid body, relativistic mechanics, transformation theory, continuum mechanics, small oscillations, Hamilton-Jacobi theory. Coreq., PHYS 5250.

PHYS 5220-3. Nonlinear Dynamics. Conservative systems: canonical perturbation theory, adiabatic invariants, surface of section, overlap criterion, orbit stability, quasilinear diffusion, renormalization analysis of transition to chaos. Bifurcation theory: center manifolds, normal forms, singularity theory. Dissipative systems: strange attractors, renormalization analysis of period doubling, intermittency. Prereq., PHYS 5210. Same as ATOC 5220.

PHYS 5250-3. Introduction to Quantum Mechanics 1. Quantum phenomena, Ehrenfest theorem and relation to classical physics, applications to one-dimensional problems, operator techniques, angular momentum and its representations, bound states and hydrogen atom, and Stern-Gerlach experiment and spin and spinor wave function. Prereqs., PHYS 3220 and 4410. Coreq., PHYS 5210.

PHYS 5260-3. Introduction to Quantum Mechanics 2. Symmetries and conservation laws, identical particle systems, approximation techniques (including time-dependent and time-independent perturbation theories and variational techniques) and their applications, scattering theory, radiative transitions, and helium atom. Prereq., PHYS 5250.

PHYS 5430-3. Introduction to Research in Modern Physics. Same as PHYS 4430.

PHYS 5450-3. History and Philosophy of Physics. Same as PHYS 4450 and PHIL 5450.

PHYS 5460-3. Teaching and Learning Physics. Same as PHYS 4460 and EDUC 5460.

PHYS 5606-3. Optics Laboratory. Consists of 13 optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers, and holograms, and experimentation of fiber optics and Fourier optics. Prereq., undergraduate optics course such as PHYS 4510. Same as ECEN 5606.

PHYS 5770-3. Gravitational Theory (Theory of General Relativity). Presents Einstein's relativistic theory of gravitation from geometric viewpoint; gives applications to astrophysical problems (gravitational waves, stellar collapse, etc.).

PHYS 5840 (1-3). Selected Topics for Graduate Independent Study. Subject matter to be arranged. May be repeated up to 7 total credit hours.

PHYS 5970-3. Seminar: Physical Methods in Biology. Same as PHYS 4970 and MCDB 5970.

PHYS 6260-3. Geometry of Quantum Fields and Strings. Focuses on differential geometric techniques in quantum field and string theories. Topics include spinors, Dirac operators, index theorem, anomalies, geometry of superspace, super-

symmetric quantum mechanics and field theory, and nonperturbative aspects in field and string theories. Prereq., MATH 6230, PHYS 5250, or instructor consent. Recommended prereqs., MATH 6240 and PHYS 7280. Same as MATH 6260.

PHYS 6610-3. Earth and Planetary Physics 1. Same as GEOL 6610 and ASTR 6610.

PHYS 6620-3. Earth and Planetary Physics 2. Same as GEOL 6620 and ASTR 6620.

PHYS 6630-3. Earth and Planetary Physics 3. Same as GEOL 6630 and ASTR 6630.

PHYS 6650 (1-3). Seminar in Geophysics. Same as GEOL 6650 and ASTR 6650.

PHYS 6670-2. Geophysical Inverse Theory. Prereqs., calculus, computer programming (any language). Same as GEOL 6670.

PHYS 6940-1. Master's Degree Candidate.

PHYS 6950 (1-6). Master's Thesis. Approved problem in theoretical or experimental physics under the direction of staff members. Intended to introduce the student to procedures in research and development work. Work of an original nature expected.

PHYS 7160-3. Intermediate Plasma Physics. Continuation of PHYS 5150. Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation—ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory, and fluctuation phenomena. Prereq., PHYS 5150 or instructor consent. Same as ASTR 7160.

PHYS 7230-3. Statistical Mechanics. Classical and quantum statistical theory, including study of both equilibrium and nonequilibrium systems. Topics covered include kinetic theory, degenerate gases, macrocanonical and grand canonical ensembles, and irreversible processes. Prereq., PHYS 5250 and 5260.

PHYS 7240-3. Advanced Statistical Mechanics. Introduces current research topics in statistical mechanics. Topics vary from year to year and may include phase transitions, critical phenomena, nonequilibrium phenomena, dense fluids, dynamical systems, plasma physics, or quantum statistical mechanics. Prereq., PHYS 7230.

PHYS 7270-3. Introduction to Quantum Mechanics 3. Radiation theory; relativistic wave equations with simple applications; introduction to field theory and second quantization.

PHYS 7280-3. Advanced Quantum Theory. Quantum theory of fields, elementary particles, symmetry laws, and topics of special interest. Prereq., PHYS 7270 or instructor consent.

PHYS 7310-3. Electromagnetic Theory 1. Sophisticated approach to electrostatics, boundary value problems, magnetostatics, applications of Maxwell's equations to electromagnetic wave propagation, wave guides, and resonant cavities and magnetohydrodynamics. See also PHYS 7320. Prereq., PHYS 5030.

PHYS 7320-3. Electromagnetic Theory 2. This is a continuation of PHYS 7310. Topics include relativistic particle dynamics; radiation by moving charges; multiple fields; radiation damping and self-fields of a particle; collisions between charged particles and energy loss; radiative processes; and classical field theory. See also PHYS 7310. Prereq., PHYS 7310.

PHYS 7440-3. Theory of the Solid State. Stresses application to the solid state of physical concepts basic to much of modern physics, single-particle approximation, and the energy-band description of electron states in solids, pseudopotential theory applied to ordered and disordered systems, dynamical behavior of electrons in solids, lattice dynamics, Hartree-Fock and random-phase approximation in solids, many-body aspects of magnetism, and superconductivity.

PHYS 7450-3. Theory of Solid State 2. The second semester of condensed matter physics covers topics in soft condensed matter physics, liquid crystals, semiconductors, Quantum Hall effect, Fractional Quantum Hall effect, superconductivity, and other topics at the discretion of the instructor.

PHYS 7550-3. Atomic and Molecular Spectra. Covers theory of atomic structure and spectra, including coupling of angular momenta, tensor operators, energy levels, fine and hyperfine structure, transition probabilities, Zeeman and Stark effects. Molecular spectra: electronic, vibrational, and rotational states. Rotation matrices, symmetric top.

PHYS 7730-3. Theory of Elementary Particles. Systematics of elementary particles, leptons, quarks, gauge bosons, symmetries and symmetry breaking, scat-

tering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, gauge theories.

PHYS 7810 (1-3). Special Topics in Physics. Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. May be repeated up to 7 total credit hours.

PHYS 7840 (1-3). Selected Topics for Graduate Independent Study. Subject matter to be arranged. May be repeated up to 7 total credit hours. Same as PHYS 7850.

PHYS 7850 (1-3). Selected Topics for Graduate Independent Study. Subject matter to be arranged. May be repeated for a total of 7 credit hours. Same as PHYS 7840.

PHYS 7915-1. Seminar Topics in Physics. Various seminar topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. May be repeated up to 3 hours per semester.

PHYS 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Political Science

American

PSCI 1101-3. The American Political System. Emphasizes interrelations among levels and branches of government, formal and informal institutions, processes, and behavior. Meets MAPS requirement for social science: general or U.S. history. Approved for arts and sciences core curriculum: contemporary societies or United States context.

PSCI 2481-3. Introduction to the Legal Process. Covers basic legal concepts and processes emphasizing the American system. Gives special attention to political functions of law. Recommended as preparation for PSCI 4241 and 4251. Prereq., PSCI 1101.

PSCI 3011-3. The American Presidency. Covers constitutional and institutional foundations and historical development of the presidency; roles, powers, selection, recent modifications, and institutionalization. Uses lectures and class discussion. Prereq., PSCI 1101. Approved for arts and sciences core curriculum: United States context.

PSCI 3021-3. U.S. Campaigns and Elections. Introduces students to the subjects, techniques, and findings of Political Science research on campaigns and elections. Particular emphasis is placed on the study of voting, campaign effects, partisan coalitions, electoral rules, campaign finance, and the policy impact of elections. Prereq., PSCI 1101. Approved for arts and sciences core curriculum: United States context.

PSCI 3031-3. Political Parties and Interest Groups. Highlights the practice of party politics in the United States, including the nature, structure, organization, and functions of political parties and interest groups. Analyzes interest group politics and political behavior. Prereq., PSCI 1101.

PSCI 3041-3. The American Congress. Provides intensive examination of the role of Congress in American government, including congressional elections, representation, the organization of Congress, and congressional policy making. Examines larger context of congressional politics, including political parties, the president, and interest groups. Prereq., PSCI 1101.

PSCI 3051-3. Public Opinion and Political Behavior. Examines measurement of public opinion and evaluation of its impact on governmental policy formation, including survey research techniques and field work in opinion sampling. Prereq., PSCI 1101.

PSCI 3061-3. State Government and Politics. Examines politics in the American states from a comparative and historical perspective. Considers major political actors—interest groups, citizens (direct democracy), and political parties, as well as central institutions, in the state political arena. Also focuses on major state public policy concerns. Prereq., PSCI 1101. Approved for arts and sciences core curriculum: United States context.

PSCI 3071-3. Urban Politics. Examines the structure of political, social, and economic influence in urban areas. Focuses on the relationship of the political

system to governmental, social, and economic institutions and the contemporary policy processes in American cities. Prereq., PSCI 1101. Approved for arts and sciences core curriculum: United States context.

PSCI 3091-3. Politics of Social Movements. Examines theoretical and empirical research on social movements from a U.S. perspective. Considers why social movements arise, who participates in them, the tactics they employ, obstacles they face, and their political impact. Prereq., PSCI 1101.

PSCI 3101-3. Black Politics. Examines structure of political, social, and economic influence in urban areas. Focuses on the relationship of political processes to governmental, social, and economic institutions and contemporary policy processes in American cities. Prereq., PSCI 1101. Restricted to sophomores/juniors/seniors. Approved for arts and sciences core curriculum: human diversity or contemporary societies.

PSCI 3171-3. Government and Capitalism in the United States. Examines competing theoretical approaches to questions related to origins, development, and purposes of modern government in the United States; particular attention paid to impact of transformations in the underlying structure of the capitalist economy. Prereq., PSCI 1101. Approved for arts and sciences core curriculum: United States context.

PSCI 3191-3. National Security Organization and Policy Making. Analyzes how the American governmental and political system is structured to define, select, and implement national security policies. Examines roles of the president, Congress, bureaucracy, interest groups, and other actors. Prereq., PSCI 1101.

PSCI 3271-3. Law and Society: The Interaction between Legal Institutions and Human Behavior. Examines relationship between human behavior and legal system, looking closely at the voluntary relationship between the citizen and the state, the use of law to balance economic liberty and equality, support for civil liberties, and procedural, distributive, and retributive justice. Prereq., PSCI 1101.

PSCI 3301-3. Gender, Sexuality, and U.S. Law. Contemporary and historic overview of U.S. courts' treatment of sex and gender. Using the case method, examines policy issues including, but not limited to: same sex marriage and civil unions; privacy; affirmative action; abortion; reproductive technologies; and discrimination based on sex and sexual orientation in education and in the workplace. Prereq., WMST 2000 or PSCI 1101. Same as WMST 3300. Approved for arts and sciences core curriculum: human diversity.

PSCI 4081-3. Icons of the American Republic. Examines the founding period of the United States through the events, political concepts and individuals depicted in the art exhibited in the U.S. Capitol Building in Washington, D.C. The course includes a visit to the U.S. Capitol Building, the floor of the U.S. House of Representatives, the floor of the U.S. Senate, and an exploration of the legislative process. Prereq., PSCI 1101 or 2012 or 2223 or 2004. Restricted to students with a minimum 3.4 GPA and 60 credit hours completed. Same as PRLC 4081.

PSCI 4131-3. Latinos and the U.S. Political System. Examines the political status and activities of Mexican Americans and other Latino groups (Cuban Americans and Puerto Ricans) in the U.S. Also covers Latino political attitudes and behaviors; Latino efforts to influence the major national, state, and local institutions of the American government; and public policy concerns of Latinos. Recommended prereq., PSCI 1101. Restricted to sophomores/juniors/seniors. Approved for arts and sciences core curriculum: human diversity.

PSCI 4221-3. Political Psychology. Examines the psychological foundations of political decision-making among citizens and elites. Considers the role of political psychology in explaining political behavior and outcomes at the individual and collective level. Prereq., PSCI 1101.

PSCI 4241-3. Constitutional Law 1. Focuses on the nature and scope of American constitutional principles as developed by the U.S. Supreme Court: federalism, jurisdiction of the federal courts, separation of powers, the taxing power, and the commerce power. Involves the case method. Prereq., PSCI 1101 and junior or senior standing.

PSCI 4251-3. Constitutional Law 2. Continuation of PSCI 4241. Emphasizes war power, powers of the president, citizenship, the Bill of Rights, and the Civil War amendments. Involves the case method. Not open to freshmen. Prereq., PSCI 1101 or instructor consent.

PSCI 4341-3. Political Communication, Persuasion, and Public Policy. Addresses the idea of political communication as a central aspect of policy making

and how the inability to develop persuasive political arguments in particular circumstances invites policy failure. Examines aspects of political communication as it applies to citizens, political decision makers, and specific public policies. Prereq., PSCI 1101 or instructor consent. Restricted to juniors and seniors.

PSCI 4701-3. Symbolic Politics. Introduces uses and abuses of symbols as instruments and indicators of political change. Prereq., PSCI 1101. Recommended prereq., junior or senior standing.

PSCI 4721-3. Rethinking American Politics. Examines the political history and development of the United States of America. Looks at the particular policy choices we have made and examines the future political agenda. Prereqs., junior or senior standing and PSCI 1101 recommended.

PSCI 4731-3. Progress and Problems in American Democracy. Closely examines the various understandings of democracy, the arguments for and against democracy, and the progress of and prospects for democratic politics in the United States. Particular attention is paid to economic, social, and political developments in the United States that affect popular sovereignty, political equality, and liberty. Prereq., PSCI 1101. Restricted to juniors and seniors.

PSCI 4751-3. The Politics of Ideas. Examines theoretical arguments and case studies of interactions of ideas, interests, and institutions in policymaking. Analyzes processes through which ideas come to the public agenda, how institutional settings shape those ideas, and why some ideas and interests are more successful. Prereq., PSCI 1101. Restricted to juniors and seniors.

PSCI 4761-3. Rethinking Political Values. Encourages intellectual discipline and critical thinking by examining pressing political values from multiple analytic perspectives. Enables students to participate in oral and written discussions. Prereq., PSCI 1101. Restricted to juniors and seniors.

PSCI 4771-3. Civil Rights and Liberties in America. Implementation of rights and liberties in America. Examines fundamental issues of free speech, press, association, and religion along with rights to due process and equal protection under the law. Prereq., PSCI 2481. Restricted to juniors/seniors.

PSCI 4841 (1-3). Independent Study in American Politics. Subjects are chosen and arrangements are made to suit the needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. A special independent study approval agreement form must be obtained from the department. May be repeated up to 7 total credit hours. Prereq., PSCI 1101.

PSCI 6901 (3-6). Graduate Research Topic. Independent research in a topic of special interest. Arrangements are made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 8901.

PSCI 6951 (1-6). Master's Thesis. May be repeated up to 6 total credit hours.

PSCI 7011-3. Seminar: American Politics. Core field seminar for students of American politics. Course work emphasizes the diversity of contemporary research on American political history, political institutions, and political behavior. Restricted to graduate students or instructor consent required.

PSCI 7021-3. Latinos and U.S. Politics. Examines in depth the theoretical and empirical literature assessing the political situation and activities of Latinos (Mexican Americans, Puerto Ricans, Cuban Americans, and others) in the U.S. Stresses original research. Restricted to graduate students or instructor consent required.

PSCI 7031-3. Seminar: Political Attitudes and Behavior. Provides an intensive examination of topics in political attitudes and behavior such as political participation, ideology, voting, and elite behavior. Reviews methodology of behavioral research and introduces ICPSR data archive and computer-based research. Restricted to graduate students or instructor consent required.

PSCI 7051-3. Seminar: The United States Congress. Comprehensively examines literature and selected research topics concerning the United States Congress. Restricted to graduate students or instructor consent required.

PSCI 7071-3. Seminar: Behavioral Study of Public Law. Provides an intensive, critical examination of theoretical and substantive literature dealing with the behavior of the primary actors in the legal system—police, lawyers, judges, and citizens. Emphasizes empirical approach and quantitative methods. Requires

research papers. Restricted to graduate students or instructor consent required. Formerly PSCI 7077.

PSCI 7091-3. Politics of Social Movements. Examines theoretical and empirical research on American social movements. Emphasizes the role of movements as political actors and their ability to bring about changes in public policy and national political institutions. Restricted to graduate students or instructor consent required.

PSCI 7111-3. Seminar: American Political Institutions. Intensive examination of the structure and rules of different political institutions in the United States. Explores both the changing approaches to the study of American political institutions as well as many of the major research topics on the presidency, Congress, the judiciary, and the bureaucracy. Restricted to graduate students or instructor consent required.

PSCI 7121-3. Black Leadership and Public Policy. Examines the writings of African American political leaders, public policy critics, and politicians who have influenced black politics and society since 1900. Explores the ideas and leadership of W.E.B. Dubois, E. Franklin Frazier, Martin Luther King Jr., and others. Restricted to graduate students or instructor consent required.

PSCI 7141-3. The Political Economy of American Politics. Intensive examination of pluralist, voter-centered, rational choice, and neo-Marxist literature on the American state. Restricted to graduate students or instructor consent required.

PSCI 7151-3. American Subnational Politics and Government. Provides a comprehensive overview of the issues and literature concerning American "subnational" politics. Considers three bodies of literature: American federalism and intergovernmental relations, state politics, and urban/local politics. Also examines a number of policy issues. Restricted to graduate students or instructor consent required.

PSCI 7901 (1-3). Topics in Political Science. Not a free option; must be approved by the student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours.

PSCI 8901 (1-3). Graduate Research Topic. Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6901.

PSCI 8991 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Comparative

PSCI 2012-3. Introduction to Comparative Politics. Most countries confront a variety of common political problems, including how to gain popular support, what kinds of political institutions are most appropriate, and how to distribute burdens and benefits to different segments of the population. Concentrates on learning how to compare different political systems and provides illustrative examples from several countries in both the industrialized and nonindustrialized world. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 3022-3. Russian Politics. Examines the development of Russian politics from the late Soviet period to the present. Topics covered include political culture, democratic transition, economic reform, and social problems in Russia. Prereqs., PSCI 2012 or IAFS 1000.

PSCI 3032-3. Latin American Political Systems. Stresses different perspectives on Latin American politics and understanding key political actors and processes. Country focus varies. Prereq., PSCI 2012, IAFS 1000, IAFS major, Latin American studies major, or instructor consent. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 3042-3. Latin American Economic Development. Stresses political and economic development in Latin America, as well as interactions with the international economy. Prereq., PSCI 2012, IAFS 1000, or instructor consent. Recommended prereq., PSCI 3032.

PSCI 3052-3. Women and Politics in Latin America. Examines ways Latin American women have engaged in politics and their participation in social movements,

war, peace processes and elections. Focuses on why women "do politics" in certain ways, the role of the state in women's politics, the (dis)advantages of various political strategies, and how political, economic and social changes have affected women's political opportunities and interests. Prereq., WMST 2000 or instructor consent. Recommended prereqs., WMST 2400, 2600, 3600 or 3730. Restricted to sophomores/juniors/seniors. Same as WMST 3650.

PSCI 3062-3. Revolution and Political Violence. Studies and evaluates alternative theoretical frameworks for the analysis of revolution and political violence. Theoretical material is firmly couched in case situations, such as ethnic, class, colonial, urban, racial, and religious conflicts. Prereq., PSCI 1101, 2012, or IAFS 1000.

PSCI 3072-3. Government and Politics in Southeast Asia. Surveys historical and contemporary forces shaping politics in Southeast Asia. Gives special attention to comparative political economy, including development strategies and transitions to democracy. Prereqs., PSCI 2012 or IAFS 1000.

PSCI 3082-3. Political Systems of Sub-Saharan Africa. Analyzes post-independence and post-Cold War change in sub-Saharan Africa and provides intensive case studies of selected countries exemplifying each type with South Africa seen as a special case. Prereq., PSCI 2012 or IAFS 1000. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4002-3. Western European Politics. Comparatively analyzes development of the political systems and processes of European democracies. Emphasizes contemporary institutions, decision making patterns, and policy issues. Special attention to challenges of welfare systems. Prereq., PSCI 2012 or IAFS 1000. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4012-3. Global Development. Analyzes development theory, case studies in development strategies, and the problems and promises of development: specifically issues of gender, environment, labor, corruption and poverty. The primary focus is on explanations for variation in level of development over time and across countries. Prereq., PSCI 2012, ECON 2020, IAFS 1000, or one upper-division PSCI course. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4022-3. Chinese Foreign Policy. History of China's external relations and theories of foreign policy decision making. Explores two vital bilateral relations (Sino-U.S. and Sino-Japanese) and several key issues (like Taiwan) in China's 21st century foreign policy. Prereq., PSCI 2012.

PSCI 4052-3. Chinese Politics. Explores the politics of 20th century China to speculate on China's future in the 21st century. Begins with an extensive look at the political history of the People's Republic, before turning to social, cultural, economic, and political issues today. Concludes with an examination of Chinese foreign policy, with a focus on Sino-American relations. Prereq., PSCI 2012 or IAFS 1000.

PSCI 4062-3. The Emerging Democracies of Central and Eastern Europe. Studies developments in the former Soviet satellites and Yugoslavia, their governmental organizations, and their relation to the former Soviet Union and the West. Prereq., PSCI 2012 or IAFS 1000. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4092-3. Comparative Urban Politics. Comparatively analyzes major urban systems in different political/economic settings and Third-World countries. Gives special attention to political and economic factors shaping urbanization processes and distinctive policy issues in these different settings. Prereqs., PSCI 1101 and 3071 recommended.

PSCI 4122-3. The Military in Politics: Latin America and the U.S. Analyzes the causes and consequences of military intervention in politics, contrasting patterns of civil-military relations, and the problem of democratic control of the armed forces. Focuses on the Latin American military, with secondary attention to U.S. military. Prereq., PSCI 2012 or IAFS 1000, and PSCI or ROTC major.

PSCI 4252-3. Politics of Ethnicity and Nationalism. Analyzes ethnic identity as a factor in contemporary politics. Deals extensively with the role of ethnic groups in political mobilization, the development of national collective consciousness, nation building, and international relations. Explores the influence of religion, language, history, culture and class on ethnic group formation and behavior. Prereq., PSCI 2012.

PSCI 4272-3. The Political Economy of Advanced Industrial Democracies. Considers how political power is used to achieve economic ends and to shape the operations of market economies. Focuses on economic conflicts as political contests, and explores how politics shapes the course of economic development

as well as the basis of social and political life. Prereq., PSCI 2012 or IAFS 1000. Recommended prereq., ECON 2020. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4282-3. Legal Systems. Compares criminal justice systems around the world in order to see how each functions and how each system reflects political and historical traditions, including the civil law tradition that dominates Europe and South America, the common law system that exists in the United States and in most English-speaking countries, and the criminal justice system in Japan. Prereq., PSCI 2012.

PSCI 4302-3. European Union Politics. Explores the development, functioning, focus and future of the European Union. Examines history, institutions, policies and politics as well as governance theories that have been developed to explain origins and evolution of the EU. Prereq., PSCI 2012.

PSCI 4732-3. Critical Thinking in Development. Exposes students to current issues in the political economy of development. Subjects range from globalization, democratization, and economic development. Specifically, the course explores the international and domestic determinants of economic development with special reference to currency markets, foreign direct investment, trade, and democratization. Prereqs., PSCI 2012 or IAFS 1000, ECON 2010 and 2020, and one upper-division PSCI course. Same as INVS 4302. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4792-3. Issues in Latin American Politics. Studies several Latin American countries in some depth including history and contemporary politics. Teaches students to listen to and evaluate different sides of political controversies, and critically evaluate arguments. Prereqs., PSCI 2012 or IAFS 1000, and junior or senior standing.

PSCI 4842 (1-3). Independent Study in Comparative Politics. Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department. May be repeated up to 7 total credit hours. Prereq., PSCI 2012 or IAFS 1000.

PSCI 6902 (1-3). Graduate Research Topic. Guides independent research on a topic of special interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 8902.

PSCI 6952 (1-6). Master's Thesis. May be repeated up to 6 total credit hours.

PSCI 7002-3. Seminar in West European Politics. Examines West European politics in terms of general theories of comparative politics, including institutional, behavioral and political economy approaches. Restricted to graduate students or instructor consent required.

PSCI 7012-3. Seminar: Comparative Political Systems. Discusses current literature on comparative politics including theoretical and methodological issues. Restricted to graduate students or instructor consent required.

PSCI 7022-3. Seminar in Political and Economic Development. Covers domestic political and economic development in Latin America, Africa, and Asia, as well as interactions with the global economy. Includes defining, explaining, and prescribing policies for successful development, and comparing the experiences of developing and industrialized countries. Restricted to graduate students or instructor consent required.

PSCI 7032-3. Seminar: Latin American Politics. Stresses intensive study of the political process in Latin America with special emphasis on democratization. Restricted to graduate students or instructor consent required.

PSCI 7052-3. Democracy and Authoritarianism. Examine differences between democracies and authoritarian regimes; the choices and the consequences of democratic institutions in authoritarian regimes; and the causes of authoritarian survival and demise and the subsequent political choice. Recommended prereq., PSCI 7012. Restricted to graduate students or instructor consent required.

PSCI 7062-3. The Politics of Ethnicity. Explores the political aspects of pluralism, ethnonationalism, separatism, and related phenomena. Examines theories of ethnic mobilization, conflict, and accommodation in the context of political development and nation building. Includes cross-polity comparisons and case studies

of multiethnic societies in the developed and developing world. Prereq., at least one course in comparative politics. Restricted to graduate students or instructor consent required.

PSCI 7082-3. Subordinate Protest and Democratization. Considers traditional studies of democratic development and democratization. Topics covered include the definition of democracy, characteristics, dilemmas, and limitations; the classical European view of democratization; democratic and nondemocratic characteristics of different social classes; contributions to democracy made by the popular classes; and transitions to democracy and subordinate groups and protest in the democratization process. Restricted to graduate students or instructor consent required.

PSCI 7092-3. Comparative Human Rights and Repression. Provides students with an understanding of human rights and repression in a comparative perspective. Deals extensively with conceptual issues, theoretical explanations, and diverse techniques of studying the subject. Restricted to graduate students or instructor consent required.

PSCI 7112-3. Seminar: Comparative Political Parties and Interest Groups. Critically examines topics relating to social forces, parties, and interest groups. Analyzes concepts, theories, and case studies with particular emphasis on Western political systems. Also examines party systems in comparison and the role of groups and the determinants of group politics. Restricted to graduate students or instructor consent required.

PSCI 7132-3. Comparative Political Economy. Explores the relationship between economics and politics in developed and developing countries. Gives students an historical overview of 20th century economic trends and covers scholarly approaches to topics such as political and economic institutions, economic ideas and interests, the political causes of growth and equality, globalization and the welfare state, and varieties of capitalism. Recommended prereq., PSCI 7012. Restricted to graduate students.

PSCI 7142-3. The Political Economy of the Democratic Welfare State. Advanced seminar that examines the structure of political and economic relations in several advanced democracies. Specifically examines a series of historical, institutional, and cultural theories that purport to explain these differences. Restricted to graduate students or instructor consent required.

PSCI 7152-3. Seminar in Chinese Politics. A comprehensive introduction to the study of Chinese politics is provided. It begins with China's revolutionary heritage, before turning to state-society relations in China today. Concludes with China's external relations. Will China be a status quo or a revisionist power in the 21st century? Restricted to graduate students or instructor consent required.

PSCI 7902 (1-3). Topics in Political Science. Not a free option; must be approved by the student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours.

PSCI 8902 (1-3). Graduate Research Topic. Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6902.

PSCI 8992 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

International Relations

PSCI 2223-3. Introduction to International Relations. Introduces the field of international relations, with general survey of the theories, histories, and problems of historical and contemporary relations among state and nonstate actors. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 3123-3. War, Peace, and Strategic Defense. Analyzes employment, or the threat of employing force, in securing American interests in the post-Cold War world. Gives special attention to utilities claimed for nuclear weapons, and alternatively, to weapons control and disarmament. Prereq., PSCI 2223.

PSCI 3143-3. Problems in International Relations. Analyzes the various theoretical and policy challenges facing the post-Cold War world, with an emphasis on examining alternative conceptions of and approaches to such challenges. Pre-

req., PSCI 2223. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 3163-3. American Foreign Policy. Examines foundations, assumptions, objectives, dynamics, and methods of U.S. foreign policy since WW II. Gives special attention to domestic and external problems of adapting U.S. policy to the changing world environment. Prereq., PSCI 2223. Approved for arts and sciences core curriculum: United States context.

PSCI 3193-3. International Behavior. Presents alternate theoretical frameworks for the explanation of international processes. Applies theories of conflict behavior and social organization to problems of war and peace. Prereq., PSCI 2223.

PSCI 4173-3. International Organization. Analyzes international organizations to determine whether they are an effective instrument for achieving peace and security and for the promotion of human welfare. Prereq., PSCI 2223.

PSCI 4183-3. International Law. Investigates the body of law that regulates relations between nation states and provides a framework for the solving of common problems. Explores its nature and effectiveness as well as its adaptability to a changing environment. Prereq., PSCI 2223.

PSCI 4193-3. International Political Economy. Analyzes issues at the intersection of international politics and international economics. Utilizes theories and concepts from both economics and political science to understand issues in trade, finance, development and migration. Prereq., PSCI 2223. Recommended prereq., ECON 1000.

PSCI 4213-3. Europe in the International System. Covers European and Atlantic regionalism. Discusses such communities as the Council of Europe, NATO, EFTA, and OECD, and provides a detailed examination of the European Union. Looks at theories of integration, problems of partnership and interdependence, rival nationalisms and strategic doctrines, and problems of the post-Cold War era. Prereq., PSCI 2223.

PSCI 4703-3. Alternative World Futures. Aims to help students think about the future of the world in a systematic way. Focuses on alternative projections and policies dealing with major problems. Prereq., PSCI 2223 and junior or senior standing.

PSCI 4783-3. Global Issues. Studies the principal issues confronting humanity that affect stability and survivability and their economic, social, and political implications. Prereq., PSCI 2012 or 2223. Restricted to seniors.

PSCI 4843 (1-3). Independent Study in International Relations. Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall average of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department. May be repeated up to 7 total credit hours. Prereq., PSCI 2223.

PSCI 6903 (1-3). Graduate Research Topic. Independent research in a topic of special interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 8903.

PSCI 6953 (1-6). Master's Thesis. May be repeated up to 6 total credit hours.

PSCI 7013-3. Seminar: International Relations. Reviews salient literature on international relations, and subsequent presentation and critical discussion of analytical studies. Allows students wide latitude in substantive and methodological approaches. Emphasizes changing trends and efforts to understand the bases for cooperation and conflict. Restricted to graduate students or instructor consent required.

PSCI 7023-1. Foreign Policy. Examines sources of foreign policy in terms of international pressures, economic interests, bureaucratic politics, cognitive process, public opinion, elections, congress, and presidential leadership. Examines uses and limitations of economic statecraft, military intervention, and current foreign policy issues. Recommended prereq., PSCI 7013.

PSCI 7043-3. Seminar: Problems of International Organization. Studies selected problems concerning administration and operation of public international organizations, including the United Nations and its specialized agencies. Considers decision making, executive leadership, internal organization, personnel policies, coordination of activities, and financing. Restricted to graduate students or instructor consent required.

PSCI 7053-3. War and Peace. Provides systematic treatment of theories, concepts, and data addressing the conditions and processes of international conflict, violence, and stability, with attention to historical and contemporary cases. Restricted to graduate students or instructor consent required.

PSCI 7073-3. Seminar: Global Political Economy. Introduces graduate students to concepts, theories, and data used to study the global system from a political-economic framework. Examines world systems analysis, regime change theory, and dependency theory with respect to operation of the exchange and power relationship within the contemporary world system. Restricted to graduate students or instructor consent required.

PSCI 7113-3. Advanced Readings in International Relations. Provides an advanced readings course for international relations graduate students. Acts as a capstone course for those preparing to take the PhD comprehensive exams, and is intended to provide in-depth knowledge about core areas of international relations scholarship. Prereq., PSCI 7013. Restricted to graduate students or instructor consent required.

PSCI 7123-3. Seminar: Conflict Behavior: The Politics of Violence. Surveys historical, theoretical, and empirical analyses of violent conflict behavior, including causes and consequences of riots, terrorism, revolution, international war, and intervention. Restricted to graduate students or instructor consent required.

PSCI 7333-3. Globalization and Democratization: An Introduction. Introduces research on globalization and democratization from an interdisciplinary perspective. Examines ongoing interdisciplinary research on the global political economy. Students learn about ongoing research, critique current efforts, and design their own research project. Prereq., graduate standing in PSCI, ECON, GEOG, or SOCY. Same as GEOG 5332, SOCY 6031, and ECON 8333.

PSCI 7903 (1-3). Topics in Political Science. Not a free option; must be approved by the student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours.

PSCI 8903 (1-3). Graduate Research Topic. Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6903.

PSCI 8993 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Political Theory

PSCI 2004-3. Survey of Western Political Thought. Studies main political philosophies and political issues of Western culture, from antiquity to 20th century. Approved for arts and sciences core curriculum: ideals and values.

PSCI 3054-3. American Political Thought. Highlights the development of American political theories and ideas from colonial period to present. Can also be taken for American field credit. Recommended prereq., PSCI 2004. Approved for arts and sciences core curriculum: United States context or ideals and values.

PSCI 3064-3. Environmental Political Theory. Examines environmental discourses as conceptual means for theorizing environmental politics, and applies normative political theories to contemporary environmental policy issues. Considers the roles of political actors (individuals, groups, the state) in defining and addressing environmental problems on local, national, and global levels. Recommended prereq., PSCI 2004. Approved for arts and sciences core curriculum: ideals and values.

PSCI 3074-3. Dimensions of Citizenship in the U.S. and the EU. Studies theories and problems related to citizenship in the U.S. and the EU. This includes rights and restrictions of citizenship, issues of immigration, multicultural citizenship, globalization and citizenship. In the EU the relation between member nation citizenship and EU citizenship is a special problem. Examines how the U.S. and EU compare. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4024-3. Senior Seminar in Political Theory. Intensively analyzes and discusses major theories and issues of both contemporary political thought and the history of political philosophy. The topic is announced by the instructor, but might include analysis of concepts (justice, human rights, democracy, etc.) or major theories. Emphasizes advanced discussion plus individual research. Prereq., PSCI 2004.

PSCI 4704-3. Politics and Language. Explores the use of language in politics. Examines in depth the political nature and meaning of language, including its significance, philosophy, and practice. Prereq., PSCI 2004. Restricted to juniors or seniors. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4714-3. Liberalism and Its Critics. Examines contemporary arguments for and against liberalism. Focuses on the analysis, evaluation, and understanding of the philosophical contributions to this debate. Gives special attention to the concepts of justice, freedom, equality, and individualism. Prereq., PSCI 2004. Restricted to juniors and seniors.

PSCI 4734-3. Politics and Literature. Broadly examines political topics as they are presented in important literary works and analyzes the possibilities involved in using the literary mode to present political teachings. Prereq., PSCI 2004. Restricted to juniors and seniors.

PSCI 4774-3. Liberal Democracy and the First Amendment. Examines in depth various philosophical and legal justifications of First Amendment rights of speech, press, association, and religion. Assesses these justifications in relation to broader normative theories of liberal democracy. Prereq., PSCI 2004. Recommended prereq., PSCI 2481. Restricted to juniors/seniors.

PSCI 4844 (1-3). Independent Study in Political Theory. Subjects and arrangements suit individual student needs. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department. May be repeated up to 7 total credit hours. Prereq., PSCI 2004.

PSCI 6904 (1-3). Graduate Research Topic. Independent research in a topic of special interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 8904.

PSCI 6954 (1-6). Master's Thesis. May be repeated up to 6 total credit hours.

PSCI 7004-3. Seminar: Political Theory. Allows for intensive research in and presentation of selected topics. Introduces students to the broad context within which political ideas arise. Deals with classical and modern thought. Restricted to graduate students or instructor consent required.

PSCI 7024-3. Seminar: Selected Political Theories. Familiarizes students with selected political philosophies or theories in classical or modern political thought. Restricted to graduate students or instructor consent required.

PSCI 8904 (1-3). Graduate Research Topic. Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6904.

PSCI 8994 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Empirical Theory and Research Methodology

Many of the following courses have controlled enrollment by application. Please check with the department office in Muenzinger D243 for further information.

PSCI 2075-3. Quantitative Research Methods. Introduces quantitative research methods used in political science. Focuses on basic tools of analysis: data collection, processing, and evaluation, with special attention to survey techniques. Includes elite and case study analysis; aggregate, cluster, and content analysis; and the use of computers in political research. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

PSCI 3105-3. Designing Social Inquiry: An Introduction to Analyzing Political Phenomena. This course is designed to survey the wide range of research designs and methods employed in political science research, including normative analysis, interpretive analysis and causal analysis. It will provide an introduction to students planning to write honors theses and will be useful for any student

planning to do research in political science as part of a senior seminar or capstone course. Restricted to sophomores and juniors only. Approved for arts and sciences core curriculum: quantitative reasoning and mathematics.

PSCI 3225-3. Rationality, Democracy, and Public Policy. Focuses on the rational choice approach to understanding social decision making. Examines possibilities for choosing rational courses of social action and concrete problems of rational decision making. Prereqs., PSCI 1101 or 2012. Restricted to sophomores/juniors/seniors.

PSCI 4715-3. Honors Political Science Seminar. Involves writing and discussion of selected topics in political science. Critically reviews the major methodological and conceptual features of the discipline. Students begin their honors papers in the seminar. Prereq., GPA of at least 3.500. Generally offered in fall term only.

PSCI 6905 (1-3). Graduate Research Topic. Independent research in a topic of special interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 8905.

PSCI 6955 (1-6). Master's Thesis. May be repeated up to 6 total credit hours.

PSCI 7055-3. Introductory Game Theory. Develops competence in engaging formal theories of politics and in constructing and solving basic game-theoretic models of political behavior. Restricted to graduate students or instructor consent required.

PSCI 7075-3. Introduction to Professional Political Science. Introduces graduate students to intellectual foundations and historical development of political science; epistemologies, subfields, intellectual approaches, methodological strategies of the discipline; and ethics and norms of professional conduct. Restricted to graduate students or instructor consent required.

PSCI 7085-4. Introduction to Political Science Data Analysis. Provides intensive experience with quantitative techniques commonly employed in political science research; builds on a review of multivariate regression, inferential statistics, and causal modeling. Students undertake substantive research projects, requiring lab instruction in the use of the computer in quantitative applications of political science research. Prereq., graduate standing.

PSCI 7095-3. Advanced Political Data Analysis. Provides advanced training in empirical and analytic methods of political analysis. Covers general multivariate linear (regression) model as employed in political science. Also covers a variety of dynamic approaches to empirical analysis (stochastic models, time series, and simulation). Restricted to graduate students. Prereq., instructor consent.

PSCI 7115-3. Qualitative Methods. Develop proficiency in constructing research designs with qualitative methods. The goal is to understand and be able to justify research designs involving relatively small numbers of observations as good political science given the fact that such designs may limit our ability to generalize. Restricted to graduate students or instructor consent required.

PSCI 7145-3. Basic Formal Methods in Political Science. Introduces the application and role of models in political science (domestic and international politics), in areas such as voting, committees, power, decision making, and war and peace. Models include applications of set theory, elementary probability, games, and systems analysis. Restricted to graduate students or instructor consent required.

PSCI 7175-3. Dissertation Seminar. Help students make progress towards (1) in the short term: focusing in on a dissertation topic, crafting a dissertation prospectus, and identifying potential funding sources; and (2) in the long term: sending papers out for review, developing a package for the job market, and understanding the academic job market and the tenure process.

PSCI 7905 (1-3). Topics in Political Science. Not a free option; must be approved by the student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours.

PSCI 8905 (1-3). Graduate Research Topic. Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6905.

PSCI 8995 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Public Policy

PSCI 2106-3. Introduction to Public Policy Analysis. Studies policymaking processes in American government, factors shaping public decision, and issues and questions relevant to political inquiry.

PSCI 3206-3. The Environment and Public Policy. Considers constitutional, political, and geographic factors in development of public policy affecting the use of natural resources and management of the environment; organization, procedures, and programs for use of natural resources; and administration of environmental policies. Prereq., PSCI 1101. Restricted to sophomores/juniors/seniors.

PSCI 4716-3. Selected Policy Problems. Integrates general principles of policy inquiry with documents and other literature on specific problems in public policy, in order to evaluate courses of action. May be repeated up to 6 total credit hours on different topics. Prereq., PSCI 1101. Restricted to juniors and seniors.

PSCI 6906 (1-3). Graduate Research Topic. Provides the opportunity for independent research in topic of interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 8906.

PSCI 6956 (1-6). Master's Thesis. May be repeated up to 6 total credit hours.

PSCI 7016-3. Introduction to the Policy Sciences. Provides an introduction to the policy sciences as a distinctive tradition within the policy field. Emphasizes the use of conceptual tools to improve analysis of complex problems. Teaches problem solving framework that students apply to an issue of their choice. Restricted to graduate students or instructor consent required. Same as ENVS 5710.

PSCI 7026-3. The Problem Orientation. Teaches basic problem solving framework for policy analysis. Emphasizes applications to develop policy recommendations for issues selected by students. Includes group projects. Restricted to graduate students or instructor consent required. Same as ENVS 5720.

PSCI 7036-3. Introduction to the Policy Sciences: The Decision Process. Provides policy sciences frameworks for analyzing policy processes and designing political strategies to influence those processes in the direction of the preferred alternative. Emphasizes applications to problems selected by students for term projects. Restricted to graduate students or instructor consent required. Same as ENVS 5730.

PSCI 7046-3. Seminar: Urban Public Policy. Focuses on formulation, revision, and outcomes of public policy in American urban communities. Also uses some comparative Canadian and European literature. Restricted to graduate students or instructor consent required.

PSCI 7056-3. Readings in Public Policy. Explores diverse approaches to policy choice, change, and learning processes. Overviews literature on policy determinants and typologies, policy subsystems, innovation and diffusion, agenda setting, implementation, problem definition and social construction, policy design, institutional analysis, and policy and democratic values. Restricted to graduate students or instructor consent required.

PSCI 7116-3. Context-Sensitive Research Methods. Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies, and textual analyses. Restricted to graduate students or instructor consent required. Same as ENVS 5740.

PSCI 7906 (1-3). Topics in Political Science. Not a free option; must be approved by the student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours.

PSCI 8906 (1-3). Graduate Research Topic. Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6906.

PSCI 8996 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

General

PSCI 1978-3. Legal Rights of Students. Focuses on educational law and legal rights of students. Restricted to students in the Sewall Residential Academic Program.

PSCI 2028-3. Special Topics. Offers subjects not covered by existing courses. Offered when department approves a special topic. May be repeated up to 12 total credit hours for different topics.

PSCI 4008-3. Political Science Honors Thesis. Involves writing an honors thesis. Prereq., PSCI 4718.

PSCI 4028-3. Special Topics. Offers subjects not covered by existing courses. Offered when the department approves a special topic. May be repeated up to 12 total credit hours for different topics.

PSCI 4848 (1-3). Independent Study. Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall average of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department. May be repeated up to 7 total credit hours.

PSCI 4938 (3-6). Internship in Government. With instructor's assistance, students secure an internship with a political or governmental organization. In addition to the internship, the class consists of regular seminars, course readings and assignments, and individual conferences with the instructor. Student pursues an academic research project and writes an original research paper. Instructor approval required in semester preceding internship. Contact instructor prior to early registration. Prereq., PSCI 1101.

PSCI 6908 (1-3). Graduate Research Topic. Same as PSCI 8908.

PSCI 6948-1. Master's Degree Candidate.

PSCI 7008-1. Teaching Political Science 1. First of two courses designed to prepare graduate teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline-specific education. Restricted to graduate students or instructor consent required.

PSCI 7028-1. Teaching Political Science 2. Second course designed to train graduate teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline specific education. Prereqs., PSCI 7008 and completion of comprehensive examinations.

PSCI 7108 (1-3). Special Topics. Various topics not normally offered in the curriculum. Topics vary each semester. May be repeated up to 9 total credit hours.

PSCI 7908 (1-3). Topics in Political Science. Not a free option; must be approved by the student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours.

PSCI 8908 (1-3). Graduate Research Topic. Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6908.

Psychology and Neuroscience

Introductory

PSYC 2700-3. Psychology of Contemporary American Women. Surveys psychological theory and research concerning contemporary American women. Deals with such issues as masculine bias in American culture, sex difference in cognitive functioning and personality, psychological conflict for women between career and home, and specific areas pertaining to women's mental health. Prereq., PSYC 1001 or WMST 2000. Same as WMST 2700. Approved for arts and sciences core curriculum: human diversity.

PSYC 4220-3. Language and Mind. Studies processes of perceiving speech, interpreting it as meaningful, and expressing intentions to communicate as utterances. Emphasizes roles of the brain and of perceptual and motor systems.

Writing, gestural, and animal communicative systems also are treated. Prereqs., PSYC 1001 and LING 2000. Same as LING 4220.

PSYC 4560-3. Language Development. Examines the development of language in childhood and into adult life, emphasizing the role of environment and biological endowment in learning to communicate with words, sentences, and narratives. Prereqs. or coreqs., PSYC 1001 and LING 2000. Same as LING 4560 and SLHS 4560.

PSYC 4700-3. Women and Mental Health. Examines mental health issues of women by focusing on theories of female personality development. Explores theory and research pertaining to women and psychopathology and to women as patients in traditional and nontraditional forms of treatment. Prereq., PSYC 2700, WMST 2000, or WMST 2700. Same as WMST 4700.

PSYC 4740-3. Biology of Amphibians and Reptiles. Focuses on comparative morphology, taxonomy, ecology, behavior, and geographic distribution of amphibians and reptiles. Prereqs., EBIO 1210, 1220, 1230, and 1240; or PSYC 1001, 2012. Same as PSYC 5740 and EBIO 4740.

PSYC 5200-3. Physiological Genetics and Genomics. Introduces genetic and genomic concepts as they apply to mammalian physiology. The course covers fundamental concepts and methods in molecular genetics and genomics and their applications towards understanding the role of genetics in the normal and pathological function of physiological systems. Same as LPHY 5200.

PSYC 5300-3. Research in Psycholinguistics. After a general introduction to issues and research methods in psycholinguistics (language production and comprehension, language and cognition, language acquisition), several major current research topics, such as models of speech production, and theories of brain specialization for language, are explored. Prereq., instructor consent. Same as LING 5300.

PSYC 5740-3. Biology of Amphibians and Reptiles. Same as PSYC 4740, EBIO 5740.

PSYC 6200-3. Issues and Methods in Cognitive Science. Same as CSCI 6402, EDUC 6504, LING 6200, PHIL 6310.

General

PSYC 1001 (3-4). General Psychology. Three hours lec. and one hour rec. per week. Surveys major topics in psychology: perceptions, development, personality, learning and memory, and biological bases of behavior. Students may participate as subjects for several hours in ongoing research. Meets MAPS requirement for social science: general.

PSYC 2841 (1-3). Independent Study (Lower Division). May be repeated up to 6 total credit hours. Pass/fail only. Prereq., freshman or sophomore standing. Restricted to psychology majors.

PSYC 3001-4. Honors Research Methods Seminar. Focuses on research design. Each student prepares an original, detailed research proposal, which can become the honors thesis. Open only to students who have been accepted into the psychology departmental honors program. Prereq., instructor consent.

PSYC 3101-4. Statistics and Research Methods in Psychology. Three hours of lecture and one two-hour lab per week. Introduces descriptive and inferential statistics and their roles in psychological research. Topics include correlation, regression, T-test, analysis of variance, and selected nonparametric statistics. Prereq., MATH 1011 or equivalent.

PSYC 4001-3. Honors Seminar 2. Surveys contemporary issues, explores current controversies, and examines in detail selected topics in psychology. Open to juniors and seniors in the department's honors program. Prereq., instructor consent.

PSYC 4011 (1-6). Senior Thesis. Critically reviews some aspect of psychological literature, scholarly analysis of a major psychological issue, and/or empirical research project. See the psychology honors director for further information. May be repeated up to 6 total credit hours.

PSYC 4511-3. History of Psychology. Includes outline of development of psychological theories since the Greek philosophers, the story of experimental psychology and its problems, and schools of psychological thinking. Students read original sources in English and English translations. Restricted to juniors or seniors only.

PSYC 4521-3. Critical Thinking in Psychology. Allows students to expand their powers as they think about psychological problems, or about how psychological knowledge and techniques can be applied to pressing political, economic,

biological, quantitative, and social issues. Encourages intellectual discipline and critical thinking about concepts and ideas; enables students to participate in oral and written discussion. Restricted to psychology seniors. May not be repeated, only 3 credit hours allowed.

PSYC 4541 (1-6). Special Topics in Psychology. Studies and analyzes special interest topics from the broad and diversified field of psychology. Particular section content is determined by instructor. May be repeated up to 6 total credit hours, provided the topics vary. Restricted to juniors and seniors. Same as PSYC 5541.

PSYC 4841 (1-6). Independent Study (Upper Division). Pass/fail only. May be repeated up to 8 total credit hours. Prereq., junior or senior standing. Restricted to psychology majors.

PSYC 4911-3. Teaching of Psychology. Students receive concrete experience in teaching general psychology under supervision of a psychology faculty member. Alternative pedagogical strategies are discussed. Students must submit an application to the undergraduate advising center.

PSYC 4931-3. Field Placement Internship. Offers valuable volunteer experience through a supervised field placement. Provides hands-on insight into the decisions and issues that confront professionals in psychology and related fields. Prereqs., completion of 15 or more hours of psychology course work. Restricted to psychology majors.

PSYC 5541 (1-6). Special Topics in Psychology. Same as PSYC 4541.

PSYC 5741-4. General Statistics. Surveys probability and statistics in psychology. Instructor consent required.

PSYC 5751-4. General Statistics. Continuation of PSYC 5741. Instructor consent required.

PSYC 6841 (1-3). Independent Study. May be repeated up to 7 total credit hours. Prereq., graduate standing.

PSYC 6911 (1-3). Research Practicum.

PSYC 6941-1. Master's Degree Candidate. May be repeated up to 7 total credit hours.

PSYC 6951 (1-6). Master's Thesis. May be repeated up to 7 total credit hours.

PSYC 7291-3. Multivariate Analysis. Familiarizes students with scientific concepts, matrix theory, and computer techniques of multivariate analyses for psychological research. Topics include cluster and factor analysis, multiple regression, and discriminant functions. Emphasizes research technology rather than mathematical theory. Instructor consent required.

PSYC 8991 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Biological

PSYC 2012-3. Biological Psychology 1. Surveys biological bases of learning, motivation, emotion, sensory processes and perception, movement, comparative animal behavior, sexual and reproductive activity, instinctual behavior, neurobiology of language and thought, and neurophysiology and neuroanatomy in relation to behavior. Prereq., PSYC 1001. Approved for arts and sciences core curriculum: natural science.

PSYC 2022-3. Biological Psychology 2. Continuation of PSYC 2012. Integrates knowledge and facts presented in PSYC 2012 into current topics in biopsychology. Course no longer taught after fall 2003, except through Continuing Education correspondence. Prereq., PSYC 2012.

PSYC 3102-3. Behavioral Genetics. Inheritance of behavioral characteristics. Prereq., PSYC 3101.

PSYC 4112-3. Behavioral Genetics Laboratory. Provides laboratory experience in behavioral genetics. Students train in one or more aspects of data collection and interpretation, read research papers, contribute nine hours per week to a research project in behavioral genetics, and write a report. Prereq., PSYC 3102 or 4102.

PSYC 5052-4. Behavioral Neuroscience. Intensive survey of the morphological, neurochemical, and physiological aspects of behavior. Prereqs., PSYC 2012–2022

or EBIO 1210–1220, or CHEM 1111–1131, or PHYS 1010–1020, or PHYS 2010–2020. Same as NRSC 4052/5052.

PSYC 5082 (2-3). Seminar: Biological Psychology. Special topics concerning biological bases of behavior. Prereqs., PSYC 4052 and instructor consent.

PSYC 5102-2. Behavioral Genetics. Instructor consent required.

PSYC 5112-3. Concepts in Behavioral Genetics. Examines selected topics in greater detail than is possible in the comprehensive undergraduate course in behavioral genetics (PSYC 3102). Topics covered may include inheritance of behavioral characteristics from perspectives of pharmacogenetics, transmission genetics, biochemical genetics, and evolutionary genetics. May be repeated up to 9 total credit hours. Instructor consent required.

PSYC 5122-3. Quantitative Genetics. Surveys principles of genetics of quantitative characteristics. Topics include gene frequencies, effects of mutation, migration, and selection. Also looks at correlations among relatives, heritability, inbreeding, crossbreeding, and selective breeding.

PSYC 5132-3. Neuropharmacology. May be repeated up to 6 total credit hours. Same as PSYC 4132.

PSYC 5232-2. Molecular Genetics and Physiology. Covers fundamental mechanisms of gene action, including genome structure and regulation of gene expression. Discusses molecular techniques used to examine human genetic diseases. Emphasizes genetic diseases with behavioral, neurologic, and physiologic abnormalities. Prereq., IPHY/PSYC 5200 or instructor consent. Same as IPHY 5232.

PSYC 5242-3. Biometrical Methods in Behavioral Genetics. Studies development of structural models appropriate to behavioral genetics and the estimation procedures necessary for their application. Instructor consent required.

PSYC 5262-3. Mammalian Neuroanatomy. Covers microscopic anatomy and function of different brain regions. Emphasizes correlation between structure and function, particularly at cellular and synaptic level. Course includes brain dissection, description of neuroanatomical and neurohistological techniques, and an introduction to the ultrastructure of neurons. Prereqs., PSYC 4052, NRSC 4052, or MCDB 4190, and instructor consent.

PSYC 7012 (1-3). Research in Behavioral Genetics. Individual research projects. May be repeated up to 7 total credit hours.

PSYC 7102-2. Seminar: Behavioral Genetics. Intensive study of selected topics in behavioral genetics. Emphasizes recent research. Attention to both human and animal studies. May be repeated up to 8 total credit hours. Prereq., instructor consent.

Clinical

PSYC 2303-3. Psychology of Adjustment. Surveys concepts bearing upon processes of normal psychological adjustment, with emphasis on using the concepts to understand common human problems in personal growth and relationships with others.

PSYC 2643-3. Child and Adolescent Psychology. Surveys major psychological processes of childhood and adolescence. Prereq., PSYC 1001.

PSYC 3313-4. Psychopathology. Three hours lec. and two hours rec. per week. Analyzes major theories of personality and behavioral disorders. Restricted to junior and senior PSYC majors. Prereq. PSYC 1001 or instructor consent. Credit not granted for this course and PSYC 4303.

PSYC 4303-3. Abnormal Psychology. Examines borderline disorders as extreme variations of the normal personality. Focuses on major functional and organic disorders, theories of mental disorders, and methods of psychotherapy. Prereq., PSYC 1001. Credit not granted for this course and PSYC 3313.

PSYC 4443-4. Research Methods in Clinical Psychology. Learn to evaluate research methods as they relate to etiology, assessment, and intervention of psychological disorders. Emphasizes the importance of using sound methodological strategies in both research and clinical settings. Three lectures, one lab per week. Prereqs., PSYC 1001, 3101, and 3313 or 4303.

PSYC 4713-3. Survey of Clinical Psychology. Covers theories and practices relating to problems of ability and maladjustment. Diagnostic procedures and treatment methods with children and adults. Prereq., PSYC 3313 or 4303. Open to majors only.

PSYC 4733-4. Psychological Testing and Assessment. Provides an overview of issues central to testing and assessment of psychological constructs, including types of evaluation instruments currently in use in the field, their applications, and design. Prereqs., PSYC 1001 and 3101.

PSYC 5423-3. Research Problems in Clinical Psychology. Examines research issues relevant to the field of clinical psychology and mental health for the purpose of developing familiarity with substantive and methodological problems facing the field. Prereq., instructor consent.

PSYC 5433-3. Adult Psychopathology. Intensively surveys major theories, research findings, and behavioral characteristics associated with deviant reaction patterns. Prereq., instructor consent.

PSYC 5453-3. Developmental Psychopathology. Prereq., instructor consent. Restricted to graduate psychology majors.

PSYC 7503-3. Developmental Child Clinical Assessment. Provides clinical psychology students with a theoretical understanding and skills to conduct a comprehensive review of psychological and developmental functioning. Includes assessment from a variety of sources and contexts, including testing. Prereq., PSYC 5453 and enrollment in the clinical psychology graduate program.

PSYC 7653-3. Child Psychotherapy. The second semester in this year-long course builds upon concepts in PSYC 5453 to explore the theoretical and empirical bases for understanding child psychopathology and intervention. Prereq., PSYC 5453 and instructor consent.

PSYC 7663-1. Intellectual Assessment Laboratory. Practice administration of common intellectual tests. Prereq., instructor consent. Coreq., PSYC 7683. Restricted to clinical psychology graduate students.

PSYC 7673-3. Adult Psychotherapy. Discusses selected topics in the field of psychotherapy, including content consideration and pertinent research. Topics vary from semester to semester. Prereq., instructor consent.

PSYC 7683 (1-3). Intellectual Assessment, with Practicum, in Clinical Psychology. Focuses on administering and interpreting objective test results commonly used in clinical psychology practice. Probable inventories used are MMPI, SCII, WISC, WAIS, plus other objective measures where relevant. Includes case study approach and direct clinical experience. May be repeated up to 8 total credit hours. Prereq., instructor consent.

PSYC 7693-3. Personality Measurement. Covers theory and practice primarily in areas of individual personality testing. Involves intensive field work and report writing. Prereq., instructor consent.

PSYC 7703-3. Seminar: Clinical Psychology. Offers selected topics in the area of clinical psychology. May be repeated up to 12 total credit hours. Prereq., instructor consent.

PSYC 7713 (1-3). Practicum in Clinical Psychology. Provides direct clinical experience for PhD candidates in clinical psychology only. May be repeated up to 18 total credit hours.

PSYC 7773-3. Professional Issues and Ethics in Prevention and Intervention. Focuses on ideographic study of attitudes, values, and personality characteristics of individuals using data obtained from personal interviews. Covers theory and practice of various interviewing approaches. Open to PhD candidates in clinical psychology only.

Developmental

PSYC 4114-3. Educational Psychology and Adolescent Development. Examines the principles of educational and adolescent psychology and development that play a significant role in analyzing and understanding the complex processes in middle and secondary school classrooms. Course has both theoretical and practical dimensions. Same as EDUC 4112.

PSYC 4684-3. Developmental Psychology. In-depth consideration of human developmental processes across the life span. Includes coverage of the major topics in human development, such as physical, cognitive, social, and personality development. Prereq., PSYC 1001.

Experimental

PSYC 2145-3. Introductory Cognitive Psychology. Introduces the study of cognitive processes of human beings: sensation, perception, attention, pattern

recognition, memory, learning, language, visual thought, reasoning, problem solving, and decision making. Discusses applications to education, human factors, human computer interaction, law, and other areas of psychology. Prereq., PSYC 1001.

PSYC 3005-3. Cognitive Science. Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind. Prereqs., two of the following: PSYC 2145, LING 2000, CSCI 1300, and PHIL 2440. Same as LING 3005, PHIL 3310, and CSCI 3702.

PSYC 3105-3. Experimental Methods in Psychology. Provides an introduction to the use of experimental procedures in psychology. Students learn about the logic and design of experiments, the meaning of psychological data, how to analyze and interpret data, and the role of theory in psychology. Prereqs., PSYC 1001 and 3101. Recommended prereq., PSYC 2145.

PSYC 4145-4. Advanced Cognitive Psychology. Advanced course in human cognitive processes. Focuses on attention pattern recognition. Memory, learning, language, visual thought, reasoning, problem solving, and decision making. Discusses major theories and ideas in terms of the research they have inspired. Emphasis varies with instructor. One lab per week; research project required. Prereqs., PSYC 1001, 2145, and 3101. Same as PSYC 5145.

PSYC 4155-4. Cognitive Neuroscience/Neuropsychology. An introduction to cognitive neuroscience and neuropsychology. Provides a survey of the neuropsychological underpinnings for a wide range of cognitive functions: motor control, object recognition, spatial processing, attention, language, memory and emotion. One lab, three lectures per week. Prereqs., PSYC 1001, 2012 or NRSC 2100, PSYC 3101 or MATH 2510 or MATH 2520 or IPHY 2800 or APPM 1710 or APPM 2750 or CHEN 3010 or CHEN 3130 or ECON 3818. Same as NRSC 4155.

PSYC 4165-4. Psychology of Perception. One lab, three lect. per week. Analyzes peripheral and central mechanisms involved in the transduction and interpretation of experience. Gives special attention to vision and audition; major theories in these areas are discussed in terms of research they have inspired. Prereqs., PSYC 1001 and 3101.

PSYC 4175-4. Computational Cognitive Neuroscience. Introduction to cognitive neuroscience (how the brain gives rise to thought) using computer simulations based on the neural networks of the brain. Covers a full range of cognitive phenomena including perception and attention, learning and memory, language, and higher-level cognition based on both large-scale cortical neuroanatomy and detailed properties of cortical neural networks. One lab per week. Recommended only for students with a strong interest in the topic, as it requires a combination of computer modeling, neuroscience and cognition. Prereq., PSYC 1001, 2012, 2145, and 3101. Same as PSYC 5175.

PSYC 4385-3. Ethology and Comparative Psychology. Discusses behavior of representative members of each animal phylum. Emphasizes ontogeny of behavior as well as phylogeny. Prereq., PSYC 1001 or EBIO 1210. Same as PSYC 5385.

PSYC 5145-4. Advanced Cognitive Psychology. Instructor consent required. Same as PSYC 4145.

PSYC 5175-4. Computational Cognitive Neuroscience. Instructor consent required. Same as PSYC 4175.

PSYC 5385-3. Ethology and Comparative Psychology. Prereq., instructor consent. Same as PSYC 4385.

PSYC 5665-2. Proseminar: Advanced Experimental Psychology. Provides an advanced and intensive survey to topics in experimental psychology. General areas are higher-level cognition, attention, and learning and memory. Meets seven weeks in the term. May be repeated up to 4 total credit hours. Prereq., instructor consent.

PSYC 5685-2. Proseminar: Advanced Experimental Psychology. Provides an advanced and intensive survey of topics in experimental psychology. General areas are research methods in cognitive psychology, and low-level perception. Meets seven weeks in the term. May be repeated up to 4 total credit hours. Prereq., instructor consent.

PSYC 5815-2. Proseminar: Advanced Experimental Psychology. Provides an advanced and intensive survey of topics in experimental psychology. General areas are language and high-level thinking. Meets seven weeks in the term. May be repeated up to 4 total credit hours. Prereq., instructor consent.

PSYC 7215-3. Seminar: Experimental Psychology. Advanced seminar dealing with different specialized topics, at the discretion of the instructor, in different years. Topics chosen are within the broad range of experimental psychology. Instructor consent required. May be repeated up to 9 total credit hours.

PSYC 7315-2. Advanced Research Seminar on Human Memory. Addresses topics in the experimental psychology of human memory. Content varies from semester to semester, depending on interests of faculty and students. A sample topic is the long-term retention of skills. Prereq., graduate standing in psychology or related disciplines.

PSYC 7415-2. Cognitive Science Research Practicum. Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereq., CSCI 7762 or EDUC 6505 or LING 7762 or PHIL 7310 or PSYC 7762. Same as LING 7415, CSCI 7412, PHIL 7415, and EDUC 6506.

PSYC 7425-2. Cognitive Science Research Practicum 2. Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., LING 7415 or PSCY 7415 or CSCI 7412 or EDUC 6506. Same as LING 7425, CSCI 7422, PHIL 7425, and EDUC 6516.

PSYC 7765 (1-2). Readings and Research in Cognitive Science. Interdisciplinary reading of innovative theories and methodologies of cognitive science. Participants share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint PhD in cognitive science. Prereq., graduate standing. Same as CSCI 7762, EDUC 6505, and LING 7762.

PSYC 7775 (1-2). Topics in Cognitive Science. Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the LCS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in LCS Cognitive Science Academic Programs. Same as LING 7775, CSCI 7772, EDUC 7775, SLHS 7775, and PHIL 7810.

Social

PSYC 2456-3. Social Psychology of Social Problems. Examines social psychological aspects of a variety of issues, ranging from problems of poverty or minority status to topics such as prejudice, drug use, student protest, and patterns of sexual behavior.

PSYC 2606-3. Social Psychology. Covers general psychological principles underlying social behavior. Analyzes major social psychological theories, methods, and topics, including attitudes, conformity, aggression, attraction, social perception, helping behavior, and group relations. Prereq., PSYC 1001. Credit not granted for this course and PSYC 4406. Approved for arts and sciences core curriculum: contemporary societies.

PSYC 4136-4. Judgment and Decision Making. One lab, three lectures per week. Introduces the study of judgment and decision making processes (estimation, prediction and diagnosis, choice under certainty, and risky decision making) and the methods that have been developed to improve these processes (statistical modeling, decision analysis, and expert systems). Prereqs., PSYC 1001, 2606, and 3101.

PSYC 4376-4. Research Methods in Social Psychology. Designed primarily for psychology majors interested in learning about research methodology. Topics include research design, data collection and data analysis, and written research reports. Prereqs., PSYC 1001, 2606, and 3101.

PSYC 4456-3. Psychology of Personality. Offers a psychological study of structure, organization, and development of the person as a whole. Analysis of major theories, methods, and research, including topics such as emotion, motivation, temperament, inner experience, identity and the self, personality change, and the influence of sociocultural context. Restricted to junior or seniors only.

PSYC 4606-3. Advanced Topics in Social Psychology. In-depth study of selected topics in social psychology. Particular section content each semester is determined by the instructor. May be repeated for a maximum of 6 credit hours, provided the topics vary. Restricted to junior or senior psychology majors only. Prereqs., PSYC 1001, 2606 and 3101.

PSYC 5606-3. Proseminar: Social-Personality Psychology. Provides a thorough introduction to methods and theories in social psychology concerned with topics such as the self, social cognition, judgment and decision making, attitude formation and change, small group processes, inter-group relations, health and social psychology, and others. May be repeated up to 12 total credit hours. Prereq., instructor consent.

PSYC 6606-1. Professional Issues in Social Psychology. Covers a range of topics important for professional development in social psychology, including preparation and delivery of research presentations, preparation of grant proposals and manuscripts, and peer review of manuscripts. Intended to prepare students for careers as research scientists. May be repeated up to 6 total credit hours. Restricted to graduate students.

PSYC 7536-2. Personality and Social Psychology. Selected topics in the area of social-personality psychology. Students may register for more than one section of this course within the term and/or within their graduate career. These seminars may be on one of the following topics: stereotyping and person perception, social psychology and self, social psychology of problem behavior, health and social psychology, race and ethnic identity, or groups and small group organization. May be repeated up to 8 total credit hours. Prereq., instructor consent.

Neuroscience

NRSC 2100-4. Introduction to Neuroscience 1. Provides an introduction to fundamental concepts in neuroscience. The goal of this first course is to provide a strong foundation in neurobiology—cell biology, physiology of the neuronal membrane, interneuronal communication, neurotransmission, gross anatomy, and how the brain develops. Students will also learn principles of sensory systems functions. The recitation will introduce students to neuronal computational modeling. Prereqs., MCDB 1150 and 1151, or EBIO 1210 and 1230, and MCDB 2150 and 2151.

NRSC 2110-3. Introduction to Neuroscience 2. Provides an introduction to fundamental concepts in neuroscience. It will also provide a basic understanding of the control of voluntary movement, the neurochemical bases of brain diseases and systems controlling motivation, emotion, learning, memory and sleep. Prereq., NRSC 2100.

NRSC 5100 (2-5). Introduction to Neuroscience I. Provides an intensive introduction to the principles of neuroscience, initially covering the detailed neuroanatomy of human forebrain, hindbrain, and spinal cord. This is followed by neurophysiology with a concentration on the electrophysiology of neural systems. The basics of neuroanatomy and neurophysiology with a concentration on the electrophysiology are then applied to an examination of the structure and function of visual, auditory, and sensorimotor systems in animal and man.

NRSC 6100-2. Advances in Neuroscience Seminar. Designed for beginning graduate students interested in neuroscience. Students read, discuss, and evaluate the primary literature on a number of current topics in neuroscience as well as attend the seminar program in neuroscience. May be repeated up to 8 total credit hours.

NRSC 5110-3. Introduction to Neuroscience II. Provides an intensive interdisciplinary introduction to the principles of neuroscience. It is a sequel to NRSC 5100. Provides a detailed overview of neurochemistry, neurodevelopment, neuro-motor control, neurogenetics, and cognitive neuroscience. Prereq., NRSC 5100.

NRSC 2101 (1-4). Topics in Neuroscience. Provides students with the opportunity to focus on a specific area of Neuroscience in depth. May be repeated up to 6 total credit hours. Prereq., instructor consent.

NRSC 4011 (1-6). Senior Thesis and Research and Ethics. Perform neuroscience related empirical research and analysis. Training emphasizes the development

of critical thinking skills specific to dealing with ethical dilemmas and the responsible conduct of research. Issues related to animal and human research are covered. Prereq., instructor consent.

NRSC 4911-3. Teaching of Neuroscience. This course offers a rich experience for students to develop and organize curriculum to complement the Neuroscience core courses. This course offers a valuable teaching experience utilizing computational modeling to simulate experimental results. Any Neuroscience curriculum course, such as Introduction to Neuroscience I or II, Neuropharmacology, Neurobiology of Learning and Memory or Behavioral Neuroscience may be appropriate with instructor consent. Same as NRSC 5911.

NRSC 5911-3. Teaching of Neuroscience. Same as NRSC 4911.

NRSC 4032-3. Neurobiology of Learning and Memory. Provides a comprehensive treatment of how the brain acquires, stores, and retrieves memories. To do this we will consider (a) the methods used to address these issues, (b) what we know about how brain systems are organized to support memories of different types, and (c) the synaptic mechanisms that are involved. Prereqs., PSYC 2012 or 4052, or IPHY 3730, or NRSC 2100 or 4052, or instructor consent. Restricted to juniors and seniors. Same as NRSC 5032. Formerly PSYC 4132.

NRSC 4052-4. Behavioral Neuroscience. Intensive survey of the morphological, neurochemical, and physiological aspects of behavior. Prereqs., PSYC 2012-2022 or EBIO 1210-1220, or CHEM 1111-1131, or PHYS 1010-1020, or PHYS 2010-2020. Same as PSYC 4052.

NRSC 4072-3. Clinical Neuroscience: A Clinical and Pathological Perspective. Provides basic science background for understanding the mechanism of behavioral disturbances resulting from brain damage. Emphasizes pathological neuroanatomy, neurophysiology, and neuropharmacology, which is essential for understanding problems related to health and disease. Prereqs., PSYC 2012 and one of the following sequences of courses: EBIO 1210 and 1220, MCDB 1150 and 2150, or MCDB 1150 and EBIO 1220. Same as NRSC 5072. Formerly PSYC 4072.

NRSC 4092-3. Behavioral Neuroendocrinology. Provides an introduction to neuroendocrinology with a focus on the interaction between hormones and brain function. Prereqs., PSYC 2012 or NRSC 2100 or instructor consent. Restricted to juniors or seniors. Same as NRSC 5092. Formerly PSYC 4092.

NRSC 4132-3. Neuropharmacology. Neuropharmacology is the study of drug action within the central nervous system. This course is designed to provide a fundamental understanding of the biochemical basis of drug action at the cellular level. Topics covered include the following: 1) principles of pharmacology; 2) brain neurotransmitter systems; 3) addiction and the mechanisms of psychoactive action; 4) biochemical basis of psychiatric disorders and their pharmacological treatment. Prereqs., PSYC 2012 or NRSC 2110 and CHEM 1133. Same as PSYC 5132. Formerly PSYC 4132.

NRSC 5032-3. Neurobiology of Learning and Memory. Same as NRSC 4032 and PSYC 5032. Formerly PSYC 5032.

NRSC 5052-4. Behavioral Neuroscience. Same as NRSC 4052 and PSYC 4052. Formerly PSYC 5052.

NRSC 5072-3. Clinical Neuroscience. Same as NRSC 4072. Formerly PSYC 5072.

NRSC 5092-4. Behavioral Neuroendocrinology. Same as NRSC 4092. Formerly PSYC 5092.

NRSC 7102 (2-3). Topics in Neuroscience. Advanced seminar dealing with different specialized topics in neuroscience. Prereq., NRSC 5110 or instructor consent. May be repeated up to 9 total credit hours.

NRSC 4015-3. Affective Neuroscience. Experiencing and learning from affect—emotional value—is a fundamental part of the human experience. When people started thinking of brains as computers, research on emotion fell by the wayside. Recently however, this has changed, and there is an explosion of work on the brain mechanisms of affective value. We will cover recent advances in understanding the emotional brain. Prereqs. for NRSC 4015 are PSYC 2012 or NRSC 2100 or instructor permission, and junior or senior standing. Same as NRSC 5015.

NRSC 4155-4. Cognitive Neuroscience/Neuropsychology. An introduction to cognitive neuroscience and neuropsychology. Provides a survey of the neuropsychological underpinnings for a wide range of cognitive functions: motor control, object recognition, spatial processing, attention, language, memory and emotion. One lab, three lectures per week. Prereqs., PSYC 1001, 2012 or NRSC

2100, PSYC 3101 or MATH 2510 or MATH 2520 or IPHY 2800 or APPM 1710 or APPM 2750 or CHEN 3010 or CHEN 3130 or ECON 3818. Same as PSYC 4155.

NRSC 4545-3. Neurobiology of Addiction. Covers an intensive survey and synthesis of recent findings contributing to our understanding of the neurobiological basis of addiction. Analysis of both drug and behavioral addictions will be made at the molecular, cellular and neurocircuitry levels and synthesized into models utilizing common themes between various addictions and contributing pathologies. Prereq., NRSC 4132. Same as NRSC 5545.

NRSC 5015-3. Affective Neuroscience. Same as NRSC 4015.

NRSC 5545-3. Neurobiology of Addiction. Same as NRSC 4545.

Religious Studies

RLST 1620-3. Religious Dimension in Human Experience. Studies religion as individual experience and social phenomenon. Examines varieties of religious language (symbol, myth, ritual, scripture) and of religious experience (Asian, Western, archaic). Approved for arts and sciences core curriculum: ideals and values.

RLST 1850-3. Ritual and Media. Ritual continues to play an important role in contemporary societies in both religious and secular contexts. This course examines the elements and genres of ritual activity from African rites of passage to the Beijing Olympics, paying close attention to how the media documents, appropriates and transforms aspects of ritual. Approved for arts and sciences core curriculum: Contemporary Societies.

RLST 2220-3. Religion and Dance: Africa to America to Africa. Religions in cultures around the world frequently engage in dance. By focusing on dances and forms of movement, religious beliefs and meanings can be seen and appreciated. Studies select religious cultures from around the world. Theory is developed to interrelate religion and dance. Similar to RLST 2200. Complements RLST 2230.

RLST 2230-3. Religion and Dance: India to Ballet. Religions in cultures around the world frequently engage in dance. The study of dancing in cultures from India to Europe and America deepens understanding and appreciation of these peoples in their diversities and similarities. Similar to RLST 2200. Complements RLST 2220.

RLST 2400-3. Religion and Contemporary Society. Studies the nature of contemporary American society from various theoretical perspectives in religious studies. Gives attention to the impact of secularization and to the religious elements found in aspects of secular life (e.g., politics, literature, education, and recreation). Approved for arts and sciences core curriculum: contemporary societies.

RLST 2500-3. Religions in the United States. Explores the development of various religions within the shaping influences of American culture, including separation of church and state, the frontier experience, civil religion, and the interaction of religions of indigenous peoples, immigrants, and African Americans. Approved for arts and sciences core curriculum: United States context or ideals and values.

RLST 2600-3. Judaism, Christianity, and Islam. Introduces literature, beliefs, practices, and institutions of Judaism, Christianity, and Islam, in historical perspective. Same as JWST 2600. Approved for arts and sciences core curriculum: ideals and values.

RLST 2610-3. Religions of South Asia. Introduces the literature, beliefs, practices, and institutions of Hinduism, Buddhism, Jainism, and Sikhism, in historical perspective. Approved for arts and sciences core curriculum: ideals and values.

RLST 2620-3. Religions of East Asia. Introduces literature, beliefs, practices, and institutions of Daoism, Confucianism, Buddhism, and Shintoism in historical perspective. Approved for arts and sciences core curriculum: ideals and values.

RLST 2700-3. American Indian Religious Traditions. Introduces religions of the peoples indigenous to the Americas. Concerns include ritual, mythology, and symbolism occurring throughout these cultures in such areas as art, architecture, cosmology, shamanism, sustenance modes, trade, and history. Same as ETHN 2703. Approved for arts and sciences core curriculum: ideals and values or human diversity.

RLST 2800-3. Women and Religion. Examines roles of women in a variety of religious traditions including Judaism, Christianity, Hinduism, Buddhism, and goddess traditions. Same as WMST 2800. Approved for arts and sciences core curriculum: human diversity.

RLST 2840 (1-3). Independent Study. May be repeated up to 8 total credit hours.

RLST 3000-3. Christian Traditions. Studies origins and development of various aspects of Christian tradition as expressed through scripture, theology, ritual, church order, ethics, and the arts. Approved for arts and sciences core curriculum: historical context.

RLST 3020-3. Advanced Writing in Religious Studies. Seminar for religious studies majors that emphasizes the development of writing skills for use inside as well as outside the academy. Writing assignments are focused on one or more core topics in religious studies. Restricted to RLST majors. Approved for arts and sciences core curriculum: written communication.

RLST 3050-3. Religion and Literature in America. Studies religious dimensions of American culture through representative literature, beginning with the Puritans and focusing on diversity in the 19th and 20th centuries. Approved for arts and sciences core curriculum: United States context.

RLST 3100-3. Judaism. Explores Jewish religious experience and its expression in thought, ritual, ethics, and social institutions. Same as JWST 3100. Approved for arts and sciences core curriculum: historical context.

RLST 3200-3. Hinduism. Studies literature, beliefs, practices, and institutions of Hinduism, in historical perspective.

RLST 3300-3. Foundations of Buddhism. Introduction to Buddhist thought and practice in the variety of its historical and cultural contexts. The course begins with an exploration of narrative, cosmology, doctrine and ritual in early Buddhism and the Theravada of South and Southeast Asia. Through case studies, we then trace diverse conceptions of the Buddhist path in Tibet and East Asia where the Mahayana spread. Restricted to sophomores, juniors and seniors.

RLST 3400-3. Japanese Religions. Studies the literature, beliefs, practices, and institutions of Shinto, Buddhism, and Confucianism within the development of Japanese culture.

RLST 3600-3. Islam. Introduces Islamic beliefs and practices through an examination of the Qur'an, Muhammad's life, ritual duties, law and theology, mysticism, and social institutions.

RLST 3800-3. Chinese Religions. Studies classical Confucianism, Taoism, Buddhism, and Neo-Confucianism within the historical context of Chinese culture.

RLST 3820-3. Topics in Religious Studies. Intensive study of a selected area or problem in religious studies. May be repeated up to 9 total credit hours as topics change.

RLST 3830-3. Perspectives on the Study of Religion. Surveys basic approaches to the study of religion. Students read and respond to seminal works in religious studies selected by faculty members, who visit class for discussions. Students also visit several religious communities in the Boulder/Denver region.

RLST 3838-3. Dancing, Religion, and Culture. A critical examination of the received cultural, religious, and academic understandings of dancing and the body; the construction of a richer theory of dancing that will more adequately support comparative studies; the study of dancing in cultures and religions in a diverse representation of cultures; and a more in depth social study of Latin American dancing including actual dancing experience.

RLST 4020-3. Topics in Biblical Christianity. Studies Christian origins, treatment of the historical person of Jesus, and theological perspectives of the New Testament. Emphasizes methodology, e.g., textual criticism, literary criticism, and form criticism. Variable topics include synoptic gospels, John, and Pauline writing. May be repeated up to 9 total credit hours as topics change. Prereq., 6 credit hours of RLST courses at any level or instructor consent. Same as RLST 5020.

RLST 4030-3. Religions in America. Studies various religious movements in the U.S. and other parts of the Americas. Includes American religion and religions, religion and nationalism, revitalization and religion, and Asian religions in America. May be repeated up to 9 total credit hours within a term as topics change. Prereq., 6 hours RLST or instructor consent. Same as RLST 5030.

RLST 4050-3. Topics in Christian Studies. Studies a particular topic in Christian theology and culture such as early Christianity, medieval Christianity, Christianity in the United States, women and Christianity, liberation theologies, Christianity and literature, and modern Christian thought. Maybe repeated up to 9 total credit hours as topics change. Prereqs., 6 hours of RLST courses at any level or instructor consent. Same as RLST 5050.

RLST 4200-3. Topics in Hinduism. Examines in depth central themes, schools of thought, and movements in Hinduism, such as myth and ritual, renunciation, Vedanta, and 19th century Renaissance. May be repeated up to 9 total credit hours as topics change. Prereqs., 6 hours of RLST courses at any level or instructor consent. Same as RLST 5200.

RLST 4250-3. Topics in Buddhism. Examines in depth central themes, schools of thought, and movements in Buddhism, such as Theravada in Southeast Asia, Mahayana and Tantrayana thought, Zen, and Buddhism in America. May be repeated up to 9 total credit hours as topics change. Prereqs., 6 hours of RLST courses at any level including RLST 3300 or instructor consent. Same as RLST 5250.

RLST 4260-3. Topics in Judaism. Examines in depth central themes, schools of thought, and movements in Judaism across a range of historical periods. May be repeated up to 9 total credit hours as topics change. Recommended prereqs., 6 hours of RLST courses at any level including RLST/JWST 3100, RLST/JWST 2600, HIST/JWST 1108 or HEBR/JWST 2350 or instructor consent. Same as JWST 4260 and 5260.

RLST 4300-3. Topics in Native American Religions. Examines a topic (varies at different offerings) focusing on religions of peoples indigenous to the Americas. May consider mythology; shamanism and medicine; trickster, clown, and fool; and crisis cult movements. May be repeated up to 9 total credit hours as topics change. Prereqs., RLST 2700 and 3 additional credit hours of RLST course work or instructor consent. Same as RLST 5300.

RLST 4450-3. Religion and Nonviolence. Studies theories of nonviolence developed by major thinkers and movements, especially in the U.S., in the context of their religious commitments and beliefs and their historical circumstances.

RLST 4650-3. Islam in the Modern World. Globally surveys Islam, covering religion and politics; Islam and the West; the Islamic revival and its varied forms in Iran, Indonesia, Libya, and Pakistan; development and change; the status of women; and media and academic stereotyping. Prereq., 6 credit hours of religious studies at any level or instructor consent. Same as RLST 5650.

RLST 4750-3. Daoism. A detailed examination of the history and current state of Daoism, China's indigenous organized religion. Focusing on its origins and development, ethnical teachings, ritual activities, and world view. Topics created include the relationship of Daoism to popular religion, the practice of alchemy and self cultivation, beliefs concerning death and the afterlife, and the structure of the Daoist pantheon. Prereq., RLST 3800 or instructor consent. Same as RLST 5750 and CHIN 4750.

RLST 4800-3. Critical Studies in Religion. Focuses on a current issue or area of research in the study of religion. Students analyze the way theories develop and learn to develop their own critical analysis. Topics vary, e.g., comparative kingship, colonialism, ritual theories, feminist analysis. May be repeated up to 6 total credit hours. Restricted to RLST majors.

RLST 4810-3. Honors Thesis. Students write an honors thesis based on independent research under the direction of a faculty member. Required for students who elect departmental honors.

RLST 4820-3. Interdisciplinary Seminar on Religion: Topics. Variable topics in religion, drawing from a variety of disciplines and methodologies as they shed light on specific traditions and issues. May be repeated up to 9 total credit hours as topics change. Prereq., 6 credit hours of religious studies at any level or instructor consent. Same as RLST 5820.

RLST 4830-3. Senior Majors Seminar. Topics and instructors vary. Brings advanced majors together in order to focus their major experience on significant topics and issues of common interest. Restricted to majors.

RLST 4840 (1-6). Senior Independent Study. May be repeated up to 8 total credit hours.

RLST 5020-3. Topics in Biblical Christianity. Same as RLST 4020.

RLST 5030-3. Religions in America. Same as RLST 4030.

RLST 5050-3. Topics in Christian Studies. Same as RLST 4050.

RLST 5200-3. Topics in Hinduism. Same as RLST 4200.

RLST 5210-3. Advanced Readings in Sanskrit. This is an advanced Sanskrit reading course, requiring at least two years of prior Sanskrit training. Students will read texts in the original. Class time is devoted to parsing out difficult grammatical structures, discussing the philosophical import of the readings and address-

ing the historical contexts that assist in interpreting the texts. The topic varies according to student interest. Prereq., SNSK 2120 or 2 years of Sanskrit training.

RLST 5250-3. Topics in Buddhism. Same as RLST 4250.

RLST 5260-3. Topics in Judaism. Examines in depth central themes, schools of thought, and movements in Judaism across a range of historical periods. May be repeated up to 9 total credit hours as topics change. Recommended prereqs., 6 hours of RLST courses at any level including RLST/JWST 3100, RLST/JWST 2600, HIST/JWST 1108 or HEBR/JWST 2350 or instructor consent. Same as JWST 4260 and 5260.

RLST 5300-3. Topics in Native American Religions. Same as RLST 4300.

RLST 5350-3. Native American Religions: Regional Studies. Same as RLST 4350.

RLST 5650-3. Islam in the Modern World. Same as RLST 4650.

RLST 5750-3. Daoism. Restricted to graduate students. Same as RLST 4750 and CHIN 5750.

RLST 5820-3. Interdisciplinary Seminar on Religion. Same as RLST 4820.

RLST 5840 (1-6). Independent Study. May be repeated up to 8 total credit hours.

RLST 6830-3. Introduction to the Academic Study of Religion. Introduction to the graduate academic study of religion through the exploration of contemporary models and issues that demonstrate the nature and future of the field. Each student will prepare a profile of his/her intended area of research. Restricted to Religious Studies graduate students.

RLST 6840 (1-6). Independent Study. May be repeated up to 8 total credit hours.

RLST 6850-3. Comparative Studies in Religion. Focuses on theories and methods of comparative study in religion through an examination of at least two distinct traditions (e.g., public worship in Judaism and Islam; pilgrimage in Hinduism and Christianity). May be repeated up to 6 total credit hours as topics change. Restricted to RLST graduate students.

RLST 6940-1. Master's Degree Candidate.

RLST 6945 (1-4). Directed Readings: Non-Thesis Option. Course work finished or in the last semester. May be repeated up to 4 total credit hours.

RLST 6950 (1-4). Master's Thesis.

Sanskrit

SNSK 1010 (3-4). Introductory Sanskrit 1.

SNSK 1020 (3-4). Introductory Sanskrit 2. Prereq., SNSK 1010.

SNSK 2110 (3-4). Intermediate Sanskrit 1. Continued study of the grammar of classical Sanskrit and translation of selected readings from the literature. Meets MAPS requirement for foreign language. Prereq., SNSK 1020.

SNSK 2120 (3-4). Intermediate Sanskrit 2. Continuation of SNSK 2120. Prereq., SNSK 2110.

Sewall Residential Academic Program

SEWL 1000 (1-3). Topics: Humanities 1.

SEWL 1020 (1-3). Topics-Social Sciences 1.

SEWL 2000-3. America, the Environment, and the Global Economy. Examines the debate over globalization and the global environmental crisis. Does increasing global economic development threaten to undermine the environment? What role should America play in the development of a sustainable economy? Credit not granted for this course and SOCY 1002. Approved for arts and sciences core curriculum: ideals and values.

SEWL 2020-1. Civic Engagement. Explores the concept of citizenship and develops students' leadership skills through discussions and service-learning. Working with Sewall faculty mentors, students discuss citizenship and related topics and learn concretely about aspects of the larger community by choosing a local community organization, becoming actively involved in its programs, and presenting their work at a culminating symposium. May be repeated up to 4 total credit hours.

Sociology

Sociology courses numbered at the 1000- and 2000-level are designed for first- and second-year students (fewer than 56 credit hours). Sociology courses numbered at the 3000- or 4000-level are restricted to students with 56 credit hours or more, or those with instructor consent.

General Sociology

SOCY 1001-3. Introduction to Sociology. Examines basic sociological ideas including social relations, social interaction, social structure, and social change. Examples are drawn from societies around the world. Meets MAPS requirement for social science: general. Approved for arts and sciences core curriculum: contemporary societies.

SOCY 1021-3. United States Race and Ethnic Relations. An examination of race and minority problems in U.S. society, including the psychological, social, and cultural sources of prejudice and discrimination. Approved for arts and sciences core curriculum: United States context.

SOCY 1841 (1-6). Independent Study in Sociology. May be repeated up to 7 total credit hours.

SOCY 2011-3. Contemporary Social Issues and Human Values. Explores contemporary societies on a global scale. Focuses on such issues as capitalism, socialism, race and ethnic problems, sex discrimination, poverty and the concentration of wealth, crime and deviance, human rights and human values, peace and war.

SOCY 2021-3. Nonviolence and the Ethics of Social Action. Examines nonviolence as a strategy of social action. Focuses on ethics and dynamics of non-violent action; racial and economic justice movements; civil disobedience; and conscientious objection to war.

SOCY 2031-3. Social Problems. Examines U.S. society from a normative perspective emphasizing theories of social change. Considers such problems as distribution of power, unemployment, poverty, racism and sexism, the changing role of the family, and drugs. Approved for arts and sciences core curriculum: ideals and values.

SOCY 2041-3. The Social Construction of Reality. Analyzes the human environment as a human product. Studies how all things that construct the objective social facts of our social world are created, reproduced, maintained, and distributed by specific human interaction processes.

SOCY 2061-3. Introduction to Social Statistics. Introduces students to quantitative analysis of social phenomena. Emphasizes understanding and proper interpretation of graphs; measures of central tendency, dispersion, and association; and the concept of statistical significance. Assumes students have only limited mathematical background.

SOCY 2071-1. Career Development Theories and Practices. Studying and applying career development theories, this course will focus on gaining understanding of the world of work from a variety of perspectives to include the psychology, sociology, economics and history of work and careers in American society. Associated with these academic principles, this course will assist students' own career development and career management skills.

SOCY 2091-3. Topics in Sociology. Variety of courses taught by visiting and regular faculty. See current departmental announcements for specific content. Students may receive credit for this course up to three times for different topics.

SOCY 3001-3. Classical Theory. In-depth study of classical sociological theorists, particularly Marx, Durkheim, and Weber. Examines their roles in defining the discipline of sociology. Prereq., SOCY 1001. Restricted to sophomores, juniors and seniors.

SOCY 3011-3. Contemporary Theory. Continuation of SOCY 3001. In-depth study of modern and post-modern theories of the 20th century, including structural-functionalist, conflict, symbolic interactionist, feminist, and world system theories. Prereq., SOCY 1001. Restricted to junior/senior SOCY majors.

SOCY 3041-3. Self and Consciousness. Explores human development from a psychosocial perspective, focusing on the interplay between psychological patterns and social forms. Issues such as self-image and social consciousness are studied within the larger context of individual and collective forces leading to transformation. Prereqs., SOCY 1001, and 3001 or 3011, or instructor consent. Restricted to junior/senior SOCY majors. Same as INVS 3041.

SOCY 3141-3. Social Movements in the U.S. Considers theory and research about American social movements. Emphasizes leadership, ideology, recruitment, strategy, organizational dynamics, public response, and reasons for success or failure. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors.

SOCY 3151-3. Self in Modern Society. Explores how modern social institutions and culture shape our personal experiences, how personal experiences can affect the nature of those, institutions and culture, and how strategies can be developed for achieving balance between the individual and society. Prereqs., SOCY 1001 and SOCY 3001 3011. Restricted to junior/senior SOCY majors. Approved for arts and sciences core curriculum: United States context or ideals and values.

SOCY 3161-3. Sociological Perspectives on Race and Ethnicity. Addresses three subtopics of race from a sociological perspective: ethnic and racial identities, immigration, and race and ethnicity in Latin America. Recommended prereq., SOCY 1001.

SOCY 3171-3. Whiteness Studies. Uses the conceptual framework of the sociology of race and ethnic relations to explore whiteness as a racial category that is centered and privileged in American society. Investigates the development of whiteness from past white supremacy, current colorblindness, to possible future multiculturalism. Analyzes the consequences of whiteness as a racial identity and a social structure. Prereqs., SOCY 1001 and 1021.

SOCY 3301-3. Survey Methods. Teaches quantitative research methods and, particularly, methods of survey research. Topics include sampling, interviewing, schedule construction, data analysis, computer methods, index construction, and statistical analysis. Students participate in a survey project, design, collect data, and prepare a research paper on the basis of collected data. Prereqs., SOCY 1001, 2061, and SOCY 3001 or 3011. Restricted to junior/senior sociology majors.

SOCY 3401-3. Field Methods. Skill development prepares students to conduct qualitative sociological research. Emphasizes ethnographic techniques, including intensive interviewing, direct observation, coding, participant observation, and report writing. Students conceive and execute a field research project with data collection, analysis, and a report. Prereqs., SOCY 1001 and SOCY 3001 or 3011. Restricted to junior/senior sociology majors.

SOCY 4021-3. Conflict Management in Social Systems. Explores conflict resolution theory and method as applied to interpersonal, intergroup, and interorganization conflict. Prereqs., SOCY 1001, and SOCY 3001 or 3011.

SOCY 4031-3. Social Psychology. Studies individuals in social context. Reviews philosophical and sociological treatments of the relation between the individual and society. More specific topics include the socialization process, theories of human development and personality formation, language acquisition, conformity, aggression, sex differences in personality and gender identity, and the relation between attitudes and overt behavior. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors.

SOCY 4061-3. Social Statistics. Introduction to quantitative analysis of social phenomena. Emphasizes use of probability, statistical inference, analysis of variance, and multiple regression techniques for production of sociological research. Prepares students for more advanced-level statistics courses. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors.

SOCY 4071-3. Social Stratification. Studies theories of class, ethnic, sex, and age stratification. Examines social inequality in the United States and analyzes the resulting conflicts. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors. Same as SOCY 5071.

SOCY 4081 (1-3). Sociology of Education. Analyzes the school as a social organization. Among topics considered are power and control in the school; classroom interaction and its relation to learning and personality development in students; roles of educators; and reciprocal relations of school and community. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors.

SOCY 4111-3. Nonviolent Social Movements. Explores theories of democracy and development in relation to movements for nonviolent social change. Focuses on means and ends, spirituality, leadership, decision-making, civil society, cooperative economics, ecology, and decentralized power. Prereqs., SOCY 1001, and 3001 or 3011. Restricted to senior SOCY or PSCI majors. Same as INVS 4402.

SOCY 4121-3. Sociology of Religion. Examines complex interactions between religious and other social structures, such as the economy, government, and the family, and how globalization is affecting religious traditions across the globe. Includes discussion of how various religions are used or misused to justify terrorism and other acts of violence. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors. Approved for arts and sciences core curriculum: ideals and values.

SOCY 4131 (1-3). Advanced Topics in Sociology. Variety of advanced specialty courses taught by visiting and regular faculty designed for upper division sociology majors. See current departmental announcement for specific content. May be repeated up to 9 total credit hours for different topics. Prereq., SOCY 1001. Restricted to junior and senior SOCY majors.

SOCY 4141-3. The Social Psychology of Friendships. Studies friendships between individuals and groups, applying social psychological theories of interaction and group processes. Examines the effects of hierarchies of status and power and of norms and social pressure on friendships. Attempts to answer questions like how social categories like gender, race, and class affect friendships, what are the unwritten rules of behavior among friends in different situations, and what happens when we violate them. Prereq., SOCY 1001. Restricted to junior/senior SOCY majors.

SOCY 4441-3. Senior Honors Seminar 1. Helps students design and initiate an honors thesis based on original sociological research. Prereqs., SOCY 1001, and SOCY 3001 or 3011, and instructor consent. Restricted to SOCY majors with a minimum grade point average of 3.30.

SOCY 4451-3. Senior Honors Seminar 2. Helps students complete an honors thesis based on original sociological research. Emphasizes analyzing data, writing research reports, and presenting results. Prereqs., SOCY 1001, and SOCY 3001 or 3011, and instructor consent. Restricted to SOCY majors with a minimum grade point average of 3.30.

SOCY 4461-3. Critical Studies in Sociology. Examines a sociological topic in depth, covering such issues as class structure, race relations, gender roles, criminal justice, and political conflict, with an emphasis on writing, reading, and critical thinking. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to senior SOCY majors.

SOCY 4841 (1-8). Independent Study in Sociology. Upper-division variable credit. May be repeated up to 8 total credit hours. Prereqs., SOCY 1001, and SOCY 3001 or 3011, and instructor consent. Restricted to SOCY majors.

SOCY 4911 (1-3). Teaching Sociology. Students participate in a teaching seminar under the supervision of a faculty member. Includes pedagogical strategies for implementing concrete educational goals and encouraging higher levels of creativity and analysis in a large, lower-division class. Emphasizes mentorship and personal development. Prereqs., SOCY 1004 and instructor consent.

SOCY 4931 (1-6). Internship in Sociology. Provides an academically supervised opportunity for junior and senior sociology majors to work in public or private organizations. Focuses on opportunities in criminal justice system, education, non-profits, health care, etc. May be repeated up to 6 total credit hours. Prereqs., SOCY 1001 and 3001 or 3011. Restricted to junior and senior SOCY majors.

SOCY 5031-3. Research Design. Principles and practice of social research, including the nature of scientific explanation, the relationship between theory and research, research design, measurement problems, sampling questionnaire construction, interviewing, ethnographic methods, and statistical analysis.

SOCY 5071-3. Social Stratification. Same as SOCY 4071.

SOCY 5111-3. Data 1: Introduction to Social Statistics. Introduces statistical analysis in the social sciences. Introduces basic techniques of inferential statistics and several bivariate statistical techniques including t-test for the difference in means, chi-square independence, analysis of variance (ANOVA), correlation, and simple regression (OLS). This course prepares students for the required course on multivariate regression techniques (Data 2).

SOCY 5201-3. Graduate Seminar in Sociological Theory. Examines theoretical approaches to core issues and problems in sociology, including the nature of society, the relationship between society and the individual, the role of culture and social structure, the sources of social power, and the conceptual structure of sociological knowledge itself.

SOCY 5601-3. Advanced Data Analysis. Extends general linear regression model to consider residual analysis, curvilinearity and interaction, and logistic regression. Includes completion of a written research paper. Prereqs., graduate standing and SOCY 5021.

SOCY 5611-3. Teaching in Sociology. Learn how to teach sociology more effectively while developing a new content area and a clearer sense of the field. Choose a content area within sociology as the basis for planning a course and developing and practicing different teaching techniques. Prereqs., enrollment in SOCY graduate program.

SOCY 5841 (1-6). Independent Study in Sociology. Graduate variable credit. May be repeated up to 7 total credit hours. Prereq., instructor consent.

SOCY 6031-3. Globalization and Democratization: An Introduction. Introduces research on globalization and democratization from an interdisciplinary perspective. Examines ongoing interdisciplinary research on the global political economy. Students learn about ongoing research, critique current efforts, and design their own research project. Prereq., graduate standing in PSCI, ECON, GEOG, or SOCY. Same as PSCI 7333, GEOG 5332, and ECON 8333.

SOCY 6041-3. Cultural Sociology. Explores "The cultural turn" in sociology and related disciplines. Reviews basic themes in cultural studies—e.g., distinguishing "cultural" and "social"; narrative as catalyst between symbols and practices; cultural production processes; self as embodied; culture and power; methods and epistemological issues. Students present their own projects in class and as research papers. Prereq., graduate standing. Formerly SOCY 5041.

SOCY 6061-3. Modern Marxist Social Theory. Analyzes recent Marxist theories of class structure, exploitation, political economy, alienation, culture, and the state as discussed in the work of Althusser, Gramsci, Lukacs, Mandel, Marcuse, Roemer, and others. Prereq., graduate standing. Formerly SOCY 5061.

SOCY 6111-3. Data 2: Data Analysis. Introduces students to mainstream multivariate regression techniques used in the social sciences. The majority of the course focuses on the Ordinary Least Square model and on the extension of this model to nominal, ordinal, and count dependent variables. Students will analyze data of their choosing with statistical software packages including SPSS, SAS, and STATA. Prereq., SOCY 5111 or equivalent. Formerly SOCY 5021.

SOCY 6121-3. Qualitative Methods. Training in the systematic observation of people in situations, finding them where they are, staying with them in a role acceptable to them that allows intimate observations of behavior. Students report their findings in ways useful to social science but not harmful to those observed. Formerly SOCY 5121.

SOCY 6821-1.5. Graduate Sociology Forum 1. Introduces first-year graduate students to the full range of substantive topics, research programs, and other projects in which graduate sociology faculty are engaged. Provides a forum in which issues of the discipline are presented and discussed. Features weekly presentations by graduate sociology faculty. Restricted to graduate students.

SOCY 6831-1. Graduate Professional Seminar. Offers guidance and instruction on topics related to advanced graduate study and academic life beyond graduation. Discussions will include writing journal articles; creating a vitae; writing dissertations; applying for grants and other sources of funding; the academic job search; and what to expect as a junior faculty member. Restricted to graduate students.

SOCY 6841 (1-6). Guided Research in Sociology. May be repeated up to 7 total credit hours. Prereq., graduate standing.

SOCY 6941-1. Candidate for Degree for Master's Thesis.

SOCY 6951 (1-6). Master's Thesis.

SOCY 7111-3. Data III: Advanced Data Analysis. Denotes third graduate course in sequence of quantitative methods. Following basic inferential statistics (SOCY 5111) and multivariate regression analysis (SOCY 6111), students study advanced statistical techniques such as event history analysis, multilevel modeling, structural equation modeling, and latent class analysis. May be repeated up to 9 total credit hours when topics vary. Prereqs., SOCY 5111 and 6111 and graduate standing.

SOCY 7121-3. Qualitative Analysis. Drawing on data gathered through participation, observation, and in-depth interviewing, students focus on developing theoretical analyses and exploring classical and post-modern ethnographic writing formats. Students present and revise their papers as well as review journal ar-

ticles. Prereqs., graduate standing and SOCY 5121 or 6121, or instructor consent. Formerly SOCY 5221.

SOCY 7131-3. Seminar in Social Psychology. Studies the individual in social context. Focuses on theoretical perspectives and substantive issues specific to sociological and social psychology, including socialization, the self, social roles, language, deviance, gender, collective behavior, group processes, attitudes and behavior, social norms, and conformity. Formerly SOCY 5531.

SOCY 7171-3. Special Topics. May be repeated up to 9 total credit hours.

SOCY 8991 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Environment and Society

SOCY 2077-3. Environment and Society. Examines how both natural and built environments influence human behavior and social organization. Focuses on microenvironments and their influence on individuals; the impact of macroenvironments on societal organization; and environmental movements. Credit not granted for this course and SOCY 3091. Approved for arts and sciences core curriculum: ideals and values.

SOCY 4007-3. Global Human Ecology. Examines global environmental issues from sociological perspectives. Focuses on such problems as overpopulation, world hunger and poverty, pollution, resource shortages, environmental impact of technology and population dynamics, public policy, and strategies for change. Credit not granted for this course and SOCY 1002 or SEWL 2000.

SOCY 4017-3. Animals and Society. Examines the role of non-human animals in human society. Investigates the social construction of the human/animal boundary. Challenges ideas that animals are neither thinking nor feeling. Examines the many ways humans rely on animals. Considers the link between animal cruelty and other violence. Explores the moral status of animals. Prereq., SOCY 1001.

SOCY 4027-3. Inequality, Democracy, and the Environment. Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between (a) inequality and democratic decision making and (b) undemocratic decision making; U.S. and corporate food and energy policy; and global environmental degradation. The course also focuses on the role that global inequality plays in fostering environmental degradation. Restricted to juniors/seniors. Same as ENVS 4027.

SOCY 4037-3. Hazards, Disasters and Society. Explores the societal dimensions of hazards and disasters, emphasizing disaster theory and research, key issues in the sociological study of disasters, social vulnerability, the impacts of disasters in the U.S. and worldwide, and the U.S. Emergency Management System. Prereq., SOCY 2077. Same as SOCY 5037.

SOCY 4047-3. Topics in Environment and Society. Variety of courses taught by visiting and regular faculty. See current departmental announcements for specific content. May be repeated up to 9 credit hours for different topics.

SOCY 5037-3. Hazards, Disasters and Society. Same as SOCY 4037.

SOCY 5937 (1-6). Graduate Research Internship in Environmental Sociology. Offers the opportunity for sociology graduate students specializing in environmental sociology to work with local governmental or non-profit organizations on research assignments. The research topic, academic reading list, and expectations for the final project will be developed collaboratively with a faculty sponsor and organizational representative.

SOCY 6007-3. Foundations of Environmental Sociology. Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters. Same as ENVS 6007.

SOCY 6017-3. Inequality, Democracy, and the Environment. Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between a) inequality and democratic decision making and b) undemocratic economic and political decision making, U.S. and corporate food and energy policy; and global environmental degrada-

tion. Focus will also be placed on the role that global inequality plays in fostering environmental degradation. Prereq., graduate standing. Formerly SOCY 5137.

SOCY 7017-3. Population and Environment. Reviews research on human-environment interactions, with a focus on ways in which demographic processes influence, and are influenced by, the environmental context. Specific topics include conceptual and analytical frameworks; methodologies; intervening factors shaping human dimensions of environmental change; and regionally-focused research. Prereq., graduate standing. Formerly SOCY 5117.

Deviance and Criminology

SOCY 1004-3. Deviance in U.S. Society. Examines the social construction of deviance in the U.S., the process of acquiring a deviant identity and managing deviant stigma, and the social organization of deviant act, lifestyles, relationships and careers. Approved for arts and sciences core curriculum: ideals and values.

SOCY 2034-3. Drugs in United States Society. Examines the relationship between drugs and social contexts. Lends insight into why people find consciousness alteration meaningful, what kinds of experiences and problems arise, and what types of social policies emerge to control drug use.

SOCY 2044-3. Crime and Society. Explores issues related to crime, the criminal justice system, and crime-related public policy. It addresses what we know about crime and how we know it, how our society responds to crime, and how the institutions designed to address crime (police, courts, corrections) function.

SOCY 3034-3. Perspectives on Violence. What counts as violence? Who decides what is violence and what is not? In what contexts does violence occur? This course critically examines different criminological and social science perspectives on violence. Prereq., SOCY 1001 or 1004.

SOCY 3044-3. Race, Class, Gender, and Crime. Overview of race, class, gender, and ethnicity issues in offending, victimization, and processing by the justice system. Examines women and people of color employed in the justice system. Prereq., SOCY 1001 or 1004. Same as WMST 3044.

SOCY 3314-3. Violence Against Women and Girls. Focuses on aspects of the victimization of women and girls that are "gendered"—namely, sexual abuse and intimate partner abuse. Also explores the importance of race, class, and sexuality in gendered violence. Same as WMST 3314.

SOCY 4004-3. Advanced Topics in Criminology. Variety of courses in criminology. See current departmental announcements for specific content. May be repeated up to 9 total credit hours for different topics. Prereq., SOCY 1001 or 1004. Restricted to junior/senior SOCY majors.

SOCY 4014-3. Criminology. Scientific study of criminal behavior with special attention to development of criminal law, definition of crime, causes of law violation, and methods of controlling criminal behavior. Prereq., SOCY 1001 or 1004.

SOCY 4024-3. Juvenile Delinquency. Examines the history, incidence and prevalence of delinquent behavior, as well as why children become involved in criminal activity. Prereq., SOCY 1001 or 1004. Approved for arts and sciences core curriculum: contemporary societies.

SOCY 4054-3. Policing and the Courts. Looks at the criminal justice process from arrest through appeal. Topics include: the role of police, prosecutorial decision making, plea bargaining, judicial selection, and the conduct of trials, sentencing, and appeal. Prereq., SOCY 1001 or SOCY 1004. Credit not granted for this course and SOCY 2024.

SOCY 4084-3. Punishment, Law and Society. Places the current state of punishment in the U.S. in historical and cross national context. It examines key features of penal systems, and key sociological theories about the relationship between punishment and society. Prereqs., SOCY 1001 or 1004.

SOCY 6004-3. Topics in Criminology. Variety of courses in criminology to be taught by visiting lecturers. See current departmental announcements for specific content. May be repeated up to 9 total credit hours for different topics. Formerly SOCY 5004.

SOCY 7004-3. Criminological Theory. Examines the major criminological theories of the 18th through 21st centuries in Europe, Australia, and the U.S. Emphasizes the historical contexts and paradigms of knowledge influencing these theories. Prereq., graduate standing. Formerly SOCY 5114.

SOCY 7014-3. Patterns of Criminal Behavior. Overview of the epidemiology of crime. Examines patterns of crime (both offending and victimization), and includes a gender, race/ethnicity, and class analysis. Formerly SOCY 5214.

SOCY 7024-3. Punishment and Social Control. Exploration of sociological perspectives on the criminal justice process. Considers organization of criminal law responses, including enforcing and sentencing. Race, class, gender, and age differences in treatment and sentencing are analyzed. Prereq., graduate standing. Formerly SOCY 5314.

SOCY 7034-3. Capital Punishment in the United States. Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty. Prereq., graduate standing. Formerly SOCY 5414.

Population and Health Issues

SOCY 1022-3. Ethics and Social Issues in U.S. Health and Medicine. Explores current ethical and policy issues in U.S. health and medical practices. Includes such issues as alcohol and drug abuse, organ transplants and substitutes, genetic engineering, contraception, abortion, occupational safety and health, and euthanasia. Approved for arts and sciences core curriculum: ideals and values.

SOCY 3002-3. Population and Society. Examines population, its structure and processes, and its relationships to selected areas of the social structure. Examines Malthusian, neo-Malthusian, and Marxist perspectives. Restricted to SOCY majors.

SOCY 3012-3. Women and Development. Investigates the status of women in the context of globalization and social and economic development. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors. Same as WMST 3012. Approved for arts and sciences core curriculum: human diversity.

SOCY 3042-3. Topics in Population and Health. A variety of courses in population and/or health will be taught, usually by visiting lecturers. See current departmental announcements for specific content. May be repeated up to 9 total credit hours for different topics. Prereq., SOCY 1001.

SOCY 4002-3. Sociology of Aging. Studies present and future roles of the aged in the family, the community, and the larger society. Considers economic, political, and health consequences of various retirement systems. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors.

SOCY 4042-3. Economic Sociology. Defines relationship between economy and society; sociological approach to study of economic activity and organization; difference from the theoretical and methodological assumptions orienting the discipline of economics; tackles these questions in two ways: studies foundations as established in works of Smith, Marx, Weber, Polanyi, and Schumpeter, and considers current research in economic sociology, focusing on concepts of markets, networks, and embeddedness. Prereq., SOCY 1001. Restricted to sophomore, junior, senior SOCY majors.

SOCY 4052-3. Social Inequalities in Health. Focuses on social inequalities in health in both U.S. and international contexts. Reviews the link between health status and various types of social statuses, including but not limited to socioeconomic status, gender, race, and ethnicity. Explanations for the relationships between these factors and various health outcomes are discussed. The class focuses on multiple levels of analysis, from the physician-patient interactions to health care systems and social policies. Students have the opportunity to develop their own specific research interests in this field. Prereq., SOCY 1001. Restricted to junior/senior SOCY majors.

SOCY 6012-3. Population Issues, Problems, and Policies. Presents contemporary perspectives on relations between population and society. Focuses on mortality, fertility, and migration, the major demographic areas, with reviews of specific demographic phenomena and controversies. Formerly SOCY 5012.

SOCY 7002-3. Social Disparities in Health. Presents social disparities in health in their social context. Includes the sociology of health behavior; links between health status and social statuses including gender, race, ethnicity, and socioeconomic status; fundamental causes and other explanations for social disparities in health; environment and health; health insurance disparities; the physician-patient interaction and its consequences.

SOCY 7012-3. The Social Demography of Race. Introduction to relevant, timely research within sociological and social demographic research on race and eth-

nicity. Specific areas will include conceptual/measurement issues; population size, growth, and migration; health and mortality; marriage, family, and fertility; socioeconomic context; and policy considerations. Course content will be structured around current empirical pieces in sociology literature with emphasis on methodological approach in analyses.

Sex and Gender

SOCY 1006-3. The Social Construction of Sexuality. Discusses the social determinants of sexuality. Analyzes the economic, psychological, and cultural influences on human sexuality. Interactional perspective of human sexuality is presented. Restricted to sophomores, juniors, and seniors. Same as WMST 1006.

SOCY 1016-3. Sex, Gender, and Society 1. Examines status and power differences between the sexes at individual and societal levels. Emphasizes historical context of gender roles and status, reviews major theories of gender stratification. Same as WMST 1016. Approved for arts and sciences core curriculum: human diversity.

SOCY 3016-3. Marriage and the Family in U.S. Society. Comparative and historical examination of marriage and the family within the U.S. Emphasizes changing family roles and family structures. Also considers alternatives to the nuclear family and traditional marriage exploring new definitions of family. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors. Same as WMST 3016. Approved for arts and sciences core curriculum: United States context.

SOCY 3046-3. Topics in Sex and Gender. Faculty present courses based on their area of expertise and specialization in the field of sex and gender. Students should check current sociology department notices of course offerings for specific topics. Students may receive credit for this course up to three times for different topics. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors. Same as WMST 3046.

SOCY 4000-3. Gender, Genocide, and Mass Trauma. Studies the persistence of genocide and the effects of mass trauma on women and girls. Within the framework of political and social catastrophe, the course examines cataclysmic world events and the traumatic consequences for women of religious persecution, colonialism, slavery, and the genocides of the twentieth and twenty first centuries. Prereq., SOCY 1016 or WMST 2000. Same as WMST 4010.

SOCY 4016-3. Sex, Gender, and Society 2. Studies status and power differences between the sexes at individual, group, and societal levels. Examines empirically established sex differences, and reviews biological, psychological, and sociological explanations for gender differences. Prereqs., SOCY 1016 or WMST 2000. Restricted to junior/senior SOCY majors. Same as WMST 4016.

SOCY 4086-3. Family and Society. Studies the changing relationship between family and social structure. Examines variations in family organization and considers political, social, ideological, demographic, and economic determinants of family formation. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors. Same as WMST 4086.

SOCY 6016-3. Topics in Sex and Gender. Covers diverse specializations of faculty in the area of sex and gender. See current departmental announcements or online Schedule Planner for specific content. May be repeated up to 9 total credit hours for different topics. Formerly SOCY 5016.

SOCY 7006-3. Sociology of Sex and Gender. Theoretical and empirical examination of sex stratification, sex role differentiation, and sex differences in socialization, personality, institutions, and culture. Formerly SOCY 5006.

SOCY 7026-3. Feminist Research Methods. Epistemological and methodological issues generated by feminist research and students' own projects. Formerly SOCY 5026.

SOCY 7036-3. Feminist Theory. Examines the main schools of feminist thought and their impact upon sociological theories. Also examines current feminist theoretical debates and their relevance to feminist sociology. Prereq., graduate standing. Formerly SOCY 5036.

Spanish and Portuguese

Spanish

SPAN 1000-3. Cultural Difference through Hispanic Literature. For freshmen only. Organized around the general topic of cultural differences. Focuses on a related issue such as gender or history articulated in the literature of Spain, Latin America, and the Hispanic United States. Taught in English; students read selected literary texts in English from the various traditions. Does not count towards the Spanish major. Approved for arts and sciences core curriculum: literature and the arts.

SPAN 1010-5. Beginning Spanish 1. Offers students a firm command of Spanish grammar. Grammar is used as a point of departure for development of oral skills. Reading and writing are stressed to a lesser degree. Attendance at the language laboratory may be mandatory. Credit not granted for this course and Span 1150.

SPAN 1020-5. Beginning Spanish 2. Continuation of Span 1010. Attendance at the language laboratory may be mandatory. Prereq., SPAN 1010 (min. grade of C-), or placement. Credit not granted for this course and SPAN 1150.

SPAN 2110-3. Second-Year Spanish 1. Grammar review. Emphasizes reading, writing, and speaking skills. Attendance at the language laboratory may be mandatory. Prereq., SPAN 1020 (min. grade C-), or placement. Credit not granted for this course and SPAN 2150. Meets MAPS requirement for foreign language.

SPAN 2120-3. Second-Year Spanish 2. Grammar review. Emphasizes reading, writing, and speaking skills. Attendance at the language laboratory may be mandatory. Prereq., SPAN 2110 (min. grade C-) or better, or placement. Credit not granted for this course and SPAN 2150.

SPAN 2150-5. Intensive Second-Year Spanish. Intensive review of grammar and other subjects covered in SPAN 2110 and 2120. Attendance at the language laboratory may be mandatory. Prereq., SPAN 1020 (min. grade of C-), or placement and departmental approval. Credit not granted for this course and SPAN 2110 or 2120. Meets MAPS requirement for foreign language.

SPAN 2450-3. Catalan for Spanish Speakers. Offers an intensive introduction to the Catalan language for those able to speak Spanish. By the end of the course students should be able to communicate well in all language-skills areas: listening comprehension, speaking, reading and writing. Students will also have gained a better understanding and appreciation of the Catalan singularity. Prereq., five semesters of college Spanish or equivalent, or SPAN 3000, or placement, or department approval.

SPAN 3000-5. Advanced Spanish Language Skills. Transitional course that introduces students to the Spanish major and improves their writing skills. Involves composition, reading, and to a lesser extent, conversation. Prereq., Span 2120 or 2150 (min. grade C-), the equivalent, or placement.

SPAN 3001-3. Spanish Conversation. Emphasizes vocabulary acquisition and speaking fluency. Through structured and carefully monitored individual, group, and class work, students achieve enduring language growth and meaningful acculturation that otherwise could only be achieved through an extended stay in an Hispanic country. Intended for those learning Spanish as a second-language. Native speakers of Spanish who have pursued formal education in a Spanish speaking country will not be admitted to the course. Heritage speakers of Spanish (native speakers who have pursued formal education in a non-Spanish speaking setting) as well as students from bilingual K-12 programs must meet with the coordinator to determine appropriate class level. Prereqs., SPAN 2120 or 2150 (min. grade C-), the equivalent, or placement. Credit not granted for this course and SPAN 3002. Does not count toward the Spanish major.

SPAN 3002-3. Advanced Spanish Conversation. Designed for Spanish majors, this course focuses on refining fluency in both informal and formal discourse through group discussions, class work, and individual and group presentations with a focus on preparing students for communication in professional settings. To that end, the materials used in the course will emphasize themes and problems relevant to the contemporary Hispanic world. Prereq., SPAN 3000 (min. grade C-) or equivalent. Credit not granted for this course and SPAN 3001.

SPAN 3030-3. Professional Spanish for Business 1. Includes the study of business vocabulary, business concepts, geographic context, and cultural context. Prereq., SPAN 3000.

SPAN 3040-3. Professional Spanish for Business 2. Continuation of SPAN 3030 with more emphasis on interpreting and elementary translation. Some attention is given to the writing of resumes and application letters, as well as to the entire job-search process. Prereqs., SPAN 3000, 3030.

SPAN 3050-3. Spanish Phonology and Phonetics. Designed to teach some of the methods, techniques, and tools of descriptive linguistics as they apply to articulatory phonetics. Students analyze important contrasts between sounds of Spanish and English by means of phonetic transcription. Prereq., SPAN 3000.

SPAN 3100-3. Literary Analysis. Students read short stories and other brief narrative texts, critical and creative essays, short plays, and poems to facilitate the acquisition of critical skills in identification of basic ideological and formalistic issues within texts being studied. Prereq., SPAN 3000 or equivalent.

SPAN 3120-3. Advanced Spanish Grammar. Analysis of texts from morphological and syntactic perspectives. Structural and semantic characteristics of major features of Spanish are studied at the sentence level. Use of these grammatical features is then studied in selected literary texts. Prereq., SPAN 3000 or equivalent.

SPAN 3150-3. Linguistic Analysis of Spanish. Introduces students to fundamental areas of linguistic analysis with special attention paid to Spanish (and Portuguese). The structural systems of language will be introduced (principles of sound patterns, word formation, meaning, and sentence structure). Different types of language variation will be discussed (historical, social, regional). Prereq., SPAN 3000 or equivalent.

SPAN 3200-3. Spanish Culture. Examines historical bases of modern Spain's cultural and political currents. Prereq., SPAN 3000.

SPAN 3210-3. The Cultural Heritage of Latin America. Examines literary, artistic, and philosophical currents in Latin America beginning with pre-Columbian indigenous cultures and continuing to the present. Prereq., SPAN 3000. Credit not granted for this course and SPAN 3220.

SPAN 3220-3. Latin American Culture: Spanish America and Brazil. Examines literary, artistic, and philosophical currents in Spanish America and Portuguese America (Brazil), from pre-Columbian times to the present. Taught in Spanish. Prereq., SPAN 3000. Recommended prereqs., PORT 2110 and 2120. Credit not granted for this course and SPAN 3210. Same as PORT 3220.

SPAN 3240-3. Catalan Culture 1: Nation and Art. Introduces students to the literary, artistic, and historical currents of Catalonia, an economically vibrant area of the Iberian Peninsula with 10 million people, its capital Barcelona, and a distinct culture and language. The course examines national identity and major works from renowned Catalan artists, spanning architecture, painting, and literature, like Dali, Gaudi, or Miro. Prereq., SPAN 3000.

SPAN 3250-3. Catalan Culture 2: Contemporary Trends and Barcelona. Introduces students to the contemporary social and cultural trends of Catalonia as they take place mainly in its capital Barcelona. The course examines current developments in fields such as theatre, art, fashion, cooking, urban design or architecture. Prereq., SPAN 3000.

SPAN 3260-3. Late 19th and 20th Century Argentine Narrative. Considers a series of late 19th and 20th century canonical works from several genres (poetry, short story, essay, and the novel). The student will acquire a very specific knowledge of late 19th and 20th century Argentine literature, its relationship to specific social actors and specific historical processes. Prereq., SPAN 3000 or equivalent.

SPAN 3270-3. Barcelona: Understanding Local and Immigrant Cultures. Explores the history of Barcelona, a cosmopolitan city that is one of the oldest in Europe, from an interdisciplinary, European perspective that emphasizes the city's cultural diversity and pluralism. A range of historical, literary, artistic, and sociological texts will be examined. Taught in Spanish. Offered through the Study Abroad program. Prereq., SPAN 3000. Approved for arts and sciences core curriculum: human diversity.

SPAN 3310-3. 20th Century Spanish Literature. Surveys leading writers of Spain from 1898 until the present. Prereq., SPAN 3100.

SPAN 3340-3. 20th Century Spanish American Literature. Introduces contemporary Spanish American literature. Prereq., SPAN 3100.

SPAN 3800-3. Selected Readings: Latin American Literature in Translation. Introduces selected Latin American (Spanish and Portuguese) literature masterpieces. Taught in English. Does not count toward the Spanish major.

SPAN 4010-3. Advanced Rhetoric and Composition. Designed to improve written expression in Spanish. Offers a detailed study of nuances of grammar points most difficult for students. Gives attention to errors in student compositions and to various styles of written Spanish. Prereqs., SPAN 3100 and 3120 or equivalent.

SPAN 4060-3. Problems of Business Translation in Spanish 1. Develops skills in English-Spanish and Spanish-English translation and interpretation. Prereq., SPAN 3040 or equivalent.

SPAN 4070-3. Problems of Business Translation in Spanish 2. Legal and commercial documents are studied, prepared, and discussed to enable students to perform successfully in real translation situations. Prereq., SPAN 4060 or equivalent.

SPAN 4110-3. Hispanic Women Writers. Discusses the image of women in Spanish literature through the centuries using works by representative female writers. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4150-3. Masterpieces of Spanish Literature to 1700. Treats major literary tendencies of Spanish literature from its origins to the end of the Baroque period. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4160-3. Masterpieces of Spanish Literature: 1700 to Present. Requires a reading of selected masterpieces and an examination of major movements and figures in the literature of Spain from 1700 to the present. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4170-3. Masterpieces of Spanish American Literature to 1898. Examines major works of Spanish American literature from the colonial period to the late 19th century. Emphasizes major figures and their works. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4180-3. Masterpieces of Spanish American Literature: 1898 to Present. Examines major works of Spanish American literature from late 19th century to present. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4220 (1-3). Special Topics in Spanish and/or Spanish American Literature. Examines intensively particular topics or issues concerning Spanish and/or Spanish American literature selected by the instructor. May be repeated up to 7 total credit hours. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4230-3. Special Topics in Luso-Brazilian and/or African Literature. Designed to examine intensively particular topics or issues concerning the literatures of Portugal, Brazil, and/or the African countries of Portuguese colonization. Taught in Spanish. May be repeated up to 6 total credit hours. Prereqs., PORT 3230, SPAN 3100, 3120, and an additional course above SPAN 3000. Same as PORT 4230.

SPAN 4430-3. Special Topics in Hispanic Linguistics. Examines intensively particular topics or issues concerning Hispanic linguistics selected by the instructor. May be repeated up to 9 total credit hours on different topics. Prereqs., SPAN 3100, 3120, and an additional course above 3000.

SPAN 4450-3. Introduction to Hispanic Linguistics. Introduces students to the main areas of inquiry within the field of Hispanic linguistics. Topics to be covered include speech and language, phonetics and phonology, morphology and syntax, semantics, linguistic change and variation, and Spanish spoken in the United States. Prereqs., SPAN 3100, 3120, and an additional course above 3000. Same as SPAN 5450.

SPAN 4500-3. Methods of Teaching Hispanic Literature and Cultures. Introduces the methodologies associated with teaching Hispanic literature and culture in the secondary schools. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000. Same as SPAN 5500.

SPAN 4620-3. Cervantes. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4650-3. Methods of Teaching Spanish. Familiarizes students with current methodology and techniques in foreign language teaching. Peer-teaching coupled with opportunity to teach mini-lessons provide students with actual teaching experience in the foreign language classroom. Prereqs., SPAN 3100, 3120, an additional course above SPAN 3000, and admission to the teacher certification program or departmental approval. Same as SPAN 5650.

SPAN 4660-6. High School Spanish Teaching. Part of supervised secondary school teaching required for state certification to teach Spanish. These hours do

not count toward student hours in the major nor in the total departmental hours allowed. The credit is pass/fail only. Prereq., SPAN 4650/5650.

SPAN 4840 (1-3). Independent Study. Departmental approval required. May be repeated up to 7 total credit hours.

SPAN 4930 (1-4). Languages Internship for Professions. Participants interested in public service or management-oriented careers in government or business are able to work as interns in public sector agencies or in private industry, on campus, or abroad. Prereqs., SPAN 3100 and 3200, an additional course above SPAN 3000, and departmental approval. Instructor consent required.

SPAN 4980-1. Methods Language Learn/Pedagogy. Required, intensive mini-course for teaching assistants in Spanish and Portuguese. Provides teachers with the opportunity to learn about language learning theory and pedagogy. Prereq., graduate standing or departmental consent.

SPAN 4990-3. Spanish Honors Thesis. May be repeated up to 7 total credit hours. Prereqs., 18 hours of upper-division Spanish (3.00 GPA overall and 3.50 GPA in Spanish).

SPAN 5120 (1-3). Seminar: Spanish Literature and/or Spanish American Literature. Selected topics in Spanish and/or Spanish American literature. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental consent. Same as SPAN 7120.

SPAN 5130 (1-3). Seminar: Critical Approaches to Hispanic Literature. Treats various topics and genres, as needs and resources dictate. Gives special attention to theoretical and critical analysis of Hispanic literature with greatest emphasis on contemporary trends. Genres might include narrative, poetry, and theatre. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental consent. Same as SPAN 7130.

SPAN 5140-3. Seminar: Spanish Literature, Medieval Period. Studies medieval works, authors, and themes, with consideration of principal influences from other literatures. Reading in Old Spanish. May be repeated up to 6 total credit hours. Prereq., graduate standing and SPAN 5420 or 7420 or instructor consent. Same as SPAN 7140.

SPAN 5200-3. Seminar: Spanish Literature, Renaissance and Baroque. Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, *Don Quixote*, and *Novelas ejemplares*, picaresque novel, and the Spanish comedia of the 17th century. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental consent. Same as SPAN 7200.

SPAN 5210 (2-4). Seminar: Spanish Literature, 18th and/or 19th Centuries. Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry, and 19th century theatre. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental consent. Same as SPAN 7210.

SPAN 5220 (1-3). Seminar: Spanish Literature, 20th Century. Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental consent. Same as SPAN 7220.

SPAN 5300 (2-4). Seminar: Spanish American Literature, Colonial Period and/or 19th Century. Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental consent. Same as SPAN 7300.

SPAN 5320 (1-3). Seminar: 20th Century Spanish American Literature. Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional

novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or department consent. Same as SPAN 7320.

SPAN 5400 (2-4). Seminar: Spanish Phonology. Topics within Spanish phonology are treated, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching, and different schools of Spanish phonology. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental consent. Same as SPAN 7400.

SPAN 5410 (2-4). Seminar: Spanish Syntax. Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax, and different schools of Spanish syntax. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental consent. Same as SPAN 7410.

SPAN 5420 (2-4). Seminar: History of the Spanish Language. Treats topics within the history of the Spanish language, as needs and resources dictate. Concerned with linguistic evolution of Spanish from neo-Latino to its present status as a world language; considers important historic, linguistic, literary, and cultural currents. Representative topics might include a diachronic study of Spanish linguistic forms, the extension of Spanish to the New World, and linguistic and literary texts in Old Spanish. May be repeated up to 7 total credit hours. Prereq., graduate standing in Span or Departmental Consent. Same as SPAN 7420.

SPAN 5430 (1-3). Seminar: Hispanic Linguistics. Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental consent. Same as SPAN 7430.

SPAN 5440-3. Seminar: Trends in Hispanic Linguistics. Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition, and applied linguistics. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental consent. Same as SPAN 7440.

SPAN 5450-3. Introduction to Hispanic Literature Linguistics. Same as SPAN 4450.

SPAN 5460-3. Topics in Spanish Applied Linguistics. Treats topics within the scope of Spanish first and second language acquisition and the speech of bilinguals. Other topics include contrasting linguistics, interlingual stages of learning, and code switching as they relate to language acquisition. Prereq., graduate standing or instructor consent. Same as Span 7460.

SPAN 5500-3. Seminar: Methods of Teaching Hispanic Literature and Cultures. Same as SPAN 4500.

SPAN 5650-3. Methods of Teaching Spanish. Same as SPAN 4650.

SPAN 6840 (1-3). Independent Study. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental approval.

SPAN 6940-1. Master's Degree Candidate. Prereq., graduate standing in Spanish or departmental approval.

SPAN 6950 (1-6). Master's Thesis. Prereq., graduate standing in Spanish or departmental approval.

SPAN 7120 (1-3). Seminar: Spanish Literature and/or Spanish American Literature. Same as SPAN 5120.

SPAN 7130 (1-3). Seminar: Critical Approaches to Hispanic Literature. Same as SPAN 5130.

SPAN 7140-3. Seminar: Spanish Literature, Medieval Period. Same as SPAN 5140. May be repeated up to 6 total credit hours.

SPAN 7200-3. Seminar: Spanish Literature, Renaissance and Baroque. Same as SPAN 5200.

SPAN 7210 (2-4). Seminar: Spanish Literature, 18th and/or 19th Centuries. Same as SPAN 5210.

SPAN 7220 (1-3). Seminar: Spanish Literature, 20th Century. Same as SPAN 5220.

SPAN 7300 (2-4). Seminar: Spanish American Literature, Colonial Period and/or 19th Century. Same as SPAN 5300.

SPAN 7320 (1-3). Seminar: 20th Century Spanish American Literature. Same as SPAN 5320.

SPAN 7400 (2-4). Seminar: Spanish Phonology. Same as SPAN 5400.

SPAN 7410 (2-4). Seminar: Spanish Syntax. Same as SPAN 5410.

SPAN 7420 (2-4). Seminar: History of the Spanish Language. Same as SPAN 5420.

SPAN 7430 (1-3). Seminar: Hispanic Linguistics. Same as SPAN 5430.

SPAN 7440-3. Seminar: Trends in Hispanic Linguistics. Same as SPAN 5440.

SPAN 7460-3. Topics in Spanish Language Acquisition and Applied Linguistics. Same as SPAN 5460.

SPAN 8840 (1-3). Independent Study. May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental approval.

SPAN 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Prereq., graduate standing in Spanish or departmental approval.

Portuguese

PORT 1010-5. Beginning Portuguese 1. Offers students a firm command of Portuguese grammar. Uses grammar as point of departure for development of oral skills. Reading and writing stressed to lesser degree. Attendance at language laboratory may be mandatory.

PORT 1020-5. Beginning Portuguese 2. Continuation of PORT 1010. Prereq., PORT 1010 (min. grade C-) or placement.

PORT 2110-3. Second-Year Portuguese 1. Includes grammar review and a study of Portuguese and Brazilian culture, civilization, literature, and art. Prereq., PORT 1020 (min. grade C-) or placement. Meets MAPS requirement for foreign language.

PORT 2120-3. Second-Year Portuguese 2. Includes grammar review and a study of Portuguese and Brazilian culture, civilization, literature, and art. Prereq., PORT 2110 (min. grade C-) or placement.

PORT 2150-5. Intensive Second-Year Portuguese. Intensive review of structures normally covered in PORT 2110 and 2120. Prereqs., PORT 1020 with a grade of C- or better, or placement, and departmental approval. Not open to students with credit in PORT 2110 and 2120. Meets MAPS requirement for foreign language.

PORT 2350-3. Portuguese for Spanish Speakers. Intensive introduction to the Portuguese language for those able to speak Spanish. Prereq., five semesters of college Spanish or equivalent, SPAN 3000, placement, or departmental approval.

PORT 3003-3 Advanced Portuguese Language Skills. Builds vocabulary and competence in more sophisticated written Portuguese. Involves composition, reading, grammar, and class discussion. Themes are drawn primarily from current issues in Brazil. Mandatory for Portuguese-track majors. Prereqs., PORT 2120, 2150, or 2350.

PORT 3220-3. Latin American Culture: Spanish America and Brazil. Examines literary, artistic, and philosophical currents in Spanish America and Portuguese America (Brazil), from pre-Columbian times to the present. Taught in Spanish. Prereq., SPAN 3000. Recommended prereqs., PORT 2110 and 2120. Credit not granted for this course and SPAN 3210. Same as SPAN 3220.

PORT 3230-3. Lusophone Cultures: Brazil, Portugal, and Lusophone Africa. Examines literary, artistic and intellectual currents in Brazil, Portugal and Lusophone Africa from the 15th century period of Portuguese expansion to the post-colonial present. Taught in Portuguese. Prereqs., PORT 2110, 2120 and 2350 (min. grade C-) or departmental approval.

PORT 4110-3. Survey of Brazilian Literature. Examines major works of Brazilian literature. Prereqs., PORT 2120, 2350 and 3230 (min. grade C-) or equivalent. Same as PORT 5110.

PORT 4150-3. Survey of Portuguese Literature. Examines major works of Portuguese literature. Prereqs., PORT 2120, 2350, and 3230 (min. grade C-) or equivalent. Same as PORT 5150.

PORT 4230-3. Special Topics in Luso-Brazilian and/or African Literature. Designed to examine intensively particular topics or issues concerning the literatures of Portugal, Brazil, and/or the African countries of Portuguese colonization. Taught in Spanish. May be repeated up to 6 total credit hours. Prereqs., PORT 3230, SPAN 3100, 3120, and an additional course above SPAN 3000. Same as SPAN 4230.

PORT 4840 (1-3). Independent Study. May be repeated up to 7 total credit hours. Prereq., departmental approval.

PORT 5110-3. Survey of Brazilian Literature. Same as PORT 4110.

PORT 5150-3. Survey of Portuguese Literature. Same as PORT 4150.

Speech, Language, and Hearing Sciences

Didactic: All-Department

SLHS 1010-3. Disabilities in Contemporary American Society. Addresses the issue that 50 percent of all individuals experience disability in their lifetime. Introduces students to the social, cultural, psychological, economic, political, legal, and health-care issues related to society and individuals with disabilities. Approved for arts and sciences core curriculum: contemporary societies or ideals and values.

SLHS 2000-3. Introduction to Communication Disorders. Surveys communication disorders, including hearing impairments, learning disabilities, and speech-language disorders, as well as an introduction to basic speech and hearing science.

SLHS 2010-3. Science of Human Communication. Discusses how human communication (the process by which a thought is transmitted from the brain of a speaker to the brain of a listener) involves a complex interaction of acoustics, anatomy, physiology, neurobiology, and psychology. Approved for arts and sciences core curriculum: natural science.

SLHS 4000-3. Multicultural Aspects of Communication Differences and Disorders. Examines perceptions and attitudes regarding differences in communication as a function of cultural-linguistic diversity. Discusses implications of differing verbal and nonverbal communication styles of various cultural groups in terms of professional responsibilities. Prereq., upper-division standing and a minimum of 60 credit hours.

SLHS 4100 (1-3). Special Topics in Speech, Language, and Hearing Sciences. Studies selected topics in speech, language, hearing sciences, communication disorders, and other professional issues.

SLHS 4560-3. Language Development. Covers the development of language in childhood and into adult life, emphasizing the role of environment and biological endowment in learning to communicate with words, sentences, and narratives. Prereqs. or coreqs., PSYC 1001, LING 2000. Same as LING 4560, PSYC 4560.

SLHS 5000-2. SLHS Research Methods 1. Familiarizes students with basic methodologies and research designs employed in the field. Focuses on critical reading of research papers and design of experiments. At least one research project is conducted and written as part of the course requirements. May be repeated up to 4 total credit hours.

SLHS 5110-2. Clinical Theory and Practice. Reviews models and theoretical perspectives regarding communication disorders with application to the clinical processes of assessment, intervention, counseling, and efficacy of intervention. Focuses on issues, challenges, and skills related to working with consumers of speech-language pathology and audiology services and their families, cultural competence, legal and ethical practices, teaming, and collaborative service delivery. Prereq., graduate standing.

SLHS 5120-3. Foreign Language Learning in Students with Language Learning Disabilities. Introduces a foundational knowledge of language based learning and processing problems that impact foreign language learning in students with disabilities. Must be accepted into the MFL certificate program.

SLHS 5130-3. Curricular Accommodation Programs for Students with Foreign Language Learning Disabilities. Provides knowledge about the legal bases for student accommodations for MFL learning disabilities, the administrative proce-

dures and policies surrounding accommodations, assessment, advising and related implementation issues. Must be accepted into the MFL certificate program.

SLHS 5140-3. Accommodated Foreign Language Instructional Interventions for Students with Language Learning Disabilities. Provides knowledge of the principles and skills used to develop modified foreign language instruction for students with language based learning disabilities. Must be accepted into the MFL certificate program.

SLHS 6000 (1-4). Problems in Speech, Language, and Hearing Sciences. Studies selected topics related to the theory and management of communication disorders, and theoretical/scientific information related to speech, language, and hearing.

SLHS 6650-3. Counseling and Professional Ethics. Explores counseling theories and techniques following the diagnosis of a disability across the life span. Considers issues related to grieving and mourning, parenting, disability, cultural customs, attachment, and relationships. Covers professional ethics and ethical responsibilities.

SLHS 6660-3. Multicultural Issues in SLHS and Communication Theory. Provides an in-depth understanding and first-hand knowledge of different racial, ethnic and religious communities, which is necessary to develop and refine multicultural clinical competence. Incorporates scholarly readings and experiential learning in multicultural settings and fosters participants' qualitative research skills.

SLHS 6940-1. Candidate for Degree.

SLHS 6950 (1-7). Master's Thesis.

SLHS 7000-3. Research Designs in Human Communication Sciences and Disorders. Offers an advanced seminar in research designs for human behavior: efficacy, ethnographic, single-subject, quasi-experimental, and experimental designs. Designed to familiarize students with terminologies and research designs frequently used in speech-language-hearing areas. Prereq., basic statistics.

SLHS 7100-3. Cognitive Bases of Human Communication and Its Disorders. Explores major cognitive theories related to language, including connectionism, information processing, and cognitive mechanisms of early lexical learning. Discusses data from children and adults.

SLHS 7200-3. Business Aspects of Audiology. Focuses on the business aspects of managing an audiology practice. Addresses developing a business plan, contracting for services, legal issues, financial reporting, budgeting, pricing, billing and reimbursement, regulatory issues, marketing, personnel management, risk abatement, and business ethics. Prereq., good standing in the SLHS graduate program or instructor consent.

SLHS 7250-3. Research Methods in Language Development. Covers advanced methods of conducting research in language development and acquired disorders. Students design a research project that includes elicitation tasks, transcription, and data coding and analysis. Explores child language data archives and computer-based analysis programs. Prereqs., LING/PSYC/SLHS 4560 or instructor consent. Same as LING 7250.

SLHS 7450-3. Audiology Capstone Project. Provides an individualized project for AUD, completed prior to initiation of final clinical year. May be in the form of research-based investigation, an evidence-based position paper, a clinical protocol based on peer-reviewed literature, a grant proposal, or another format approved by AUD committee. Project requires approved proposal by AUD committee and focused study supervised by capstone advisor. Restricted to students enrolled in the AUD graduate program.

SLHS 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Didactic: Speech-Language Pathology

SLHS 4502-3. Language Disorders: Child and Adult. Language disorders can result from problems with cognitive, linguistic, and/or discourse processing. The theoretical framework of language dysfunction is addressed while drawing upon real clinical examples of language disorders that have been observed in children and adults. Prereq., SLHS 4560.

SLHS 4512-3. Speech Disorders: Voice, Cleft Palate, Motor Disorders, Stuttering. Emphasizes stuttering, clefting, voice disorders, and motor disorders. Discusses research, evaluation, and treatment pertaining to each of these four disorder areas. Prereq., SLHS 3136.

SLHS 5032-3. Competencies and Strategies for the SLPA. Includes roles and responsibilities for the Speech Language Pathology Assistant (SLPA) working in the public schools, service delivery models, health and safety, screening assistive technology, intervention and self reflection and evaluation. Prereq., SLHS 4918. Must be accepted in the SLPA certification program.

SLHS 5242-3. Language Disorders in School Age Children. Addresses the nature, assessment, and treatment of developmental language disorders in school age children. Prereqs., graduate standing and undergraduate background in SLHS.

SLHS 5252-3. Acquired Language Disorders in Adults. Introduces the neural bases and medical etiologies of acquired language disorders in adults, explores the ways in which normal language processing may become disordered, and studies current methods of evaluation and treatment design. Prereqs., graduate standing and undergraduate SLHS background.

SLHS 5262-3. Dysphagia. Provides students with background in the anatomical, physiological, and neurological bases of swallowing function and disorders across the lifespan. Etiological factors are presented, as well as various assessment tools and principles of treatment of swallowing disorders in children and adults.

SLHS 5272-3. Augmentative Alternative Communication: Theory and Use. Provides an overview of the application of current technology to alternative/augmentative communication. Emphasizes assessment and intervention with nonverbal children and adults with need for alternative/augmentative communication systems. Presents various technological devices and systems. Addresses system selection, programming, development, and integration of use in environmental contexts. Prereq., SLHS 5232 and instructor consent.

SLHS 5282-3. Acquired Cognitive Disorders. Explores the theoretical and clinical management of acquired cognitive disorders that impact communication. Includes basic functional neuroanatomy. Prereq., graduate standing.

SLHS 5292-3. Motor Speech Disorders. Presents the neural bases of normal and disordered speech motor control, teaches assessment and treatment of motor speech disorders of children and adults, and applies motor control research to clinical problems. Prereqs., graduate standing and undergraduate SLHS background.

SLHS 5302-3. Phonological Disorders. Provides overview of phonological development, perception, and production. Presents factors related to articulation and focuses on critical evaluation of traditional and phonological based assessment and intervention procedures. Includes coverage of phonological awareness, metaphonological skills as related to literacy. Prereq., graduate standing.

SLHS 5332-3. Cleft Palate and Voice Disorders. Examines the anatomical and physiological bases for normal and disordered velopharyngeal and laryngeal function. Familiarizes students with evaluation and treatment of the speech of individuals with cleft lip and palate and laryngeal-based voice disorders.

SLHS 5362-3. Stuttering: Therapy and Research. Emphasizes evaluation and treatment of children and adults who stutter. Discusses and evaluates various stuttering intervention approaches. Also discusses counseling parents of young children who stutter. Familiarity with research is a secondary emphasis.

SLHS 5602-3. Seminar: Intervention for Children with Communication Challenges: Birth to Six. Provides an orientation to family-directed intervention in serving young children with disabilities and their families. Facilitates integration of medical, physiological, and theoretical perspectives with specific approaches to assessment and intervention.

SLHS 5612-3. Learning Disabilities. Focuses on the nature, assessment, and treatment of learning disabilities and their relation to language disorders. Prereqs., SLHS 5242 or 5293.

SLHS 5930-4. Speech Language Pathology Assistant Internship. Placement for a minimum of 12 hours per week for a total of 180 hours including 100 direct student contact hours under the supervision of a fully credentialed SLP, to fully develop requisite skills as an SLPA and become employed in a public school setting. Prereq., SLHS 4918. Must be accepted into the SLPA certificate program.

Didactic: Audiology

SLHS 4704-3. Audiological Evaluation. Studies basic principles and techniques of hearing evaluation, including pure-tone, speech, immittance, and advanced audiometry; hearing conservation in hospital, school, and industrial settings; and identification and evaluation of auditory pathologies. Required projects in screening and pure-tone audiometry. Prereq., SLHS 3136.

SLHS 4714-3. Audiological Rehabilitation. Covers basic principles and techniques related to the habilitation and rehabilitation of individuals who are deaf or hard of hearing: amplification, speech, language, auditory, speech reading, and educational issues. Prereq., SLHS 4704.

SLHS 5674-3. Signals and Systems in Audiology. Provides in-depth study of instrumentation used by audiologists for hearing aid evaluation and fitting, signal generation and modification, and signal measurement and calibration. Prereq., SLHS graduate standing.

SLHS 6504-1. Professional Ethics in Audiology. Overview of ethics and ethical issues in the profession of audiology. Topics to be discussed include code of ethics by professions, approaches to analyzing ethical dilemmas, ethics in relationships with manufacturers, and ethical considerations in teaching, clinical practice and research. Prereq., good standing in SLHS graduate program or instructor consent.

SLHS 6514-1. Professional Issues in Audiology. Overview of professional issues related to the profession of audiology. Topics to be discussed include certification, licensure, professional associations, infection control, practice management, federal regulations related to audiology, professional communications and professional relationships. Prereq., good standing in SLHS graduate program or instructor consent.

SLHS 6544-3. Auditory Processes: Adult Assessment. Advanced study on the current science surrounding hearing assessment of adults across the age span. Includes theoretical foundations and clinical applications.

SLHS 6554-3. Auditory Processes: Child Assessment. Provides advanced study in hearing assessment and management of children across the age span. Topics include epidemiological, medical, audiological, developmental, and habilitative aspects of normal and impaired hearing in children. Prereqs., graduate standing and undergraduate audiology course work.

SLHS 6564-3. Auditory Processes: Neurodiagnostics. Provides advanced study in the neural bases of hearing. Includes theoretical foundations and clinical assessment of neurological functioning in auditory systems with both normal and impaired function. Prereq., SLHS 6544.

SLHS 6614-3. Advanced Technologies in Amplification and Electroacoustics. Discusses theoretical and clinical issues regarding the design, fitting, and evaluation of amplification technology for individuals with hearing loss. Includes the use of behavioral, psychological, electroacoustic, and physiological (real ear) measures in the selection and evaluation of digital and analog hearing aid technology.

SLHS 6640-3. Communication Processes and Hearing Loss: School Age through Adult. Theories and processes of the communication of individuals with hearing loss from the school age to adult population.

SLHS 7520-3. Auditory Processes: Medical and Genetic Bases. Discusses current developments in epidemiology, pathogenesis, and symptomatology of hearing loss. Investigates the genetic bases of hearing loss and deafness. Incorporates clinical decision theory in assessment and intervention. Explores cross-disciplinary topics from genetics, radiology, pharmacology, pathology, and otology.

SLHS 7530-3. Auditory Processes: Theory and Application in the School Environment. Focuses on application of routine audiological practices such as screening, assessment, rehabilitation, and instrumentation to children in educational settings. Emphasizes federal education regulations and pertinent case law.

SLHS 7540-3. Auditory Processes: Physiology, Assessment, and Management of the Vestibular System. Emphasizes current research on physiology of the vestibular system, including both structure and function. Considers the etiology of both peripheral and central pathologies of the vestibular system. Discusses ways to assess function of the vestibular system as well as theoretical and practical considerations of vestibular rehabilitation.

SLHS 7550-3. Auditory Processes: Environmental and Occupational Issues. Discusses effects of noise and other damaging agents on the physiology of

the auditory system. Highlights principles of hearing conversation programs. Focuses on prevention, identification, and management of occupational hearing loss and current legislation as it pertains to occupational safety and hazards.

SLHS 7614-3. Implantable Devices: Technology and Clinical Application. Examines technological aspects and clinical applications of implantable prostheses such as cochlear implants, brainstem implants, hybrid cochlear implants, Baha devices and middle ear implants. Topics will include: history of implantable devices, anatomy and histopathology of the inner ear, speech processing in implants, mapping devices, candidacy criteria, behavioral and electrophysiologic techniques for assessment and outcomes in implanted children and adults. Prereq., good standing in SLHS graduate program or instructor consent.

SLHS 7640-3. Communication Processes and Hearing Loss: Birth through Six. Provides in-depth study of current research literature and its implications for clinical practice regarding development of communication processes in the first six years of life and impact of hearing loss. Investigates development of language, auditory perception, speech production, social-emotional abilities, and cognition.

Didactic: American Sign Language

Students will not receive credit for a lower level course in foreign language instruction taken after credit has been given for a higher level course in the same language sequence. For example, students will not receive credit for SLHS 2305 if it was taken after they passed SLHS 2315.

SLHS 2305-4. American Sign Language 1. Introduces basic sign vocabulary, grammatical structures of ASL, and the culture of deaf people. Classes are taught using ASL without the use of spoken English.

SLHS 2315-4. American Sign Language 2. Develops more complex vocabulary and grammatical structures, and an understanding of deaf culture. Classes are taught using ASL without the use of spoken English. Prereq., SLHS 2305 or equivalent.

SLHS 2325-4. American Sign Language 3. Continuation of SLHS 2315. Covers ASL literature, advanced grammatical structures, idiomatic expressions, and deaf culture. Prereq., SLHS 2315 or equivalent. Meets MAPS and core requirement for a foreign language.

SLHS 7035-3. The Development of American Sign Language. Reviews the development of American Sign Language from the prelinguistic period to the time when a child is using complex syntax and morphology. Emphasis on a linguistic description of development and on research methodology. Prereq., SLHS 4035/5035.

SLHS 7775 (1-2). Topics in Cognitive Science. Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as LING 7775, CSCI 7772, EDUC 7775, PSYC 7775, and PHIL 7810.

Didactic: Speech-Hearing Science

SLHS 3006-3. Phonetics. Focuses on production of speech sounds, transcribing speech using the International Phonetic Alphabet, analyzing the acoustic properties of speech sounds, understanding how speech sounds vary depending on the context. Provides a foundation for understanding normal and atypical speech development, atypical speech problems and patterns, regional and foreign accents, and speech recognition by computers.

SLHS 3106-3. Hearing Science. Focuses on the three main aspects of the hearing process: sounds in the environment (physical acoustics), sounds encoded within the auditory system (physiological acoustics), and perception of sound (psychological acoustics). Prereq., SLHS 2010.

SLHS 3116-3. Speech Science. Provides a basic understanding of the structural organization (anatomy), function (physiology), and neural controls of the structures used to produce speech, swallowing, respiration, and related behaviors in humans. Prereq., SLHS 2010.

SLHS 5006-2. Applied Speech Science. Provides an advanced understanding of the acoustics, aerodynamics, and biomechanics of speech production and

related non-speech behaviors. Emphasizes the integration of theoretical constructs in the speech sciences with applied clinical and basic research. Prereq., SLHS 3136 or equivalent.

SLHS 5576-3. Communication Neuroscience. Provides an introduction to the neuroanatomy and neurophysiology of speech production and perception. Considers how speech and language are represented in, and controlled by, the central nervous system. Emphasizes the mechanisms underlying the communication process and discusses relevant neuropathologies.

SLHS 6006-3. Advanced Hearing Science. Provides advanced study in hearing science, including physical, physiological, and psychological acoustics of both normal and impaired auditory systems. Prereq., graduate standing in SLHS; undergraduate course work in biology or anatomy.

SLHS 8206-3. Perception/Production Theories in Human Communication Sciences and Disorders. Provides an advanced seminar in perception/production theories in human communication sciences and disorders. Familiarizes students with current perception theories related to the auditory/visual system and production theories related to the motor/auditory/visual system. Prereq., doctoral student standing or instructor consent.

Practica

SLHS 4918-2. Introduction to Clinical Practice. Introduces students to the clinical processes and key components of assessment and interventions. Explores the applications of the theoretical and scientific information to clinical settings. Students complete supervised observation of individuals with communication challenges. Restricted to juniors/seniors.

SLHS 4938 (1-6). Internship: Speech-Language Intervention. Provides a supervised clinical experience with children who have communication challenges enrolled in the Child Learning Center programs; individuals demonstrating communication disorders as a cotherapist in the Speech, Language, and Hearing Center; or off-campus experience in an affiliated hospital or public school program. May be repeated up to 6 total credit hours. Prereq., SLHS 4918 or instructor consent.

SLHS 5848 (1-4). Independent Study. May be repeated up to 7 total credit hours.

SLHS 5878 (1-3). Practicum 1: Speech-Language-Learning Appraisal. Provides a supervised clinical experience on campus in appraisal of speech, language, and learning disorders after training at the observational level. Prereq., SLHS graduate standing.

SLHS 5898 (1-4). Practicum 1: Speech-Language-Learning Intervention. Offers on-campus and off-campus supervised clinical practice in management of speech-language-hearing disorders in children and adults. May be repeated up to 6 total credit hours. Prereq., SLHS graduate standing.

SLHS 5918 (1-3). Audiology Clinical Practicum. Provides clinical training in the on site Speech, Language and Hearing Center in skills including audiology identification, evaluation and management for adults and children with hearing loss. May be repeated up to 16 total credit hours. Prereq., SLHS 6544.

SLHS 5938 (1-3). Audiology Clinical Rotation. Provides clinical training in an off campus Audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week. May be repeated up to 15 total credit hours. Prereqs., SLHS 5918, 6544, 6614, and instructor approval.

SLHS 6918-7. Practicum 2: Speech-Language-Learning Internship. Gives an off-campus experience in a clinical or hospital setting that provides in-depth practice in management of communication disorders of children and adults. May be repeated up to 10 total credit hours.

SLHS 6928 (1-7). Practicum 2: Public School Internship. Provides an off-campus supervised experience providing extended and in-depth practice involving school-age children in a school classroom. May be repeated up to 10 total credit hours.

SLHS 6938 (1-10). Audiology Clinical Externship. Provides students with full time off campus experience in an Audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children. May be repeated up to 21 total credit hours. Prereq., consent of department advisor.

SLHS 7918-3. Practicum 3: Clinical Supervision.

SLHS 8918-3. Practicum 3: Classroom Instruction.

SLHS 8928-3. Practicum 3: Research Coordination.

Independent Study

SLHS 4849 (1-4). Independent Study for Undergraduates. May be repeated up to 7 total credit hours. Prereq., departmental consent.

SLHS 5849 (1-4). Independent Study 1, M.A. May be repeated up to 7 total credit hours.

SLHS 5859 (1-4). Independent Study 2, M.A. May be repeated up to 7 total credit hours.

SLHS 7849 (1-4). Independent Study 1, PhD. May be repeated up to 7 total credit hours.

SLHS 7859 (1-4). Independent Study 2, PhD. May be repeated up to 7 total credit hours.

Theatre and Dance

Theatre

History/Dramaturgy/Directing

THTR 1011-3. Development of Theatre 1: Forms of Classical Theatre and Drama. Examines the interaction of dramatic literature and performance in classical forms of European and Asian theatre, including Greek, Roman, Indian, Japanese, Medieval, and Renaissance European. Approved for arts and sciences core curriculum: literature and the arts.

THTR 2021-3. Development of Theatre 2: Forms of Modern Theatre and Drama. Examines the interaction of dramatic literature and performance in European theatre from 1800 to present, with attention to innovators like Ibsen, Strindberg, Stanislavsky, Meyerhold, Pirandello, Brecht, Beckett, and Churchill.

THTR 3011-3. Development of the American Musical Theatre. Studies the American musical theatre heritage and its relation to the continually changing social milieu. Examines productions, their creators, and performers. Prereq., junior or senior standing. Recommended prereq., 3 credits in THTR, DNCE, or MUSC. Approved for arts and sciences core curriculum: literature and the arts.

THTR 3031-3. Development of Theatre 3: 20th Century International Drama. Introduces 20th century international drama. Discusses selected plays by major African, Asian, and European authors and explores different dramatic traditions and their increasing interactions throughout the 20th century.

THTR 4021-3. Development of Theatre 4: American Theatre and Drama. Explores issues in American theatre and drama in the 19th through 20th centuries. Prereqs., junior or senior standing and at least 12 hours of THTR course work. Similar to THTR 4001.

THTR 4041-3. Women and Theatre of the 20th and 21st Centuries. Explores a body of 20th and 21st century dramatic literature central to the study of women and theatre as well as the study of 20th and 21st century cultural history from a cross-national and multiracial feminist perspective. Major playwrights, particularly women from Asia, Africa, and Europe, are read and discussed. Recommended prereq., THTR 3031. Same as THTR 5041 and WMST 4041.

THTR 4051-3. Playwriting. Introductory course in craft of playwriting; primary focus on technique of developing short plays. Instructor consent required. May be repeated up to 6 total credit hours.

THTR 4061-3. Directing. Theory and practice of directing for the stage. Prereqs., THTR 1003 or 2003; THTR 1105 and 1115, and two semesters of THTR 3035.

THTR 4081-3. Senior Seminar. Intellectual and conceptual capstone course for departmental majors with separate sections for theatre and dance students. Course promotes integration of ideas regarding history, criticism, and theory in performance and production. All inquiry throughout the semester relates to the theme of creative process.

THTR 4091-3. Elizabeth I and Her Times. Interdisciplinary course explores different aspects of the reign of Elizabeth I: social and political history; literature; the-

ater; and music. Explores the role and impact of a female ruler on English culture. Restricted to juniors and seniors. Same as ENGL 4583 and HIST 4134.

THTR 5011-3. Seminar: Theory and Criticism. Studies theories and criticisms of drama and theatrical performances from Plato to post-modernism.

THTR 5031-3. Russian Theatre. Studies Russian theatre history and the development of Russian drama from the 18th century to the present. Taught in translation.

THTR 5041-3. Women and Theatre of the 20th and 21st Centuries. Same as THTR 4041.

THTR 5051-3. Special Topics in Theatre History. Detailed study of a particular topic in theatre history (e.g., an era, a style, a country, or an organization). Topic specified on MyCUinfo. May be repeated up to 9 total credit hours on different topics.

THTR 5061-3. Seminar: Asian Performance. Study of live performance forms, theory, and literature throughout Asia: performance history, production styles, and social functions of performance. Background in theatre, dance, or Asian studies recommended.

THTR 5071-3. Perspectives on Directing. Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts, and classroom exercises. Prereq., previous directing course work and/or directing experience.

THTR 6011-3. Global Ancient and Classical Theatre. Studies classical and neo-classical drama in performance, with particular attention to 20th century productions and the critical and scholarly responses to these productions.

THTR 6021-3. On-Stage Studies: English Renaissance Drama. Studies Elizabethan and Jacobean dramatic texts as playscripts for performance, with particular attention to contemporary Shakespeare criticism and landmark Shakespeare productions over the last two centuries.

THTR 6031-3. On-Stage Studies: American Theatre. Studies American drama in performance, with particular attention to critical and scholarly responses to landmark productions of American classics.

THTR 6041-3. On-Stage Studies: Modern Theatre. Studies European theatre from 1600 to 1950, with particular attention paid to critical and scholarly responses to landmark productions of classics from the period.

THTR 6051 (1-3). Production Research and Practicum: Directing. Allows students to undertake a production project, normally within the major theatre season, that requires detailed preparatory research, testing of ideas, and public presentation. Students work under faculty supervision and prepare a documented written report and evaluation of the research, rehearsal, and performance process. Prereqs., advanced course work in directing and advisor approval.

THTR 6071-3. Seminar: Perspectives on Acting. Art of acting is examined through study of acting theories and practices developed during major periods of theatre history. Examines the variety of theories about acting that remain today.

THTR 6081-3. Seminar in American Theatre: Lesbians and Gays. Studies the portrayal of lesbians and gays in mainstream American theatre during the 20th and 21st centuries, as well as the contributions of gay and lesbian theatre artists during the same period.

THTR 6091 (1-3). Production Research and Practicum: Dramaturgy. Students undertake a dramaturgical project, normally within the major season, requiring detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision and prepare a documented written report of their project. Prereqs., advanced course work in dramatic literature and advisor approval.

Theatre Design and Technology

THTR 1105-3. Stage Technologies. Introduces technical production elements and procedures, including materials, organizations, methods and equipment to realize theatrical scenery, properties, lighting and sound. Credit not granted for this course and THTR 1065 or 1075.

THTR 1115-3. Costume Technologies. Introduces technical production elements and procedures including materials, organizations, methods and equipment to realize theatrical costuming and make-up. Credit not granted for this course and THTR 1065 or 1075. Restricted to THTR or DNCE majors, freshmen/sophomores, or advisor consent.

THTR 2035-3. Design Fundamentals. Introduces principles and techniques relevant to the expression of dramatic mood and idea through visual elements of the theatre, giving practice in concept development, style selection, and rendering techniques in scenery and costume design.

THTR 3005-3. Costume Design 1. Study and application of the principles of design as applied to stage costume, emphasizing texts in analysis and interpretation. Presented in a studio format and project driven. Explores concept development, style selection, and extensive practice in a variety of media and techniques for costume rendering. Prereq., THTR 1115 or instructor consent.

THTR 3015-3. Scene Design 1. Examines the process of theatrical scene design from early conception to realization. Course work is project-based. Students are introduced to the crafts of script analysis, conceptualization, design expression, drafting, and 3-D model building.

THTR 3035 (1-2). Production Practicum. Practical production projects within a designated area of technical theatre, design, stage management, normally related to the department's season. May be repeated up to 8 total credit hours. Prereqs., THTR 1105 and 1115.

THTR 3045-3. Stage Management. Covers stage management from the inception of a production concept through the process of mounting a production, focusing on the interrelationships of the various artists involved, management and scheduling of time, and the psychology of handling a wide range of personalities. Prereq., THTR 1105 or instructor consent.

THTR 3055-3. Stage Lighting Design 1. Introduces the craft of stage lighting design through experimental lighting labs, lecture/demos, hands-on production experience, and theoretical projects. Subject matter includes aesthetics of light, color theory, lighting for performance, design graphics, and basic lighting technology. Prereq., THTR 1105 or instructor consent.

THTR 3075-3. Sound Design. Study and application of the principles of sound technology and design, emphasizing concepts of electricity, acoustics, equipment, and their application to the stage. Prereq., THTR 1105 or instructor consent.

THTR 3085-3. History of Western Fashion. Surveys topics in western dress from ancient civilizations to contemporary time: the garments, accessories, materials, and technologies of personal adornment in the context of philosophical, political, social, and technological change. Priority given to majors. Replaces THTR 2085.

THTR 4005-3. Costume Design 2. Advanced studio course building on experiences and techniques studied in THTR 3005, with additional emphases on portfolio quality rendering technique and costume production technology as it affects and is affected by the designer. Prereq., THTR 3005.

THTR 4015-3. Scene Design 2. Advanced projects in theatrical scene design. Provides intensive practice in sketching, rendering, drafting and model-building. Emphasizes portfolio development and preparing the student designer for graduate training or professional work. Prereq., THTR 3015 or instructor consent.

THTR 4025-3. Costume Patterning and Construction. Includes techniques for the patterning and construction of contemporary and period costumes. Hands-on format covers techniques, materials, and equipment particular to theatrical production. Prereqs., THTR 1105 and 1115.

THTR 4035-3. Scene Painting. Introduces the craft of scene painting through practical projects. Sessions are in a studio format. Students are trained in traditional methods of scenic art, including layout, representational painting, trompe l'oeil, faux finishing, and related skills. Students are taught about proper tool use and care, paint products, and the profession.

THTR 4055-3. Stage Lighting Design 2. Assumes a basic knowledge of stage lighting; concentrates on advanced technology, processes, and design projects. Prereq., THTR 3055.

THTR 4085-3. Theatre Management. Concentrates on theory and practice of management aspects of the performing arts, emphasizing theatre and dance. Includes marketing, budgeting, house and stage management, audience development, grant writing, unions, and season development. Includes practical experience. Prereqs., THTR 1105 and 1115. Credit not granted for this course and THTR 3065. Same as THTR 5085.

THTR 4095 (1-3). Special Topics in Theatre Design and Technology. Intensive study of specialized topics in theatre technology and design. Topics and credits specified on MyCUinfo. May be repeated up to 12 total credit hours within a term.

THTR 4135-3. Technical Production. Examines the process of and technology for producing theatrical scenery on a limited production timeline. Prereq., THTR 3035. Recommended prereq., THTR 3015 or 3055.

THTR 4145-3. Colloquium in Advanced Design. An advanced theatre design course that emphasizes the collaborative process and advanced design presentation methods. Course work includes completion of several "mock" design projects, with students often working in collaborative teams.

THTR 4555 (1-2). Production Studio. Requires participation in a Theatre department production assignment in the areas of design, technology, or management, as well as participation in a semester portfolio review. May be repeated up to 6 total credit hours. Restricted to TBFA majors. Credit not granted for this course and THTR 4065 or 4075.

THTR 5085-3. Theatre Management. Same as THTR 4085.

THTR 6005 (1-3). Production Research and Practicum: Designing. Allows students to undertake a design project, normally within the theatre season, that requires detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision, and prepare a documented written report and evaluation of the research, design, and realization process, as well as fully rendered designs and/or plots. Projects may be in costumes, lights, or scenery.

Special Courses in Theatre

THTR 1009-3. Introduction to Theatre. Introduces the varieties of theatrical art, past and present, contributions of the various theatrical artists to the total production, and the place of theatre art in today's society. Designed for nonmajors. Approved for arts and sciences core curriculum: literature and the arts.

THTR 1019-3. Theatre Foundations: Text Analysis and Practice for the Theatre Arts. Introduces fundamental methods of text analysis for the stage, presents common vocabulary and concepts of the theatre event as an art form and how it works, and what playmaking means to those who do it. Restricted to freshman/sophomore THTR/TBFA majors.

THTR 2059-3. Open Topics in Theatre and Drama. Covers topics not otherwise listed in the curriculum. Topics for each semester are specified on MyCUinfo.

THTR 2849 (1-3). Independent Study. May be repeated up to 3 total credit hours.

THTR 3149-2. Professional Orientation: Exploring Professional Potentials for Theatre Majors. To explore and identify a wide range of professional opportunities connected to personal strengths and interests in theatre by studying current professional practices, trends and cross-disciplinary connections. Instructor will: provide information/learning needed from representative professionals; open avenues to find/create employment opportunities (including those not limited to theatre related fields) towards internship consideration/post-graduation; and mentor structured self-assessment/professional development. Prereq., THTR 1019. Recommended prereqs., THTR 1105 or 1115.

THTR 3849 (1-3). Independent Study. May be repeated up to 6 total credit hours.

THTR 4009 (1-3). Strategies of Teaching Theatre. Specifically designed for teachers at the elementary, middle school, and secondary levels. Focuses on developing effective, innovative performance-based strategies for teaching theatre.

THTR 4029 (1-12). CU-Boulder Touring Company. Participation in departmental touring dance company. By audition. May be repeated up to 12 total credit hours. Prereqs., DNCE 2021, 3041, or 4061. Restricted to sophomores/juniors/seniors. Full-year course; course consecutive fall and spring semesters required.

THTR 4039-3. Musical Theatre Repertory. Developed around the learning of complete scenes, songs, and dances that are representative of the major periods and styles within musical comedy from the 1920s to the present. Emphasizes in-class performance. Admission by audition. May be repeated up to six total credit hours. Same as THTR 5039.

THTR 4049 (1-4). Problems in Theatre. Opportunity for students to explore, upon consultation with the instructor, areas in theatre that the normal sequence of offerings may not allow. May be repeated up to 9 total credit hours. Same as THTR 5049.

THTR 4059-3. Open Topics in Theatre and Drama. Covers topics not otherwise listed in the curriculum. Topics for each semester are specified on MyCUinfo. May be repeated up to 9 total credit hours.

THTR 4149 (1-3). Theatre Internship. Provides opportunities for theatre majors to explore career opportunities in theatre fields other than, or in addition to, those with performance emphasis. Students apply knowledge and skills developed in their major studies to a practical work experience. Maybe repeated up to 6 total credit hours. Prereq., 30 credit hours in THTR.

THTR 4849 (1-3). Independent Study. May be repeated up to 6 total credit hours.

THTR 5039-3. Musical Theatre Repertory. Same as THTR 4039.

THTR 5049 (1-4). Problems in Theatre. Same as THTR 4049.

THTR 5849 (1-3). Independent Study. May be repeated up to 6 total credit hours.

THTR 6009-1. Research Strategies and Techniques. Examines research methodologies appropriate to the performing arts, particularly theatre and dance. Projects are aimed at familiarizing graduate students with the library and other resources, and the development of thesis and dissertation prospectuses. Same as DNCE 6009.

THTR 6019-3. Professional Orientation. Prepares doctoral students in theatre to write for publication and to understand the intricacies of the publishing world. The course also explores grant writing, theatre pedagogy, evaluating efficacy of projects and programs, and culminates in the creation of a portfolio to be drawn from when applying for jobs.

THTR 6849 (1-3). Independent Study. May be repeated up to 6 total credit hours.

THTR 6949-1. Master's Candidate.

THTR 6959 (1-6). Master's Thesis. May be repeated up to 6 total credit hours.

THTR 8999 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Shakespearean Production

Offered in summer only.

THTR 3037 (2-3). Shakespeare Practicum. Students are assigned to work with production artisans of the Colorado Shakespeare Festival. While there are many possible areas, production designs for each season determine the number of available positions. May substitute for two credits of THTR 3035. Prereq., THTR 1105 or 1115.

THTR 4047-3. Shakespeare Behind the Scenes. Detailed study of script analysis, directing concepts, staging and criticism of the plays being produced by the Colorado Shakespeare Festival.

THTR 6007-3. Colorado Shakespeare Festival Dramaturgy. Students work as production dramaturgs for the Colorado Shakespeare Festival, developing detailed textual, historical, and critical research for CSF productions, participating in education and outreach programs, and writing production-related articles for publication. May be repeated up to 6 total credit hours.

Performance

THTR 1003-3. Acting for Nonmajors. Teaches the basic principles of acting for those with no previous acting experience, focusing on relaxation, concentration, improvisation, use of imagination, actions, objectives, initial monologue and scene work, and basic terms and concepts of process work for the actor.

THTR 2003-3. Acting 1. Emphasizes principles of acting, focusing on exercises in relaxation, talking and listening, actions and objectives, and basic concepts of process work.

THTR 2013-3. Performance of Literature. Students learn to perceive literary form and content and to translate that perception into classroom performances of selected modern plays and stories. Performances, both solo and ensemble, embody literary texts diverse in terms of gender and ethnicity. Prereqs., 15 credit hours and THTR 1003, 2003 or 2043.

THTR 2023-3. Intermediate Acting. Continuation of the beginning acting course (THTR 2003). Emphasis is placed on monologues and scene study of contemporary plays. Basic techniques in developing a character are explored. In addition to required texts, there is a required reading list of plays.

THTR 2043-3. Voice and Movement for the Stage. Natural resources of the human voice and body are studied as artistic resources for the performing artist. Designed to examine both the process and products of vocal and physical craft work.

THTR 3003-3. Advanced Acting. Acting principles and techniques learned in prerequisite courses will be adapted and applied to a range of selected scenes of both contemporary and period plays. Emphasis will be on developing the necessary craft elements to fulfill the demands of the texts explored.

THTR 3013-3. Studio 1: Building a Character. Students learn to deepen and develop their proficiency with specific acting techniques. Explores the craft elements of acting, as well as text analysis. Prereq., THTR 2003. Restricted to BFA program in acting or instructor consent.

THTR 3023-3. Studio 2: Creating a Role. Continued development of acting technique and tools for play analysis, with particular emphasis on scene study. Special attention will be given to the Master Teachers of Acting and their pedagogies. Prereq., THTR 3013 or instructor consent.

THTR 3033 (1-3). Production Research and Practicum: Acting. Allows students to undertake an acting project, either within the major season or approved departmental production. Requires detailed preparational research, rehearsal commitments, and public presentation of theories and concepts in practice. Following the performance, students present written reports and evaluations. May be repeated up to 3 total credit hours. Prereq., THTR 2003 or 2043.

THTR 3043-3. Advanced Voice for the Stage. Continues the work begun in THTR 2043. Studies advanced vocal techniques with the goal of integrating these skills into the working process of the performing artist. Prereqs., THTR 2043 or instructor consent.

THTR 3053-3. Acting 2. Continuation of the techniques introduced in the beginning acting courses (THTR 1003 and 2003). Emphasis is placed on monologues and scene study of contemporary plays. Basic techniques in developing a character are explored. Prereq., THTR 1003 or 2003.

THTR 4013-3. Studio 3: Acting Shakespeare. In-depth study of Shakespearean texts from the perspective of their demands on the actor, including the conventions and performance styles of Elizabethan theatre. Prereqs., THTR 3013 and 3023, or instructor consent.

THTR 4023-3. Studio 4: Playing with Styles. Studies selected styles of theatre performance such as Greek Drama, Comedy of Manners, Commedia Dell'art, Modern Realism, Theatre of Absurd, and Non-Western Theatre, including vocal and physical style elements. Prereq., THTR 3013, 3023, and 4013, or instructor consent.

THTR 4033-3. Advanced Movement for the Stage. Continues the work begun in THTR 2043. Studies the advanced physical techniques with the goal of integrating these skills into the working processes of the performing artist. Prereqs., THTR 2043 or instructor consent.

THTR 4063-3. Audition Techniques. Prepares students for the demands of the acting profession. Trains students in various audition techniques including general auditions, prepared auditions, cold readings, on-camera auditions, and commercial auditions. Shows how to prepare and perfect audition material in a professional and exemplary way. Discusses agents, casting directors, and the process of becoming a professional actor.

THTR 4073-3. Performing Voices of Women. Addresses the basic training for the art of dancing "sur les pointes." Students will learn how to prepare technically, how to take care of the foot and ankle, and will be encouraged to address their personal alignment issues. An historical survey of the development of the pointe technique from the Romantic Age to the present will be discussed and students will be encouraged to attend local ballet performances and/or watch videos of works of both classical and contemporary ballets. May be repeated up to 4 total credit hours. Recommended prereqs., DNCE 3161 or DNCE 4181.

THTR 4103-3. Acting for the Camera. Introduces fundamental tools of acting for the camera. Students learn basic film terminology, specific camera acting techniques, and the demands placed on an actor when shooting a film. Uses exercises, scenes, monologues, and readings to provide a solid understanding of how to create a character, analyze a text, utilize important vocabulary, and perform effectively on camera. Prereq., THTR 1003 or 2003 or instructor consent.

THTR 4193-3. Studio 5: Creating an Ensemble. Students create an ensemble piece utilizing collaborative approaches. Emphasizes training actors in weaving personal, social, political, and cultural threads into an enactment. Prereqs., THTR 3013, 3023, 4013, 4023, or instructor consent.

THTR 6003 (1-3). Production Research and Practicum: Acting. Allows students to undertake an acting project, normally within the major theatre season, that requires detailed preparatory research, testing of ideas, and public presentation. Students work under faculty supervision and prepare a written report and evaluation of the research, rehearsal, and performance process. Prereqs., advanced studies in acting and advisor approval.

Dance

Creative Process

DNCE 1013-2. Dance Improvisation. An opportunity for students to develop skills of dance improvisation through the exploration of structured movement problems. Students study selected contemporary dance artists whose work stresses improvisation in performance and/or as a training vehicle. Restricted to dance majors. Formerly DNCE 2013.

DNCE 2033-3. Beginning Composition. Introduces the basic elements of dance composition through compositional studies evolved from readings, discussion, and improvisation. Prereq., DNCE 1013 and DNCE 2021, 3041, or 4061. Restricted to dance majors.

DNCE 3043-3. Intermediate Dance Composition. Opportunity for students to increase knowledge and understanding of dance composition elements as they relate to group forms, theme, development, and phrase manipulation. Prereqs., DNCE 2033 and DNCE 2021, 3041, or 4061. Restricted to dance majors.

DNCE 4023-2. Performance Improvisation Techniques. Explores movement and vocal improvisational techniques to enhance creative and performance skills. Helps individuals discover and make accessible the diversity of the human instrument and develops practical tools to broaden expressive range. Same as DNCE 5023. Formerly DNCE 4018.

DNCE 4053-3. Advanced Dance Composition. In-depth approach to composition emphasizing personal invention, solo and group forms; styles based on historical art forms; exploration of the evaluative process. Prereqs., DNCE 3043 and DNCE 2021, 3041, or 4061. Restricted to dance majors. Same as DNCE 5053.

DNCE 5023-2. Performance Improvisation Techniques. Restricted to graduate students. Same as DNCE 4023 with the addition of written analysis and creative assignments. Formerly DNCE 5018.

DNCE 5053-3. Advanced Dance Composition. Same as DNCE 4053.

DNCE 6073-3. Choreography. Covers in-depth practical and theoretical approaches to dance composition for graduate students; solo and group forms; and analysis of historical and contemporary dance works. May be repeated up to 6 total credit hours with different instructors. Restricted to graduate students in dance.

Dance and Cultural Studies

DNCE 1027-3. Introduction to Dance and Culture. Explores dance's relationship to broad cultural realities such as food getting, sexuality, rites of passage, work, and religion. Topics are explored by looking at several different cultural groups and how their dance functions in relation to the specific topic. (For example, dance as a function of religion could be studied through explorations into Afro-Cuban orisha dances, Bharata Natyam, and Hopi Ghost dancing.) Formerly DNCE 1029. Approved for arts and sciences core curriculum: literature and the arts.

DNCE 4017-3. History and Philosophy of Dance. Follows the specific history and narrative of some dance forms (including African, Ballet, Flamenco, Hip Hop, Jazz, and Modern) and traces their development over time. Gives attention to the effect of social, political, economic, and environmental conditions as well as the influence of other dance forms and the impact of specific dance artists and teachers. Restricted to juniors and seniors. Same as DNCE 5017. Approved for arts and sciences core curriculum: literature and the arts.

DNCE 4037-3. Looking at Dance. Focuses on the development of perceptual, descriptive, and analytical skills as well as the ability to apply cultural and critical theory to 20th and 21st century concert dance. Specific pieces of choreography

are looked at from a broad range of perspectives. Formerly DNCE 3027. Approved for arts and sciences core curriculum: literature and the arts.

DNCE 5017-3. History and Philosophy of Dance. Restricted to graduate students. Same as DNCE 4017 with addition of graduate papers and/or a project.

DNCE 6017-3. Readings in Dance. Surveys dance literature including an opportunity for graduate students to familiarize themselves with resources, current publications, theoretical materials, and professional organizations in dance. Restricted to graduate students in dance. Formerly DNCE 6019.

DNCE 6047-3. Seminar: Dance. Intensive study of selected topics related to the art of dance, dance criticism, dance aesthetics, and dance in relationship to historical, social, and cultural environments with an emphasis on contemporary American forms and their roots. Restricted to graduate students in dance.

Independent Study

DNCE 1849 (1-3). Independent Study. Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Freshman level course. May be repeated up to 7 total credit hours. Same as DNCE 2849, 3849, 4849, 5849.

DNCE 2849 (1-3). Independent Study. Same as DNCE 1849, at the sophomore level.

DNCE 2909 (1-4). Problems in Dance. Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow. May be repeated up to 7 total credit hours. Same as DNCE 4909 and 5909.

DNCE 3849 (1-3). Independent Study. Same as DNCE 1849, at the junior level.

DNCE 4849 (1-3). Independent Study. Same as DNCE 1849, at the senior level.

DNCE 4909 (1-4). Problems in Dance. Same as DNCE 2909 and 5909.

DNCE 4919 (1-3). Dance Practicum. Project in dance under supervision of senior faculty. May be repeated up to 6 total credit hours. Same as DNCE 5919.

DNCE 4939 (1-3). Dance Internship. Provides an opportunity for upper-division dance majors to serve apprenticeships in the community in work areas related to their major interests and career goals. Internships are available in areas such as arts administration, dance therapy, and technical production. Prereqs., 30 credit hours in dance.

DNCE 5849 (1-3). Independent Study. Same as DNCE 1849, at the graduate level.

DNCE 5909 (1-4). Problems in Dance. Same as DNCE 2909 and 4909.

DNCE 5919 (1-3). Dance Practicum. Same as DNCE 4919.

DNCE 6009-1. Research Strategies and Techniques. Restricted to graduate students. Same as THTR 6009.

DNCE 6919 (1-3). Directed Studies. Explores advanced topics in dance not regularly covered in the curriculum of the graduate program. May be repeated up to 6 total credit hours. Restricted to graduate students.

DNCE 6949-1. Candidate for Degree.

DNCE 6959 (1-4). Master's Thesis.

DNCE 6969 (3-6). The Graduate Project. Provides the opportunity for synthesizing the graduate experience through the execution of a project related to the student's major area of interest. Project must be approved by the graduate faculty advisor.

Major Technique

The following dance courses are designed for dance majors. Enrollment by audition or instructor consent.

DNCE 1091-1. Modern 1. Introduces basic skills of modern dance. In-class technique work increases muscle strength, flexibility, and coordination. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

DNCE 1901 (1-3). Technique Practicum. Offers special courses in the technique series. Includes world dance and/or social dance forms. May be repeated up to 6 total credit hours.

DNCE 2021-2. Major Technique. Enrollment by audition only. May be repeated up to 16 total credit hours.

DNCE 2091-1. Modern 2. Continuation of Modern 1. A developmental sequence of modern dance technique designed to refine the technical/expressive skills required of the professional dancer. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

DNCE 2101-1. Pointe. Addresses the basic training for the art of dancing “sur les pointes.” Students will learn how to prepare technically, how to take care of the foot and ankle, and will be encouraged to address their personal alignment issues. An historical survey of the development of the pointe technique from the Romantic Age to the present will be discussed and students will be encouraged to attend local ballet performances and/or watch videos of works of both classical and contemporary ballets. May be repeated up to 4 total credit hours. Recommended prereqs., DNCE 3161 or DNCE 4181.

DNCE 2141-1. Low Intermediate Ballet. All basic ballet steps should have been mastered, including pirouettes en d’hors and en dedans, knowledge of the principles and placement, and the ability to master simple enchainements. May be repeated up to 2 total credit hours. Prereq., DNCE 1120.

DNCE 2191-1. Ballet 2. Intermediate ballet, covering the complete vocabulary of classical ballet technique. Enchainements are of complex structure. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

DNCE 2501-2. African Dance. Explores the technique, style, and rhythms of various African, Caribbean, and dance forms of the Americas. Music, history, anthropology, and folklore help to enhance the dance and provide a cultural experience. May be repeated up to 6 total credit hours within a term. Same as ETHN 2502.

DNCE 2701-2. Contact Improvisation 1. Contact Improvisation is the practice of spontaneously generating movement guided by moment-to-moment physical contact and sharing of weight between two or more dancers. Fundamental skills of contact improvisation will be introduced; rolling, falling, giving and taking weight, use of momentum, and gravity. Skills are developed in both duets and larger groups. Similar to DNCE 4013.

DNCE 2901 (1-3). Technique Practicum 2. Offers second level classes in the world dance forms technique series. Topics or forms of dance include world dance forms and/or social dance forms. May be repeated up to 6 total credit hours.

DNCE 3041-2. Major Technique. Designed for dance majors. Enrollment by audition only. May be repeated up to 16 total credit hours.

DNCE 3101 (1-3). Ballet Practicum. Practical studio training in ballet at the advanced/professional level with a professional company. May be repeated up to 4 total credit hours. Prereq., DNCE 2141, 3161, or 4181. Designed for dance majors. Enrollment by audition only.

DNCE 3161-1. Intermediate Ballet. Covers the general vocabulary of classical ballet technique and enchainements of medium complexity. Multiple pirouettes in all positions are required. Audition required. May be repeated up to 8 total credit hours.

DNCE 3241-1. Intermediate Jazz. Designed for the experienced jazz dancer. Includes dance techniques that further improve alignment, strength, flexibility, and coordination within the jazz idiom. Greater emphasis on style and rhythm and challenging dance combinations. May be repeated up to 2 total credit hours. Prereqs., DNCE 1200 and 1220. Formerly DNCE 2241.

DNCE 3601-2. Alexander Technique for Actors and Dancers. The Alexander Technique is a method for changing habits that impede the performance of movement and speech. Through class discussions, movement exploration, and individualized hands-on lessons, actors and dancers gain understanding of the technique and its benefits to performance. Restricted to theatre and dance majors.

DNCE 3901 (1-3). Technique Practicum. Offers special courses in the technique series. Topics or forms of dance will include world dance forms and/or social dance forms. May be repeated up to 6 total credit hours. Instructor consent required.

DNCE 4061-2. Major Technique. Designed for dance majors. Enrollment by audition only. May be repeated up to 16 total credit hours.

DNCE 4181-1. Advanced Ballet. Advanced professional-level classical ballet, covering the complete vocabulary. Enchainements are of complex structure. Audition is required. May be repeated up to 8 total credit hours.

DNCE 4261-1. Advanced Jazz Dance Technique. Opportunity for advanced dancers who want to expand their technical skills in the jazz form. Each class includes a standing warm up, floor work for strength and flexibility, adagio combination for line and balance, and a locomotor combination for turns, leaps, rhythm, and fast footwork. Emphasis is placed on technique, musicality, style, and performance. May be repeated up to 4 total credit hours. Same as DNCE 5261.

DNCE 4701-2. Contact Improvisation 2. Build upon skills introduced in Beginning Contact Improvisation as we explore the creative possibilities of interacting with the weight of a partner. Emphasis will be placed upon ease and efficiency in partnering, and integrating this work into choreography and performance. Prereq., DNCE 2701. Same as DNCE 5701.

DNCE 5001-2. Graduate Technique. Open only to graduate dance majors. May be repeated up to 12 total credit hours. Restricted to graduate students.

DNCE 5101-1. Intermediate Graduate Ballet. Open only to graduate dance majors. May be repeated up to 6 total credit hours. Restricted to graduate students.

DNCE 5261-1. Advanced Jazz Dance Technique. Same as DNCE 4261.

DNCE 5601-2. Alexander Technique for Graduate Students. Learn the principles of the Alexander Technique through class discussions, movement exploration, and individualized hands-on-lessons. Discover how to improve their overall functioning and learn to apply the technique to performance and teaching.

DNCE 5701-2. Contact Improvisation 2. Same as DNCE 4701.

DNCE 5901 (1-3). Graduate Technique Practicum. Offers special topics and styles in the graduate technique curriculum. Rotating foci include a variety of traditional dance forms from around the world as well as vernacular, recreational, and social dance phenomena indigenous to the U.S. Course meets simultaneously with an undergraduate studio course, and includes both the practical movement experience and scholarly study of specially-chosen issues in dance. May be repeated up to 6 total credit hours.

DNCE 6101-1. Advanced Graduate Ballet. Open only to graduate dance majors. May be repeated up to 6 total credit hours. Restricted to graduate students.

Movement Analysis

DNCE 2005-3. Movement Awareness and Injury Prevention for the Dancer. Helps dancers understand the prevention and care of common injuries associated with their art. Through various somatic methods, techniques, anatomy, and kinesiology, students learn to reduce tension, improve body usage, and enhance their performance. Prereqs., DNCE 2021, 3041, or 4061. Restricted to dance majors.

DNCE 4015-3. Movement Analysis. Introduces Rudolf Laban’s theories of movement and exposes several body therapies to heighten students’ awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Prereq., DNCE 2005. Restricted to dance majors. Same as DNCE 5015.

DNCE 5015-3. Movement Analysis. Restricted to graduate students. Same as DNCE 4015.

Performance

DNCE 1908-1. Performance Practicum. Students learn and perform a dance choreographed by a faculty member or graduate student for an informal and/or formal presentation. May be repeated up to 3 total credit hours.

DNCE 2098-1. Performance/Repertory. Students learn and perform dances from the repertory of guest artists. Offered summers only. May be repeated up to 3 total credit hours.

DNCE 4038 (1-3). Dance Repertory. Learning and performing dances from the repertory of current faculty members, artists-in-residence, and upon occasion from the repertory of historic modern dancers. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only. Same as DNCE 5038.

DNCE 4128-1. Pointe and Variation. For the more advanced classical ballet student. Entails working on pointe and learning dances from Classical, Romantic, and Neo-Classical ballets. Enrollment by audition only. May be repeated up to 2 total credit hours. Same as DNCE 5128.

DNCE 5038 (1-3). Dance Repertory. Same as DNCE 4038 except graduate students are required to keep a log of the learning process involved in repertory to document and analyze each work in terms of stylistic differences, musical/sound accompaniment and trends. May repeat up to 9 total credit hours with different instructors. Enrollment by audition only. Restricted to graduate students.

DNCE 5048 (1-4). Touring Dance Ensemble. May be repeated up to 8 total credit hours.

DNCE 5128-1. Pointe and Variation. By audition only. Students should have previous experience. Restricted to graduate students. May be repeated up to 2 total credit hours. Same as DNCE 4128.

Production

DNCE 1012-2. Dance Production 1. Provides the dancer with an introduction to the types of performance venues available today, and their technical systems and equipment. It will also establish an awareness of how technical theatre design arts may be utilized by a choreographer. Restricted to dance majors. Credit not granted for this course and DNCE 2012.

DNCE 4012-1. Concert Production. Provides practical experience in producing formal and informal dance concerts. Introduces basic familiarity with production and promotional responsibilities, and backstage and front-of-house duties and procedures. Prereq., DNCE 1012 or equivalent. Restricted to DNCE and DBFA majors. Same as DNCE 5012.

DNCE 5012-1. Concert Production. Same as DNCE 4012.

DNCE 5052 (1-3). Studio Concert. Restricted to dance majors with 87 credit hours or more.

Pedagogy

DNCE 4016-3. Creative Dance for Children. Methods course for prospective teachers of creative dance for children. Lectures, readings, and laboratory experiences are followed by observation and teaching in primary grades. Prereqs., DNCE 1013 and 2033. Restricted to dance majors. Same as DNCE 5016.

DNCE 4036-3. Methods of Teaching Dance. Practical experience in teaching modern dance to the young adult follows theoretical grounding in specific teaching methods. Examines values and goals of dance in education and fundamental movement principles as related to the teaching of technique and improvisation. Prereqs., DNCE 1013 and 2033. Restricted to dance majors. Same as DNCE 5036.

DNCE 5016-3. Creative Dance for Children. Restricted to graduate students. Same as DNCE 4016 with addition of readings and a paper.

DNCE 5036-3. Methods of Teaching Dance. Restricted to graduate students in dance. Same as DNCE 4036 with addition of readings and a paper.

DNCE 5056-2. Graduate Teaching Seminar. Examines practical and philosophical issues in dance education. The goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. Opportunity for practical application of theoretical material is provided. Restricted to graduate students.

DNCE 6016-2. Teaching Lab: Modern Dance. Provides opportunity to apply principles and skills introduced in DNCE 5036. Participating students share the responsibility for teaching a lab class that meets twice a week. Focuses on analysis and evaluation of teaching skills. Restricted to graduate students.

DNCE 6056-2. Professional Development. Examines current trends, issues, and problems of dance at colleges, in secondary education, in the community, and in professional dance. Explores curriculum development and educational dance trends along with other topics such as freelance work, grant writing, and dance advocacy. Restricted to graduate students in dance.

Music

DNCE 2014-2. Rhythmic Analysis and Accompaniment. Emphasizes elements of rhythm in relation to dance. Experiences with rhythmic drills, rhythmic notation, and percussion accompaniment for the modern dance class comprise the body of the course. Prereqs., DNCE 2021, 3041, or 4061. Restricted to dance majors.

DNCE 3024-2. Musical Resources for Dance. Surveys basic musical notation and terminology, elements and forms of music, and historical styles, supported by guided listening to representative works within western musical tradition.

Special emphasis on 20th century techniques and on the relationship of various music to dance. Prereq., DNCE 2014. Restricted to dance majors.

DNCE 5064-3. Music and Dance Seminar: Collaboration. Investigates selected aspects of rhythm, accompaniment, and musical resources for dance and applications to performance, choreography, and teaching. Topics may include movement analysis and rhythmic clarity, self-accompaniment, working with accompanist/composers, relationship of music to dance, and survey of 20th century compositional techniques. Prereq., dance/music experience, or instructor consent. Restricted to graduate students in dance.

Nonmajor Technique

DNCE 1000-2. Beginning Technique. Introduces basic concepts and skills of various contemporary dance forms, such as Afro-modern, Release Technique, Limon-based modern, etc. Classwork develops muscle strength, flexibility, coordination, rhythm, and dynamic and spatial awareness. Lectures focus on various aspects of dance including history, composition, anatomy and criticism. Limited amount of written work is required. May be repeated up to 4 credit hours.

DNCE 1020-1. Beginning Modern Dance with Experience. Studio course that continues the work from the beginning level on basic concepts and skills in modern dance technique to increase strength, flexibility, and coordination. May be repeated up to 2 total credit hours. Prereq., DNCE 1000.

DNCE 1100-1. Beginning Ballet. Ballet for beginners; no previous experience required. Stretching, basic barre, simple terre a terre, and jumping steps are learned, as well as alignment and basic extended positions such as arabesque and attitude. Mastery of simple enchainements and rhythmic patterns. May be repeated up to 2 total credit hours.

DNCE 1120-1. Beginning Ballet with Experience. Extension of beginning ballet, when basic concepts of ballet have been mastered. Enchainements are of greater complication and variety. Dance vocabulary is more extensive. Pirouettes and more complex musical phrases are expected. May be repeated up to 2 total credit hours. Prereq., DNCE 1100.

DNCE 1190-1. Ballet 1. Beginning ballet covering the basic vocabulary of classical ballet technique. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

DNCE 1200-1. Beginning Jazz Dance. Introduces various styles of movement unique to jazz dance. Students learn fundamental technical dance skills as well as specific jazz vocabulary. Designed for students with little or no dance experience. May be repeated up to 2 total credit hours.

DNCE 1220-1. Beginning Jazz with Experience. Further develops work begun in Beginning Jazz. Exercises and jazz dance phrases are more complex. May be repeated up to 2 total credit hours. Prereq., DNCE 1200.

DNCE 1290-1. Jazz 1. Introduces jazz dance, consisting of a technique warm-up, locomotion across the floor, and a series of dance phrases developed into a short dance combination. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

DNCE 2290-1. Jazz 2. Continuation of Jazz 1. Studies coordination, rhythm, style, and advanced body part isolation in depth. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

DNCE 3040-2. Intermediate/Advanced Modern Dance. See DNCE 1020. More in-depth study of modern dance concepts. Class technique work more advanced. May be repeated up to 4 total credit hours. Prereq., DNCE 1000 or 1020. Formerly DNCE 2040.

Western American Studies

CAMW 2001-3. The American West. Students tour the cultural, social, and natural features of the American West, based on readings and presentations by guest faculty from across disciplines. Designed as the foundation course in the Western American Studies certificate program. Approved for arts and sciences core curriculum: United States context.

CAMW 3939 (1-3). Center of the American West Internship. Work for public and private organizations on projects that enhance the understanding of various Western American topics and issues (environmental, cultural, public policy,

etc.), and which foster students' development as community leaders working for a sustainable West. May be repeated up to 6 total credit hours. Recommended prereq., CAMW 2001. Restricted to juniors and seniors.

CAMW 4001-3. Seminar on the American West. Interdisciplinary capstone seminar for the Western American Studies certificate program. Applies a selected natural science, social science, or humanities topic to the American West and addresses how Westerners can make and sustain viable landscapes and communities. Recommended prereqs., CAMW 2001 and completion of Western American Studies certificate electives.

CAMW 4840 (1-4). Independent Study: The American West. Recommended prereq., CAMW 2001, junior or senior standing.

Western Civilization Studies

CWCV 2000-3. The Western Tradition. Encourages a historical and critical investigation of the formative influences on what is often called Western culture, including religious, political, social and economic factors, and contemporary interpretations and critiques of these developments and concepts. Designed as foundation course for the Center for Western Civilization. Approved for arts and sciences core curriculum: ideals and values.

Women and Gender Studies

WMST 2000-3. Introduction to Feminist Studies. Introduces students to the field of Women and Gender Studies. Examines gender issues in the United States from interdisciplinary, multicultural, and feminist perspectives. Covers such topics as sexuality, beauty ideals, women's health, violence against women, work, the economy, peace and war, and the environment. Meets MAPS requirement for social science: general. Approved for arts and sciences core curriculum: human diversity.

WMST 2020-3. Femininities, Masculinities, Alternatives. Examines contemporary experiences of people around the world as they negotiate dominant and subversive understandings of gendered identities. Focuses on the ways in which the material and discursive circumstances of people's lives shape their opportunities for resistance and creative construction. Approved for arts and sciences core curriculum: human diversity.

WMST 2050-3. Gender, Sexuality, and Popular Culture. Explores diverse cultural forms such as film, popular fiction and non-fiction, music videos, public art, websites, blogs and zines which are shaped by, and in turn shape popular understandings of gender at the intersections of race, class, ability, religion, nation, and imperialism. Approved for arts and sciences core curriculum: human diversity.

WMST 2200-3. Women, Literature, and the Arts. Introduces the contributions of women to literature, the visual and performing arts, from a historical and cross-cultural perspective. Emphasizes the cultural contexts in which artworks are created, as well as women and men as subjects of representation. Stresses structure, content, and style, along with the acquisition of basic techniques and vocabulary of literary and arts criticism. Prereq., WMST 2000. Approved for arts and sciences core curriculum: human diversity or literature and the arts.

WMST 2400-3. Women of Color and Activism. Studies the history of social activism in the United States by women of color, with an emphasis on modes of social activism, issues that have organized specific communities of color, issues that have crossed ethnic/racial boundaries, and the interaction of women from different ethnic/racial groups, including women of color and white women. Recommended prereq., WMST 2000 or 2600. Same as HIST 2636. Approved for arts and sciences core curriculum: United States context.

WMST 2600-3. Gender, Race, and Class in a Global Context. Examines the positionality of women in terms of gender, race, ethnicity, class, and power relations in a global context. Approved for arts and sciences core curriculum: contemporary societies.

WMST 2700-3. Psychology of Contemporary American Women. Surveys psychological theory and research concerning contemporary American women. Deals with such issues as masculine bias in American culture, sex difference in cognitive functioning and personality, psychological conflict for women between career and home, and, finally, specific areas pertaining to women's mental health.

Prereq., WMST 2000 or PSYC 1001. Same as PSYC 2700. Approved for arts and sciences core curriculum: human diversity.

WMST 3000-3. Gender, Work, and Public Policy. Provides an analytical framework for understanding the roles gender, sexuality, race and class play in defining the work worlds of women and men in society. Prereq., WMST 2000 or 2050.

WMST 3020-3. Methods of Inquiry in Gender, Race, Class, and Sexuality. Examines various research methods and approaches in women's and gender studies. Students will gain practical experience to be able to write a proposal for a significant research project, informed by course readings and discussions. Prereqs., WMST 2000, 2600. Recommended prereqs., WMST 2200 or 2400.

WMST 3090-3. Critical Thinking in Feminist Studies. Analyzes the concepts, ideas, arguments, and assumptions that inform major texts in feminist theory through close reading, class discussion, and writing papers. Emphasizes developing reading and writing skills to interpret theoretical arguments. Prereqs., WMST 2000 and junior or senior standing.

WMST 3100-3. Feminist Theories. Explores a variety of alternative systematic accounts of, and explanations for, gender inequities. Social norms of both masculinity and femininity are analyzed in relation to other axes of inequality such as class, sexuality, race/ethnicity, neocolonialism, and the domination of nonhuman nature. Prereq., WMST 2000.

WMST 3110-3. Feminist Practical Ethics. Explores a variety of personal and public policy issues in light of basic feminist commitment to opposing women's subordination. Provides students not only with a deeper understanding of the specific issues discussed but also with a sense of the ways in which a principled commitment to feminism may influence and be influenced by prevailing interpretations of contemporary ideals and values (such as freedom, equality, and community). Provides an opportunity to develop skills of critical analysis useful in a wide range of contexts. Prereq., WMST 2000 or 2290, and junior or senior standing. Same as PHIL 3110. Approved for arts and sciences core curriculum: ideals and values.

WMST 3200-3. Religion and Feminist Thought. Examines the origin of patriarchal culture in the theology and practices of Judaism and Christianity. Explores attitudes and beliefs concerning women as Judeo-Christian culture impacts gender roles and gender stratification through reading and discussion. Women's religious experience is studied from the perspective of feminist interpretations of religiosity. Prereq., WMST 2000 or WMST/RLST 2800.

WMST 3210-3. American Indian Women. Explores the experiences, perspectives, and status of American Indian women in historical and contemporary contexts. Examines representations of indigenous women in mainstream culture. Emphasizes the agency of American Indian women—their persistence, creativity, and activism, especially in maintaining indigenous traditions. Prereq., WMST 2000, 2600 or ETHN 2001 or 2003. Restricted to sophomores/juniors/seniors. Same as ETHN 3213. Approved for arts and sciences core curriculum: human diversity.

WMST 3220-3. Women in Islam. Examines the historical and contemporary relation between women, gender, and Islamic cultures in different parts of the world. We will consider the role and rights of women in Islam, historical and literary representations of Muslim women, and the historically changing constructions of gender and sexuality in Muslim societies. In addition, we will critically explore the construction of Muslim women in western discourses, including liberal feminist discourse, and ask whether the representation of Muslim women in these discourses achieves or undermines ends that we might consider "feminist." In attending to the wide range of Muslim women's lived experiences in Islamic communities and cultures, as well as the self-representations of Muslim women themselves, our readings will urge U.S. to reexamine our presumptions about piety, secularism, modernity and feminism. Prereq., WMST 2000, 2050, or 2600.

WMST 3302-3. Facilitating Peaceful Community Change. Students gain knowledge and skills that enable them to become effective facilitators of community goals. Focuses on understanding the processes of community building with a multicultural emphasis. Students are encouraged to apply concepts to life experiences and to examine themselves as potential change agents. Theory and summer experience are integrated. Same as INVS 3302.

WMST 3314-3. Violence Against Women and Girls. Focuses on aspects of the victimization of women and girls that are "gendered"—namely, sexual abuse and intimate partner abuse. Also explores the importance of race, class, and sexuality in gendered violence. Prereq., WMST 2000. Same as SOCY 3314.

WMST 3400-3. Gender, Personality, and Culture. Explores the relationship among gender, culture, and personality. Brings together the disciplines of psychology and sociology in the study of gender and personality formation through investigation of psychoanalytic theory and the social environment. Prereqs., WMST 2000 or 2700, and junior or senior standing.

WMST 3500-3. Global Gender Issues. Introduces global gender issues, such as the gendered division of labor in the global economy, migration, women's human rights, environmental issues, gender violence in war, women in the military, nationalism and feminism, and the representation of the Third World in the United States. Offers students the opportunity to broaden their perspectives beyond the borders of the United States. Prereq., WMST 2000, 2050 or 2600. Restricted to sophomores/juniors/seniors.

WMST 3505-3. Historical and Contemporary Issues of African American Women. Explores the social, economic, political, historical, and cultural role of African American women from an interdisciplinary perspective. Special emphasis is placed on African American women's rich oral and literary tradition. Prereq., WMST 2000 or ETHN 2001 or 2002 or equivalent. Same as ETHN 3502.

WMST 3600-3. Latinas: History, Culture, and Social Activism. Drawing from work produced by and about Latinas, discusses the social and cultural construction of race and ethnicity, the function of nationalism, the politics of migration and citizenship, Latina literary production and theory, historiographical trends, Latina feminist theory, activism and the academy, and Latina/o political organizing. Prereq., WMST 2000 or 2600.

WMST 3650-3. Women and Politics in Latin America. Examines ways Latin American women have engaged in politics and their participation in social movements, war, peace processes and elections. Focuses on why women "Do politics" in certain ways, the role of the State in women's politics, the (dis)advantages of various political strategies, and how political, economic and social changes have affected women's political opportunities and interests. Prereq., WMST 2000 or instructor consent. Recommended prereqs., WMST 2400, 2600, 3600 or 3730. Restricted to juniors/seniors. Same as PSCI 3052.

WMST 3656-3. History of Women in Progressive Social Movements. Explores women's involvement in the United States, in international peace, feminist, and civil rights movements of the 19th and 20th centuries. Teaches research methods by using a variety of primary and secondary sources and writing an original research paper. Prereq., WMST 2000 or HIST 1015 or 1025. Same as HIST 3656.

WMST 3700-3. Contemporary Topics in Women, Gender, and Sexuality Studies. Examines selected topics in women, gender, and sexuality in the U.S. context. May be repeated up to 6 total credit hours for different topics. Prereq., WMST 2000 or 2600.

WMST 3710-3. Topics in Global Gender Studies. Content varies by semester and reflects relevant issues in global feminist scholarship. May be repeated up to 6 total credit hours. Prereq., WMST 2000 or 2600. Restricted to sophomores/juniors/seniors.

WMST 3730-3. Third World Women and the Politics of International Development. Examines the history, characteristics, problems, status and role of Third World women in development itself. Includes the interrelationships between development and population growth, transnational economics, migration, education, agriculture, health, urbanization, development policy and planning, and their impact on women and men in urban and rural areas in Africa, Latin America, the Caribbean, Asia, and Melanesia. Prereq., WMST 2000 or 2600. Restricted to juniors/seniors.

WMST 3800-3. Advanced Writing in Feminist Studies. Offers expository writing and training in analytical and descriptive skills, structures or argument, critical thinking, the rhetoric of persuasion, and the development of a personal voice. Readings and papers focus on basic issues in gender studies. Prereq., WMST 2000. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: written communication.

WMST 3900-3. Asian American Women: Historical and Contemporary Issues. Drawing from work produced by and about Asian American women, examines historical and contemporary issues including representation of Asian American women, identity politics, feminism, coalition building, and activism for social change. Prereq., WMST 2000 or 2600, or ETHN 1025, 2001, or 2004. Restricted to sophomores/juniors/seniors. Same as ETHN 3905. Approved for arts and sciences core curriculum: United States context.

WMST 3930 (1-6). Women Studies Internship. Provides field experience in local and national government and non-governmental agencies focusing on women and gender-related issues. Supervision by approved field instructors. Students must relate their academic experience to their field work experience through a portfolio and a final paper. Prereq., 6 hours of course work in Women's Studies and 30 cumulative credit hours. Restricted to sophomores/juniors/seniors.

WMST 3940-1. Practicum in Women and Gender Studies. Enriches the academic experience of majors and minors within the Women and Gender Studies program. This course usually will combine readings from books with lectures and discussions, community outreach and in-house publications spanning the interdisciplinary focus of the program. May be repeated up to 4 total credit hours. Restricted to WMST majors or minors.

WMST 4000-3. Senior Seminar: Special Topics. Provides an advanced interdisciplinary course organized around specific topic, problem, or issue relating to women in culture and society (such as feminist theology, women and the law, and the social psychology of women). Course work includes discussion, reading, and written projects. May be repeated up to 6 total credit hours for different topics. Prereqs., WMST 2000 and junior or senior standing.

WMST 4020-3. Senior Research Seminar. Intensive-based writing course, designed to develop and strengthen research skills and apply them in the interdisciplinary study of women and gender. May be repeated up to 6 total credit hours for different research topics. Prereq., WMST 2000. Restricted to juniors/seniors.

WMST 4277-3. Topics in Women's Literature. Same as ENGL 4277.

WMST 4287-3. Studies in Lesbian, Gay, Bisexual, and Transgender Literature. Examines selected British, American, and French literary representations of lesbian and gay identity from the early 16th century to the present. Discusses the changing status of homosexuality as a literary and cultural topos, including how same-sex desire is defined, and the rhetorical and ideological difficulties involved in its representation. Specific topics vary each semester. May be repeated up to 9 total credit hours. Restricted to juniors and seniors. Same as ENGL/LGBT 4287.

WMST 4300-3. Sex, Power, Politics: International Perspectives. Studies the commercial trade of sexual labor in the global economy, examining theories and assumptions about sexual-economic exchanges and gendered and racialized relations of power in the sex trade. Emphasizes prostitution. Recommended prereq., WMST 2600 or 3100. Restricted to juniors and seniors.

WMST 4331-3. Women and Popular Culture. Same as JOUR 4331.

WMST 4636-3. Lesbian and Gay History: Culture and Politics and Social Change in the U.S. Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the U.S. through investigation of lesbian and gay identity formation, community development, politics, and queer cultural resistance. Prereqs., WMST 2000 and 2600, and junior or senior standing. Same as HIST 4636/5636.

WMST 4700-3. Women and Mental Health. Examines mental health issues of women by focusing on theories of female personality development. Looks at theory and research pertaining to women and psychopathology and to women as patients in traditional and nontraditional forms of treatment. Prereq., WMST/PSCY 2700 or WMST 2000. Same as PSYC 4700.

WMST 4800-3. Senior Colloquium in Feminist Studies. Provides students with the opportunity to actively reflect on their education and to complete a research project that incorporates an interdisciplinary and feminist approach to the study of gender, class, race, ethnicity, and sexuality. Offered each spring. Prereq., WMST 3020. Restricted to senior WMST majors.

WMST 4840 (1-6). Independent Study. May be repeated up to 7 total credit hours.

WMST 4950-3. Honors Research. For qualified WMST majors working on the research phase of departmental honors. Prereq., junior/senior standing and 3.30 overall GPA.

WMST 4999 (1-3). Senior Honors Thesis. Qualified women's studies majors may write an honors thesis, an in-depth research paper, on a topic of choice. Thesis hours available to majors only after successfully completing the research phase.

WMST 6090-3. Feminist Theories. Explores how feminist theorists have understood gender and how it interrelates to our understandings of race, ethnicity, sexuality, embodiment and knowledge. Meets the requirements for the WGST certificate.

WMST 6190-3. Feminist Methodology. Explores feminist methodology across a range of disciplines. Themes include experience and interpretation, the social position of the researcher, language and argument structure, knowledge and power, bias and objectivity, and the ethics and politics of research. Meets the requirements for the WGST certificate.

WMST 6290-3. Special Topics in Women and Gender Studies. Offers interdisciplinary feminist perspectives on different special topics such as gender and war, gender and globalization, women's social movements, gender and citizenship, gender and collective memory, and cultural representations of gender and sexuality. May be repeated up to 6 total credit hours. Meets the requirements for the WGST certificate.

Cross-Listed by Discipline

Art and Art History

WMST 4769-3. Gender Studies in Early Modern Visual Culture. Same as ARTH 4769. Approved for arts and sciences core curriculum: human diversity.

Chicano Studies

WMST 3135-3. Chicana Feminisms and Knowledges. Provides insight into the present socioeconomic condition of Chicanas and the concept of feminismo through interdisciplinary study of history, sociology, literary images, and film portrayals. Prereq., ETHN 1016, 2001 or 2536 or equivalent. Restricted to sophomores/juniors/seniors. Same as ETHN 3136. Approved for arts and sciences core curriculum: human diversity.

Classics

WMST 2100-3. Women in Ancient Greece. Approved for arts and sciences core curriculum: human diversity. Same as CLAS 2100.

WMST 2110-3. Women in Ancient Rome. Same as CLAS 2110. Approved for arts and sciences core curriculum: human diversity.

English

WMST 1260-3. Introduction to Women's Literature. Same as ENGL 1260. Approved for arts and sciences core curriculum: core curriculum: human diversity.

WMST 3267-3. Women Writers. Same as ENGL 3267.

WMST 3919 (1-3). Service Learning Practicum. Under faculty supervision, students participate in a service learning project correlated with the academic subject. May be repeated up to 6 total credit hours.

Ethnic Studies

WMST 3670-3. Immigrant Women in the Global Economy. Critical examination of immigrant women's participation in the global economy. Focuses on the relationship between larger social forces and the role of women in migration and the labor force. Emphasis on Latinas and Asian immigrant women. Restricted to juniors/seniors or instructor consent. Approved for arts and sciences core curriculum: human diversity.

Geography

WMST 3672-3. Gender and Global Economy. Same as GEOG 3672. Approved for arts and sciences core curriculum: human diversity.

German

WMST 3601-3. German Women Writers. Taught in English. Same as GRMN 3601. Approved for arts and sciences core curriculum: human diversity.

WMST 4301-3. Gender, Race, and Immigration in Germany and Europe. Introduce students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include questioning "multiculturalism," self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Same as GRMN 4301/5301. Approved for arts and sciences core curriculum: human diversity.

History

WMST 4063-3. Women in Victorian England. Same as HIST 4063.

WMST 4614-3. Women and Society in Industrial Europe. Same as HIST 4614.

WMST 4616-3. History of Women in the United States to 1890. Same as HIST 4616.

WMST 4619-3. Women in Asian History. Same as HIST 4619.

WMST 4626-3. History of Women in the United States since 1890. Same as HIST 4626.

WMST 4640-3. Women, Gender and War. Same as HIST 4640.

Honors

WMST 3004-3. Women in Education. Same as HONR 3004. Approved for arts and sciences core curriculum: human diversity.

Journalism

WMST 4331-3. Women and Popular Culture. Same as JOUR 4331.

LGBT Studies

WMST 2030-3. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies. Same as LGBT 2000. Approved for arts and sciences core curriculum: human diversity.

Nordic (formerly Scandinavian)

WMST 3208-3. Women in Nordic Society: Modern States of Welfare. Examines the role and status of women and marginalized social classes in the Nordic countries, whose societies have been heralded as egalitarian models since the twentieth century. Texts include a variety of media, from literature to sociological works to artifacts of political and popular culture. Same as SCAN 3208. Approved for arts and sciences core curriculum: human diversity.

Philosophy

WMST 2290-3. Philosophy and Women. Same as PHIL 2290. Approved for arts and sciences core curriculum: human diversity.

Political Science

WMST 3300-3. Gender, Sexuality and U.S. Law. Contemporary and historic overview of U.S. courts' treatment of sex and gender. Using the case method, examines policy issues including, but not limited to: same sex marriage and civil unions; privacy; affirmative action; abortion; reproductive technologies; and discrimination based on sex and sexual orientation in education and in the workplace. Prereq., WMST 2000 or PSCI 1101. Same as PSCI 3301. Approved for arts and sciences core curriculum: human diversity.

Religious Studies

WMST 2800-3. Women and Religion. Same as RLST 2800. Approved for arts and sciences core curriculum: human diversity.

Russian

WMST 4471-3. Women in 20th Century Russian Culture. Same as RUSS 4471 and GSLL 5471. Approved for arts and sciences core curriculum: human diversity.

Sociology

WMST 1006-3. The Social Construction of Sexuality. Restricted to sophomores, juniors, and seniors. Same as SOCY 1006.

WMST 1016-3. Sex, Gender, and Society 1. Same as SOCY 1016. Approved for arts and sciences core curriculum: human diversity.

WMST 3012-3. Women, Development, and Fertility. Restricted to junior/senior WMST majors. Same as SOCY 3012. Approved for arts and sciences core curriculum: human diversity.

WMST 3016-3. Marriage and the Family in the United States. Restricted to junior/senior WMST majors. Approved for arts and sciences core curriculum: United States context. Same as SOCY 3016.

WMST 3044-3. Race, Class, Gender, and Crime. Same as SOCY 3044.

WMST 3046-3. Topics in Sex and Gender. Same as SOCY 3046.

WMST 4010-3. Gender, Genocide, and Mass Trauma. Studies the persistence of genocide and the effects of mass trauma on women and girls. Within the framework of political and social catastrophe, the course examines cataclysmic world

events and the traumatic consequences for women of religious persecution, colonialism, slavery, and the genocides of the twentieth and twenty first centuries. Prereq., SOCY 1016 or WMST 2000. Same as SOCY 4000.

WMST 4016-3. Sex, Gender, and Society 2. Studies status and power differences between the sexes at individual, group, and societal levels. Examines empirically established sex differences, and reviews biological, psychological, and sociological explanations for gender differences. Prereqs., SOCY 1016 or WMST 2000. Restricted to sophomores/juniors/ seniors. Same as SOCY 4016.

WMST 4086-3. Family and Society. Restricted to junior/senior WMST majors. Same as SOCY 4086.

Theatre

WMST 4041-3. Women and Theatre of the 20th and 21st Centuries. Same as THTR 4041.

WMST 4073-3. Performing Voices of Women. Same as THTR 4073.

Writing and Rhetoric, Program for

WRTG 1100-4. Extended First-Year Writing and Rhetoric. Extended version of WRTG 1150 that carries an additional hour of credit and is intended for students desiring more preparation and practice in college writing. Meets the same goals as WRTG 1150. Features one extra hour of small group work out of class. Focuses on critical analysis, argument, inquiry, and information literacy. Taught as a writing workshop, the course places a premium on invention, drafting, and thoughtful revision. For placement criteria, see the arts and sciences advising office. May be repeated up to 8 total credit hours. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

WRTG 1150-3. First-Year Writing and Rhetoric. Rhetorically informed introduction to college writing. Focuses on critical analysis, argument, inquiry, and information literacy. Taught as a writing workshop, the course places a premium on invention, drafting, and thoughtful revision. For placement criteria, see the arts and sciences advising office. May be repeated up to 6 total credit hours. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

WRTG 1250-3. Advanced First-Year Writing and Rhetoric. Advanced version of WRTG 1150 intended for more experienced writers, this course meets the same goals as WRTG 1150 but at a more challenging level. Taught as a writing workshop, the course places a premium on invention, drafting, and thoughtful revision. For placement criteria, see the arts and sciences advising office. May be repeated up to 6 total credit hours. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

WRTG 1840 (1-3). Independent Study in Writing. May be repeated up to 8 total credit hours.

WRTG 2020-3. Introduction to Creative Nonfiction. Explores from both the reader's and writer's perspectives the forms of creative nonfiction, including personal essay and memoir. Students will read and write extensively within this genre, develop skill in revision and peer critique, and learn how to submit work for publication. Prereq., WRTG 1150 or equivalent (completion of lower-division writing requirement).

WRTG 2090-3. Electives in Writing. Explores a variety of academic and professional writing genres, ranging from research to technical writing, in intensive workshops. Students read and write extensively across genres. Check with program for semester offerings. May be repeated up to 6 total credit hours if the topics are different. Designed for self-motivated students in all majors. Does not fulfill core requirements. Prereq., WRTG 1150 or equivalent.

WRTG 3007-3. Writing in the Visual Arts. Enables studio art and art history majors to improve their writing skills through organization, presentation, critique, and revision. Writing assignments include formal writing (analysis and argument), informal writing, and grant proposals. Prereq., junior or senior standing. Credit not granted for this course and FINE 3007. Approved for arts and sciences core curriculum: upper-division written communication.

WRTG 3020-3. Topics in Writing. Through sustained inquiry into a selected topic or issue, students will practice advanced forms of academic writing. The course emphasizes analysis, criticism, and argument. Taught as a writing workshop, the

course places a premium on substantive, thoughtful revision. May be repeated up to 6 total credit hours. Restricted to arts and sciences juniors and seniors. Same as NRLN 3020. Approved for arts and sciences core curriculum: written communication.

WRTG 3030-3. Writing on Science and Society. Through selected reading and writing assignments, students consider ethical and social ramifications of science policy and practice. Focuses on critical thinking, analytical writing, and oral presentation. Taught as a writing workshop, the course addresses communication with professional and non-technical audiences. May be repeated up to 6 total credit hours. Restricted to junior and senior engineering/physical and biological science majors. Approved for arts and sciences core curriculum: written communication.

WRTG 3035-3. Technical Communication and Design. Rhetorically informed introduction to technical writing that hones communication skills in the context of technical design activities. Treats design as a collaborative, user-oriented, problem-based activity, and technical communication as a rhetorically informed and persuasive design art. Taught as a writing workshop emphasizing critical thinking, revision, and oral presentation skills. Focuses on client-driven design projects and effective communication with multiple stakeholders. May be repeated up to 6 total credit hours. Restricted to juniors and seniors in engineering; architecture and planning; and the physical, earth, and life sciences. Approved for arts and sciences core curriculum: written communication.

WRTG 3040-3. Writing on Business and Society. Through selected reading and writing assignments, students examine ethical and social issues in the context of business decision-making processes. Focuses on critical thinking, analytical writing, and oral presentation. Taught as a writing workshop, the course emphasizes effective communication with professional and non-technical audiences. May be repeated up to 6 total credit hours. Restricted to junior and senior business/economics IAFS majors. Approved for arts and sciences core curriculum: written communication.

WRTG 3090 (1-3). Open Topics in Writing: Advanced. Advanced topics course providing intensive, specialized writing instruction in selected topics. Check with the program for semester offerings. May be repeated up to 6 total credit hours if the topics are different. Prereqs., WRTG 3020, or 3030, or 3040, or instructor consent.

WRTG 3840 (1-3). Independent Study. May be repeated up to 6 total credit hours.

WRTG 5050-3. Graduate Studies in Writing and Rhetoric. Special topics and methods course in composition theory, research, and pedagogy. Topics vary by semester. May be repeated up to 9 total credit hours. Prereq., instructor consent.

WRTG 5840 (1-3). Independent Study: Writing and Rhetoric. Independent study. May be repeated up to 6 total credit hours. Prereqs., graduate standing and instructor consent.

Accounting

ACCT 2820-3. Introduction to Personal Financial Planning. Introduces the concepts, tools, and applications of personal financial planning. Provides the students with tools and techniques for managing their personal finances. With these skills, students gain the ability to effectively deal with their ever-changing financial environment. Restricted to students with at least 26 hours completed.

ACCT 3220-3. Corporate Financial Reporting 1. First of a two-course sequence intended to provide students with increased fluency in the language of business. Focuses on U.S. and international accounting concepts and methods that underlie financial statements and the related implications for interpreting financial accounting information. Prereqs., BCOR 2000 and BCOR 2200. Restricted to 52 hours completed.

ACCT 3230-3. Corporate Financial Reporting 2. Second in a two-course sequence building and extending detailed knowledge of preparation, analysis, and use of financial statements. Prereqs., ACCT 3220 and 52 hours completed.

ACCT 3320-3. Cost Management. Provides cost analysis for the support of management decision making. Analyzes activities, cost behavior, role of accounting in planning, financial modeling, and managerial uses of cost data. Prereq., BCOR 2000 and BCOR 2200. Restricted to 52 hours completed.

ACCT 4250-3. Financial Statement Analysis. Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes equity valuation and risk analysis. Prereqs., ACCT 3220. Restricted to 52 hours completed.

ACCT 4430-3. Personal Financial Planning. Extends the concepts, tools, and applications of personal finance and investments beyond ACCT 2820. Focuses on the development of a financial plan to achieve financial goals. Restricted to 52 hours completed.

ACCT 4440-3. Income Taxation of Individuals. Examines concepts and structure of the United States income tax system. Focuses on concepts affecting all taxpayers, with emphasis on individual taxation. Prereq., ACCT 3220. Same as ACCT 5440.

ACCT 4540-3. Accounting Information Systems. Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system. Prereq., ACCT 3220. Same as ACCT 5540.

ACCT 4820-3. Topics in Business. Offered irregularly to provide opportunity for investigation of new frontiers in accounting. Prereq., ACCT 3220. Same as ACCT 5820.

ACCT 4850-3. Senior Seminar in Accounting. This seminar examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. This course also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Prereqs., ACCT 3230, one 4000-level ACCT course. Restricted to 102 hours completed and to graduating senior ACCT majors. Formerly BCOR 4001.

ACCT 4900 (1-3). Independent Study. Requires prior consent of dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors. Departmental form required.

ACCT 5240-3. Advanced Financial Accounting. Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships. Prereq., ACCT 3230. Restricted to graduate students.

ACCT 5330-3. Advanced Cost Management. Critically analyzes advanced topics in cost management. Uses cases and current readings. Prereq., ACCT 3220. Restricted to graduate students.

ACCT 5440-3. Income Taxation of Individuals. Prereq., ACCT 3220. Same as ACCT 4440.

ACCT 5540-3. Accounting Information Systems. Prereq., ACCT 3220 or equivalent. Same as ACCT 4540.

ACCT 5620-3. Auditing and Assurance Services. Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form. Prereq., ACCT 3230. Restricted to graduate students. Same as ACCT 4620.

ACCT 5700-3. International Accounting. Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions. Prereq., ACCT 3230. Restricted to graduate students. Same as ACCT 4700.

ACCT 5800-3. Accounting for Government and Nonprofit Organizations. Reporting, planning and control of government and nonprofit organizations. Includes program budgets, responsibility accounting, and fund accounting. Prereq., ACCT 3220. Restricted to graduate students. Same as ACCT 4800.

ACCT 5820-3. Topics in Business. Prereq., ACCT 3230 or equivalent. Restricted to graduate students only. Same as ACCT 4820.

ACCT 5825-3. Experimental Seminar. Offered irregularly to provide opportunity for investigation of new frontiers in Accounting. Prereq. ACCT 3230. Restricted to graduate students. Same as ACCT 4825.

ACCT 6000 (1-4). Academic Internship in Accounting. Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Restricted to graduate students only. Prereq., ACCT 3230, at least 90 credit hours of course work and a minimum GPA of 3.00, and instructor consent.

ACCT 6220-3. Corporate Financial Reporting. Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220. Prereq., MBAC 6020 or equivalent. Same as MBAX 6700.

ACCT 6250-3. Financial Statement Analysis. Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes equity analysis. Prereq., MBAC 6020 or equivalent. Same as MBAX 6710.

ACCT 6260-3. Seminar: Managerial Accounting. Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications. Prereq., MBAC 6020 or equivalent, or instructor consent.

ACCT 6270-3. Seminar: Income Determination. Critical analysis of problems and theory of measurement and reporting of periodic net income of business organizations. Net income models, research efforts, and role of professional accounting organizations. Current issues and problems given special attention. Prereq., ACCT 3230 or equivalent, or instructor consent.

ACCT 6350-3. Current Issues in Professional Accounting. Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. This course also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students. Restricted to graduate students.

ACCT 6420-3. Research and Writing in Income Taxation. Studies and applies the method used in tax research and tax planning, with the goal of developing tax research, technical writing, and tax planning skills. Topics include examining primary and secondary sources of federal tax law, evaluating the hierarchy of these sources, and developing technical writing skills using deductive legal reasoning. Prereq., ACCT 5440 or equivalent, or instructor consent.

ACCT 6430-3. Taxation of Partnerships. Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S.

Includes creation, operation, distributions, sale of interests, and liquidation. Prereq., ACCT 5440 or equivalent, or instructor consent. Coreqs., ACCT 6420 and 6700. Same as LAWS 6167.

ACCT 6440 (2-3). Tax Policy. Offers a research seminar exploring policy issues of taxation including recent legislative proposals. Students prepare a publishable research paper on a tax policy topic agreed upon with the instructor. Prereq., ACCT 5440 or equivalent, or instructor consent. Coreqs., ACCT 6420 and 6700.

ACCT 6450-3. Taxation of Corporations. Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests, and liquidation. Prereq., ACCT 5440 or instructor consent. Coreqs., ACCT 6420 and 6700. Same as LAWS 6157.

ACCT 6490-3. Taxation of Natural Resources. Concerned with tax problems encountered in acquisition, operation, and disposition of natural resource properties. Topics include depletion, lease bonuses, intangible drilling costs, depreciation, and financing arrangements. Prereqs., admission to the graduate tax program, ACCT 6700 or equivalent, or instructor consent.

ACCT 6500-3. Special Topics in Taxation. Covers a diverse array of issues in taxation. Highlights areas of current interest and draws on the strengths of leading outside authorities as guest lecturers in various topic areas. Prereq., ACCT 6420 and 6700.

ACCT 6620-3. Advanced Auditing: Business Risk and Decision Analysis. Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers. Prereq., ACCT 5620 or equivalent.

ACCT 6700-4. Income Taxation. Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual. Prereq., ACCT 5440 or equivalent. Same as LAWS 6007.

ACCT 6710-3. Federal Estate and Gift Tax. Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts, and involves elementary estate planning. Prereq., ACCT 5440 or equivalent. Coreqs., ACCT 6420 and 6700. Same as LAWS 7207.

ACCT 6720-2. Estate Planning. Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning, and drafting of trusts and wills. Prereq., ACCT 6710 or equivalent. Same as LAWS 7217.

ACCT 6780-3. International Taxation. Covers basic aspects of the United States taxation of income earned abroad by its citizens and the taxation income derived by foreign persons from U.S. sources, including the implications of income tax treaties. Same as LAWS 7617.

ACCT 6820 (1-3). Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in accounting. Prereq: varies.

ACCT 6900 (1-6). Independent Study. Requires prior consent of instructor under whose direction study is taken. Departmental form required.

ACCT 6940-1. Master's Degree Candidacy. Departmental form required.

ACCT 6950 (1-4). Master's Thesis.

ACCT 7300-3. Doctoral Seminar: Introduction to Accounting Research. Introduces students to seminal accounting research, covering a variety of topics and research methods. Provides students with instruction and experience in reading, critiquing and discussing accounting research. Provides a framework for understanding the financial reporting choice from both contracting and valuation perspectives.

ACCT 7320-3. Doctoral Seminar: Accounting and Capital Markets I. One semester of a two-semester course in accounting-related capital markets and research, spanning topics such as: information intermediaries; earning management; auditing and other monitoring mechanisms; efficient versus opportunistic accounting choice related to contracts between the firm and its stakeholders; cost of capital; and market efficiency with respect to accounting information. Papers covered apply primarily economics-based archival and empirical research methods. Prereq., ACCT 7300.

ACCT 7330-3. Doctoral Seminar: Accounting and Capital Markets 2. The second semester of a two-semester course in accounting-related capital markets research. See ACCT 7320 for a description of the course content which is allocated evenly between ACCT 7320 and 7330.

ACCT 7340-3. Doctoral Seminar: Managerial Accounting Research. Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance. Prereq., ACCT 7300.

ACCT 7800-3. Doctoral Seminar: Accounting Theory. Follows the evolution of game-theoretic analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs. Open only to doctoral students.

ACCT 7830-3. Doctoral Seminar: Accounting Research. Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

ACCT 8820 (1-6). Graduate Seminar. Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. May be repeated up to 6 total credit hours. Prereq. varies. Offered irregularly.

ACCT 8900 (1-3). Independent Study. Requires instructor's consent and departmental form (taught as doctoral seminar).

ACCT 8990 (1-10). Doctoral Thesis.

Business Administration

BADM 2050-3. Honors/Special Topics. Variable topics in business, drawing from a variety of disciplines. Prereq., 3.50 minimum cumulative GPA.

BADM 2880-3. Special Topics. Explores historical developments, contemporary issues, industry trends, and best practices pertinent to the business of sports. The course examines how sports enterprises are managed, and the impacts that such enterprises have on the economic and social fabric of communities. The course is designed to provide sufficient background for educated consumption of this literature and pursuit of further study if desired. Restricted to sophomores/juniors/seniors.

BADM 3880-3. Special Topics. Introduces students to the many facets of the marketing of sport and marketing through sport. Theoretical and practical applications of marketing sport are examined. The course will provide students with an understanding of current marketing concepts, and best business practices, related to sports enterprises and a foundation for pursuit of further study and work in sports and event marketing. Restricted to juniors/seniors.

BADM 3930 (1-6). Internship. Student training and participation in government or industry environment under faculty supervision. Prereqs., BCOR 1000, 2000, 2010, 2050, GPA 2.50, junior standing and instructor consent.

BADM 4010-3. Sustainable Resort Tourism. Focuses on resort communities in the Western U.S. and Canada and the challenges they face in planning, development, management and sustainability. Course topics include, but may not be limited to, business development factors for tourism and non-tourism businesses.

BADM 4820 (1-6). Special Topics. Variable topics in business drawing from a variety of business disciplines.

BADM 4825-3. Experimental Seminar. Offered irregularly to provide opportunity for investigation of new frontiers in business administration. Restricted to juniors/seniors.

BADM 4830 (1-3). Special Topics. Various topics in business and society drawing from a variety of business disciplines. Restricted to junior/senior business majors.

BADM 6820 (1-3). Topics in Business Administration. Offered irregularly to provide opportunity to investigate new topics in business administration.

BADM 6930-3. Commercializing Sustainable Energy Technologies. Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing, and economic analysis as they relate to bringing renewable energy technologies to market.

Business Core

BCOR 1010-3. Introduction to Business. Provides an overview of how business works through the application and integration of the fundamental business functions of accounting, finance, management, marketing, and systems. Weekly discussion of current events will focus on entrepreneurship, international business, business and society, and career topics. Restricted to freshmen business majors.

BCOR 1020-3. Business Statistics. Covers descriptive statistics, basic probability theory, statistical inference, correlation and regression analysis, and time series analysis. Uses statistical features of commonly used business spreadsheet software. Students use this software to solve problems using real business data. Prereqs., MATH 1071 and successful completion of computer proficiency test. Formerly BCOR 2010.

BCOR 2000-4. Accounting and Financial Analysis. Builds a basic understanding of how information regarding a firm's resources and obligations is conveyed to decision makers both outside and within the firm. Prereq., BCOR 1010, 1020 and successful completion of the EXCEL proficiency exam. Restricted to students with a minimum of 26 credit hours.

BCOR 2200-3. Introductory Finance. Emphasizes the concepts and skills needed to make sound financial decisions. Topics include financial statement analysis, time value of money, interest rates, bond valuation and bond markets, stock valuation and stock markets, cost of capital and capital structure, capital budgeting, financial forecasting, and working capital management. Prereqs., BCOR 1020, 2000, and any two ECON classes, and 26 hours completed. Formerly BCOR 2100.

BCOR 2300-3. Adding Value with Management. Focuses on how modern business firms compete in the global marketplace by adding value. Examines the value-chain of a firm and how firms use people, organizations, operations, and information systems to compete and win in world markets. Also covers contemporary issues such as total quality management, process reengineering, teams and team building, employee empowerment, and horizontal organizations. Prereq., BCOR 1010 and successful completion of the EXCEL proficiency exam. Restricted to students with a minimum of 26 hours. Formerly BCOR 2150.

BCOR 2400-3. Fundamentals of Marketing. Examines how activities in organizations provide value to the purchasers of its products and services. Includes gathering information about consumers and competitors through research and information systems, applying knowledge and technology to the design of products and services, communicating information to consumers and organizational units, and pricing and distributing products and services. Also includes issues in global marketing, ethics and diversity, relationship marketing, and integrating marketing with financial analyses. Prereq., BCOR 1010, BCOR 1020, and ECON 2010. Coreq., second semester of ECON series. Restricted to sophomores/juniors/seniors, and 26 hours completed.

BCOR 2500-3. Introduction to Operations and Information Management. Explores the complexity and uncertainty of today's global business environment from a systems perspective. Provides foundations, technologies, and practical skills in describing, analyzing, and improving business procedures. Prereq., BCOR 1010, BCOR 1020, successful completion of the EXCEL proficiency exam, and 26 hours completed.

BCOR 3000-3. Business Law, Ethics, and Public Policy. Surveys major topics and case studies in business law, business ethics, and government policy. Business law topics include the American legal system, constitutional law, common law, contract principles, criminal and tort law, intellectual property, employment law, and personal and real property law. Ethics topics include the philosophy of law, legal versus moral issues, and professional responsibility. Public policy topics include the roles of business and government, types of government intervention, and the nature and theory of governmental policy formulation. Prereq., 52 hours completed.

BCOR 3010-3. Business Applications of Social Responsibility. Explores alternative views of the role of business in our global society through detailed case analyses, beginning with the free market view. This is a cross-functional area

course that helps students to isolate and articulate their personal values that will shape business conduct. Emphasizes individual and organizational responsibility for business behavior in the broader social context. Prereq., BCOR 1010, 1020, 2000, 2200, 2300, 2400, 2500 and 59 hours completed.

Business Environment and Policy

BPOL 6940-1. Master's Candidate for Degree.

BPOL 6950 (1-6). Master's Thesis.

BPOL 7500-3. Doctoral Seminar: Strategic Management 1. Provides an overview of the literature, including classic articles and books, in business strategy and policy (strategic management). Brings the student up to date on schools of thought, research issues, and practical applications in strategic management.

BPOL 7530-3. Doctoral Seminar: Strategic Management 2. Continuation of BPOL 7500. Prereq., BPOL 7500.

BPOL 7560-3. Entrepreneurship, International Business and Technology Management. Provides doctoral students with an understanding of strategic management and entrepreneurship theory, as applied to international business and technology management literatures. Additionally, students are exposed to research methods in the strategy and entrepreneurship arenas. Prereqs., BPOL 7500 and 7530.

BPOL 8900 (1-3). Independent Study. Requires consent of instructor under whose direction study is taken. Departmental form required.

BPOL 8990 (1-10). Doctoral Thesis.

Business Law

BSLW 4120-3. Advanced Business Law. Continuation of BCOR 3000. Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. BCOR 3000 and BSLW 4120/5120 together cover the business law topics tested on the CPA exam. Prereqs., BCOR 3000 and junior standing. Same as BSLW 5120.

BSLW 4820 (1-3). Topics in Business Law. Experimental course offered irregularly for purpose of presenting new subject matter in business law.

BSLW 4825-3. Experimental Seminar. Offered irregularly to provide opportunity for investigation of new frontiers in Business Law. Restricted to juniors/seniors.

BSLW 4900 (1-3). Independent Study.

BSLW 5120-3. Advanced Business Law. Same as BSLW 4120.

BSLW 6900 (1-6). Independent Study.

Current Emphasis in Social Responsibility

CESR 4820 (1-6). Business Solutions to Global Poverty: Learning Through Service. Provides students with practical knowledge and hands-on experience in developing sustainable business strategies to meet the real-world needs of small business entrepreneurs in developing countries. Students teams work with Peace Corps volunteers and other social entrepreneurs who are addressing social and environmental issues.

CESR 4830 (1-3). Leadership Challenges: Exercises in Moral Courage. A year-long course that focuses on values and leadership at the top level of organizations. The course is based on an interactive model that brings in six high-level executives to share their experiences and present critical business dilemmas, to which students prepare solutions for the executives to evaluate.

Entrepreneurship and Small Business Management

ESBM 3100-3. Introduction to Entrepreneurship. Introduces non-business students to the multiple facets of entrepreneurship and the entrepreneurial process. Entrepreneurship is a process of fundamental transformation: from innovative

idea to enterprise and from enterprise to value; thus, entrepreneurship is more than a business practice. Innovation is central to this process and students will be challenged to develop creative solutions to a problem or need. Restricted to non-Business majors only.

ESBM 3200-3. Principles of Business for Entrepreneurs. Provides non-business students with a basic understanding of the business principles required to start and grow an entrepreneurial venture. It is intended for individuals who have not taken a marketing, accounting or finance course. This course will focus on two aspects of business that are critical to the success of any new venture: marketing and financial management. Restricted to non-Business majors only.

ESBM 3700-3. Entrepreneurial Environments. Introduces entrepreneurship. Addresses opportunity recognition, target markets, industry analysis, business model identification, sources of funding, managing rapid growth, and writing feasibility studies. Examines alternative forms of entrepreneurship such as franchising, corporate entrepreneurship, family business, and social entrepreneurship. Prereqs., BCOR 2000, 2050, 2100, 2150, or BCOR 2000, 2200, 2300, 2400. Restricted to students with 52 hours completed.

ESBM 4100-3. Writing a Venture Plan. Requires non-business students to engage in a rigorous, thoughtful and challenging process essential to planning a new venture. Using their own concept, students will develop a strategy to start and grow a venture. Communicating the plan is an essential element of this course and students will learn when and how to write a plan and make effective presentations. Prereqs., ESBM 3100 and 3200. Restricted to non-Business majors only.

ESBM 4570-3. Entrepreneurial Finance. Focuses on the financial concepts, issues, methods, and industry practices relevant to entrepreneurial decision makers. Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering. Provides an understanding of the segments of the capital markets specializing in start-ups and growth financing. Prereq., BCOR 2200. Restricted to Business majors with 52-180 units completed.

ESBM 4820-3. Special Topics in Entrepreneurship.

ESBM 4825-3. Experimental Seminar. Offered irregularly to provide opportunity for investigation of new frontiers in Entrepreneurship and Small Business Management. Restricted to juniors/seniors.

ESBM 4830-3. Entrepreneurship Business Planning and Preparation. In-depth preparation for writing a business plan for a new business venture. Prereqs., ESBM 3700 and 4570. Same as EMEN 4825.

ESBM 4900 (1-3). Projects in Entrepreneurial Companies. Complete projects in preselected entrepreneurial companies. Prereq., instructor consent.

Finance

FNCE 3010-3. Corporate Finance. Covers the theory and practices governing the management of capital in a business firm. Examines the determinants of capital requirements, methods of obtaining capital, problems of internal financial management, and methods of financial analysis. Prereq., BCOR 2200. Restricted to students with 52 hours completed.

FNCE 4000-3. Financial Institutions Management. Analyzes the structure, markets, and regulations of financial institutions. Studies problems and policies of internal management of funds, loan practices and procedures, investment behavior, deposit and capital adequacy, liquidity, and solvency. Prereq., FNCE 3010.

FNCE 4030-3. Investment and Portfolio Management. Develops modern portfolio theory and applies it to pricing both individual assets and portfolios of assets. Topics include portfolio selection, capital asset pricing model, arbitrage pricing theory, options, futures, bonds, portfolio performance measurement, and issues of market efficiency. Prereq., FNCE 3010.

FNCE 4040-3. Derivative Securities. Develops the modern theory of contingent claims in a mathematical framework oriented toward applications. Examines how to use derivatives for risk management and to tailor portfolio payoffs. Provides an in-depth analysis of the properties of options. Prereq., FNCE 3010.

FNCE 4050-3. Capital Investment Analysis. Focuses on capital budgeting and investment issues. Emphasizes issues relating to cash flows, capital rationing, the investment versus financing decision, leasing, fluctuating rates of output, invest-

ment timing, capital budgeting under uncertainty, and investment decisions with additional information. Prereq., FNCE 3010.

FNCE 4060 (1-6). Special Topics in Finance. Presents new subject matter in finance. The summer offering is the London Seminar in International Finance and Business. Prereqs. vary depending upon course offering. See advising office.

FNCE 4070-3. Financial Markets and Institutions. Examines the economics of financial markets and the management of financial institutions, both domestic and international. Topics include an overview of U.S. and international financial markets, pricing and risk factors, interest rates, markets for securities and financial services, and markets for derivative financial instruments. Prereq., BCOR 2200. Restricted to students with 52 hours completed. Formerly FNCE 3020.

FNCE 4820-3. Topics in Finance. Offered irregularly to provide opportunity for investigation into new frontiers in finance. May be repeated up to 6 total credit hours. Restricted to 52 hours completed.

FNCE 4825-3. Experimental Seminar. Offered irregularly to provide opportunity for investigation of new frontiers in Finance. Restricted to juniors/seniors.

FNCE 4850-3. Business Senior Seminar in Finance. Develops analytical and decision making skills necessary to address real-world business finance situations. Topics include financial analysis and forecasting, capital budgeting, valuation, capital structure policy, international finance, and financial ethics. Uses a combination of lecture and cases; team and individual work. Prereqs., FNCE 3010 and 102 hours completed. Coreqs., ACCT 3220 and FNCE 4030. Restricted to graduating senior FNCE majors. Formerly BCOR 4002.

FNCE 4900 (1-6). Independent Study. Intended only for exceptionally well qualified business seniors. Prereq., prior consent of dean and instructor under whose direction study is taken, and departmental form.

FNCE 6820 (1-3). Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in finance.

FNCE 6900 (1-6). Independent Study. Requires consent of instructor under whose direction study is taken. Departmental form required.

FNCE 6950 (1-6). Master's Thesis.

FNCE 7100-3. Doctoral Seminar: Finance Theory. Develops the foundations for the study of modern financial economics by analyzing individuals' consumption and portfolio decisions in the context of risk and then traces the implications to market valuation of traded securities. Topics include the meaning and measurement of risk, portfolio theory, the Capital Asset Pricing Model, and arbitrage pricing arguments like those employed in Modigliani and Miller's capital structure theory and the Black-Scholes option pricing model.

FNCE 7200-3. Doctoral Seminar: Empirical Research Methods in Finance. Develops an understanding of current empirical methods used to examine research issues related to corporate finance and the capital markets.

FNCE 7330-3. Doctoral Seminar: Corporate Finance, Theoretical, and Empirical Issues. Develops and examines theories and issues in corporate finance. Topics may include corporate control, capital structure, financial signaling, and payout policy.

FNCE 7550-3. Doctoral Seminar: Special Topics in Finance. Closely examines areas of specific interest to academic research in finance. Subjects vary and may include game theory, stochastic processes in finance, continuous-time modeling, derivative security pricing, the microstructure of securities markets and financial institutions, innovation, and engineering.

FNCE 7800-3. Doctoral Proseminar: Finance. Provides finance doctoral students with an orientation to the finance field; introduces contemporary research perspectives and priorities. Students discuss papers that illustrate academic researchers' use of various disciplinary theoretical and empirical tools to address finance problems.

FNCE 7830-1. Doctoral Seminar: Dissertation Research. Assists doctoral students in integrating courses and fields of study in order to apply their knowledge and skills to problems in finance. Gives special attention to development of thesis topics. Continuous enrollment required of all finance doctoral students while doing course work.

FNCE 8820-3. Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in finance.

FNCE 8900 (1-3). Independent Study. Instructor consent and departmental form required.

FNCE 8990 (1-10). Doctoral Thesis.

International Business Certificate

INBU 4200-3. International Financial Management. Examines the financial policies and problems associated with firms doing business internationally. Topics include the foreign exchange environment, country risk, managing foreign exchange exposure, international working capital management, international capital budgeting, and international financial markets. Prereq., BCOR 2200. Restricted to students with 52 hours completed.

INBU 4300-3. International Business and Management. Exposes students to the concerns and management of international activities that fall largely within functional disciplines. Topics might include overseas market assessment and analysis, marketing internationally, export-import procedures. Prereq., BCOR 2300 and 52 hours completed.

INBU 4900 (1-12). Independent Study. Prereq., instructor consent. Departmental form required.

INBU 5100-3. International Business and Marketing. Same as MKTG 4400.

Management

MGMT 3030-3. Critical Leadership Skills. Provides an opportunity to learn about and practice the skills required of all managers. These skills include leadership, negotiation, conducting performance appraisals, delegation, effective communication, interviewing and making hiring decisions, and managing employees with problem behaviors. Objectives include developing self-awareness of strengths and weaknesses as a manager, gaining familiarity with theory-based skills, and developing proficiency in the use of these skills. Prereq., BCOR 2300. Restricted to students with 52 hours completed.

MGMT 3100-3. Management of Service Operations. Examines concepts, tools and techniques used in the management of service operations. Focuses on how firms add value and compete with high quality and efficient services. Emphasizes the use of models for designing new services and improving the effectiveness of service processes. Studies the application of technology in the context of productivity, growth and the globalization of services. Restricted to students with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 3030, OPIM 3030.

MGMT 3200-3. Business Intelligence. Focuses on acquiring accurate and timely knowledge to make effective operational, tactical and strategic decisions. This course focuses on how to create and use such knowledge. Topics include problem definition; critical factor isolation; data collection, storage, and querying; transformation of data into knowledge through appropriate analyses and aggregation; and the presentation of the knowledge to decision makers in meaningful ways. Restricted to students with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 3100, OPIM 3100.

MGMT 4010-3. Redefining the Employee-Employer Relationship. Explores developments in such areas as employee relations law and procedures, employee and employer rights, worker involvement programs, environmental safety and health, and the effects of technology on emerging organization forms. Prereq., BCOR 2300. Restricted to students with 52 hours completed.

MGMT 4020-3. Hiring and Retaining Critical Human Resources. Allows students the opportunity to practice conducting job analyses and then use this information to develop employee selection and performance appraisal systems. Provides thorough coverage of employers' equal employment opportunity and affirmative action obligations, as well as various approaches to gender, cultural, and ethnic diversity. Prereq., BCOR 2300. Restricted to students with 52 hours completed.

MGMT 4030-3. Managing Employee Reward Systems. Examines theories of work motivation and relates them to the strategic use of compensation and other reward systems. Topics include procedures for managing base pay; linking pay incentives to productivity at the individual, group, and organizational levels; developing cost-effective programs of employee benefits; and the use of nonfinancial reward systems. Prereq., BCOR 2150 or BCOR 2300. Restricted to students with 52 hours completed.

MGMT 4040-3. Individual, Team, and Organizational Development. Explores how to determine where an organization needs to focus its development efforts, how to develop and deliver an effective training program, and how to evaluate the impact of development programs on organizational effectiveness. Explores individual, team, and organization-wide development, including such topics as skills training, team building, and managing change. Prereq., BCOR 2150 or BCOR 2300. Restricted to students with 52 hours completed.

MGMT 4090-3. IT and Business Strategy. Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success. Prereqs., BCOR 2200 or BCOR 2300. Restricted to business majors with 52 hours completed.

MGMT 4110-3. Supply Chain Management. Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses, and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries. Restricted to students with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 4050, OPIM 4050.

MGMT 4120-3. Managing Business Processes. Covers the concepts and tools to design and manage business processes. Emphasizes modeling an analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes. Restricted to students with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 4060, OPIM 4060.

MGMT 4130-3. Sustainable Operations. Addresses important topics in sustainable operations, and how firms use principles of sustainability to reduce costs, add value, and increase competitiveness. Various approaches to reducing waste-streams are considered, including reuse, recycling, recovery, and topics in industrial ecology. Other topics include the role of government regulation and public pressure, comparisons between different national approaches to sustainable operations, individual company programs, and prospects for the future. Prereqs., BCOR 2300 and 52 hours completed. Former OPIM 4075, MGMT 4080. MGMT 4130 and CESR 4130 are the course.

MGMT 4140-3. Project Management. Introduces multidisciplinary project management concepts, skills, and tools, including the relationship between project definition, organization, planning, scheduling, resource and risk management, control, costing, and performance. Presents both qualitative and quantitative tools for better project management. Prereq., BCOR 2500 and 52 hours completed. Formerly OPIM 4080 and MGMT 4850.

MGMT 4150-3. International Operations Management. Compares systems of production/operations management in the United States with those in Japan, Europe, and Asia. Contrasts various regional and national approaches to business, quality management, labor practices, management styles, international competitiveness, productivity, distribution systems, trade practices, and strategies for penetrating foreign markets. Examines different sociocultural environments, government-business relationships, banking industries, operations strategies, and the potential for transferring industrial management practices and techniques between countries. Prereq., BCOR 2500. Restricted to students with 52 hours completed. Formerly OPIM 4065 and MGMT 4070.

MGMT 4210-3. Systems Thinking. Analysis of systems thinking and understanding the complex interactions of collections of people, processes, organizations, and technologies. Students learn to be creative and critical thinkers who can conceptually model the very complex systems we encounter in our world today. Restricted to students with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 3000, OPIM 3000.

MGMT 4220-3. Business Technologies. Covers major technologies that underlie today's businesses and e-Commerce, including but not limited to WWW technologies. Emphasizes the security privacy issues and solutions at multiple levels of network, systems, personal, organization, and inter-organizational commerce. Aims to help students better understand and evaluate technology-related issues, alternatives, and trade-offs. Provides core technology background for students

entering a technology-related field. Restricted to students with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 3000, OPIM 3000.

MGMT 4230-3. Design of Usable Business Systems. Focuses on the usefulness and usability of systems in organizations. Examines the bottom line implications of information systems and how to create systems that are easy to use for all potential users. Creative and critical thinking to design and build systems are stressed through individual and team exercises. Restricted to students with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 4510, OPIM 4510.

MGMT 4820-3. Topics in Business. Experimental course offered irregularly for purpose presenting new subject matter in organization management. Same as MGMT 5820.

MGMT 4825-3. Experimental Seminar. Offered irregularly to provide opportunity for investigation of new frontiers in Management. Restricted to juniors/seniors.

MGMT 4850-3. Senior Seminar in Management. Surveys the sources of competitive advantage in a global economy. Discusses principles, frameworks, and techniques that help managers and students understand markets and competitive positioning. Focuses on specific company examples. Provides an interdisciplinary team exploration of the evolving strategies across different industries. Cases are formally presented to an executive panel. Includes substantial material on corporate social responsibility and sustainability. Prereqs., BCOR 2300, 2500, 3010, two 4000-level MGMT courses and 102 hours completed. Restricted to MGMT majors. Formerly MGMT 4000.

MGMT 4900 (1-3). Independent Study. Intended only for exceptionally well qualified business seniors. Departmental form required. Prereq., dean and instructor consent.

MGMT 4910 (1-3). Academic Internship in Management. Offers students the opportunity to gain professional work experience in a management position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes 100 hours per credit and a course paper. Instructor consent is required. Restricted to students with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 4910, OPIM 4910.

MGMT 5820-3. Topics in Business. Same as MGMT 4820.

Marketing

MKTG 3150-3. Sales Management. Explores the selling task and the essentials of managing the sales force. Includes recruiting, selecting and hiring, training, compensating, supervising, and controlling. Covers sales organization, sales planning, sales forecasting, assigning territories, quotas, and sales analysis. Prereq., BCOR 2400. Restricted to students with 52 hours completed. Formerly MKTG 4150.

MKTG 3250-3. Buyer Behavior. Covers both consumer buying behavior and organizational buying behavior. Consumer behavior topics include needs and motives, personality, perception, learning, attitudes, cultural influence, and contributions of behavioral sciences that lead to understanding consumer decision making and behavior. Explores differences between business and consumer markets, business buying motives, the organizational buying center and roles, and the organizational buying process. Required for marketing majors. Prereq., BCOR 2400. Restricted to students with 52 hours completed.

MKTG 3350-3. Marketing Research. Explores fundamental techniques of data collection and analysis used to solve marketing problems. Specific topics include problem definition, planning an investigation, developing questionnaires, sampling, tabulation, interpreting results, and preparing and presenting a final report. Required for marketing majors. Prereqs., BCOR 1020 and 2400. Restricted to students with 52 hours completed.

MKTG 3450-3. International Marketing. Describes the economic, geographic, political, and social forces that have shaped and continue to define global markets. Examines topics critical to success in international markets, including assessment of a firm's international capabilities, techniques for gauging the potential of international markets, international segmentation approaches, and alternative arrangements for entering foreign markets. Compares and contrasts product, price, distribution, logistics, promotion, and research decisions made in global versus domestic markets. Introduces students to financial arrangements

characteristic of international marketing, including exchange rates and controls, balance-of-payment principles, import licensing agreements and tariffs. Prereq., BCOR 2400. Formerly MKTG 4400.

MKTG 4250-3. Product Strategy. Covers major topics in managing long-term customer relationships that derive from products. Focuses on concepts, analyses, and strategies for existing and new products. Topics include concept development and testing, conjoint analysis, product positioning, brand image measurements and brand management, and product issues in public policy and ethics. Methods of instruction include lectures, case discussions, student group papers and projects, and examinations. Prereqs., MKTG 3250 and 3350. Restricted to juniors/seniors.

MKTG 4350-3. Services Marketing Strategy. Designed for those students interested in working in the service industries. Addresses the distinct needs and problems of service organizations in the area of marketing and service quality. Service organizations (i.e., banks, transportation companies, hotels, hospitals, educational institutions, professional services, etc.) require a distinctive approach to marketing strategy—both in its development and execution. Builds and expands on marketing ideas and how to make them work in service settings. Prereqs., MKTG 3250 and 3350.

MKTG 4500-3. Advertising Management. Prereqs., MKTG 3250 and 3350. Restricted to students with 52 hours completed.

MKTG 4550-3. Advertising and Promotion Management. Analyzes advertising and promotion principles and practices from the marketing manager's point of view. Considers the decision to advertise, market analysis as a planning phase of the advertising program, media selection, public relations, sales promotion, promotion budgets, campaigns, evaluation of results, and agency relations. Prereqs., MKTG 3250 and 3350.

MKTG 4650-3. Institutional Relationships and Strategy. Focuses on the management of a firm's relationships with other businesses. Addresses business-to-business marketing strategies, relationships with channel members, and strategic alliances/partnerships. Topics include relationship structures, power, conflict, negotiation, industry analysis, selection of business partners, and managing for long-term stability. Prereqs., MKTG 3250 and 3350.

MKTG 4810-3. Honors Seminar. Social responsibilities of the business executive, business ethics, business-government relations, and business in literature. Open to seniors who have completed at least 30 semester hours of business courses with not less than a 3.30 GPA and have instructor consent. Prereq., BCOR 2050 or 2400.

MKTG 4820-3. Special Topics in Marketing. Offered irregularly. Provides opportunity for investigation into new frontiers in marketing.

MKTG 4825-3. Pricing and Channels of Distribution. Offered irregularly to provide opportunity for investigation of new frontiers in Marketing. Restricted to juniors/seniors.

MKTG 4850-3. Senior Seminar in Marketing. This capstone marketing course integrates and further develops what students have learned in other courses. Provides students with the insight and skills necessary to formulate and implement sound socially responsible marketing strategies, product line management strategies, promotional and product/service communication strategies, pricing, and distribution strategies. Prereqs., MKTG 3250, 3350, two additional 4000-level MKTG courses, and 102 hours completed. Restricted to graduating MKTG majors. Formerly BCOR 4004.

MKTG 4900 (1-6). Independent Study. Intended only for exceptionally well qualified business seniors. Instructor and division chair consent required.

MKTG 6900 (1-3). Independent Study. Requires consent of instructor under whose direction study is taken. Departmental form required.

MKTG 6940-1. Master's Candidate. Departmental form required.

MKTG 6950 (1-6). Master's Thesis.

MKTG 7000-3. Seminar in Consumer Behavior. Studies the nature and determinants of consumer buying behavior. In-depth investigation of contributions of behavioral sciences (especially psychology, sociology, and cultural anthropology) toward understanding consumer behavior. Influence of demographic factors, motivation, personality, culture, and purchasing behavior. Prereq., instructor consent.

MKTG 7200-3. Experimental Research Methods in Marketing. Provides a detailed exposure to the design of laboratory/field experiments and quasi-experiments for marketing and consumer research. Emphasizes the choice of design options, data collection methods, statistical analysis, and substantive interpretation of experimental results.

MKTG 7300-3. Multivariable Methods in Marketing Research. Includes Manova designs, causal models, cluster analysis, discriminant function analysis, factor analysis, and latent structure analysis. Emphasizes computer applications. Prereqs., graduate courses in regression and Manova.

MKTG 7305-3. Qualitative and Survey Research Methods in Business. Detailed exposure to qualitative and survey research methods in business. Qualitative methods include participant observation, depth interviews, focus-group interviews and ethnography. Survey methods include measurement theory, survey design and sampling, survey implementation, data analysis, and substantive interpretation.

MKTG 7310-3. Design and Analysis of Experiments in Business. Detailed exposure to experimental research methods for business applications. Emphasizes the choice of design options, data collection methods, statistical analysis, and substantive interpretation of experimental results.

MKTG 7400-2. Doctoral Seminar: Channels of Distribution. Study of marketing literature in channels of distribution. Includes topics of channel structure, channel power, channel conflict and leadership, physical distribution systems, and regulation.

MKTG 7500-2. Doctoral Seminar: Promotion. Study of marketing literature dealing with advertising, selling, sales promotion, and sales management. Includes topics of advertising decision models, advertising effects, sales-force performance models, and promotion management.

MKTG 7600-3. Doctoral Seminar: Services Marketing. Study of marketing literature dealing with services. Includes such topics as service management, theoretical issues in the study of services, and strategies in travel, tourism, recreation, and financial services industries.

MKTG 7800-3. Doctoral Proseminar: Marketing. Provides marketing doctoral students with an orientation to the marketing field and introduces contemporary research perspectives and priorities. Students discuss papers that illustrate academic researchers' use of various disciplinary perspectives to address marketing problems and the range of theoretical and empirical methods used.

MKTG 7805-3. Doctoral Seminar: Economic and Administrative Science Approaches to Research. Examines marketing management and consumer behavior issues from the vantage of economics and organizational theory. One segment of the course focuses on theoretical and empirical analysis of the means by which utility-maximizing consumers learn about consumption environment and respond to firms' marketing decisions. Another segment examines research on firms' competitive strategy and marketing mix decisions and explores how organizational sociological factors influence these decisions.

MKTG 7810-3. Doctoral Seminar: Psychological Approaches to Research in Marketing. Examines the basic psychological processes that underlie common marketing phenomena. Topics include memory and judgment, persuasion, attitude-behavior consistency, information processing, automatic and controlled processes, learning, motivation and cognition, social judgment, and the role of affect and mood on judgment. Discusses topics in consumer behavior and marketing management contexts, in conjunction with related methodological issues.

MKTG 7815-3. Doctoral Seminar: Consumer and Managerial Decision Making in Marketing. Examines judgment and decision making research pertinent to understanding how consumers and marketing managers make decisions. Uses economic models as a normative backdrop for examining research on decision heuristics, judgment and choice anomalies, and contingent decision behavior. Examines processes of causal judgment and inference and the influence of a variety of contextual factors (including time) on judgment and decision.

MKTG 7820-3. Doctoral Seminar: Sociological and Anthropological Approaches to Research in Market. Inquires into substantive and methodological issues concerning postmodern consumer research. Attains depth in a few areas while also providing a framework in which to situate other substreams of research. Uses ethnography, semiotics, literary analysis, and other interpretive methods to examine topics such as brand and store loyalty, atmospheric and shopping dynamics, creation of brand meanings, and other marketplace behaviors.

MKTG 7825-3. Doctoral Seminar: Empirical Models in Marketing. Presents state-of-the-art empirical modeling techniques (both reduced-form and structural) used by marketing scientists, as well as discuss the key findings generated from major empirical studies. Acquaint the class participants with the systematic process of conducting rigorous empirical marketing research, enable them to read and critically review empirical papers in leading marketing journals and, ultimately, start doing independent empirical research. Prereq., a graduate course in regression.

MKTG 7830-3. Doctoral Seminar: Dissertation Research. Assists doctoral students in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in marketing. Gives special attention to development of thesis topics.

MKTG 8820 (1-6). Doctoral Seminar: Special Topics. Studies marketing literature on a topic or topics selected by instructor. Examples include marketing history, international marketing management, marketing environment, marketing of high technology products, and marketing models.

MKTG 8900 (1-3). Independent Study. Requires consent of instructor under whose direction study is taken. Departmental form required.

MKTG 8990 (1-10). Doctoral Thesis.

Master of Business Administration

Open only to MBA students. Non-MBA students seeking to enroll in noncore courses must meet the prerequisite requirements and have the consent of both the instructor and the director of the MBA program. Across all business areas, MBA students have enrollment priority for courses with an MBA prefix. Non-MBA students seeking to enroll in the noncore courses must meet the prerequisite requirements. Other elective options for MBA students may be found in the main business course descriptions.

MBA: Core Courses

MBAC 6010-3. Managerial Economics. Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

MBAC 6011-1.5. Managerial Economics 1. Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of the relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

MBAC 6012-1.5. Managerial Economics 2. See MBAC 6011.

MBAC 6020-3. Financial Accounting. Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

MBAC 6030-3. Quantitative Methods. Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate-level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions, and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and non-parametric methods.

MBAC 6031-1.5. Quantitative Methods. Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate-level treatment of descriptive statistics, probability, probability distributions, sampling theory, sampling distributions, and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers and nonparametric methods.

MBAC 6040-3. Management Behavior in Organizations. Develops an awareness of the impact of individual and group processes on effective organizational func-

tioning, an understanding of the impact of behavioral concepts, and practices their application through discussion and experiential learning.

MBAC 6050-3. Strategy. Experience the real-world problems facing general managers while enhancing skill at solving complex, real-business problems in strategy. Blends functional with strategic management and introduces students to the best new thinking in strategy. Integrates previous MBA learning, and instills a broadened perspective, competence, and familiarity with good practice in strategic management.

MBAC 6060-3. Corporate Finance. Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics. Prereq., MBAC 6020.

MBAC 6080-3. Decision Modeling and Applications. Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies. Prereq., MBAC 6030.

MBAC 6090-3. Marketing Management. Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, socio-cultural, technological, and natural environments. Prereq., MBAC 6030.

MBAC 6097-2. Business Simulation Seminar. Uses interactive, competitive, computer-based simulation designed to illustrate the process of implementing a strategy in a changing, technology-driven environment. The simulation uses advanced computer algorithms to create a market-driven business environment where customer preferences change, market segments shift, competitors emerge, technologies advance, and company fortunes rise and fall—depending on the decisions the student teams make. Prereqs., MBAC 6000, 6010, 6020, 6030, 6040, and 6080.

MBAC 6098-1. Business Writing. Develops business writing skills, with specific focus on style rather than content. Assists students in improving their writing skills in order to be effective communicators in their professional careers.

MBAC 6099-1.5. Professional Development. Develops presentation and interview skills to help students become effective communicators in their professional careers and to acquaint themselves well in the job placement process.

MBA: Accounting

MBAX 6700-3. Corporate Financial Reporting. Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Prereq., MBAC 6020 or equivalent. Same as ACCT 6220.

MBAX 6710-3. Financial Statement Analysis. Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers, and auditors. Emphasizes credit scoring, risk analysis, and equity valuation. Prereq., MBAC 6020 or equivalent. Same as ACCT 6250.

MBA: Entrepreneurship

MBAX 6100-3. Entrepreneurship. Examines the environments of entrepreneurial firms from start-up to development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans. Prereq., MBAC 6020 or instructor consent.

MBAX 6110-3. Entrepreneurial Finance. Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering. Prereq., MBAC 6020.

MBAX 6130-3. Sustainable Business Ventures. Focuses on environmentally sustainable business ventures as well as issues associated with starting and

operating a business that solves natural environmental challenges while achieving profitability. Includes a number of case studies, topical discussions, talks by environmental entrepreneurs, and an applied or library research project.

MBAX 6170-3. Business Plan Preparation. Completion of a sophisticated business plan within task groups from concept through all the elements of a professionally written business plan. Provides students high interaction with businesses and entrepreneurs. Prereq., MBAC 6020 and MBAX 6100, or instructor consent.

MBAX 6180-3. Startup Execution. Covers a variety of topics in applied entrepreneurship, including the steps required to legally launch a business and procedures for executing standard business functions (organization, marketing, sales, advertising, operations, team building, and finance) with minimal resources (cash, personnel, and equipment).

MBAX 6190-3. Projects in Entrepreneurial Companies. Limited to 12 students per section, each student is matched with an entrepreneurial company to complete a project that is key to company strategy. Students experience total company environment from the top management level through attending management meetings and interacting with cross-functional managers and employees. E-mail and face-to-face meetings result in discussing opportunities and issues resulting from experiences in companies. Prereq., MBAX 6100.

MBAX 6805-3. Entrepreneurship and the Venture Capital Process. This course will be articulated into two main parts, tightly interrelated: Entrepreneurship and the Venture Capital Process. The first part has the objective to lead the students to understand what venture capital is, how it works, how you structure capital raising, and how it helps entrepreneurial initiatives. The second part concerns how venture capitalists manage their operations, secure investment deals, and maintain their portfolios. Prereqs., MBAC 6011, 6020, 6031, 6040, 6060, 6080, and 6090. Restricted to LAWS students and graduate students in business.

MBA: Finance

MBAX 6200-3. Advanced Corporate Finance. Covers the theory of asset pricing, which is then applied to capital budgeting, capital structure choice, mergers and acquisitions, and risk management. Prereq., MBAC 6060.

MBAX 6210-3. Applied Financial Management. Analyzes the financial condition, planning, and control of current assets, current liabilities, and long-term financial arrangements. Topics include financial planning, managing working capital, short- and long-term financing, capital budgeting, valuation, and capital structure policies. Case studies are emphasized. Prereq., MBAC 6060.

MBAX 6220-3. Investment Management and Analysis. Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations. Prereq., MBAC 6060.

MBAX 6230-3. International Financial Management. Examines the financial procedures, policies, and risks faced by firms conducting business internationally. Topics include examining the international finance environment, managing foreign exchange risk exposure, managing international working capital, conducting analysis, and developing an understanding of international financial markets. Prereq., MBAC 6060.

MBAX 6240-3. Financial Markets and Institutions. Deals with the economics of financial markets and the management of financial institutions. Covers factors influencing the cost and availability of capital for financing business firms. Examines both domestic and international markets and institutions. Prereq., MBAC 6060.

MBAX 6250-3. Derivative Securities. Derivatives, like options, futures, forwards, and swaps, encompass all aspects of finance. Topics cover the characteristics, valuation, and trading strategies associated with derivatives as well as their use in risk management. Prereq., MBAC 6060.

MBAX 6260-3. Fixed Income Investing. Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing these securities, the markets where they are traded, and their purchase and management by financial intermediaries. Stresses the huge market for U.S. government debt, because it pro-

vides a foundation for the development of more specialized tools used in other markets. Prereq., MBAC 6060.

MBAX 6300-3. Marketing Communication. Focuses on the strategic and decision making aspects of marketing communication from a managerial perspective. Increases students' understanding of specific decision elements within an integrated marketing communications framework. Topics include promotional objectives, agency relations, media selection, budgeting, and advertising research. Also explores relevant advertising models and the economic and social effects of promotional activity. Prereq., MBAC 6090.

MBAX 6310-3. Marketing Strategy. Marketing strategy has developed into an increasingly critical managerial activity as businesses recognize the importance of creating customer value and being customer oriented. Discusses key elements of successful marketing strategy including market/customer analysis and competitor analysis, and identifies strategic approaches managers may adopt to succeed in today's highly competitive and rapidly changing business environment. Prereq., MBAC 6090.

MBAX 6330-3. Market Intelligence. Market Intelligence is a decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers. Students learn how to: define the marketing problem and determine what information is needed to make the decision; acquire trustworthy and relevant data and judge its quality; analyze the data and acquire the necessary knowledge to make certain classic types of marketing decisions. Prereq., MBAC 6090.

MBAX 6340-3. Marketing Field Project. Develops skills in marketing decision making. Teams design and complete a project located at a client business or other organization in the metropolitan area. Team members organize and assign responsibilities, interact with middle- and top-level managers, apply quantitative and behavioral tools presented in marketing and other courses, meet deadlines, and present results of project activities. Prereq., MBAC 6090.

MBAX 6350-3. Digital Marketing. Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords."

MBAX 6360-3. New Product Development. Provides a better understanding of the new-product development process, highlighting the inherent risks and strategies for overcoming them. Using a combination of lectures, cases, and a project, this course examines the process of designing, testing, and launching new products. Emphasizes the interplay between creativity and analytical marketing research throughout the development process. Also covers branding issues, such as brand extensions and their impact on brand equity. Prereq., MBAC 6090.

MBAX 6885-3. Interpreting the Economic Environment. The macroeconomic environment is vitally important to business managers regardless of their area of focus. Most macroeconomic events portend future economic changes that influence business and/or industry. Develops a basic understanding of the macroeconomy and its relationship to an individual business or industry through understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments, and integrating this information into the global economy. Prereq., MBAC 6010.

MBA: Management

MBAX 6440-3. Project Management. Acquaints students with multidisciplinary aspects of project management, including the relationship between schedule, cost and performance. The course uses a hands-on project where the student interacts with a real customer, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. At the conclusion of the course, the student may be eligible to apply for a project management certification from Project Management Institute based on previous work experience.

MBAX 6450-3. International Operations Management. Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including trade practices; penetration strategies; financial, marketing, services, and manufacturing operations; ethical and sustainability issues; and global competitive strategy. Compares global business practices in Asia, South America, Europe, and Africa.

MBAX 6500-3. Management of Organizational Change. Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant. Prereq., MBAC 6040.

MBAX 6530-3. Negotiating and Conflict Management. Explores and builds skills for conflict management and negotiation problems faced by managers (e.g., dealing with subordinates, peers, superiors, or clients). Content is relevant to all MBA students, especially those interested in management, accounting, entrepreneurship, finance, and marketing. Prereq., MBAC 6040.

MBAX 6540-3. Consulting Skills. Provides an integrative, hands-on exercise in managing change. Develops skills in contracting, collecting, and analyzing data, and writing reports. Teams practice these skills by conducting an organizational diagnosis, consulting project within an organization. Prereq., MBAC 6040.

MBAX 6550-3. Management of Technology and Innovation. Examines a variety of issues common to management of technology, such as technology strategies, methods of technology transfer, selecting technology standards, managing the research and development process, and encouraging and rewarding innovation.

MBAX 6560-3. Executive Leadership. Examines organizational leadership from the executive perspective, including private and public sector firms, and non-profits. Studies how executives lead change and innovation, interact with the top management team, and deal with the board of directors. Topics include governance of the firm, strategies for enhancing executive influence, assessing and understanding diverse leadership styles, and the ethics and responsibilities of an executive. Formerly MBAX 6890.

MBAX 6801-3. Global Perspectives Seminar. Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered. If demand for this type of experience is strong, multiple sections of the course could be offered in a given semester, each focusing on a different region or country. The choice of region and the specific focus of each course would depend on the faculty member teaching the course. May be repeated up to 6 total credit hours. Prereqs., MBAC 6010, 6060 and 6090.

MBA: Operations and Production Management

OPMG 6900 (1-3). Independent Study.

OPMG 6940-1. Master's Candidate.

OPMG 6950 (1-6). Master's Thesis.

OPMG 8990 (1-10). Doctoral Thesis.

MBA: Real Estate

MBAX 6600-3. Real Estate Principles. Studies methods of analyzing real estate opportunities, local government controls and regulations of the development process. Majority of class material is provided via case studies and guest lecturers. Last portion of the course will be the presentation of student group projects.

MBAX 6610-3. Real Estate Finance and Investment Analysis. Objectives of the course are to conduct income property investment analysis; to develop the technical competence necessary to structure real estate transactions; and to understand the financial assets securitized by real estate. Students will analyze income properties using Excel spreadsheets and Argus Financial Software. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications. Prereq., MBAX 6600 or equivalent, or instructor consent.

MBAX 6620-3. Real Estate Project Competition. Develops skills in real estate decision making. Teams design, complete, and present a real estate project in a competition forum. Students gain an understanding and working knowledge of real estate, use a piece of real property to determine its highest and best use, create a sales plan, and prepare a real estate financing package. Team members organize and assign responsibilities, interact with real estate professionals, and apply appropriate quantitative and qualitative tools and procedures. Prereqs., MBAX 6600, 6610 and 6640, or equivalent, or instructor consent.

MBAX 6630-3. Real Estate Economics. Examines real estate market operations and discusses alternative methodologies for estimating real estate values. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel, and other end users. Examines how factors influencing the demand for real estate interact with the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of the asset. Prereqs., MBAC 6011 and MBAC 6060. Formerly MBAX 6835.

MBAX 6640-3. Real Estate Law. Examines the legal issues associated with developing, acquiring, transferring, and leasing real property. Topics include real estate contracts, land use and development agreements, vehicles for owning real estate, real estate covenants, conditions and restrictions, loan transactions, negotiating real estate contracts, commercial leases and real estate taxation. Material for this course will consist of assigned articles and real estate cases. Prereq., MBAX 6600 or equivalent, or instructor consent. Formerly MBAX 6855.

MBAX 6815-3. Survey of Best Practices in Sustainable Real Estate Development. Explores techniques, processes, tools, and capabilities required to manage growth and land use change in the light of shifts beginning to transform the way we approach land use and real estate development.

MBAX 6966-3. Independent Study-Real Estate. Independent study in the field of real estate.

MBA: Social Responsibility

MBAC 6000-3. Socially Responsible Enterprise. Prepares future managers for confronting the truly difficult situations that arise when deploying economic resources, altering the physical environment, and making decisions that affect the lives of investors, employees, community members and other stakeholders. Case-based challenges will be examined in a broad range of contexts, and essential ethical concepts will be explored by drawing on theories from ethics, sociology, economics, political science and philosophy.

MBAX 6825-3. Topics in Sustainable Business. Provides a comprehensive overview of the core concepts, strategies and practices of sustainable business, emphasizing innovative business practices and entrepreneurial opportunities created by the sustainability "movement". The topic of sustainability will be approached from the unique perspectives of seven core disciplines of business administration: economics

MBAX 6845-3. Social Entrepreneurship in Emerging Markets. Social entrepreneurs adopt business approaches to solving global, social and environmental problems that have not been effectively addressed by government, business or traditional nonprofits. The course provides a framework for student teams to assist social entrepreneurs in developing countries, helping them achieve their social mission while operating sustainably and with measurable impact. Prereqs., MBAC 6010, 6060, and 6090. Recommended prereq., MBAX 6170.

MBA: Systems

MBAX 6410-3. Business Process Design. Covers the concepts and tools to design and manage business processes. Emphasizes modeling and analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.

MBAX 6420-3. IT and Business Strategy. Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoptions efforts to success.

MBAX 6460-3. Supply Chain Management. Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses, and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries. Recommended prereq., MBAC 6080. Same as OPIM 4050. Formerly MBAX 6865.

MBAX 6760-3. Accounting for Managers. Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications. Prereq., MBAC 6020 or equivalent or instructor consent.

MBAX 6802-3. Pricing Strategy and Tactics. Pricing provides the means to capture value. The course covers theories, analytical tools and conceptual frameworks needed for devising price strategy as part of the value proposition for products and services. It draws upon principles from economics, marketing and psychology. Primary and secondary data based analysis is used to understand price response and competitive pricing. Substantive topics include customized pricing, price negotiations, bidding and auctions, price discounting, trade promotion, bundling, behavioral pricing, among others. Prereqs., all MBA core courses.

MBAX 6803-3. Microfinance. Links financial markets with entrepreneurship to create a platform for the poor to start their own business. Participants learn how to combine technical knowledge of finance and international business development with the socially and ethically important microfinance field to help with sustainable economic development and reduce poverty worldwide, including the United States.

Operations and Information Management

OPIM 2010-3. Business Application Programming. Uses computer programming to teach a complex problem solving skill. Its two main course objectives are:

(1) learn to use a structured problem decomposition method, designed to help decompose a complex problem into manageable sub-problems. This method is best exemplified in programming but is applicable to any complex business problem. (2) understand the core concepts of programming—such as variable, object model, and control flow—that will help you not only appreciate the power of programming behind modern technologies but also better understand business process models. Formerly SYST 2010.

OPIM 6070-3. Survey of Operations Research. Applications oriented survey of operations research topics including linear and integer programming, network analysis, dynamic programming, nonlinear programming, decision analysis, Markov chain and Markovian decision models, queuing theory, and simulation. Same as EMEN 5600. Formerly SYST 6070.

OPIM 6080-3. Operations Management. Covers demand forecasting, capacity management, scheduling, inventory planning and management, production planning and control, materials requirements planning, just-in-time production systems, product design and process selection, elements of statistical process control, service operations, and quantitative techniques for operations decision making. Similar to EMEN 5500. Formerly SYST 6080.

OPIM 6820-3. Special Topics in Systems. Offered irregularly to provide opportunity for investigation into new frontiers in systems. May be repeated up to 6 total credit hours. Formerly SYST 6820.

OPIM 6900 (1-3). Independent Study. Requires prior consent of dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors who desire to study an advanced topic. Departmental form required. Formerly SYST 6900.

OPIM 6930-3. Assessing Sustainable Energy Technologies. Focuses on the commercialization prospects of emerging energy technologies, including solar, wind, biomass, oceanic, geothermal, hydropower, fuel cell (hydrogen), nuclear, and other more exotic energy sources. Investigates the technology feasibility, economic viability and progress of each technology, as well as its economic opportunities and challenges.

OPIM 6940-1. Masters Candidate.

OPIM 6950 (1-6). Master's Thesis.

OPIM 7110-3. Simulation Modeling and Analysis. Introduces the concepts of simulation modeling. Provides practical experience with real examples using popular commercial simulation packages such as Arena or Extend. Emphasizes discrete-event simulation but also covers topics in Monte Carlo simulation and system dynamics. Practical examples from operations management, manufacturing, and services are used to give students an appreciation for the wide scope of application and the robust nature of simulation modeling in the context of decision making. Formerly SYST 7110.

OPIM 7120-3. Discrete Optimization. Covers the modeling and solution of discrete problems that arise in business and engineering. Classical techniques such as cutting planes and branch and bound are covered. Emphasizes the application of metaheuristic procedures, such as tabu search and evolutionary approaches, to the solution of practical combinatorial optimization problems. Formerly SYST 7120.

OPIM 7330-3. Advanced Operations Management Modeling. Covers concepts, models, and solution techniques relevant to the management of the processes required to provide goods or services to consumers. Emphasizes supply chain systems topics such as production, inventory, distribution, and scheduling. Management science and operations research methodology is also applied to problems such as facility capacity planning, facility design, and location analysis. Formerly SYST 7330.

OPIM 7800-3. Doctoral Proseminar in Systems. Provides systems doctoral students with an orientation to current research and the academic discipline in operations and information systems. Familiarizes students with key schools of thought in the field, provides background on reference disciplines, examines significant research streams, and helps students begin developing their own area of interest. Formerly SYST 7800.

OPIM 7805-3. Foundations of Research in Information Systems. Examines foundations of information systems research, including classic readings in information systems and its reference disciplines, different research approaches, processes of research, and classic and contemporary readings in major topics in information systems. Prereq., PhD standing or instructor consent. Formerly SYST 7805.

OPIM 7810-3. Technical Topics in Information Systems Research. Examines in depth a selection of topics in technical areas of information systems. Includes theoretical perspectives for technical topics, critical perspectives on past and current research, appropriate methods for examining technical topics, and development of students' ability to identify and develop research topics in technical areas. Prereq., PhD standing or instructor consent. Formerly SYST 7810.

OPIM 7815-3. Behavioral Topics in Information Systems Research. Covers both basic and advanced topics. Develops skill in designing, evaluating, and understanding both quantitative and qualitative research methods. Includes the development of research proposals, making and justifying methodological choices, writing research reports, and understanding how to publish in information systems. Prereq., PhD standing or instructor consent. Formerly SYST 7815.

OPIM 7820-3. Advanced Research in Information Systems. Examines advanced topics in information systems research, focusing on the electronic era and e-business. Examines foundations of e-business, including basic technical, organizational, and behavioral foundations. Covers leading edge research from both topical and methodological perspectives. Focuses on methods appropriate for studying e-business and examines future research directions. Prereq., PhD standing or instructor consent. Formerly SYST 7820.

Organization Management

ORMG 7310-3. Seminar on Organizational Behavior. Doctoral level seminar covering such issues as leadership, job attitudes, motivation, absenteeism, turnover, goal setting, and group dynamics. Prereq., instructor consent.

ORMG 7320-3. Seminar in Organization Theory. Critically investigates major issues in organization theory and provides students with experience in comprehensively surveying literature in subject areas such as organization design, power, culture, innovation, technology, environment, size, and strategy. Instructor consent required.

ORMG 7330-3. Seminar and Practicum in Organization Development. Provides a doctoral level seminar emphasizing intervention theory and method in effectuating organizational change in a client system. Deals with group development, educational processes, conflict resolution, organizational interventions, change strategies, and ethical and skill requirements of the consultative role. Prereq., instructor consent.

ORMG 7800-3. Doctoral Proseminar: Management. Provides an orientation to doctoral level study for all students in management. Through critical analysis of articles and student and faculty presentations, students learn about reading and writing research articles and gain an overview of the management discipline.

ORMG 7830-3. Doctoral Seminar: Dissertation Research. Considers philosophical topics and concepts related to the social sciences and examines various methodologies relevant to business and dissertation research.

ORMG 8820 (1-4). Graduate Seminar. Provides opportunity for investigating new frontiers in organization management through an experimental seminar (offered irregularly).

ORMG 8900 (1-3). Independent Study.

ORMG 8990 (1-10). Doctoral Thesis.

Personnel/Human Resource Management

PHRM 7400-3. Seminar in Personnel Human Resource Management. Provides an intensive research-based survey of contemporary issues in personnel-human resource management. Survey literature and conduct research in personnel/human resource subject areas such as performance appraisal, pay strategy, human resource strategy, employee turnover, employment testing, and human capital. Prereq., instructor consent.

Real Estate

REAL 3000-3. Principles of Real Estate Practice. Covers principles of real estate from a value approach for both commercial and residential real estate. Includes legal terms and issues; government control of real estate; market valuation and appraisal; financing real estate; basic investment analysis; contracts and brokerage; and basic taxation of real estate. Prereq., BCOR 2200 and 52 hours completed.

REAL 4000-3. Real Estate Law and Financing Instruments. Covers estates in land, purchase and sales contracts, conveyances, mortgage and trust deed transactions, property taxes, and leases. Prereqs., REAL 3000.

REAL 4100-3. Real Estate Finance and Investment Analysis. Covers the link between real estate and the capital markets through an examination of the financial institutions and instruments used to finance real property. Examines methods used to analyze value in real property investments. Prereq., REAL 3000.

REAL 4810-3. Real Estate Academic Internship. Students are required to complete an internship at a real estate related company for a minimum of 150 hours (10 hours per week, 15-week semester). This capstone course will include bi-weekly seminars. Must be completing the Real Estate Certificate program. Contact the RE Center for registration information.

REAL 4820-3. Topics in Real Estate. Experimental course offered irregularly for purpose of presenting new subject matter in real estate. Prereq., REAL 3000.

REAL 4825-3. Experimental Seminar. Offered irregularly to provide opportunity for investigation of new frontiers in Real Estate. Restricted to juniors/seniors.

REAL 4900 (1-3). Independent Study. Intended for exceptionally well-qualified business seniors who desire to study an advanced topic. Must be in Real Estate Certificate Program. Prereq., dean and instructor consent.

REAL 6820 (3-6). Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in real estate.

REAL 6900 (1-3). Independent Study. Students must have consent of instructor under whose direction study is taken. Departmental form required.

School of Education

General Education

EDUC 2020-1. Step 1: Inquiry Approaches to Teaching. Invites science and mathematics students to explore teaching as a career by providing first-hand experiences teaching science/math lessons in local elementary classrooms. Introduces theory and practice necessary to design and deliver excellent instruction. Master teachers provide ongoing support and feedback. Meets weekly on CU campus (1.5 hours/week) and involves additional visits to local elementary school.

EDUC 2030-1. Step 2: Inquiry-Based Lesson Design. Builds on EDUC 2020 and further develops lesson design and inquiry-based teaching practice. Offers opportunity to explore teaching career and learn about middle school culture. Master teacher provides support as students design and deliver lessons in middle school classrooms. Emphasizes assessment of student learning. Meets weekly on CU campus (1.5 hours/week) and involves additional visits to local middle school. Prereq., EDUC 2020.

EDUC 2040-2. Step 1 and 2 Combination. Combines critical features of EDUC 2020 and 2030. Introduces theory and practice necessary to design and deliver inquiry-based instruction. Master teachers provide ongoing support and feedback. Emphasizes assessment of student learning. Meets weekly on CU campus (2.5 hours/week) and involves additional visits to local elementary/middle schools.

EDUC 2100 (1-3). Educator's Toolkit. Explores role of educator and opportunities to serve as educator in a range of settings, including K–12 schools, after-school programs, tutoring centers. Offers undergraduates interested in education practical understanding of teaching and learning processes, designing educational tasks, and providing effective feedback.

EDUC 2125-3. History of American Public Education. Provides overview to evolution of American public schools by exploring major reform efforts from the common school movement to present. Considers contentious values, important players, and roots of school structures. Examines both what intellectuals were thinking about public education and how ordinary people experienced schools. Assesses how differences in race, class, ethnicity, gender, and power shape public schools.

EDUC 2150-3. Education in Film. Provides opportunities to view and analyze how facets of education are represented (or misrepresented) in film. Considers narratives constructed about education and how those stories fuel popular conceptions of and assumptions about students, teachers, and schools. Examines how issues of race, class, and gender are embedded in how films represent schools, teachers, students, and communities.

EDUC 2800 (1-3). Special Topics. Designed to meet needs of students with topics of interest. May be repeated up to 12 credit hours.

EDUC 2910 (1-3). Field Practicum 1. Offers supervised campus and off-campus experiences tied to course work in the Chancellor's Leadership RAP or the program. See also EDUC 2920. May be repeated up to 6 total credit hours. Same as 2910.

EDUC 2920 (1-3). Field Practicum 2. Offers supervised campus and off-campus experiences tied to course work in the Chancellor's Leadership RAP or the INVST program. See also EDUC 2910. May be repeated up to 6 total credit hours. Same as LDSP 2920.

EDUC 3013 (3-4). School and Society. Introduces the real world of schools, teaching, and learning. Examines issues of diversity and equity from different disciplinary lenses, including history, philosophy, sociology, and anthropology. Restricted to sophomores, juniors, or seniors only. Approved for arts and sciences core curriculum: contemporary societies or human diversity.

EDUC 4161 (1-3). Children's Literature. Addresses reading and evaluation of books, children's, interests, authors and illustrators, folk literature, multicultural literature, modern fanciful tales, and trends.

EDUC 4222-3. Language Study for Educators. Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power, and considers implications for classroom teaching. Same as EDUC 5222.

EDUC 4240-3. African American and Latino Education in the United States.

Explores development of schooling for African Americans in the U.S. and for Latinos in the American Southwest. Emphasizes parallels and points of intersection these historically disenfranchised groups experienced in their quest to access meaningful educational opportunities. Examines how social, economic, political, and judicial action defined and organized policy and practice for these two groups. EDUC 4240 and 6240 are identical courses.

EDUC 4411-3. Educational Psychology for Elementary Schools. Integrates theories and ideas from elementary school child development and educational psychology. Explores theories of learning and child development and considers implications for teaching motivation, and academic achievement.

EDUC 4580-3. Physics and Everyday Thinking. Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physics content focuses on interactions and energy. Additional assignments completed at 5000-level. Same as EDUC 5580.

EDUC 4610 (1-3). Math and Science Education. Introduces learning theory and teaching practices for mathematics and science learning assistants. Presents theoretical issues such as conceptual development, questioning techniques, cooperative learning, nature of math/science, and argumentation in mathematics and science. Restricted to students admitted to the Learning Assistant program.

EDUC 4716-3. Basic Statistical Methods. Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test. Same as EDUC 5716.

EDUC 4800 (1-9). Special Topics. Designed to meet needs of students with topics of pertinent interest. May be repeated up to 18 total hours.

EDUC 4810 (1-9). Special Topics. May be repeated up to 18 total credit hours, provided the topics vary.

EDUC 4831-3. Advanced Peer Education. Second semester of an academic year's training for students interested in peer counseling. Expand upon what you learned in ARSC 2274. Focus on presentations, leadership, and group facilitation. Basic group leadership, facilitation theory, and technique taught. Co-create and co-lead your own small groups/presentations for other CU students. Offered only spring semesters. Prereq., ARSC 2274 or instructor consent.

EDUC 4840 (1-3). Independent Study.

EDUC 4910-3. Peer Counseling Practicum (previously EDUC 4830, 4840). Controlled enrollment. Repeatable for degree credit. Credit given for peer counseling activities. Students are selected to participate in this class and act as peer counselors or TAs for the peer counseling training.

General Teacher Education

EDUC 4460-3. Teaching and Learning Physics. Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research. Prereqs., PHYS 3210 and 3310 or instructor consent. Same as EDUC 5460, PHYS 4460 and 5460.

EDUC 4513-2. Education and Practice. Meets during student teaching experience. Examines topics such as classroom organization and management, culturally and linguistically responsive instruction, planning, assessment, student engagement and motivation, and effective instruction, including use of technology to support student learning. Supports student teachers to engage in critical reflection of their practice and preparation of performance assessments. Coreq., EDUC 4691, 4712, or 4722.

EDUC 4691-10. Student Teaching: Elementary School 1. Kindergarten through sixth grades. Prereq., completion of all education and content-specific arts and sciences requirements, and passing required licensure exam. Coreq., EDUC 4513.

EDUC 4701 (4-8). Student Teaching: Elementary School 2. Kindergarten and grades one through six in music. Should be taken concurrently with student teaching in home department.

EDUC 4712-10. Student Teaching: Secondary School. Student teacher apprentices in a middle/junior or senior high school. Must be admitted to a secondary teacher education program in English, Japanese, Latin, math, Russian, science, or social studies. Prereqs., completed all education and content-specific arts and sciences courses, and passed required licensure exam. Coreq., EDUC 4513.

EDUC 4722-5. Student Teaching: Secondary School 2. Student teacher apprentices in a middle/junior high or senior high school. Restricted to students admitted to a secondary teacher education program in French, German, or Spanish. Prereqs., completed all education and content-specific arts and sciences courses, and passed required licensure exam. Coreq., EDUC 4513.

EDUC 4732 (4-12). Student Teaching K–12. Required experience for music students seeking education at both elementary and secondary levels. Prereq., completed all education and content-specific music courses, passed required licensure exam. Coreq., MUSC 4193.

EDUC 4811 (3-4). Teaching and Learning Biology. Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions. Same as MCDB 4811 and EDUC 6811.

EDUC 4912-1. Practicum in Teacher Education. Provides in-school practicum experience.

Elementary Education

EDUC 3621 (1-3). Art for the Elementary Teacher. Introduces elementary education students to art education. Introduces many visual art techniques, art media, and processes used in art education. The class includes hands-on studio art experiences in a format that supports subjects such as literature, writing, music, and social studies. Emphasizes the role of art education and materials in supporting the artistic development and visual literacy of children. Prereq., completion of 30 hours of course work. Restricted to education majors.

EDUC 4311-3. Children's Literature and Literacy Engagement in Elementary Schools. Prepares teacher education candidates for teaching children's literature in elementary schools. Participants will understand theoretical and developmental processes associated with literary learning, methods for teaching literature in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes. Restricted to students admitted to the elementary education program.

EDUC 4321 (4-5). Integrated Reading and Writing for Elementary Schools. Participants will understand theoretical and developmental processes associated with reading and writing, methods for teaching elementary reading and writing in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes. Restricted to students admitted to the elementary teacher education program.

EDUC 4331-3. Elementary Social Studies Methods. Prepares teacher education candidates for teaching social studies in a social context. Participants will understand theoretical and developmental processes associated with social studies learning, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards. Restricted to students admitted to the elementary teacher education program.

EDUC 4341-3. Elementary Reading Assessment and Instruction. Builds on knowledge and teaching practices introduced in EDUC 4321. Addresses five critical components of reading. Refines understanding of research-based practices for diagnostic assessments and intensive intervention teaching strategies for elementary age learners. Prepares candidates to deliver a comprehensive reading curriculum in the elementary grades. Prereq., EDUC 4321. Restricted to students admitted to the elementary teacher education program.

EDUC 4351 (3-5). Differentiating Instruction in Diverse Elementary Classrooms. Focuses on teaching culturally and linguistically diverse elementary school

students, special education students, and differentiation in the elementary classroom. Includes hands-on experiences in elementary school settings. Restricted to students admitted to the elementary teacher education program. Coreqs., EDUC 5205 and 5215. Credit not granted for this course and EDUC 4023.

EDUC 5205-3. Elementary Mathematics Theory and Methods. Provides pre-service teachers opportunities to explore contemporary theories of learning, curriculum development, and pedagogical strategies pertaining to teaching elementary-level mathematics. Blends exploration in mathematical content with understanding of mathematics teaching strategies. Coreqs., EDUC 4351 and 5215. Restricted to elementary teacher education students.

EDUC 5215-3. Elementary Science Theory and Methods. Provides pre-service elementary teachers opportunities to explore contemporary theories of learning, curriculum development, pedagogical strategies, and assessment. Blends scientific content, pedagogy, and practical applications. Coreqs., EDUC 4351 and 5205. Restricted to students admitted to the elementary teacher education program.

Secondary Education

EDUC 4023 (3-5). Differentiating Instruction in Diverse Secondary Classrooms. Focuses on teaching culturally and linguistically diverse secondary school students, special education students, and differentiation in the secondary classroom. Includes hands-on experiences in secondary school settings. Restricted to students admitted to the secondary or K–12 music teacher education program. Credit not granted for this course and EDUC 4351.

EDUC 4050-3. Knowing and Learning in Mathematics and Science. Explores essential questions relevant to teaching and learning mathematics and science. This course expands the student's understanding of current theories of learning and conceptual development. Students examine their own assumptions about learning. They critically examine the needs of a diverse student population in the classroom.

EDUC 4060-3. Classroom Interactions. Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts. Students examine how content and pedagogy combine to make effective teaching. Same as EDUC 5060.

EDUC 4112-3. Educational Psychology and Adolescent Development. Analyzes fundamental psychological concepts underlying classroom instruction, as well as adolescent growth and development. Restricted to sophomores, juniors, or seniors. Same as PSYC 4114.

EDUC 4122 (2-3). Principles and Methods of Secondary Education. Presents and discusses issues in secondary school curriculum, instruction, assessment, and classroom management. Examines, analyzes, and evaluates a variety of teaching strategies, their effectiveness for students, and teacher dispositions to facilitate learning. Includes in-school experience. Restricted to students admitted to the secondary teacher education program.

EDUC 4125-3. Secondary World Language Methods. Presents and discusses issues in secondary school curriculum, instruction, and classroom management as they play out in world language classroom. Examines, analyzes, and evaluates a variety of teaching strategies, their effectiveness for students, and teacher dispositions to facilitate learning. Includes in-school experiences. Restricted to students admitted to the secondary teacher education program.

EDUC 4232-3. Language and Literacy across the Curriculum. Explores the relationship between language and learning with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines. Restricted to students admitted to the secondary teacher education program. Same as EDUC 5235.

EDUC 4295-3. Reading and Literacy in the Secondary Classroom. Examines ways in which adolescents develop literacy through reading, writing, speaking, viewing, and listening. Students learn to plan and organize literacy instruction based on ongoing assessment, to draw on and develop learner's linguistic skills related to reading, to support learner's reading comprehension skills, and to support their learning through oral language development.

EDUC 4342-3. Composition for Teachers. Cultivates development of a repertoire of teaching practices and perspectives to successfully engage adolescents and then move them to proficient writing. Emphasizes academic writing in secondary classrooms. Develops knowledge of planning, instruction, and assessment practices to ensure adolescent's learning and development as writers. Restricted to students admitted to the English or Social Studies teacher education program. Same as EDUC 5345.

EDUC 4312-3. Perspectives on Science. Explores contemporary ideas and issues in the history, philosophy, and sociology of science education and science, science as a social and cultural activity, and how contemporary issues in science relate to and impact educational practice. Same as EDUC 5315.

Graduate Education

The following courses are not program specific and may be taken by master's and doctoral students as needed for their plans of study.

EDUC 5005-3. Advanced Social Foundations of Education. Critically examines the intellectual and political forces that shape the aims, policies, and practices of K–12 education in the United States, emphasizing the period following the *Brown v. The Board of Education* decision in 1954. Restricted to students admitted to the secondary MA+ program.

EDUC 5035-3. Proseminar: Parent and Community Involvement. Focuses on models and strategies for improving parent and community involvement in the schools. Discusses administrative concerns, such as parent advisory councils, and instructional concerns, such as helping children with school assignments.

EDUC 5060-3. Classroom Interactions. Same as EDUC 4060.

EDUC 5065-3. Curriculum Theories. Examines four central curricular traditions: progressive; conservative; radical; and spiritual. Highlights the strengths and weaknesses of various writers within each tradition with attention paid to the conceptual features and the practical implications of each educational view. Encourages students to examine their own educational assumptions.

EDUC 5070-3. Spirituality and Religion in Education. Examines features of religion, spirituality, and a liberal arts education, so as to further understand the constitutional, historical and cultural constraints on, and acceptable approaches to the study of religion and spirituality in American education. Specifically explores aspects of a contemplative orientation and the degree to which such an orientation should/can be pursued in K-12 public and higher education.

EDUC 5075-3. Sociology in Education. In-depth analysis of theories and concepts in sociology and education. Evolution of curriculum, organization, and enrollment characteristics of American schools. Schooling, class, culture, gender, stratification, and educational reform in light of paradigmatic change in theories and concepts of sociology.

EDUC 5085-3. History of American Education. Highlights social and intellectual history perspectives of American educational history, major reform movements from the 19th century to Dewey, and assessment of how differences of race, class, ethnicity, religion, power, and gender affected American education.

EDUC 5095-3. Teachers as Researchers. Examines questions central to K–12 curriculum and instruction. Focuses on developing research projects applicable to current classroom practice, writing proposals for curriculum investigations, conducting specific curriculum investigations, and writing research findings.

EDUC 5105-3. Teaching for Understanding and Equity. Addresses perspectives and evidence-based teaching practices that promote equity and access to conceptual understanding. Introduces the knowledge base on effective teaching practices, and the theories and research that support these practices. Explores the impact of theory and research on classroom instruction.

EDUC 5115-3. Issues in School Change and Reform. Examines recent developments in teaching, and trends in the philosophy and practice of education. Focuses special attention on a variety of issues central to school reform.

EDUC 5165-3. Children's Literature. Involves reading and evaluation of picture books, and emphasizes children's interests, authors and illustrators, multicultural literature, the components of narrative, and the features of illustrations. Examines connections between children's literature and children's development as writers.

EDUC 5222-3. Language Study for Educators. Same as EDUC 4222.

EDUC 5235-3. Language and Literacy Across the Curriculum. Same as EDUC 4232.

EDUC 5245-3. Foundations of Reading Instruction K–12. Comparatively analyzes current and emerging philosophies and programs in K–12 with focus on teaching reading and thinking skills.

EDUC 5255-3. Processes Involved in Literary Interpretation. Stresses curiosity, observation, challenge, and insight into how children and adolescents learn to become literate beings. Discusses the work and play of literary interpretation including analytic reading, substantive discussion, reflective writing, visual presentation, and dramatic enactment where readers learn to take the words from the page to inform and transform their worlds. Prereq., EDUC 5245.

EDUC 5265-3. Processes in Writing. Examines processes writers use from early ages to maturity by investigating current research and proposing and evaluating research designs. Discusses the reciprocal relationship between reading and writing instruction, emphasizing the Colorado Academic Content Standards and the International Reading Association Specialized Reading Professional Standards.

EDUC 5275-3. Assessment in Literacy. Assumes an interactive model of reading and supports the perspective of assessment as interrelated with curriculum and instruction; examines principles that guide the selection and interpretation of assessment techniques, with a particular focus on low-performing students. Prereq., EDUC 5255.

EDUC 5285-3. Reading Clinic Procedures K–12. Focuses learning on a select group of low performing students to assess reading proficiency, develop appropriate instructional goals, and provide instruction that addresses these goals. Emphasis on interpreting assessment data, extending a repertoire of instructional strategies, and developing and implementing a strong instructional plan. Prereq., EDUC 5275.

EDUC 5305 (3-4). Teaching and Learning in the Secondary Classroom. Presents and discusses issues in secondary school curriculum, instruction, assessment, and classroom management. Examines, analyzes, and evaluates a variety of teaching strategies, their effectiveness for students, and teacher dispositions to facilitate learning. Restricted to students admitted to the secondary MA+ program.

EDUC 5315-3. Perspectives on Science. Explores contemporary ideas and issues in the history, philosophy, and sociology of science education and science, science as a social and cultural activity, and how contemporary issues in science relate to and impact educational practice. Same as EDUC 4312.

EDUC 5316-3. Nature of Social Studies and Social Studies Education. Prepares teacher education candidates for teaching social studies in a social context. Participants will understand theoretical and developmental processes associated with social studies learning, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes.

EDUC 5317-3. Perspectives on Mathematics. Explores the historical development of mathematics as a human construct, and the relationship between the discipline and the contemporary school mathematics curriculum. Focuses on the sociology of mathematics education and how cultural traditions and societal needs influence the school mathematics curriculum and educational practice.

EDUC 5325-3. Teaching Literature in Middle and Secondary Schools. Provides teachers of English with background and experiences relevant to using reading, writing, and a range of other classroom social languages to teach literature to a culturally and intellectually diverse population of students. Explores relevant literary theories, texts, and genres, and examines contemporary and historical perspectives on the meaning and function of stories in both personal and democratic public life. Restricted to students admitted to the secondary English education program.

EDUC 5345-3. Composition for Teachers. Same as EDUC 4342.

EDUC 5355 (3-4). Methods and Materials in Secondary Social Studies. Focuses on curriculum, materials, methods, assessment, and related aspects of instruction. Introduces best practices in teaching the social studies in middle and high schools. Examines the Colorado Academic Content Standards. Prereq., EDUC 4122. Restricted to students admitted to the secondary social studies teacher education program.

EDUC 5365 (3-4). Methods and Materials in Secondary English. Focuses on curriculum, materials, methods, and assessment. Introduces best practices in the

teaching of English in middle and high schools. Examines the Colorado Academic Content Standards. Prereq., EDUC 4122. Restricted to students admitted to the secondary English teacher education program.

EDUC 5375 (3-4). Project-Based Math Instruction. Focuses on curriculum, materials, methods and assessment, and related aspects of instruction. Introduces best practices in teaching mathematics in middle and high schools. Examines the Colorado Academic Content Standards. Restricted to students admitted to the secondary math teacher education program.

EDUC 5385 (3-4). Project-Based Science Instruction. Focuses on curriculum, materials, methods, assessment, and related aspects of instruction. Introduces best practices in teaching science in middle and high schools. Examines the Colorado Academic Content Standards. Restricted to students admitted to the secondary science teacher education program.

EDUC 5425-3. Introduction to Bilingual/Multicultural Education. Provides a comprehensive survey of bilingual-multicultural education programs for language minority students. Includes an overview of the history and legislation related to bilingual education and English as a second language. Presents various models, philosophies, and theoretical underpinnings of bilingual education and ESL.

EDUC 5435-3. Materials and Methods in Bilingual/ Multicultural Education. Provides an in-depth study of the curriculum options available for bilingual and ESL programs. Presents, reviews, and critiques specific methods and strategies for teaching language to minority students. Gives the opportunity to develop and present teaching units in Spanish or in ESL methodology, as appropriate. Prereq., EDUC 5425.

EDUC 5445-3. Curriculum for Multicultural Education. Analyzes curriculum programs and examines principles that inform innovation for education of diverse students at all school levels. Includes topics of ethnic, racial, socioeconomic, linguistic, and gender diversity.

EDUC 5455-3. Literacy for Linguistically Different Learners. Presents current and emerging philosophies and methods on teaching reading to culturally diverse second-language learners. Includes review of materials, strategies for teaching reading and writing skills, and important considerations for transference from L1 to L2 reading. Prereq., EDUC 5425 or reading course at 5000 level.

EDUC 5460-3. Teaching and Learning Physics. Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research. Prereqs., PHYS 3210 and 3310 or instructor consent. Same as EDUC 4460, PHYS 4460 and 5460.

EDUC 5465-3. Introduction to ESL/Bilingual and Special Education. Provides students with the fundamental information of ESL, bilingual and special education, including theories, assumptions, philosophies, and paradigms of bilingual and special education. Discusses successful teaching techniques and instructional approaches, including individualization, least restrictive environment, transition, and career education.

EDUC 5485-3. Differentiation in the Classroom. Focuses on teaching culturally and linguistically diverse school students, special education students, and differentiation in the classroom. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning.

EDUC 5505-3. Education of Students with Learning and Behavior Disorders. Discusses unique learning needs of students with learning and behavior disorders. Emphasizes development of a systems model for diagnosis, programming, and remediation. Stresses data-based individualization of instruction, with emphasis on intervention in inclusive learning environments and developing a culturally responsive system.

EDUC 5515-3. Curriculum and Assessment for Special Learners. Emphasizes assessment of special education students from pre-referral through staffing and placement, including response to intervention, research-based assessment practices, analytic teaching and assessment, curriculum-based assessment and measurement. Selection, administration, and interpretation of formal and informal assessment devices are studied, with particular emphasis on cultural relevance and equity in assessment for special learners with mild to severe needs.

EDUC 5525-3. Research Issues in Special Education. Provides practical experience in the review, critique, conceptualization, and writing of research studies in special education. Also offers experience in design of evaluation systems for classroom practice.

EDUC 5535-3. Diagnostic Testing in ESL and Bilingual Education. Includes both theoretical and applied aspects of diagnostic testing. Reviews administration and interpretation of current formal and informal educational tests (language proficiency). Emphasizes practices for equitable testing and assessment of English language learners.

EDUC 5545-3. Strategies for Teaching Students with Special Needs. Provides teachers with specific evidence-based methods and techniques for teaching students with a wide variety of high and low disabilities including learning and language disabilities, hearing and visual impairments, physical disabilities, and health impairments. Emphasizes different teaching methods, instructional materials, and learning strategies that have proven effective working students with cognitive learning needs.

EDUC 5555 (1-4). Practicum in Bilingual/Special Education. Offers supervised field experience in elementary and secondary special education class settings. Each credit hour requires 50 contact hours. Prereqs., EDUC 5465, 5505, and EDUC 5515 or 5545.

EDUC 5565 (1-4). Practicum in Special Education K–12, Leadership and Supervision. Provides participants opportunities to use a variety of evidence- and research-based leadership and supervisory strategies acquired through the program including leadership in such areas as assessment, collaboration, professional development, second language acquisition, special education eligibility and placement, and coaching and mentoring. Experiences include both elementary and secondary settings. Prereqs., EDUC 5465, 5505, and EDUC 5515 or 5545.

EDUC 5575 (1-4). Workshop in Curriculum and Instruction.

EDUC 5580-3. Physics and Everyday Thinking. Same as EDUC 4580.

EDUC 5595 (1-4). Practicum in Linguistically Different: English as a Second Language. University supervised, school-based field experience teaching linguistically different students, as well as assistance in the completion of EECD portfolio. Prereqs., EDUC 5425, 5435 and 5535.

EDUC 5605-3. Research Issues in Bilingual Education. Offers practical experience in the review, critique, conceptualization, and writing of research studies in bilingual/ESL education. Provides experience in the design of classroom evaluation systems. Prereq., EDUC 5425.

EDUC 5615-3. Second Language Acquisition. Presents a broad survey of second-language acquisition research. Stresses theoretical concerns and research findings and practical applications to teaching second languages. Gives special emphasis to second-language acquisition.

EDUC 5625-3. Methods of Teaching English as a Second Language. Prepares teachers to teach English as a second language in public schools in the United States. Covers both theoretical and applied aspects of language learning and teaching. Recommended prereq., EDUC 5615.

EDUC 5635-3. Education and Sociolinguistics. Explores the discipline of sociolinguistics, the study of language variation and use, and its application within education settings. Not designed as an advanced sociology or linguistics course. Areas of study include language variation, speech communities, the ethnography of communication, speech and social identities, and sociolinguistic research related to teaching and learning.

EDUC 5706-3. Assessment in Mathematics and Science Education. Examines purposes and practices of assessment in mathematics and science education. Particular attention is given to application of theoretical foundations and contemporary research in the design and use of assessment techniques and tools to support teaching for student understanding. Addresses the role of effective formative assessment in teaching and learning.

EDUC 5716-3. Basic Statistical Methods. Same as EDUC 4716.

EDUC 5726-3. Introduction to Disciplined Inquiry. Considers various research approaches and methodologies included in education including experimental and quasi-experimental methods; anthropological and case study methods; evaluative research and field studies; correlational; and sociological, historical,

and philosophical research. Topics include library research, research criticism, research design, and proposal writing.

EDUC 5810-3. Teaching K–12 Mathematics: Number Sense. Provides teachers opportunity to explore fundamental mathematical theories and pedagogical perspectives pertaining to the teaching and learning of number and operation. Engages students in explorations of mathematical content underlying number and operations, while highlighting relevant problem solving, reasoning and proof, and mathematical connections. Explores implications of teachers' mathematical learning on their classroom teaching. Develops practices supporting learner's number sense development.

EDUC 5820-3. Teaching K–12 Mathematics: Algebraic Thinking. Uses reform-based mathematics curricula to engage participants in algebraic thinking, to reflect on their own knowledge of algebraic concepts, and to examine pedagogical ideas that can foster K–12 students' algebraic thinking and learning. Algebraic topics include patterning, variable, functions, multiple representations, equality, and solving linear and systems of equations.

EDUC 5830-3. Teaching K–12 Mathematics: Geometry and Measurement. Provides an opportunity to explore how to foster geometric thinking while examining fundamental mathematical theory underlying the content area of geometry and measurement. Emphasizes investigative approach involving problem solving, reasoning, connections, and communication as well as learning mathematics content in a flexible and conceptual way. Challenges participants to apply their understanding to teaching practices that foster geometric thinking in K–12 learners.

EDUC 5840-3. Teaching K–12 Mathematics: Probability and Statistics. Focuses on teaching probability, data analysis, and statistics in K–12 classrooms. Explores curriculum and assessment strategies in the areas of probability and statistics. Examines research on students' thinking on stochastic tasks and how this research informs teaching practice. Emphasizes deepening of one's conceptual understanding of probability and statistics and their importance in the current information age.

EDUC 6210-3. Education Policy and the Law. Approaches education policy issues through the rich history of litigation and current legal challenges facing American K–12 schooling. Builds an understanding of the legal and policy development of the American schooling system, particularly in the 20th century. Laws and legal cases will be used as jumping-off points for broader discussions.

EDUC 6220-3. Gender Issues in Education. Provides a strong foundation in the various gender issues in education. Stimulates explorations into the ways the construct of "gender" affects and is affected by the educational system and process. Presents knowledge and research about contemporary gender-related educational issues and theories of gender in education. Encourages development of well-considered views about the various issues, research, and theories.

EDUC 6230-3. Ethics in Education. Investigates controversies in education from a self-consciously ethical perspective, drawing as appropriate from moral and political theory as well as law. Focuses on public education's role in fostering democratic citizenship and providing equal educational opportunity. Critically evaluates various education reform policies and curriculum policies. Applies method commonly used in medical ethics to make decisions regarding concrete ethically problematic cases.

EDUC 6240-3. African American and Latino Education in the United States. Explores development of schooling for African Americans in the U.S. and for Latinos in the American Southwest. Emphasizes parallels and points of intersection these historically disenfranchised groups experienced in their quest to access meaningful educational opportunities. Examines how social, economic, political, and judicial action defined and organized policy and practice for these two groups. EDUC 4240 and 6240 are identical courses.

EDUC 6318-3. Psychological Foundations of Education. Introduces students to theoretical and empirical contributions of educational psychology, emphasizing applications to educational practices. Topics include learning, development, cognitive processes, social and cultural context, motivation, assessment, and individual differences.

EDUC 6325-3. Culture and Ethnography in Education. Applies anthropological perspectives to research in educational settings. Focuses on theories of culture, cultural transmission and acquisition, and cultural reproduction and production for understanding schooling and its outcomes.

EDUC 6328-3. Advanced Child Growth and Educational Development. Introduces students to recent theoretical and research advances in the study of children and adolescent's cognitive, social and emotional development, with an emphasis on implications for learning in and out of school.

EDUC 6368-3. Adolescent Psychology and Development for Teachers. Examines current theory and research on adolescent development, learning, motivation, and academic achievement. Emphasizes how theory and research can inform instructional decisions in the secondary classroom. Restricted to students admitted to the secondary MA+ program.

EDUC 6504-3. Issues and Methods in Cognitive Science. Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Prereqs., graduate standing or at least one upper-division course in computer science, linguistics, philosophy, or psychology. Same as CSCI 6402, LING 6200, PHIL 6310, and PSYC 6200.

EDUC 6505 (1-2). Readings and Research in Cognitive Science. Interdisciplinary reading of innovative theories and methodologies of cognitive science. Share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint PhD in cognitive science. Prereq., graduate standing. Same as CSCI 7762, LING 7762, and PSYC 7765.

EDUC 6506-2. Cognitive Science Research Practicum. Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereq., CSCI 7762 or EDUC 6505 or LING 7762 or PHIL 7310 or PSYC 7762. Same as PSYC 7415, LING 7415, PHIL 7415, and CSCI 7412.

EDUC 6516-2. Cognitive Science Research Practicum 2. Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506. Same as PSYC 7425, LING 7425, PHIL 7425, and CSCI 7422.

EDUC 6804 (1-4). Special Topics. May be repeated up to 12 total credit hours.

EDUC 6811 (3-4). Teaching and Learning Biology. Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions. Same as MCDB 4811 and EDUC 6811.

EDUC 6844 (1-4). Master's Independent Study.

EDUC 6855 (1-4). Independent Study in Curriculum and Instruction: Master's Level.

EDUC 6888 (1-4). Independent Study in Educational and Psychological Studies: Master's Level.

EDUC 6899 (1-4). Independent Study in Educational Foundations Policy and Practice: Master's Level.

EDUC 6915 (1-4). Practicum in Curriculum and Instruction.

EDUC 6916 (1-4). Practicum in Research and Evaluation Methodology.

EDUC 6918 (1-4). Practicum in Educational and Psychological Studies.

EDUC 6919 (1-4). Practicum in Educational Foundations Policy and Practice.

EDUC 6925 (1-4). Readings in Curriculum and Instruction.

EDUC 6926 (1-4). Readings in Research and Evaluation Methodology.

EDUC 6928 (1-4). Readings in Educational and Psychological Studies.

EDUC 6929 (1-4). Readings in Educational Foundations Policy and Practice.

EDUC 6944-1. Master's Degree Candidate.

EDUC 6954 (1-6). Master's Thesis.

EDUC 6964-3. Capstone: Inquiry in the Content Areas. Supports students in using and building on the ideas and content encountered in previous coursework. Requires students to conceptualize, design and implement an original research project in content area that will serve as exit requirement for the degree. Reads and engages in research and theory associated with Teacher Research (i.e. research conducted by teachers for professional purposes).

EDUC 7015-3. Teaching Internship in Teacher Education. One-semester teaching internship in an undergraduate or graduate foundations course.

EDUC 7055-3. Philosophy of Education. Examines exemplars of educational philosophy from ancient times to the present day, emphasizing their relevance and application to current controversies in education (e.g., multiculturalism, gender equity, and school choice). Formerly EDUC 5055.

EDUC 7105-3. Collaboration to Meet Special Needs. Covers effective collaboration practices involving the special education teacher, other educational personnel, students, and parents. Bilingual special education considerations in collaboration will be described. Issues regarding inclusion will be explored. Practical application to teaching and learning will be made. Strategies for disseminating information and collaborative activities will be discussed.

EDUC 7316-3. Intermediate Statistical Methods. Studies sampling theory and inferential statistics; advanced applications for testing of hypotheses regarding central tendency, variability, proportion, correlation, and normality; chi-square and the analysis of frequency data; multiple regression and prediction; introduction to the analysis of variance; and related computer programs for statistical analysis. Prereq., EDUC 5716.

EDUC 7326-3. Experimental Design and Analysis 1. Focuses on experimental and quasi-experimental designs in educational research; applications of the general linear mode; power and statistical efficiency; randomization and control; multiple comparisons; factorial experiments and interaction with fixed-factor and mixed design; analysis of covariance; effects of assumption violations; and related computer programs for statistical analysis. Prereqs., EDUC 5726 and 7316.

EDUC 7336-3. Methods of Survey Research and Assessments. Examines theory and techniques involved in each stage of survey research, including problem formulation, questionnaire development, interview and mailed surveys, assessing reliability and validity, sampling plans, data reduction (e.g., factor analysis), and analysis of continuous and categorical data. Prereqs, EDUC 5726 and 7316.

EDUC 7346-3. Ethnographic Methods in Educational Research. Explores the history of ethnography and its translation into educational research. Students practice participant observation, interviewing, journal writing, artifact searches, qualitative analysis and interpretation, and styles of reporting. Prereq., EDUC 6325 or equivalent doctoral level course in anthropological or sociological theory, or sociology of education.

EDUC 7376-3. Theory and Practice of Educational and Psychological Measurement. Introduces theories of measurement and applications, and presents classical test theory. Includes quantitative concepts, methods, and computational techniques for the development, application, and evaluation of measurement instruments in social/ behavioral science and education. Prereq., EDUC 5716.

EDUC 7386-3. Educational Evaluation. Builds an understanding of the range of approaches taken by educational evaluators, focusing particularly on the evaluation of programs. Explores the nature of different evaluation perspectives and how these disparate views translate into methodological and conceptual models. Students develop a familiarity with the most common and influential approaches to evaluation.

EDUC 7396-3. Multivariate Analysis. Introduces contemporary advanced multivariate techniques and their application in social science research. Methods include multivariate regression and analysis of variance, structural equation models, and hierarchical/multi-level models. Prior experience with Anova and multiple regression is assumed.

EDUC 7416-3. Seminar: Research Methodology. Presents selected topics for advanced study in educational research, statistics, measurement, and evaluation.

EDUC 7436-3. Item Response Theory. Includes one-, two-, and three-parameter logistic models for dichotomously-scored items and partial credit models for polychotomously-scored items; applications of the models to problems such as

equating of test forms, test design, computerized adaptive testing, and the detection of item bias. Prereqs., EDUC 7316, 7376.

EDUC 7446-3. Seminar: Policy Issues in Education. Explores major policy issues confronting U.S. education and examines the nature and undertaking of educational policy studies. Learn to approach policy issues from a contextual perspective that highlights systemic forces and analyzes and applies differing policy instruments. While a wide variety of policies are covered in the course, it particularly emphasizes issues of educational equity.

EDUC 7456-3. Advanced Multivariate Methods: Multi-level and Latent Variable Modeling. Covers in depth two advanced multivariate models common to social science research: latent variable (structural equation) models and multi-level (hierarchical) models. Topics may be taught with a particular analytic context, such as measurement of change (longitudinal analysis) or experimental design. Prereq., EDUC 7396 or equivalent.

EDUC 7775 (1-2). Topics in Cognitive Science. Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as LING 7775, CSCI 7772, PSYC 7775, SLHS 7775, and PHIL 7810.

EDUC 8014-3. Doctoral Seminar: Multiculturalism and Education. Addresses the sociopolitical context of multiculturalism and education, and the sociocultural context of learning. Examines critical issues involved in making schooling responsive to an increasingly multicultural and multilingual society. Required for all doctoral students. Prereqs., EDUC 8210, 8220, 8230 8240, 8250 and 8260.

EDUC 8025-3. Seminar: Curriculum Theories. Examines in depth recent developments in curriculum theory highlighting conceptual, contextual, and normative issues. Substantially explores distinct curricular traditions, corresponding conceptions of the good life along with related approaches to reason and emotion. Focuses on the works of prominent curriculum theorists.

EDUC 8045-3. Philosophical Issues in Educational Research. Familiarizes students with important concepts and issues from the philosophy of science and, to a lesser extent, political theory and ethics; grounds such concepts and issues in the literature (often in terms of primary philosophical sources); and stimulates students to apply this material to the field of educational research in an informed way.

EDUC 8055-3. Theoretical Issues in Education Policy. Provides students with an examination of the theories behind education policy analysis. Takes a thematic approach to the study of policy in order to understand how policy agendas are set; how democratic deliberation should be linked with research and policy; and the relationship between politics, social structures, research, and policies.

EDUC 8125-3. Seminar: Radical Education Theories. Examines radical analyses, based on class, gender, and race, that public schooling in the U.S. maintains a dynamic of oppression and domination that undermines the schools' democratic premise. Scrutinizes the conceptual framework, interpretive and explanatory adequacy, and ethical justification of radical claims.

EDUC 8135-3. Seminar: Research on Teaching. Provides an historical perspective of research on teaching, focusing on the evolution of conceptual frameworks, research methods, and research findings. Examines substantive and methodological issues that underlie contemporary research on teaching. Explores areas of research including teacher knowledge and beliefs, teaching for understanding, understanding student thinking, motivation and volition, and classroom assessment.

EDUC 8145-3. Seminar: Research on Teacher Education and Learning to Teach. Explores substantive and methodological issues that underlie current research on learning to teach, teacher education, and teacher professional development. Considers the learning and development of experienced and novice teachers, with an emphasis on learning to teach in ways that conform to reform-based educational ideas.

EDUC 8155-3. Advanced Topics in Literacy Education. Examines special topics in theory and research related to literacy and literacy education. Topics vary each semester. May be repeated up to 12 total credit hours.

EDUC 8165-3. Advanced Topics in Mathematics Education. Examines special topics in theory and research related to mathematics education. Topics vary each semester. May be repeated up to 12 total credit hours.

EDUC 8175-3. Advanced Topics in Science Education. Examines special topics in theory, research, and assessment related to science education. Focuses on the development of the doctoral prospectus. Provides opportunities for students to defend their own work and to critique the work of their peers. Topics range from theoretical framing to presenting and defending one's work. May be repeated up to 12 total credit hours.

EDUC 8210-3. Perspectives on Classroom Teaching and Learning. Introduces students to various paradigms within educational research and how they are employed to study teaching and learning in K-12 classrooms. Includes an analysis of the theories, assumptions, questions, methods, and findings associated with each of them. Restricted to first-year doctoral students in education.

EDUC 8220-3. Introduction to Educational Research and Policy. Introduces conceptual and empirical issues and controversies in educational research and policy. Complements other doctoral courses in quantitative and qualitative methodology. Restricted to first-year doctoral students in education.

EDUC 8230 (3-4). Quantitative Methods I. Explores the use of statistics to formalize research design in educational research. Introduces descriptive statistics, linear regression, probability, and the basics of statistical inference. Includes instruction in the use of statistical software, (e.g., SPSS.) Restricted to first-year doctoral students in education.

EDUC 8240 (3-4). Quantitative Methods II. Continues the exploration of research design in the social sciences, especially the evaluation of the quantitative research reported in professional journals. Introduces instances of the general linear model (both multiple regression and ANOVA) and its application to educational research. Prereq., EDUC 8230 or equivalent. Restricted to first-year doctoral students in education.

EDUC 8250-3. Qualitative Methods I. Introduces students to the theory and practice of qualitative research in education. First of a two-course sequence covering research design, theoretical perspectives, and methods. Preference given to first-year doctoral students in education.

EDUC 8260-3. Qualitative Methods II. Builds on EDUC 8250 to develop knowledge and skills in ethnographic and case study research. Second of a two-course sequence covering qualitative research design, theoretical perspectives, and methods. Preference given to first-year doctoral students in education.

EDUC 8348-3. Seminar: Human Development. Intensive study of selected topics in human development. The focus of the seminar will vary depending on the instructor's expertise and students' interests; may repeat for credit more than once. Recent topics include adolescent development in social context, Vygotsky and Cultural-Historical Activity Theory, and teaching and learning in and out of school. Prereqs., EDUC 6318, EDUC 8210, or instructor consent.

EDUC 8358-3. Seminar: Human Learning. Intensive study of selected topics in human learning. The focus of the seminar will vary depending on the instructor's expertise and students' interest; may repeat for credit more than once. Recent topics include sociocultural, situated, and other approaches to understanding the role of discourse in learning and teaching disciplinary content in school. Prereq., EDUC 6318, EDUC 8210, or instructor consent.

EDUC 8610-3. Advanced Topics in Educational Equity and Cultural Diversity. Examines special topics in theory and research related to educational equity and cultural diversity in education. Topics vary each semester. May be repeated up to 12 total credit hours.

EDUC 8710-3. Measurement in Survey Research. Introduces students to classical test theory and item response theory. Emphasizes the process of developing, analyzing and validating a survey instrument. Focuses on developing a survey instrument with items that derive from a clearly delineated theory for the construct to be measured. Analyzes item responses and put together a validity argument to support the proposed uses of the survey.

EDUC 8720-3. Advanced Topics in Measurement. Focuses on psychometric models for measurement and their applications in educational and psychological research. Emphasizes understanding and evaluating the utility of models from item response theory (IRT). Applies and compares measurement models in the context of simulated or empirical data sets. Recommended prereq., EDUC 8710.

EDUC 8730-3. Advanced Qualitative Data Analysis. Requires students begin semester with qualitative data already collected (from class project, pilot study, dissertation). Focuses on three approaches to data analysis: reconstruction, cod-

ing (deductive and inductive), and constant comparative method. Students apply these approaches to their own data. Instructors customize part of course to address specific topic of expertise, e.g., discourse analysis, video analysis, textual analysis, ethnographic analysis. May be repeated up to 12 total credit hours.

EDUC 8740-3. Advances in the Assessment of Student Learning. Focuses on theories underlying traditional and contemporary proposals for assessment of student learning, and design and research of large-scale and classroom-based methods to assess student learning. Explores intersections between large-scale and classroom assessment, although gives greater attention to issues related to classroom assessment.

EDUC 8804-3. Special Topics. Designed to meet needs of graduate students with topics of pertinent interest.

EDUC 8844 (1-4). Doctoral Independent Study.

EDUC 8855 (1-4). Independent Study in Curriculum and Instruction: Doctoral Level.

EDUC 8866 (1-4). Independent Study in Research and Evaluation Methodology: Doctoral Level.

EDUC 8888 (1-4). Independent Study in Educational and Psychological Studies: Doctoral Level.

EDUC 8899 (1-4). Independent Study in Educational Foundations Policy and Practice: Doctoral Level.

EDUC 8935 (1-6). Internship in Curriculum and Instruction.

EDUC 8936 (1-6). Internship in Research and Evaluation Methodology.

EDUC 8938 (1-6). Internship in Educational and Psychological Studies.

EDUC 8939 (1-6). Internship in Educational Foundations Policy and Practice.

EDUC 8994 (1-10). PhD Doctoral Dissertation.

Graduate Teacher Education

Graduate Teacher Education

GRTE 5010 (0.5-5). Graduate Humanities for Teachers. Addresses special topics in arts and humanities with an emphasis on building conceptual understanding of content and enhancing teacher's practice in teaching this content.

GRTE 5020 (0.5-5). Graduate Mathematics for Teachers. Addresses special topics in mathematics with an emphasis on building conceptual understanding of content and enhancing teacher's practice in teaching this content.

GRTE 5030 (0.5-5). Graduate Natural Sciences for Teachers. Addresses special topics in natural sciences with an emphasis on building conceptual understanding of content and enhancing teacher's practice in teaching this content.

GRTE 5040 (0.5-5). Graduate Social Sciences for Teachers. Addresses special topics in social sciences with an emphasis on building conceptual understanding of content and enhancing teacher's practice in teaching this content.

College of Engineering & Applied Science

Aerospace Engineering

Aerodynamics and Fluid Mechanics

ASEN 2002-4. Aerospace 2: Introduction to Thermodynamics and Aerodynamics. Introduces the fundamental principals and concepts of thermodynamics and fluid dynamic systems. Emphasizes the synthesis of basic science (physics), mathematics, and experimental methods that form the basis for quantitative and qualitative analyses of general aerospace technology systems. Proficiency in MATLAB required. Prereqs., APPM 1360, GEEN 1300 or CSCI 1300, CHEN 1211, CHEM 1221 and PHYS 1110 (min. grade C). Coreqs., ASEN 2001 and APPM 2350. Restricted to ASEN majors. Offered fall only.

ASEN 3111-4. Aerodynamics. Develops the fundamental concepts of aerodynamics and provides a working knowledge for their application to the design of aircraft and launch vehicles operating at various speeds and altitudes, as well as the atmospheric forces on satellites. Prereqs., APPM 2350, ASEN 2002 and 2004 (min. grade C). Restricted to ASEN majors. Offered fall only.

ASEN 5051-3. Fluid Mechanics. Highlights physical properties of gases and liquids; kinematics of flow fields; and equations describing viscous, heat-conducting Newtonian fluids. Emphasizes exact solutions and rational approximations for low and high speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows. Prereq., instructor consent.

ASEN 5151-3. High Speed Aerodynamics. Provides aerodynamic theory applicable to the high speed flight of subsonic, transonic, and supersonic aircraft, and hypersonic vehicles. Topics include linear theory of subsonic and supersonic speeds, the nonlinear theories of transonic and hypersonic speeds, and compressible boundary layers. Prereq., graduate standing or instructor consent.

ASEN 5327-3. Computational Fluid Mechanics. Introduction to advanced computational methods for the solution of fluid mechanics problems on the computer with emphasis on nonlinear flow phenomena. Prereq., ASEN 5417 or instructor consent.

ASEN 6021-3. Viscous Flow. Studies low Reynolds number flows, including incompressible and compressible laminar boundary layer theory; similarity theory; and separation, transition, and turbulent boundary layers. Prereq., ASEN 5051 or equivalent, or instructor consent.

ASEN 6037-3. Turbulent Flows. Studies turbulent closure methods and computational procedures used to solve practical turbulent flows. Emphasizes multi-equation models used with time-averaged equations to calculate free-turbulent shear-flows and turbulent boundary layers. Employs spectral methods in direct and large-eddy simulation of turbulence. Prereq., ASEN 5051 or equivalent.

ASEN 6061-3. Molecular Gas Dynamics and DSMC. Describes the composition and flow of gases on a microscopic level to examine the behavior of the molecules that make up a macroscopic flow system. Thermodynamic properties, transport phenomena, and the governing Boltzmann Equation are derived from molecular collision dynamics and the kinetic theory. The Direct Simulation Monte Carlo method is introduced with applications. Restricted to graduate students or instructor consent.

ASEN 6427-3. Advanced Computational Fluid Dynamics. Introduces computational techniques particularly applicable to high-speed gas flows that contain shocks. Complicated numerical methods are developed from relatively simple numerical modules. Prereq., ASEN 5417 or instructor consent.

Aerospace Design and System Engineering

ASEN 1000-1. Introduction to Aerospace Engineering Sciences. Introduces aerospace history, curriculum, ethics, and the many areas of emphasis within aerospace engineering. Academic and industry speakers are invited to address various aerospace topics. Restricted to freshmen engineering students.

ASEN 2004-5. Aerospace 4: Aerospace Vehicle Design and Performance. Introduction to design and analysis of aircraft and spacecraft. Aircraft topics include

cruise performance, wing design, propulsion, stability, control, and structures. Spacecraft topics include rocket staging, orbit selection, launch systems, and spacecraft subsystems. Includes laboratory experiments and team design exercises. Prereqs., ASEN 2001,2002, and APPM 2350 (min. grade C). Restricted to ASEN majors. Offered spring only.

ASEN 2500-3. Gateway to Space. Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry, and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry. Restricted to freshmen in engineering or science. Same as ASTR 2500.

ASEN 3128-4. Aircraft Dynamics. Develops the fundamental concepts of aircraft dynamics. Covers flight mechanics, performance, dynamics and control of aircraft, and how they impact aircraft design. Prereqs., ASEN 2002, 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered spring only.

ASEN 4018-4. Senior Projects 1: Design Synthesis. Focuses on the synthesis of technical knowledge, project management, design process, leadership, and communications within a team environment. Students progress through the design process beginning with requirements development, then preliminary design and culminating with critical design. Prereqs., ASEN 3111, 3112, 3113, 3128, 3200 and 3300 (min. grade C). Restricted to ASEN majors. Offered fall only.

ASEN 4028-4. Senior Projects 2: Design Practicum. Focuses on the fabrication, integration, verification and validation of designs produced in ASEN 4018. Students work within the same teams from ASEN 4018. Prereq., ASEN 4018 (min. grade C) and instructor consent required. Restricted to ASEN majors. Offered spring only.

ASEN 4138-3. Aircraft Design. Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft. Prereq., ASEN 3128. Restricted to ASEN majors.

ASEN 4148-3. Spacecraft Design. Provides the fundamentals necessary to complete the conceptual design of an unmanned spacecraft. Topics include mission design, propulsion, power, structure, thermal, attitude control, communication, command and data handling and attitude control systems. Project management, systems engineering and related topics in space systems are reviewed. The class is designed to enhance teaming and communication skills. Restricted to senior ASEN majors or instructor consent. Same as ASEN 5148.

ASEN 4218-3. Large Space Structures Design. Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design. Prereq., senior standing in ASEN or MCEN, or instructor consent. Same as ASEN 5218.

ASEN 4238-3. Computer-Aided Control Systems Design. Covers MATLAB and Simulink software, and multivariable control system synthesis and analysis techniques for typical aerospace control problems. Students formulate control problems and synthesize control functions using lineage quadratic techniques. Includes numerical integration of differential equations and nonlinear simulation of orbit and attitude dynamics. Prereq., APPM 2360.

ASEN 4248-3. Computer-Aided Control System Design 2. Studies theory and engineering applications of Kalman filter techniques. Covers discrete and continuous filters, the extended Kalman filter, and their application to guidance, navigation, and control, including satellite orbit and attitude problems, inertial and control navigation, and the Global Positioning System. Prereq., ASEN 4238 or instructor consent.

ASEN 5018-3. Graduate Projects I. Exposes MS and PhD students to project management and systems engineering disciplines while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this first semester of the two-semester course sequence: requirements, definition, design and design review, build, test, and verification. Recommended prereqs., ASEN 4138, or 5148, or 5158.

ASEN 5034-3. Stochastic Methods for Systems Engineering. Same as ASEN 4034.

ASEN 5148-3. Spacecraft Design. Same as ASEN 4148.

ASEN 5158-3. Space Habitat Design. Utilizes systems engineering methods for designing a spacecraft intended for human occupancy and provides a working knowledge of the technologies used to sustain life. Emphasis is placed on deriving functional requirements from stated mission objectives, developing integrated vehicle schematics, and comparing design options by trade study. Prereq., graduate standing in engineering or senior with 3.25 GPA.

ASEN 5168-3. Remote Sensing Instrumentation Design. Reviews and makes a detailed analysis of satellite instrumentation techniques and systems to understand the components, limitations, and overall capabilities. Emphasis on optical systems with in-depth treatment of conventional radiometry. Introduces both passive and microwave methods.

ASEN 5188-3. Space Systems Engineering. Develop an understanding and appreciation for the fundamentals and pragmatic principles of systems engineering and their application to space missions. This course establishes a working knowledge of the primary techniques systems engineers use to guide the development of complex systems, including: requirements development, system synthesis, good design practices, system optimization, exception handling, interface management and trade studies.

ASEN 5218-3. Large Space Structures Design. Same as ASEN 4218.

ASEN 6028-3. Graduate Projects II. Exposes MS and PhD students to leadership positions in project management and systems engineering while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this second semester of the two-semester course sequence: requirements definition, design and design review, build, test, and verification. Prereq., ASEN 6018. Recommended prereq., ASEN 4138, or 5148, or 5158.

Astrodynamics and Orbital Mechanics

ASEN 3200-4. Orbital Mechanics/Attitude Dynamics and Control. Presents the fundamentals of orbital mechanics, 3D rigid body dynamics, and satellite attitude dynamics and controls. Prereqs., ASEN 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered spring only.

ASEN 4010-3. Introduction to Space Dynamics. Includes central force fields, satellite orbits, rocket dynamics, orbital transfer, interplanetary mission analysis, and perturbation due to atmospheric drag and Earth oblateness. Prereq., ASEN 3200 or equivalent, or instructor consent required.

ASEN 5010-3. Spacecraft Attitude Dynamics and Control. Includes rigid body kinematics and spacecraft attitude descriptions, torque-free attitude dynamics, static attitude determination, motion and stability due to gravity gradient torque and spinning craft, passive and active methods of attitude control, nonlinear regulator and attitude tracking feedback control laws. Prereq., ASEN 3200 or equivalent.

ASEN 5050-3. Space Flight Dynamics. Includes celestial mechanics, space navigation, and orbit determination; trajectory design and mission analysis trajectory requirements; and orbital transfer and rendezvous. Prereq., ASEN 3200 or instructor consent.

ASEN 5070-3. Introduction to Statistical Orbit Determination 1. Develops the theory of batch and sequential (Kalman) filtering, including a review of necessary concepts of probability and statistics. Course work includes a term project that allows students to apply classroom theory to an actual satellite orbit determination problem.

ASEN 6060-3. Advanced Space Flight Dynamics. Topics include perturbations of orbital motion; classical orbit determination from angles-only observation; modern orbit determination using range and range-rate data; orbit transfer using impulses or continuous thrust; and others. Prereq., ASEN 5050 or instructor consent.

ASEN 6070-3. Satellite Geodesy. Focuses on the measurement of the Earth's gravitational field, rotational characteristics, and shape using Earth and space-based tracking of artificial satellites. Particular emphasis on satellite altimetry and satellite gravity measurements. Prereq., ASEN 3200 or instructor consent. Credit not granted for this course and ASEN 5060.

ASEN 6080-3. Introduction to Statistical Orbit Determination 2. Continuation of ASEN 5070. Emphasizes orthogonal transformation techniques such as Givens and Householder, square root filtering and smoothing, and considers covariance analysis. Also includes coordinate systems, force models, and time and polar mo-

tion. Requires term project that involves the application of many of the techniques required for precise orbit determination. Prereq., ASEN 5070. Formerly ASEN 5080.

Atmospheric, Oceanic, and Space Sciences

ASEN 4215-3. Descriptive Physical Oceanography. Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems. Restricted to seniors and graduate students. Same as ASEN 5215 and ATOC 4215.

ASEN 4255-3. Environmental Aerodynamics. A review of the properties and causes of hazards posed by the environment, ranging from atmospheric wind shear to tornadic flows. Involves a multidisciplinary approach combining analytical, numerical, scale modeling studies with extensive field measurements, wind energy, and biophysical aerodynamics. Prereq., senior standing in ASEN. Same as ASEN 5255.

ASEN 5215-3. Descriptive Physical Oceanography. Same as ASEN 4215 and ATOC 5215.

ASEN 5255-3. Environmental Aerodynamics. Reviews the properties and causes of hazards posed by the environment, ranging from atmospheric wind shear to tornadic flows. Involves a multidisciplinary approach, combining analytical, numerical, and scale modeling studies with extensive field measurements, wind energy, and biophysical aerodynamics. Prereq., senior standing in aerospace engineering.

ASEN 5315-3. Ocean Modeling. Introduces students to basic principles behind, and the current practices in, ocean modeling. Discusses different prevailing approaches. Offers students hands-on experience with the use of supercomputers and work stations for model running and pre- and post-processing. Prereqs., graduate standing or instructor consent.

ASEN 5325-3. Small Scale Processes in Geophysical Fluids. Provides an overview of mixing and wave processes in the oceans and the atmosphere. Topics include turbulent boundary layers in the lower atmosphere and the upper ocean, air-sea interactions, and surface and internal waves. Prereq., graduate standing or instructor consent.

ASEN 5335-3. Aerospace Environment. Examines the components of the solar-terrestrial system and their interactions to provide an understanding of the re-entry and orbital environments within which aerospace vehicles operate. Includes the sun, solar wind, magnetosphere, ionosphere, thermosphere, radiation belts, energetic particles, comparative environments (Mars, Venus, etc.), orbital debris, spacecraft charging, particle effects on systems, shielding, and satellite drag. Prereq., senior or graduate standing in engineering or related physical sciences.

Bioastronautics and Microgravity Science

ASEN 3036-3. Introduction to Human Spaceflight. Introduces students to the challenges of human space flight. Historical and current space programs and spacecraft are discussed, along with motivation, cost, and rationale for human space exploration. Other topics include space environment with respect to sustaining human life and health, physiological and psychological concerns in a space habitat, astronaut selection and training, anomalies, mission operations and future program directions.

ASEN 3116-3. Introduction to Biomedical Engineering. Addresses human responses to environment and physical stimuli. Makes use of engineering and physical principles in the study of human dynamics, arriving at reasonable solutions to 15 major areas of biomedical consent. Prereq., instructor consent.

ASEN 4216-3. Neural Signals and Functional Brain Imaging. Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation, and functional magnetic resonance imaging. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ASEN 5216 and ECEN 4811.

ASEN 4426-3. Neural Systems and Physiological Control. A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physi-

ological responses to microgravity. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ASEN 4426 and ECEN 4821/5821.

ASEN 4436-3. Brains, Minds, Computers. An introductory, integrative survey of brain science, cognitive science, artificial intelligence, and their interrelations. Considers central concepts and principles from each of these areas and the similarities and difference of brain, minds, computers, robots, etc. Prereq., senior standing. Same as ASEN 5436 and ECEN 4831/5831.

ASEN 5016-3. Space Life Sciences. Familiarizes students with factors affecting living organisms in the reduced-gravity environment of space flight. Covers basic life support requirements, human physiological adaptations, and cellular-level gravity dependent processes with emphasis on technical writing and research proposal preparation. Prereq., graduate standing in engineering or senior with 3.25 GPA.

ASEN 5116-3. Spacecraft Life Support Systems. Provides a working knowledge of the systems needed to sustain human life in a spacecraft environment. Emphasis is on understanding functional requirements of a life support system; operational details of subsystem technologies; new concepts currently being considered in NASA's advanced programs; and conducting a technical trade study.

ASEN 5216-3. Neural Signals and Functional Brain Imaging. Same as ASEN 4216 and ECEN 5811.

ASEN 5426-3. Neural Systems and Physiological Control. Same as ASEN 4426 and ECEN 4821/5821.

ASEN 5436-3. Brains, Minds, Computers. Prereq., graduate standing. Same as ASEN 4436, ECEN 4831/5831.

ASEN 5506 (1-2). Bioastronautics Seminar. Focuses on research areas in space flight medical and biological topics ranging from human responses to molecular-level concerns. Literature analysis and scientific presentations are expected. Emphasis is on biophysical mechanisms, comprehensive models, and related technology development.

Computational and Analytic Methods

ASEN 4047-3. Probability and Statistics for Aerospace Engineering Sciences. Considers probability concepts and theory for better design and control of aerospace engineering systems. Includes descriptive and inferential statistical methods for experimental analysis. Also covers discrete and continuous random variable distributions, estimators, confidence intervals, regression, analysis of variance, hypothesis testing, nonparametric statistics, random processes, and quality control, including software models of same. Prereq., junior or graduate standing or instructor consent. Same as ASEN 5047.

ASEN 5047-3. Probability and Statistics for Aerospace Engineering Sciences. Same as ASEN 4047.

ASEN 5227-3. Mathematics for Aerospace Engineering Sciences 1. Provides an introduction to the methods and mathematics of advanced engineering analysis tailored to aerospace engineering applications. Topics include vector and tensor calculus, ordinary differential equations, and an introduction to the calculus of variations.

ASEN 5307-3. Engineering Data Analysis Methods. Gives students broad exposure to a variety of traditional and modern statistical methods for filtering and analyzing data. Topics include estimation methods, principal component analyses and spectral analyses. Introduces these methods and provides practical experience with their use. Students carry out problem assignments.

ASEN 5417-3. Numerical Methods for Differential Equations. Provides computational skills and basic knowledge of numerical methods for advanced courses in engineering/scientific computation using Fortran, C, or MATLAB. Prereq., APPM 2360 and instructor consent.

Global Positioning Systems

ASEN 4090-3. Global Positioning Systems Applications. Focuses on GPS technology, software development, and applications. Lectures will cover the principal concepts used in GPS, and weekly laboratories will apply that knowledge. The course will culminate in student design projects using GPS. Prereqs., APPM 2360 and GEEN 1300 or equivalent. Recommended junior/senior standing in engineering.

ASEN 5090-3. Introduction to Global Navigation Satellite Systems. Global Navigation Satellite Systems (GNSS) are important tools for navigation, science, and engineering. Introduces GNSS hardware, signal structure, algorithms, error sources, and modeling techniques. Programming experience is required. Restricted to graduate students.

ASEN 6090-3. Advanced Global Navigation Satellite Systems: Software and Applications. Focuses on high-precision applications of Global Navigation Satellite Systems (GNSS) and the software tools that are needed to achieve these precisions. Topics include precise orbital determination, reference frames, atmospheric delays, relativity, clock models, ambiguity resolution, and scientific applications. Prereq., ASEN 5090. Restricted to graduate students.

ASEN 6091-3. Global Navigation Satellite System (GNSS) Receiver Architecture. Investigates the overall architecture of satellite navigation receivers: including both the analog radio frequency conditioning (antenna to the analog-to-digital converter) and the various signal processing algorithms. Such treatment of the operation of the receiver will provide insight into the trade-offs that go into GNSS as well as the more broad generic spread spectrum receiver design. Recommended prereq., ASEN 5090.

Remote Sensing

ASEN 5235-3. Introduction to Atmospheric Radiative Transfer and Remote Sensing. Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. Same as ATOC 5235.

ASEN 5245-3. Radar and Remote Sensing. Examines active techniques of remote sensing, with emphasis on radar fundamentals, radar wave propagation, scattering processes, and radar measurement techniques and design. Examines specific radar systems and applications, such as synthetic aperture radar phased arrays for atmosphere, space, land, and sea applications. Restricted to seniors or graduate students in engineering.

ASEN 6210 (1-3). Remote Sensing Seminar. Covers subjects pertinent to remote sensing of the Earth, including oceanography, meteorology, vegetation monitoring, and geology. Emphasizes techniques for extracting geophysical information from satellite data. Course requirement for Remote Sensing Certificate. Restricted to graduate students.

ASEN 6220-3. Topics in Remote Sensing. Covers infrared and microwave techniques for remote sensing, emphasizing oceanographic applications, fundamentals of electromagnetic radiation, remote sensing instrumentation (radars and radiometers), and conversion of sensory data to geophysical parameters, including sea surface topography, temperature, and atmospheric moisture. Prereq., graduate standing and instructor consent.

ASEN 6337-3. Remote Sensing Data Analysis. Reviews satellite remote sensing instrumentation and methods. Student teamwork involves real satellite data for applications in oceanography, atmospheric science, and terrestrial physics. Students develop problem-solving skills and use the internet to gather satellite and in situ data to address chosen problems.

Structures, Materials, and Structural Dynamics

ASEN 2001-4. Aerospace 1: Introduction to Statics, Structures, and Materials. Introduces models and analytical/numerical methods for statics and structural analysis. Topics include force/moment equilibrium, truss analysis, beam theory, stress/strain, failure criteria, and structural design. MATLAB proficiency required. Prereqs., APPM 1360, GEEN 1300 or CSCI 1300, CHEN 1211, CHEM 1221, and PHYS 1110 (min. grade C). Coreq., ASEN 2002 or APPM 2350. Restricted to ASEN majors. Offered fall only.

ASEN 3112-4. Structures. Teaches Mechanics of Materials methods of stress and deformation analysis applicable to the design and verification of aircraft and space structures. It offers an introduction to matrix and finite element methods for truss structures, and to mechanical vibrations. Prereq., ASEN 2001, 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered fall only.

ASEN 4012-3. Aerospace Materials. Studies aerospace grade aluminum, magnesium, nickel, and titanium alloys. Covers heat treatment, defect structures, failure mechanisms, corrosion and its prevention, the effect of space radiation on materials, and high and low temperature effects. Introduces composite materials with a lab design and experiment. Emphasizes the selection of materials in design with procedures for choosing materials rationally. Case studies include aerogels, carbides, composites, powder metallurgy, nanomaterials, and advanced materials manufacturing technologies. Prereq., ASEN 2001 or instructor consent.

ASEN 4222-3. Materials Science for Composite Manufacturing. Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments. Prereq., ASEN 3112 or equivalent, or instructor consent. Coreq., ASEN 4012 or instructor consent. Same as ASEN 5222.

ASEN 4338-3. Computer Analysis of Structures. Covers basic structural design concepts and finite element modeling techniques. Emphasizes use of finite element static and dynamic analysis to validate and refine an initial design. Introduces basic design optimization and tailoring. Proficiency in MATLAB required. Prereq., ASEN 3112.

ASEN 5007-3. Introduction to Finite Elements. Introduces finite element methods used for solving linear problems in structural and continuum mechanics. Covers modeling, mathematical formulation, and computer implementation. Prereq., matrix algebra.

ASEN 5012-3. Mechanics of Aerospace Structures. Applies fundamental concepts of continuum mechanics, theory of elasticity, and energy methods to the analysis of structures. Prereqs., APPM 2360 and ASEN 2001, 2003, and 3112, or equivalent. Similar to MCEN 5023.

ASEN 5022-3. Dynamics of Aerospace Structures. Applies concepts covered in undergraduate dynamics, structures, and mathematics to the dynamics of aerospace structural components, including methods of dynamic analysis, vibrational characteristics, vibration measurements, and dynamic stability. Prereqs., ASEN 5012, 5227, or equivalent. Recommended prereq., MATH 3130.

ASEN 5111-3. Introduction to Aeroelasticity. Introduces static and dynamic aeroelasticity of airfoils and wings. Covers the classical aeroelasticity theory and introduces computational methods for aeroelastic problems. Prereqs., ASEN 3111, ASEN 2112, MATH 3130, and MATH 4430, or equivalent, or instructor consent.

ASEN 5122-3. Control of Aerospace Structures 1. Introduces the basic problems in dynamic modeling and active control of large spacecraft and satellites. Includes system descriptions, model reduction, controller design, and closed-loop stability analysis. Prereq., ASEN 3200, graduate standing, or instructor consent.

ASEN 5212-3. Composite Structures and Materials. Develops the macromechanical and micromechanical theory of the elastic behavior and failure of composite laminates. Applies basic theory to a broad range of practical problems including the buckling and vibration of composite plates, columns, and shells. Prereq., senior standing in aerospace or mechanical engineering, or instructor consent.

ASEN 5222-3. Materials Science for Composite Manufacturing. Prereqs., ASEN 3112 and 4012 or equivalent, or instructor consent. Same as ASEN 4222.

ASEN 5347-3. Math Methods in Dynamics. Two-part graduate-level course on dynamics. Covers both flexible and rigid multibody analytical dynamics and finite element method for dynamics. Emphasizes formulations that naturally lead to easy computer implementation and stability, linearization, and modern rotational kinematics. Prereqs., graduate standing and instructor consent.

ASEN 5517-3. Computational Methods In Dynamics. Continuation of mathematical methods in dynamics. Covers numerical algorithms, computer implementation aspects, and treatment of constraints and nonlinear rotational computational techniques. Emphasizes the combined numerical and physics characterization for the solution of dynamical systems. Prereq., ASEN 5347.

ASEN 6017-3. Nonlinear Finite Element Methods. Covers modeling, formulation and numerical solution of nonlinear static problems in mechanics by finite element methods. Emphasizes treatment of geometric nonlinearities, stability assessment, incremental and iterative solution methods and basic issues of computer implementation. Prerequisites are an introductory graduate-level course in

linear finite element methods and familiarity with linear algebra. A prior course in continuum mechanics is recommended. Formerly ASEN 5017. Credit not granted for this course and ASEN 5017.

ASEN 6367-3. Advanced Finite Element Methods for Plates, Shells, and Solids. Continues ASEN 5007. Covers more advanced FEM applications to linear static problems in structural and continuum mechanics. Focuses on modeling, formulation, and numerical solutions of problems modeled as plates, shells, and solids. Includes an overview of advanced variational formulations. Prereqs., introductory graduate level course in FEM and familiarity with linear algebra. Formerly ASEN 5367. Credit not granted for this course and ASEN 5367.

Systems and Control

ASEN 2003-5. Aerospace 3: Introduction to Dynamics and Systems. Introduces the principles of particle and rigid body dynamics, vibrations, systems, and controls. Topics include kinematics, kinetics, energy methods, orbits, system modeling, and simple feedback control. Class includes experimental and design laboratory exercises for aerospace applications of dynamic principles. Prereqs., ASEN 2001 and APPM 2350. Coreq., APPM 2360. Restricted to ASEN majors. Offered spring only.

ASEN 3300-4. Aerospace Electronics and Communications. Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics, and radio communication. Prereqs., ASEN 2003, PHYS 1120, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered spring only.

ASEN 4114-3. Automatic Control Systems. Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode, and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators. Prereqs., ASEN 3128 and 3200. Same as ASEN 5114.

ASEN 5014-3. Linear Control Systems. Introduces the theory of linear systems, including vector spaces, linear equations, structure of linear operators, state space descriptions of dynamic systems, and state feedback control methods. Prereq., ASEN 3200.

ASEN 5114-3. Automatic Control Systems. Same as ASEN 4114.

ASEN 6024-3. Nonlinear Control Systems. Introduces the analysis and control design methods for nonlinear systems, including Lyapunov and Describing Function methods. Prereq., ASEN 5014.

Thermodynamics and Propulsion

ASEN 3113-4. Thermodynamics and Heat Transfer. Focuses on the applications of the first and second laws of thermodynamics to control volumes and teaches the fundamental concepts of different modes of energy and heat transfer. Learn to use these concepts in gas dynamics, high-speed vehicle design, environmental systems, and energy analysis. Prereqs., APPM 2350 or MATH 2400, and ASEN 2002 with a C or better grade. Restricted to ASEN majors. Offered fall only.

ASEN 4013-3. Foundations of Propulsion. Describes aerothermodynamics and design of air-breathing engines, including ram jets, turbo jets, turbo fans, and turbo prop engines. Prereqs., ASEN 3113 and APPM 2360 with a C or better grade. Offered spring only.

ASEN 5053-3. Rocket Propulsion. An in depth presentation of the theory, analysis, and design of rocket propulsion systems. Liquid and solid propellant systems are emphasized with an introduction to advanced propulsion concepts. Nozzle and fluid flow relationships are reviewed for background. Prereq., senior standing in ASEN or MCEN, or instructor consent.

ASEN 5063-3. Gas Turbine Propulsion. Designed to teach the theory, analysis and design of modern gas turbine engines used for aircraft propulsion. Will deal with cycle and performance analyses, and analysis and design of compressors, turbines, intakes, nozzles and combustors as well as component matching. Prereq., ASEN 4013 or equivalent.

ASEN 6013-3. High Speed Propulsion. Covers air-breathing and rocket propulsion cycles, their relative performance trade-offs, and how they fit within the context of a vehicle "system." Specific emphasis will be placed on fundamental cycle analyses, component level design, and propulsion/airframe integration

for rockets, turbojets, ramjets, scramjets, combined cycles, and other advanced propulsion concepts. Prereq. ASEN 4013 or instructor consent.

Solids

ASEN 4123-3. Vibration Analysis. Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems. Prereq., MCEN 3030. Same as MCEN 4123.

Specialized Courses

ASEN 2519 (1-6). Special Topics. Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the lower-division level. Course content is indicated on MyCUinfo. Prereq., varies. Restricted to Engineering students.

ASEN 2849 (1-3). Independent Study. Study of special projects agreed upon by student and instructor. May be repeated up to 9 total credit hours. Prereq., instructor consent.

ASEN 3519 (1-4). Special Topics. Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated on MyCUinfo. Prereq., varies.

ASEN 3930-6. Aerospace Engineering Cooperative Education. Students will participate in a previously arranged, department-sponsored cooperative education program with a government agency or industry. Recommended prereq., GPA above 3.0. Restricted to juniors/seniors majors.

ASEN 4519 (1-3). Special Topics. Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated on MyCUinfo. Prereq., varies.

ASEN 4849 (1-6). Independent Study. Special projects agreed upon by student and instructor. Instructor consent required.

ASEN 4859 (1-6). Undergraduate Research. Assigns a research problem on an individual basis. Instructor consent required.

ASEN 5519 (1-3). Selected Topics. Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated on MyCUinfo. Prereq., varies.

ASEN 5849 (1-6). Independent Study. Study of special projects.

ASEN 5940 (3-6). Engineering Research Internship. Grants credit to foreign visiting graduate students for conducting research within the Aerospace Engineering Sciences department. Credits can be transferred to the student's home institution. CU-Boulder students may also receive credit for conducting research outside of the university, either overseas or in the U.S. Restricted to students in final year of undergraduate work and graduate students from CU-Boulder or foreign institutions.

ASEN 6009 (1-2). Special Topics Seminar. Presents research and developments in each department's focus areas.

ASEN 6107-3. Nonlinear Finite Element Methods. Continuation of ASEN 5007. Covers the formulation and numerical solution of nonlinear static structural problems by finite element methods. Emphasizes the treatment of geometric nonlinearities and structural stability. Prereq., ASEN 5007.

ASEN 6519 (1-3). Special Topics. Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated on MyCUinfo. Prereq., varies.

ASEN 6849 (1-6). Independent Study. Studies special projects agreed upon by student and instructor.

ASEN 6950 (1-6). Master's Thesis.

ASEN 8990 (1-10). Doctoral Thesis.

Architectural Engineering

Special Topics

AREN 4830 (1-3). Special Topics for Seniors/Grads. Supervised study of special topics of interest to students under instructor guidance. May be repeated up to 12 total credit hours. Prereq., instructor consent required.

AREN 4836 (1-3). Special Topics For Seniors/Grads. Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

AREN 4837-3. Special Topics for Seniors/Grads. Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

AREN 4849 (1-3). Independent Study. Offers an independent, in-depth study, research, or design in a selected area of architectural engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering. Numbered AREN 4840 through AREN 4849.

Structures

AREN 4035-3. Architectural Structures 1. Analyzes basic structural systems. Covers principles of mechanics and mechanical properties of materials and analysis and design of trusses, arches, and cable structures. For nonengineering students; does not apply toward an engineering degree. Prereq., PHYS 1110, and APPM 1350 or MATH 1300.

AREN 4045-3. Architectural Structures 2. Analyzes basic structural systems. Covers principles of mechanics as applied to the design of flexural members, columns, continuous beams, and rigid frames. For nonengineering students; does not apply toward an engineering degree. Prereq., AREN 4035.

AREN 4315-2. Design of Masonry Structures. Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; and design of reinforced masonry walls, beams, and columns by working stress and strength design methods. Prereq., CVEN 3525.

Construction

AREN 2406-3. Introduction to Building Construction. Covers the broad subject of building materials, assembly details, and their method of construction. Includes codes and classifications, foundations, wood, steel, concrete, masonry, cladding, doors and windows, interiors, and finishes. Formerly AREN 3406.

AREN 4420-3. Cost Engineering. Focuses on conceptual cost estimating and evaluation techniques to support engineering design. Topics include parametric estimating, stochastic estimating, value engineering, constructability concepts, and life-cycle costing. Prereqs., AREN 2406 and CVEN 3246.

AREN 4466-3. Construction Planning and Scheduling. Comprehensively studies project management activities for scheduling and delivering construction projects, including the contractor's role in preconstruction and construction activities and the application of CPM/PERT techniques to the planning, scheduling, and control of a construction project. Prereq., CVEN 3246.

Building Systems Engineering

AREN 2050-3. Engineering Systems for Buildings. Provides an overview of the building mechanical and electrical systems, including HVAC, plumbing, solar, power distribution, illumination, life safety, transportation, and noise control systems. Emphasizes sustainable (green) building practices. Includes a team investigation of existing commercial buildings. Prereqs., AREN 1027 and 2406.

AREN 2110-3. Thermodynamics. Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics. Computing in the context of engineering problems is introduced. Prereq., PHYS 1110. Coreq., APPM 1360.

AREN 2120-3. Fluid Mechanics and Heat Transfer. Explores fundamental principles of fluid dynamics and heat transfer. Topics include fluid statics, momentum, and energy conservation, laminar and turbulent viscous flow, convection heat transfer, conduction heat transfer, heat exchangers, and heat transfer. Prereqs., APPM 2350 and AREN 2110. Coreq., APPM 2360.

AREN 3010-3. Mechanical Systems for Buildings. Lecture course on the analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Examines psychrometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems. Prereqs., AREN 2050 and 2120.

AREN 3050-3. Environmental Systems for Buildings 1. Introduces the operation and design of building systems for climate control, water and drainage, life safety, electrical supply, illumination, transportation (elevators and escalators), and noise control. For non-engineering majors.

AREN 3060-3. Environmental Systems for Buildings 2. Continues the operation and design of building systems for climate control, water and drainage, life safety, electrical supply, illumination, transportation (elevators and escalators), and noise control. For non-engineering majors.

AREN 3130-3. Building Energy Laboratory. Laboratory course offering both hands-on experience with building and renewable energy systems and exposing students to the fundamentals of measurements, instrumentation, data acquisition, and statistical data analysis. Measurements and experiments will allow evaluation of building construction material, electrical equipment, lighting systems, heating and cooling systems, and solar energy devices, among others. Prereq., AREN 3010.

AREN 3140-3. Illumination Laboratory. Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments. Prereq., AREN 3540.

AREN 3540-3. Illumination I. Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture. Prereq., GEEN 1300.

AREN 4010-3. HVAC System Controls. Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance, and hands-on direct digital control (DDC) programming exercises as used in current building control practice. Prereq., AREN 4110. Same as CVEN 5010.

AREN 4110-3. HVAC Design 1. Applies engineering principles to the design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimating, applied psychrometrics, coils and heat exchangers, air and water distribution systems, and primary equipment and systems. Prereq., AREN 3010. Same as CVEN 5110.

AREN 4540-3. Exterior Lighting Systems. Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Prereq., AREN 3540. Recommended prereqs., AREN 3140 and 4550. Same as CVEN 5540.

AREN 4550-3. Illumination 2. Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings. Prereq., AREN 3540.

AREN 4560-3. Luminous Radiative Transfer. Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis. Prereq., AREN 3540.

AREN 4570-3. Building Electrical Systems Design 1. Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in buildings. Applies the national electric code to residential and commercial buildings. Prereq., ECEN 3030.

AREN 4580-3. Daylighting. Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar and sky modeling, luminous radiative transfer, design methods, and controls for integration with electric lighting systems. Prereq., AREN 3540.

AREN 4590-3. Computer Graphics in Lighting Engineering. Studies the numerical methods and computer implementation of computer graphics visualization for architectural lighting engineering and design. Implements finite element radiative transfer and ray-tracing in computer programs. Studies the use of computer graphics visualization in lighting analysis. Prereq., AREN 3540 and 4560.

Miscellaneous

AREN 1027-3. Engineering Drawing. Introduces engineering drawing including sections and dimensioning, print readings, and computer 3D modeling. Restricted to Freshmen or Sophomore Engineering Physics, Architectural or Civil Engineering majors only.

AREN 1316-1. Introduction to Architectural Engineering. Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration.

AREN 4317-4. Architectural Engineering Design. Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual, schematic, and design development phases. Students' teams work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produces a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation of designs. Prereqs., AREN 2406, 3010, CVEN 3246, 3525, and AREN 3540. Coreq., AREN 4570.

Chemical Engineering

CHEN 1000-3. Creative Technology. Lect. Introduces undergraduate arts and sciences students to the most recent concepts in technology and how these concepts impact all aspects of life, such as health, the health of the planet, and social structures. Engineering students should consult an advisor before registering for this course. Approved for arts and sciences core curriculum: natural science.

CHEN 1211-3. General Chemistry for Engineers. Lect. a one-semester course designed to meet the general chemistry requirement for engineering students. Topics include stoichiometry; thermodynamics; gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering subdisciplines. Restricted to students in the College of Engineering and Applied Science; one year of high school chemistry or CHEM 1001 or 1021 (min. grade C-); and high school algebra. Not recommended for students with grades below B- in CHEM 1001 or 1021. Coreq., CHEM 1221. Credit not granted for this course and CHEM 1111, 1113/1114, 1251, or 1351.

CHEN 1300-1. Introduction to Chemical Engineering. Meets for one lecture per week. Introduces chemical engineering emphasizing history of the profession, curriculum, chemical industry, and industrial chemistry. Includes industry visits, oral presentations, faculty and professional meetings, and development of a goals statement.

CHEN 2120-3. Chemical Engineering Material and Energy Balances. Provides a basic understanding of chemical engineering calculations involving material and energy balances around simple chemical processes. Prereq., CHEN 1211 and GEEN 1300 (min. grade C-).

CHEN 2121-1. Chemical Engineering Material and Energy Balances-Honors. Provides a supplementary learning experience for students enrolled in Chemical Engineering Material and Energy Balances (CHEN 2120). Coreq., CHEN 2120. Restricted to CHEN, CBEN, and EVEN honors students.

CHEN 2810-3. Biology for Engineers. Develops a basic understanding of the science of biology, including an introduction to the disciplines of biochemistry, cell organization, metabolism, genetics, genomics, molecular biology, recombinant DNA technology and evolution. Provides a basic introduction to several key techniques used in biological engineering laboratories. Uses examples of complex and creative structures engineered by natural processes.

CHEN 2840 (1-4). Independent Study. Available to sophomores with approval of Department of Chemical Engineering. Subject arranged to fit needs of student.

CHEN 3010-3. Applied Data Analysis. Teaches students to analyze and interpret data. Topics include engineering measurements, graphical presentation and numerical treatment of data, statistical inference, and regression analysis. Prereqs., GEEN 1300 and APPM 2360 (all min. grade C-).

CHEN 3130-2. Chemical Engineering Laboratory 1. One four-hour lab session per week. Investigates chemical engineering fluid flow, heat transfer, and thermodynamics. Emphasizes communication by written reports and oral presentations as well as laboratory safety. Prereq., CHEN 3010, 3200, 3320 and either CHEN 3210 or MCEN 3022 (all min. grade C-).

CHEN 3200-3. Chemical Engineering Fluid Mechanics. Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems. Prereqs., APPM 2350 (min. grade C-) and either CHEN 2120 or MCEN 2023 (min. grade C-). Coreq., APPM 2360. Same as GEEN 3853.

CHEN 3210-3. Chemical Engineering Heat Transfer. Examines conservation and transfer of thermal energy. Focuses on conduction and convection of heat in the context of chemical processes, with a special focus on heat exchangers. Also studies thermal radiation. Prereq., GEEN 1300 and either CHEN 3200 or MCEN 3021 (all min. grade C-), and CHEN 2120 (min. grade C-).

CHEN 3220-3. Chemical Engineering Separations and Mass Transfer. Studies separation methods including distillation, absorption, and extraction, and graphical and computer-based solutions to separation problems. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients. Applies mass transfer rate theory to packed and tray columns. Prereq., CHEN 3200, CHEN 3210 or MCEN 3022, and CHEN 3320 (all min. grade C-).

CHEN 3320-3. Chemical Engineering Thermodynamics. Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes. Prereqs., CHEN 2120 (min. grade C) and either CHEM 4511 or 4521 (min. grade C-).

CHEN 3321-1. Chemical Engineering Thermodynamics Honors. Incorporates student projects in conjunction with the standard teaching in CHEN 3320 where thermodynamic principles are applied to non-ideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes. Prereqs., CHEN 2120 (min. grade C) and either CHEM 4511 or CHEM 4521 (min. grade C-). Restricted to honors students.

CHEN 3838-3. Special Topics. May be repeated up to 6 total credit hours.

CHEN 3840 (1-4). Independent Study. Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

CHEN 3930-6. Chemical Engineering Cooperative Education. Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program. Prereqs., CHEN 2120 (min. grade C) and GPA higher than 2.85. GPA higher than 3.00 strongly recommended.

CHEN 4010-2. Chemical Engineering Senior Thesis 1. Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.

CHEN 4020-2. Chemical Engineering Senior Thesis 2. Continuation of CHEN 4010. CHEN 4010 and 4020 can substitute for CHEN 4130.

CHEN 4090-1. Undergraduate Seminar. Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report.

CHEN 4130-2. Chemical Engineering Laboratory 2. Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports, and oral presentations. Prereqs., CHEN 3010, 3130, 3320, and 4330 (all min. grade C-).

CHEN 4330-3. Chemical Engineering Reaction Kinetics. Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, and multiple steady states in reactors. Prereq., CHEN 3210 or MCEN 3022 and CHEN 3320 (min. grade C-).

CHEN 4440-3. Chemical Engineering Materials. Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes. Prereq., CHEN 3320 and CHEM 3311 (min. grade C-).

CHEN 4450-3. Polymer Chemistry. Lect. Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure. Prereq., CHEN 4330 and CHEM 3311 (all min. grade C-) or instructor consent required. Same as CHEN 5450.

CHEN 4460-3. Polymer Engineering. Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications. Prereq., CHEM 3311 and CHEN 3320 (min. grade C-). Same as CHEN 5460.

CHEN 4520-3. Chemical Process Synthesis. Studies applied chemical process design including equipment specification and economic evaluation. Prereqs., CHEN 3010, 3210, 3220, 3320 and 4330 or 4830 (all min. grade C-).

CHEN 4530-2. Chemical Engineering Design Project. Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report. Prereq., CHEN 4520 (min. grade C-).

CHEN 4570-4. Instrumentation and Process Control. Examines principles of control theory and their application to chemical processes. Focuses on single-loop feedback and feedforward control. Laboratory sessions cover measurement fundamentals, signal transmission, dynamic testing, control system synthesis, and implementation and adjustment. Prereqs., CHEN 3220, 4330 or 4830, and APPM 2360 (all min. grade C-).

CHEN 4580-3. Numerical Methods for Process Simulation. Covers use of macroscopic and microscopic balances for development of mathematical models to describe common chemical engineering unit operations. Also includes numerical methods for solution of model equations. Prereqs., CHEN 3210 and 3220 (all min. grade C-).

CHEN 4630-1. Intellectual Property Law and Engineering. Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents, and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention. Restricted to seniors. Same as CHEN 5630.

CHEN 4650-3. Particle Technology. Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates. Prereq., APPM 2360 and CHEN 3200 or MCEN 3021 (all min. grade C-). Same as CHEN 5650.

CHEN 4670-3. Environmental Separations. Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems. Prereqs., senior or graduate student standing. Same as CHEN 5670.

CHEN 4680-3. Environmental Process Engineering. Lect. Surveys the field of environmental process engineering and covers the topics of waste minimization and pollution, air pollution control, water pollution control, hazardous waste control, risk assessment and management, and ecological systems. Prereq., senior or graduate standing in engineering. Same as CHEN 5680.

CHEN 4801-3. Pharmaceutical Biotechnology. Focuses on the engineering needed to bring therapeutic products derived from living organisms (e.g., proteins, peptides, DNA, RNA) from the production plant to the patient. Covers the challenges of keeping these products "active" as they are stored, shipped, and administered to patients. Prereq., CHEN 3320 (min. grade C-). Coreq., CHEN 4330 or 4830.

CHEN 4805-3. Biomaterials. Provides an overview of biomaterials. Covers major classes of materials used in medical applications, properties, degradation mechanisms, and characterization methods, foreign body response, methods to control physiological response to biomaterial surfaces, biocompatibility, biomaterials used in soft and hard tissue replacements, drug delivery devices and tissue engineering, and design criteria for developing a material for a given

biological application. Prereq., CHEN 2810 and CHEM 3331 (all min. grade C-). Same as CHEN 5805.

CHEN 4810-2. Biological Engineering Laboratory. Involves planning and execution of chemical engineering experiments on mass transfer operations, bioseparations, and biological reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports and oral presentations. Prereqs., CHEN 3130 and 4820.

CHEN 4820-3. Biochemical Separations. Lect. and lab. Presents purification methods, mass transfer coefficients, problems specific to biologicals, and scale-up of processes. Also covers chromatography, phase extraction, supercritical fluids, sedimentation, precipitation, electrophoresis, dialysis, affinity techniques, cell separation, application of separations to bioreactors, and comparison of batch and continuous processes. Prereq., senior standing or above in engineering or science. Same as CHEN 5820.

CHEN 4830-3. Chemical Engineering Biokinetics. Introduces chemical kinetics, chemical reactor design, and biological kinetics. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, multiple steady states in reactors, enzyme kinetics, metabolic networks, and cell growth kinetics. Prereqs., CHEN 2810, 3210 and 3320 (all min. grade C-). Restricted to CHEN and CBEN majors.

CHEN 4836-3. Nanomaterials. Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields. Prereq., senior or graduate standing. Same as CHEN 5836.

CHEN 4838 (1-3). Special Topics in Chemical Engineering.

CHEN 4840 (1-4). Independent Study. Available to seniors with approval of chemical engineering department. Subject arranged to fit needs of student.

CHEN 5090-1. Seminar in Chemical Engineering. Required of all chemical engineering graduate students. Includes reports on research activities and on special current topics.

CHEN 5127-3. Applied Statistics for the Manufacturing and Process Industries. Discusses the concepts and techniques of applied statistics essential to quality control and product/process improvement. Includes computer control (SQC/SPC), sampling methods and time series analysis, and methods of experimental design. Prereq., MCEN 4120. Same as CVEN 5127 and MCEN 5126.

CHEN 5128-3. Applied Statistics In Research and Development. Students learn current and emerging statistical methods that are appropriate to experimentation in research and development activities. Statistical design of experiments and model fitting is emphasized. Prereq., one introductory probability/statistics course. Same as MCEN 5146.

CHEN 5210-4. Transport Phenomena. Considers continuum mechanics, emphasizing fundamental relationships for fluid mechanics and heat transfer and their applications to engineering problems. Prereq., senior or graduate standing and undergraduate courses in fluid mechanics, heat transfer, and differential equations.

CHEN 5220-3. Mass Transport. Examines fundamentals of mass transport with particular attention to microscopic balances in complex systems, such as those involving multiple components, chemical reaction, simultaneous heat and mass transport, and/or high mass flux. Prereq., CHEN 5210, undergraduate mass transfer, and familiarity with vector and tensor calculus.

CHEN 5333-3. Research Methods and Ethics. Prepares graduate students to carry out independent research. Research ethics, laboratory skills, experimental methods, critical thinking, presentations, proposal preparation and career planning are discussed. Independent research project carried out under direction of chemical engineering faculty. Prereq., graduate standing.

CHEN 5343-1. Research Methods and Ethics Seminar. Prepares graduate students to carry out independent research. Focuses on topics such as safety, ethics, communication skills, data analysis, intellectual property considerations, and time management.

CHEN 5360-3. Catalysis and Kinetics. Studies principles of chemical kinetics and catalytic reactions, emphasizing heterogeneous catalysis. Coreq., CHEN 4330,

or prereq., CHEM 4551 and instructor consent, or graduate standing in CHEM or CHEN.

CHEN 5370-3. Intermediate Chemical Engineering Thermodynamics. Reviews fundamentals of thermodynamics, application to pure fluids and mixtures, and physical equilibrium and changes of state. Examines the equation of state and computation of fluid properties for pure fluids, mixtures, and solutions. Also looks at relations between thermodynamics and statistical mechanics. Prereq., undergraduate thermodynamics (CHEN 3320 or equivalent).

CHEN 5390-3. Chemical Reactor Engineering. Studies ideal and nonideal chemical reactors, including unsteady state behavior, mixing effects, reactor stability, residence time distribution, and diffusion effects. Prereq., undergraduate course in chemical reactor design/kinetics.

CHEN 5420-3. Physical Chemistry and Fluid Mechanics of Interfaces. Covers thermodynamics of interfaces and surface tension measurement; adsorption at liquid-gas, liquid-liquid, and solid-gas interfaces; monolayers; conservation equations for a fluid interface; rheology of interfaces; surface tension driven flows; contact angle and wettability; and double layer phenomena. Prereq., CHEN 3200 or equivalent.

CHEN 5450-3. Polymer Chemistry. Same as CHEN 4450.

CHEN 5460-3. Polymer Engineering. Same as CHEN 4460.

CHEN 5630-1. Intellectual Property Law and Engineering. Restricted to graduate students or instructor consent required.

CHEN 5650-3. Particle Technology. Same as CHEN 4650.

CHEN 5670-3. Environmental Separations. Same as CHEN 4670.

CHEN 5680-3. Environmental Process Engineering. Same as CHEN 4680.

CHEN 5740-3. Analytical Methods in Chemical Engineering. Presents applied analytical and numerical mathematical methods in the context of chemical engineering problems. Topics include modeling techniques, algebraic equations, and ordinary and partial differential equations. Prereq., senior or graduate standing; working knowledge of computing, calculus, differential equations, linear algebra, and vector operations; and undergraduate courses in physics, fluid mechanics, heat transfer, and reaction engineering.

CHEN 5750-3. Numerical Methods in Chemical Engineering. Covers numerical methods for solving ordinary differential, partial differential, and integral equations. These principles are employed to develop, test, and assess computer programs for solving problems of interest to chemical engineers. Prereq., graduate standing or instructor consent.

CHEN 5800-3. Bioprocess Engineering. Same as CHEN 4800, except that a major term report is required.

CHEN 5805-3. Biomaterials. Same as CHEN 4805.

CHEN 5820-3. Biochemical Separations. Same as CHEN 4820, except that reports and extra reading are required.

CHEN 5830-1. Introduction to Modern Biotechnology. Introduces students to the biotechnology enterprise. Topics include the biotechnology industry and profession, the various academic disciplines of biotechnology, intellectual property, financing, and ethics.

CHEN 5831-2. Biotechnology Case Studies. Capstone course required of all graduate students in the interdisciplinary graduate biotechnology certificate program. Reviews molecular genetics, product synthesis and purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan. Prereq., CHEN 5830.

CHEN 5835-3. Interfacial and Colloidal Phenomena. Provides a deep exploration of the fundamental principles of colloid and interface science and of related applications. Core topics include fundamental equations of interfacial science, capillary phenomena, interfacial thermodynamics interfaces, molecular monolayers, electrical surface properties, and interfacial forces. Advanced topics include wetting phenomena, adsorption isotherms, dynamic interfacial behavior, surface modification, tribology, surfactant self-assembly, and foams/emulsions among others. Prereq., CHEN 3320 (min. grade C-).

CHEN 5836-3. Nanomaterials. Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing

nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields. Prereq., senior or graduate standing. Same as CHEN 4836.

CHEN 5838 (1-3). Special Topics in Chemical Engineering. Graduate-selected topics courses offered upon demand. Prereq., graduate standing or instructor consent.

CHEN 5840 (1-4). Independent Study. Available to MS and PhD students.

CHEN 5900-3. Pharmaceutical Biotechnology. Incorporates biochemistry, pharmaceutical science, and engineering for application in the pharmaceutical industry. Emphasizes microscale mechanisms affecting drug delivery, bioavailability, and stability. Specific topics include thermodynamics of macromolecular conformational stability, crystallization kinetics, interfacial phenomena, and industrial protein folding. Prereq., graduate standing.

CHEN 6210-3. Microhydrodynamics of Suspensions and Colloids. Focuses on fluid mechanics and colloid science of suspensions of particles, cells, and drops. Covers fundamentals, applications, and research frontiers. Prereq., CHEN 5210 or equivalent.

CHEN 6820-3. Biochemical Engineering Fundamentals. Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, and transport phenomena in microbial systems and downstream processing. Prereq., graduate standing in CHEM, CHEN, or MCDB, or instructor consent.

CHEN 6940-1. Master's Candidate.

CHEN 6950 (1-6). Master's Thesis.

CHEN 8990 (1-10). Doctoral Thesis.

Civil Engineering

Building Systems

CVEN 4700-3. Sustainability and the Built Environment. Introduces fundamental concepts of sustainability and sustainable development. Special emphasis on understanding the interaction of the built environment with natural systems and the role of technical and non-technical issues in engineering decisions. Open to engineering and non-engineering students. Same as CVEN 5700.

CVEN 5010-3. HVAC System Controls. Treats the theoretical and practical design of control systems for heating, ventilating, and air conditioning of both residential and commercial buildings. Discusses computer energy management system design. Prereq., AREN 3010 or equivalent. Same as AREN 4010.

CVEN 5020-3. Building Energy Audits. Analyzes and measures performance of HVAC systems, envelopes, lighting and hot water systems, and modifications to reduce energy use. Emphasizes existing buildings. Prereq., AREN 3010 or equivalent.

CVEN 5030-3. Architectural Lighting Equipment Design. Covers the specification and design of nonimaging optical systems for architectural lighting equipment reflector design. Develops and uses computer software to design optics that are prototyped and tested in the laboratory. Prereq., AREN 3540 or CVEN 5830.

CVEN 5040-3. Lighting Systems Engineering. Introduces architectural lighting, including vision and perception, lighting equipment and its characteristics, calculations and analysis, and the process of lighting design.

CVEN 5050-3. Advanced Solar Design. Predicts performance and analyzes economics of high temperature, photovoltaic, and other innovative solar systems. Also includes performance prediction methods for solar processes. Prereqs., AREN 2120, coursework in thermodynamics, fluid mechanics and heat transfer.

CVEN 5060-3. Advanced Passive Solar Design. Emphasizes design-oriented treatment of passive solar systems. Treats generic types of systems and their performance and cost. Covers passive system construction and daylighting. Prereq., AREN 2010 or equivalent.

CVEN 5070-3. Thermal Analysis of Building. Examines response factors, conduction transfer functions, and weighting factors for dynamic analysis of building envelopes. Also studies radiative and convective exchange in buildings, internal

gains, and infiltration analysis as modeled in hourly simulations. Prereq., AREN 3010 or equivalent.

CVEN 5080-3. Computer Simulation of Building Energy Systems. Introduces major simulation programs for analysis of building energy loads and system performance. Focuses on one hourly simulation program to develop capability for analysis of multizone structure. Prereq., AREN 4110 or CVEN 5110.

CVEN 5090-1. Building Systems Seminar.

CVEN 5110-3. HVAC Design 1. Explores design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimating, code compliance, duct design, fan systems, applied psychrometrics, cooling and heating coils, filters, hydronic systems, piping, and pumps. Prereq., AREN 3010 or equivalent. Same as AREN 4110.

CVEN 5540-3. Exterior Lighting Systems. Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Prereq., AREN 3540. Recommended prereqs., AREN 3140 and 4550. Same as AREN 4540.

CVEN 5700-3. Sustainability and the Built Environment. Same as CVEN 4700.

CVEN 5830-3. Special Topics for Seniors/Grads. Prereq., instructor consent. May be repeated up to 9 total credit hours.

CVEN 6940-1. Master's Degree Candidate.

CVEN 8990 (1-10). Doctoral Thesis. A minimum of 30 credit hours is required.

Mechanics

CVEN 2121-3. Analytical Mechanics 1. Covers forces acting on rigid bodies at rest. Equilibrium is the central concept that will be applied repeatedly to different situations. In each case, the object of interest will be isolated along with all the forces acting on it; a free body diagram. Equilibrium will be applied to analyze trusses, frames, machines, cables and hydrostatic forces on dams. Prereq., PHYS 1110. Prereq. or coreq., APPM 2350. Same as GEEN 3851.

CVEN 3111-3. Analytical Mechanics 2. Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions. Prereqs., CVEN 2121 and APPM 2360. Same as MCEN 3043.

CVEN 3161-3. Mechanics of Materials 1. Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories. Prereq., CVEN 2121. Coreq., APPM 2360.

CVEN 4161-3. Mechanics of Materials 2. Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections etc. are extensions of topics seen in CVEN 3161. Others like buckling and plate bending theory are new. The course presents unifying themes that underlie the study of mechanics. The course includes selected laboratory experiments. Prereq., CVEN 3161.

CVEN 4511-3. Introduction to Finite Element Analysis. Systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems, steady and transient heat conduction, and viscous flow. Prereqs., CVEN 3161, 3525, and APPM 2360. Same as CVEN 5511.

CVEN 5111-3. Structural Dynamics. Introduces dynamic response of linear elastic single and multiple degree of freedom systems. Includes time and frequency domain analysis. Also analyzes building structures. Prereq., instructor consent.

CVEN 5131-3. Continuum Mechanics and Elasticity. Provides foundation for advanced study of structural and material behavior and continuum theories in mechanics. Topics include Cartesian tensors, elements of continuum mechanics, constitutive laws for elastic solids, energy principles, methods of potentials, formulations of 2D and 3D elastostatic problems, and general analytical and numerical solutions.

CVEN 5161-3. Advanced Mechanics of Materials I. Covers 3-D stress and strain, failure theories, torsion of open and noncircular sections, thick-wall pressure

vessels, non-symmetric bending, shell in thin-walled sections, stability of frames and beam-column behavior.

CVEN 5511-3. Introduction to Finite Element Analysis. Prereq., graduate standing. Same as CVEN 4511.

CVEN 6161-3. Advanced Mechanics of Materials 2. Fundamentals of continuum mechanics, finite deformations, Lagrangian finite strains, Cauchy and Piola Kirchoff stress tensors, plasticity and thermo-elasticity, elements of damage mechanics, elements of fracture mechanics, rheological and viscoelastic theories, and modern experimental techniques. Recommended prereq., CVEN 5161.

CVEN 7111-3. Advanced Structural Dynamics. Includes general vibrations of civil engineering structures and their response to various types of time-dependent loads. Prereq., CVEN 5111.

CVEN 7141-3. Plates and Shells. Teaches mathematical theories of plate and shell structures and their applications. Involves numerical finite element solutions of plates and shells of various shapes under static and dynamic loadings. Prereq., CVEN 5121 or 7131.

CVEN 7161-3. Fracture Mechanics. This course has three parts. The first covers fundamentals through rigorous mathematical formulations of linear and nonlinear elastic fracture mechanics. The second focuses on materials: theoretical strength, metals, granular materials, polymers, and steel. The third covers numerical (finite element) methods in fracture mechanics. Heavy emphasis is placed on project and independent work. Prereq., CVEN 5121.

CVEN 7511-3. Computational Mechanics of Solids and Structures. Looks at finite element methodology for geometric and material nonlinearities. Involves incremental formulations and iterative solution strategies for truly finite increments and quasistatic and dynamic applications to large deformation and inelastic problems. Prereqs., CVEN 5511 or 6525.

Surveying and Transportation

CVEN 2012-3. Introduction to Geomatics. Observes, analyzes, and presents basic linear, angular, area, and volume field measurements common to civil engineering endeavors with application of GPS and GIS technology. Prereq., APPM 1350 or equivalent.

CVEN 3022-3. Construction Surveying. Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data. Prereq., CVEN 2012.

CVEN 3032-3. Photogrammetry. Familiarizes students with characteristics of aerial photographs. Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches. Prereq., instructor consent.

CVEN 3602-3. Transportation Systems. Introduces technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems. Focuses on evaluation of urban transportation systems and recent transportation innovations.

CVEN 4822-3. Geographical Information Systems for Civil and Environmental Systems. Theory and use of geographical information systems in civil engineering, environmental studies, natural resources, and other related disciplines. Topics include spatial data models, data capture, global positioning system, database linkage, use in design, analysis and implementation. Laboratory work includes applications of Arc-View and Arc-GIS software. Prereq., CVEN 2012 or instructor consent. Same as CVEN 5822.

CVEN 5822-3. Geographical Information Systems for Civil and Environmental Systems. Same as CVEN 4822.

Fluid Mechanics and Water Resources

CVEN 3313-3. Theoretical Fluid Mechanics. Basic principles of fluid mechanic. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude, and flow in closed conduits. Prereq., CVEN 2121.

CVEN 3323-3. Hydraulic Engineering. Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery. Prereq., CVEN 3313.

CVEN 4323-3. Water Resource Engineering Design. Design of urban water supply, wastewater, and supply stormwater management system, with demand management as an option. Exploration of the feasibility of recycling and reuse of treated wastewater and stormwater. Prereqs., CVEN 3227 and 4147. Same as CVEN 5423.

CVEN 4333-3. Engineering Hydrology. Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing. Prereqs., CVEN 3227 and 3323.

CVEN 4353-3. Groundwater Engineering. Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems. Prereq., CVEN 3313.

CVEN 5313-3. Environmental Fluid Mechanics. Analysis of viscous incompressible flows, with first-principle solutions for environmental fluid flows in oceans, rivers, lakes and the atmosphere. Topics include the Navier-Stokes equations, kinematics, vorticity dynamics, geophysical fluid dynamics, and density stratification. Prereqs., APPM 2350, 2360, CVEN 3313, or equivalents.

CVEN 5323-3. Applied Stream Ecology. Emphasizes the integration of hydrologic, chemical, and biological processes in controlling stream ecosystems at several spatial scales. Students apply ecosystem concepts to current environmental and water quality problems and learn field methods in field trips and a team project. Prereqs., general chemistry, physics. Recommended prereqs., hydrology, ecology, or environmental chemistry.

CVEN 5333-3. Multiscale Hydrology. Observations show that peak flows in rainfall-runoff events, and the quantities of annual peak flows, have a power-law dependence on basin area. Physical basis of power laws in peak flows will be explained from mass and momentum conservation equations governing stream flows in self-similar channel networks. Potential engineering applications to predicting floods under a changing climate will be covered. Prereqs., CVEN 4333, 5454, and 5537.

CVEN 5343-3. Transport and Dispersion in Surface Water. Studies transport and dispersion of introduced contaminants in turbulent surface water flows. Emphasizes developing a physical understanding of fluid processes responsible for turbulent dispersion. Includes analytical development, numerical modeling, and experimental approaches to the problem.

CVEN 5353-3. Groundwater Hydrology. Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems. Prereqs., CVEN 3313 and APPM 2360, or equivalent, or instructor consent.

CVEN 5363-3. Modeling of Hydrologic Systems. Introduces students to the techniques used in modeling various processes in the hydrologic cycle. Helps students develop numeric models and computer programs for use in conjunction with existing simulation modes such as HEC1 and HEC2 in a design project. Prereqs., CVEN 3323 and CVEN 4333 or instructor consent.

CVEN 5373-3. Water Law, Policy, and Institutions. Discusses contemporary issues in water management based on legal doctrine. Identifies legal issues in water resources problems and discusses in close relationship with technical, economic, and political considerations. Prereq., senior or graduate standing.

CVEN 5383-3. Applied Groundwater Modeling. Studies mathematical and numerical techniques needed to develop models to solve problems in water flow and chemical transport in the saturated and unsaturated zones of aquifers. Not only emphasizes the learning of modeling techniques from fundamentals, but also the application of models and modeling methods to solve problems in groundwater engineering, geo-environmental engineering, hazardous waste management, aquifer remediation design, and aquifer clean-up. Prereqs., CVEN 5353, 5454, or equivalent, and APPM 2360 or equivalent.

CVEN 5393-3. Water Resources Development and Management. Explores the principles governing water resources planning and development. Emphasizes the sciences of water (physical, engineering, chemical, biological, and social) and their interrelationships. Prereq., senior or graduate standing. Same as ECON 6555.

CVEN 5423-3. Water Resource Engineering Design. Same as CVEN 4323.

CVEN 6323-3. Urban Stormwater Infrastructure Systems. Evaluation and design of more sustainable urban stormwater infrastructure systems including street inlets, on-line and off-line surface storage and infiltration systems. Integrated design for major, minor, and micro storms to provide flood control and drainage as well as control of pollution from stormwater runoff. Simulation and optimization models will be used.

CVEN 6333-3. Introduction to Multi-Scale Variability and Scaling in Hydrology. Provides a foundational physical understanding of channel networks, runoff, precipitation, and evapotranspiration at multiple spatial scales of drainage basins using modern analytical concepts for understanding non-linear phenomena, e.g., fractals, multifractals, statistical scaling, criticality, and renormalization. Prereq., CVEN 3313, 5333, 5454, and an upper-division course in probability, or equivalents.

CVEN 6383-3. Flow and Transport through Porous Media. Studies basic physics of flow and transport of water, air, and other fluid mixtures through a porous medium. Course topics are relevant to applications in contaminant hydrology, contaminant transport in aquifers, hazardous waste management, geohydrology, soil physics, and geoenvironmental engineering.

CVEN 6393-1. Hydrologic Sciences and Water Resources Engineering Seminar. Provides a broad introduction to a variety of research topics from hydrologic sciences and water resources engineering. Offered as a one-hour weekly seminar by the departmental water faculty, graduate students, and external speakers. Restricted to graduate students in engineering.

Environmental

CVEN 3414-3. Fundamentals of Environmental Engineering. Emphasizes chemical, ecological, and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability, and risk assessment. Prereqs., CHEN 1211 and APPM 1360.

CVEN 3424-3. Water and Wastewater Treatment. Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements. Prereq., CVEN 3414.

CVEN 3434-3. Introduction to Applied Ecology. Emphasizes the integration of physical, chemical, and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project. Prereq., CHEM 1111 or CHEN 1211 and 1221. Restricted to junior/senior CVEN, EVEN, or AREN majors. Same as ENVS 3434.

CVEN 4404-3. Water Chemistry. Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption. Prereqs., CHEN 1211 and CVEN 3414, or CHEM 1111 and 1131 for non-engineers. Same as CVEN 5404. Formerly CVEN 3454.

CVEN 4414-1. Water Chemistry Laboratory. Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN 4404 Water Chemistry in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity), and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation, and oxidation-reduction reactions; and laboratory techniques and reporting. Prereqs., CHEN 1211 and CVEN 3414 or CHEN 1111 and 1131 for non-engineers. Coreq., CVEN 4404.

CVEN 4424-3. Environmental Organic Chemistry. Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes solubility, vapor pressure, air-water exchange, sorption, abiotic and biotic reactions, and photodegradation. Same as CVEN 5424.

CVEN 4434-3. Environmental Engineering Design. Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites, and sustainable sanitation in develop-

ing countries. Economic, societal, and site specific criteria impacting designs are emphasized. Prereq., CVEN 3414. Restricted to seniors. Same as CVEN 5434.

CVEN 4474-3. Hazardous and Industrial Waste Management. Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, and acidic, caustic, and radioactive waste material. Discusses techniques for destruction, immobilization, and resource recovery and assessment of environmental impact of treatment process end products. Prereq., CVEN 3414. Same as CVEN 5474.

CVEN 4484-3. Introduction to Environmental Microbiology. Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering. Prereq., CHEM 1211, CHEN 1221, APPM 1350, 1360, and 2350.

CVEN 4834 (1-3). Special Topics. Prereq., instructor consent. May be repeated up to 6 total credit hours provided topics are different.

CVEN 5404-3. Water Chemistry. Same as CVEN 4404.

CVEN 5414-3. Water Chemistry Laboratory. Uses experimental and analytical laboratory techniques to develop a better understanding of the concepts of aquatic chemistry and to investigate water chemistry in treated and natural water systems. Techniques include titration, spectrophotometry, gas chromatography, other advanced instrumentation, sampling, portable analyses, and basic statistics and experimental design. Course focuses on water chemistry of Boulder Creek and other local waters. Prereq., CVEN 5404 or GEOL 5280. Coreq., CVEN 5424.

CVEN 5424-3. Environmental Organic Chemistry. Same as CVEN 4424.

CVEN 5434-3. Environmental Engineering Design. Prereq., instructor consent. Recommended prereq., CVEN 5524, 5534, or 5474. Same as CVEN 4434.

CVEN 5454-3. Quantitative Methods. Introduces the use of digital simulation in the analysis of water resources and environmental systems. Develops computer programs for the simulation of reservoir operations, watershed runoff, stream quality, and lake quality, and uses existing software to analyze more complex problems. Prereq., instructor consent.

CVEN 5474-3. Hazardous and Industrial Waste Management. Same as CVEN 4474.

CVEN 5484-3. Introduction to Environmental Microbiology. Same as CVEN 4484.

CVEN 5494-3. Surface Water Quality Modeling. Examines the relationships among air, water, and land pollution, water quality, and beneficial uses. Using models, develops the ability to quantify and predict the impacts of pollutants in the aquatic environment, and to develop approaches to minimize unfavorable water quality conditions. Prereq., instructor consent.

CVEN 5514-3. Bioremediation. Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundamentals of phytoremediation; critical reviews of current literature on bioremediation. Prereq., CVEN 4484 or 5484 or instructor consent. Recommended prereq., CVEN 5424.

CVEN 5524-3. Drinking Water Treatment. Provides advanced study on theory-of-treatment processes, including design and operation of municipal water supplies. Prereq., graduate standing or instructor consent.

CVEN 5534-3. Wastewater Treatment. Offers an advanced analysis of wastewater treatment systems; design and operation of treatment process reactors; factors affecting performance of facilities used for physical separation; and chemical and biological conversion of wastewater compounds, including nitrogen and phosphorus. Prereq., graduate standing or instructor consent.

CVEN 5544-3. Solid Waste Management and Resource Recovery. Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste. Recommended prereq., CVEN 3414.

CVEN 5834 (1-3). Special Topics.

CVEN 6404-3. Advanced Aquatic Chemistry. Examines aquatic equilibria, corrosion, colloid and polymer chemistry, behavior of natural organic matter in engineered systems, and application of personal computers to model aquatic equilibria. Requires a term project. Prereq., CVEN 5402. Offered in the spring every other year.

CVEN 6414-3. Aquatic Surfaces and Particles. Examines the role of surfaces and particles in the fate and transport of contaminants in the aquatic environment. Emphasizes modeling of absorption, dissolution, precipitation, surface-catalyzed reactions, and coagulation and filtration kinetics. Prereqs., CVEN 5404 or GEOL 5280.

CVEN 6834 (1-3). Special Topics.

Structures

CVEN 3525-3. Structural Analysis. Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force method. Prereq., CVEN 3161.

CVEN 4525-3. Analysis of Framed Structures. Studies matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of frame and truss structures. Topics include support settlements, thermal loads, and energy formulations of force-displacement relationships. Prereq., CVEN 3525. Same as CVEN 5525.

CVEN 4545-3. Steel Design. Applies basic principles to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections. Prereq., CVEN 3525.

CVEN 4555-3. Reinforced Concrete Design. Focuses on applications to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings. Prereq., CVEN 3525.

CVEN 4565-2. Timber Design. Applies design methods to beams, columns, trusses, and connections using timber and glued, laminated members. Prereq. or coreq., CVEN 3525.

CVEN 5525-3. Analysis of Framed Structures. Same as CVEN 4525.

CVEN 5555-3. Structural Reliability. Explores principles and methods of structural reliability, and formulates bases for design to insure adequate safety and performance of elements and structural systems. Prereq., CVEN 3535, 4525, or instructor consent.

CVEN 5565-3. Life-Cycle Engineering of Civil Infrastructure Systems. Philosophical and analytical issues for lifetime design and operation of civil systems. Optimization tradeoffs of construction, management, and sustainability. Utility of operation and service, including present-value economic analysis. Decision-making alternatives of safety and performance, including hazards consideration. Recommended prereq., CVEN 3227 or equivalent.

CVEN 5575-3. Advanced Topics in Steel Design. Covers steel structure design and analysis. Includes plate girders, moment connections for beams, design of multistory frames, and other topics determined by class interest. Prereq., CVEN 4545 or equivalent.

CVEN 5585-3. Advanced Topics in Reinforced Concrete Design. Covers design and analysis topics for prestressed concrete and/or reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Prereq., CVEN 4555 or equivalent.

CVEN 5835-3. Special Topics for Seniors/Grads. Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

CVEN 6525-3. Finite Element Analysis of Structures. Reviews membrane, plate, and shell elements; displacement and mixed models; Kirchoff and Mindlin bending formulations; and reduced integration techniques. Introduces nonlinear problems. Provides application to buckling and vibration of structures. Prereq., CVEN 4525 and instructor consent, or CVEN 5511.

CVEN 6595-3. Earthquake Engineering. Analyzes and designs structures for earthquake loadings. Gives attention to earthquake ground motions, attenuation laws, and seismic hazard analysis. Also involves numerical methods for time-domain and frequency-domain analysis, response of linear and nonlinear

structures, elastic and inelastic response spectra, construction of design spectra, soil-structure interaction analysis, and seismic design methods and building code requirements. Prereq., CVEN 5111 or equivalent.

CVEN 7545-3. Structural Optimization. Studies fundamental propositions for the design of skeletal structures, automatic design of optimal structures, life-cycle cost design of deteriorating structures, problem-oriented computer languages, and linear and nonlinear programming methods for structural design. Prereq., CVEN 4525 or equivalent.

CVEN 7565-3. Inelastic Theory of Structures. Examines inelastic behavior of materials, including calculation of ultimate capacity of perfectly plastic structures by use of upper- and lower-bound theorems. Looks at theories of inelastic action as applied to structural design in steel and concrete and elements of theory of plasticity with applications in ultimate analysis of plates, shells, and continuous bodies. Prereq., CVEN 3525.

CVEN 7595-3. Earthquake Engineering. Analysis and design of structures for earthquake loadings. Earthquake ground motions, attenuation laws, and seismic hazard analysis. Numerical methods for time-domain and frequency-domain analysis response of linear and nonlinear structures. Elastic and inelastic response spectra, and construction of design spectra. Soil-structure interaction analysis. Seismic design methods and building code requirements. Prereq., CVEN 5111 or equivalent.

Construction

CVEN 3246-3. Introduction to Construction. Broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor, and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law, and financial management. Prereq., junior level standing or instructor consent.

CVEN 3256-3. Construction Equipment and Methods. Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction. Recommended prereq., CVEN 3246.

CVEN 5206-3. Design Development. Investigates the interrelationship between design decisions and building costs, and the impact of each major building system and building trade on project budgets and schedules. Gives students the opportunity to prepare technical, marketing, and financial packages for investors as well as regulatory and financial institutions. Culminates with detailed presentations of student-developed project prospectuses. Prereqs., AREN 3406, 4416, CVEN 3246 and 5236, as well as instructor consent.

CVEN 5216-3. Applied Construction Financial Management. Interpreting commonly used financial reports in the construction engineering industry sector will be taught. Skills developed in this course will better prepare students to become competent consumers of financial information utilizing the same to influence future results the construction business. Models for financing public and private sector projects will also be explored.

CVEN 5226-3. Safety and Quality. Comprehensively studies quality and safety in the construction industry. Statistical techniques for quality assurance and control will be reviewed and applied. The course also extensively focuses on advanced safety management issues such as accident causation theory, economic modeling, safety risk quantification and analysis, design for safety, and emerging technologies. Skills developed in this course will prepare graduate students to be effective quality and safety managers or researchers.

CVEN 5246-3. Legal Aspects of Construction. Applies law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contracts; and legal responsibilities and ethical requirements of the professional engineer. Prereq., graduate standing or instructor consent. Same as CVEN 4087.

CVEN 5276-3. Engineering Risk and Decision Analysis. Acquaints students with the fundamental principles and techniques of risk and decision analysis. Oriented toward project-level decisions in which risk or uncertainty plays a central role. Introduces students to Monte Carlo analyses, influence diagrams, and various types of multicriteria decision analyses. Culminates in a larger term project. Recommended prereq., CVEN 3227.

CVEN 5286-3. Design Construction Operations. Considers topics associated with the effective and efficient design of construction operations. Topics include construction productivity measurement systems, methods improvement, and short interval scheduling. Introduces and applies several computer-based simulation techniques to real-world problems. Concludes with a discussion of quality control and quality assurance emphasizing statistical QC procedures. Prereq., graduate standing or instructor consent.

CVEN 5326-3. Construction Project Controls. Examines tools and techniques employed to control design processes and construction operations. Students apply advanced scheduling and estimating techniques, culminating in the concept of earned value project management. Introduces high tech project control tools. Recommended prereqs., AREN 4420 and 4466.

CVEN 5836 (1-3). Special Topics for Seniors/Grads. Supervised study of special topics of interest to students under instructor guidance. May be repeated up to 6 total credit hours. Prereq., Instructor consent.

CVEN 7206-1. CEM PhD Seminar. Examines emerging research in construction engineering and management. Students will consider and comment on research methods and designs based on their own work and that of CU faculty and other leading researchers. Aims to make CEM PhD students better researchers and evaluators of research methods and processes.

Geotechnical

CVEN 3698-3. Engineering Geology. Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; mapping; and geology of underground excavations, slopes, reservoirs, and dam sites. Includes field trips.

CVEN 3708-3. Geotechnical Engineering 1. Studies basic characteristics of geological materials; soil and rock classifications; physical, mechanical, and hydraulic properties; the effective stress principle; soil and rock improvement; seepage, consolidation; stress distribution; and settlement analysis. Selected experimental and computational laboratories. Prereq., CVEN 3161.

CVEN 3718-3. Geotechnical Engineering 2. Discusses shear strength, bearing capacity, lateral earth pressures, slope stability, and underground construction. Analyzes and looks at the design of shallow and deep foundations, retaining walls, tunnels, and other earth and rock structures. Selected experimental and computational laboratories. Prereq., CVEN 3708.

CVEN 4718-3. Mechanics and Dynamics of Glaciers. Development of a quantitative physical basis for understanding the functions of snow, ice, and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems. Prereqs, 3 semesters of calculus, differential equations, thermodynamics, computer programming. Recommended Prereqs. partial differential equations, linear algebra. Same as CVEN 5718.

CVEN 4728-3. Foundation Engineering. Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles, and drilled piers. Coverage includes bearing capacity, settlement, group effects, and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations, and analysis of pile behavior using wave equation and dynamic monitoring methods. Prereqs., CVEN 3718 or instructor consent. Same as CVEN 5728.

CVEN 4878 (1-3). Independent Study. Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering. Numbered CVEN 4840 through CVEN 4878.

CVEN 5628-3. Seepage and Slopes. Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems. Prereqs., CVEN 3708 and 3718 or instructor consent.

CVEN 5678-3. Soil Improvement and Reinforcement. Provides students with principles and working knowledge of design and construction procedures in soil

stabilization, retaining structures, geosynthetics, and soil reinforcement. Prereq., CVEN 3718 or instructor consent.

CVEN 5688-3. Environmental Geotechnics. Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.

CVEN 5708-3. Soil Mechanics. Offers an advanced course in principles of soil mechanics. Coverage includes topics in continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; the effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling. Prereq., CVEN 3718.

CVEN 5718-3. Mechanics and Dynamics of Glaciers. Same as CVEN 4718.

CVEN 5728-3. Foundation Engineering. Same as CVEN 4728.

CVEN 5738-3. Applied Geotechnical Analysis. Studies applications of limiting equilibrium and limit plasticity analysis methods to stability problems in geotechnical engineering, such as slopes, lateral earth pressures on retaining structures, and bearing capacities of foundations. Also includes elastic and consolidation analysis of deformations in soil structures. Prereq., CVEN 5708 or instructor consent.

CVEN 5748-3. Design of Earth Structures. Covers theory, design, and construction of earth embankments and waste facilities, including isolation systems. Uses published data, field exploration, and laboratory tests on soils and rock in investigating foundations and construction materials. Involves principles of compaction and settlement, permeability analysis, landslide recognition and control, use of composite clay, and liner systems. Prereq., CVEN 5708 or instructor consent.

CVEN 5758-3. Flow Processes in Soils. Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; nonlinear finite strain consolidation and desiccation theory; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems. Prereq., CVEN 3718 or instructor consent.

CVEN 5768-3. Introduction to Rock Mechanics. Introduction to rock mechanics. Nature of rocks and rock masses; physical properties of rocks; rock and rock mass classifications, deformability, strength, and hydraulics; mechanical and hydraulic behavior of rock discontinuities; stereographic projection; laboratory and in-situ testing. Prereqs: CVEN 3708 and 3718 or instructor's consent.

CVEN 5778-3. Advanced Rock Mechanics. In-situ stresses and their measurements; rock slope engineering; engineering for underground construction; foundation engineering; numerical methods. Prereq. EVEN 5768.

CVEN 5788-3. Computational Mechanics for Geomaterials. Covers constitutive modeling for geomaterials, finite element implementation of constitutive models, and coupled solid-fluid mechanical governing equations for inelastic porous media. Considers transient and steady state conditions. Analyzes geotechnical, geological, structural, and other related modern engineering problems. Uses general purpose finite element software program for implementation and analysis. Prereqs., CVEN 5511 or ASEN 5007, and CVEN 5131 or MCEN 5023 or instructor consent.

CVEN 5798-3. Dynamics of Soils and Foundations. Examines the behavior of soils and foundations subjected to self-excited vibrations and earthquake ground motions. Looks at principles of wave propagation in geologic media; in situ and laboratory determination of engineering properties for dynamic analysis; and applications of these principles and properties in design and analysis of foundations and earth structures subjected to dynamic loading. Prereq., CVEN 5708 or instructor consent.

CVEN 7718-3. Engineering Properties of Soils. Considers constitutive behavior of cohesive and cohesionless soils including stress-strain, strength, pore water pressure, and volume change behavior under drained and undrained loading conditions. Also includes linear and nonlinear analysis techniques and determination of constitutive properties in the laboratory. Prereq., CVEN 5708 or instructor consent.

CVEN 7788-3. Soil Behavior. Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composi-

tion, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials. Prereq., CVEN 3718 or instructor consent.

Special Topics

CVEN 4839 (3-6). Special Topics for Seniors. Offers a supervised study of special topics, under instructor guidance. May be repeated up to 6 total credit hours. Prereq., instructor consent.

CVEN 4899-4. Civil Engineering Senior Project Design. Provides a simulated real world design and construction planning experience with multiple constraints including budget, schedule, technical, regulatory, and societal. Teams integrate the multiple civil engineering sub-disciplines. Requires gathering relevant data, understanding client needs, identifying constraints, and applying applicable regulations, codes and standards. Final deliverables include: detailed design drawings, specifications, cost estimate, project schedule, construction plan, oral and written presentation. Prereq., senior standing.

CVEN 5849 (1-3). Independent Study. Available only through approval of graduate advisor. Subject arranged to fit needs of student. May be repeated up to 6 total credit hours.

CVEN 5919-3. Sustainable Community Development 1. Designed for senior-level and graduate engineering, environmental, and health sciences students who plan to work in developing communities or who are interested in global health issues. Provides a background and framework for sustainable community development based on a participatory model. A public health perspective is emphasized, covering an overview of development and global health concepts and issues. Restricted to senior or graduate students.

CVEN 5929-3. Sustainable Community Development 2. Covers the principles, practices and strategies of appropriate technology as part of an integrated and systems approach to community-based development. Course content areas include technical issues in development, environmental health and communicable disease, appropriate and sustainable technologies with hands-on workshops, and global cooperation in development. Prereq., CVEN 5919. Restricted to seniors and graduate students.

Miscellaneous

CVEN 1317-1. Introduction to Civil and Environmental Engineering. Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.

CVEN 3227-3. Probability, Statistics and Decision. Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods. Restricted to juniors/seniors.

CVEN 4087-3. Construction Contract Administration. Students will develop a working understanding of the various types of contracts, key contract provisions, how to evaluate contract risk, ethical requirements, and most importantly explore effective contract administration. Construction and engineering contracts are at the core of all project relationships. Through lecture, group dialog and case studies students will develop confidence in their ability to assess, understand and deploy contract administration in a construction setting. Prereq., senior standing in civil or architectural engineering or instructor consent.

CVEN 4147-3. Civil Engineering Systems. Theory and application of the principles of engineering economics, and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering. Prereq., senior standing. Same as CVEN 5147.

CVEN 4537-3. Numerical Methods in Civil Engineering. Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems. Prereq., senior standing. Same as CVEN 5537.

CVEN 4837 (1-3). Special Topics. Prereqs., GEEN 1300, or CSCI 1700 and GEEN 1017.

CVEN 5147-3. Civil Engineering Systems. Same as CVEN 4147.

CVEN 5537-3. Numerical Methods in Civil Engineering. Prereq., graduate standing. Same as CVEN 4537.

CVEN 5837-3. Special Topics for Seniors/Grads. Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

CVEN 5939-3. Sustainable Community Development Field Practicum. Provides a supervised in-field practicum experience in which the student applies theories and concepts learned in CVEN 5919 and 5929, Sustainable Community Development I and II. Prereqs., CVEN 5919 and 5929 or instructor consent. Restricted to students with EDC sub-plan.

Computer Science

General Computer Science

CSCI 1000-1. Computer Science as a Field of Work and Study. Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.

CSCI 1220-4. Virtual Worlds: An Introduction to Computer Science. Introduces the fundamental principles of computer science using an online virtual world called Second Life as the "laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science. Same as ATLS 1220.

CSCI 1240-3. The Computational World. Introduces and explores the "computational style of thinking" and its influence in science, mathematics, engineering and the arts. The course does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century. Same as ATLS 1240.

CSCI 1300-4. Computer Science 1: Programming. Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains.

CSCI 2270-4. Computer Science 2: Data Structures. Studies data abstractions (e.g., stacks, queues, lists, trees) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications. Prereqs., CSCI 1300, and one of APPM 1350 or MATH 1300.

CSCI 2400-4. Computer Systems. Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components influence performance and memory hierarchy. Prereq., CSCI 2270.

CSCI 2830 (1-3). Special Topics in Computer Science. Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester.

CSCI 2900 (1-3). Lower Division, Undergraduate Level Independent Study. Offers selected topics at the elementary level for students with little or no previous computing experience.

CSCI 4000-3. Entrepreneurship in Computing. Examines the development of new venture creation from the entrepreneur's perspective. Provides an understanding of the entire process including opportunity identification, feasibility study, fundraising, organization, team creation, and exit strategies through case studies, oral and written presentations, and outside speakers. Taught by an experienced entrepreneur. Prereq., CSCI 2270. Restricted to juniors/seniors.

CSCI 4810-1. Seminar in Computational Biology and Health Informatics. Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project. Prereqs., CSCI 4312 or 4314 or 4317.

CSCI 4830-3. Special Topics in Computer Science. Covers topics of interest in computer science at the senior undergraduate level. Content varies from semester to semester.

CSCI 4900 (1-3). Upper Division, Undergraduate Level Independent Study. Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students. Prereq., CSCI 1200 or 1300.

CSCI 4950 (2-4). Senior Thesis. Provides an opportunity for senior computer science majors to conduct exploratory research in computer science. Prereqs., successful completion of a minimum of 36 credit hours of Computer Science Foundation, Track Foundation, Track Core, and Computer Science electives, and WRTG 3030. Restricted to seniors. May be repeated up to 8 total credit hours.

CSCI 5900 (1-6). Master's Level Independent Study. Provides opportunities for independent study at the master's level.

CSCI 6000-1. Introduction to the Computer Science PhD Program. Instructs new PhD students in computer science how to obtain a PhD and how to become an effective member of the computer science research community. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved. Restricted to new PhD students in computer science.

CSCI 6800 (1-6). Master of Engineering Project. Students seeking the master of engineering degree must complete a creative investigation project, including a written report, supervised by a member of the graduate faculty. Prereq., completion of 21 hours towards the ME degree.

CSCI 6940-1. Master's Degree Candidacy. For students who need to be registered for the purpose of taking the master's comprehensive exam and who are not otherwise registered. Credit does not count toward degree requirements. Graded on a pass/fail basis.

CSCI 6950 (1-6). Master's Thesis.

CSCI 7000 (1-4). Current Topics in Computer Science. Covers research topics of current interest in computer science that do not fall into a standard subarea. May be repeated up to 8 total credit hours. Prereq., instructor consent.

CSCI 7900 (1-6). Doctoral Level Independent Study. For doctoral students.

CSCI 8990 (1-10). Doctoral Dissertation. Investigates some specialized field of computer science. Approved and supervised by faculty members.

Parallel Processing

CSCI 5551-3. Parallel Processing. Examines a range of topics involved in using parallel operations to improve computational performance. Discusses parallel architectures, parallel algorithms and parallel programming languages. Architectures covered include vector computers, multiprocessors, network computers, and data flow machines. Prereq., background in computer organization, introduction to programming languages, elementary numerical analysis, ECEN 4593 and CSCI 3656, or instructor consent. Same as ECEN 5553.

CSCI 7111-3. Topics in Parallel Processing. Content varies, but subjects include parallel machine architecture, parallel algorithms, languages for parallel computation, and applications. Takes subject matter from current research. Prereq., instructor consent.

Artificial Intelligence

CSCI 3002-3. Human-Centered Computing Foundations. Introduces practice and research in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming.

CSCI 3112 (1-3). Human-Centered Computing Professional Development. Supports students in developing professional skills and practices in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming. May be repeated up to 10 total credit hours. Same as ATLS 3112.

CSCI 3202-3. Introduction to Artificial Intelligence. Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language processing. Introduces artificial intelligence programming. Prereq., CSCI 2824.

CSCI 3702-3. Cognitive Science. Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problems, nature versus nurture, conceptual structure and metaphor, logic/problem solving, and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind. Prereqs., two of the following: PSYC 2145, LING 2000, CSCI 1300, and PHIL 2440. Same as LING 3005, PHIL 3310, and PSYC 3005.

CSCI 4202-3. Artificial Intelligence 2. Second course in artificial intelligence. Topics may vary, but typically cover neural networks, natural language processing, and artificial life. Prereq., CSCI 3202 or instructor consent.

CSCI 4312-3. Health Informatics. Teaches students essential skills necessary for developing usable assistive and performance support systems, which include consideration of the academic and professional interdisciplinary issues that govern the work. An overview of ongoing and emerging topics in medical informatics will be presented. Prereq., CSCI 2270. Recommended prereq., CSCI 3002. Same as CSCI 5312.

CSCI 4342-3. Groupware and Workflow Systems. Supports students in developing professional skills and knowledge concerning the use of computer technologies to support collaborative activities. Also covers the impact of digital collaboration technologies on users, groups, organizations and society. Students will gain practical experience with Business Process Management and the use of Workflow Management Systems. Same as CSCI 5342.

CSCI 4412-3. Design, Creativity, and New Media. Explores the design of new media and technologies to support design and creativity. Analyzes design and creativity as human activities of fundamental importance in the networked information culture and economy. Provides theoretical and practical analysis of new media. Instructor consent required. Recommended prereq., CSCI 3002. Instructor consent required. Same as CSCI 5412.

CSCI 5312-3. Health Informatics. Same as CSCI 4312.

CSCI 5342-3. Groupware and Workflow Systems. Same as CSCI 4342.

CSCI 5412-3. Design, Creativity, and New Media. Same as CSCI 4412.

CSCI 5582-3. Artificial Intelligence. Surveys artificial intelligence methods, theories, and applications. Studies the relationship between artificial intelligence and psychology, linguistics, and philosophy. Introduces artificial intelligence programming. Prereq., CSCI 3155 or equivalent. Same as ECEN 5583.

CSCI 5622-3. Machine Learning. Trains students to build computer systems that learn from experience. Includes the three main subfields: supervised learning, reinforcement learning and unsupervised learning. Emphasizes practical and theoretical understanding of the most widely used algorithms (neural networks, decision trees, support vector machines, Q-learning). Covers connections to data mining and statistical modeling. A strong foundation in probability, statistics, multivariate calculus, and linear algebra is highly recommended. Prereq., graduate standing or instructor consent.

CSCI 5722-3. Computer Vision. Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control, and object recognition. Recommended prereq., probability, multivariate calculus, and linear algebra.

CSCI 5832-3. Natural Language Processing. Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs. Prereq., graduate standing or instructor consent. Same as LING 5832.

CSCI 6302-3. Speech Recognition and Synthesis. Introduction to automatic speech recognition and understanding, conversational agents, dialogue systems, and speech synthesis/text-to-speech. Topics include the noisy channel model, Hidden Markov Models, A* and Viterbi decoding, language modeling (N-grams, entropy), concatenative synthesis, text normalization, dialogue and conversation modeling. Prereqs., CSCI 5582 or 5832, or LING 5200, and graduate standing or instructor consent.

CSCI 6402-3. Issues and Methods in Cognitive Science. Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. Prereqs., graduate standing, or at least one course at the 3000-level or higher in computer science, linguistics, philosophy, or psychology. No background in computer science will be presumed. Same as EDUC 6504, LING 6200, PHIL 6310, and PSYC 6200.

CSCI 6622-3. Advanced Machine Learning. Covers advanced theoretical and practical topics in machine learning and latest developments in the field. Students conduct original research, either applied or theoretical, and present their results. Prereq., CSCI 5622 or instructor consent.

CSCI 7212-3. Topics in Symbolic Artificial Intelligence. Topics vary from year to year. Possible topics include search; knowledge representation and natural language understanding; deduction, planning, problem solving, and automatic programming; instruction and cognitive models; vision and speech; and learning, induction, and concept formation. Prereq., CSCI 5582 or instructor consent.

CSCI 7222-3. Topics in Nonsymbolic Artificial Intelligence. Topics vary from year to year. Possible topics include human and machine vision, signal and speech processing, artificial life, mathematical foundations of connectionism, and computational learning theory. Prereq., CSCI 5622 or instructor consent.

CSCI 7412-2. Cognitive Science Research Practicum. Independent, interdisciplinary research project in cognitive science for graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students should obtain commitments from two mentors for their project. Prereqs., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereqs., CSCI 7762 or EDUC 6505 or LING 7762 or PSYC 7765. Same as LING 7415, PSYC 7415, PHIL 7415, and EDUC 6506.

CSCI 7422-2. Cognitive Science Research Practicum 2. Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506. Same as PSYC 7425, LING 7425, PHIL 7425, and EDUC 6516.

CSCI 7762 (1-2). Readings and Research in Cognitive Science. Interdisciplinary reading of innovative theories and methodologies of cognitive science. Participants share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint PhD in cognitive science. Prereq., graduate standing. Same as EDUC 6505, LING 7762, and PSYC 7765.

CSCI 7772 (1-2). Topics in Cognitive Science. Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as LING 7775, PSYC 7775, EDUC 7775, SLHS 7775, and PHIL 7810.

CSCI 7782-3. Topics in Cognitive Science. Addresses a different set of one to three topics each year. For each topic, one or two faculty members of the Institute of Cognitive Science present background material and current research. Prereq., graduate standing or instructor consent.

Operating Systems and Hardware

CSCI 3753-4. Operating Systems. Examines software comprising computing systems as it builds upon hardware to provide a programming environment. Basic operating systems concepts will be covered, including process management, memory management, device I/O, file systems, etc. Involves some systems programming. Prereqs., CSCI 2270 and one of CSCI 2400 or ECEN 2120.

CSCI 4113-3. Unix System Administration. Introduces UNIX (Linux) system administration and related topics, including trouble-shooting system and network problems, hardware and software configuration and installation, basic scripting, and security aspects of Internet hosts. Students build a Linux server from the

ground up, using provided computing resources, and must maintain and secure the server themselves.

CSCI 4123-3. Network Laboratory. Develops enterprise level design and configuration skills on local area networking via switching and routing, as well as the provisioning of remote data communications across diverse Wan technologies, using the latest available transport and security services. Prereq., CSCI 4273. Credit not granted for this course and TLEN 5460.

CSCI 4133-3. Security Laboratory. Allows students to gain practical experience with network security in a simulated network environment. Topics to be covered include system hardening, firewalls, intrusion detection, vulnerability assessment, and investigation. Prereq., CSCI 4273. Credit not granted for this course and TLEN 5540.

CSCI 4143-2. Principles of Telecommunications Policy. Learn the key issues and principles that guide the decisions of policymakers with respect to the regulatory treatment of voice, video, and data communications. Engage in critical debate, and develop instincts for anticipating the likely regulatory models that may be applied to new technologies. This introductory course covers technical, economic, legal, political, and institutional considerations. Coreq., CSCI 4123 or 4133. Same as TLEN 5210.

CSCI 4273-3. Network Systems. Focuses on design and implementation of network programs and systems, including topics in network protocols like TCP, IP routing, Ethernet, wireless networks, Web/e-mail, network sockets, etc. Prereqs., CSCI 3753 and familiarity with C and UNIX. Same as CSCI 5273.

CSCI 4593-3. Computer Organization. Studies computer design at the gate level. Discusses microprogrammed and hardwired control units, memory design, arithmetic and logic unit, I/O, and peripheral devices. Briefly covers aspects of modern computer architecture, such as parallel processing and reduced instruction set computers. Prereqs., ECEN 2120 and 3100. Same as ECEN 4593.

CSCI 4753-3. Computer Performance Modeling. Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization, and analysis of data; design of experiments; simulation; and queuing theory and queuing network models. Prereq., CSCI 3753 or equivalent, and second-semester calculus. Recommended prereq., a course in statistics. Same as CSCI 5753 and ECEN 4753/5753.

CSCI 5273-3. Network Systems. Same as CSCI 4273.

CSCI 5473-3. Applied Operating Systems. Examines design and implementation of contemporary operating systems. Significant laboratory component applies practice with OS use, analysis, and internal design. Topics include OS organization and structure, process and thread management, memory management, file management, device management, network and distributed systems, and modern runtime systems. Prereq., two years programming and instructor consent.

CSCI 5573-3. Advanced Operating Systems. Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability, and Internet services. Prereqs., CSCI 3753, 4593, equivalent undergraduate coursework in operating systems and computer architecture, or instructor consent. Same as ECEN 5573.

CSCI 5593-3. Advanced Computer Architecture. Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a machine and the design of cache memory systems. Also studies current and historically important computer architectures. Prereq., CSCI 4593 or instructor consent. Same as ECEN 5593.

CSCI 5673-3. Distributed Systems. Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics, and social issues. Recommended prereqs., CSCI 5573 or a course in computer networks. Same as ECEN 5673.

CSCI 5753-3. Computer Performance Modeling. Same as CSCI 4753.

CSCI 7123-3. Topics in Operating Systems. Topics selected by instructor. Possible topics are system design, measurement and evaluation, simulation, mathematical modeling, and parallelism. Prereq., CSCI 5573.

CSCI 7143-3. Topics in Computer Systems. Topics selected by instructor. Possible topics are online systems, multiprocessing, microprogramming, architecture, data communications, and computing networks. May be repeated up to 6 total credit hours. Instructor consent required.

Theory of Computation

CSCI 2824-3. Discrete Structures. Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science. Prereq., CSCI 2270.

CSCI 3104-4. Algorithms. Covers advanced data structures, computational geometry, cryptography, dynamic programming, greedy algorithms, divide-and-conquer, graph algorithms (e.g., depth-first search), network algorithms (e.g., shortest paths), approximation algorithms. Prereqs., CSCI 2824 and two semesters of calculus.

CSCI 3434-3. Theory of Computation. Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions. Prereq., CSCI 3104 and 3155.

CSCI 4314-3. Algorithms for Molecular Biology. Surveys combinatorial algorithms used to understand DNA, RNA, and proteins. Introduces students to methods used to process genomic data. Topics covered include a review of algorithms and molecular biology, sequence analysis, RNA and protein structure analysis, and comparative genomics. Students will get hands-on experience processing recent genomic data. Prereqs., CSCI 2270 and CSCI 3104, or CHEM 4711, or MCDB 3500 or IPHY 4200. Same as CSCI 5314 and MCDB 4314.

CSCI 5314-3. Algorithms for Molecular Biology. Same as CSCI 4314 and MCDB 5314.

CSCI 5444-3. Introduction to Theory of Computation. Reviews regular expressions and finite automata. Studies Turing machines and equivalent models of computation, the Chomsky hierarchy, context-free grammars, push-down automata, and computability. Prereq., graduate standing or instructor consent.

CSCI 5454-3. Design and Analysis of Algorithms. Techniques for algorithm design, analysis of correctness and efficiency; divide and conquer, dynamic programming, etc. Advanced data structures, algorithms in graph theory, geometry, Vlsi, linear algebra, etc. Lower bounds, Np-completeness, intractability. Prereqs., CSCI 2270 or equivalent.

CSCI 5654-3. Linear Programming. Presents algorithms, simplex, and modifications. Examines theory—duality and complementary slackness. Involves network flow algorithms. Introduces integer programming. Prereq., linear algebra.

CSCI 5714-3. Formal Languages. Explores context-free languages: pumping lemma and variants, closure properties, and decision properties. Involves parsing algorithms, including general and special languages, e.g., LR. Additional topics chosen by instructor. Prereq., CSCI 5444 or instructor consent.

CSCI 6454-3. Advanced Algorithms. Topics include matching and network flows, matroids, computational geometry, parallel computation (PRAM, hypercube, mesh). Also includes Vlsi, database theory, distributed computation, cryptography, robotics, scheduling, probabilistic algorithms, approximation algorithms, average case, and amortized analysis, time permitting. Prereq., CSCI 5454.

CSCI 7154-3. Topics in Theory of Computation. Selected topics of current interest in theory of computation. Prereq., CSCI 5454.

Programming Languages

CSCI 3155-4. Principles of Programming Languages. Study fundamental concepts on which programming of languages are based, and execution models supporting them. Topics include values, variables, bindings, type systems, control structures, exceptions, concurrency, and modularity. Learn how to select a

language and to adapt to a new language. Prereqs., CSCI 2270 and one of CSCI 2400 or ECEN 2120.

CSCI 4555-3. Compiler Construction. Introduces the basic techniques used in translating programming languages: scanning, parsing, definition table management, operator identification and coercion, code selection and register allocation, error recovery. Students build a complete compiler for a simple language. Prereqs., CSCI 2824 or ECEN 3703 and CSCI 2400 or ECEN 2120. Same as ECEN 4553 and CSCI 5525.

CSCI 5525-3. Compiler Construction. Offers practical experience using state-of-the-art CAD tools on high-performance workstations. Provides skills needed to rapidly create little languages for specific problem domains and familiarizes students with automated software development. Prereqs., CSCI 2824 or ECEN 3703 and CSCI 2400 or ECEN 2120. Same as ECEN 5523 and CSCI 4555.

CSCI 5535-3. Fundamental Concepts of Programming Languages. Considers concepts common to a variety of programming languages—how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines. Prereq., CSCI 3155, or instructor consent. Same as ECEN 5533.

CSCI 7135-3. Topics in Programming Languages. Topics selected by instructor. Possible topics are syntax, semantics, metacompilers, compiler design, and translator writing systems. Prereq., instructor consent.

Numerical Computation

CSCI 3656-3. Numerical Computation. Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Topics include floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration. Prereqs., two semesters of calculus, linear algebra, and either CSCI 1200 or 1300.

CSCI 4446-3. Chaotic Dynamics. Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension, and Lyapunov exponents. Prereqs., two semesters calculus, CSCI 1200, 1300 or equivalent, and PHYS 1110. Recommended prereqs., PHYS 1120, CSCI 3656, and MATH 3130. Same as CSCI 5446 and ECEN 4423.

CSCI 4576-4. High-Performance Scientific Computing. Introduces computing systems, software, and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence. Recommended prereq., CSCI 3656. Same as CSCI 5576.

CSCI 4586-4. High-Performance Scientific Computing 2. Introduces computing systems, software, and methods to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. Second course in a two-semester sequence. Prereq., CSCI 4576.

CSCI 5446-3. Chaotic Dynamics. Same as CSCI 4446 and ECEN 5423.

CSCI 5576-4. High-Performance Scientific Computing. Same as CSCI 4576.

CSCI 5606-3. Principles of Numerical Computation. Highlights computer arithmetic, solution of linear systems, least-squares approximations, nonlinear algebraic equations, interpolation, and quadrature. Prereqs., CSCI 3656 and three semesters of calculus, or equivalent.

CSCI 5636-3. Numerical Solution of Partial Differential Equations. Focuses on finite difference solution for partial differential equations, methods of SoR, ADI, conjugate gradients, finite element method, nonlinear problems, and applications. Prereqs., CSCI 5606.

CSCI 5646-3. Numerical Linear Algebra. Offers direct and iterative solutions of linear systems. Also covers eigen value and eigenvector calculations, error analysis, and reduction by orthogonal transformation. Prereqs., CSCI 5606.

CSCI 6676-3. Numerical Methods for Unconstrained Optimization. Looks at modern computational methods for solution of unconstrained optimization problems, nonlinear leastsquares, and systems of nonlinear equations. Techniques for building algorithms to solve problems with special structure. Prereq., CSCI 5606.

CSCI 6686-3. Numerical Methods for Constrained Optimization. Covers computational methods for constrained optimization. Topics include basic theory, methods for quadratic programming, active set strategies for linear constraints, and penalty and successive quadratic programming methods for nonlinearly constrained problems. Prereq., CSCI 5606.

CSCI 7176-3. Topics in Numerical Computation. Topics selected by instructor. Possible topics are numerical linear algebra, solution of differential equations, nonlinear algebra and optimization, data fitting, linear and nonlinear programming, and solution of large problems. Prereq., instructor consent.

Database Systems

CSCI 3287-3. Database and Information Systems. Surveys data management, including file systems, database management systems design, physical data organizations, data models, query languages, concurrency, and database protection. Prereq., CSCI 3104.

CSCI 4317-3. Genome Databases: Mining and Management. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/SQL scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure. Prereqs., MCDB 3500, CSCI 3104, or CHEM 4711; coreq., CSCI 2270. Same as CSCI 5317. Credit not granted for this course and CHEM 4621 or MCDB 4621.

CSCI 5317-3. Genome Databases: Mining and Management. Same as CSCI 4317. Credit not granted for this course and CHEM 5621 or MCDB 5621.

CSCI 5417-3. Information Retrieval Systems. Addresses practical issues in the design, implementation and analysis of modern information retrieval systems. The major focus is on Web-based applications including ad hoc retrieval, classification, and clustering. Introduces the use of open source retrieval systems, standard evaluation metrics and gold-standard evaluation collections. Formerly CSCI 7000.

CSCI 5817-3. Database Systems. Provides an advanced treatment of basic database concepts. Prereq., CSCI 2270. Recommended prereq., CSCI 3287 and 3753.

CSCI 7717-3. Topics in Database Systems. Studies topics such as distributed databases, database interfaces, data models, database theory, and performance measurement in depth. Prereq., CSCI 5817 or instructor consent.

Software Engineering

CSCI 3308-3. Software Engineering Methods and Tools. Focuses on software engineering methods and tools for application development, including design and system organization; using and creating reusable libraries; building, testing, and debugging; and performance evaluation. Prereq., CSCI 2270.

CSCI 4308-4. Software Engineering Project 1. Advanced practicum in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the software lifecycle. Students must take CSCI 4308 and 4318 contiguously, as the project spans the entire academic year. Prereqs., successful completion of a minimum of 36 credit hours of Computer Science Foundation, Track Foundation, Track Core, Computer Science electives, and WRTG 3030. Restricted to seniors.

CSCI 4318-4. Software Engineering Project 2. Second semester of an advanced practicum in computer science. Students must take CSCI 4308 and 4318 contiguously as the project spans the entire academic year. Prereq., CSCI 4308.

CSCI 4448-3. Object-Oriented Analysis and Design. An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design, and modeling notations. Students apply the techniques in analysis and design projects. Prereq., CSCI 3155 or expertise in one or more object-oriented programming languages, such as C++ or JAVA. Same as CSCI 5448.

CSCI 5448-3. Object-Oriented Analysis and Design. Same as CSCI 4448.

CSCI 5548-3. Software Engineering of Standalone Programs. Applies engineering principles to phases of software product development, project planning, requirements definition, design, implementation, validation, and maintenance.

Emphasizes practical methods for communicating and verifying definitions and designs—prototyping, inspections, and modeling. Includes relation to RTS and object-oriented programming. Prereqs., CSCI 1300, CSCI 2270, or instructor consent. Same as ECEN 5543.

CSCI 5608-3. Software Project Management. Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management, and legal issues. Gives special attention to problems unique to software projects. Prereqs., ECEN 4583, CSCI 5548 and 4318, or equivalent industrial experience. Same as ECEN 5603.

CSCI 5828-3. Foundations of Software Engineering. Explores techniques, languages, and tools for development and maintenance of software systems. Topics include specification languages, configuration modeling, testing techniques, process modeling, program annotations, and program proofs.

CSCI 6268-3. Foundations of Computer and Network Security. Studies methods to protect information, and the ability to process and move information, from theft, misuse, tampering, destruction, and unauthorized access. Introduces foundational topics of computer and network security, including security models, cryptography, and authentication protocols. Prereq., CSCI 5273. Same as TLEN 5550.

CSCI 7818-3. Topics in Software Engineering. Studies selected topics of current interest in software engineering. Prereq., instructor consent.

Graphics

CSCI 4229-3. Computer Graphics. Studies design, analysis, and implementation of computer graphics techniques. Topics include interactive techniques, 2D and 3D viewing, clipping, segmentation, translation, rotation, and projection. Also involves removal of hidden edges, shading, and color. Prereqs., knowledge of basic linear algebra and CSCI 2270. Same as CSCI 5229.

CSCI 4809-3. Computer Animation. Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out. CSCI 4809/5809 and ATLS 4809/5809 are all the same course.

CSCI 4839-3. User-Centered Design. Develops the skills and practices necessary to apply user-centered approaches to software requirements analysis, and the design and evaluation of computer applications. Restricted to sophomores/juniors/seniors. Same as CSCI 5839.

CSCI 5229-3. Computer Graphics. Same as CSCI 4229.

CSCI 5809-3. Computer Animation. Same as CSCI 4809 and ATLS 4809/5809.

CSCI 5839-3. User-Centered Design. Restricted to graduate students or instructor consent. Same as CSCI 4839.

CSCI 5919-3. Human-Computer Interaction: Survey and Synthesis. Examines interdisciplinary field of human-computer interaction through a comprehensive content and historical survey. Considers new trajectories of inquiry and how the field merges with others. "Social computing" is emphasized as a central topic. Students across disciplines will find the course foundational for understanding human-centered technology matters, including computer scientists; social scientists; and business and media arts students. Recommended prereq., CSCI 4839 or 5839.

Electrical Engineering and Telecommunications

See Telecommunications for a listing of courses.

Electrical, Computer, and Energy Engineering

General

ECEN 1100-1. Freshman Seminar. Introduces students to areas of emphasis with the ECE department through seminars presented by faculty and outside speakers. Emphasizes career opportunities, professional ethics and practices, history

of the profession, and resources for academic success. Several sessions promote team building and problem solving, and provide opportunities for freshmen to meet their classmates.

ECEN 1400-3. Introduction to Digital and Analog Electronics. Introduces fundamental concepts in electrical and computer engineering such as Ohm's Law, capacitors, LEDs and 7-segment displays, transformers and rectifiers, digital logic, Fourier decomposition, frequency analysis. Lab work exposes students to commonly used instrumentation. Includes a final project. Skills in wiring, soldering and wire-wrapping are developed. Coreq., APPM 1350.

ECEN 1500-3. Sustainable Energy. Explores how energy is created and used in today's society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders, of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required. Restricted to non-engineering majors. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

ECEN 1840 (1-6). Independent Study. Provides an opportunity for freshmen to do independent, creative work. Numbered ECEN 1840 through ECEN 1849. Prereq., instructor consent.

ECEN 2010 (1-5). Special Topics.

ECEN 2020 (1-5). Special Topics.

ECEN 2050 (1-5). Special Topics.

ECEN 2060 (1-5). Special Topics.

ECEN 2250-3. Introduction to Circuits and Electronics. Introduces linear circuit analysis and design, including extensive use of OP amps. Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors. Prereq., APPM 1360. Coreq., APPM 2360.

ECEN 2260-5. Circuits/Electronics 2. Continues basic circuit analysis of ECEN 2250: Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution. Prereq., ECEN 2250. Coreq., Electronics Design Laboratory.

ECEN 2350-3. Digital Logic. Covers the design and applications of digital logic circuits, including combinational and sequential logic circuits. Laboratory component introduces simulation and synthesis software and hands-on hardware design. Prereq., ECEN 1030 or CSCI 1300.

ECEN 2420-3. Wireless Electronics for Communication. Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. The course covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn through demos the practical basic properties of all needed components with an introduction to principles of operation. Prereqs., PHYS 1120, and APPM 1360 or MATH 2300. Restricted to EN majors.

ECEN 2830 (1-5). Special Topics.

ECEN 2840 (1-6). Independent Study. Offers an opportunity for sophomores to do independent, creative work. Numbered ECEN 2840 through ECEN 2849. Prereq., instructor consent.

ECEN 3010-3. Circuits and Electronics for Mechanical Engineers. Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers. Prereqs., APPM 2360 and PHYS 1140. Restricted to junior/senior MCEN majors. Same as MCEN 3017.

ECEN 3030-3. Electrical/Electronic Circuits for Nonmajors. For students not majoring in electrical engineering. Covers analysis of electric circuits by use of Ohm's law; network reduction; super position; node and loop analysis; Thevenin's and Norton's theorems; sinusoidal signals; phasors; power in AC circuits; transient response of simple circuits; operational amplifiers; logic circuits; and flip-flops. Prereq., APPM 2360. Restricted to nonmajors. Same as GEEN 3854.

ECEN 3070-3. Edges of Science. Examines the evidence for paranormal phenomena, reasons for skepticism, and physical models that could account for the

data. Reviews controversial scientific theories that overcame barriers to acceptance, and how worldviews shift. Considers the scientific method and ways uncontrolled factors might influence experiments. Develops skills in statistical analysis of data. Includes group projects testing for anomalous and parapsychological effects. Not accepted as a technical elective for engineering majors. Prereq., MATH 1011 or equivalent.

ECEN 3170-3. Energy Conversion 1. Introduces block diagrams, conventional/renewable energy sources, power electronics, magnetic circuits, transformers and power systems, forces/torques of electric machines. Employs a top-down approach to present applications first and then discuss components. Uses Pspice, Mathematica, MATLAB. Prereq., ECEN 3250.

ECEN 3250-3. Circuits/Electronics 3. Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog application. Prereq., ECEN 2260.

ECEN 3300-3. Linear Systems. Characterization of linear and time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems, which can be implemented using a modern digital signal processing framework, use difference equations, z-transforms and discrete time Fourier transforms for their analysis and design. Applications of linear systems include communications, signal processing, and control systems.

ECEN 3320-3. Semiconductor Devices. Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices. Prereq., ECEN 3250.

ECEN 3400-3. Electromagnetic Fields and Waves. Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied. Prereqs., APPM 2350, PHYS 1110, and ECEN 2260. Restricted to juniors/seniors.

ECEN 3410-3. Electromagnetic Waves and Transmission. Covers reflected and transmitted plane waves in layered media, Poynting's theorem of electromagnetic power, two-conductor transmission line theory and practice, Smith chart usage and impedance matching, and elements of antenna theory. Prereq., ECEN 3400. Restricted to juniors/seniors.

ECEN 3810-3. Introduction to Probability Theory. Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, optics, and portfolio analysis. Prereqs., APPM 2350 and 2360. Credit not granted for this course and MATH 4510 or APPM 3570.

ECEN 3840 (1-6). Independent Study. Offers an opportunity for juniors to do independent, creative work. Numbered ECEN 3840-3849. Prereq., instructor consent.

ECEN 3930-6. ECE Co-op Education. Participate in a cooperative education program working with a corporate or government entity. Individual assignments are arranged between the department and the outside employer. This course is offered only through Continuing Education. May be repeated up to 24 credit hours. Prereq., ECEN 2120, 2260, minimum GPA of 2.85 required. Restricted to sophomore, junior and senior EEN and ECEN majors.

ECEN 4000-3. Special Topics.

ECEN 4120-3. Neural Network Design. Introduces basic (artificial) neural network architectures and learning rules. Emphasizes mathematical analysis of these networks, methods of training them, and application to practical problems such as pattern recognition, signal processing, and control systems. Shows how to construct a network of "neurons" and train them to serve a useful function. Prereqs., APPM 2360 or MATH 3130, and CSCI 1300 or equivalent. Same as ECEN 5120.

ECEN 4610-3. Capstone Laboratory. Hands-on laboratory experience for teams of 3-5 members in the systematic proposal, design, build, integration, test, and documentation of an electronic/ computer based system. The result will be a reliably operating, stand-alone analog/digital system, with publication quality technical documentation. Prereq., ECEN 2120, 3100, 3250, 3300, 3400, 3810, plus ECEN 4593 for ECEN majors. Restricted to seniors.

ECEN 4840 (1-6). Independent Study. Offers an opportunity for seniors to do independent, creative work. Numbered ECEN 4840-4849. Prereq., instructor consent.

ECEN 5120-3. Neural Network Design. Same as ECEN 4120.

ECEN 5830-3. Special Topics.

ECEN 5840 (1-6). Independent Study. Offers an opportunity for students to do independent, creative work at the master's level. Numbered ECEN 5840-5849. Prereq., advisor consent.

ECEN 6800-3. Master of Engineering Report.

ECEN 6940-1. Master's Degree Candidate. Numbered ECEN 6940-6949.

ECEN 6950 (1-6). Master's Thesis.

ECEN 7840 (1-6). Independent Study. Offers an opportunity for students to do independent, creative work at the doctoral level. Numbered ECEN 7840-7849. Prereq., advisor consent.

ECEN 8990 (1-10). Doctoral Thesis.

Bioengineering

ECEN 4001 (1-4). Special Topics. Credit and subject matter to be arranged. Numbered ECEN 4001-4049. Prerequisites vary.

ECEN 4011 (1-4). Special Topics. Same as ECEN 5011.

ECEN 4021 (1-4). Special Topics.

ECEN 4811-3. Neural Signals and Functional Brain Imaging. Explores bioelectric and metabolic signals generated by the nervous system from two standpoints: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation, and functional magnetic resonance imaging. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ECEN 5811 and ASEN 4216.

ECEN 4821-3. Neural Systems and Physiological Control. A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ECEN 5821 and ASEN 4426/5426.

ECEN 5011 (1-4). Special Topics. Same as ECEN 4011.

ECEN 5021 (1-4). Special Topics.

ECEN 5032-3. Special Topics.

ECEN 5811-3. Neural Signals and Functional Brain Imaging. Same as ECEN 4811 and ASEN 4216.

ECEN 5821-3. Neural Systems and Physiological Control. Same as ECEN 4821 and ASEN 4426/5426.

ECEN 5831-3. Brains, Minds, and Computers. Same as ECEN 4831, and ASEN 4436/5436.

Communications

ECEN 3002 (3-5). Special Topics.

ECEN 4002 (1-4). Special Topics.

ECEN 4012 (1-4). Special Topics.

ECEN 4242-3. Communication Theory. Covers modern digital and analog communication systems, Fourier analysis of signals and systems, signal transmission, amplitude modulation, angle modulation, digital communication systems, and behavior of communication systems in the presence of noise, including both analog and digital systems. Prereqs., ECEN 3300 and ECEN 3810 or equivalent.

ECEN 4532-3. Digital Signal Processing Laboratory. Develops experience in code development, debugging, and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects, and frequency domain techniques based on the Fast Fourier Transform. Prereq., ECEN 3300. Coreq., ECEN 4632. Same as ECEN 5532.

ECEN 4593-3. Computer Organization. Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design,

control logic, memory design and caches, simple pipelining, I/O, and peripheral devices. Briefly covers aspects of modern computer architecture, such as multi-core processors and cache coherence for these. Prereq., ECEN 2350, and ECEN 3350 or CSCI 2400. Same as CSCI 4593.

ECEN 4632-3. Introduction to Digital Filtering. Covers both the analysis and design of FIR and IIR digital filters. Discusses implementations in both software and hardware. Emphasizes use of the FFT as an analysis tool. Includes examples in speech processing, noise canceling, and communications. Prereq., ECEN 3300. Restricted to seniors.

ECEN 4652-2. Communication Laboratory. Involves laboratory experiments demonstrating material taught in ECEN 4242. Uses spectrum analysis to study baseband signals and signal processors. Topics include noise, AM, FM, PM, sampling, quantizing/encoding, TDM, FDM, equalizers, and a complete communication system. Prereq. or coreq., ECEN 4242.

ECEN 5012-3. Special Topics.

ECEN 5532-3. Digital Signal Processing Laboratory. Same as ECEN 4532.

ECEN 5612-3. Noise and Random Processes. Reviews probability theory, convergence and probability bounds, multivariable normal theory, sequences of random variables and stochastic processes, Bernoulli and Poisson processes, wide-sense stationary processes, and correlation functions and power spectra. Also includes linear systems with random inputs and Gauss-Markov processes, first- and second-order properties of Arma processes, and Markov chains. Prereqs., ECEN 3300 and 3810 or MATH 4510.

ECEN 5622-3. Information Theory and Coding. Entropy rates of information sources, fundamental limits of data compression, Huffman and arithmetic codes; mutual information, fundamental limits of information transmission over noisy communication channels with/without feedback. Selected topics in information storage, lossy data compression, and network information theory. Prereqs., ECEN 3810 or equivalent, or instructor consent.

ECEN 5632-3. Theory and Application of Digital Filtering. Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. The course covers such topics as characterization of linear discrete-time circuits by unit pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse response filters, frequency transformations, study of optimized filters for deterministic signals.

ECEN 5652-3. Detection and Extraction of Signals from Noise. Introduces detection, estimation, and time series analysis. Topics include hypothesis testing, detection of known form and random signals, least squares parameter estimation, maximum likelihood theory, minimum mean-squared error estimation, Kalman-Wiener filtering, prediction in stationary time series, and modal analysis. Applications include studies in communications, control, and experimental modeling. Prereq., ECEN 5612.

ECEN 5672-3. Digital Image Processing. Course objective is to present the fundamental techniques available for image representation and compression (e.g., wavelets), filtering (e.g., Wiener and nonlinear filter), and segmentation (e.g., anisotropic diffusion). Prereq., ECEN 5632 or instructor consent.

ECEN 5682-3. Theory and Practice of Error Control Codes. Block and convolutional codes for reliable transmission of digital data over unreliable noisy channels. Algebraic and dsp characterizations of cyclic codes such as Bch/Rs codes. Decoding algorithms for block codes and the Viterbi algorithm. Graph codes and iterative decoding. Prereq., ECEN 3300.

ECEN 5692-3. Principles of Digital Communication. Techniques for efficient and reliable transmission of information over bandwidth and power constrained communication channels; digital modulation methods, power spectral density calculations, optimum receiver principles, error rate analysis, channel coding potential in wired/wireless media, trellis coded modulation, and equalization. Prereqs., ECEN 3300 and 5612 or equivalents. Recommended prereqs., ECEN 5622 and 5632.

Computer and Digital Systems

ECEN 2703-3. Discrete Mathematics for Computer Engineers. Emphasizes elements of discrete mathematics appropriate for computer engineering. Topics: logic, proof techniques, algorithms, complexity, relations, and graph theory. Prereqs., ECEN 1030/CSCI 1300 and APPM 1360.

ECEN 3003 (3-5). Special Topics.

ECEN 4013 (1-4). Special Topics.

ECEN 4023 (1-4). Special Topics. Same as ECEN 5023.

ECEN 4053 (1-4). Special Topics. Same as ECEN 5053.

ECEN 4423-3. Chaotic Dynamics. Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension, and Lyapunov exponents. Prereqs., two semesters calculus, ECEN 1030 or CSCI 1300 or equivalent, and PHYS 1110. Recommended prereqs., PHYS 1120, CSCI 3656, and MATH 3130. Same as CSCI 4446 and ECEN 5423.

ECEN 4553-3. Compiler Construction. Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language. Prereqs., ECEN 2703 and ECEN 3350. Same as CSCI 4555 and ECEN 5523.

ECEN 4583-3. Software System Development. Lectures deal with techniques for product requirements definition, project planning, coding, verification, validation, performance evaluation, and maintenance of medium-scale (2-3000 line) systems. Primary emphasis is on practical application of these techniques to a specified software project. Students work in teams to produce appropriate documents for each phase and are responsible for project completion according to specification and schedule. Course project is written in C on a Unix look-alike system; prior knowledge of C or Unix is not required. Prereq., CSCI 2270 or instructor consent.

ECEN 4613-3. Embedded System Design. Introduces system hardware and firmware design for embedded applications. Students independently design and develop a hardware platform encompassing a microcontroller and peripherals. Firmware is developed in C and assembly. A significant final project is designed, developed, documented, and presented. Prereqs., ECEN 2350 and 3350, or instructor consent. Recommended prereqs., ECEN 3250 and 4593. Same as ECEN 5613.

ECEN 4623-3. Real-Time Embedded Systems. Design and build a microprocessor-based embedded system application requiring integration of sensor/actuator devices, a real-time operating system and application firmware and software. Real-time rate monotonic theory and embedded architecture are covered. Prereq., ECEN 2350 and ECEN 3350, or instructor consent. Recommended prereq., ECEN 4613. Same as ECEN 5623.

ECEN 4633-3. Hybrid Embedded Systems. Introduces system hardware and design techniques for embedded and hybrid reconfigurable systems. Intended for those interested in developing projects using hardware description languages to build application-specific computing systems. Industry standards are used for design, development, and debugging. Prereqs., ECEN 2350, 3350, and 4593, or equivalent. Same as ECEN 5633.

ECEN 4643-3. SW Engineering of Concurrent Systems. Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support. Prereq., ECEN 4583 or 5543. Restricted to seniors (ECEN 4643) and graduate students (ECEN 5643) only. Same as ECEN 5643.

ECEN 4653-3. Real-Time Digital Media. Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions. Prereqs., ECEN 1030 or CSCI 1300, and CSCI 3753 or equivalent. Restricted to engineering students. Same as ECEN 5653.

ECEN 4743-3. SW Engineering of Distributed Systems. Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis,

design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures. Prereq., ECEN 4583 or 5543 or CSCI 5548. Recommended prereq., ECEN 5643. Restricted to seniors (ECEN 4743) and graduate students (ECEN 5743) only. Same as ECEN 5743.

ECEN 4753-3. Computer Performance Modeling. Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets, and simulation (including parallel processing techniques). Prereq., CSCI 3753 or equivalent and second-semester calculus. Recommended prereq., a course in statistics. Same as CSCI 4753, 5753, and ECEN 5753.

ECEN 5023 (1-4). Special Topics. Same as ECEN 4023.

ECEN 5053 (1-4). Special Topics. Same as ECEN 4053.

ECEN 5423-3. Chaotic Dynamics. Same as ECEN 4423 and CSCI 5446.

ECEN 5503-3. Computer Systems Design and Architecture. Covers digital logic circuits, assembly language programming, and gate-level computer design and architecture. Also discusses computer arithmetic algorithms, I/O, peripheral device performance, networking, and the Internet. Limited to graduate students. For ECE/CS majors with nontraditional backgrounds.

ECEN 5523-3. Compiler Construction. Same as ECEN 4553 and CSCI 5525.

ECEN 5533-3. Fundamental Concepts of Programming Languages. Considers concepts common to a variety of programming languages—how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines. Prereq., CSCI 3155 or instructor consent. Same as CSCI 5535.

ECEN 5543-3. Software Engineering of Standalone Programs. Applies engineering principles to phases of software product development, project planning, requirements definition, design, design patterns, validation, and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs—prototyping, inspections, and modeling (primarily UML). Includes relation to embedded systems and object-oriented design. Prereqs., ECEN 1030/CSCI 1300, CSCI 2270, or instructor consent. Same as CSCI 5548.

ECEN 5553-3. Parallel Processing. Examines a range of topics involved in using parallel operations to improve computational performance. Discusses parallel architectures, parallel algorithms and parallel programming languages. Architectures covered include vector computers, multiprocessors, network computers, and data flow machines. Prereq., background in computer organization, introduction to programming languages, elementary numerical analysis, ECEN 4593 and CSCI 3656, or instructor consent. Same as CSCI 5551.

ECEN 5573-3. Advanced Operating Systems. Same as CSCI 5573.

ECEN 5583-3. Artificial Intelligence. Prereq., CSCI 3245 or equivalent. Same as CSCI 5582.

ECEN 5593-3. Advanced Computer Architecture. Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems for such systems, and architectural features required for multi-core processor designs. Also studies current and historically important computer architectures. Prereq., ECEN 4593 or instructor consent. Same as CSCI 5593.

ECEN 5603-3. Software Project Management. Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management, and legal issues. Gives special attention to problems unique to software projects. Prereqs., ECEN 4583, 5543, and CSCI 4318, or equivalent industrial experience. Same as CSCI 5608 and EMEN 5031.

ECEN 5613-3. Embedded System Design. Same as ECEN 4613.

ECEN 5623-3. Real-Time Embedded Systems. Same as ECEN 4623.

ECEN 5633-3. Hybrid Embedded Systems. Same as ECEN 4633.

ECEN 5643-3. SW Engineering of Concurrent Systems. Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include

performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support. Prereq., ECEN 4583 or 5543. Restricted to seniors (ECEN 4643) and graduate students (ECEN 5643) only. Same as ECEN 4643.

ECEN 5653-3. Real-Time Digital Media. Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions. Prereqs., ECEN 1030 or CSCI 1300, and CSCI 3753 or equivalent. Restricted to engineering students. Same as ECEN 4653.

ECEN 5673-3. Distributed Systems. Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics, and social issues. Recommended prereq., CSCI 5573 or a course in computer networks. Same as CSCI 5673.

ECEN 5743-3. SW Engineering of Distributed Systems. Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures. Prereq., ECEN 4583 or 5543 or CSCI 5548. Recommended prereq., ECEN 5643. Restricted to seniors (ECEN 4743) and graduate students (ECEN 5743) only. Same as ECEN 4743.

ECEN 5753-3. Computer Performance Modeling. Same as ECEN 4753 and CSCI 4753/5753.

Electromagnetics

ECEN 3004 (3-5). Special Topics.

ECEN 4024 (1-4). Special Topics. Same as ECEN 5024.

ECEN 4224-3. High Speed Digital Design. Covers fundamentals of high-speed properties of: logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators. Prereq., ECEN 3400. Recommended prereq., ECEN 3410. Same as ECEN 5224.

ECEN 4324-3. Fundamentals of Microsystem Packaging. Introduction to the fundamentals of microsystem packaging. This is a seminar style course which surveys topics in microsystem packaging such as: electrical package design, design for reliability, thermal management, multichip packaging, IC Assembly, sealing and encapsulation, and board assembly. Coreq., ECEN 3410 or instructor consent. Restricted to seniors. Same as ECEN 5324.

ECEN 4634-3. Microwave and RF Laboratory. Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410 (Electromagnetic Waves and Transmission): electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar, and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications. Prereq., ECEN 3410. Restricted to juniors/seniors in Engineering. Same as ECEN 5634.

ECEN 5024 (1-4). Special Topics. Same as ECEN 4024.

ECEN 5104-3. Computer-Aided Microwave Circuit Design. Emphasizes the design of strip-line and microstrip circuits, using a CAD package. Discusses design of impedance transformers, amplifiers, switches, phase-shifters, etc. Assignments include design of typical circuits and their analysis using a microwave circuit analysis program. Laboratory includes measurements using a network analyzer facility on a typical circuit designed and fabricated by students. Prereq., ECEN 3410.

ECEN 5114-3. Waveguides and Transmission Lines. Intermediate course dealing with guided-wave systems at HF, microwave, and optical frequencies. Modern waveguiding structures, including circular metallic waveguides, microstrip

transmission lines, and optical waveguides are treated. Additional material may include waveguide losses, excitation of waveguides, microwave network theory, coupled-mode theory, resonators, and pulse propagation in waveguides. Prereq., ECEN 3410.

ECEN 5134-3. Electromagnetic Radiation and Antennas. Covers elementary sources and antennas, cylindrical wire antennas, loop antennas, radiation patterns and antenna gain, aperture sources such as horns and dishes, specialized antennas such as microstrip patches, linear and circular arrays, mutual coupling and ground effects, ray and numerical formulations, transmission formulas, and antenna applications. Prereq., ECEN 3410.

ECEN 5154-3. Computational Electromagnetics. Provides a computational study of microwave circuits and antennas, using finite-difference, finite-element, and moment methods. Requires students to develop algorithms, write and execute programs, and prepare reports analyzing results. Circuits include waveguides, microstrip lines, and center-fed dipole antennas. Prereq., ECEN 3410.

ECEN 5224-3. High Speed Digital Design. Same as ECEN 4224.

ECEN 5254-3. Remote Sensing Signals and Systems. Examines passive and active techniques for remote sensing with emphasis on fundamental noise and detection issues from radio to optical frequencies. Emphasis is placed on electromagnetic wave detection, statistical signal and noise analysis, remote sensing system architecture, and hardware for remote sensing systems. Systems studied include radiometers, radars (real and synthetic aperture), interferometers, and lidars. Applications to detection and surveillance, Earth remote sensing, astronomy, and imaging systems are covered. Prereqs., ECEN 3300 and 3400, or instructor consent.

ECEN 5264-3. Electromagnetic Absorption, Scattering, and Propagation. Electromagnetic waves in communication, navigation, and remote sensing systems from radio to optical frequencies, including propagation in deterministic and random media. Topics include absorption and refraction by gases, discrete scattering by precipitation, clouds, and aerosols, continuous scattering by refractivity fluctuations, earth-space propagation and Faraday rotation in plasmas, and radiative transfer theory.

ECEN 5274-3. Radar Science and Techniques. Studies atmospheric radar fundamentals. Examines scattering by precipitation and atmospheric turbulence; long-wavelength radars and the dynamics of the middle and upper atmosphere; design of meteorological and clear-air radars; profiling tropospheric winds, temperature, and humidity by radar and radiometry; and ionospheric sounding using ionosondes and incoherent-scatter radars. Prereq., ECEN 5254 or instructor consent.

ECEN 5324-3. Fundamentals of Microsystem Packaging. Same as ECEN 4324.

ECEN 5634-3. Graduate Microwave and RF Laboratory. Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410 (Electromagnetic Waves and Transmission): electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar, and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications. Prereq., ECEN 3410. Restricted to graduate students. Same as ECEN 4634.

ECEN 6144-3. Electromagnetic Boundary Problems. Provides mathematical and physical fundamentals necessary for the systematic analysis of electromagnetic fields problems. Covers basic properties of Maxwell's equations, potentials and jump conditions; scattering and diffraction by canonical structures; Green's functions, integral equations and approximate methods. Requires some maturity in electromagnetics. Prereq., ECEN 5114 or 5134 or instructor consent.

Nanostructures and Devices

ECEN 4375-3. Microstructures Laboratory. Offers experience in monolithic silicon integrated circuit fabrication techniques, including layout, pattern compiling and generation, mask making, oxidation, photolithography, diffusion, implantation, metallization, bonding, process analysis, and testing. Includes design project. Prereq., ECEN 3320. Same as ECEN 5375.

ECEN 4555-3. Principles of Energy Systems and Devices. Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Course provides a foundation in statistical thermodynam-

ics, and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries and ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling, and potentially harvesting zero-point energy from the vacuum. Prereq., ECEN 3810. Prereq. or coreq., PHYS 2130 or 2170 or instructor consent. Same as ECEN 5555.

ECEN 4645-3. Introduction to Optical Electronics. Introduces lasers, Gaussian optics, modulators, nonlinear optics, optical detectors, and other related devices. Prereq., ECEN 3410. Restricted to juniors and seniors. Same as ECEN 5645.

ECEN 5005 (1-4). Special Topics.

ECEN 5345-3. Introduction to Solid State Physics. Course provides an introduction to the electronic, photonic and phononic properties of solid state materials and devices. Covers optical constants, free electron gas, plasmons, energy bands, semiconductors and doping, excitons, quantum wells, phonons, and electrooptical effects. The course makes use of quantum mechanical methods. Prereqs., ECEN 3400 and basic quantum mechanics or instructor consent.

ECEN 5355-3. Principles of Electronic Devices 1. Relates performance and limitations of solid state devices to their structures and technology. Examines semiconductor physics and technology. Includes Pn-junction, Mos, and optoelectronic devices. For both advance circuit and device engineers. Prereq., ECEN 3320 or instructor consent.

ECEN 5365-3. Semiconductor Materials and Devices 1. Includes an introduction to time-independent quantum mechanics and perturbation theory, tunneling, application to quantum-well electronic and optical devices, electrons in a crystalline solid, Bloch's theorem, energy bands and energy gaps, the effective mass approximation, a survey of energy bands for real crystals: Si, Ge, GaAs, InP, AlGaAs, etc., band structure engineering, and the electrical and optical properties of compound semiconductors. Prereq., ECEN 3120, and ECEN 4345 or 5345.

ECEN 5375-3. Microstructures Laboratory. Same as ECEN 4375.

ECEN 5555-3. Principles of Energy Systems and Devices. Same as ECEN 4555.

ECEN 5645-3. Introduction to Optical Electronics. Same as ECEN 4645.

Optics

ECEN 4006 (1-4). Special Topics.

ECEN 4016 (1-4). Special Topics.

ECEN 4106-3. Photonics. Deals with the generation, transmission, modification and detection of light. Applications include fiber optics communications, data storage, sensing, and imaging. Leads to understanding of fundamental physical principles used in the analysis and design of modern photonic systems. Prereqs., ECEN 3400. Coreq., ECEN 3300. Restricted to seniors.

ECEN 4116-3. Introduction to Optical Communications. Given data rates, distance, reliability or bit error rates, the information required to specify the type of fiber, the source, the wave length, type of modulation, repeater or optical amplifiers, and detectors will be presented. Prereq., ECEN 3400 or equivalent. Same as TLEN 5480.

ECEN 4606-3. Undergraduate Optics Laboratory. Introduces fundamental concepts, techniques, and technology of modern optical and photonic systems. Individual labs cover particular fields of optical technology, including light sources such as lasers and LEDs, interferometers, fiber-optic communications, photodetection, spectrometers, and holography. Practical skills such as how to align an optical system will also be emphasized. Prereq. ECEN 3400. Coreq. ECEN 4106 or equivalent.

ECEN 4616-3. Optoelectronic System Design. Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses, and telescopes. Prereq. ECEN 3400.

ECEN 5016 (1-4). Special Topics.

ECEN 5156-3. Physical Optics. Covers the application of Maxwell's equations to optical wave propagation in free space and in media. Topics include polarization, dispersion, geometrical optics, interference, partial coherence, and diffraction. Prereq. ECEN 3410.

ECEN 5166-3. Guided Wave Optics. Builds up the concepts necessary to understand guided wave optical systems. Topics include slab wave-guides, semicon-

ductor lasers, fiber optics, and integrated optics. Prereqs., ECEN 4645 or 5645, and ECEN 5156.

ECEN 5606-3. Optics Laboratory. Provides advanced training in experimental optics. Consists of optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers, and holograms, and experimentation of fiber optics and Fourier optics. Prereq., undergraduate optics course such as PHYS 4510. Same as PHYS 5606.

ECEN 5616-3. Optoelectronic System Design. Same as ECEN 4616.

ECEN 5626-3. Active Optical Devices. Analysis of active optical devices such as semiconductor laser, detector and flat panel display by clearly defining and interconnecting the fundamental physical mechanism, device design and operating principles and device performance. Recommended prereq., ECEN 5355.

ECEN 5696-3. Fourier Optics. Introduces a system level approach to the analysis and design of optical systems. Topics include holography, Fourier transform properties of lenses, two-dimensional convolution and correlation functions, spatial filtering, and optical computing techniques. Also covers coherent and incoherent imaging techniques, tomography, and synthetic aperture imaging. Prereqs., ECEN 3300 and 3410, or instructor consent.

ECEN 6016 (1-3). Special Topics.

Power

ECEN 4017 (1-4). Special Topics.

ECEN 4167-3. Energy Conversion 2. Studies the derivation of the dynamic equations of motion of electromechanical systems, linear and rotary motion machines based on variational principles and basic force laws. Looks at equivalent circuits in abc and dqo coordinates for AC and DC machines. Discusses conditions under which an electromagnetic torque can be produced. Applies theory to the most important modes of steady-state and transient operation of electrical energy converters. Prereq., ECEN 3170.

ECEN 4517-3. Power Electronics and Photovoltaic Power Systems Laboratory. Focuses on analysis, modeling, design, and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. The experimental projects involve design, fabrication, and testing of a solar power system. Prereq., ECEN 4797. Restricted to seniors. Same as ECEN 5517.

ECEN 4797-3. Introduction to Power Electronics. An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode, and transformer-isolated converters. AC modeling of converters using averaged methods, small-signal transfer functions, feedback loop design, and transformer design. Prereq., ECEN 3250. Restricted to junior and senior engineering majors. Same as ECEN 5797.

ECEN 4827-3. Analog IC Design. Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of DC biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers. Prereq., ECEN 3250. Same as ECEN 5827.

ECEN 5517-3. Power Electronics and Photovoltaic Power Systems Laboratory. Prereq., ECEN 5797. Same as ECEN 4517.

ECEN 5787-3. Power Quality Phenomena Power Systems. Single-time and periodic disturbances of power systems and their causes and effects on sensitive (electronic) end-use devices and power system components are studied and modeled. Measurement techniques of the impact of such disturbances (power quality phenomena) on devices as well as prevention and mitigating techniques are addressed. Prereq., ECEN 3170.

ECEN 5797-3. Introduction to Power Electronics. Same as ECEN 4797.

ECEN 5807-3. Modeling and Control of Power Electronic Systems. Studies modeling and control topics in power electronics. Averaged switch modeling of converters, computer simulation, AC modeling of the discontinuous conduction mode, the current programmed mode, null double injection techniques in linear circuits, input filter design, and low-harmonic rectifiers. Prereq., ECEN 5797.

ECEN 5817-3. Resonant and Soft-Switching Techniques in Power Electronics. Covers resonant converters and inverters, and soft switching; sinusoidal approximations in analysis of series, parallel, Lcc, and other resonant DC-DC and DC-AC converters; state-plane analysis of resonant circuits; switching transitions in hand-switched and soft-switched Pwm converters; zero-voltage switching techniques, including resonant, quasi resonant, zero voltage transition, and auxiliary switch circuits. Prereq., ECEN 5797 or instructor consent required.

ECEN 5827-3. Analog IC Design. Same as ECEN 4827.

ECEN 5837-3. Mixed-Signal IC Design Lab. Software laboratory course extends the concepts developed in ECEN 4827 to full design and layout of mixed analog and digital custom integrated circuits. Assignments explore implementation of analog to digital and digital to analog converters, and final project develops a full custom IC for a target application. Prereq., ECEN 5827.

Dynamical Systems and Control

ECEN 4018 (1-4). Special Topics.

ECEN 4028 (1-4). Special Topics.

ECEN 4138-3. Control Systems Analysis. Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Prereq., ECEN 3300, background in Laplace transforms, linear algebra, and ordinary differential equations. Restricted to juniors/seniors.

ECEN 4638-2. Control Systems Laboratory. Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing. Prereq., ECEN 3300. Coreq., ECEN 4138. Restricted to juniors/seniors in engineering.

ECEN 5008 (1-4). Special Topics.

ECEN 5018 (1-4). Special Topics.

ECEN 5028 (1-4). Special Topics.

ECEN 5418-3. Automatic Control Systems 1. Coverage of principles of control systems with Multiple Inputs and Multiple Outputs (MIMO). Topics include MIMO state-space theory, applications of the singular value decomposition (SVD), coprime factorization methods, frequency domain topics, and an introduction to H-infinity design. Prereqs., ECEN 3300, 4138, and 5448, or equivalents.

ECEN 5438-3. Robot Control. Provides a comprehensive treatment of the mathematical modeling of robot mechanisms and the analysis methods used to design control laws for these mechanisms. Prereqs., ECEN 4138 and PHYS 1110.

ECEN 5448-3. Advanced Linear Systems. Offers a state space approach to analysis and synthesis of linear systems, state transition matrix, controllability and observability, system transformation, minimal realization, and analysis and synthesis of multi-input and multi-output systems. Prereq., ECEN 3300 and 4138.

ECEN 5458-3. Sampled Data and Digital Control Systems. Provides an analysis and synthesis of discrete-time systems. Studies sampling theorem and sampling process characterization, z-transform theory and z-transfer function, and stability theory. Involves data converters (A/D and D/A), dead-beat design, and digital controller design. Prereqs., ECEN 3300 and 4138.

ECEN 7438-3. Theory of Nonlinear Systems. Nonlinear systems and control. Introduction to nonlinear phenomena: multiple equilibria, limit cycles, bifurcations, complex dynamical behavior. Planar dynamical systems, analysis using phase plane techniques. Input-output analysis and stability. Passivity. Lyapunov stability theory. Feedback linearization. Exploration of examples and applications. Prereq., ECEN 5448.

VLSI CAD Methods

ECEN 4009 (1-4). Special Topics.

ECEN 4049 (1-4). Special Topics.

ECEN 5049 (1-4). Special Topics.

ECEN 5139-3. Formal Verification of VLSI Systems. Covers two-level and multilevel minimization, optimization via expert systems, algebraic and Boolean decomposition, layout methodologies, state assignment, encoding and minimization, silicon compilation. Prereqs., ECEN 2703 and general proficiency in discrete mathematics and programming.

ECEN 6139-3. Logic Synthesis of VLSI Systems. Studies synthesis and optimization of sequential circuits, including retiming transformations and don't care sequences. Gives attention to hardware description languages and their application to finite state systems. Also includes synthesis for testability and performance, algorithms for test generation, formal verification of sequential systems, and synthesis of asynchronous circuits. Prereqs., ECEN 5129, 5139, and CSCI 5454.

ECEN 7849 (1-6). Independent Study. Offers an opportunity for students to do independent, creative work at the doctoral level. Numbered ECEN 7840–7849. Prereq., advisor consent.

Engineering Honors

EHON 1151-3. Critical Encounters. Explores critical, literary and philosophical approaches to the following related problems: 1) how we organize knowledge and construct meaning, and 2) how we locate a sense of self as both individuals and members of various groups amidst the resources and demands of competing interpretations, traditions challenges and circumstances. Prereq., honors standing or instructor consent required.

EHON 1500-1. Honors Reading Group. Faculty led reading seminars, focusing on specific text or texts chosen by the faculty. Special attention will be paid to group formation and the process of collaborative learning. Prereq., honors standing or instructor consent.

EHON 4051-1. Dimensions of Leadership. Explores the many dimensions of leadership that exceed technical knowledge: the ethical, societal, cultural, interpersonal, and personal. Through seminars, workshops and exposure to leaders, students will reflect upon their engineering education in light of the multifaceted demands of effective leadership and their own personal career goals. Students will take an active role in shaping the course. Prereq., junior standing; honors standing or instructor consent. Repeatable for credit up to 3 credit hours.

Engineering Management

EMEN 4030-3. Project Management Systems. Acquaints the student with multidisciplinary aspects of project management, including the relationship between schedule, project cost, and performance. Uses qualitative and quantitative tools to facilitate project management skills. Restricted to juniors and seniors.

EMEN 4050-3. Leadership and Professional Skills. Provides basic concepts of leadership and the essential skills required to become an effective leader/manager. Students will be provided the opportunity for personal development through exercises in communication and leadership effectiveness. Other major topics include leadership styles, managing commitments, change management, negotiation, conflict resolution, organizational culture, emotional intelligence, team dynamics, and business ethics. Restricted to juniors and seniors.

EMEN 4100-3. Business Methods and Economics for Engineers. Covers cost concepts, financial statements, and the company economic environment. Includes concepts and methods of analysis of the time value of money, comparison of project alternatives before and after taxes, cash flows, replacement analysis, risk management, and financial cash statements. Restricted to juniors and seniors.

EMEN 4800-3. Technology Ventures and Marketing. Acquiring basic management and marketing skills is essential to successfully participating in technology venture development whether in a start-up company or Fortune 500 company. In the course, students learn to evaluate a technology, consider its viability as product, and learn the basic tenets of marketing with emphasis on developing a technology innovation into a commercially successful product with a mind on customer development as a key aspect of product development.

EMEN 4825-3. Entrepreneurial Business Plan Preparation. Instructs students in the necessary elements of a business plan and how to prepare a complete well-written plan for an entrepreneurial business venture. Students work in interdisciplinary business-engineering five-person teams to create a business concept and take it through to business plan completion. Same as ESBM 4830.

EMEN 4830 (1-3). Special Topics.

EMEN 5000-3. Engineering Analysis. Provides an introduction to the logical and systematic thinking required to evaluate and solve typical engineering problems in mechanics, electricity, thermodynamics, fluid mechanics, and light. Emphasizes understanding the physical behavior of systems and applying the principles and laws from the physical sciences to analyze these systems. Required for nonengineers seeking admission to the graduate technology management curriculum track. Not for degree credit.

EMEN 5005-3. Introduction to Applied Statistical Methods. Covers foundations for statistical reasoning and statistical applications. Topics include descriptive statistics, introduction to probability, random variables, discrete and continuous probability distributions, sampling theory and sampling distributions, statistical inference (point and interval estimation and hypothesis testing), and simple regression. All material taught is based upon case studies from business and industry. Not for degree credit.

EMEN 5010-3. Introduction to Engineering Management. Provides a general introduction to the principles and methods of technical management covering a variety of topics in leadership, strategic planning, product management, entrepreneurship, finance, value chains, management of R&D, and economic environments. Industry guest speakers provide real-life examples and applications. Required for all degree students.

EMEN 5020-3. Finance and Accounting for Engineering Managers. Provides the concepts and skills necessary to financially analyze project and assess financial performance and status of an organization. Includes the time value of money, comparison of alternatives, taxes, risk management, cash flow, and financial cash statements. Required for all degree students.

EMEN 5025-3. Entrepreneurial Finance for Engineers. Teaches students to prepare, interpret and use financial information, in the context of startup and early stage enterprises. Includes historical financial statements, budgets and the budgeting process, and the use of financial information in raising capital.

EMEN 5030-3. Project Management. Presents the basic skills required to manage a wide range of technical projects. Topics include selecting project alternatives, managing project teams, developing project plan elements, risk management, monitoring and controlling projects, and financial analysis of projects. Skills learned are applied to a representative project.

EMEN 5031-3. Software Project Management. Understand unique considerations of the software lifecycle that impact project management. Emphasize configuration management, code reviews, architectural influences, and quality assurance with automated testing. Explore Capability Maturity Model (CMM) and Unified Modeling Language (UML) impact on project success. Recommended prereq., some software development experience. Same as ECEN 5603.

EMEN 5032-3. Advanced Topics in Project Management. Covers advanced topics in project management from a systems view based on the Project Management Body of Knowledge (PMBOK); spans the entire project life cycle. Prereq., EMEN 5030 or equivalent.

EMEN 5040-3. Quality, Strategy, and Value Creation. Introduces business performance excellence (BPE) including history of Quality Sciences, Six Sigma, and Deming's Theory of Profound Knowledge. Addresses use of strategic planning, policy deployment, and Total Asset Utilization to exceed customer requirements and maximize profitability. Addresses topics strategically and tactically through case analysis, field study, and experiential learning. Prereq., EMEN 5005 or equivalent. Similar to OPIM 6030.

EMEN 5041-3. Advanced Topics in Value Creation. Studies methods designed to maximize excellence in business performance. Advanced study includes interactions with the customers and suppliers, integrated manufacturing, and meeting customer requirements while focusing on maximizing profitability. These characteristics are addressed both strategically and tactically through the use of case analysis, field study, and experiential learning for both the production and service sectors. Prereq., EMEN 5040. Recommended prereq., EMEN 5042.

EMEN 5042-3. Methods for Quality Improvement. In-depth investigation of the concepts, tools, and techniques used in the management and measurement of quality and productivity. Topics include basic statistics and probability; process variation; statistical process control charting and capability analysis for process,

product, and management systems; and an introduction to design of experiments (DOE) in business and industry. Prereq., EMEN 5040 or instructor consent.

EMEN 5043-3. Advanced Topics in Quality Systems/ Engineering. Advanced study of methods, tools, techniques, and systems associated with advanced quality applications. Includes a survey of advanced process control technologies, control schemes, and measurement system analysis. Prereq., EMEN 5042.

EMEN 5050-3. Leadership. Provides working engineers a background in leadership and management theory; enables students to develop practical skills in leading and managing through numerous exercises. Topics include authentic leadership, leadership styles, managing commitments, conflict resolution, change management, organizational culture, emotional intelligence, team dynamics, and business ethics. Required for all degree students. Prereq., EMEN 5010 or instructor consent. Same as TLEN 5050.

EMEN 5080-3. Ethical Decision-Making in Engineering Management. Provide students with the ability to recognize ethical issues and dilemmas affecting managers in the workplace; understand various models and practices offering solutions to these issues; and understand how to create a culture of ethics and integrity in supporting and/or building a profitable, healthy, and responsible organization. Restricted to seniors and graduate students only.

EMEN 5090-3. High Technology Marketing. Acquiring marketing know-how is essential for engineers interested in technology and product development. Students learn the basic tenets of marketing with emphasis on developing a technology innovation into a commercially successful product. Special attention given to customer development as a key aspect of product development. Course designed to be of interest to engineers in existing companies and startups. Highlighted will be in-depth discussions of marketing strategies for the high tech environment.

EMEN 5300-3. Management of Research and Development. Provides practical, tested tools to manage research and development in industry and in university and government laboratories. R&D strategies are emphasized, as are innovation and creativity concepts and techniques. R&D portfolio techniques are emphasized and are the basis for a team project.

EMEN 5400-3. Product Development. Provides state-of-the-art techniques for improving the identification and creation of new products, services, and brands that provide an exceptional customer experience. Both proven and emerging management techniques in new product management are covered.

EMEN 5405-3. Systems Engineering: Requirements. Provides students with an understanding of how to prepare a program for effective and timely specification development and analytical methods for specification development. Management aspects covered include traceability, margins and budgets, requirements validation, specification publishing, and use of database systems. Restricted to graduate students or instructor consent required.

EMEN 5410-3. Systems Engineering: Synthesis. Provides methods for transforming a set of requirements in a series of specifications into a physical reality through product design, material procurement, and manufacturing transforms. The solution is developed through integration and optimization. This is the second course in a three course systems engineering sequence. Restricted to graduate students or instructor consent required.

EMEN 5415-3. Systems Engineering: Verification. Provides students with methods to plan and implement effective product verification process on a program involving development of complicated products. Applies a process perfected on military programs, but the process is generic and can be applied effectively to commercial products. A worst case product and program complexity are considered permitting tailoring of the process for less complex cases. Restricted to graduate students or instructor consent required.

EMEN 5430-3. Software Product Management. Explores software product management activities from product concept to launch while ensuring both market visibility and customer satisfaction. Includes market research and opportunity analysis, software requirements, pricing and profitability, alpha-beta program feedback, operational readiness, sales channels and partner strategies. Recommended prereq., some software development experience.

EMEN 5500-3. Operations Management. Provides an introduction to management concepts and techniques for managing the ongoing value creation activities of a wide range of organizations. Value creation includes manufacturing hardware, developing software, and delivering services. Emphasizes the cus-

tomers perspective and views products as one way of delivering exceptional services. Addresses globalization and supply chains challenges. Credit not granted for this course and OPIM 6080.

EMEN 5600-3. Survey of Operations Research. Applications oriented survey of operations research topics including linear and integer programming, network analysis, dynamic programming, nonlinear programming, decision analysis, Markov chain and Markovian decision models, queuing theory, and simulation. Same as OPIM 6070.

EMEN 5610-3. Advanced Statistical Methods for Engineering Research. Combines statistical methods with practical applications and computer software. Develops commonly used statistical models such as analysis of variance as well as linear and logistic regression. The statistical models are implemented and interpreted in the context of actual data sets using available statistical software. Continuation of EMEN 5005. Prereq., EMEN 5005 or equivalent and EMEN 5900 or equivalent.

EMEN 5620-3. Data Mining and Screening Experiments for Engineering Research. Combine intermediate and advanced statistical methods with practical research applications. Develops commonly used statistical models such as Two and Three-Way Analysis of Variance and the analysis of Fractional Factorial Designs for the solution of common business and industrial research problems. The statistical models are implemented and interpreted in the context of actual data sets using available statistical software. Prereq., EMEN 5610.

EMEN 5710-3. Business Simulation for Engineers. Using an internet-based computer simulation, teams will be placed in a realistic international business setting. Teams will start up and run a company two years in compressed time (eight rounds of decisionmaking). Repeatedly, teams will be expected to plan and execute a business strategy by undertaking coordinated marketing, human resources, operations, finance, and accounting actions. Instructor permission required.

EMEN 5825-3. Entrepreneurial Business Plan Preparation. Instructs students in the necessary elements of a business plan and how to prepare a complete, well-written plan for an entrepreneurial business venture. Students work in teams to create a business concept and take it through business plan completion. Recommended prereq., EMEN 5020 or equivalent.

EMEN 5840 (1-3). Independent Study Project. Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Prereq., instructor consent.

EMEN 5900-3. Research Methods. Explores commonly used research methods including analytical, agreement, descriptive, and relational methods; experimental design including incorporation, nesting, blocking, and controlling; threats to the internal and external validity of research. Sampling procedures and considerations, measurement validity and reliability, and managing the research study are also reviewed. Prereq., EMEN 5005 or equivalent. Same as TLEN 5750.

EMEN 6805-1. Capstone Preparation. Students determine capstone research question, conduct literature review, develop research methodology and project plan, write a proposal, and select capstone committee. Restricted to students who have completed 21 credit hours toward the EMEN degree. Prereq., either EMEN 5900 if choosing an applications-oriented capstone or EMEN 5825 if choosing a business plan capstone, and selection of a capstone advisor.

EMEN 6810-2. Capstone Completion. Continues EMEN 6805 as the second half of a two-course sequence for the engineering management capstone project. Students conduct agreed-upon research, research and analyze results, develop recommendations, write a final report, and present the project to the committee for evaluation. Prereq., EMEN 6805.

EMEN 6830-3. Project Management Capstone. Evaluate project management practices in the student's work unit, company, or in another organization. Identify strengths and weaknesses of the major product management processes as outlined in the Project Management Body of Knowledge (PMBOK). Opportunities for improvement and methods for implementation are expected. Prereqs., EMEN 5030 and 5032 and acceptance into the Project Management Certification option.

Engineering Physics

See *Physics in the College of Arts and Sciences* for a listing of courses.

Environmental Engineering

EVEN 1000-1. Introduction to Environmental Engineering. Introduces students to environmental engineering as an academic major and a career. Covers air quality, aquatic ecology, chemical processing, energy, site remediation, and water resources and treatment. Includes reading and writing on the history of environmental engineering, major environmental issues, and professional ethics.

EVEN 2840 (1-3). Independent Study: General Topics. General topics relating to environmental engineering. One-on-one assistance with an instructor.

EVEN 4100-3. Environmental Sampling and Analysis. Introduces students to hands-on environmental sampling and analysis techniques for characterization of surface water, subsurface water, soils and sediments, and air. Laboratories include stream sampling, drilling, monitoring well installation, water level, slug tests, air sampling. Prereqs., CVEN 4404 and 4414, fluid mechanics, or instructor consent.

EVEN 4830-3. Special Topics.

EVEN 4840 (1-3). Independent Study: General Topics. General topics relating to environmental engineering. One-on-one assistance with an instructor. May be repeated up to 6 total credit hours.

EVEN 4980-3. Senior Thesis 1. Provides faculty-supervised independent research in environmental engineering for students planning to complete a senior thesis. To be taken prior to EVEN 4990, during the final year before graduation. Prereqs., senior standing and instructor consent. Restricted to EVEN majors.

EVEN 4990-3. Senior Thesis 2. Continuation of EVEN 4980. Consists of final phase of faculty-supervised research, the preparation of a written thesis, and an oral defense of the research to a committee. Prereq., EVEN 4980.

General Engineering

GEEN 1100-3. Social Impact of Technology. Introduces undergraduate students to the social impact of technology and how technology impacts all aspects of life, the health of planet Earth, and how people interact with each other. Fulfills Engineering social science requirements. Restricted to freshmen and sophomore engineering majors.

GEEN 1300-3. Introduction to Engineering Computing. Introduces the use of computers in engineering problem solving, including elementary numerical methods. Teaches programming fundamentals, including data and algorithm structure, and modular programming. Software vehicles include Excel, VBA, and MATLAB. Coreq., APPM 1350 or equivalent. Restricted to engineering majors.

GEEN 1342 (1-3). Special Topics.

GEEN 1350-1. Calculus 1 Work Group. Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential. Grading under pass/fail option only. Coreq., APPM 1350.

GEEN 1360-1. Calculus 2 Work Group. Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator. Grading under pass/fail option only. Prereq., APPM 1350. Coreq., APPM 1360.

GEEN 1400-3. Engineering Projects. First-year engineering students work in teams to apply their scientific and mathematical skills to interdisciplinary design/build engineering projects. Completed projects are exhibited at an end-of-semester design expo. In lieu of a textbook (available online), each student is expected to contribute up to \$75 towards their design project and poster, and purchase his/her own pair of safety glasses. Restricted to engineering majors with 75 or fewer cumulative hours.

GEEN 1500-1. Introduction to Engineering. Provides an introduction to the profession of engineering, to include its historical development, ethical expectations, and an examination of its current discipline specialization. Provides sufficient knowledge of the engineering disciplines necessary to make an informed career choice. Restricted to engineering majors with 75 or fewer cumulative hours.

GEEN 1510-1. Self Management and Leadership Principles 1. Develops group cohesiveness, mutual support, multicultural awareness, and leadership skills. Topics include collaborative learning, motivation, time management and study skills, personal assertiveness, and career awareness. Open to new freshmen

and transfer students. Controlled enrollment. Fulfills 1 credit hour of the engineering social science requirement.

GEEN 1520-1. Self Management and Leadership Principles 2. Continuation of GEEN 1510. Controlled enrollment. Prereq., GEEN 1510.

GEEN 3400-3. Invention and Innovation. Introduction to invention and product innovation with a hands-on approach. Students explore the invention process, hone their engineering design skills, and explore entrepreneurship (patenting, intellectual property, marketing, raising capital). Student teams design, create, and test a potentially commercial product, and exhibit at an end-of-semester design expo.

GEEN 3851-3. Statics for Engineers. Examines vector treatment of force systems and their resultants; equilibrium of frames and machines, including internal forces and three-dimensional configurations; static friction; properties of surfaces, including first and second moments; hydrostatics; and minimum potential energy and stability. Prereq., PHYS 1110. Recommended coreq., APPM 2350. Same as CVEN 2121.

GEEN 3852-3. Thermodynamics for Engineers. Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Prereq., APPM 2350. Same as MCEN 3012.

GEEN 3853-3. Fluid Mechanics for Engineers. Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to engineering systems. Prereqs., APPM 2350 or 2360, and GEEN 1300 or CSCI 1300. Same as CHEN 3200.

GEEN 3930-6. Engineering Co-op. Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program with a university, government agency, or industry. This course is offered only through Continuing Education and may be repeated up to 24 credit hours (four co-op terms). GPA higher than 2.75 is required. GPA higher than 3.00 is strongly recommended.

GEEN 4830-3. Special Topics. May be repeated up to 6 total credit hours. Restricted to engineering students.

Humanities for Engineers

HUEN 1010-3. Introduction to the Humanities. Explores a wide variety of challenging, interesting, and relevant humanistic expressions (fiction, philosophy, plays, poetry, art, music, etc.). Classes are small and discussion-based in order to focus on the practical skills needed to excel in both remaining humanities and social science electives and as a professional engineer. Restricted to freshmen and sophomores.

HUEN 1843-3. Special Topics. Students should check with the department for specific semester topics. May be repeated up to 6 total credit hours. Restricted to freshmen engineering majors.

HUEN 2010-3. Tradition and Identity. Explores the place and possibility of personal identity both within and against the influence of tradition, including family, culture, language, and social, political and economic institutions. Via literature and film, wrestles with the nature of freedom, self-determination, and belonging.

HUEN 2020-3. The Meaning of Information Technology. Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Equips students with an understanding of technological transformations in interpersonal, organizational, and mass communication. Emphasis is on the technological, social, and political changes that underlie the movement toward a digital society. HUEN 2020 is restricted to ENGR majors only. ATLS 2000 is restricted to TAM students. Same as ATLS 2000.

HUEN 2100-3. History of Science and Technology to Newton. When was the odometer invented? How do you build a Pyramid? What did Galileo do, really? What is the difference between science and technology, and when did they each begin? This course spans invention and discovery from the Stone Age to the age of Newton, raising questions about culture, history, custom, and personal expectation. Prepare yourself for some surprises. Restricted to freshmen and sophomore engineering majors. Formerly HUEN 1100.

HUEN 2120-3. History of Modern Science from Newton to Einstein. Surveys the great discoveries and theoretical disputes from Newtonian celestial mechanics to the theory of relativity. Includes physics, astronomy, chemistry, geology, and

biology, with units on scientific method, evolution, light and quantum theory. Original sources (selections by Newton, Faraday, Lavoisier, Darwin, etc.) bring students into contact with the scientists themselves. Restricted to CEAS students.

HUEN 2130-3. History of Modern Technology from 1750 to the Atomic Bomb. Surveys the great innovations from the Steam Age to the Atomic Age. Includes transportation, modern construction, communications, and internal combustion. Supplements textbook accounts with technical drawings, patents, etc., and with selections by Edison, Carnegie, Tesla, Bell, etc. Studies the sociological impact of social change via contemporary sources in literature, philosophy, painting and film. Restricted to CEAS students.

HUEN 2210-3. Engineering, Science, and Society. Explores challenges that engineering and science pose for society as well as the ways societies shape or impede science and engineering. Case studies include contemporary issues like global warming, nuclear weapons, and genetic engineering as well as such classic cases as the execution of Socrates. Core texts in the Western Tradition supplement contemporary articles and films.

HUEN 2843 (1-3). Special Topics. Students should check with the department for specific semester topics. May be repeated up to 6 total credit hours. Restricted to freshmen and sophomores.

HUEN 3100-3. Humanities for Engineers 1. First course in a two-semester sequence of Herbst Humanities Program for engineering students. Small group seminar that explores the values and ideals of culturally and historically significant novelists, artists, dramatists, and philosophers. May fulfill upper-level writing requirement. Minimum GPA of 3.000 preferred. Prereq., junior standing.

HUEN 3200-3. Humanities for Engineers 2. Continuation of HUEN 3100. Discusses culturally and historically significant readings in small-group seminars. May be repeated up to 6 total credit hours. Prereq., HUEN 3100 or instructor consent.

HUEN 3700-3. Culture Wars in Rome. Set in Rome, Italy, this Maymester course investigates the cultural contrasts among three different "Romes": ancient pagan, aristocratic Rome; medieval Christian theocratic Rome; and modern secular democratic Rome. To do so, it draws on evidence from Roman literature, politics, art, and architecture. Requires some preparatory work in Boulder. Restricted to sophomores/juniors/seniors.

HUEN 3750-3. Xi'an, China: Self-Awareness and Images of the Other. Explore Chinese culture in this Study Abroad course. Study ideas of self and other within special historical, social, political, and economical circumstances. Chinese and American concepts of self and society, of individual, collective, and national identities will be analyzed. The course will be held on the campus of Xi'an Jiaotong University, China. Prereq., HUEN 1010 or equivalent.

HUEN 3840 (1-3). Independent Study. Counts toward the humanities and social science degree requirements for a BS in the college of engineering. May be repeated up to 3 total credit hours. Prereq., instructor consent.

HUEN 3843-3. Special Topics. Check with department for specific semester topics. May be repeated up to 6 total credit hours. Restricted to sophomores, juniors, and seniors.

HUEN 4200-3. Humanities for Engineers 4. Continuation of HUEN 4100. Provides opportunity to pursue a variety of humanistic themes related to Herbst Humanities Program. Prereq., HUEN 4100.

Mechanical Engineering

Math

MCEN 1000-1. Introduction to Mechanical Engineering. Lect. and lab. Introduces facets of mechanical engineering including history of the profession, mechanical engineering curriculum, industries in which mechanical engineers practice, and expectations and tools for academic success. Students participate in hands-on experiences, visit industry, make oral presentations, meet faculty and practicing professionals, and develop goal statements. Restricted to MCEN majors.

MCEN 3030-3. Computational Methods. Studies fundamental numerical techniques for the solution of commonly encountered engineering problems. Includes methods for linear and nonlinear algebraic equations, data analysis, numerical differentiation and integration, ordinary and partial differential equations. Prereqs., GEEN 1300 and APPM 2360, or equivalent, including a working knowledge of MATLAB.

MCEN 4120-3. Engineering Statistics. Focuses on probability and statistics, emphasizing engineering applications. Studies frequency distributions; statistical hypotheses and estimation; nonparametric, linear regression, and correlation; nonlinear and multiple regression; analysis of variance; and quality control. Prereq., APPM 2360.

MCEN 5020-3. Methods of Engineering Analysis 1. Studies selected topics from linear algebra, ordinary differential equations, and Fourier series. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications. Prereq., APPM 2360 or equivalent. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5040-3. Methods of Engineering Analysis 2. Studies selected topics from the theory of complex variables, integral transform methods, partial differential equations, and variational methods. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications. Prereq., MCEN 5020 or equivalent. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 7120-3. Perturbation Methods. Teaches regular and singular perturbation methods for solving ordinary and partial differential equations and for evaluating integrals. Emphasizes formulation of mathematical models in fluid mechanics, combustion, heat transfer, solid mechanics, dynamics, and wave propagation. Prereq., MCEN 5020 and 5040, or equivalent. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

Fluids

MCEN 3021-3. Fluid Mechanics. Examines fundamentals of fluid flow with application to engineering problems. Explores fluid statics and kinematics; conservation equations for mass, momentum, and energy; Bernoulli and Euler equations; potential flow; laminar and turbulent viscous boundary layers; laminar and turbulent pipe flow; and compressible fluid flow. Prereqs., APPM 2360 and MCEN 2023.

MCEN 4131-3. Air Pollution Control Engineering. Introduces air quality regulations, meteorology, and modeling; methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen; and control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects. Prereq., MCEN 3021 or equivalent. Same as MCEN 5131.

MCEN 4141-3. Indoor Air Pollution. Air pollutants cause material damage and adversely affect human health. People spend over 80 per cent of their time indoors; often, air pollutant levels are higher indoors than outdoors. In this course we study air pollution in indoor environments and design appropriate control technologies. Prereqs., MCEN 3021 and 3022. Same as MCEN 5141.

MCEN 5021-3. Introduction to Fluid Dynamics. Focuses on physical properties of gases and liquids, and kinematics of flow fields. Analyzes stress; viscous, heat-conducting Newtonian fluids; and capillary effects and surface-tension-driven flow. Other topics include vorticity and circulation, ideal fluid flow theory in two and three dimensions, Schwartz-Christoffel transformations, free streamline theory, and internal and free-surface waves. Coreq., MCEN 5020 or equivalent. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5041-3. Viscous Flow. Highlights exact solution of Navier-Stokes equations and fundamentals of rotating fluids. Considers Low Reynolds number flow; similarity solutions; viscous boundary layers, jets, and wakes; and unsteady viscous flow. Prereq., MCEN 5021 or equivalent. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5121-3. Compressible Flow. Applies energy, continuity, and momentum principles to compressible flow. Topics include normal and oblique shocks; Prandtl-Meyer expansion; methods of characteristics; and one-, two-, and three-dimensional subsonic, supersonic, and hypersonic flows. Prereq., MCEN 5021 or equivalent. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5131-3. Air Pollution Control Engineering. Same as MCEN 4131. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5141-3. Indoor Air Pollution. Same as MCEN 4141. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 7221-3. Turbulence. Hydrodynamic stability theory, equations for turbulent flows, free shear flows and boundary layers, homogeneous and isotropic turbulence, overview of turbulent combustion, reaction kinetics, energy equation, Favre averaging, Pdfs, premixed and nonpremixed flame modeling, and recent developments. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

Thermal

MCEN 3012-3. Thermodynamics. Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Prereq., APPM 2350. Same as GEEN 3852.

MCEN 3022-3. Heat Transfer. Studies fundamentals of heat transfer by conduction, convection, and radiation. Provides applications to heat exchangers, solar panels, and boiling and mass transfer. Also covers numerical methods for solving heat transfer problems and design of engineering equipment involving heat transfer processes. Prereqs., MCEN 3012 and 3021.

MCEN 3032-3. Thermodynamics 2. Offers advanced topics and applications, including thermodynamics of state, entropy and probability, thermodynamic cycles, and reacting and nonreacting mixtures. Provides application to engines and power generation by conventional and alternative energy technologies. Most assignments are design oriented. Prereqs., MCEN 3012 and 3021.

MCEN 4152-3. Introduction to Combustion. Description of the mechanisms by which fuel and oxidizers are converted into combustion products. Application to practical combustion devices such as Otto, Diesel, gas turbine, and power plant combustion systems. Consideration of combustion-generated air pollution, fire safety, and combustion efficiency. Prereq., MCEN 3012. Recommended prereqs., MCEN 3021 and 3022. Same as MCEN 5152.

MCEN 4162-3. Energy Conversion. Examines common energy-conversion methods and devices. Topics include power-cycle thermodynamics, turbocompressor and expander processes, combustion systems, and applications and limitations of direct energy-conversion systems. Prereq., MCEN 3012.

MCEN 5022-3. Thermodynamics. Offers a comprehensive presentation of macroscopic and statistical thermodynamics and representative applications, from an axiomatic formulation designed to develop and clarify thermodynamic property relationships. Includes thermodynamic functions and derivatives, quantum mechanics, kinetic theory of gases, black body radiation, chemical equilibrium, and molecular spectroscopy. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5042-3. Heat Transfer. Studies development of equations governing transport of heat by conduction, convection, and radiation, and their solution. Includes analytical and numerical solution of initial and boundary value problems representative of heat conduction in solids. Describes heat transfer in free and forced convection, including laminar and turbulent flow. Also involves radiation properties of solids, liquids, and gases and transport of heat by radiation. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5122-3. Thermodynamics 2. Offers advanced topics and applications, including thermodynamics of state, entropy and probability, thermodynamic cycles, and reacting and nonreacting mixtures. Provides application to engines and power generation by conventional and alternative energy technologies. Most assignments are design oriented. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5142-3. Computational Fluid Dynamics, Heat Transfer, and Combustion. Finite difference, finite volume, finite element, and spectral methods, consistency, stability and convergence of numerical schemes, governing equations for reacting flows, convection, diffusion, convection-diffusion problems, matrix solution methods-cyclic reduction, Fourier, Jacobin, Gauss Siedel, Sor, Adi, Chebschev acceleration, Lax-Wendroff scheme, McCormack scheme, transonic small disturbance equation solution, staggered grids, simple scheme, discrete Fourier transform. Students work on two substantial projects using commercial

software. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students.

MCEN 5152-3. Introduction to Combustion. Same as MCEN 4152. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 7122-3. Combustion Phenomena. Applies multicomponent fluid equations of motion and chemical thermodynamics to a variety of combustion problems. Covers droplet combustion, premixed and diffusion flames, boundary layer combustion, detonation wave theory, topics related to internal combustion engines, and liquid and solid rockets. Prereq., MCEN 3012 and 3021. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

Solids

MCEN 2023-3. Statics and Structures. Covers statics of particles, equivalent force systems, rigid bodies, equilibrium of rigid bodies in two and three dimensions, analysis of truss and frame structures, uniaxially-loaded members, deformation and stress, distributed force systems, friction. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Prereq., APPM 1360.

MCEN 2063-3. Mechanics of Solids. Covers shear force and bending moment, torsion, stresses in beams, deflection of beams, matrix analysis of frame structures, analysis of stress and strain in 2-D and 3-D (field equations, transformations), energy methods, stress concentrations, and columns. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Prereq., MCEN 2023.

MCEN 3043-3. Dynamics. Covers dynamic behavior of particle systems and rigid bodies; 2-D and 3-D kinematics and kinetics; impulse, momentum, potential, and kinetic energy; and work, collision, and vibration. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Prereqs., MCEN 2023 and APPM 2350.

MCEN 4043-3. System Dynamics. Covers linear dynamic systems and mathematical tools for understanding them, input-output relationships, modeling templates, complex variables, Laplace transform, time-harmonic forcing and response, Fourier series and discrete Fourier transform, and coupled systems. Prereqs., ECEN 3010, MCEN 3022 and 3043. Restricted to senior MCEN majors.

MCEN 4123-3. Vibration Analysis. Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems. Prereq., MCEN 3030. Same as ASEN 4123.

MCEN 4173-3. Finite Element Analysis. Introductory course covering the theory behind and applications of the finite element method as a general and powerful tool to model a variety of phenomena in mechanical engineering. Applications include structural mechanics, mechanics of elastic continua, and heat conduction. Prereq., MCEN 2023 and 2063, or equivalents. Same as MCEN 5173.

MCEN 4183-3. Mechanics of Composite Materials. Introduces various kinds of composite materials, composite fabrication techniques, the physical and mechanical behavior of composites, and analytical and experimental methodologies. Prereqs., MCEN 2024 and 2063, or equivalents. Same as MCEN 5183.

MCEN 5023-3. Solid Mechanics 1. Introduces stress, strain, and motion of a continuous system. Discusses material derivative; fundamental laws of mass, momentum, energy, and entropy; constitutive equations and applications to elastic and plastic materials. Prereq., MCEN 2063 or equivalent; coreq., MCEN 5020 or equivalent. Similar to ASEN 5012. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5123-3. Theory of Vibration. Same as MCEN 4123. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5173-3. Finite Element Analysis. Same as MCEN 4173. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5183-3. Mechanics of Composite Materials. Same as MCEN 4183. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 6163-3. Elastic Waves. Effect of transient localized sources or dislocations in an elastic medium is studied. Modeling and application of waves in rods, beams, and plates is emphasized. In addition, ultrasonic, nondestructive evaluation and seismological problems are discussed. Prereq., MCEN 5023 or equivalent. Recommended MCEN 5040 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students.

MCEN 7123-3. Dynamics of Continuous Media. Reflects upon derivation of wave equations from the basic equations of dynamic elasticity. Topics include propagation of elastic waves in infinite and partially bounded media, Rayleigh waves and Love waves, Pochhammer solution for a rod, and waves in plates and in layered and anisotropic media. Prereq., MCEN 5020, 5040, and 5043, or equivalents. Same as PHYS 6680 and GEOL 6680. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

Materials

MCEN 2024-3. Materials Science. Structure, properties, and processing of metallic, polymeric, ceramic, and composite materials. Perfect and imperfect solids; phase equilibria; transformation kinetics; mechanical behavior; material degradation. Approach incorporates both materials science and materials engineering components.

MCEN 4124-3. Mechanical Behavior of Materials. Addresses the relationship between material structure and the fundamental processes of deformation, yield, and fracture. Examines elements of elasticity theory, introduction to plasticity, and formulation of failure criteria. Studies basic deformation processes in terms of dislocation mechanics and macroscopic mechanical behavior. Takes into consideration the influence of compositional and processing strengthening mechanisms on mechanical properties. Prereqs., MCEN 2024 and 2063.

MCEN 4133-3. Biomechanics of Solids. Considers the mechanical behavior of biological materials and emphasizes the relationship between structural characteristics and macroscopic behavior. Focuses first on the mechanical behavior of microscopic protein and polysaccharide elements and then on larger scale soft and hard tissue structures. Prereqs., MCEN 2024, 2063, and 3021 or equivalent. Restricted to MCEN majors.

MCEN 4174-3. Failure of Engineering Materials. Examines the failure of materials used in engineering design through a series of real world case studies. Example failure modes considered include overload, fatigue, creep, and corrosion. Example case studies include failure of aircraft, mountaineering ropes, weight training frames, and toilets. Prereqs., MCEN 2024 and 2063. Same as MCEN 5174.

MCEN 5024-3. Materials Science 1: Principles. Provides a unified presentation of scientific principles applicable to all materials systems. Topics include concepts of material structure from localized interatomic bonding to short- and long-range order in crystalline and noncrystalline solids; the nature and consequences of imperfections in solids; phase equilibria; and transformation kinetics. Considers metallic, polymeric, and ceramic materials. Prereq., MCEN 2024 or equivalent. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5044-3. Materials Science 2: Behavior. Applies principles of materials science developed in MCEN 5024 to the study of physical and mechanical behavior of metals, polymers, ceramics, and their composites. Emphasizes structure-property relationships, use of primary and secondary processing steps to control material behavior, and influence of environment on in-service performance. Prereq., MCEN 5024 or equivalent. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5045-3. Design for Manufacturability. Topics include general design guidelines for manufacturability; aspects of manufacturing processes that affect design decisions; design rules to maximize manufacturability; statistical considerations; value engineering and design for assembly (manual, robotic, and automatic). Presents case studies of successful products exhibiting Dfm. Prereq., MCEN 4026 or equivalent. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5164-3. Fracture. Focuses on basic mechanisms controlling fracture in brittle materials, reduction of capacity for plastic deformation in engineering materials used at high-strength levels, and selection of materials in terms of toughness as well as strength. Prereq., MCEN 4124 and 5044, or equivalent.

MCEN 5174-3. Failure of Engineering Materials. Same as MCEN 4174. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 6184-3. Structure and Properties of Polymers. Emphasizes the relationship between molecular structure and macroscopic properties. Structural aspects include chain conformation, configuration, and the crystalline and amorphous states. Discusses physical and mechanical properties with a focus on solution and phase behavior, transitions of bulk polymers, and rubber and viscoelastic behavior. Prereq., graduate standing and MCEN 5024 and 5044, or equivalent. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

Design

MCEN 1025-3. Computer-Aided Design and Fabrication. Introduces engineering design graphics. Includes learning a contemporary computer-aided design (CAD) software application and relevant engineering graphics concepts, such as orthographic projection, sections, engineering drawing practices, geometric dimensioning and tolerancing, and an introduction to manufacturing methods. Entails a final design project using rapid prototyping. Restricted to MCEN majors.

MCEN 3025-3. Component Design. Application of mechanics and materials science to the detailed design of various machine elements including shafts bearings, gears, brakes, springs, and fasteners. Emphasizes application and open-ended design problems. Prereq., MCEN 2063.

MCEN 4045-3. Mechanical Engineering Design Project 1. First part of a two-course capstone design experience in mechanical engineering. Covers problem definition, determining design requirements, alternative design concepts, engineering analysis, proof-of-concept prototype, and CAD drawings. Students make several oral design reviews, a final design presentation, and prepare a written report. Prereq., MCEN 3025. Coreq., MCEN 4026.

MCEN 4085-4. Mechanical Engineering Design Project 2. Second part of a two-course capstone design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product. Prereq., MCEN 4026 and 4045.

MCEN 4115-3. Mechatronics and Robotics I. Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems, and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred (\$50 maximum). Prereqs., ECEN 3010 or equivalent and GEEN 1300 or equivalent. Same as MCEN 5115.

MCEN 5025-3. Computer-Aided Design of Mechanical Systems. Instructs students in displacement, velocity, and accelerations matrix formulation of mechanisms. Emphasizes numerical methods to solve simultaneous nonlinear algebraic and differential equations modeling mechanical devices. Involves analysis and synthesis of mechanical components and systems, including planar and spatial linkages, cams, springs, shafts, and gear trains. Prereqs., MCEN 3030 or equivalent, and MCEN 3025. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

MCEN 5115-3. Mechatronics and Robotics I. Same as MCEN 4115. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students.

MCEN 5125-3. Optimal Design of Mechanical Components. Applies linear and nonlinear optimization methods to the design of mechanical components and systems. Examines unconstrained and constrained optimization as well as formulation of objective functions, including cost, weight, response time, and deflection. Applies knowledge to gears, springs, cams, and linkages. Prereqs., MCEN 3025 and 3030 or equivalent. Restricted to College of Engineering and Applied Science graduate students or BS/MS mechanical engineering concurrent degree students.

Production

MCEN 4151-3. Flow Visualization. Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and *schlieren*. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduate, undergraduate, engineering majors and photography/video majors. See flowvis.colorado.edu. Prereq., MCEN 3021 or equivalent, or significant imaging experience (photography/video). Same as MCEN 5151, FILM 4200, and ARTF 5200.

MCEN 5151-3. Flow Visualization. Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and *schlieren*. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduate, undergraduate, engineering majors and photography/video majors. See flowvis.colorado.edu. Prereq., MCEN 3021 or equivalent, or significant imaging experience (photography/video). Same as MCEN 4151, FILM 4200, and ARTF 5200.

Manufacturing and Systems

MCEN 4026-3. Manufacturing Processes and Systems. Engineering-science design course that examines manufacturing processes for metals, polymers, and composites as well as manufacturing systems that integrate these processes. Lecture topics include: forming, machining, joining, assembling, process integration, computer-aided manufacturing, and manufacturing system engineering. Prereq., MCEN 2024.

MCEN 5066-3. Principles and Practices of World Class Manufacturing. Introduces manufacturing principles and practices that are essential to competing successfully in a global environment. Topics include manufacturing as a competitive tool, total quality management, process control, benchmarking, total productive maintenance, just in time, design of experiments, flexible manufacturing, and case studies.

MCEN 5126-3. Applied Statistics for the Manufacturing and Process Industries. Discusses the concepts and techniques of applied statistics essential to quality control and product/process improvement. Includes computer control (SQC/SPC), sampling methods and time series analysis, and methods of experimental design. Prereq., MCEN 4120. Same as CHEN 5127 and CVEN 5127. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students.

MCEN 5146-3. Applied Statistics in Research and Development. Same as CHEN 5128. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students.

MCEN 5166-3. Electronics Packaging and Manufacturing. To provide basic knowledge of the technologies and processes required for the packaging and manufacturing of electronic products. Topics covered include wafer fabrication, different levels of packaging, thermal management, life cycle engineering, printed wiring board assembly processes, and process control. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students.

MCEN 5636-3. Micro-Electro-Mechanical Systems 1. Addresses issues of micro-electro-mechanical systems (MEMS) modeling, design, and fabrication. Emphasizes the design and fabrication of sensors and actuators due to significance of these devices in optics, medical instruments, navigation components, communications, and robotics. Prereq., instructor consent.

Miscellaneous

MCEN 3017-3. Circuits and Electronics. Introductory course covers analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Prereqs., APPM 2360 and PHYS 1140. Same as ECEN 3010.

MCEN 3037-2. Experimental Design and Data Analysis. Learn to plan and carry out experiments. Coverage includes measurement fundamentals, basic statistical concepts, and uncertainty analysis. Use of statistics for the purpose of analyzing data, including regression, correlation, hypothesis testing, classification, time series analysis, and design of experiments. Prereq., APPM 2360.

MCEN 4037-2. Measurements Lab. Carry out several experiments designed to teach methods of experimentation and data analysis. Experiments taken from solid mechanics, fluid mechanics, thermal science, and materials science. Emphasizes planning an experiment, applying sound procedures, keeping proper records, and communicating results orally and in written reports. Gives students the opportunity to participate in projects that extend over two or more weeks. Prereq., ECEN 3010, MCEN 2063, 3037, and WRTG 3030.

MCEN 4047-2. Mechanical Engineering Laboratory. Carry out several experiments designed to teach methods of experimentation and data analysis. Experiments taken from solid mechanics, fluid mechanics, thermal science, and materials science. Emphasizes planning an experiment, applying sound procedures, keeping proper records, and communicating results orally and in written reports. Gives students the opportunity to participate in projects that extend over two or more weeks. Prereq., MCEN 2024, 3022, and 4037.

MCEN 4117-3. Anatomy and Physiology for Engineers. Understanding human physiological function from an engineering, specifically mechanical engineering, viewpoint. Introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis. Restricted to senior engineering majors. Same as MCEN 5117.

MCEN 4208-3. Special Topics in Mechanical Engineering. Subject matter to be selected from topics of current interest. Credit to be arranged. Numbered MCEN 4208-4298. Prereq., instructor consent.

MCEN 4228 (1-4). Special Topics. May be repeated up to 15 credit hours. Prereqs., MCEN 2024 and 2063. Restricted to senior MCEN majors. Same as MCEN 5228.

MCEN 4848 (1-6). Independent Study. Subjects arranged in consultation with undergraduate advisor to fit the needs of the particular student. Numbered MCEN 4848-4898. Prereq., senior standing.

MCEN 5027-1. Graduate Seminar. Offers weekly presentations by visiting speakers, faculty, and students. May be repeated up to 6 total credit hours. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students.

MCEN 5117-3. Anatomy and Physiology for Engineers. Same as MCEN 4117. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students.

MCEN 5208 (1-4). Special Topics. Credit hours and subject matter to be arranged. Numbered MCEN 5208-5298.

MCEN 5228 (1-4). Special Topics. May be repeated up to 15 total credit hours. Same as MCEN 4228. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students.

MCEN 5268-3. Special Topics. Same as MCEN 4278.

MCEN 5848 (1-6). Independent Study. Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Numbered MCEN 5848-5898. Prereq., graduate standing.

Special Topics

MCEN 1208 (1-3). Special Topics in Mechanical Engineering. Subject matter to be selected from topics of current interest. Credit to be arranged. Numbered MCEN 1208-1298. Prereq., instructor consent.

MCEN 3208 (1-3). Special Topics in Mechanical Engineering. Subject matter to be selected from topics of current interest. Credit to be arranged. Numbered MCEN 3208-3298. Prereq., instructor consent.

MCEN 4128-3. Special Topics. Prereq., MCEN 4025 or equivalent.

MCEN 4278-3. Special Topics. Same as MCEN 5268.

MCEN 5248 (1-3). Special Topics.

MCEN 5898 (1-3). Independent Study. Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Numbered MCEN 5848-5898. Prereq., graduate standing.

MCEN 6228-3. Special Topics. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students.

MCEN 6278-3. Special Topics.

MCEN 6848 (1-6). Independent Study. Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Numbered MCEN 6848-6898. Prereq., graduate standing.

MCEN 6898 (1-6). Independent Study. Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Numbered MCEN 6848-6898. Prereq., graduate standing.

MCEN 7208 (1-4). Special Topics. Credit and subject matter to be arranged. Numbered MCEN 7208-7298.

MCEN 8999 (1-10). Doctoral Thesis.

Thesis

MCEN 6949-1. Master's Degree Candidacy.

MCEN 6959 (1-6). Master's Thesis.

Telecommunications

Practice: Clinical and Simulation

TLEN 5250 (2-4). Technology Law and Policy Clinic. Features technology law advocacy before administrative and legislative bodies. The mission of TLPC is: 1) to train and produce students equipped to conduct thoughtful analysis, and 2) provide unbiased assistance in the public interest concerning technology issues to regulatory entities, courts, legislatures and standard setting bodies. Recommended prereqs., LAWS 6301, 6318 or 7241. Same as LAWS 7809.

TLEN 5010-3. Network Economics and Finance I. Examines economics as the social science discipline that examines how agents allocate scarce resources under conditions of uncertainty. Introduces a range of microeconomic principles and models used to undertake economic and financial analysis of telecommunications networks.

TLEN 5020-3. Economics of Competition Policy in Network Industries. Develops methods to evaluate investments to account for uncertainty and dynamics. Examines approaches such as real options methodology, useful in a wide variety of applications including stock and project valuations, capital budgeting, and strategic planning. Prereq., TLEN 5010 or instructor consent.

TLEN 5050-3. Leadership and Management. One year work experience is required. Same as EMEN 5050.

TLEN 5106-3. International Telecommunications. Institutions that affect the use of telecommunications are introduced, including various parts of the federal government such as the Department of Commerce, the FCC, and the Department of State. The major thrust of the seminar, however, is the role of international institutions, including the ITU, various satellite organizations, and the World Trade Organization. Prereq., TLEN 5010.

TLEN 5130-3. Telecommunications Business Strategy. Covers concepts, strategies, and practical implementation of market oriented business strategy in the telecom industry grounded with real world examples. Topics include positioning, segmentation/targeting, technology adoption, advertising/outreach, communication strategies, product management, sales process and business intelligence. Prereq., TLEN 5010.

TLEN 5140-3. IT and Business Strategy. Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success. Prereq., TLEN 5010. Same as OPIM 4040/5040 and MGMT 4090.

TLEN 5150-1. Managing Effectively in a Changing Telecommunications Environment. Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world. Same as ATLS 5150.

TLEN 5160-3. Information Technologies and Communications. Provides a perspective of the basic and relevant issues of the communications and information technologies (CIT) industry, while gaining a wide picture overview of its main problems and trends. Students learn the technical, economic, management, and regulatory perspectives of CIT. The fundamental concepts and terminology associated with the communications industry is included in the course content. Recommended prereq., TLEN 5010.

TLEN 5190-3. Standardization and Standards Wars. Examines current issues and strategy in the standardization of telecommunications and information technologies. Covers topics on the importance of standards, government and private sector perspectives, and impact of information age technologies on standards development. Introduces students to relevance of antitrust and intellectual property law to the topic.

TLEN 5210-2. Principles of Telecommunications Policy. Learn the key issues and principles that guide the decisions of policy makers with respect to the regulatory treatment of voice, video, and data communications. Engage in critical debate, and develop instincts for anticipating the likely regulatory models that may be applied to new technologies. This introductory course covers technical, economic, legal, political, and institutional considerations. Prereq., TLEN 5010. Same as CSCI 4143.

TLEN 5230-3. Spectrum Management and Policy. Studies how spectrum policy is developed and implemented. A general framework is developed for understanding telecommunications law and regulatory objectives. Course specifically analyzes international and domestic dimensions of spectrum policy. It also considers how economics, administrative processes, and innovative technologies affects management of the spectrum.

TLEN 5240-3. Law and Regulation. May be repeated up to 6 total credit hours. Same as LAWS 7241.

TLEN 5245-3. Introduction to Intellectual Property Law. Provides an overview of our nation's intellectual property laws, including patent, copyright, trademark, trade secret, and also discusses other assorted matters related to intellectual property, including licensing, competition policy issues, and remedies. Same as LAWS 6301.

TLEN 5300 (1-3). Telecommunications Theory and Applications. Examines the mathematical and physical theory of telecommunications. Deals with the fundamental concepts related to a wide range of topics including physical units, numbering systems, trigonometric functions, logarithms, indices, decibels, complex numbers, calculus, elementary probability, and power circuit analysis. May be repeated up to 3 credit hours.

TLEN 5310-3. Telecommunications Systems. Reviews fundamental technical concepts and terminology in telecommunications. Topics of focus include: decibels, noise analysis, transmission lines, electronic signals, radio spectrum characteristics, link budgets, AM modulation, angle modulation, digital modulation, multiplexing, sampling and digital encoding, detection, and similar physical layer concepts. Systems for analysis include CATV, cellular wireless, WLAN, satellite systems, internet networking and related voice and data networks.

TLEN 5330-3. Data Communications 1. Provides a comprehensive technical survey of data and computer communications including Wireless, MAN, and WAN systems and standards. Covers interfaced, network timing and synchronization, wired and wireless LAN technologies including all aspects of Ethernet, IEEE 802 LANs, packet switching, routing, and Internet design. Prereq. or coreq., TLEN 5310.

TLEN 5340-3. VOIP Network Design. Focuses on VOIP network design and optimization. The emphasis is on the convergence of VOIP, PSTN and cell phone networks and signaling. Topics include voice processing as well as IP and SS7 signaling. In addition there will be a review of ISDN, DSL, Sonet, ATM, SIP and MPLS. There will be a case problem for sizing a VOIP network using silence suppression. Coreq., TLEN 5310.

TLEN 5350-3. Satellite Communication Systems. Aimed at a high level fundamental understanding of broadcasting, communication and navigation satellite systems. Topics include orbital mechanics, orbit selection, spacecraft subsystems, spacecraft and earth station configurations, propagation issues, link budgets, modulation and multiplexing techniques, multiple access schemes (FDMA, TDMA, CDMA), error control coding, satellite network architecture, and economic, regulatory and business issues in Geo, Meo, and Leo systems. Coreq., TLEN 5330.

TLEN 5370-3. IP Routing Protocols. Breaks IP routing technologies into two fundamental pieces: an in-depth study of interior and then exterior gateway protocols. Prereq., TLEN 5330.

TLEN 5390-3. Applied JAVA Programming. Provides a comprehensive overview of basic programming concepts, the JAVA programming language using an object-oriented approach, and the software development life cycle for students with little to no previous programming experience.

TLEN 5410-3. Network Management and Operations. Offers students a hands-on experience programatically managing network hardware and essential network services such as DHCP, DNS, ARP, FTP, Telnet, HTTP, SSH, SMTP, TFTP, and SNMP through the use of cross-platform scripting. Students with little or no programming experience will learn scripting by replicating functionality provided in common management suites such as HP OpenView, Nagios, Zennos, IBM Netview and others.

TLEN 5430-3. Data Communications 2. Provides a detailed technical study of Internet and Internet-related protocols following a top-down approach through the protocol stack. Bit-level analysis of a large number of Internet and Internet-related protocols, including the study of classic protocol suite principles. Covers real time and near real-time data streaming, IP mobility, IPV6, and an introduction to Internet security. Prereq., TLEN 5330 or instructor consent.

TLEN 5440-3. Multimedia Networking. Covers the co-evolution of traditional multimedia services (such as telephony and television) and traditional data services onto a common network infrastructure: representation and compression for speech, audio, images, and video; media transport using Real time Transport Protocol (RTP); quality of service. Prereq., TLEN 5330.

TLEN 5460-3. Telecommunication Systems Laboratory. Provides direct experience with telecommunications functions and equipment through experiments and demonstrations. Student teams learn the fundamental techniques of signal transmission and impairment measurement, voice and data switching and systems administration, and the fundamental functions of data networking and services. Each experiment is designed to focus on some particular aspect of system management, development, or maintenance for either enterprise telecommunications customers or telecommunication service providers. Procedures require the use of actual commercial equipment, services, observation, reporting of behavior, and performance, compared to specified requirements. Student teams and laboratory periods for the semester are established during the first class lecture meeting. Prereqs., TLEN 5310 and 5330. Credit not granted for this course and CSCI 4123.

TLEN 5462-3. Advanced Telecommunications Lab. Presents advanced networking techniques through experiments with network measurement equipment, switches, routers, and management interfaces. Each experiment focuses on some particular aspect of system management, development, or maintenance. Procedures require the use of actual commercial equipment, services, observation, reporting of behavior, and performance, compared to specified requirements. Prereq., TLEN 5460.

TLEN 5470-3. Signaling Protocols. Signaling in this context is the exchange of information associated with the establishment and control of a connection. Students will gain an understanding of modern signaling protocols and differences among these protocols. Students will gain an appreciation of actually implementing signaling protocols in the Internet Protocol environment. Prereqs., TLEN 5330 and C/C++. Recommended prereq., JAVA programming.

TLEN 5480-3. Introduction to Optical Fiber Communications. Provides the student with a description of optical fibers, lasers, and detectors at a level that allows them to analyze and design optical fiber communication systems. Prereq., TLEN 5310. Same as ECEN 4116.

TLEN 5485-2. Optical Circuits Laboratory. 2-credit hour senior level lab. Experiments cover analog and digital information transmission on free space and guided wave optical carriers. Automated data acquisition and computer analysis of data are used to investigate transmission efficacy. Same as ECEN 4696.

TLEN 5490-3. Network Programming. Exposes students to Unix/Linux systems and network programming with an emphasis on practical programming problems and experience. Covers the unique challenges of programming distributed systems including resolving synchronization, threads, pipes, sockets, and other constructs for building TCP/IP network servers and clients.

TLEN 5510-3. Wireless and Cellular Communications. Presents in detail the technologies and architectures employed in cellular and other modern wireless sys-

tems and discusses regulatory and other industry issues. Major topics include radio technology, multiple access techniques, analog and digital cellular telephony, and personal communications systems. Prereq., TLEN 5310 or instructor consent.

TLEN 5520-3. Wireless Local Area Networks. Examines small-scale wireless networks particularly personal and local area networks. Covers licensed and unlicensed spectrum, indoor and small-scale radio propagation, modulation techniques, network topologies, ad hoc and infrastructure networks, protocol design, TCP/IP-wireless interactions, and protocol standards. Prereq., TLEN 5330. Recommended prereq., TLEN 5430.

TLEN 5530-3. Applied Network Security. Examines the critical aspects of network security. A technical discussion of threats, vulnerabilities, detection, and prevention is presented. Issues addressed are cryptography, firewalls, network protocols, intrusion detection, security architecture, security policy, forensic investigation, privacy, and the law. Prereq., TLEN 5330.

TLEN 5535-3. Computer Crime. Explores the legal issues that judges, legislators, prosecutors, and defense attorneys are confronting as they respond to the recent explosion in computer-related crime. Includes the Fourth Amendment in cyberspace, the law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal/state relations in the enforcement of computer crime laws, and civil liberties online. Same as LAWS 6321.

TLEN 5540-3. Network Security Laboratory. Applies what students have learned in computer and network security foundations in a simulated network environment. Topics to be covered include: system hardening, firewalls, intrusion detection, vulnerability assessment, and investigation. Prereqs., TLEN 5530. Recommended prereq., operating system experience. Credit not granted for this course and CSCI 4133.

TLEN 5550-3. Computer and Network Security. Studies methods to protect information, and the ability to process and move information, from theft, misuse, tampering, destruction, and unauthorized access. Introduces foundational topics of computer and network security, including security models, cryptography, and authentication protocols. Prereqs., significant experience in coding (C or C++); some experience in networks; familiarity with TCP/IP, UDP, and ICMP. Recommended prereq., CSCI 5273. Same as CSCI 6268.

TLEN 5560-3. Wireless Systems Laboratory. Serves as hands-on exploration of wireless communication systems. The course is designed to complement TLEN 5510 and TLEN 5520 by taking several subjects to greater depth. Students will work with and in some cases build radio frequency test equipment, transmitters, receivers, antennas, and wireless communication systems. Prereq., TLEN 5310. Coreq., either TLEN 5510 or 5520.

TLEN 5570-3. IP Network Design. Implement fundamentals of IP Routing Protocols and apply them directly to design based networking problems. Design scenarios will incorporate physical and logical design, financial analysis, and laboratory configuration. Prereq., TLEN 5370.

TLEN 5600-1. Telecommunications Seminar. Provides a series of weekly lectures with questions and discussion. Many of the speakers are nationally known experts in telecommunications. Fall and spring seminars are for 1 credit hour each, and attendance is required. May be repeated up to 4 total credit hours.

TLEN 5700-1. Capstone 1. Develop basic concepts and methods for pursuing quantitative and qualitative research. Capstone teams will be formed and students will begin work on research projects that will be completed in TLEN 5710 Capstone 2. Capstone 1 and 2 must be taken in sequential semesters. Enrollment requires 14 completed credit hours in ITP: 6-technical; 6-non-technical; 2-seminar. Writing skills test required.

TLEN 5750-3. Research Techniques in Engineering Management. Same as EMEN 5900.

TLEN 5830 (1-6). Special Topics.

TLEN 5831-3. Special Topics.

TLEN 5920 (1-6). Independent Study.

TLEN 6940-1. Candidate for Degree.

TLEN 6950 (1-6). Master's Thesis.

TLEN 6960 (1-4). Telecommunications Project.

School of Journalism & Mass Communication

Core Curriculum and General Electives

JOUR 1001-3. Contemporary Media Analysis. An introduction to the role of media in contemporary society, focusing on the cultural, political, economic, and historical context within which print and media technologies developed and how audiences interact with and influence the use of media.

JOUR 1871 (1-3). Special Topics for First-Year Students. Special studies in media that are specific for first-year students. May be repeated for a maximum of three credit hours.

JOUR 2011-3. Media and Public Culture. Introduces the rise and development of mediated communication and its impact on and role within the formation of modern culture and public life. Restricted to journalism majors.

JOUR 2403-3. Principles of Advertising and Consumer Culture. Explores creative and strategic thinking plus the nature and functions of promotions, event-marketing, public relations, and advertising and their growing interdependence in a changing media landscape. Considers technology's impact and the effect of commercial culture on an increasingly diverse society.

JOUR 2601-3. Principles of Journalism and Networked Communication. Surveys the history, practices, and responsibilities of journalism in a democracy. Examines ethics, best practices in institutional and network settings, reporting and writing, international news systems, personal branding, and strategies for creating and distributing content across media platforms. Promotes the highest professional values and encourages students to be leaders who recognize the possibilities of journalism in a democratic society.

JOUR 3771-3. Mass Communication History. Examines the historical development of various communication technologies (printing press, photography, film, radio, television, computers, Internet); their impact on culture (forms of expression and social relationships); and their relation to various conceptions of the public (citizens, audiences, consumers, markets). Draws on history to explore current issues in media and popular culture and their relation to public life. Prereq., junior or senior standing. May be limited to majors.

JOUR 4201-3. Media, Culture and Globalization. Surveys the political and economic structures of media systems in developed and developing countries and discusses the impact of privatization, ownership consolidation, and globalization on the flow of information across national borders. Also looks at how global media flows and counter-flows affect conceptions of nationhood and cultural identity.

JOUR 4211-3. East Asian Media and Culture. Offers an understanding of the various people, cultures, and nations of East Asia through their media systems. Provides a critical overview of the historical, cultural, social, political, and economic dimensions of East Asian communication systems in today's digitally connected/disconnected world.

JOUR 4211-3. Media Criticism. Introduces the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism, etc. Texts from contemporary print and broadcast media. Same as JOUR 5311.

JOUR 4301-3. Media Ethics. Provides students with an overview of the theories, ethics codes, and analytical models that are used in journalism, public relations, and advertising. Introduces students to a variety of ethical issues that can arise across media professions, as well as the industry practices that can lead to ethical lapses, and teaches students how to challenge those practices. Restricted to junior/senior journalism students. Same as JOUR 5301.

JOUR 4311-3. Mass Communication Criticism. Introduces students to the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism, etc. Texts from contemporary print and broadcast media. Same as JOUR 5311.

JOUR 4321-3. Media Institutions and Economics. Focuses on the institutions and practices of the media industries. Surveys the histories, structures, and activities of these organizations and the contemporary issues surrounding them. Restricted to JOUR majors with junior/senior standing) or permission of instructor for nonmajors. Same as JOUR 5321.

JOUR 4331-3. Gender, Race, Class, and Sexuality in Popular Culture. Studies the construction, interconnections, and replications of gender, race, class, and sexuality in popular culture and how these constructs become cultural norms and mores. Uses critical methods with a focus on producing responsible viewers and readers. Same as JOUR 5331, WMST 4331.

JOUR 4341-3. International Media and Global Crises. Examines strengths and limits on media's role in globalized crises (e.g., financial, climate change, health) in light of changing distribution of global power. Introduction to current crises; context-analytical approach to media technologies, financing, and uses; application to national cases.

JOUR 4351-3. Reporting Wars, Disasters, and Peace. Explores how journalists report international breaking news with a focus on war, disaster, and peace and how these news events affect people's lives, governmental decisions, and news media operations.

JOUR 4361-3. TV and the Family in American Culture and Society. Examines the history and character of two central institutions in American society—the family and television—to gain deeper understanding of their formative and enduring roles. Topics include: intersecting histories of the family and television; economic logic of the TV industry and programming; representations of the family in television programming; how families use and interact with television.

JOUR 4371-3. Media and Religion. Examines the way religion uses media as a social and political force. Introduces the major themes and trends in the mediation of religion and the religious inflection of the media in professional, popular, and emerging media contexts. Same as JOUR 5371, RLST 4371.

JOUR 4453-3. Advertising and Society. Examines criticisms and contributions of advertising in society and the economy. Same as JOUR 5453.

JOUR 4651-3. Media Law. Studies state and federal laws and court decisions that affect the media in order to develop knowledge of media rights and responsibilities and an understanding of the legal system. Restricted to junior/senior journalism students.

JOUR 4711-3. Media and Culture. Examines culture in the form of discourse, symbols, and texts transmitted through the media. Explores the relationship between such mediated culture and social myth and ideology. Same as JOUR 5711.

JOUR 4791-4. Media and the Public. Provides an overview of how publishing in print and electronic forms has been tied closely to democratic ideals for centuries. Explores how the idea of the public is central to the theory and practice of media politics, and how the contested concepts of “the public sphere” and “public opinion” have long been linked to debates about the proper relationship between media and democratic citizenship. Same as JOUR 5791.

JOUR 4841 (1-4). Undergraduate Independent Study.

JOUR 4871 (1-3). Special Topics.

JOUR 4931 (1-6). Internship.

JOUR 5001 (1-4). Research in Journalism. Offers students the opportunity to participate in research projects with faculty members or pursue their own primary research interests.

JOUR 5201-3. Media, Culture, and Globalization. Same as JOUR 4201.

JOUR 5301-3. Media Ethics and Professional Practice. Same as JOUR 4301.

JOUR 5321-3. Media Institutions and Economics. Same as JOUR 4321.

JOUR 5331-3. Gender, Race, Class, and Sexuality in Popular Culture. Same as JOUR 4331.

JOUR 5511-3. Newsgathering 1. Covers problems and practice in reporting news of government, politics, the courts, and industry, business, science, and other areas involving public issues. For graduate students only.

JOUR 5521-3. Precision Journalism. Instructs students in computer-assisted reporting, including a knowledge of commercial databases, global information networks, and the use of spreadsheets to analyze census data and other complex information.

JOUR 5651-3. Mass Communication Law. Studies state and federal laws and court decisions that affect mass communication in order to develop knowledge of mass media rights and responsibilities and an understanding of the legal system.

JOUR 5711-3. Media and Culture. Same as Jour 4711.

JOUR 5791-3. Media and the Public. Same as JOUR 4791.

JOUR 5841 (1-3). Graduate Independent Study.

JOUR 5851 (1-6). Graduate Professional Project.

JOUR 5861-3. Visual Communication. Visual communication involves understanding both perception of messages and construction of them. Students analyze their visual thinking abilities and develop habits of visual analysis and criticism, as well as visual communication skills.

JOUR 5871 (1-3). Special Topics.

JOUR 5931 (1-3). Internship.

JOUR 6051-3. Media Theory. Studies theories and perspectives of mass communication and explores the role of mass media in society.

JOUR 6061-3. Mass Communication Research. Continuation of JOUR 6051, emphasizing experimental and survey research methods.

JOUR 6071-3. Critical Theories of Media and Culture. Introduction to critical theories and analysis of media and popular culture. Examines major theoretical traditions and/or theorists that significantly inform media studies (e.g., culturalism, structuralism, Marxism, critical theory, feminism, psychoanalysis, post-structuralism) and applies these to media analysis and criticism.

JOUR 6201-3. Global Media and Culture. Covers mass communication within the international system, including similarities and differences in functions, facilities, and content; social theories of the press; and the international flow of mass communication.

JOUR 6211-3. Communication and International Development. Studies and analyzes communications technologies and techniques used in addressing social problems in developing countries.

JOUR 6301-3. Communication, Media, and Concepts of the Public. Introduces students to historical and contemporary uses of fundamental concepts in research and theory about media institutions, particularly public, community, mass, publicity, public space, public opinion, public interest, and the public sphere.

JOUR 6311-3. Seminar: Freedom of Expression. Studies free-speech issues in the context of current and historical philosophical foundations for freedom of expression.

JOUR 6321-3. Literary Journalism. Analyzes the work of journalists who became some of the greatest fiction writers of the 19th and 20th centuries, and examines the increasingly indistinct lines between journalism and narrative fiction.

JOUR 6331-3. Political Communication. Explores the dynamic relationships involving media and politics, focusing primarily on the American political system. Readings and seminar discussion incorporate normative and empirical perspectives on the media-politics complex. Areas covered include media effects on public opinion and policy, uses of media in governance, journalism sociology, coverage of elections, and implications of interactive media for governance and civic participation.

JOUR 6341-3. Children and the Media. Examining the concepts of children and childhood from the historical, social, cultural, economic and political perspectives, this course explores the interaction between mass media and the socialization and cultivation process of children and youth. Many theoretical traditions are used as a framework to study a variety of issues, such as multicultural literature for children and Disney's role in storytelling, and tween movies and the tweens.

JOUR 6551-3. Telecommunication Policy. Surveys historical and contemporary developments in telecommunications policy, emphasizing social and cultural dimensions, and focusing primarily on the context of the United States.

JOUR 6651-3. Media Law. Graduate seminar in communications law. Studies changing law and applied legal research techniques.

JOUR 6661-3. Media Ethics and Responsibility. Develops a theoretical framework with which to recognize and analyze ethical issues as they arise in the media.

JOUR 6671-3. Media, Myth, and Ritual. Anthropological and interpretative exploration of cultural practices of media audiences. Addresses theoretical and methodological implications of studying audiences from a culturalist perspective, with particular focus on media audience practices. Students engage in field research projects related to course content.

JOUR 6711-3. Mass Media and Pop Culture. Inquiry into relationship of the arts and the mass media, including study of critics, their function, and their works.

JOUR 6721-3. Message Effectiveness. Investigates how mass media messages work in terms of such effects as perception, learning and comprehension, and persuasion. Effectiveness is analyzed in terms of how well mass communication messages meet their objectives.

JOUR 6771-3. History of Mass Communication. Examines specialized areas in the history of mass communication.

JOUR 6781-3. Economic and Political Aspects of Mass Communication. Discusses economic problems and political issues relevant to newspapers, magazines, broadcasting, and CATV. Examines problems of telecommunications and the impact of future technology on mass communication.

JOUR 6940-1. Master's Degree Candidate.

JOUR 6951 (1-6). Master's Thesis.

JOUR 7011-3. Proseminar in Communication Theory 1. Introduces the principal concepts, literature, and theoretical and paradigmatic perspectives of media studies and mass communication and their ties and contributions to parallel domains in the social sciences and humanities.

JOUR 7021-3. Proseminar in Communication Theory 2. Continuation of JOUR 7011. Prereq., JOUR 7011.

JOUR 7051-3. Qualitative Research Methods in Mass Communication. Examines various methods of qualitative data gathering and analysis in the mass media context.

JOUR 7061-3. Quantitative Research Methods in Mass Communication. Examines various methods of quantitative data gathering methods and analysis in the mass media context.

JOUR 7841-(1-3). Doctoral Independent Study.

JOUR 7871-3. Special Topics.

JOUR 8991 (1-10). Doctoral Thesis.

Print and Online Journalism

JOUR 3001-3. Public Affairs Reporting. Grounds students in the basic news-gathering skills needed to work for news enterprises. Students learn techniques central to researching, reporting, and writing stories for various media formats, including print, online, and broadcast journalism. Prereq., JOUR 2601.

JOUR 3002-3. Multimedia Reporting and Production. Equips students with the tools and techniques needed to produce multimedia content. Classroom instruction offers students historical, social, and cultural contexts for the emergence of new media forms. Skills and practices covered include website design and construction, nonlinear video editing, digital graphics design, interactive information presentation, and multimedia reporting. Restricted to juniors/seniors. May be limited to journalism majors.

JOUR 3102-3. Photojournalism I. Introduces the basic elements of visual communication. Covers the use of camera systems, digital imaging techniques, and other aspects of photojournalism including law, ethics, history, and critical decision-making. Prereq., JOUR 2601.

JOUR 3552-3. Editing and Presentation. Explores copy editing, graphic principles and processes, new media technology. Prereq., JOUR 3001. Restricted to majors.

JOUR 3902 (1-3). Newspaper Practicum. Gives students the opportunity to participate in newswork.

JOUR 4002-3. Reporting 2. Assumes mastery of basic reporting and writing skills. Students produce more sophisticated stories on a variety of topics. Prereq., JOUR 3001. Restricted to junior/senior NSED and JOUR students.

JOUR 4102-3. Photojournalism Portfolio. Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers. Prereq., JOUR 3102.

JOUR 4272-3. Principles of Public Relations. Introduces the economics, ethics, history, impact, practice, and social context of the public relations industry in America. Includes an analysis of public relations in agencies, corporations, political campaigns, social service organizations, universities, and other venues.

Emphasizes writing for public relations, including fact sheets, press releases, reports, and speeches. Same as JOUR 5272.

JOUR 4282-3. Public Relations Strategy and Campaigns. Develops and applies public relations programs, from identification of the problem through execution of public relations techniques. Prereq., JOUR 4272. Restricted to senior journalism majors. Same as JOUR 5282.

JOUR 4502-3. Reporting 3. Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged. Prereqs., JOUR 3552 and 4002, and senior standing. Restricted to majors. Same as JOUR 5502.

JOUR 4552 (1-3). Advanced Editing. Highlights copy editing, headline writing, page designing, and news evaluating.

JOUR 4562-3. Digital Journalism. Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture, and society. Prereq., JOUR 3002. Same as JOUR 5562.

JOUR 4602-3. Editorial, Commentary, and Opinion Writing. Concentrates on several of the subjective areas of journalism. Emphasizes editorial and column writing, editorial pages, and blogging. Prereq., JOUR 3001. Same as JOUR 5602.

JOUR 4702-3. Arts/Cultural Reporting and Criticism. Emphasizes composition of criticism for the performing arts and other areas of entertainment. Prereq., JOUR 3001. Same as JOUR 5702.

JOUR 4802-3. Magazine and Feature Writing. Provides practice in writing freelance articles. Considers types, sources, methods, titles, illustrations, and freelance markets. Students submit work for publication. Prereq., JOUR 3001. Same as JOUR 5802.

JOUR 4822-3. Reporting on the Environment. Involves reporting and writing about the environment by taking into account the scientific, technological, political, economic, and cultural dimensions of environmental subjects. Same as JOUR 5822.

JOUR 4872 (1-3). Special Topics: Print. Same as JOUR 5872.

JOUR 5102-3. Photojournalism Portfolio. Same as JOUR 4102.

JOUR 5272-3. Principles of Public Relations. Same as JOUR 4272.

JOUR 5282-3. Public Relations Strategy and Campaigns. Prereq., JOUR 5272 or instructor consent. Same as JOUR 4282.

JOUR 5502-3. Newsgathering 2. Prereqs., JOUR 5511 and 5552. Restricted to majors. Same as JOUR 4502.

JOUR 5512-3. In-Depth Reporting. Shows how to dig beneath the surface of issues and events. Focuses on research, interviewing, and writing. Prereq., JOUR 5511.

JOUR 5552-3. News Editing. Discusses principles and practice in copy editing and writing headlines for local and wire stories. Practice in page makeup, picture editing, and electronic editing. Prereq., JOUR 5511. Restricted to majors.

JOUR 5562-3. Digital Journalism. Same as JOUR 4562.

JOUR 5602-3. Editorial, Commentary, and Opinion Writing. Same as JOUR 4602.

JOUR 5702-3. Arts and Cultural Reporting and Criticism. Same as JOUR 4702.

JOUR 5802-3. Magazine and Feature Writing. Prereq., JOUR 5511. Same as JOUR 4802.

JOUR 5812-3. Science Writing. Helps students acquire the basic skills and knowledge required of science journalists. Also examines issues of scientific importance such as climate change, the nature of scientific knowledge, and how science is covered in various media.

JOUR 5822-3. Reporting on the Environment. Same as JOUR 4822.

JOUR 5872 (1-3). Special Topics: Print. Same as JOUR 4872.

Advertising and Media Design

JOUR 2403-3. Principles of Advertising. Covers basic principles of publication, radio, and television advertising. Analyzes consumers, markets, and media. Organizes advertising departments and agencies.

JOUR 3403-3. Branding and Positioning. Examines the theory and practice of branding, target segmentation, and how the digital space and the rapid rise of consumer generated content have impacted brand management. Students ana-

lyze audience research and the competitive set to develop brand positions and benefits. Prereq., JOUR 2403. Restricted to ADVT, MKTG majors.

JOUR 3453-3. Introduction to Creative Concepts. Provides an opportunity to explore approaches to creative problem solving and visual thinking. Students draw on this theoretical foundation to develop advertising ideas in a variety of media for both commercial clients and non-profit organizations. Prereq., JOUR 2403. Restricted to ADVT and MKTG majors.

JOUR 3463-3. Advertising Media. Studies media, markets, and audiences, and their relationships to advertising messages. Prereqs., JOUR 3403 and 3453. Restricted to junior/senior ADVT and MKTG majors.

JOUR 3473-3. Advertising Research. Introduces students to applied research methods and provides practice in using research in marketing and advertising decision making. Prereqs., JOUR 3403 and 3453. Restricted to junior/senior JOUR, MKTG and ADVT majors.

JOUR 3503-3. Intermediate Creative Concepts. Explores both strategic and creative thinking and examines approaches to narrative storytelling as a tool for telling overarching brand stories. Students use the foundation to develop creative briefs and advertising campaigns. Prereq. JOUR 3403, 3453 and instructor consent.

JOUR 3913 (1-3). Advertising Practicum. Provides the opportunity to do advertising work outside existing classes. May be repeated up to 6 total credit hours.

JOUR 4403-4. Advertising Campaigns. Gives students the opportunity to work in small groups to develop material for an actual client. Students examine basic principles of group dynamics and effective teamwork while conducting research, developing strategies, and creating a multimedia campaign. All work is presented to the client. Prereq., JOUR 3463 OR 3503. Restricted to advertising and marketing majors with a minimum of 85 hours.

JOUR 4453-3. Advertising and Society. Examines criticisms and contributions of advertising in society and the economy. Same as JOUR 5453.

JOUR 4503-3. Advanced Creative Concepts. Builds on skills acquired in JOUR 3503 and 4513 to help students enhance their conceptual abilities and generate both print and integrated multimedia campaigns. Students work in teams to develop an extensive body of work that's exhibited in an awards show judged by advertising professionals. Prereq., JOUR 3503 and 4513 and instructor consent.

JOUR 4513-3. Introduction to Art Direction. Explores theories of visual communication, the visual imagination, and key principles of design. Develops student's ability to express ideas through images and to create both effective visual concepts and layouts for a variety of media. Prereq., JOUR 3453 and instructor consent. Coreq. JOUR 3503.

JOUR 4523-3. Portfolio. Gives students an opportunity to develop an extensive body of work. Students create integrated campaigns, which include print, digital and guerilla ideas. Final portfolios are critiqued by both faculty and outside reviewers. Prereq., JOUR 4503 and instructor consent.

JOUR 4533-3. Applied Consumer Insights. Provides an opportunity to use and master quantitative and qualitative research methods. Students conduct research and analyze data to determine the target's relationship with specific product categories and identify the emotional and practical needs that motivate purchase. Prereqs., JOUR 3403, 3453. Restricted to advertising and media design, marketing majors.

JOUR 4543-3. Strategic Brand Management. Examines the theory of branding: what brands are, how brands are created and measured, as well as strategies for managing brands and brand communication. Prereq. JOUR 3463. Restricted to advertising, marketing majors.

JOUR 4873 (1-3). Special Topics. Prereqs., JOUR 3453, 3463, and 3473.

JOUR 5453-3. Advertising and Society. Same as JOUR 4453.

JOUR 5873 (1-3). Special Topics: Advertising.

Broadcast Journalism

JOUR 3604-3. Radio and Television News. Covers principles and techniques involved in the preparation of news for broadcasting. Prereq., JOUR 2601. Restricted to junior/senior majors.

JOUR 3614-3. Principles of Audio Production. Introduces audio production techniques using digital technologies. Students learn to apply fundamental principles to create professional radio and online programs including podcasting.

JOUR 3644-3. Principles of Television Production. Emphasizes the use of video technologies in both field and studio production, camera and editing work, producing and directing for professional program production. Prereq., JOUR 2601. Restricted to junior/senior broadcast journalism majors.

JOUR 3674-3. Television Production 2. Covers studio productions for NewsTeam Boulder. Students also do field projects to sharpen their writing, video production, and editing skills. Prereq., JOUR 3644.

JOUR 4344-3. Video Documentary Production. Designed to give students the experience of researching, writing, shooting, and editing their own documentaries. Prereq., JOUR 3644 or JOUR 5344.

JOUR 4354-3. TV Reporting. Students learn basic broadcast reporting skills—where to find news and how to cover it, how to analyze and organize news stories. Skills are linked with advanced concepts of shooting and editing videotape in order to produce news stories on deadline. Prereqs., JOUR 3604 and 3644.

JOUR 4614 (1-3). Advanced Audio Practices. Applies advanced skills in producing in-depth audio programming for radio stations in Colorado and for weekly discussion-critique sessions. Prereq., JOUR 3614.

JOUR 4624-4. NewsTeam. Students participate in *NewsTeam Boulder*, a program broadcast live over the Boulder cable television system. Prereq., JOUR 4354. Restricted to senior BCNS majors. Same as JOUR 5624

JOUR 4634 (1-3). Broadcast Projects. Covers interpretation, preparation, and/or reporting in programs for broadcast media. Prepares radio or television documentaries and informational/entertainment programs. Prereqs., JOUR 3604 and 3644, or instructor consent.

JOUR 4644-3. Advanced Camera and Editing. Emphasizes the advanced techniques in digital video camera usage and digital editing for professional broadcast video production. Prereq., JOUR 4354. Available spring and fall.

JOUR 4875-6. Special Topics: Boulder Digital Works. May be repeated up to 24 credit hours. Pass/fail only.

JOUR 5344-3. Video Documentary Production. Same as JOUR 4344.

JOUR 5514-3. Newsgathering for Television. Covers principles and techniques involved in the preparation of news for broadcasting. Introduces the use of television equipment. Covers principles and techniques involved in the preparation of news for broadcasting. Introduces the use of television equipment.

JOUR 5524-3. Television Investigative Reporting. Covers how to produce quality, substantive, in-depth stories for television. Covers the basics of investigative reporting, research, and working with sources.

JOUR 5624-4. NewsTeam. Prereqs., JOUR 5511 and 5514. Same as JOUR 4624.

JOUR 5634 (1-3). Broadcast Projects. Prereq., instructor consent. Same as JOUR 4634.

JOUR 5644-3. Advanced Camera and Editing. Prereq., JOUR 5514. Same as JOUR 4644.

JOUR 4674 (1-3). Television Production 3. Provides in-depth experience in directing television programs. Prereq., JOUR 3674.

JOUR 5874 (1-3). Special Topics: Electronic Media.

Law School

Business

LAWS 5121-4. Contracts. Covers basic principles of contract liability, offer, acceptance and consideration, statute of frauds, contract remedies, the parole evidence rule, performance of contracts, conditions, effect of changed circumstances, third-party beneficiaries, assignment, and specific performance.

LAWS 6011-3. Payment Systems. Examines the methodology and policies of Articles 3 and 4 of the Uniform Commercial Code, dealing with such topics as negotiable instruments, bank deposits, collections, letters of credit, and electronic fund transfers.

LAWS 6021-3. Secured Transactions. Explores the methodology and policies of Article 9 of the Uniform Commercial Code, dealing with financing transactions in personal property.

LAWS 6201 (3-4). Agency, Partnership, and the LLC. Surveys agency law whose principles are important in many other areas of law. Studies the legal organizations commonly used by small businesses: partnerships and limited liability companies (LLCs).

LAWS 6211-3. Corporations. Covers formation of corporations and their management; relations among shareholders, officers, and directors; the impact of federal legislation on directors' duties; and the special problems of closed corporations.

LAWS 6281-3. Accounting Issues for Lawyers. Studies accounting and auditing problems in the form they are placed before the lawyer, including a succinct study of basic bookkeeping, in-depth legal analysis of the major current problems of financial accounting, and consideration of the conduct of the financial affairs of business.

LAWS 6511-3. Labor Law. Includes the subjects of evolution of labor relations laws; how a collective bargaining relationship is established; negotiation of the collective bargaining agreement; labor and the antitrust laws; and rights of the individual worker. Course materials frame the issue of how a developed or postindustrial democracy deals with the problems that arise out of the employment relationship: of the choices between laissez-faire, substantive regulation, and the private ordering of the employment relationship through the collective bargaining process.

LAWS 6521-3. Employment Law. Entails a survey of employment-at-will, workplace safety, workplace torts; ERISA and retirement, workers' compensation; controls on hours and wages; health insurance; disability and unemployment compensation.

LAWS 6541-2. Colorado Worker's Compensation Theory and Practice. Introduces the legal theories that underlie the no-fault compensation system, its historical evolution, policy conundrums, and ethical quandaries. Teaches the application of the procedural rules most frequently utilized in administrative setting. Studies the Workers' Compensation Act, the Workers' Compensation Rules of Procedure, and the Office of Administrative Courts Rules of Procedure.

LAWS 7011-3. Creditors' Remedies and Debtors' Protection. Examines typical state rights and procedures for the enforcement of claims and federal and state law limitations providing protection to debtors in the process. Includes prejudgment remedies, statutory and equitable remedies, fraudulent conveyance principles, and exemptions and other judicial protections afforded debtors.

LAWS 7021 (3-4). Bankruptcy. Briefly examines nonbankruptcy business rehabilitation devices, followed by basic principles of federal bankruptcy law and the bankruptcy court system. Concludes with attention to business reorganizations under Chapter 11 of the Bankruptcy Code. Recommended prereq., LAWS 6001 and 7011.

LAWS 7101-4. Deals: Engineering Financial Transactions. Explores the business lawyer's role in creating value by helping clients identify, assess, and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions.

LAWS 7111-3. Contract Theory: Collisions of Contracting and Culture. Explores various contract theories and principles emanating from classical and neoclassical law, legal realism, law and economics, critical legal studies, law and society,

relational theory, and others. Considers and critiques these theories as applied to particular contracting cultures, especially as applied to construction contracts.

LAWS 7121-3. Advanced Contracts: Commercial Transactions. Studies Article 2 and Article 2A of the Uniform Commercial Code, together with the Convention and the International Sale of Goods. Advanced contracts topics are explored in depth. Among other subjects, warranties, title, remedies, and risk of loss in the sale of lease of goods will be studied.

LAWS 7201-3. Antitrust. Studies American competition policy: collaborations among competitors, including agreements on price and boycotts, definition of agreement, monopolization, vertical restraints such as resale price maintenance, and territorial confinement of dealers. Offered in alternate years.

LAWS 7211-3. Business Planning. Focuses on the development and use of concepts derived from a number of legal areas in the context of business planning and counseling. Topics such as formation of business entities, sale of a business, recapitalization, division, reorganization, and dissolution are considered. Prereq., LAWS 6007, 6201, and 6251 or 6211.

LAWS 7221 (2-3). Government Regulation of Business. Covers themes that explore the nature of the regulatory state and the realities of how businesses react to regulation. Provides an understanding of regulatory institutions; the tools of governmental regulation; and a critical perspective on regulation.

LAWS 7261-3. Corporate Finance. Examines a variety of important legal issues related to the funding and financing corporations including creditor protection laws, the Trust Indenture Act of 1939, fiduciary duties, bond indenture provisions, securities laws, and rights of equity holders. Covers efficient capitalization structures, corporated valuation techniques, capital markets and the efficient market theory, and cost of capital concept. Prereq., LAWS 6211 or 6251.

LAWS 7271-3. Venture Capital and Private Equity. Provides overview of the legal and financial principles to represent privately held companies, their founders and managers, and their investors. Emphasizes transaction structuring rather than judicial opinions. Includes the organization and financing of start-ups, structuring buyout transactions, exit strategies, legal organization of investment funds and other financial intermediaries. Discusses the relevant regulatory landscape, including securities law, bankruptcy, ERISA, and tax law.

LAWS 7331-2. Sports Law. Covers the application of rules from agency, antitrust, contracts, constitutional law (including sex discrimination), labor law, property, torts, unincorporated associations, and other subjects to those persons involved in the production and delivery of athletic competition to consumers. Explores the development of the application of these rules to a sports setting and related economic issues.

LAWS 7401-3. Securities Regulation. Stresses statutory interpretation of the various federal statutes regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes.

LAWS 7411 (2-3). Mergers, Acquisitions, and Reorganizations. Studies the planning of corporate mergers, acquisitions, and reorganizations, examining the application and integration of state corporate law, federal securities law, accounting principles, tax law, labor law, products liability law, environmental law, ERISA, and antitrust law.

LAWS 7451-3. Law and Finance for Entrepreneurs. Studies unique legal problems faced by entrepreneurs, including formation issues (choice of entity, rights of the founders, initial investors), operation issues (governance, key employees, intellectual property, financing), IPOs, and buy-outs.

LAWS 7541 (2-3). Employment Discrimination. Examines statutory and constitutional prohibitions of discrimination in employment on the basis of race, gender, age, religion, national origin, and disability.

LAWS 7601 (2-3). Business Transactions. Provides a practical understanding of how to apply the law in both transactional and litigation settings. Gives an interdisciplinary look at how various areas of the law are brought together in common factual settings. Teaches students to negotiate, document, and close the acquisition of a business covering the areas of practice of corporate, contracts, real property, secured transactions, and bankruptcy law. Tests, in a litigation setting, the decisions made during the acquisition stage.

LAWS 8021-3. Seminar: Consumer Empowerment. Considers contract theories and principles emanating from classical and neoclassical law, legal realism, law and economics, and critical legal studies. Explores and questions tensions

among theories, focusing on how they interact with norms, goals, and functions of contract and consumer protection law. Observes these tensions “in action” through volunteer work with Heritage House, a home for young women who are “at risk” and cannot live with their families at this time for different reasons

LAWS 8101-3. Deals Workshop: Law and Economics of Deals, Entrepreneurship, and Institutions. Explores the foundational and advanced topics in the law and economics of deals, entrepreneurship, and institutions. Topics include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity, higher education, and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful. Prereq., LAWS 6211 or 6201. Restricted to LAWS students.

LAWS 8351-2. Seminar: Law and Economics of Utility Regulation. Discusses economics of regulation and matters ranging from neoclassical economic analysis to public choice theory to new institutional economics. Discusses several regulatory domains, including antitrust law, telecommunications regulation, and energy regulation. Highlights both economic and non-economic goals, including universal service, sustainability (e.g., renewable energy), and architecture (e.g., free speech concerns with regard to telecommunications networks). Prereqs., LAWS 6301 or 7201 or 7241 or TLEN 5835. Restricted to Law and TLEN students.

LAWS 8401-2. Seminar: Securities Litigation and Enforcement. Designed for students interested in studying topics related to securities litigation. Covers civil liability under the Securities Act of 1933, proxy fraud, class actions (with special emphasis on the Private Securities Litigation Reform Act and the Securities Litigation Uniform Standards Act), market manipulation, SEC enforcement actions, enforcement issues involving attorneys and accountants, criminal enforcement, international securities fraud, and securities arbitration.

LAWS 8521-2. Seminar: Comparative Labor Law. Explores the laws and economic transformations that affect labor relations on a global scale.

LAWS 8701-2. Seminar: Counseling Families in Business. Explores the legal aspects of owning, managing, and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business, and conflict resolution. Recommended prereqs., LAWS 6104, 6157, 6211, and/or 7409.

Environment, Natural Resources and American Indian

LAWS 6002-3. Public Land Law. Deals with the legal status and management of resources on federal lands, including national forests, parks, and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife, and wilderness resources on public lands. Prereq., LAWS 6112.

LAWS 6112-3. Foundations of American Natural Resources Law. Introduces students to the law of natural resources. Examines the legal, historical, political, and intellectual influences that shape resources development and conservation. Same as ENV5 6112.

LAWS 6302-3. Water Resources. Analyzes regional and national water problems, including the legal methods by which surface and ground water supplies are allocated, managed, and protected.

LAWS 6502-2. Wildlife and the Law. Examines the law that protects wildlife, its habitat, and biodiversity. Explores human-caused threats including habitat destruction, illegal trade, and climate change. Focuses on statutes, case law, environmental ethics, and current controversies to highlight legal, scientific, and political strategies for protecting biodiversity. Particular emphasis is placed on the U.S. Endangered Species Act.

LAWS 6712-3. Climate Change Law and Policy. Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions, and key issues in policy design. Reviews the Supreme Court’s April 2, 2007, decision in *Massachusetts v. EPA*, overturning EPA’s refusal to regulate greenhouse gas pollution from motor vehicle tailpipes, and the aftermath in the courts, Executive Branch and Congress.

LAWS 6722-3. Energy Law and Regulation. Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regula-

tion and public utilities, the division of jurisdiction between federal and state governments, and the key federal statutes and regulatory regimes governing natural gas, electricity, and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail competition.

LAWS 7102 (2-3). Oil and Gas. Deals with the legal problems associated with private arrangements for the ownership and development of oil and gas: deeds and leases to oil and gas rights, trespass, adverse possession, implied covenants in leases, conveyances of fractional interests, and the interaction of private rights and conservation regulation.

LAWS 7122 (2-3). Mining and Energy Law. Addresses major issues affecting the development of mineral resources through mining activity. Includes the regulation of the impacts of mining on the environment on both public and private land. Covers the Mining Law of 1872, the Federal Coal Leasing Amendments, and state regulation of the impacts of mining on the environment.

LAWS 7132-3. Energy, Insecurity, Sustainable Law. Examines why national security deals not only with armed aggression and the ability to thwart military invasions or subversion, but also includes critical threats to vital national and international support systems such as the economy, energy, and the environment.

LAWS 7202-3. Environmental Law. Examines and analyzes important federal pollution control statutes, including the National Environmental Policy Act, the Clean Air Act and Clean Water Act, Solid Waste Act, and Superfund. Considers related economic theory, ethics, and policy issues.

LAWS 7212-2. Environmental Litigation. Examines the litigation strategies and procedures used to enforce and defend against enforcement under environmental protection statutes, such as the Clean Water Act, Clean Air Act, Resource Conservation and Recovery Act, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, and the Toxic Substances Control Act. Covers civil enforcement, and citizen’s suits.

LAWS 7402-2. The Law of Toxic and Hazardous Wastes. Examines the EPA’s federal hazardous waste statutes, including the Resource Conservation and Recovery Act of 1976 (RCRA), and the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Analyzes the RCRA “cradle-to-grave” hazardous waste program, and addresses the evolving CERCLA liability scheme and cleanup process.

LAWS 7725-3. American Indian Law I. Investigates the federal statutory, decisional, and constitutional law that bears upon American Indians, tribal governments, and Indian reservation transactions.

LAWS 7735 (2-3). American Indian Law II. Examines selected issues in the field emphasizing major emerging problems and reform proposals. Examples of issues include Alaska development and the Indian Child Welfare Act.

LAWS 7745 (2-3). Jurisdiction in Indian Country. Examines the current state of the justice system within Indian nations today. Includes understanding the respective roles of tribal and state law enforcement authorities, as well as the Bureau of Indian Affairs’ Office of Justice Services, the Federal Bureau of Investigation, and the Drug Enforcement Administration. Examines relationship between federal and tribal courts; substantive laws; and advocates who appear before them.

LAWS 8112 (2-3). Seminar: Advanced Natural Resources Law. Provides in-depth study and analysis of current problems in natural resources law, using historical, literary, and scientific materials. Includes field-trip, and requires additional field trip expenses. LAWS 6112 is strongly recommended as a prerequisite, however students must have taken or be concurrently enrolled in any three of the following: LAWS 6002, 6112, 6302 or 7725. May be repeated up to 5 total credit hours.

LAWS 8725-2. Seminar: Advanced Topics in American Indian Law. Examines a variety of current issues related to American Indian Law. The topics will change to reflect the subjects that emerge at each time that the seminar is offered. Some examples of topics considered in this seminar include legal protections for American Indian religion and culture, cultural property, Tribal law, gaming law, and Native American natural and cultural resources law. Coreq., LAWS 7725.

Family, Gender, and Health

LAWS 6105-2. Spanish for Family Law Practice. Provides Spanish-speaking students with vocabulary, legal-drafting skills, and a working knowledge of Spanish to enable them to serve families in the Family Law Division of the Boulder and Adams County Courts. Students prepare letters, memoranda, pleadings, and agreements in Spanish, role-play mock interviews with clients, and study specific legal rules that govern Boulder County and Adams County.

LAWS 7105-3. Family Law. Focuses on nature of marriage, actions for annulment and divorce, problems of alimony and property division, separation agreements, and custody of children. Also considers illegitimacy, abortion, contraception, the status of married women in common law and under modern statutes, and relations of parent and child.

LAWS 7115-2. Juvenile Justice. Covers a wide array of issues dealing with the legal rights of the unborn, children, and juveniles. Covers the legal status of parent-child abuse, delinquency and crime, and emancipation.

LAWS 7135-3. Parent, Child, and State. Examines the legal rights of parents and children in a constitutional framework, as well as the state's authority to define and regulate the parent-child relationship. Addresses rights of parents and children to freedom of expression and religious exercise, termination of parental rights and adoption, paternity orientation, and culture in defining the family.

LAWS 7405 (2-3). Health Law 2: Medical Malpractice and Quality Regulation. Explores (1) the law controlling ethical issues that arise during the delivery of medical care, (2) the substantive law of medical malpractice and tort reform aimed at reducing the frequency and severity of medical malpractice verdicts, and (3) the practical aspects of litigating a medical malpractice case. Cross-listed at the Anschutz Medical Campus; will include field trips there.

LAWS 7425 (2-3). Health Law. Acquaints students with the issues arising at the interface between law and medicine through analysis of cases and other materials. Critically analyzes methods used by courts and legislatures to address medical/legal problems in an effort to determine whether the legal resolution was reasonable and appropriate in light of medical, social, and political considerations. Offered in alternate years.

LAWS 7505-2. Sexuality and the Law. Examines the regulation of sexuality in local, state, and federal law, with particular emphasis on sexual orientation. Explores how sexuality shapes, and is shaped by, an array of laws and policies, which may include family law, military regulations, tax law, employment law, trusts and estates, obscenity law, and criminal law.

LAWS 7513-3. Domestic Violence. Explores the law, policy, history, and theory of domestic violence. Examines the limits of legal methods and remedies for holding batterers accountable and keeping victims safe; the dynamics of abusive relationships; the history of the criminal justice system's response to domestic violence; the defenses available to battered persons who kill their abusers; the legal paradigm of the sympathetic victim; psychological and feminist theories about abusive relationships; civil rights and tort liability for batterers and third parties; and the intersection of domestic violence with international human rights.

LAWS 7775-1. Gender Law and Public Policy. Examines the relationship of law and gender in criminal law, and constitutional law, using feminist theoretical perspectives as the organizing principle. Each perspective is applied to cases and materials on such topics as violence against women, prostitution, pornography, and discrimination in education and athletics.

LAWS 8415-2. Seminar: Bioethics and Law. Focuses on legal, moral, and economic analyses of problems posed or soon to be posed by advances in biomedical technologies.

LAWS 8765-2. Seminar: Gender, Law, and Public Policy. Examines the relationship of law and gender in criminal law, and constitutional law, using feminist theoretical perspectives as the organizing principle. Each perspective is applied to cases and materials on such topics as violence against women, prostitution, pornography, and discrimination in education and athletics.

Government and Public

LAWS 5425-3. Torts. Studies nonconsensual allocation of losses for civil wrongs, focusing primarily on concepts of negligence and strict liability.

LAWS 6005-4. Constitutional Law. Studies constitutional structure: judicial review, federalism, separation of powers; and constitutional rights of due process and equal protection.

LAWS 6128 (1-3). Legislation. Examines theories of legislation and the relation between legislatures and courts, emphasizing problems of statutory interpretation and other issues in the judicial use or misuse of statutes.

LAWS 6205-3. Lawyers for Social Change. Helps students expand their perspective to understand the ways in which lawyers more broadly participate in social change work in this service learning class. Analyzes case histories of cause lawyering. The service learning component is based on the precept that one of the most effective ways to learn a role is to perform that role. Students will participate as social change lawyers by working with a local community to help it develop projects that the community believes will help it better itself.

LAWS 7015-3. First Amendment. Examines speech and religion clauses of the First Amendment. Includes the philosophical foundation of free expression, analytical problems in First Amendment jurisprudence, and the relationships between free exercise of religion and the separation of church and state.

LAWS 7025-3. Civil Rights Legislation. Presents a comprehensive study of federal civil rights statutes briefly reviewed in other courses (e.g., Constitutional Law or Federal Courts). Studies federal civil rights statutes, their judicial application, and their interrelationships as a discretely significant body of law of increasing theoretical interest and practical importance.

LAWS 7055-3. Education Law. Considers issues raised by the interaction of law and education. Issues may include the legitimacy of compulsory schooling, alternatives to public schools, socialization and discipline in the schools, and questions of equal educational opportunities.

LAWS 7205-3. Administrative Law. Covers practices and procedures of administrative agencies and limitations thereon, including the Federal Administrative Procedure Act, and the relationship between courts and agencies.

LAWS 7255-3. Local Government. Studies state legislative and judicial control of the activities, powers, and duties of local governmental units, including home-rule cities and counties, and some problems of federal, state, and local constitutional and statutory limitations on governmental powers when exercised by local governmental units (e.g., the powers to regulate private activities, tax, spend, borrow money, and condemn private property for public uses). Offered in alternate years.

LAWS 7325-3. Election Law. Examines the rapidly evolving field of election law: the right to vote, voting procedures, redistricting, candidate selection, campaign finance laws, and direct democracy. Emphasizes federal law, including applicable constitutional jurisprudence.

LAWS 7475-2. Advanced Torts. Studies selected tort actions and theories. Topics covered may include "dignitary torts" (e.g., defamation, privacy, etc.), business torts, and product liability.

LAWS 7515-3. Poverty Law. Explores the legal and policy responses to poverty in the United States and addresses how the law shapes the lives of poor people and communities. Examines the extent of poverty in the United States, the root causes, and the historical development of social welfare policy. Focuses on the rights-based aspect of poverty law and various policies that attempt to ameliorate poverty.

LAWS 7525-3. Race and American Law. Examines the judiciary's approach to racial discrimination from America's colonial period to the present day. Concludes with an analysis of the contemporary status of racial subordination in the legal system and considers recent scholarly critiques of the law's limitations in effecting racial justice. Employs an interdisciplinary approach and covers the experiences of American Indians, African Americans, Asian Pacific Americans, and Chicana/os.

LAWS 8005-2. Seminar: Advanced Constitutional Law Equality and Privacy. Addresses "equal protection" rights under the Fourteenth Amendment and "privacy" rights to personal autonomy. Analyzes varied constitutional grounds for recognizing or rejecting abortion rights; limits on Congressional power to pass civil rights laws granting broader rights than the Fourteenth Amendment does; treatment of sexual orientation-related laws and government actions as "privacy" versus "equality" matters; and "benign"/"remedial" race- and sex-based government decisions such as affirmative action and same-sex schools.

LAWS 8015 (1-3). Seminar: Constitutional Theory. Examines the role of the courts and the other branches of government in defining and enforcing constitutional

values. Relevant readings are from philosophy, social sciences, and legal scholarship, as well as cases.

LAWS 8025-2. Seminar: Advanced Topics in Federalism. Explores the development of “Our Federalism,” the relationship between federal and state governments, from the founding period of the U.S. Supreme Court’s recent New Federalism jurisprudence. Studies historical material, commentary, and case law, and addresses how federalism is defined; the values that federalism serves; the role of federalism in our interconnected, global society; the Supreme Court’s boundaries of federalism; the direction of New Federalism.

LAWS 8035-2. Seminar: Intersection of Antidiscrimination and First Amendment Law. Addresses past and continuing debates involving potential tensions between antidiscrimination principles and free speech, free exercise, and establishment clause values. Examines constitutional protections under the First Amendment and the equal protection clause, together with an array of existing and proposed federal and state antidiscrimination laws regulating employment, housing, and public accommodations, among other areas.

LAWS 8045-2. Seminar: Comparative Constitutional Law. Examines legal structures and concepts typically found in constitutions, including judicial review, distinction between legislative and executive authority, federalism and the principle of subsidiarity, the relationship between church and state, free speech and press, and social welfare rights. Examines differences between constitutional law and other domestic law, role of comparative constitutional law in domestic constitutional law adjudication. Emphasizes American and Swedish perspectives.

LAWS 8055 (1-2). Seminar: Media, Popular Culture, and the Law. Examines how the institutions, practices, and the very identity of law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed in this seminar: To what extent and how are the forms and methods of the new media having an effect on the perception, role, and identity of law? This is a year-long seminar.

LAWS 8095-2. Seminar: Problems in Constitutional Law. Explores how theories of social freedom and self-governance developed in the United States. Analyzes the most controversial socio-legal issues as they relate to privacy, equal protection and other questions of substantive due process. Discusses recent trends in national security and information privacy to evaluate their overall relevance to civil liberties and nascent influence on the fundamental rights debate in the U.S. and abroad.

LAWS 8395-2. Seminar: Separation of Powers. Explores the constitutional relationships among the three branches of the federal government in the sphere of domestic matters, omitting foreign affairs and war. Develops topics including executive orders, Congressional control of the executive and the courts, appointment and removal of officers, impeachment, executive privilege, use of military tribunals, and the election of 2000. A seminar paper will be required.

LAWS 8405-2. Seminar: Public Health Law and Ethics. Explores rules of law pertaining to the American public health care system and the ethical issues raised by the government’s effort to protect the health of the American people. To be held at Anschutz Medical Campus.

LAWS 8508-2. Seminar: Constitutional Foundations Core Ideas. Focuses on core ideas in U.S. constitutional law, such as means/ends analysis, institutional competence, rights definitions, and juridical techniques for limiting governmental powers. Draws from historical writings, contemporary press accounts, learned treatises, oral arguments, law review articles, and key judicial opinions such as *Mccullough v. Maryland*, *Lochner v. New York*, *Brown v. Board of Education*.

LAWS 8515-2. Seminar: Forced Labor. Reviews several regimes of compulsory labor that have been central to the American experience: Black chattel slavery in the antebellum South; debt peonage, criminal surety, and related institutions of agricultural involuntary servitude; convict leasing and other forms of compulsory inmate labor; “White slavery” and prostitution; and forced labor among immigrants. Emphasizes the complicated role that the law has played, and in some respects continues to play, in both supporting and undermining such institutions.

LAWS 8535-2. Seminar: Class and Law. Explores issues relating social class to such areas as labor relations, law enforcement, controls on radical movements, and the distribution of wealth and power. Considers problems defining social class.

LAWS 8705-2. Seminar: Affordable Housing. Explores the policy, legal, and practical dynamics that drive the development and preservation of privately owned,

government subsidized affordable housing. Investigates the nature of the market for housing, with particular emphasis on multifamily rental housing, and debates about market failure in that context and then outline and contrast the major regulatory responses to such market failure. Explores how subsidy programs work in practice, focusing on model documents to frame sample transactions.

LAWS 8755-2. Seminar: Higher Education and the Law. Examines the goals, governance, norms, and ideals of American institutions of higher education, and how those policies are shaped by the legal system. Examines the legal relationship between institutions of higher education and its various constituents: faculty, presidents, governing boards, students, alumni, and staff. Spans several traditional doctrinal categories, including contract, torts, employment law, constitutional law, intellectual property, tax, and antitrust.

Intellectual Property/Technology/ Telecommunication

LAWS 6301-3. Introduction to Intellectual Property. Provides an overview of our nation’s intellectual property laws, including patents, copyrights, trademarks, and trade secrets. Discusses other matters related to intellectual property, including licensing, competition policy issues, and remedies. Same as TLEN 5245.

LAWS 6321-3. Computer Crime. Explores the legal issues that judges, legislators, prosecutors, and defense attorneys are confronting as they respond to the recent explosion in computer-related crime. Includes the Fourth Amendment in cyberspace, the law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal/state relations in the enforcement of computer crime laws, and civil liberties online. Same as TLEN 5535.

LAWS 7241-3. Telecommunications Law and Policy. Examines laws governing telecommunications industries, including federal and state regulation and international aspects. Includes telephone, cable, satellite, cellular, and other wireless systems, and the Internet.

LAWS 7301 (2-3). Copyright. Examines state and federal laws relating to the protection of works of authorship ranging from traditional works to computer programs. Studies the 1976 Copyright Act as well as relevant earlier acts. Gives attention to state laws, such as interference with contractual relations, the right of publicity, moral right, protection of ideas, and misappropriation of trade values, that supplement federal copyright.

LAWS 7311 (2-3). Patent Law. Covers selected topics, such as patentable subject matter, patentability, and utilization of patent rights through licensing and infringement litigation. Covers practice and procedure of the patent and trademark office.

LAWS 7321-2. IP and Technology Contracting. Covers transactions, and often high-tech deals involving intellectual property rights. Studies IP ownership; assignment or rights; commercialization transactions (licensing, distribution, strategic); antitrust; and emerging issues. Gives students essential tools to draft and analyze technology contracts. Prereqs., LAWS 6301 or 7301.

LAWS 7323-2. Patent Litigation. Focuses on unique aspects of patent litigation: substantive patent law, civil procedure, federal jurisdiction, and litigation strategy; includes claim construction, infringement, anticipation and obviousness defenses, unenforceability challenges, declaratory judgments, injunctions, damages, settlements, licenses, and trial strategy. Of interest and useful to those interested in intellectual property generally, not just patents or in litigation.

LAWS 7341-3. Trademark and Unfair Competition Law. Examines trademark protection, the interaction of trademark and unfair competition law with other intellectual property doctrines, the requirements for acquiring and retaining federal trademark rights, false advertising and other misrepresentations, the right of publicity and related claims, remedies for infringement, and international aspects of trademark protection.

LAWS 7361-2. Privacy, Security, and Digital Rights Management. Introduces students to the laws that regulate the basic technologies of the Internet and the management of information in the digital age. It examines the most significant statutes, regulations, and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act.

LAWS 7371-3. Standardization and Standards Wars. Examines current issues in the standardization of telecommunications and information technologies. Covers

the importance of standards, government and private sector perspectives, and the impact of information age technologies on standards of development. Emphasizes key national and international organizations.

LAWS 8311-2. Seminar: Computer Crimes. Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront with the recent explosion in computer related crime. Includes Fourth Amendment in cyberspace, law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal and state relations in enforcement of computer crime laws, and civil liberties online.

LAWS 8321-2. Seminar: Computers and Law. Explores a range of topics surrounding the juxtaposition of computers and law. Most are aware of the impact that law has on computers through the myriad of regulations that govern computers and related technologies. Less well known is the impact that computer technology is having on governance and on the practice of law. Explores both sides of this dynamic interplay between law impacting computing, and computing impacting law.

LAWS 8361-2. Seminar: Information Privacy. Explores the laws that regulate the basic technologies of the Internet and the management of information in the digital age. It examines the most significant statutes, regulations, and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act.

International

LAWS 6008-3. The International Legal Order: History and Foundations (1500–1950). Examines the structural and historical aspects of the international legal system. Examines contemporary attitudes, doctrines, and theories of international law by exploring the fundamental questions since the discipline's inception in the 16th Century. Provides a working familiarity with the origins of Public International Law, International Human Rights Law, International Criminal Law, International Organizations, International Trade Law, Law and Development, and Conflict of Laws.

LAWS 6210 (2-3). Comparative Law. Considers foreign solutions to certain key legal problems. Focuses on general problems of legal process, rather than on substantive rules. Topics include the role of lawyers, civil dispute resolution, criminal procedure, and employment discrimination. Covers different legal systems in different years.

LAWS 6220-3. Introduction to Jewish/Israeli Law. Outlines the history and basic principles of Jewish Law, Halakic system that encompasses Biblical law and the Rabbinic law. Covers Legal Sources of the Jewish laws, interpretation, legislation, custom, precedence and legal reasoning. Explores the study of modern legal system of the state of Israel and examines the problematic nature of the incorporation of the Law of personal status in the Rabbinical and in general courts.

LAWS 6400-3. International Law. Examines the nature, structure, and sources of international law, the relationship between international law and domestic U.S. law, the role of international organizations such as the United Nations, the methods of resolving international disputes, the bases of international jurisdiction, and select substantive areas of international law that may change from semester to semester.

LAWS 6410-3. International Trade Law. Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties, and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection.

LAWS 6420-1. Law and the Holocaust. Explores comparative law, jurisprudence, conflicts of laws and international law. Examines the Nazi philosophy of law emanating from its egregious racial ideology, and how it was used to pervert Germany's legal system to discriminate against, ostracize, dehumanize, and eliminate certain classes of people. Studies the role of international law in rectifying the damage by bringing perpetrators to justice and constructing a legal system designed to prevent a repetition.

LAWS 6510 (2-3). International Environmental Law. Examines international environmental law, including transboundary impacts and global issues. Addresses such issues as intergenerational equities, principles of compensation, and if

international environmental norms should receive special environmental norm consideration. A course in public international law is not a prerequisite, but students who have not taken such a course will probably find it useful to do some additional background reading. Offered in alternate years.

LAWS 6518-3. Introduction to Islamic Law. Examines the Formative Era of Islamic Law, through its sources and methodologies. Examines the Established Era of the Schools of Law including differences between Sunni and Shiite Islamic Law. Examines human rights, terrorism, political Islam, women's rights and rights of religious minorities, criminal law, and finance law, and the growing role of fundamentalism in these areas. Examines the relevance of Islam and Islamic law in today's world.

LAWS 6531-3. Comparative Employment Law. In today's globalized world, lawyers are increasingly likely to encounter issues involving foreign employment. The course will provide substantive knowledge about foreign employment law and its relation to American law, as well as a comparative framework to assess the relative merits of the American approach to employment law.

LAWS 7065-3. Immigration and Citizenship Law. Covers legal issues pertaining to noncitizens of the United States, especially their right to enter and remain as immigrants and nonimmigrants. Topics include admission and exclusion, deportation, and refugees and political asylum. Approaches topics from various perspectives, including constitutional law, statutory interpretation, planning, ethics, history, and policy.

LAWS 7100 (2-3). International Criminal Law: Theory and Practice. Exposes students to the rapidly growing body of jurisprudence, both international and national, wherein international humanitarian and human rights law are being applied for the purposes of prosecution, trial and punishment of individuals alleged to be responsible for the commission of war crimes, crimes against humanity, genocide and, more recently, terrorism. Prereq., LAWS 6400.

LAWS 7310-3. International Dispute Settlement. Examines various mechanisms for the settlement of international disputes. Includes negotiation, inquiry, mediation, conciliation, arbitration, and adjudication. Focuses on intergovernmental dispute resolution. Prereq., any international law course or alternative dispute settlement.

LAWS 7320-3. International Criminal Law. Surveys international human rights law and international crime and punishment. Addresses idea of rights from a historical, philosophical, conceptual, and analytical perspective; explores the "primary rules of conduct" as well as adjudication and remedies, and selected rights from a comparative perspective. Recommended prereq., LAWS 6400.

LAWS 7440-3. International Human Rights and Humanitarian Law. Surveys international human rights both in law and in philosophy, both current and historical. Prereq., LAWS 6400.

LAWS 7605-2. Refugee and Asylum Law. Focuses on protections offered under international and domestic law for persons who are threatened by persecution or other adverse conditions in their country of origin. Covers who is a refugee and the protections they have or do not have under United States and international law.

LAWS 7611 (2-3). International Business Transactions. Examines the sources of international business law, the relationship between such law and the U.S. legal system, the choice of law in international business disputes, the special issues that arise when doing business with foreign governments, the law governing international sales and the shipment of goods, and international intellectual property protection. Offered in alternate years.

LAWS 8310-2. Seminar: International Crimes Punishment. Addresses issues in international criminal law in three parts: 1) basic contents of international law, 2) international criminal tribunals that enforce international criminal law, and 3) national efforts to bring international criminal prosecutions. Recommended prereqs., LAWS 6400 and 7440.

LAWS 8320-2. Seminar: Oil and International Relations. Addresses the extent to which the international community of nations is oil dependent. Assesses the impact and the geopolitical dangers to international relations arising from the expanding demand for scarce oil from developing, as well as developed, economies.

LAWS 8430-2. Seminar: Comparative Public Health Law and Ethics. Compares public health law systems to those in other countries. Studies the goals, legal structures, and services provided, together with such issues of coercion as quarantines, monitoring, mandates and prohibitions, and forcing pharmaceutical companies to make available inexpensive generic drugs.

Jurisprudence and Perspective

LAWS 6103 (2-3). Legal Ethics Professionalism. Examines the legal profession as an institution, its history and traditions, and the ethics of the bar with particular emphasis on the professional responsibilities of the lawyer. Discusses the Model Rules of Professional Conduct.

LAWS 6108-3. Conflict of Laws. Addresses the conflicts that arise when the significant facts of a case are connected with more than one jurisdiction, whether that jurisdiction belongs to a state, the federal government, or a foreign government. The subject is studied in its theoretical and historical context, with special emphasis on the international aspects of extraterritorial jurisdiction.

LAWS 6308-2. Law and Biology. Investigates whether humans have an instinct for fairness and justice, the nature of good and evil, and why people behave the way they do. Studies why groups of people pass laws to express how they expect group members to behave. Examines questions about the foundations of law, first by surveying traditional philosophical and economic approaches to human behavior, and then by examining recent developments in genetics, human evolution and the emerging law, economics and biology synthesis.

LAWS 6318-3. Economic Analysis of Law. Introduces the basic elements of economic theory and emphasizes demand and utility, cost, and optimality.

LAWS 6503-3. Law and Social Sciences. Explores disparities in criminal sentencing and death penalty cases; quality and effectiveness of legal representation for indigent criminal defendants; relationship between modifications in traditional steps in legal process; connection between alternative tort doctrines and volume of litigation, trial rates, plaintiff success rates and award size; impact of congressional statutes and U.S. Supreme Court decisions on handling and outcomes of habeas corpus petitions.

LAWS 6528-3. Capital Punishment in America. Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.

LAWS 7085-2. Law and Religion. Uses judicial decisions as well as historical and theoretical materials to explore significant aspects of the relationship between law and religion. The religion clauses of the First Amendment are a central but not exclusive subject of study. Offered in alternate years.

LAWS 7128 (2-4). Jurisprudence. Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies, and law and literature. Same as LAWS 8128.

LAWS 8318-2. Seminar: Law and Economics. Introduces the uses and limitations of microeconomic theory for understanding and resolving legal problems. Emphasizes concepts prominent in the law and economics literature such as cost, transaction costs, utility, and rational self interest.

LAWS 8538-2. Seminar: Modern Legal Theory Core Ideas. Explores key ideas that have shaped American law and legal thought, such as Holmes' bad man, the Coase Theorem, the "hunch" theory of law, and others. Focuses on researching and writing many short papers.

LAWS 8548-2. Seminar: Theory of Punishment. Explores the various justifications that philosophers have developed to explain why we have the right to punish. Examines the historical evolution of our punishment system and focuses on the death penalty as a critical contemporary issue in the debate about the proper role of punishment in our society.

LAWS 8608-2. Seminar: Power, Ethics, and Professionalism. Examines critically the possibility and character of ethical reasoning within the legal profession in light of its institutional structures. Explores descriptive/normative accounts of the profession's structure, "professionalism," and individual conscience. Put simply, the seminar explores whether it is possible to be a good lawyer and ethical person.

Litigation and Procedure

LAWS 5223-2. Appellate Court Advocacy. Students prepare appellate briefs and related documents and deliver oral arguments before a three-judge court composed of faculty, upper-division students, and practicing attorneys. Practice arguments are videotaped and critiqued.

LAWS 5303-4. Civil Procedure. Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart.

LAWS 5313-3. Civil Procedure 2. Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart.

LAWS 5503-4. Criminal Law. Studies statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, the purposes of criminal law, and the constitutional limits upon it.

LAWS 6035-3. White Collar Crime. Examines distinctions between white collar crime and other types of criminal activity and the needs for and arguments against white collar laws and law enforcement. Studies securities fraud, mail and wire fraud, insider trading, money laundering, false statements, conspiracy and criminal forfeiture statutes. Includes use of the grand jury, privileges applicable in the corporate setting, immunity, discovery and the impact of parallel civil proceedings. Examines effect of government policy on corporations and their counsel, pre-trial and trial strategy, jury selection, and victim notification and restitution options.

LAWS 6045-3. Criminal Procedure. Focuses primarily on the constitutional limitations applicable to such police investigative techniques as arrest, search, seizure, electronic surveillance, interrogation, and lineup identification.

LAWS 6213-2. Advanced Appellate Advocacy. Advanced study and practice of written and oral appellate advocacy. Builds on the foundation established in the required first-year course in appellate advocacy, but provides more extensive coverage, practice, and evaluation. Personalized instruction in brief writing, including detailed, one-on-one critique of their work. Includes advanced techniques for organizing and writing a brief, and advanced instruction on the strategy and process of oral argument. Required to research, write, and rewrite an appellate brief, and conduct several oral arguments. Attend oral arguments of the United States Court of Appeals for the Tenth Circuit and the Colorado Court of Appeals. Prereq., LAWS 7106.

LAWS 6353-3. Evidence. Studies the methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges.

LAWS 6803-3. Quantitative Methods. Equips students to deal effectively with experts, whether as consultants or as adverse witnesses, and to enable the identification of a quantitative issue. Helps students to become multi-dimensional in quantitative literacy. Enables students to be comfortable reading statistical arguments, performing basic analyses, writing about statistics, expressing quantitative ideas in graphs, questioning an expert, and understanding the power of computer programming.

LAWS 7003-3. Federal Courts. Looks at structure and jurisdiction of the federal courts, emphasizing problems of federalism and separation of powers and their relationship to resolution of substantive disputes.

LAWS 7013-2. Supreme Court Decision Making. Students deliberate over several important cases as "justices" of the Supreme Court. Class is divided into three "courts" with the first hour spent in deliberation and the second hour in discussion of the deliberative process as well as the substantive issues.

LAWS 7023-2. Jury Selection and History. Studies the history of the jury from ancient times through the implications of *Apprendi*, the grand jury from the time of Henry II through modern federal practice, and current jury selection procedures, both federal and Colorado, both civil and criminal. Experienced trial attorneys will work with students to demonstrate jury selection.

LAWS 7045-3. Criminal Procedure: Adjudicative Process. Focuses primarily on criminal procedure at and after trial. Looks at bail, prosecutorial discretion, discovery, plea bargaining, speedy trial, jury trial, the right to counsel at trial, double jeopardy, appeal, and federal habeas corpus.

LAWS 7303-3. Complex Civil Litigation. Covers civil procedure in modern complex multiparty suits, including class actions in such settings as employment discrimination and mass torts, and problems in discovery, joinder, res judicata, collateral estoppel, and judicial management in such suits. Offered in alternate years.

LAWS 7333-2. Advanced Evidence: Forensic Science and the Criminal Courts.

Explores the admissibility of forensic science opinion and expert testimony, its use as evidence at a trial, and the challenges that such evidence may pose for the courts and the entire criminal justice system in the future.

LAWS 7345-2. Comparative Criminal Procedure. Takes an in-depth look at some of the basic features of modern criminal justice systems that share the civil law tradition with the hope that such study will provide a vehicle for a deeper understanding of the strengths and weaknesses of the American system of criminal justice. Prereq., LAWS 6045.

LAWS 8335-2. Seminar: Advanced Criminal Procedure. Focuses on a particular topic in criminal procedure. Topics include the privilege against self-incrimination, juries, and defense and prosecution ethics.

Practice: Clinical and Simulation

LAWS 6009-4. Legal Aid Civil Practice 1. Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353.

LAWS 6019-4. Civil Practice Clinic 2. Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353.

LAWS 6029-4. Legal Aid Criminal Practice 1. Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353.

LAWS 6039-4. Criminal Defense Clinic 2. Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353.

LAWS 6079-4. Criminal Defense Clinic. Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants. Develops working knowledge of courtroom skills, advocacy, and evidence presentation. Concludes with full mock trial. Prereq. or coreq., LAWS 6353.

LAWS 6109-2. Trial Advocacy. Focuses on voir dire, opening statement, direct examination of witnesses, and cross examination.

LAWS 7029-3. Appellate Advocacy Clinic. Provides a clinical course that enables students to work on briefs of criminal cases being handled by the Appellate Division of the Public Defender or Attorney General's Office. Instruction in oral advocacy is given. Enrollment limited to eight students.

LAWS 7106 (1-2). Rothgerber Moot Court Competition. Offers an intensive involvement in legal research, appellate brief writing, and oral arguments in a competitive context. Student finalists may continue involvement in regional and national competitions.

LAWS 7159-2. Advanced Trial Advocacy. Offers an advanced course covering trial practice elements. Open only to students who have taken LAWS 6109.

LAWS 7169-2. Motions Advocacy. Provides practical training in preparing and arguing pretrial, post-trial, and chambers motions to an experienced federal judge based on materials from actual case files. Assigns some research papers. Limited to 15 third-year students with interest in trial advocacy and willingness to participate in confrontational exercises. Counts as practice hours.

LAWS 7209 (1-3). Natural Resources Law Clinic. Offers hands-on experience in the practice of natural resources law in the Rocky Mountain region to a select number of clinic students. The clinic's docket of active cases focuses on public land law and the environmental statutes protecting those lands and their resources. Students participate in projects that test the full range of lawyering skills, including traditional litigation, administrative advocacy, legislative drafting, and the conduct of complex negotiations and settlements.

LAWS 7309 (2-4). American Indian Law Clinic. Offers a clinical education course involving participation in the representation and advocacy of Indian causes—land or water claims, Indian religious freedom, job or other discrimination based on race, and issues implicating tribal sovereignty. Recommended prereq., LAWS 7725.

LAWS 7406-1. International Moot Court Competition. Open only to students who actively participate in the seminar preparing for the competition, in the preparation of memorials for the competition, and in the practice of oral arguments or regional oral arguments.

LAWS 7409-3. Legal Negotiation. Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes. Credit is not given for both LAWS 7419 Legal Negotiation and Dispute Resolution and this course.

LAWS 7429-2. Alternative Dispute Resolution. Examines a variety of dispute resolution processes, such as mediation, arbitration, minitrials, and court-annexed settlement procedures, as alternatives to traditional court adjudication. Credit not given for both LAWS 7419 Legal Negotiation and Dispute Resolution and this course.

LAWS 7439 (2-3). Mediation. Explores mediation, one of the more important methods of alternative dispute resolution, and the legal issues that may arise related to mediation. Considers what kinds of persons and disputes are most appropriate for mediation. Includes role playing.

LAWS 7449 (2-4). Juvenile Law Clinic. Examines the world of child welfare from the view of the child client, by representing their best interests in abuse and neglect cases. As Guardians ad litem, students will represent children in abuse and neglect cases from the beginning, at the temporary shelter hearing, through the conclusion of the case at a permanency orders hearing. Prereq., LAWS 6353. May be repeated up to 8 total credit hours.

LAWS 7509-1. Trial Competition. Student teams further develop trial and advocacy skills in a competitive mock-trial format involving two or more rounds of trials. Requires preparation of trial briefs and drafting other court pleadings and documents. Credit is limited to the top two teams (six students). Student finalists may continue involvement in regional and national competitions. May be repeated within the term up to 4 total credit hours.

LAWS 7609 (1-2). Law Practice Management. Studies the establishment of a solo or small-firm legal practice. Topics include the business structure (PC, LLC, etc.), office systems, marketing and development, staffing, liability insurance, managing time, technology, and billing. (This practice course counts toward the 14 credit hour maximum of practice hours.) Course supported by the Section of Law Practice Management of the ABA in memory of Harold A. Feder, CU Law '59.

LAWS 7619-2. Entrepreneurial Law Clinic. Advise indigent clients who need legal services in the founding of their business or not-for-profit firms, registering LLCs, and drafting employment and intellectual property agreements. Prereq., two of the following courses: Agency Partnership and the LLC, Corporations, Securities, Seminar on Corporate Law, Law and Finance for Entrepreneurs, Accounting Issues for Lawyers, Patent Law, Trademark, and International Business Transactions.

LAWS 7751-3. Arbitration. Discusses the nature of arbitration, tactical considerations in whether to use this form or another form of dispute resolution, the drafting of effective contracts to arbitrate the enforceability of these contracts, and the enforcement of arbitration awards. Covers the preclusive effect of arbitration proceedings, multiparty arbitration, and choice of law. Students conduct simulated arbitrations.

LAWS 7809 (2-4). Technology Law and Policy Clinic. Features technology law advocacy before administrative and legislative bodies. The mission of TLPC is: 1) to train and produce students equipped to conduct thoughtful analysis, and 2) provide unbiased assistance in the public interest concerning technology issues to regulatory entities, courts, legislatures and standard setting bodies. Recommended prereqs., LAWS 6301, 6318, or 7241. Same as TLEN 5250.

LAWS 7939 (1-7). Extern Program. Extern credit may be earned for uncompensated work for a sponsor, which may be any lawyer, judge, or organization that employs lawyers or judges and is approved by the Academic and Student Affairs Committee. Work is done under the direction of a field instructor (a lawyer or judge as the sponsor) and a member of the law faculty. Requires a substantial writing component and 50 hours of working time per credit hour. A minimum of 1 and a maximum of 7 credit hours may be earned. Classified as practice credit.

Property

LAWS 5624-4. Property. Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.

LAWS 5634 (2-3). Property 2. Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.

LAWS 6004-3. Real Estate Transactions. Focuses on legal issues that arise in all phases of real estate transactions, with an emphasis on the role of the lawyer in the business of real estate as well as on the regulation of real estate markets.

LAWS 6104-3. Wills and Trusts. Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; and construction problems in estate distribution.

LAWS 6114-2. Construction Law. Focuses on the basic principles and practices of construction law. Provides an overview of construction industry participants and players (engineers, contractors, insurers, etc.) and discusses and analyzes the various obligations and liabilities of these parties. Covers construction and design contracting, construction claims, professional negligence, construction insurance and suretyship, and ADR in construction. Provides transactional-practice oriented exercises.

LAWS 7024 (2-3). Real Estate Planning. Considers various contemporary legal problems involved in the ownership, use, development, and operation of real estate. Emphasizes the income tax and financing aspects of commercial and residential use and development such as shopping plazas and apartment buildings. Same as ACCT 6730.

LAWS 7154-3. Land Use Planning. Explores mechanisms for public control of private land uses, such as planning, zoning, and regulation of land development; including consideration of federal and state constitutional and statutory limitations on local governments. Offered in alternate years.

LAWS 7164-2. Land Conservation Law. Focuses on private land conservation efforts in the United States, and particularly Colorado, and also considers public land conservation programs. Analyzes real property principles and instruments used to protect land, and the development and acceptance of conservation easements in gross as a mechanism for protection, financing mechanisms for land conservation, including direct government funding and indirect funding through tax incentives at the federal, state and local levels. Understanding of Real Property and Tax concepts helpful.

LAWS 8104-2. Seminar: Cities, Suburbs, and the Law. Explores dynamics that play out in the relationship between cities, suburbs, exurbs and other patterns of urban development. Explores the nature of local power, relations between local jurisdictions, and metropolitan and regional approaches to governance. Includes fiscal disparities, ethnic and racial segregation, sprawl and growth controls, affordable housing, transportation, and the urban/rural divide.

Research and Writing

LAWS 5226-2. Legal Writing. Provides an intensive introduction to the resources available for legal research. Students also prepare written material of various kinds designed to develop research skills, legal writing style, and analysis of legal problems.

LAWS 6206-3. Litigation Drafting. Examines the intersection of civil procedure and legal writing. Emphasizes the drafting of persuasive adversarial litigation documents, including complaints, answers, motions in limine, motions to dismiss, motions of summary judgment, and jury instructions. Intensive writing and workshop format.

LAWS 6226 (2-3). Advanced Legal Research and Writing. Focuses on improvement of legal writing skills including organizing, drafting, and revising legal writing. Improves research and analysis skills.

LAWS 6236-2. Judicial Opinion Writing. Places contemporary American judicial opinion in historical and comparative context. Analyzes individual and institutional writing choices that authors of judicial opinions must make and ethical dilemmas they must confront. Builds upon the first-year legal-writing curriculum. Challenges students to develop and defend their own opinion-writing approaches and styles as well as to write from approaches and in styles that are not their own.

LAWS 6458-2. Creative Writing for Lawyers. Requires substantial writing and reading. Begins with participants bringing to class a piece of creative writing consisting of three to five thousand words. Each session consists of one hour

of discussion and critique of an assigned writing exercise that everyone has prepared for the class, and one hour of workshop critique of each participant's longer work, in turn.

LAWS 6856-2. Advanced Legal Research. Offers an in-depth look at research resources and methods. Includes sources from the judicial, legislative, and executive branches of federal and state government; research in topical areas such as environmental law, taxation, and international law; and extensive coverage of secondary and nonlaw resources. Covers both print and electronic sources. Students will have several assignments and a final project.

LAWS 7846 (1-2). Independent Legal Research. Involves independent study and preparation of a research paper under faculty supervision. Students produce a research paper equivalent to a seminar research paper. A draft is submitted, subjected to critique by the faculty member, and redrafted. Available during or after the fifth semester of law school. Prereq., instructor consent.

LAWS 7896-1. Independent Legal Research: Law Review. Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the *University of Colorado Law Review*.

LAWS 7906-2. Independent Legal Research: Law Review. Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the *University of Colorado Law Review*.

LAWS 7916-1. Independent Legal Research: Journal of International Environmental Law and Policy. Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the *Colorado Journal of International Environmental Law and Policy*.

LAWS 7926-2. Independent Legal Research: Journal of International Environmental Law and Policy. Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the *Colorado Journal of International Environmental Law and Policy*.

LAWS 7936-1. Independent Legal Research: Journal of Telecommunications and High Technology. Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the *Journal of Telecommunications and High Technology Law*.

LAWS 7946-2. Independent Legal Research: Journal of Telecommunications and High Technology. Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the *Journal of Telecommunications and High Technology Law*.

LAWS 8458-2. Seminar: Law and Literature. Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka, and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal, and a final paper will be required.

Taxation

LAWS 6007-4. Income Taxation. Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

LAWS 6138 (2-3). Federal Tax Politics. Studies the tax system as the nexus of politics and economics. Examines how various interests and entities use the many tools of political power to shape the tax system. Intended for those interested in politics and legislation, rather than for the tax specialist.

LAWS 6157-3. Corporate Taxation. Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests, and liquidation.

LAWS 6167-3. Taxation of Conduit Entities. Studies federal income taxation of pass-through entities such as are used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests, and liquidation.

LAWS 7207-3. Federal Estate and Gift Tax. Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts, and involves elementary estate planning.

LAWS 7217-2. Estate Planning. Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of

generation-skipping transfers in trust, postmortem estate planning, and drafting of trusts and wills. Prereqs., LAWS 6104 and LAWS 7207.

LAWS 7617-3. International Taxation. Covers basic aspects of the United States taxation of income earned abroad by its citizens and the taxation of income derived by foreign persons from U.S. sources, including the implications of income tax treaties. Prereq., LAWS 6007 or 6157. Same as ACCT 6780.

LAWS 8407-2. Seminar: Tax Policy. Considers questions of fairness, efficiency, and promotion of social goals as they arise in federal, state, and local systems of raising revenue through user fees and through taxation of income, sales, property, and estates and gifts. Past seminar papers have covered the taxation of business organizations, the value added tax, the social security tax, the taxation of farming, and the tax exemption of religion. Offered in alternate years.

LAWS 5205-3. Legislation and Regulation. Introduces lawmaking in the modern administrative state. Examines the way Congress and administrative agencies adopt binding rules of law (statutes and regulations, respectively) and the way that implementing institutions—courts and administrative agencies—interpret and apply these laws. Considers the structure of the modern administrative state, the incentives that influence the behavior of the various actors, and the legal rules that help to structure the relationships among Congress, the agencies, and the courts. Restricted to LAWS students.

LAWS 6024-3. Real Property Security. Examines basic mortgage law, including use of mortgage substitutes (e.g., deeds of trusts and installment land contracts). Covers foreclosure and redemption and related problems; special priority problems in land acquisitions and construction financing; special financing devices, including variable-interest and wraparound mortgages; and problems relating to the transfer of the mortgagor's and mortgagee's respective interests.

LAWS 6031-2. Consumer Protection Laws and Policies. Focuses on deceptive trade practices and consumer rights. Reviews the law of deception/misrepresentation at common law, and federal and state laws regarding unfair acts and practices. Covers credit practices, environmental and health claims, and telecommunications and privacy. Discusses remedies, including governmental enforcement actions, and individual and class actions.

LAWS 6049-4. Legal Assistance 1: Federal Courts. Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.

LAWS 6059 (2-3). Legal Aid and Defender.

LAWS 6069-4. Immigration Clinic. Emphasizes practice skills in immigration cases. Includes litigation before Federal Immigration judges, Board of Immigration Appeals, and Federal Circuit Court of Appeals. Prereq. or coreq., LAWS 6353.

LAWS 6089-4. Legal Assistance 2: Federal Courts. Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.

LAWS 6099-4. Family Law Clinic. Represents low-income clients in family law cases in local state district court. Students will gain court-based experience in dissolution's and allocations of parental responsibilities. Seminar component includes instruction on substantive family law, related ethical issues, and theoretical backgrounds of poverty lawyering.

LAWS 6117-3. Survey of Business Enterprise Tax. Makes a comparative survey of federal income taxation of C corporations, S corporations, and partnership/limited liability companies, the principal entity choices for conducting business in the United States. Includes formation, operations, distributions, sales of interests, and liquidation. Suitable for students seeking introductory background for business or real estate practice, without the detail required for a tax specialist. Prereq., LAWS 6007.

LAWS 6122-2. International Natural Resources Law and Policy. Examines the suite of policy issues and legal ramifications associated with sustainable natural resource development. Examines most recent research on the "resource

course" theory. Examines recent policy developments and discussions that have occurred among industry, NGOs, multilateral development agencies, and governments. Examines issues related to bribery and corruption in developing country environments, and dispute resolution mechanisms at national and local levels.

LAWS 6179-2. Trial Practice. Students apply the rules and doctrine of evidence in simulated trial settings. Must be taken with the corresponding section of Evidence. Enrollment is to 24. Satisfies the trial practice requirement and counts 2 hours toward the 14 credit hour maximum of clinical hours counted toward graduation. Graded course; not pass/fail.

LAWS 6246-2. Introduction to United States Legal System/Legal Reasoning, Research and Writing. Introduces students without a law degree to the basic structure and content of the United States legal system, examining how the three branches of government at the state and federal levels make law and policy in the United States. Provides a basic introductory overview of the following: the various sources of law, including an understanding of how statutes are enacted by legislative institutions; the role of the United States court system in interpreting laws; application of judicial precedent in common-law systems; trial and appellate court procedures; and judicial review standards. Also introduces students to the methodology of American law, including legal reasoning, research, and writing, through a variety of in-class and outside research and writing assignments.

LAWS 6251-4. Corporations. Covers formation of corporations and their management; relations between shareholders, officers, and directors; the impact of federal legislation on directors' duties; and the special problems of closed corporations.

LAWS 6311-1. National Security and Privacy Law. Introduces national security and privacy law and relevant law, regulations, rules, policies, and guidelines.

LAWS 6363-5. Evidence and Trial Practice. Studies methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges. Applies rules and doctrine of evidence in simulated trial settings. Combined Evidence and Trial Practice course. Satisfies the trial practice requirement and counts two hours toward the 14 credit hour maximum in clinical hours.

LAWS 6415 (2-3). Drug Product Liability Litigation: Principles and Practice. Explores product liability lawsuits and litigation. Explores law of product liability and the tools necessary to successfully litigate these cases. Considers the theory and practice of lawsuits now and after the Supreme Courts landmark decision in *Wyeth v. Levine* (2009). Focuses on similarities and differences between the special context of FDA regulation. Considers the legal principles governing such lawsuits such as inadequate warning, the Learned intermediary Doctrine and medical causation.

LAWS 6501-3. Labor and Employment Law. Covers decisions and statutes concerning the employment relationship, including issues such as employment-at-will; health and safety; drug testing; job security; and the rights of employers, unions, and employees under the National Labor Relations Act and related legislation.

LAWS 6601-3. Corporate Transactions in Latin America. Introduces students to an overview of Latin American commercial and civil law systems, looking closely at Napoleonic and Chilean law. Explores the choice legal structures available for Latin American corporations; contract law that regulates business transactions in Latin America; and exploration of the way in which Latin American countries have joined international business trade agreements that pertain to Latin American nations such as the Vienna Convention and GATT.

LAWS 7005-3. Media Law. Surveys common, statutory, and regulatory law as applied to the mass media. Focuses on the law as it affects the gathering and publishing of news. Also examines the regulation of the electronic media.

LAWS 7079-2. Wrongful Convictions. Focuses on the issues and remedies in cases of people who have been convicted, whose traditional appellate remedies have been exhausted, and who continue to claim actual innocence. Preference given to those who have taken or are taking more criminal procedure courses.

LAWS 7095-2. Women in Law. Explores the role of women in the legal system by looking at women as parties, jurors, witnesses, lawyers, law professors, and judges. Explores the relationship of law and society to women as victims and offenders. Investigates law and society's response to adoption, lesbian/gay issues, rape, surrogate and bad mothers, and sexual harassment.

LAWS 7125-2. Advanced Domestic Relations. Offers advanced study of several domestic relations subjects, including both theoretical and lawyering issues. Tentative subjects include discovery, client interviewing and deposition preparation, asset valuation, working with expert witnesses, children as clients, and alternative dispute resolution. Recommended prereq., LAWS 7105.

LAWS 7200-3. Anthropology of Law. Reviews the relationship between the social and cultural features of both developed and developing country societies and the formal and informal legal institutions within them. Considers the nature of social control and constraint, judicial reasoning, fact finding, conciliation, mediation and arbitration, and legal discourse.

LAWS 7228-2. Intellectual Origins of the Constitution. Examines the views of the Constitution's framers as expressed in contemporaneous and antecedent writings and debates. Offered in alternate years.

LAWS 7248-3. History of Criminal Justice. Explores the social, cultural, and legal history of Anglo-American criminal justice from the 17th to the 20th centuries. Also examines tensions between various methods that historians employ to study crime and law.

LAWS 7251-3. Non-Profit Law. Examines the creation of a non-profit organization, in particular whether to choose a trust or a corporate form, how to qualify for federal tax exemption, and differences between private foundations and public charities. Examines fiduciary duty issues, restrictions on political activity and private benefit, and unrelated business income tax. Addresses tax incentives for charitable giving and state fundraising laws.

LAWS 7300 (2-3). International Litigation. Examines the special issues that arise in litigation in U.S. courts when one or more of the parties is a foreign individual, corporation, or government, or when the subject of the litigation concerns events occurring wholly or partly outside of this country. Includes personal jurisdiction over foreign defendants, extraterritorial service of process and evidence gathering, choice of forum, foreign sovereign immunity, the act of state doctrine, extraterritorial application of U.S. law, and recognition of enforcement of foreign judgments.

LAWS 7307-3. Taxation of Natural Resources. Considers the federal income tax aspects applicable to the exploration for, the development of, and the operation of natural resources, as well as the financing thereof. Also considers oil and gas, hard minerals, timber, and water. Offered in alternate years. Recommended prereq., LAWS 6007.

LAWS 7335-1. The Law of Presidential Elections. Examines the laws and regulations that uniquely shape presidential selection, analyzing practical applications as well as the broader constitutional and policy considerations. A combination of federal, state, and local laws shapes how Americans select their president. But more than ever before, Americans are questioning the rules that influence presidential selection, such as the major party primary system, ballot access, presidential campaign financing, and the electoral college.

LAWS 7375-3. U.S. Races and Justice Systems. Examines the unique but related legal, social, and economic problems and accomplishments of those persons in this country whose ancestry originated in Africa, Asia, Latin America, or North America, and explores the developing literature on whites and whiteness.

LAWS 7381-3. Intellectual Property Counseling and Prosecution. Introduces strategic development and procurement of IP, including patents, trademarks, copyrights, and trade secrets. Evaluates the latest cases and legal trends from a practical and strategic perspective. Focuses on widely accepted best practices and critical thinking in these areas.

LAWS 7420-2. European Union Law. Covers all the essential aspects of the EU law: EU institutions, competences, the making and the application of EU law, and the content of the fundamental principles of EU law and the common market.

LAWS 7428-3. Bioethics Law and Literature. Interdisciplinary study of law, medicine, and bioethics. Addresses such issues as confidentiality in medical treatment, rejecting life-sustaining treatment, death and dying, reproductive law and genetic technology, human experimentation, and access to health care.

LAWS 7458-2. Law and Literature. Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka, and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal, and a final eight page paper are required.

LAWS 7507 (2-3). State and Local Taxation. Examines the operation of the income, property and sales tax used to finance our state and local governments. Includes requirements of equal protection and due process. Covers jurisdiction to tax allocation of the tax base among different state and local governments. Same as ACCT 6760.

LAWS 7523-2. Juvenile Law. Takes a critical look at the juvenile justice system and how it responds to the needs of juveniles who are either delinquents and/or victims of abuse. Issues include the rights and responsibility of parents, parental responsibility programs, delinquents, and the future of our juvenile courts.

LAWS 7529-1. Appellate Advocacy Competition. Gives students the opportunity to participate in an intermural appellate advocacy competition, in which a brief must be filed and reviewed, critiqued, and deemed credit-worthy by a member of the faculty. (Law School Rule 3-2-9 (b) should be consulted prior to enrollment.)

LAWS 8011 (1-3). Seminar: Humanizing Contracts: Service Learning. Examines contract theory and policy, while providing community-based service. Students analyze and discuss readings exploring doctrinal and theoretical bases of contract law, and see "contracts in action" through participating in a service project. Requires a final paper linking theory and doctrine with service experiences. Note: this is a year-long seminar (2 credits per semester); students must enroll in both semesters but receive only one grade at the end of the year. Students participate in a service project that may include off-campus and weekend participation."

LAWS 8013-2. Seminar: Habeas Corpus: The Great Writ of Liberty. Includes readings on the history of the writ, its constitutional status, and its use as a civil rights remedy, as well as case studies of important Supreme Court decisions, and a review of contemporary jurisdictional and procedural issues.

LAWS 8075-2. Seminar: Race, Racism, and American Law. Focuses on issues of race reform law, in particular the group of issues dealing with Black Americans. (Students of all hues and persuasions are welcome.) Offers an interpretive or critical dimension, rather than a litigation-oriented one. Helps students understand how race reform law works and how attitudes and historical forces have shaped that body of law.

LAWS 8103-2. Seminar: Alternative Dispute Resolution Ethics. Explores the ethics of mediators and other alternative dispute resolvers and facilitators, of attorneys representing clients in alternative dispute resolution processes, and of judges serving in alternative roles. Issues include confidentiality, providing appropriate notice to those concerned, and avoidance of conflicts of interest.

LAWS 8105-3. Seminar: Comparative Family Law India. Examines and critiques law, legal institutions and traditions of India and the U.S. as they affect children, families, and work. Prepares students for collaborative work and leadership in a global environment. Enhances research and writing skills, including field and international research. Contributes to host country through scholarship and services. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and serve learning project over spring break.

LAWS 8115-2. Seminar: Child Abuse and the Law. Explores legal responses to child abuse by examining the constitutional framework for legal proceedings, effective strategies for preventing child abuse and punishing offenders, alternatives to the current system, and cultural aspects of child abuse and the legal response to it. Examines physical abuse and neglect, and focuses on sexual abuse.

LAWS 8122-2. Seminar: Mineral Development. Deals with legal and policy issues surrounding mineral development and its environmental impacts. Emphasizes the problems associated with hard rock minerals and coal development, with some treatment of oil and gas leasing and development issues. Focuses on western public lands with some discussion of international and private lands issues.

LAWS 8125-2. Seminar: Law and the Politics of Family Law. Examines issues that have been raised under the United States Constitution with respect to state regulation of families. Topics include questions of family and individual privacy, the status of children, procreation, marriage and divorce, the definition of family relationships, and problems of federalism and the role of the Supreme Court in the regulation of families.

LAWS 8128 (2-3). Jurisprudence. Same as LAWS 7128.

LAWS 8135-2. Seminar: Gender, Work, and Family. Explores the social and legal problems that develop at the intersection of work and family, and considers le-

gal/non-legal solutions that have been and could be used to accommodate both women and men in their efforts to deal with these problems.

LAWS 8138-2. Seminar: The Rhetoric of Law. Considers how Anglo-American law operates rhetorically, how it persuades, builds character, offers proof, approximates the truth, establishes legitimacy, and makes things happen. It will also explore the ethics of rhetoric and note the relationship of rhetoric to other bodies of legal scholarship (e.g., law and literature, legal pragmatism, law and culture). It will hone student advocacy skills, prepare students to anticipate and defend against the rhetorical stratagems of different legal actors, and enrich students' sense of professional identity. Restricted to LAWS students.

LAWS 8154-2. Seminar: Land Use Planning. Discusses public control of private land uses through planning, zoning, and regulation of land development, including consideration of constitutional and statutory limitations on legislatively created techniques. Offered in alternate years.

LAWS 8202-2. Seminar: Environmental Policy. Examines issues of environmental justice, including the disparate impacts of pollution and land use controls on certain communities and ethnic groups. Topics may include concentration of waste facilities in neighborhoods occupied by poor and minority populations, adequate protection of migrant farmworkers from the impacts of pesticide hazards, and environmental controls that inhibit economic growth and development sought by Indian tribes.

LAWS 8210-2. Seminar: Comparative Law. Studies discrete topics in Jewish law such as family law, commercial law, criminal law, etc., using the text *Jewish Law: Cases and Materials*, and other sources such as guest lectures. The collection of books that we received from the Touro Law Center will provide a valuable resource for student research.

LAWS 8212-2. Seminar: Environmental Law Practice and Policy. Focuses on the translation of environmental policies and purposes into environmental law and practice. Investigates policy issues on prevention of significant deterioration of air quality (PSD), the particulate matter national ambient air quality standard (PM NAAQS), and global climate changes. Emphasizes legal structure issues, including the role of national, state, and local governments in implementing environmental law and policy as well as counterpart global structures and mechanisms for responding to global or transboundary environmental problems. Prereq., LAWS 7202.

LAWS 8222-2. Seminar: Environmental Philosophy and Law. Investigates the changing philosophical underpinnings of U.S. environmental law and policy and how philosophy and legal institutions interact.

LAWS 8251-2. Seminar: Advanced Corporate Law. Explores current issues in corporate and securities law, including developments in fiduciary duties of officers and directors, corporate governance, executive compensation, revisions to the model business corporation act, and state and federal litigation reform.

LAWS 8300-3. Seminar: International Adjudication. Focuses on writing briefs and memoranda of law suitable for practice before tribunals such as the International Courts of Justice. Emphasis will be on students writing, legal analysis, and presentation of oral arguments. Instruction identifies how to research and analyze international materials, such as treaties, covenants, and international customary law.

LAWS 8301-2. Seminar: Innovation, Network Theory, Social Entrepreneurship. Covers topics related to the legal and public policy implications of innovation, entrepreneurship, and social networks including normative ideals of entrepreneurship, the concept of regional advantage, whether startups should be subsidized and the design of such subsidies, the role of universities in commercializing ideas, impact of the tax code on entrepreneurship, the role of corporate responsibility in startups, and more.

LAWS 8302-2. Seminar: Advanced Problems in Water Resources Law. Explores the use of watersheds as geographic and political entities for addressing water-related issues and how laws and institutions facilitate or impede watershed-based problem solving.

LAWS 8315-2. Seminar: Advanced Criminal Justice. Studies policy and practice issues rather than case law. Focuses primarily on how American criminal justice is dispensed in cases that do not reach trial, including police behavior, prosecutorial discretion, defense services, bail, plea bargaining, and sentencing.

LAWS 8325-2. Seminar: Reforming Criminal Trials. Starts from the premise that reform of our criminal trial system to make it less complicated, less expensive,

and more reliable should be considered. Examines trial systems in other countries and U.S. changes over recent decades. Student papers make and defend proposals for reform.

LAWS 8341-3. Seminar: Law and Economics of the Information Age. Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "networked" information industries, the proper role of "unbundling" policies to advance competition, and how intellectual property and antitrust rules should be developed. Prereq., LAWS 7201, 7241, or 7301. Same as TLEN 5260.

LAWS 8355-2. Seminar: Sentencing Law and Policy. Studies sentencing law against the backdrop of criminal justice policy and concerns of public policy. Covers theories of punishment, the merits of indeterminate sentencing, sentencing guidelines, and nonincarcerative sanctions. Confronts problems of race, class, and other disparities in criminal sentencing.

LAWS 8375-2. Seminar: Advanced Immigration and Citizenship. Explores the law and policy of citizenship in the United States, starting with legal questions regarding acquisition and loss of citizenship as well as the consequences of citizenship, but also examines the fundamental premises underlying American citizenship and the concept of citizenship generally.

LAWS 8421-2. Seminar: Duties of the Professional Advisor. Studies ethical and legal regulation of lawyers, auditors, and investment bankers, who have been described as "gatekeepers" to the investment markets. Considers changes in ethical and legal regulation that can be adopted to restore a sense of integrity for these professionals.

LAWS 8425-2. Seminar: Advanced Torts. Explores how dignitary interests have influenced the development of and have been incorporated into law, using the common law of torts and the constitutional rights of life and liberty as a general (but not exclusive) focal point of discussion.

LAWS 8428-2. Seminar: Women in Law and Literature. Considers both legal and literary depictions of women and their legal and extralegal situations. Topics may include women as mothers, women as sexual beings, women's silence, women's violence and women as criminals, women at work, and women as the "Other" in law and literature.

LAWS 8440-2. Seminar: International Human Rights. Investigates the sources of international human rights law and issues of jurisdiction to prescribe, adjudicate, and enforce norms. Students study treaties and reservations, customary law, declarations, resolutions, and the U.S. courts' and activists' use of materials. Topics include sovereignty and self-determination, culture, privacy, right to equality, language and speech rights, right to development, immigration, workers and globalization, and citizenship.

LAWS 8450-2. Seminar: International Development Law and Policy. Introduces students to the legal and policy issues that surround the economic development of lesser developed countries. Explores the legal, institutional and political interplay that is shaping the way governments strike the balance between policies aimed at economic integration and growth, and those aimed at achieving broader social and environmental objectives.

LAWS 8511-2. Seminar: Wal-Mart. Examines issues raised by Wal-Mart's size, power, and business model. Considered issues bring numerous areas of law into play, including employment and labor law, social welfare legislation, class actions, antitrust, zoning, international labor and human rights regulation, and international trade. The course will show how different areas of the law are integrated in practice.

LAWS 8531-2. Seminar: Labor and Employment in Transportation. Explores legal, social, and economic issues arising from labor relations in the industries transporting goods and people by road, rail, air, and water, among the most critical sectors of the economy.

LAWS 8613-2. Seminar: Civil Liberties Litigation. Studies issues unique to the prosecution and defense of civil liberties lawsuits. Discusses litigation strategies with reference to lawsuits currently pending in the federal courts.

LAWS 8628-2. Seminar: Law, Power, and Politics. Draws upon various works of political theory, social theory, and jurisprudence to examine different conceptualizations of politics, power, law, and their relations.

LAWS 8648-2. Seminar: The Law of Politics. Examines the legal framework that governs the political process, including such topics as the political question doctrine, the "right to vote," the 2000 presidential election controversy, term limits,

bicameralism and presentment, campaign finance, direct democracy, and the interpretation of the legislative product (i.e., statutes).

LAWS 8718-2. Seminar: Modern Theorists and Law. Considers the work of Levi-Strauss, Steven Lukes, Pierre Bourdieu, Alfred Schutz, Anthony Giddens, Culler, David Harvey, Denis Cosgrove, Michel Foucault, and Emily Martin with respect to social control and law. Focuses on the way in which social control is exercised through the organization of space, time, and the human body. Topics include consideration of meaning, intersubjectivity in the law, social construction of time, and the body as a real and cultural artifact.

LAWS 8775-2. Seminar: Advanced Topics in Health Law and Policy. Addresses advanced legal issues in representing physicians, long-term care institutions, hospitals, and other health providers. Issues range from economic policy, distributive justice, and bioethical questions to antitrust and regulatory issues. Recommended prereq., LAWS 7425. Taught at Anschutz Medical Campus.

College of Music

Music Electives

MUEL 1081-3. Basic Music Theory. Introduction to music notation, meter and rhythm, scales, intervals, triads, seventh chords, fundamentals of harmonic progression, voice leading, aural skills, and composition. For nonmusic majors who have little or no previous background in the subject. Formerly EMUS 1081. Offered fall and spring.

MUEL 1115-1. Piano Class 1. Introduces the keyboard and music reading for nonmusic majors with no prior keyboard experience. Studies very easy classical and pop repertoire. Prereq., no prior keyboard experience or instructor consent. Formerly EMUS 1115.

MUEL 1125-1. Piano Class 2. Continuation of MUEL 1115. Focuses on development of music reading. Studies technical patterns, easy classical and pop repertoire, and improvisation. Prereq., MUEL 1115. Formerly EMUS 1125.

MUEL 1145 (2-4). Guitar Class. A systematic study of the beginning literature and technique of the classical guitar with an emphasis on reading music. Designed for nonmusic majors with no prior musical experience. Formerly EMUS 1145.

MUEL 1155-2. Intermediate Guitar. Studies the intermediate literature and technique of the classical and popular guitar. Emphasis on reading standard notation and chord charts. Designed for non-music majors. May be repeated up to 6 total credit hours. Prereq., MUEL 1145 or instructor consent. Formerly EMUS 1155.

MUEL 1184-1. Voice Class. Involves basic vocal technique and easy solo repertoire taught through a group medium, for beginner and intermediate level students. May be repeated up to 6 total credit hours. Recommended prereq., ability to read music. Formerly EMUS 1184.

MUEL 1416-2. Introduction to Hand Percussion. Studies the literature and technique of hand percussion. Emphasizes African and Latin percussion techniques. Designed for non-music majors. May be repeated up to 6 total credit hours. Formerly EMUS 1416.

MUEL 1832-3. Appreciation of Music. Provides a basic knowledge of primarily Western music literature and development of discriminating listening habits. Restricted to nonmusic majors. Formerly EMUS 1832. Approved for arts and sciences core curriculum: literature and the arts. Offered fall and spring.

MUEL 2091-2. Introduction to Audio Recording. Introduces and explores basic concepts in audio recording from microphones to digital audio workstations. Also focuses on development of critical listening skills. Open to nonmajors.

MUEL 2184-1. Voice Class. Continuation of MUEL 1184, with more advanced repertoire and vocal techniques. May be repeated up to 6 total credit hours. Prereq., MUEL 1184. Formerly EMUS 2184.

MUEL 2752-3. Music in American Culture. Offers a stylistic and historical examination of trends that have influenced present-day music in the U.S. Formerly EMUS 2752. Approved for arts and sciences core curriculum: United States context. Offered fall and spring.

MUEL 2762-3. Music and Drama. Explores techniques used in combining music and dramatic arts through examples from musical and dramatic literature of the West from circa 1000 to present. Formerly EMUS 2762. Offered spring only.

MUEL 2772-3. World Musics. Highlights music outside Western art tradition, using current ethnomusicological materials. Spring semester focuses on musical cultures of the Americas, Africa, and Europe; fall semester focuses on musical cultures of Asia and Oceania. May be repeated up to 6 total credit hours. Formerly EMUS 2772. Approved for arts and sciences core curriculum: human diversity.

MUEL 2842-3. American Musical Theatre. Provides an overview of the role of musical theatre in U.S. culture, emphasizing the 20th century Broadway musical. Formerly EMUS 2842.

MUEL 2852-3. Music of the Rock Era. Examines popular music, concentrating on the U.S. after 1950. Considers precursor styles (e.g., blues folk) and contributions to the new rock style; discusses the evolution of rock style from 1960 through the 1990s. Formerly EMUS 2852. Approved for the arts and sciences core curriculum: literature and the arts. Offered spring only.

MUEL 2862-3. American Film Musical, 1926–1954. Examines the development of filmed musicals from the beginning of sound movies through the Golden Age of Musicals. Emphasizes analysis and relationships of characters, songs, and incidental music. Formerly EMUS 2862. Approved for arts and sciences core curriculum: literature and the arts.

MUEL 2872-3. Music in the Rock Era: Special Topics in Heavy Metal. Explores, discuss, debate and develop deeper understanding of Heavy Metal. Included are study of musical style characteristics and lyrical content, innovative performers, unifying elements of Heavy Metal culture and the diversity within it, and its role in the larger Rock and societal contexts. Issues of gender, religion, and sexuality in the Heavy Metal construct are also discussed.

MUEL 3051-2. Basic Composition. Introduces the processes, materials, and forms of composition through the writing and performance of short musical works. Open to any student who already has rudimentary musical knowledge. Formerly EMUS 3051.

MUEL 3642-3. History of Jazz. Studies the distinctly American art form of jazz music from its origins to the present, including the various traditions, practices, historical events, and people most important to its evolution. For nonmusic majors. Formerly EMUS 3642. Offered fall and spring.

MUEL 3772-3. West African Music and Culture in Ghana. Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to festivals and court ceremonies, field trips to kente weaving village, adinkra clothmaking, woodcarving villages, and museums. Prereq., MUEL 2772, sophomore standing, or instructor consent. Same as MUSC 3772.

MUEL 3822-3. Words and Music. Explores the interaction between words and music in song. Students will consider how such features as rhyme, rhythm, tone, and the connotations of particular words contribute to meaning in poetry; how rhythm, tempo, dynamics, mood, and instrumentation contribute to meaning in music; and how words and music coalesce in song to make a new meaning. Restricted to nonmusic majors. Formerly EMUS 3822. Approved for arts and sciences core curriculum: literature and the arts.

MUEL 3832-3. Music in Literature. Addresses literature that seeks either to explore the meaning of music or to make music out of words. Students will consider how musical concepts and techniques can be incorporated into poetry and prose, and will analyze the roles that writers have attributed to music in society, politics, and the life of the individual. Restricted to nonmusic majors. Formerly EMUS 3832. Approved for arts and sciences core curriculum: literature and the arts.

MUEL 3872-3. Music in the Rock Era: Special Topics in Heavy Metal. Explore, discuss, debate and develop deeper understanding of Heavy metal. Included are study of musical style characteristics and lyrical content, innovative performers, unifying elements of Heavy Metal culture and the diversity within it, and its role in the larger Rock and societal contexts. Issues of gender, religion, and sexuality in the Heavy Metal construct area also discussed.

MUEL 4012 (3-6). African Music. Studies the musics, dances, and cultures of various peoples of Africa. Includes African diaspora music and Afro-pop. Formerly EMUS 4012.

Music

Music Education

MUSC 2103-3. Introduction to Music Education. Provides an overview of basic principles and practices of the music education profession. Explores public school music teaching through class discussions, directed observations, and a supervised field experience. Offered fall only.

MUSC 3013-1. String Class. For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only.

MUSC 3023-1. Woodwind Class. For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.

MUSC 3033-1. Brass Class. For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.

MUSC 3133-2. Teaching General Music I. Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Prereq., MUSC 2103. Offered spring only.

MUSC 3153-2. Teaching Woodwind Instruments. For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.

MUSC 3163-2. Teaching String Instruments. For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only.

MUSC 3193-2. Vocal Pedagogy and Literature for Young Voices. Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies, and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists.

MUSC 3223-2. Teaching Brass Instruments. For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.

MUSC 3253-2. Jazz Techniques for the Music Educator. Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Recommended prereqs., MUSC 1111 and 2103. Offered spring only.

MUSC 3273-2. String Pedagogy and Literature. Examines instructional methods/materials and pedagogical approaches appropriate for beginning to advanced string students in private studio, small ensemble, or large ensemble contexts. Topics may include group teaching strategies, as well as contemporary approaches including Rolland and Suzuki. Recommended prereqs., MUSC 2103 and 3163. Offered spring only.

MUSC 3363-2. Marching Band Techniques. Helps develop the skills needed to administer and teach all aspects of a contemporary high school marching band. Includes drill conception and design, instruction, organization, and administration. Prereqs., MUSC 2103 and EMUS 1287. Offered fall only.

MUSC 4103-1. Introduction to Student Teaching. Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school. Prereqs., MUSC 4113, 4313, or 4443; and EDUC 3023.

MUSC 4113-3. Teaching General Music 2. Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K–5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Prereqs., MUSC 2103 and 3133. Offered fall only.

MUSC 4123-3. Student Teaching Practicum. Offers practice teaching under the guidance of a master music teacher. Elementary level. Prereq., MUSC 4103.

MUSC 4133-3. Student Teaching Practicum. Offers practice teaching under the guidance of a master music teacher. Secondary level. Prereq., MUSC 4103.

MUSC 4143-2. Developing Children's Choirs. Examines the musical skills, teaching techniques, and administrative procedures necessary for developing a children's choir. Offered fall of even-numbered years. Prereq., MUSC 2103. See MUSC 5143.

MUSC 4153-1. Percussion Class and Pedagogy. Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only.

MUSC 4163-2. Choral Literature for School Ensembles. Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Offered fall of odd-numbered years. Prereq., MUSC 2103.

MUSC 4193-1. Student Teaching Seminar. Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies, and teaching portfolio development. Prereq., MUSC 4103.

MUSC 4203-1. Music Methods Practicum. Taken concurrently with either MUSC 4113, 4313, or 4443. Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools. Prereq., MUSC 2103. Coreq., MUSC 4113, 4313, or 4443.

MUSC 4313-3. Teaching Choral Music. Examines choral music curricula, instructional materials, and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Prereq., MUSC 2103. Same as MUSC 5313. Offered spring only.

MUSC 4443-3. Teaching Instrumental Music. Examines instrumental music curricula, instructional materials, and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Prereq., MUSC 2103. Same as MUSC 5442. Offered spring only.

MUSC 4583-2. Inclusive Music Classroom. Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years. Prereqs., MUSC 2103 and 3133. Recommended prereq., MUSC 4113. Same as MUSC 5583.

MUSC 5103-3. Teaching General Music. Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K–5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Restricted to graduate students in music education. Offered fall only.

MUSC 5143-2. Developing Children's Choirs. Restricted to graduate students in music education. Same as MUSC 4143.

MUSC 5183-2. Research in Music Teaching. Introduces basic descriptive, experimental, and qualitative research methods, including sampling, design, data collection, and analysis. Students review published music research and conduct one original research study. Restricted to graduate students in music education. Offered fall only.

MUSC 5273-2. Comprehensive String Pedagogy. Comparative study and application of the principles of string teaching. In-depth analysis of individual instrument pedagogy and application to advanced studio and class teaching. Historical survey

of major violin, viola, cello, and double bass pedagogues. Includes apprenticeship teaching. Restricted to graduate students. Offered fall of odd-numbered years.

MUSC 5313-3. Teaching Choral Music. Restricted to graduate students in music education. Same as MUSC 4313. Offered spring only.

MUSC 5443-3. Teaching Instrumental Music. For graduate music education majors. Same as MUSC 4443. Offered spring only.

MUSC 5583-2. The Inclusive Music Classroom. For graduate music education majors. Same as MUSC 4583.

MUSC 6113-2. Foundations of Music Education. Surveys historical and philosophical bases of contemporary music education. Restricted to graduate students in music education. Offered fall only.

MUSC 6133-2. Comprehensive Musicianship through Performance. Explores curricular models for music education. Emphasizes comprehensive musicianship and standards-based frameworks for curriculum and development. Restricted to graduate students in music education. Offered spring of even-numbered years.

MUSC 6193 (1-3). Selected Studies in Music Education. May be repeated up to 12 total credit hours. Prereq., consent of instructor and music education chair.

MUSC 6203-2. Psychology of Music Learning. Provides an overview of psychological concepts relevant to music teaching and learning. Topics include learning theories, selected individual difference variables (motivation, anxiety, creativity, and personality), physiological structures related to hearing, psychoacoustics, and approaches to examining musical ability (e.g. brain research, music aptitude, and skill acquisition). Restricted to graduate students. Offered spring only.

MUSC 6213-2. Assessment of Music Learning. Provides an overview of traditional and contemporary approaches to music assessment. Topics include psychometrics, standardized tests, test construction, grade reports, and student portfolios. Restricted to graduate students in music education. Offered spring of even-numbered years.

MUSC 6223-2. Sociology of Music Education. Studies sociological perspectives related to music education. Topics include functions and uses of music; teacher and student role/identity development; social aspects of music performance, and cultural perspectives on music learning. Recommended prereq., MUSC 6113. Restricted to graduate students in music education. Offered fall of even-numbered years.

MUEL 6233-2. Pedagogy of Music Teaching and Learning. Explores several topics (reflexive/critical thinking, teacher effectiveness, cultural/program contexts, teachers' lives and careers) relevant to long-term teacher development. Includes individualized feedback on teaching. Open to graduate students in music education and performance-pedagogy. Offered spring of odd-numbered years.

MUSC 7103-3. Historical Research in Music Education. Topics include oral history, archival collections, data verification, and critiquing/publishing research. Students conduct one original research study. May be repeated up to 12 total credit hours. Restricted to doctoral students in music education. Offered spring of even-numbered years.

MUSC 7113-3. Quantitative Research in Music Education. Topics include sampling, questionnaire development, research design, intermediate and advanced statistics, presenting/publishing research, and research ethics. Students conduct an original research study. Restricted to doctoral students in music education. Offered fall of even-numbered years.

MUSC 7143-3. Qualitative Research in Music Education. Topics include qualitative research traditions, site and participant selection, data collection and analysis methods, quality standards, and research ethics. Students conduct an original research study. Restricted to doctoral students in music education. Offered fall of odd-numbered years.

MUSC 7203-3. Doctoral Seminar in Music Education. Provides an advanced study of topics central to the music education profession. Requires class presentations and a major paper or project. Restricted to doctoral students in music education. Offered fall of even-numbered years.

Theory and Composition

MUSC 1081-3. Intensive Music Theory. Introduces tools used in notating, performing, creating, and listening to music. Coreq., MUSC 1121. Open to music majors only. Offered fall only.

MUSC 1101-2. Semester 1 Theory. Introduces the fundamentals of diatonic harmony and voice leading, focusing on four-voice writing and analysis of excerpts from music literature. For music majors only. Offered fall only.

MUSC 1111-2. Semester 2 Theory. Continuation of MUSC 1101. Covers principles of harmony and voice leading, using all common diatonic triads and seventh chords. Introduces secondary dominants, modulation, contrapuntal chord functions, and elementary structural analysis of excerpts from music literature. Prereq., MUSC 1101. Offered spring only.

MUSC 1121-1. Aural Skills Lab, Semester 1. Focuses on sight singing, rhythm, and dictation of diatonic melodies in major and minor keys (treble, alto, and bass clefs). Covers identification of scale types, intervals, triads, and dominant seventh chords. Studies harmonic dictation using chords from MUSC 1101. Offered fall only.

MUSC 1131-1. Aural Skills Lab, Semester 2. Acquaints students with sight singing in major and minor keys (treble, alto, tenor, and bass clefs). Includes dictation of one- and two-voice examples. Studies harmonic dictation using vocabulary from MUSC 1111. Considers detection of pitch and rhythm errors in performed examples. Prereq., MUSC 1121. Offered spring only.

MUSC 2071-2. Instrumentation. Introduces and studies the instruments of the orchestra and problems of scoring for diverse choirs and full orchestra. Prereqs., MUSC 2101 and 2121. Offered spring only.

MUSC 2081-2. Prepared for the Soundcheck. Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering. Uses recorded material from in-class sessions. Examines differing approaches to recording as well as current technologies.

MUSC 2091-2. Recording Techniques. Provides hands-on training in various audio recording techniques, acoustics, and sound reinforcement, studio maintenance, and troubleshooting. Real-world experience is gained through individual recording projects and College of Music events. Prereq., MUSC 2081 or instructor consent.

MUSC 2101-2. Semester 3 Theory. Continuation of MUSC 1111. Reviews secondary dominants, secondary leading-tone chords, and modulation. Covers dissonance and chromaticism, including modal mixture, seventh chords with added dissonance, Neapolitan sixth chord, and augmented sixth chords. Provides structural analysis of musical excerpts. Prereq., MUSC 1111. Offered fall only.

MUSC 2111-2. Semester 4 Theory. Continuation of MUSC 2101. Focuses on advanced chromaticism including modal mixture, altered dominants, voice leading, and chromatic harmony in larger contexts. Examines impressionism and jazz. Also involves composition projects. Prereq., MUSC 2101. Offered spring only.

MUSC 2121-1. Aural Skills Lab, Semester 3. Continuation of MUSC 1131. Studies sight singing of chromatic melodies in major and minor keys (in four clefs). Includes dictation of one- through three-voice examples. Studies harmonic dictation using vocabulary from MUSC 2101. Considers detection of pitch and rhythm performance errors. Prereq., MUSC 1131. Offered fall only.

MUSC 2131-1. Aural Skills Lab, Semester 4. Continuation of MUSC 2121. Studies sight singing of chromatic and atonal melodies. Includes dictation of one- through three-voice examples. Identifies sonorities studied in MUSC 2111. Considers detection of pitch and rhythm performance errors. Prereq., MUSC 2121. Offered spring only.

MUSC 3051-2. Beginning Composition. For noncomposition majors. Introduction to the craft of musical composition with analysis and writing in various styles. Open to music majors only.

MUSC 3061-2. Jazz Improvisation I. Develops skills in jazz improvisation through practical application of chord/scale relationship, transcription, repertoire, and analysis. Open to all instruments. Offered fall only.

MUSC 3071-2. Jazz Improvisation II. Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Prereq., MUSC 3061 or instructor consent. Offered fall only.

MUSC 3081-3. Jazz Theory and Aural Foundations. Presents the grammar and syntax of jazz. Acquaints the student with the language of jazz improvisation and various jazz styles. The musician's most valuable tool—the ear—is developed through an in-depth analytical study of jazz masters through harmonic dictation/identification. Prereq., MUSC 2101. Offered spring only.

MUSC 4001-2. New Musical Styles and Practices. Studies the style of Palestrina and his contemporaries through analysis, species counterpoint exercises, and composing in the style. Prereqs., MUSC 2111 and 2131. Offered every other year.

MUSC 4011-2. 16th Century Counterpoint. Studies the style of Palestrina and his contemporaries through analysis, species counterpoint exercises, and composing in the style. Prereqs., MUSC 2111 and 2131. Offered every other year.

MUSC 4021-2. 18th Century Counterpoint. Provides a stylistic study of main contrapuntal genres of the period including invention, suite, and fugue. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Prereqs., MUSC 2111 and 2131. Offered every other year.

MUSC 4031-2. Jazz Arranging 1. Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Prereqs., MUSC 2111 and 2131. Recommended prereq., MUSC 3081. Offered fall only.

MUSC 4041-2. Orchestration. Studies advanced orchestration techniques through score analysis and student projects. Prereq., MUSC 2071 or instructor consent. Offered fall only.

MUSC 4061-2. Tonal Analysis. Surveys tonal analytical techniques and forms of tonal music, including binary forms, sonata forms, ternary forms, rondo (and others) through study of selected works from the 18th and 19th centuries. Prereqs., MUSC 2111 and 2131. Offered fall only.

MUSC 4071-2. Post-Tonal Theory and Analysis. Focus on theory and analysis of post-tonal literature pre-1945. Prereqs., MUSC 2111 and 2131. Offered spring only.

MUSC 4081-3. Introduction to Music Technology. Topics include basic synthesis, musical instrument digital interface (MIDI) sequencing, and music notation by computer. Offered fall and spring.

MUSC 4091-2. Jazz Arranging 2. Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a large jazz ensemble. Prereq., MUSC 4031. Recommended prereq., MUSC 3081. Offered spring only.

MUSC 4101 (1-3). Theory and Aural Skills Review. Reviews tonal harmony, voice leading, and essential aural skills. Includes diatonic triads and seventh chords, modulation, chromaticism, and structural analysis of representative compositions. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits), or both theory and aural skills (3 credits). May not be taken pass/fail. For graduate students only. Offered summer and fall.

MUSC 4111-2. Composing at the Computer. Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments, and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Prereq., MUSC 4081.

MUSC 4121-3. Topics in Music Technology. Exploration of issues, techniques, and tools of music technology. Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia; sound design and analysis. Lectures on work sessions will support student projects. May be repeated up to 9 total credit hours. Prereq., MUSC 4081.

MUSC 4191-2. Advanced Recording. Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiple microphones for ensemble concerts and recording sessions within and outside of the College of Music. Prereq., MUSC 2091.

MUSC 5041-2. Advanced Orchestration. Provides an advanced study of orchestration techniques through score analysis and student projects. Offered fall only.

MUSC 5061-3. Advanced Tonal Analysis. Surveys tonal analytical techniques. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Offered fall only.

MUSC 5071-3. Post-tonal Theory and Analysis I. Focuses on theory and analysis of post-tonal literature pre-1945. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Offered spring only.

MUSC 5081-3. Applications in Music Technology. Presents advanced strategies for applying computer technology in several musical disciplines. Emphasizes the use of technology in composition, music theory, and music education. Offered fall only.

MUSC 5091-3. Contemporary Jazz Theory. Studies contemporary approaches to jazz improvisation and composition. Analysis of innovative composition and improvisation and strategies for integration of the material into a personal vocabulary are explored. Prereq., MUSC 3081. Offered spring only.

MUSC 5121-3. Advanced Topics in Music Technology. Conducts advanced research in techniques and tools of music technology. Topics vary from term to term and may include: user interfaces for computer music; advanced sound design; digital modeling of acoustic sounds; computer-aided analysis of sound; modeling music intelligence in real time. Lectures and work sessions will support student projects. May be repeated up to 9 total credit hours. Prereq., MUSC 5081 or instructor consent required.

MUSC 5151-3. Topics in Music Analysis. Analytical study of a specific topic to be determined by the instructor (e.g., German Lieder, Bartok quartets, tonal rhythm, Schenker, etc). Study published analyses representing a variety of methodologies, and produce original analyses. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Recommended prereqs., MUSC 5061, 5071, as appropriate to topic or instructor consent.

MUSC 6041-3. Orchestration since 1940. Studies significant and distinctive orchestration techniques of the 20th century, concentrating on works written since 1940. Restricted to doctoral students.

MUSC 6051-3. Pedagogy of Music Theory. Studies methods and materials for teaching undergraduate music theory, aural skills, and analysis. Prereq., passed general written theory and aural skills prelim exam, or completed remediation.

MUSC 6801-3. Advanced Topics in Music Theory. Intensive study of a specialized topic in theory and analysis. Students will be guided in critical reading and analysis, class presentations, and independent research. Prereqs., graduate preliminary exams passed, and 6 credit hours of graduate-level theory. Restricted to MUSD and MUAD students.

MUSC 7801-3. Doctoral Seminar in Music Theory. Provides advanced study in theory. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires a major paper or project. Prereq., passed general written theory and aural skills prelim exam, or completed remediation.

Musicology

MUSC 1802-3. Introduction to Musical Styles and Ideas. Introduces the study of music including bibliographic, listening, score reading, critical reading, and writing skills; music terminology; a survey of selected music genres (symphonic and chamber music); and building of general music repertory. Offered fall only.

MUSC 2772-3. World Musics. Study of music outside western art tradition, using current ethnomusicological materials and methodologies. Spring semester focuses on musical cultures of Africa, the Americas, and Europe; fall semester focuses on musical cultures of Asia and Oceania.

MUSC 2782-3. World Musics Survey—Africa, Europe, and the Americas. Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, MUSC 2782 focuses on music cultures of Africa, Europe, and the Americas.

MUSC 3642-3. History of Jazz. Studies the distinctly American art form of jazz music from its origins to the present, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only.

MUSC 3772-3. West African Music and Culture in Ghana. Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums. Prereq., MUSC 2782/MUEL 2772, sophomore standing, or instructor consent. Same as MUEL 3772.

MUSC 3802-3. History of Music 1. Surveys Western art music with stylistic analysis of representative works from all major periods through the Baroque. See also MUSC 3812. Prereq., MUSC 2111.

MUSC 3812-3. History of Music 2. Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802. Prereq., MUSC 2111.

MUSC 4012-3. African Music. Studies the musics, dances, and cultures of various peoples of Africa. Includes African diaspora music and Afro-pop. Offered fall only.

MUSC 4112-3. Ethnomusicology. Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures. Prereq., MUSC 2772. Restricted to juniors/seniors.

MUSC 4142-3. American Indian Music. Examines Native North American musical cultures, with an emphasis on music as an integral part of religious expression and community life. Restricted to juniors/seniors.

MUSC 4152-3. East Asian Music. Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music's relationship to religion, politics, language, literature, dance and theatre. Recommended prereq., MUSC 2772.

MUSC 4712-3. Renaissance Music. Provides repertory and analysis of polyphonic music 1400-1600. Prereq., MUSC 3802. Same as MUSC 5712.

MUSC 4752-3. Women in Music. Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history, and feminist aesthetics. Restricted to juniors/seniors.

MUSC 4772-3. History of Opera. Examines representative operas from the 17th century through the 20th century. Emphasizes historical and stylistic analysis and surveys related musicological literature. Prereq., MUSC 3812. Same as MUSC 5772.

MUSC 4802-3. Studies in 20th Century Music. Offers intensified work in history of music in the 20th century. Topics vary from year to year. Prereq., MUSC 3812. Restricted to juniors/seniors. Same as MUSC 5802.

MUSC 4812-3. Symphonic Literature. Studies literature for orchestra, band, and other symphonic ensembles, including pre-Classical, Classical, Romantic, and 20th century.

MUSC 4852-3. 17th and Early 18th Century Music. Examines music and writings about music from the Baroque era. Emphasizes historical and stylistic analysis and current musicological literature. Prereq., MUSC 3812 or instructor consent.

MUSC 4872-3. Late 18th and 19th Century Music. Examines music and writings about music during the Classical and Romantic eras of the Western tradition, 1750-1900. Emphasizes historical and stylistic analysis and current musicological research. Recommended prereq. or coreq., MUSC 3812.

MUSC 4892-3. Latin American Music. Explores music of cultures south of the United States, emphasizing the relationships of music and culture in folk, popular, and art styles. Restricted to juniors/seniors Music majors only. Same as MUSC 5892.

MUSC 5002-3. Proseminar in Historical Musicology. Prepares students to pursue independent research in the history of music. Meeting as a seminar, the course focuses on the nature of evidence, methods and tools of research, and theoretical or historiographic issues.

MUSC 5012-3. West African Music and Dance. Studies musical and dance traditions and current practices. Prereq., MUSC 4012 or instructor consent. Same as DNCE 5054.

MUSC 5112-3. Proseminar in Ethnomusicology. Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures. Restricted to graduate students who have passed or remediated the World Music portion of their Musicology preliminary exams.

MUSC 5142-3. American Indian Music. Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life. Restricted to graduate music majors.

MUSC 5642-3. Jazz History and Literature. Studies musical trends and cultural forces influencing jazz, with analysis of scales, improvisational styles, melodic

and motivic variations, transcriptions, and orchestrations from significant periods in its history. Prereq., MUSC 3642 or instructor consent. Offered spring only.

MUSC 5712-3. Renaissance Music. Provides a repertory and analysis of polyphonic music 1400-1600. Same as MUSC 4712.

MUSC 5722-1. Sight-Reading Medieval and Renaissance Music Literature. Provides an opportunity to read through, sing, play, study, and discuss ancient repertoires more intensively than is normally possible in either music history lecture classes, seminars, or chamber music ensembles. Evaluation is based on active participation, out-of-class research, and final in-class group-performance projects. Recommended for graduate students in historical musicology and choral conducting. May be repeated up to 6 total credit hours.

MUSC 5742-3. Performance Practice of Early Music. Examines instrumental and vocal performance practices through the 18th century. Topics may vary from year to year.

MUSC 5752-3. Women in Music. Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history, and feminist aesthetics.

MUSC 5762 (3-4). History of Choral Literature. Provides a seminar in analysis of musical style and history of choral repertory. Those wishing review of literature and repertory may enroll for 4 credit hours.

MUSC 5772-3. History of Opera. Examines representative operas from the 17th century through the 20th century. Emphasizes historical and stylistic analysis and surveys related musicological literature. Restricted to graduate students. Same as MUSC 4772.

MUSC 5802-3. Studies in 20th Century Music. Same as MUSC 4802. Prereq., graduate standing.

MUSC 5812-3. Symphonic Literature. Studies literature for orchestra, band, and other symphonic ensembles including pre-Classical, Classical, Romantic, and 20th century.

MUSC 5822-3. Ancient and Medieval Music. Surveys sources from the ancient Greeks to the early Christian era and music from the 8th to the 15th century.

MUSC 5832-3. Studies in American Music. Offers intensified work in folk, popular, and art music of the United States.

MUSC 5842-3. Aesthetics of Music. Surveys various philosophies of music in writings of philosophers, psychologists, sociologists, composers, critics, and historians.

MUSC 5852-3. 17th and Early 18th Century Music. Examines music and writings about music from the Baroque era. Emphasizes historical and stylistic analysis and current musicological literature.

MUSC 5872-3. Late 18th and 19th Century Music. May be repeated up to 12 total credit hours. Same as MUSC 4872.

MUSC 5882-3. Studies in 18th and 19th Century Music. Meets as a seminar and examines selected topics in Classical and Romantic music, 1750-1900. Topics vary from year to year.

MUSC 5892-3. Latin American Music. Restricted to graduate students. Same as MUSC 4892.

MUSC 6822-3. Advanced Studies in Musicology. Intensive study of a specialized topic in musicology. Students will be guided in critical reading, historical or ethnographic issues, analysis, oral presentations, and independent research. May be repeated up to 6 total credit hours. Prereq., MUSC 5708. Restricted to MUAD or MUSD majors.

MUSC 7822-3. Seminar in Musicology. Required of all musicology majors before completion of comprehensive examinations. A different research area is designated each semester. Restricted to MUSD majors. See also MUSC 7832. Offered fall only.

MUSC 7832-3. Seminar in Musicology. Required of all musicology majors before completion of comprehensive examinations. A different research area is designated each semester. See also MUSC 7822. Offered spring only.

Voice

MUSC 1544-1. Italian Diction. Designed for the understanding of lyric Italian diction, the international phonetic alphabet, and its application to classical singing. Required for freshmen BM voice majors. Offered fall only.

MUSC 1554-1. English Diction. Designed for the understanding of lyric English diction, the international phonetic alphabet, and its application to classical singing as well as various musical styles of English classical voice literature. Prereq., MUSC 1544. Required for Freshmen BM voice majors.

MUSC 3444-1. French Diction. Designed for the understanding of lyric French diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of French classical vocal literature. Prereq., MUSC 1554. Recommended prereq., MUSC 3464. Required of Junior BM voice majors.

MUSC 3464-1. German Diction. Designed for the understanding of lyric German diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of German classical vocal literature. Prereq., MUSC 1554. Required of sophomore BM voice majors.

MUSC 5444-2. Vocal Pedagogy. In depth study of the physiology, acoustics, and health aspects of the singing voice. Recommended for all graduate students in voice.

MUSC 5454-2. Repertory for Young Voices. Survey of the solo repertoire for young voices, the physiological aspects of mutational voices, techniques of vocalizing young voices, and class voice procedure.

MUSC 5464-2. French Song Literature. Provides an extensive analytical and historical discussion of French song literature styles, from the 12th century to the present.

MUSC 5484-2. Graduate Seminar in Vocal Pedagogy. A thorough investigation of the challenges of studio voice pedagogy, including corrective techniques, psychological philosophies, and video analysis of student teaching. Examination and evaluation of comparative methodologies of vocal technique. Prereq., MUSC 5444 or instructor consent required.

MUSC 5564-2. German Song Literature. Provides an extensive analytical and historical discussion of German song literature styles, from the 18th century to the present.

Organ and Church Music

MUSC 4255-2. Service Playing Techniques. Thoroughly studies music of liturgical and non-liturgical services. Includes techniques of hymn playing and accompanying, and directing from the console. Same as MUSC 5255.

MUSC 4285-3. Organ Survey. Historically surveys organ music and organ construction, studying both forms of composition and types of organ for which the music was originally written. See also MUSC 4295. Same as MUSC 5285.

MUSC 4295-3. Organ Survey. Historically surveys organ music and organ construction, studying both forms of composition and types of organ for which the music was originally written. See also MUSC 4285. Same as MUSC 5295.

MUSC 5255-2. Service Playing Techniques. Same as MUSC 4255.

MUSC 5285-3. Organ Survey. Same as MUSC 4285.

MUSC 5295-3. Organ Survey. Same as MUSC 4295.

Piano

MUSC 1325-1. Piano Sight Reading. Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble, and choral literature. Also covers score reading and transposition. Restricted to piano majors instructor consent. Offered fall only.

MUSC 2325-2. Applied Harmony for the Keyboard. Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis, and playing by ear. Prereqs., MUSC 1111, 1131, and 1325. Offered fall only.

MUSC 2365-2. Introduction to Accompanying. An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be

critiqued and coached by class and instructor. Prereq., piano major or instructor consent. Offered spring only.

MUSC 3345-2. Piano Pedagogy 1. Discusses teaching philosophies, objectives, and procedures. Examines and evaluates methods and materials. Studies practical aspects with which the private teacher is concerned. May be repeated up to 12 total credit hours. Offered fall of even-numbered years.

MUSC 3355-2. Piano Pedagogy 2. Materials and techniques for teaching piano with a focus on the intermediate level student. May be repeated up to 12 total credit hours. Offered only in spring of odd-numbered years.

MUSC 3445-1. Practicum in Piano Teaching: Elementary Level. Provides practical experience teaching piano at the elementary and early intermediate levels under faculty supervision. May be repeated up to 2 total credit hours. Recommended prereqs., MUSC 3345, 3355. Restricted to MUSC, MUSA majors.

MUSC 4325-2. Keyboard Literature 1. Surveys keyboard music from 1600 to 1830. Offered fall semester of even-numbered years.

MUSC 4335-2. Keyboard Literature 2. Surveys keyboard music from 1830 to the present. Offered spring semester of even-numbered years.

MUSC 4405-2. Basso-Continuo Accompaniment. Studies the history, theory, and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect, and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Recommended prereqs., MUSC 2325 and PMUS 1586. Same as MUSC 5405.

MUSC 5215 (1-2). Studies in Piano Teaching. Studies the practical aspects and techniques for teaching piano at the intermediate and advanced levels in pre-college and college settings, as well as teaching group piano at the college level. May be repeated up to 2 total credit hours. Recommended prereqs., MUSC 5305 and 5315. Restricted to graduate piano majors.

MUSC 5305-2. Piano Pedagogy Group Techniques. Discusses materials and techniques for teaching beginning piano students of various ages in studio and class settings. Special attention given to adult classes. Includes an introduction to educational technology used in group instruction. Offered fall of odd-numbered years.

MUSC 5315-2. Piano Pedagogy: Intermediate Literature. Surveys repertoire at the intermediate level and discusses teaching techniques. Explores issues related to intermediate and advanced piano performance, such as performance anxiety, physical and psychological well-being of the performer, and the development of technique. Introduces educational technology relevant to intermediate teaching. Offered spring of even-numbered years.

MUSC 5325-2. Keyboard Literature 1. Examines areas of style, genre, and performance practice in selected keyboard music from 1600 to 1830. Emphasizes student presentation of specific topic areas. Offered fall semester of even-numbered years.

MUSC 5335-2. Keyboard Literature 2. Examines areas of style, genre, and performance practice in selected areas of keyboard music from 1830 to the present. Emphasizes student presentation of specific topic areas. Offered spring semester of odd-numbered years.

MUSC 5345-2. Research: Piano Literature and Pedagogy. Looks at individual or group research related to piano pedagogy or literature for piano. May be repeated up to 12 total credit hours.

MUSC 5365-2. Advanced Accompanying. An in-depth study of both vocal and instrumental collaborative repertoire in individually assigned projects, coached by collaborative faculty and others. May be repeated up to 12 total credit hours.

MUSC 5375-2. Opera Coaching for Pianists. Teaches skills for opera coaches and rehearsal pianists. May be repeated up to 12 total credit hours.

MUSC 5405-2. Basso-Continuo Accompaniment. Same as MUSC 4405.

MUSC 5425-2. Collaborative Literature for Piano with Winds, Brass, and Percussion. Study of all forms of wind, brass and percussion repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Focus will be on standard literature and reading and listening assignments will be supplemented by in-class performances and presentations. Prereq., instructor consent. Offered fall only.

MUSC 5435-2. Collaborative Literature for Piano with Strings. Study of all forms string repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Focus will be on standard literature and reading and listening assignments will be supplemented by in-class performances and presentations. Prereq., instructor consent. Offered spring only.

MUSC 6325-2. Seminar in Piano Literature. Provides an intensive study of a selected area of repertoire or history. May be repeated up to 6 total credit hours. Restricted to doctoral students or instructor consent required. Offered fall only.

Choral and Instrumental Music

MUSC 1326-1. Guitar Musicianship. Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Open only to students with an emphasis on guitar performance in their degree plan.

MUSC 2366-2. Guitar Accompanying. Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo, playing/improvising from chord charts, and arranging accompaniments from musical scores. Prereq., MUSC 1326.

MUSC 3176-2. Conducting 1. Introduces conducting and rehearsal techniques. Coreq., performance participation in the appropriate ensemble (band, choir, or orchestra). Offered fall only.

MUSC 3186-2. Conducting 2. Introduces conducting and rehearsal techniques. Coreq., performance participation in the appropriate ensemble (band, choir, or orchestra). Prereq., MUSC 3176. Restricted to music education majors. Offered spring only.

MUSC 4106-2. Guitar Literature. An analytical and historical survey of the repertoire of the guitar and its antecedents from the renaissance to the present day.

MUSC 5026-2. Percussion Literature. In-depth investigation of major original solo works for percussion, significant ensemble literature including chamber and large ensembles, and selected transcriptions. Prereqs., graduate standing in music and instructor consent.

MUSC 5036-2. Brass Literature. Investigates major original solo works for trumpet, horn, trombone, euphonium, and tuba, and ensemble literature including chamber and large settings. Offered every other spring semester.

MUSC 5106-2. Guitar Literature. An analytical and historical survey of the repertoire of the guitar and its antecedents from the renaissance to the present day. For graduate students. Same as MUSC 4106.

MUSC 5136-2. Advanced Conducting. Offers advanced work in conducting. May be repeated up to 12 total credit hours.

MUSC 5156-2. Symposium in Choral Music. Provides an advanced study of choral repertoire by style period. Required of all choral graduate students for a minimum of two semesters.

MUSC 5246-3. Jazz Improvisation and Analysis. A study of improvisation through melodic and harmonic analysis of jazz compositions, transcriptions, and the study of historic jazz solos as played by jazz masters. Recommended prereq., MUSC 3071. Offered fall only.

MUSC 5256-3. Jazz Studies Administration and Pedagogy. Studies the organization and administration of collegiate jazz programs. Topics include curriculum, program philosophy, teaching techniques, funding, teacher training, and evaluation. Recommended prereq., MUSC 3253. Offered fall only.

MUSC 5336-2. Brass Pedagogy. Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring semester.

MUSC 5346-3. Woodwind Pedagogy. Provides the knowledge and skills to teach woodwind instruments in both private studio and collegiate class settings. Considers pedagogical techniques addressing all levels of instruction.

MUSC 5356-2. Jazz Studies Practicum. Studies strategies for developing and implementing academic programs in jazz studies. Includes demonstration teaching by class members. Recommended prereq., MUSC 5256.

MUSC 5666-2. Chamber Music Literature: Woodwinds. Provides a stylistic-historical survey in various genres from Baroque era to present. May be repeated up to 12 total credit hours. Offered every other spring.

MUSC 7046-3. Seminar in Jazz Literature. Provides advanced study in jazz literature and styles. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires class presentations and a major paper or project. May be repeated up to 6 total credit hours. Recommended prereqs., MUSC 5091 and 5642. Restricted to doctoral students. Offered every other year.

Theses and Recitals

MUSC 2997-0. Sophomore Proficiency. To be completed by the second semester of the sophomore year.

MUSC 3997-1. Junior Recital.

MUSC 4957 (1-4). Senior Thesis.

MUSC 4997-1. Senior Recital.

Interdepartmental Courses

MUSC 2608-1. Alexander Technique. Investigates the discoveries and writings of F. M. Alexander regarding kinesthetic perception and coordination. Applies these contexts to specific musical activities.

MUSC 2988-1. Introduction to Music Research. Introduces music research and writing skills to provide tools necessary for successful composition of formal research papers. Applies interests and curricular goals to specific topics of student choice. May be repeated up to 12 total credit hours.

MUSC 4078-1. Piano Technician for Pianists. Familiarizes pianists with the development of the modern grand piano, its construction, and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action, and in minor tuning tasks. Recommended restriction, piano majors. Same as MUSC 5078.

MUSC 4288 (2-3). Macintosh-based Web Server Fundamentals for Musicians and Educators. Designed for music students. Teaches concepts and skills necessary to develop, host, and maintain Macintosh-based web servers and to create and serve multimedia files including video, MP3, MIDI, and PDF.

MUSC 4608-1. Advanced Studies in the Alexander Technique. Continue of MUSC 2608 with greater concentration on utilizing Alexander principles in specialized activity. Prereq., MUSC 2608 or instructor consent.

MUSC 5078-1. Piano Technician for Pianists. Same as MUSC 4078.

MUSC 5608-1. Graduate Studies in the Alexander Technique. Study of the relationship of kinesthetic perception and postural reflexes to physical coordination in performance. Analysis and research regarding Alexander's principles.

MUSC 5708-2. Introduction to Music Bibliography and Research. Explores basic informational sources about music and musicians; a study of bibliographic forms, research, and writing techniques employed in music research papers, theses, and dissertations. Required in all master's degree programs.

MUSC 5808-1. Advanced Alexander Technique for Graduate Students. Continues investigation of the benefits of Alexander's principles regarding mind-body awareness begun in MUSC 5608. Increased emphasis on utilizing principles in specialized activity. Analysis and research regarding musical activities. May be repeated up to 3 total credit hours. Prereq., MUSC 5608 or instructor consent.

MUSC 7138-3. Contemporary Issues in College Teaching. Examines music teaching within colleges and universities, including the evolution of university music programs, undergraduate and graduate music curricula, music professors and their work, and sociopolitical issues. Offered spring of odd-numbered years.

Music Entrepreneurship

MUSC 4908 (1-3). Internship in Music Business. Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit. May be repeated up to 3 total credit hours. For MUSC 4908 recommended prereq., upper-division standing. Same as MUSC 5908.

MUSC 4918-2. Building Your Music Career. Students acquire the practical skills they need to build their career as professional musicians, as well as explore the many options for putting their music education to work in the marketplace. Stu-

dents will also explore the state of live music-making today and explore ways to maintain relevance for themselves and their art in an ever-changing world.

MUSC 4958-1. Community Performances. Designed for the aspiring professional performer. Through classroom theory and off-campus application, acquire skills in programming for and communicating with diverse audiences, marketing and PR, and new paradigms of concert presentation. Will result in an actual musical presentation in the community.

MUSC 5908 (1-3). Internship in Music Business. Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit. May be repeated up to 3 total credit hours. For MUSC 4908 recommended prereq., upper-division standing. Same as MUSC 4908.

MUSC 5968-2. Entrepreneurial Ventures in the Arts. Previously Topics in Arts Entrepreneurship, this course prepares students to evaluate opportunities in their specific arts field by analyzing existing arts organizations and then applying entrepreneurial concepts to create new enterprises. Topics for research and discussion include current issues in the arts, introduction to entrepreneurship, preparing a business feasibility study, market information for new ventures, and funding sources.

Performance Music

Choral and Instrumental Music

PMUS 3271-2. Basic Improvisation. Introduces string players to the art of solo and chamber music improvisation. The areas covered include 1) Motivic improvisation in the style of J.S. Bach 2) Indian Raga-based improvisation 3) Chamber music improvisation 4) Improvising cadenzas for classical concertos. Prereq., MUSC 2111.

PMUS 4517-2. Orchestral Repertoire. Trains practice techniques for String Players to master orchestral excerpts needed for all orchestra and festival auditions. Through careful listening students learn to improve the four basic elements of orchestral excerpt preparation: Rhythm, Intonation, Tone Quality, Interpretation.

Voice

PMUS 1184-1. Voice Class. Involves basic vocal technique and easy solo repertoire taught through a group medium, for beginner and intermediate level students. May be repeated up to 6 total credit hours. Restricted to MUSC majors.

PMUS 2184-1. Voice Class. Continuation of PMUS 1184, with more advanced repertoire and vocal techniques. May be repeated up to 6 total credit hours. Prereq., PMUS 1184. Restricted to MUSC majors.

PMUS 3167-3. Opera Theatre Stagecraft. Introduction to the processes, materials, and equipment used in theatrical production. Lecture and lab requirements. Lab experiences include introductory work in the opera scenery, property, costume, and electrical shops.

PMUS 4137-1. Opera Theatre 1. Addresses issues related to young artist development. Areas of concentration include (but are not limited to) acting technique, resume preparation, audition technique, scene analysis, and role preparation. The acting technique is addressed in this course through textbook reading and exercise. May be repeated up to 12 total credit hours.

PMUS 4147-1. Opera Theatre 2. Continuation of PMUS 4137. Further scene analysis and movement exercises are addressed in this class. May be repeated up to 12 total credit hours. Prereq., PMUS 4137.

PMUS 4157 (1-3). Opera Practicum.

PMUS 4167 (1-3). Opera Theatre Lab. Advanced work in the scenery, property, costume, and electrical shops in opera performance. Additional experiences may include positions with opera run crews, the box office, or other supporting areas. May be repeated up to 12 total credit hours.

PMUS 4497 (1-2). Vocal Repertoire Coaching. Group coaching class to prepare for voice recitals as well as to learn vocal repertoire including historical background, composers, styles, and poetic interpretation. May be repeated up to 12 credit hours.

PMUS 5137-2. Opera Theatre 1. Addresses issues related to young artist development at the graduate level. Areas of concentration will include (but are not limited to) acting technique for singers, resume preparation and scene and character analysis. Students will participate in acting and improvisation exercises. Substantial classical voice study is required and this course is recommended for voice majors only. May be repeated up to 12 total credit hours.

PMUS 5147-2. Opera Theatre 2. Continuation of PMUS 5137. May be repeated up to 12 total credit hours. Prereq., PMUS 5137.

PMUS 5184-1. Graduate Voice Class. Teaches solo and choral singing and vocal modeling. Designed for choral and music education graduate students. Prereq., instructor consent.

PMUS 5497 (1-2). Vocal Repertoire Coaching. Group coaching class to prepare for voice recitals as well as to learn vocal repertoire including historical background, composers, styles, and poetic interpretation. Class may fulfill voice literature requirements when appropriate classes are not offered. Also available: weekly individual coaching to prepare for voice recitals and other projects. Diction, musical styles, and interpretation (music and text) are the main focus of this course. May be repeated up to 12 credit hours. For graduate voice students and collaborative pianists.

Keyboard Musicianship

PMUS 1105-1. Keyboard Musicianship 1. Introduces the keyboard, music reading in the treble and bass clefs, basic theory and keyboard harmony, technical patterns, and improvisation. Studies easy classical and pop repertoire. May be repeated up to 12 total credit hours. Restricted to music majors with no keyboard experience or instructor consent required.

PMUS 1205-1. Keyboard-Musicianship 2.

PMUS 1515-2. Jazz Piano Class. Offers small group instruction in the concepts and skills required to learn jazz piano. Students not only learn basic techniques required to play jazz but also become familiar with the theory, grammar, and lexicon of the jazz language. May be repeated up to 4 total credit hours. Prereq., PMUS 1205 or instructor consent required. Offered spring only.

PMUS 2105-1. Keyboard-Musicianship 3. Continuation of PMUS 1205. May be repeated up to 12 total credit hours. Prereq., PMUS 1205 or instructor consent required.

PMUS 2205-1. Keyboard-Musicianship 4.

PMUS 4105-1. Supervised Accompanying. Assigned projects, both vocal and instrumental, are coached by collaborative piano faculty and others. May involve recital, jury, or master class performances. Prereq., MUSC 1325 and MUSC 2365 or instructor consent.

Thesis Music

TMUS 4403 (1-3). Special Studies. Offers advanced studies in specific areas or special projects in selected areas. For undergraduate majors only. See current online Schedule Planner for specific course number. May be repeated for additional credit.

TMUS 4493 (1-3). Special Studies. Offers advanced studies in specific areas or special projects in selected areas. For undergraduate majors only. See current online Schedule Planner for specific course number. Numbered TMUS 4403–4493. May be repeated for additional credit.

TMUS 5504 (1-3). Special Studies. Offers graduate studies in specific areas or special projects in selected areas. For master's degree students only. See current online Schedule Planner for specific course number. May be repeated for additional credit.

TMUS 5594 (1-3). Special Study-Omnibus. Offers graduate studies in specific areas or special projects in selected areas. For master's degree students only. See current online Schedule Planner for specific course number. Numbered TMUS 5504–5594. May be repeated for additional credit.

TMUS 5605 (1-3). Special Studies. Offers advanced graduate studies in specific areas or special projects in selected areas. For doctoral degree students only. See current online Schedule Planner for specific course number. May be repeated for additional credit.

TMUS 5695 (1-3). Special Study-Omnibus. Offers advanced graduate studies in specific areas or special projects in selected areas. For doctoral degree students only. See current online Schedule Planner for specific course number. Numbered TMUS 5605–5695. May be repeated for additional credit.

TMUS 6947-1. Candidate for Master of Music.

TMUS 6956-2. Master's Thesis.

TMUS 6957-2. Master's Thesis 2.

TMUS 8019-1. Precandidate for Doctor of Musical Arts.

TMUS 8029-1. Candidate for Doctor of Musical Arts.

TMUS 8119 (1-4). Composition Project 1. Students compose works in a variety of genres, totaling at least 30 minutes of music. Students meet weekly with a composition teacher to discuss and develop their works. Restricted to DMA composition students.

TMUS 8129 (1-4). Composition Project 2. Students compose works in a variety of genres, totaling at least 30 minutes of music. Students meet weekly with a composition teacher to discuss and develop their works. Prereq., TMUS 8119. Restricted to DMA composition students.

TMUS 8219-3. Dissertation Project 1 (Solo Recital, Choral Concert, Composition).

TMUS 8229-3. Dissertation Project 2 (Solo Recital, Choral Concert, Composition, Vocal Pedagogy).

TMUS 8239-3. Dissertation Project 3 (Chamber Music Recital, Vocal Pedagogy Project, Choral Project, Composition Recital).

TMUS 8249-3. Dissertation Project 4 (Chamber Music Recital, Choral Project, Composition Recital, Wind/Percussion Practicum).

TMUS 8259-3. Dissertation Project 5 (Research Lecture).

TMUS 8269-3. Dissertation Project 6 (Research Lecture).

TMUS 8279 (1-3). Performance Research Document 1.

TMUS 8289-1. Performance Research Document 2.

TMUS 8299-1. Performance Research Document 3.

TMUS 8309-1. Performance Research Document 4.

TMUS 8319-3. Repertoire Project.

TMUS 8329 (2-6). Document/Pedagogy Project.

TMUS 8339 (3-6). Major Composition.

TMUS 8998 (1-10). PhD Thesis.

Music Ensembles

Both large and small ensembles are offered fall and spring semesters for 1 credit each. They are open to all university students. Participation in all ensembles is by audition.

Bands: Campus Band, Concert Band, Court Players, Marching Band (fall only), Symphonic Band, Wind Symphony.

Choirs: Collegiate Chorale, University Choir, University Singers, Women's Chorus, and Men's Chorus.

Orchestras: Campus Orchestra, Chamber Orchestra, Symphony Orchestra.

Ensembles: Early Music Ensemble, Electronic Music Ensemble, Guitar, Jazz, New Music, Percussion, World Music.

Chamber Music: Brass, Piano, String, Woodwind.

Opera: Opera Practicum, Opera Theatre.

Other Academic Programs

Alliance for Technology, Learning, and Society (ATLAS)

ATLS 4809-3. Computer Animation. Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out. CSCI 4809/5809 and ATLS 4809/5809 are all the same course.

ATLS 5809-3. Computer Animation. Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out. CSCI 4809/5809 and ATLS 4809/5809 are all the same course.

ATLS 1220-4. Virtual Worlds: An Introduction to Computer Science. Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science. Same as CSCI 1220."

ATLS 1240-3. The Computational World. Introduces and explores the "Computational style of thinking" and its influence in science

ATLS 1710-3. Tools and Methods for Engineering Computing. Designed for students with little or no programming background. Students learn procedural and object-oriented programming through development of games, simulations, and animations using Flash/Actionscript, VB/Excel, JAVA, MATLAB, and real-world applications. Activities are oriented toward smaller projects that address topics in beginning science, engineering, and mathematics courses. Students gain practical, applicable skills. Same as APPM 1710.

ATLS 1720-3. Programming and Simulation Development. Students learn to plan, develop, and test applications (games, simulations, and animations) that embody mathematical formulations of problems in areas such as transportation, nutrition, and alternative energy. Prereq., ATLS 1710 or knowledge of an object-oriented programming language. Same as APPM 1720.

ATLS 2000-3. The Meaning of Information Technology. Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Equips students with an understanding of technological transformations in interpersonal, organizational, and mass communication. Emphasis is on the technological, social and political changes that underlie the movement toward a digital society. HUEN 2020 is restricted to ENGR majors only. ATLS 2000 is restricted to TAM students. Same as HUEN 2020.

ATLS 3010-3. Digital Media 1. Introduces techniques, software, and related concepts of digital design and image making through individual and group projects. Emphasizes digital animation, digital audio, digital video and website design and development as a means to formal and expressive ends. Introduces students to critical readings and theories related to digital media practice. May be repeated up to 6 total credit hours. Prereq., ATLS 2000. Restricted to TAM students.

ATLS 3020-3. Digital Media 2. A continuation of Digital Media 1 (ATLS 3010), this course introduces students to advanced digital media development including interactive programming, scripting, and database functionality. Emphasizes a historical and conceptual understanding of programming and computational theories. Prereq., ATLS 2000. Recommended prereq., ATLS 3010. Restricted to students with minor in Technology, Arts & Media (MTAM).

ATLS 3110-3. Motion Design. An animation-based projects course that advances student understanding of motion design in today's culture. Through active production and critical analysis, students will create new media projects and critically examine the history, social implications, and impacts of these forms of mass media. Prereq., ATLS 2000. Recommended prereq., ATLS 3010.

ATLS 3112 (1-3). Digital and Social Systems Professional Development. Supports students in developing professional skills and practices in human computer interaction, design of interactive systems, computer supported cooperative work,

computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming. May be repeated up to 10 total credit hours. Same as CSCI 3112.

ATLS 3120-3. Net Presence. An Internet-based projects course that advances student understanding of Internet culture. Through active production and critical analysis, students will explore their individual roles in the digital landscape and critically examine the social implications and impacts of digital communities. Prereqs., ATLS 2000 and 3010. Recommended prereq., ATLS 3020.

ATLS 3500 (1-3). Client Projects in Technology, Arts and Media. Allows undergraduate students to work on collaborative projects with faculty and with external organizations under faculty supervision. The course will focus on teamwork, conceptual planning, technical design and development, and working within real-world client environments. Critical skills include project research, planning, design, development, trouble-shooting, and presentation. Prereqs., ATLS 2000, 3010, or instructor consent. Recommended prereq., ATLS 3020. May be repeated up to 6 total credit hours.

ATLS 3519 (1-3). Special Topics in Technology, Arts, and Media. Analyzes special interest areas of multidisciplinary technology, arts and media research and practice. May be repeated up to 12 total credit hours for different topics. Prereq., ATLS 2000. Recommended prereq., ATLS 3010.

ATLS 4010-3. Capstone Projects. The focus of this advanced practicum course is the development of an individual thesis project. Specific class sessions will feature a combination of lectures, demonstrations, guest speakers, lab sessions, and critiques. This course also entails group work, portfolio development, critical theoretical readings, and a significant written component. May be repeated up to 6 total credit hours. Prereqs., ATLS 2000, 3010, and 3020. Restricted to students with minor in Technology, Arts & Media (MTAM).

ATLS 4519 (1-3). Advanced Special Topics in Technology, Arts, and Media. Analyzes special interest areas of multidisciplinary technology, arts and media research and practice. May be repeated up to 9 total credit hours. Prereq., instructor consent. Recommended prereqs., ATLS 2000, ATLS 3010, and ATLS 3020. Same as ATLS 5519.

ATLS 4900 (1-6). Undergraduate Independent Study. Provides opportunities for independent study at the upper-division undergraduate level. Students work on research or a creative project guided by faculty. May be repeated up to 9 total credit hours. Prereqs., ATLS 3010, 3020, and consent of instructor.

ATLS 5150-1. Managing Effectively in a Changing Telecommunications Environment. Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world. Same as TLEN 5150.

ATLS 5380-3. Future of Video: Technology, Policy, and Economics. Examines the issues that have been created by the shift from analog to digital technologies, the shift from narrowband/wideband systems to broadband systems, and the shift to converged networks (i.e. networks able to convey voice, data, image and video traffic on a common platform) based upon packet switching and Internet Protocol (IP) suite. Prereq., TLEN 5210. Same as TLEN 5380.

ATLS 5519 (1-3). Advanced Special Topics in Technology, Arts, and Media. Same as ATLS 4519.

ATLS 5900 (1-6). Masters Level Independent Study. Provides opportunities for independent study and research at the Masters level. Students work on research project guided by faculty. May be repeated up to 6 total credit hours. Prereq., instructor consent. Restricted to ATLS graduate students in good academic standing.

ATLS 7000-1. ATLAS Seminar. This student/faculty seminar critically examines issues in technology, media and society from the multiple interdisciplinary perspective of the gathered participants. Topics may include: IT and business, security, ethics, globalization, digital divide, IT and education, human computer interaction and others. May be repeated up to 8 total credit hours. Instructor permission required.

ATLS 7800-2. Online Course Design for the Foreign Languages. Learn about the challenges and affordances of designing online foreign languages courses. Read research articles and book chapters pertaining to instructional design issues

and online teaching strategies. Experiment with the latest forms of educational technologies. Students enrolled in the course will design and teach a two-week online language course. Prereq., two years of language teaching experience at the college level.

ATLS 7900 (1-6). Doctoral Level Independent Study. Provides opportunities for independent study and research at the Doctoral level. Students perform independent research under faculty supervision. May be repeated up to 6 total credit hours. Prereq., instructor consent. Restricted to ATLS PhD students in good academic standing.

ATLS 8990 (1-10). Doctoral Dissertation. Approved research conducted under the supervision of members of the graduate faculty. Investigates some specialized topic or field in the area of interdisciplinary information and communication technology. All doctoral students must register for at least 30 hours of dissertation credit as part of the requirement for the ATLAS doctoral degree. Prereq., instructor consent. Restricted to ATLS PhD students in good academic standing.

Career Services

CSVC 1000-1. Work Internship. A one credit pass/fail course, opened to students in good academic standing, whose internship employers require that they receive course credit. The student must first seek to obtain academic credit through their major department. Will not count toward degree requirements in any CU-Boulder school or college. No appeals for credit toward degrees or for letter grades in the course will be entertained.

Leadership Residential Academic Program at Williams Village

LDSP 1000-3. The Foundations of 21st Century Leadership. Introduces students to the critical need for and approaches to the practice of creative and effective leadership. Premised on the idea that the potential for leadership is present in all of us. Approved for arts and sciences core curriculum: ideals and values.

LDSP 1561-1. Compassionate Leadership and Mindfulness. Explores various practices and traditions that lead to a balanced, physical, mental, emotional, and spiritual life critical to the practice of effective leadership. May be repeated up to 3 total credit hours.

LDSP 1571-1. Topics in Leadership. Examines the complex nature of leadership by applying knowledge and practice to contemporary and social issues. May be repeated up to 3 total credit hours.

LDSP 2400-3. Understanding Privilege and Oppression in Contemporary Society-Leadership. Broad-based, multicultural, multidisciplinary course. Covers the interaction of privilege and oppression in the U.S., focusing on race, socioeconomic class, sexual orientation, and physical ability, as well as leadership skills needed to function in a multicultural, global society. Same as FARR 2400. Approved for arts and sciences core curriculum: human diversity or contemporary societies.

LDSP 2910 (1-3). Field Practicum 1. Offers supervised campus and off-campus experiences tied to course work in the Leadership RAP or the INVST program. See also LDSP 2920. May be repeated up to 6 total credit hours. Same as EDUC 2910.

LDSP 2920 (1-3). Field Practicum 2. Offers supervised campus and off-campus experiences tied to course work in the Leadership RAP or the INVST program. See also LDSP 2910. May be repeated up to 6 total credit hours. Same as EDUC 2920.

LDSP 3100 (3-4). Multicultural Leadership: Theories, Principles and Practices. Focuses on leadership theories and skills necessary for effectiveness in multicultural settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change through comparative analyses of western and non-western theories and practices. Same as ETHN 3201 and INVST 3100. Approved for arts and sciences core curriculum: human diversity.

LDSP 4010-4. Critical Issues in Leadership: A Capstone Course. Critical thinking is fundamental to leadership competency. Leaders must have skill at making judgments and collecting information from a variety of sources and on topics in which they have limited expertise. Students read, discuss, and write critical evaluations of contemporary leadership theory from an ethical, military, com-

munity building, and business perspective. Prereq., a minimum of 10 credit hours towards the Leadership Certificate completed.

LDSP 4932 (1-6). Community Leadership in Action, Part 2. Develops students' expertise as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community advisor, students learn organizational and leadership skills by designing, implementing and evaluating a community-based project. First-hand experience provides students with a deepened understanding of the complex issues facing humanity, and competence with solution-based strategies. May be repeated up to 6 total credit hours. Same as INVS 4932.

Norlin Scholars

NRLN 2000-3. Ways of Knowing: Constructions of Knowledge in the Academy and Beyond. Explores different ways of knowing from interdisciplinary, cross-cultural perspectives. Course begins with personal interrogations of students' primary learning modes. It goes on to examine cultural assumptions about schooling, learning and knowledge, and looks at how different disciplines, gender, race, class, and other categories of identity shape and interpret concepts of knowledge. Same as ARSC 2000. Approved for arts and sciences core curriculum: ideals and values.

NRLN 3000 (1-3). Norlin Scholars Special Topics. Provides students a small, interdisciplinary seminar experience focusing on critical reading and writing, discussion, and experiential and practical learning. Students will apply their disciplinary knowledge and personal experiences to course content. May be repeated up to 6 total credit hours provided the topics are different. Restricted to Norlin Scholars.

NRLN 3020-3. Topics in Writing: Norlin Scholars. Focuses on reading, analysis, and writing about major ideas and/or events. Emphasizes close, careful reading, thoughtful analysis, and student writing. Provides a high-level academic course that enhances reading, writing, and thinking skills. May be repeated up to 6 total credit hours. Same as WRTG 3020. Approved for arts and sciences core curriculum: written communication.

Presidents Leadership Class

PRLC 1810-3. Leadership and Ethics. Introduces fundamental principles of leadership and ethics. Emphasizes application of the principles for self-development and organizational effectiveness. Approved for arts and sciences core curriculum: ideals and values.

PRLC 1820-3. Community Issues in Leadership. Explores challenges to leadership at the community level such as drug abuse, poverty, decline of infrastructure, care of the aged, etc. Gives particular attention to the development of effective leadership responses to community difficulties at university, city, state, and national levels. Approved for arts and sciences core curriculum: contemporary societies.

PRLC 2810-3. Global Issues in Leadership. Examines the challenges of leadership posed by change and major global issues affecting everyone. Explores issues such as human rights, hunger, disease, large-scale collective violence, and environmental deterioration with a special emphasis on effective, long-term leadership strategies.

PRLC 2820-3. Multilevel Issues in Leadership. Studies multilevel issues that originate in organizational settings but carry community and global implications. Encourages students to fully explore the complexity and interrelatedness of issues with a special emphasis on leadership and ethical implications.

PRLC 3810-3. Global Issues in Leadership. Examines the challenges to leadership posed by major global issues. Problems in the areas of human rights, hunger, disease, large-scale collective violence, and environmental deterioration are explored with a special emphasis on the development of effective, long-term leadership strategies. Prereqs., PRLC 1810, PRLC 1820, and PRLC 2820.

PRLC 4010-4. 21st Century Leadership. An advanced course that focuses on critical analysis of leadership principles and techniques. Designed to provide theoretical and hands-on experience for individuals who wish to function in leadership roles at high levels of competence in the workplace and in the civic arena.

Reserve Officer Training Corps (ROTC)

Air Force Aerospace Studies

AIRR 1010-1. Foundations of the United States Air Force 1. One 1-hour lecture and one 2-hour lab per week. Introduces students to the U.S. Air Force and the USAF officer profession. Uses instructor lectures, films and videos, and group activities to examine Air Force issues, officership qualities, and military customs and courtesies. Emphasizes the communication skills necessary for an Air Force officer.

AIRR 1020-1. Foundations of the United States Air Force 2. A continuation of AIRR 1010-1. One 1-hour lecture and one 2-hour lab per week.

AIRR 2010-1. The Evolution of USAF Air and Space Power 1. One 1-hour lecture and one 2-hour lab per week. Studies air power from balloons and dirigibles through the jet age and historically reviews air power employment in military and nonmilitary operations in support of national objectives. Looks at the evolution of air power concepts and doctrine and introduces the development of communicative skills.

AIRR 2020-1. The Evolution of USAF Air and Space Power 2. A continuation of AIRR 2010. One 1-hour lecture and one 2-hour lab per week.

AIRR 3010-3. Air Force Leadership Studies I. Two 1 1/2-hour seminars plus one 2-hour lab per week. Provides an integrated management course emphasizing concepts and skills required by the successful manager and leader. Includes individual motivational and behavioral processes, leadership, communication, and group dynamics while providing foundation for the development of the junior officer's professional skills (officership). Emphasizes decision making and use of analytic aids in planning, organizing and controlling in a changing environment. Discusses organizational and personal values (ethics), management of change, organizational power, politics, managerial strategy, and tactics within the context of military organization. Uses actual Air Force case studies throughout the course to enhance the learning and communication process.

AIRR 3020-3. Air Force Leadership Studies II. Two 1 1/2-hour seminars and one 2-hour lab per week. Continuation of AIRR 3010. Emphasizes basic managerial processes while employing group discussions, case studies, and role playing as learning devices. Continues to emphasize the development of communicative skills.

AIRR 4010-3. National Security Affairs/Preparation for Active Duty. Two 1 1/2-hour seminars and one 2-hour lab per week. Studies U.S. national security policy which examines the formulation, organization, and implementation of national security policy; context of national security; evolution of strategy; management of conflict; and civil-military interaction. Also includes blocks of instruction on the military profession/officership, the military justice system, and communicative skills. Provides future Air Force officers with the background of U.S. national security policy so they can effectively function in today's Air Force.

AIRR 4020-3. National Security Forces in Contemporary American Society 2. Two 1 1/2-hour seminars and one 2-hour lab per week. A continuation of AIRR 4010. Includes defense strategy conflict management, formulation/implementation of U.S. defense policy, and organizational factors and case studies in policy making, military law, uniform code of military justice, and communication skills.

Military Science (U.S. Army)

MILR 1011-2. Adventures in Leadership 1. Introduces fundamentals of leadership and the United States Army. Examines its organization, customs, and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing techniques, and some basic military tactics.

MILR 1021-2. Adventures in Leadership 2. Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.

MILR 2031-3. Methods of Leadership and Management 1. Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as mid-level leaders in the cadet organization.

MILR 2041-3. Methods of Leadership and Management 2. Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.

MILR 3052-3. Military Operations and Training 1. Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft, and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs.

MILR 3062-3. Military Operations and Training 2. Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order, and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience. Prereq., consent of the Professor of Military Science.

MILR 4072-3. Officer Leadership and Development 1. Examines management and leadership concepts and techniques associated with planning and executing military training and operations at company and higher echelons. Includes analyses of professional ethics and values, effective training principles and procedures, subordinate counseling, and effective staff officer briefing techniques. Also investigates other subjects such as counter terrorism, modern peacekeeping missions, and the impact of the information revolution on the art of land warfare. Conducted both in and out of classroom setting and with multiple practical leadership opportunities to organize cadet training and activities. Prereq., consent of the Professor of Military Science.

MILR 4082-3. Officer Leadership and Development 2. Continues MILR 4072 study of management and leadership concepts and techniques, providing practical leadership experiences in the classroom and during multiple cadet-run activities. Also examines varied topics such as theory and practice of the military justice system, law of war, military-media relations, support mechanisms for soldiers and their families, operational security considerations, and historical case studies in military leadership in the context of 21st century land warfare. Prereq., consent of the Professor of Military Science.

Naval Science

NAVR 1010-2. Introduction to Naval Science. Introduces the structure, missions, and functions of the United States Navy and Marine Corps. Also covers military law, leadership, naval history, and concepts of sea power.

NAVR 2020-3. Seapower and Maritime Affairs. Studies the importance of seapower in history including naval, maritime, and other commercial uses of the sea. Emphasizes significant milestones in the history of the U.S. Navy and Marine Corps and their role in the national strategies and policies of the United States.

NAVR 3020-3. Naval Operations and Seamanship. Examines the Inland and International Rules of the Nautical Road, including court interpretations, principles of relative motion and vector analysis with the maneuvering board, ship handling procedures, weather, communications, tactical operations, and maritime law.

NAVR 3030-3. Naval Engineering Systems. Studies in detail ship propulsion and related auxiliary systems. Emphasizes fossil fuel and nuclear steam and gas turbine systems. Stresses design constraints imposed by unique marine environment.

NAVR 3040-3. Weapons and Systems Analysis. Introduces theoretical concepts upon which modern naval weapons systems are designed and constructed. Specific areas of study include physics of underwater sound propagation, pulse radar theory, automatic tracking principles, and fundamentals of missile guidance.

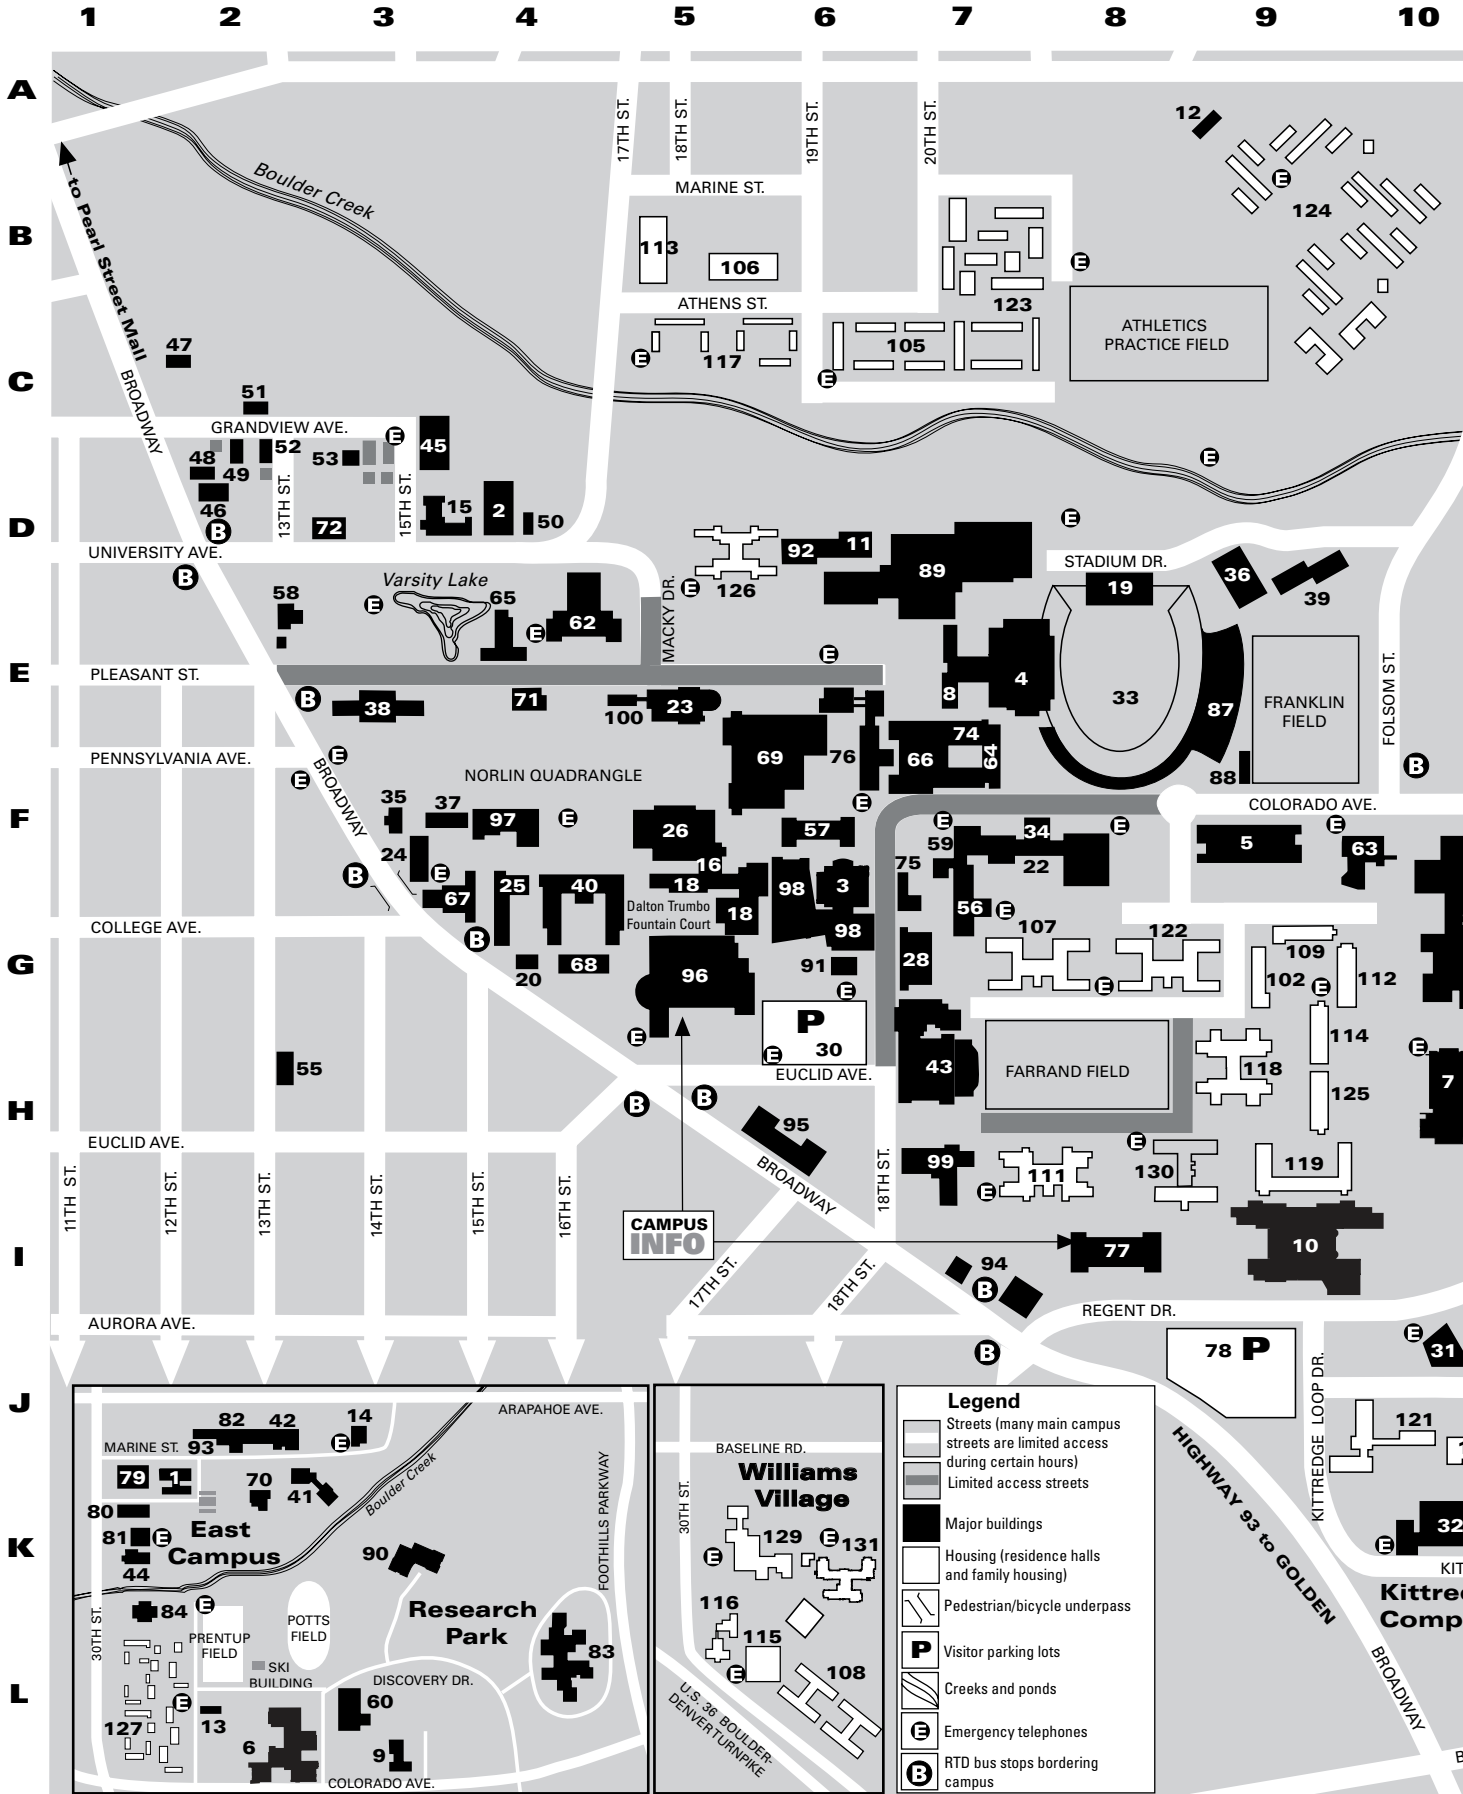

NAVR 3101-3. Evolution of Warfare. Traces the development of warfare, focusing on the impact of military theorists and technical developments. Assists students to acquire a sense of strategy, develop an understanding of military alternatives, and see the impact of historical precedent on military actions.

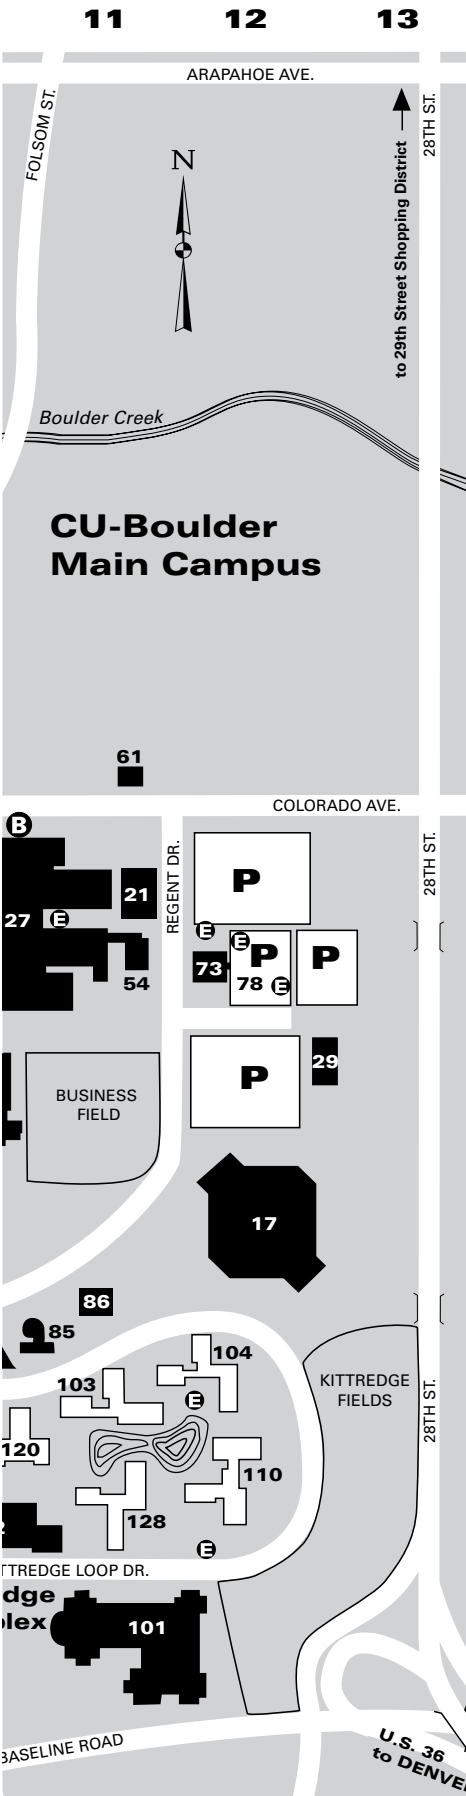

NAVR 4010-3. Leadership and Management 1. Comprehensively studies organizational leadership. Emphasizes motivation, communication, empowerment, and needs of subordinates. Studies the role of professional and personal ethics in organizational leadership.

NAVR 4020-3. Leadership and Ethics. Studies the ethics and laws of armed conflict, analyzing the leadership responsibilities of officers in conflict. Studies the military justice system and Naval legal administrative procedures, comparing military law with civilian criminal and civil law. Defines the responsibilities of junior officers within the military justice system.

NAVR 4030-3. Navigation. Offers theory and practical application in the art of navigation: charts, publications, piloting, dead reckoning, navigation aids and instruments, time, sextant use, electronic fixing, global positioning system, and voyage planning.

NAVR 4101-3. Amphibious Warfare. Surveys the development of amphibious doctrine. Emphasizes the evolution of amphibious warfare in the 20th century. Explores present-day potential and limitations on amphibious operations, including the rapid force deployment concept.
